The secretary of the Tiffin (O.) chamber of commerce calls on at least five members of the chamber daily, asking them for the following: First, attention to payment of dues; second, suggestions as to how the chamber can be of benefit to their business and to the community generally; third, names of additional prospective members. This gives every member the sense of personal attention, and gives him an opportunity to express himself freely, providing a constructive campaign of work for the chamber.

A REAL NECESSITY

No Advertiser can Successfully Develop Trade in the Market Afforded by the People of Fulton, Unless He Employs the Advertising Columns of

THE FULTON EVENING TIMES

¶ Remember that its circulation represents ONE-SIXTH of the population of Fulton, therefore it is necessary to use *The Evening Times* to make your proposition a success.

¶ *The Evening Times'* readers represent the same classes as any other paper circulated in this vicinity, who are, collectively, the all-powerful people for the advertiser to reach.

¶ The people of Fulton reached by *The Evening Times* buy ONE-SIXTH of everything sold in the city. They have money to buy luxuries as well as necessities, and they read THIS PAPER because it is their Home Paper—edited, printed and circulated by "Home Talent" who spend their money for the upbuilding of Fulton—your City.

¶ Readers of *The Evening Times* are a big, mighty crowd—to neglect them, to ignore them means a lack of business judgment, and it requires the support of the big crowd to put things over.

THE BIG CROWD OF FULTON—READ YOUR HOME PAPER

"A HERALD OF PROGRESS"

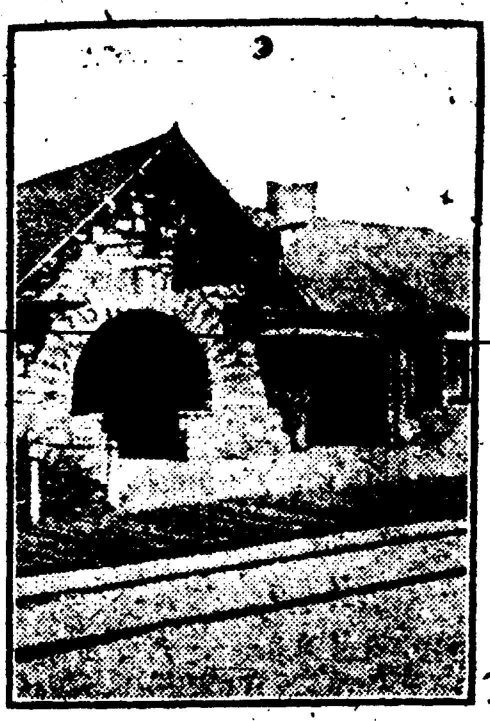
PRETTY STATIONS ON RAILROADS

Importance of Attractive Appearance From Car Window.

DEPOTS ARE INDICATORS.

First Impressions Are the Most Powerful and Lasting, Therefore the Get Up of a Suburban Station Has Its Influence Upon the Passerby.

When it is remembered that first impressions are the most powerful and the most lasting it will be easy to realize how highly important to a suburb is the appearance of the railroad station, which is generally the entrance to the village, writes Robert H. Van Comb in Art and Progress. With a majority of the people the opinion which is formed of a place is based very largely upon its appearance as seen from the vantage point of a car window. The village may possess attractions which do not appear to the



AN ATTRACTIVE SUBURBAN STATION.

casual passerby, but the station and its surroundings are generally considered representative of the place, and upon their appearance a judgment—either favorable or unfavorable—is very apt to be formed.

The problem is complicated by the fact that in the vast majority of instances the business quarter of a village is situated immediately about the station, and such quarters, which are apt to be more or less unattractive, have a great effect upon the appearance of what is the very heart of the community life. There are countless instances, particularly in the newer suburbs of large cities, where the entire development has been controlled and directed by a firm of real estate operators, where the problem has been very skillfully and successfully managed and the station and its surroundings are both beautiful and picturesque. In most suburbs, however, the ownership of such property is in the hands of many different individuals, and it is difficult to awaken the public spirit or to obtain the co-operation necessary for any plan of really successful betterment.

Many years ago the officials of one railroad so fully realized the opportunities which were theirs that the care of its stations—the rearrangement of such as already existed and the planning of those yet to be established—was given into the charge of an official assisted by a corps of draftsmen, designers and landscape gardeners and aided by the resources of a nursery for the growing of shrubbery and other plants. The dignity and beauty of many of the suburban railroad stations about an eastern city prove the wisdom of the plan.

The forlorn and unattractive station was taken in hand—its architectural shortcomings were quickly remedied by a clever architect who supervised the alterations made by the company's construction department. An equally clever landscape gardener would decide upon the treatment necessary to secure the most attractive use of any natural advantages which the surroundings might possess and the best means of concealing what could not be remedied. The newer stations presented opportunities for working out really beautiful results both in the planning of the stations and in the arrangement of their grounds. The late H. H. Richardson, one of the greatest of American architects, designed several of the station buildings, which even today are models of all that a suburban railroad station should be.

Where the initiative is not taken by the railroad authorities it must logically come from residents of the village itself, and there are countless instances of the improvement of entire communities and the awakening of local civic pride by village improvement leagues.

A Live Municipality.

The celebration of the twenty-fifth anniversary of Wilmerding, Pa., will be held some time early in September next. The tentative plans which will be worked out by the general committee and many subcommittees of the Wilmerding board of trade will include several big historical pageants which will detail the history of Wilmerding from the time it was a hamlet of several houses in North Versailles township until the present time.

The caterpillar, though a sociable creature, tries to keep out of everybody's way. Some species hide on the under surface of leaves, others on the stems or blades of grass, which serve them as food; others, again, build little nests for concealment or lie snugly hidden between the curled edges of leaves, which they draw close together until the opposite edges meet. The caterpillar is a sociable creature in his own family. He knows that there is safety in numbers, and you will find whole companies feeding side by side while keeping a sharp lookout for their bird enemies, but when a caterpillar is by himself he scarcely dares to move for fear of attracting attention. Even when he is obliged to change his skin he doesn't venture to leave his old coat lying around. The moment that he takes it off he eats it. The caterpillars that live in companies shed their skin boldly. Only the poor solitary fellows feel forced to swallow their old clothes.—London Mail.

Chivalry In Battle.

There was some chivalry in a naval fight in the good old days of Blake and Van Tromp, when sneaking submarines and barbarous torpedoes were unknown and naval commanders "courted war like a mistress."

When the Spanish Admiral Oquendo declined to come out of the shallow waters of Goodwin sands to fight because he had no powder Van Tromp said, "I have powder enough for both. I will give him half mine."

"It is not only powder I need, but masts for my ships," replied Oquendo. To which Van Tromp replied, "I have plenty of masts, a whole shipload of them, and you can have them if you will only come out and meet me."

The result justified the caution of Oquendo, for when the two fleets did meet the Spaniards were so terribly beaten by the Dutch that of sixty-seven ships only eighteen reached Dunkirk in safety.—Army and Navy Journal.

Scotland and Cakes.

Scotland came to be known centuries ago as the "Land o' Cakes" and as such has been celebrated in prose and poetry. One may yet in traveling through that northern land come upon country inns and herders' huts, see women who never attended a "cooking school" and who, over a peat fire in the great chimney place, a griddle swung by a crane over the slow coals, baking a cake more than a foot in diameter, savory and promising of a meal for the gods, and who, when the big cake is ready for the turning, will seize the griddle by the handle, give it a toss in the air and turn that cake with an art motion not to be seen in any other place on earth, the big, round slab turning a loop the loop and alighting with the other side down in the same place as before to the breadth of a slender stem of the heather.—Exchange.

Yeast In Bread.

In the dough from which bread is made there is a lot of sugar, which contains carbon, hydrogen and oxygen. It is necessary to ferment this sugar to make bread edible, and yeast is used because it has the power to do this. It is made from a plant having this quality. Fermenting sugar is equivalent to burning it, and there are two results. One is the formation of carbonic acid gas. A great deal of this gas is caught in the dough in the form of large or small bubbles, and some of it escapes into the air. The part that cannot escape causes the dough to rise and makes the bread light. The holes in bread are the little pockets which held the carbonic acid gas. The effect of the bubbles is to lift the body of dough so that the heat can penetrate readily and bake it properly.—Boston Herald.

A Morbid Desire.

Two octogenarian darkies at White Sulphur Springs, having been employed by one hotel management since old time war days, are now retained as pensioners, though they occasionally do light and pottering jobs about the place.

One day not long ago they were languidly raking leaves on the lawn. As a lady passed she heard them quarreling and stopped to listen.

"Nigger," stated the older of the pair, "does you know whut I wish't? I wish't dat hotel yonder had a thousan' rooms in it and you wuz laid out daid in ev'y room!"—Saturday Evening Post.

Overcharged.

In a western town the attorney for the gas company was making a popular address.

"Think of the good the gas company has done," he cried. "If I were permitted a pun I would say in the words of the immortal poet, 'Honor the light brigade!'"

Whereupon a shrill voice came from the rear, "Oh, what a charge they made!"—New York Times.

Doing His Best.

Teacher—Is there no way I can induce you, Johnny, to take some interest in your algebra? Johnny—Certainly, Miss Jinks. In fact, I do take an interest, but somehow I don't seem to be able to get hold of the principle.—Richmond Times-Dispatch.

Almanacs.

Almanacs are in existence that were compiled in the fourteenth century, but they are only in manuscript. The first printed almanac was issued about the year 1475.

Men of loftier mind manifest themselves in their equitable dealings, small minded men in their going after gain.—Confucius.

PUBLIC GARDENS FOR CHILDREN

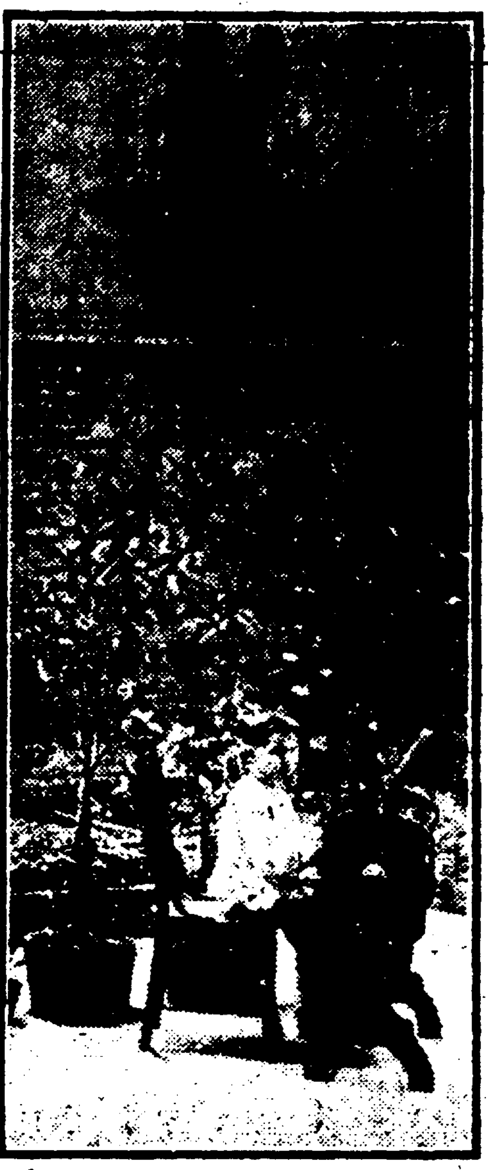
Successful In Western Cities, Idea Travels Eastward.

ASSUMES NATIONAL SCOPE.

An Important Problem of Education Is Involved Which Can, It Is Believed, Be Solved In No Other Way So Well as by Home Gardening Done by Children Under School Direction.

The child's garden movement has recently struck New York city. From the west it has come, and Portland, Los Angeles, San Francisco, Denver, St. Louis, Milwaukee and many other cities are already proud of their school children's gardens. In New York, too, it has been tried in a tentative manner, but now that the International Child Welfare league has taken it in hand the child gardening movement is assuming importance. The movement has become one of national scope, and everywhere so far it has proved a great success.

The enthusiasts who are directing the movement are confident that the establishment of children's gardens will solve many questions. They differ, however, as to its main object. Some say that the value lies in the fact that children will be taught habits



IN A CHILD'S GARDEN.

of industry. Others say that children who have formerly worked in mills and factories may add to the family means by raising vegetables instead and thus the child labor evil will be lessened. Others say that the main object is to teach children the fundamental principles of morality; that each individual must by some kind of labor contribute to the common wealth as much as he takes out of it. All are agreed, however, that it will mean health, strength and joy in labor to the children who work in these gardens.

Children are now at work cleaning up back yards and vacant lots and dividing the land into plots. An experienced gardening instructor superintends the work and suggests what is needed. The soil is examined, and the qualities that are lacking are added. Seeds are being provided to the children by the gardening committee of the Child Welfare league and by several large seed houses.

In this situation is involved an important problem of education and economics which can, it is believed, be solved in no other way so well as by home gardening done by children under the direction of the school. In other large cities where vacant lots in the suburbs have been turned over to the children to use as gardens a teacher who understood practical and theoretical gardening was employed to direct the work of the children throughout the summer. When the first interest and enthusiasm began to flag it was she who revived a new interest in the growing of vegetables and flowers; it was she who inspired the weeding, the hoeing and raking that must be kept up during the hot days of July.

Adolph Lewisohn, chairman of the home garden committee of New York city, had this to say of another aspect of the movement:

"In England, Holland, France, Germany—in every European country, for that matter—every piece of ground is utilized, and the result of this cultivation is a beauty that our country lacks. The bald ugliness of American towns and cities is due in a large measure to this neglect of unoccupied ground. We pile up our vacant lots and the outskirts of our cities with tin cans, unsightly dumps and all sorts of refuse. The first thing a foreigner notices when he comes to our country is this dreary ugliness. We shall do much to beautify our country if we encourage children's gardens."

A MODERN FABLE

How a Town Was Made.

HUSTLE BUILT IT

Claude Came Along With the Big Newspaper Idea, and Isit Sat Up and Took Notice---Injection of Printing Ink Galvanized Dead Burg Into Life---Modern Improvements Then Converted Tank Town Into a Real Metropolis.

By W. B. POWELL of the Clearwater (Fla.) Sun.

[With apologies to George Ade.]

Once in the Dim and Misty Pathways of Civilization, before the days of the Referendum and Recall, a Gink wearing Overlapping Cuffs and Underlapping Collars, and who combed his hair Straight Back like a Sea Lion dropped off of Number Six, Southbound, at a certain Half Mast Dump out on a Spur Division somewhere between the Celery Belt and the Everglades, where the Leading Citizens wore Gum Arctics with Big Buckles and where Parched Corn, lubricated with Photo Paste, was served at Select Functions.

He was Welcomed-to-Our-Town by a Large and Commodious Audience which packed the Amphitheatre of the Railroad Loafing Place. There was the Gazook with a black sweater who operated the Ark which Navigated between the Steel Rails and the Only Hotel, two Giggling Milk-fed Girls out for a Mash; four Prominent Citizens sitting back on their Surplus trying to Hatch out Eight Per Cent, and eleven leading pillars of High Society who were there to Grab some express packages which contained Great Joy that they could Lap Up faster than the Revenue Officers could paste on the Stamps.

"Isit" is Its Name.

"Isit" was blazoned on both ends of the Da-po, and Isit it was; destined by Lurid Literature to become the New York of Sub-tropical, Sun-Kissed Florida.

It was a Low, Rambling, Sheetiron Cornice, slab-sided sort of a town, so out of harmony with Nature that it couldn't be set to Rag Time or a Sonata in B Minor. It was a Lead Pipe Cinch that its Vertebra was Catalogued as Broadway.

It was a Blot on the Landscape afflicted with an Eczema of Architecture, splotched with a Dull Weather-Beaten Complexion and Running Sores like Rotten Sidewalks and Galvanized Awnings. Its 642 acres of Various and Assorted Weeds needed Manicuring. There were so many For Sale Signs impaling the climate that it looked a National Cemetery by moonlight.

Claude—for our hero's name was Claude—Claude DeShon—gave the Once Over to the Human Mephitis Mephitis who navigated the Village Ox Cart; passed up the Giggling Girls with Contumely; scorned the Overtures of the Eight Per Cent Night Riders, and taking his bearings from the Solitary Coal Oil Glimmer which Pinkled so Pale at the end of Broadway, he Jiggled his Carburetor, threw himself into Low Gear and set his course a little East by So'east and went pulsating into the Solitude of the Night.

He Was a Man With a Mission.

He had a Mighty Mission to perform.

While his Massive Thinktank was Conning a Suitable Approach to make to the Geezers of this Misfit Village he collided with a Razorback employed as Sanitary Officer. He had no more than Apologized for his Offense of Interfering with the Town's Chief Rooter, than he Floundered into a Hog Wallow. By this time his Religion was Cracked.

With a Flat Tire and his Radiator Bubbling over with Wrath he steered into the Assembly Room of the Palace Hotel, rates one dollar per, with the Grace of a Stone Boat in Sloppy Weather.

Si Jenks, the prop. and gen. man., was awaiting his coming. He had been Awaiting the coming of some Weak-minded Victim all day. Si ran a livery, sale and feed stable in Conjunction with his Palace Hotel. You could take your choice. He had Strange whiskers and a Mackerel Eye, and Drank Soda Pop when he wanted to be Devilish. The Palace was some hotel. Even the Hound Dog, which was part of the Furniture, howled when the Dinner Bell called one to Partake. The rooms were as big as a Telephone Booth, and furnished like a Box Stall.

"Evening, stranger," he spoke, shoving a Stubby Pencil into his Digits, and pointing to the Register. "My rates be one dollar a day, strictly terra firma."

Ha, a Newspaper Man!

"Evening, sir," replied Claude, for he was Feeling His Way, as he did not know whether Si was a Leading Gazook or just a Plain Timekiller. "I want a Rabbit Warren where the Alfalfa is Deep, and by-the-bye you can Lead me to the Fodder. For the night, put me next to Pure Reading Matter, Top of the Column. I Crave Rest, for my Soul is Tortured and I have Calluses on My Conscience. I have Kotowed to your Sanitary Officer and Chief Rooter; have inspected your Real Estate; been Lamped for a Hardware Drummer by Loud Callers; been Approached by your Animated Movie and taken as a Winter Toureen; and looked upon as Good Picking by some Eight Per Centers who had some Town Lots up their Sleeves. I am only Common Clay. I am a Newspaper Man. I have come into your Midst to inject Mental Turpitude into your Ego; to Hypodermically instill seven Kinds of Getthere and Doitquick into your Epidermis. Where now grows Saw Palmetto and where Listed the Tin Can and the Bull Frog there will be Teeming Thousands Dodging Commercialism which will Stagger Humanity, or words to That Effect. Do you get me? I shall plant here Moving Pictures and Tango Teas, Research Clubs and Poultry Shows; Greek Lobster Palaces and Syrian Bazaars.

"This town will make Miami, Jacksonville and Tampa look like Whistling Stations when I get my Dingdong Lubricated. This little old Mud Flat will look like the Chambermaid's Dream of Paradise. Now, kind sir; lead me to my Downy Couch so I can lay me Down."

Si Jenks reached behind the counter and got his ax.

"You Human Dynamo, you," he sputtered. "I am an old man and of family and of Good Reputation. My Voltage is High, too. But no Ten-cent Talking Machine can do a Monologue at My Expense. Who are you? Rube Allen? No—then Out of My Sight before I Mutilate you. If I turn this 42-Centimeter Quick-Action Weapon on you, the Coroner will Have to Gather up your Remains with a Bucket."

Claude Foresees Fame.

"Friend," said Claude Suavely and not Abashed, for he had once edited Dixie and also been in two Railroad Wrecks and had fallen out of a Balloon. "I jest you not. I may be a fool, but to Quip one of your Jibe I fain would Cut Off My Right Hand. I am a Ball-Bearing Newspaper Man to the Manor born, a pen in my right ear, a Dictionary in My Hand. You Need Here a Palladium of Thought, a Chronicler of the Times. Your town Needs Gingering Up! I admit it is well Laid Out, but any Dead Town has to be Well Laid Out before it be given a Decent Burial. Let us be friends. Put the ax in Cold Storage. I may need it on the Morrow to macerate hand-picked boneless Prunes. Hold in Abeyance your Opinion of Me. I will Prove that I am No Worse Than I Look. By To-morrow they will be Burning Greek Fire and Sending up Toy Balloons in my Honor."

So this was Claude's Look In at Isit.

On the morrow he Sallied Forth with his Hand Shaker well Greased, wearing a Dark and Sinister Cutaway, a fresh Gardenia and a Fountain Pen. Within an hour he had the Main Guy Backed into the Dog Kennel pleading for Mercy.

Other leading Citizens Riding Hobbies and some on Foot fell to his Articles of Incorporation and Licked Them Up like a Hired Hand with Pan Cakes on a Frosty Morning. He was elected first Chambermaid to Isit's Destinies and was Carted All Over the Country to show him Possibilities he Never Dreamed of.

The Leading Men Foregather.

They called a meeting of the Board of Trade for that evening and all the local Rip VanWinkles came forth from their Dog Kennels and Pool Rooms wearing their best Hickory Shirts and Corduroy Pants.

They list to Claude while he Dilated Upon the Manner in Which he was to Disarrange the Face of Nature, Dissect its Vital Organs, and make Isit Scream with Prosperity. They sat with Baited Breath—some baited more than others—while he Pictured Towering Smokestacks, and Eleven Story Mortgages; of Jitney Busses and Home-made Molasses Candy, Rotary Pool, Link Cuff Buttons, and other Evidences of Civic Insanity.

The meeting was so Enthusiastic that the Smokestack of the Pumping Plant down by the Try & Get There R. R. toppled over.

It was never Thought there were so many Hot Babies in that little sawed-off Wart of a Tank Town.

When the Subscription Paper was Passed Around they Had a Riot to see who Would Head the list of O Promise Me's. In Fifteen Minutes there were so Many Figures on the paper it Looked like Harry Brown's Detailed Explanation of the Cost System.

The Railroad Agent was escorted to the Tick-Tick Emporium to send a Special Message of the Gink's Coming to all the Bigwig Papers that would take the Scream at Night Press Rate without Setting up a Holler on Expense.

The Pirates from Atlanta who sell printers' supplies Zeppelin-ed into Isit the next day with the Avidity of Lightning Rod Agents in the Corn Belt after a Thunder Shower. They sold Claude a Gold-plated outfit that would print anything from an Encyclopedia to a 28-sheet poster.

Then Isit Woke Up.

Isit got Dippy at once. It began an Orgy of Riotous Living that would make Bacchus climb into the Mast. Nothing but Night-Blooming Martinis was considered. Society spurned Maiden Hair Fern and Cull Grapefruit Wash and would have Real Punch, served from Cut Glass Bathtubs, with enough Kick in one Bumper to dynamite an orange grove. They acquired a Table-d'hote Vocabulary.

On Broadway they began to see Daylight through the Show Windows, and they Removed some of the Placards of Ringling Bros. Circus that visited Tampa in 1883. A Horseshoe Pitching Tournament was Promulgated, and Checker Players Lingered over the Devilish Game on Broadway Emulating the Street Life of Paris.

The founders of Isit turned over in their Graves.

A Wet and Dry election was agitated and they even thought of asking William Jennings Bryan to speak to them on the Commission Form of Government.

The Isit Hurrah came out within the course of three weeks.

The town made Merry.

There was a Grand Free Barbecue and the Boom-de-Aye lads Punctured the Atmosphere with "A Hot Time in the Old Town To-night."

Beginning of the Improvements.

The first copy was auctioned off to the Highest Bidder and it brought $7.39, which Sum was immediately placed to the Credit of the Womans' Civic Society to build a Public Park and the balance to be appropriated to the Research Society and the Home for Indigent and Indignant Grass Widows.

The Hurrah was real sassy in its Initial Issue. Claude was strong on Uplift and Fussy on Social Shams. He said that Isit was Suffering from a Parcel of Hasbeens and Mossbacks with green scums on their Moose Hides; that it was a Long Primer Community on a Nonpareil Diet; that it was Starving Itself to Death waiting for Something to Transpire; that the Richest Man in Town was a Loafer because he didn't Mix it up with Progress—it would Increase his taxes and they might Discover that he should be Paying an Income Tax to preserve the Nation from Bankruptcy; that there were too many Churches and too little Religion; that the town should Scatter some Paving Material over its Sand Streets; that the Old Maids had better be tangoing than Knitting Socks for War Sufferers; that it needed more spirit than a Guinea Pig and should have a Backbone where its Wishbone was; that it should take a Rise out of Itself and Get Right and Stay Right.

Many who welcomed Claude with the Glad Hand and Loose Pocketbook began hedging and wanted to Retrench on Fellowship and Mazuma. They said he was a Two-faced Walhalla with a Misfit Conscience, and Gratitude was a Total Stranger to him.

Claude was just as popular as La Grippe or Tonsilitis.

But he only smiled and replied: Watch My Smoke. I haven't began to Steam Up.

He Girded Up His Loins and began Mental Exertion on the Second Issue of the Hurrah.

Reform Gets on the Job.

He tackled the Social Evils as well as the Dry Rot of Commercialism.

The Hurrah stirred Society and Church from Center to Circumference.

Claude was there with the Bells On.

The Denizens got so mad that they Voted him Mayor and told him to Go as Far as He Liked.

Claude had them tax themselves for Water under ground and Brick on Top; an Electric Light plant paid Current Rates for a Franchise. He ordered Modern Plumbing for the Fire Department, and Red Upholstered Furniture for the Council Chamber.

Everything and Everybody Climbed Aboard the Uplift Wagon.

The Palace Hotel divorced its Livery Stables from its Dining Room and changed the Roller Towel every other day whether it Needed it or not.

Claude joined the Mutual Admiration Society and got Quoted Everyday in the Short Talks column.

Harry Floyd wrote an idiom, or something idiotic about the place.

The Limited from New York put a Star after Isit on the Time Card.

Dame Fortune Lamps Claude.

In the meanwhile Claude held Quiet Sessions with Brick Manufacturers, Sewer Contractors and other High Brows, and his Bank Account got so Heavy that the Steenth National Bank asked him to Remove it as it interfered with the Ordinary Course of Business.

He married the Dresden China Daughter of the Richest Man in Town and owned two automobiles with decorated Jeweled Fenders. They led the Delicatessen Circles, and ranked above the First Families who dated their ancestry back to the Freeze of 1895, or those who Got Their start selling catfish to Salmon canneries.

He was a director in Every Watered Corporation in Isit, and His Name was the Trademark of Commercial Probity.

Now Isit is Really "It."

Isit is now Some Town. It has half as many Refined Caucasians as the City Directory Attributes to it. It has all the Modern Improvements and they are Just as Unsatisfactory as Elsewhere. It has a Surfeit of Culture and can tell an Oil Painting from a Can of Sardines; its People read Josephus and the Six Best Sellers; it has Afternoon Teas and enjoys Sponge Cake with Clinkers in it. It has a Chautauqua everytime some Idle Parlor Entertainers want some Coin. It has a National Ball Team Capering Over the Green each Spring eating their Heads Off at the town's expense. It has a fine collection of Punk Dollars and is ready to Absorb some State Fair Rosettes at one dollar per. It gives the Lofty Tip to every kind of Money Extractor, from cripples with Pasteboards to Write-Up Men from the Northern Papers who Come Down Each Winter to Save the Country from the Demnition Bowwows. It sends Vaudeville Artists traveling over the Country by auto, by canoe and shoe leather to Advertise the place. The Board of Trade has a large and Influential Membership of nonpaying members and a larger Outstanding Indebtedness.

Isit is now famed.

It has all the Other Towns in its Class hanging their Chins Over Tombstones weeping their hearts out.

It has them Faded to a Farethewell. Its slogan is "Isit 100,000 by 1920."

MORAL—The town makes the newspaper.

Brought to a Decision

By LOUISE B. CUMMINGS

The telephone is a great institution, especially in the country, where they have a wire that conveys everybody's messages and everybody can hear everybody else's message. The way they distinguish between calls for different persons is by signal. For instance, Amos Tucker's call will be two short rings, the Widow Fowler's a long and a short call, and so on, like the Morse telegraphic alphabet.

But those owning telephones are apt to listen not only to their own but to their neighbors' calls. If the Andersons are called there is a number of clicks all along the line!

Now, it happened that Enoch Dawson, living in a region supplied by the Farmers' Telephone company, took up the receiver and called one of his two best girls, Edna Perkins, whose signal was a short, a long and a short ring. It happened that all at the Perkins farm were out milking or attending to some other farm duty, but Sarah Short, the other of Enoch's best girls, heard the ring and went to the telephone.

"Is that you, Edna?"

Miss Short recognized Enoch's voice. "Yes," she replied. "What is it, Enoch?"

"Oh, nothing much. I just called you up to have a little chin-chin. We lost a calf this mornin'—the brindle one."

"You don't mean it! What was the matter?"

"Don't know. Tuk sick and died. Say, Ed, how would you like to go out with me Sunday afternoon in my buggy? I just had it painted."

"I dunno. But I reckon Sallie Short wouldn't like to have you take me out. If she should see me she might git mad."

"That doesn't make any difference to me. Let her git mad ef she likes. Reckon I kin stand it."

"Where would I come in? Sal Short when she gits riled is terrible. She'd go round tellin' everybody that I butted in between you and her and tuk you away from her. No, sir-ee, I don't do anything underhanded. If you want me to go ridin' with you regular it's a go, but I don't intend to keep company with a feller as can't decide between two gals. Goodby."

There was a click, and Enoch was left talking to nothing; at least nobody answered him.

It so happened that Edna Perkins came in while this dialogue was in progress and, thinking to call up Enoch, took up the receiver. Hearing his voice she said nothing, but listened, hearing the principal part of the foregoing dialogue and recognizing, which Enoch did not, her rival's voice. When the conversation ceased Edna hung up the receiver, but later called Enoch.

"Well, who is it?" he asked.

"I'm Sallie. What you goin' to do Sunday afternoon, Enoch? Can't you come round about 4 o'clock and stay to supper?"

"I don't think I can. I've got an engagement."

"Oh!"

"Yes, I'll be occupied all the afternoon."

"Somepin goin' on between you and Edna Perkins, I reckon."

"Well, yes. I dunno. I asked her to go out for a ride with me, but I dunno if she's goin' to accept or not."

"H'm! Well, you may as well understand now as any time that if you want to keep company with Edna and me both at the same time you can't do it. You've got to stick to one or the other of us. You can accept my invitation for Sunday or let it alone, whichever you choose, but if you take Edna Perkins to drive on that day you needn't trouble yourself to come to see me any more."

There was a click, and once more Enoch was left to talk to nobody. But he heard a succession of giggles all along the line and a succession of clicks as a number of women, both young and elderly, hung up their receivers. The ears of the eavesdroppers were much sharper than Enoch's, and they knew that each of the rivals had said that if he didn't give her up the other would have nothing more to do with him.

The next Sunday afternoon the road between the Perkinses and the Shorts was lined with persons who had learned either from eavesdropping or from one another that Enoch Dawson would be forced to decide between two girls to whom he had been paying marked attention. Enoch's farm was connected by this road with the main road. At the junction were many persons watching to see which way he would turn on reaching the main road, whether he would turn to Edna's or Sarah's home. At 3 o'clock he was seen coming in his spick and span buggy. He noticed those waiting, but it did not occur to him that they were interested in his movements. When he reached the main road he pulled up and looked first in one direction, then in the opposite.

"Get up," he said at last, turning his horse's head toward the Perkins farm.

He was astonished at a shout from the loiterers: "Perkins has won!" "Bully for Edna!" "Short isn't long enough!" and other such remarks.

Something was evidently wrong, and he colored, but drove on to the Perkins farm, where he found another party in waiting. They threw up their hats and cheered when they saw him coming.

Thanks to the telephone, his choice had been made.

MANY USES FOR GUNS.

They Have Even Been the Means at Times of Saving Lives.

Guns would not go even if warfare were abolished. For example, the signal gun of a ship is used to announce her arrival on a coast. It would be difficult to find an equally effective substitute. The 1 o'clock gun, too, which is fired by electricity from Greenwich observatory, is the most effective means possible of announcing the exact time to surrounding towns, while nothing more impressive could be found than the minute guns fired for public mourning and the salute given on occasions of public rejoicings.

Guns save lives as well as take them. In desert countries, where it is difficult to collect water out of a mere dampness of sand, gun barrels are often sunk into the ground. By this means moisture is collected in the bore and many lives have been preserved by a timely draw at the muzzle.

A slaver, captured with a crew of slaves in the tropics, was once put in charge of a prize crew. During the voyage water ran out and slaves, slavers and prize crew were all dying of thirst. Then a sergeant hit on a brilliant idea. Taking all the available gun barrels, he plugged up the breach ends of a few of them, filled their bores with sea water and set them end up among the coals of the galley fire. Then as the steam rose he ran it through the other gun barrels till it cooled. The cooling steam collected in the shape of excellent fresh water and by this means scores of lives were saved.—Pearson's Weekly.

SUBLIME SIMPLICITY.

The Epitaph Over Sir Henry Lawrence, the Lucknow Hero.

There is a simple tomb in Lucknow, in India, that cost no more than many a plain farmer's gravestone in our rural burying places, but Clarence Poe declares that it impressed him more than anything else he saw in India except the Himalayas, the Taj Mahal and the view of Benares from the river.

It is the tomb of the heroic Sir Henry Lawrence, who died so glorious a death in the great mutiny of 1857. No commander in all India had planned more wisely for the defense of the men and women under his care, but the siege had only begun when he was mortally wounded. He called his successor and his associates to him, and at last, having omitted no detail of counsel or information that might enable them to carry out his farseeing plans, he roused himself to dictate his own immortal epitaph:

Here Lies
Henry Lawrence,
Who Tried to Do His Duty.
May the Lord Have Mercy on His Soul.

And so today these lines, sublime in their simplicity, mark his last resting place, and you feel that not even the great Akbar in Secundra or Napoleon in Paris has a worthier monument.—Youth's Companion.

Bull Baiting.

Although bull baiting was a cruel pastime, it was also a fulfilling of the law, for formerly no butcher was allowed to offer for sale the flesh of any bull that had not been baited. The goading of the animal in a fury was supposed to have some influence on the flesh. In a similar belief the flesh of a hunted hare was thought to be superior in flavor to that of one that had been shot, and a present of "a hunted hare" was considered to be a special compliment. In the records of the corporation of Leicester, England, the following order appears: "At a common hall, held on Thursday before St. Simon and St. Jude, 1467, 'no butcher to kill a bull till baited'." At Winchester it was ordered (reign of Henry VIII.) "that from hensforth ther shal be no bulstake set before any mayor's dore to bayte any bull, but onlie at the bullringe within the saide cytie."

Her Only Course.

Lady Anne Lindsay, the author of the old poem "Auld Robin Gray," was not only a delightful conversationalist, but she was a great story teller.

This gift made her not only a welcome guest abroad, but a valuable member of the home circle, for it is related in "A Group of Scottish Women" that at a dinner party which she was giving to some friends an old manservant caused some amusement by saying in a perfectly audible undertone:

"My lady, you must tell another story. The second course won't be ready for five minutes."

What He Saved.

"Good!" shouted the friend of the bibliophile as the latter emerged from the burning house carrying a bundle of books. "Did you save your Shakespeare?"

"No," replied the bibliophile, combing a spark out of his whiskers; "I saved my Bacon." —Houston Post.

Same Old Stuff.

"Black specks dance before my eyes, doctor," complained the society patient.

"That is very annoying and monotonous."

"Yes. They never have any new dances."—Kansas City Journal.

YOUNG FOLKS' CORNER

The Horse and His Rider.

A cavalry officer took the greatest pains with his charger. As long as the war lasted the horse was looked upon as a companion and fellow helper. He was carefully groomed every day and fed with hay and oats.

But when the war was over the allowance of grain and hay ceased, and the horse was fed with chaff and whatever he might find by the wayside. He was made a drudge, too, and often forced to carry loads much too heavy for his strength.

When in the course of time war was again proclaimed the soldier brought his military trappings and put them on his charger, and, after having arrayed his own person with his heavy coat of mail, he mounted to ride to battle.

But the horse, no longer equal to the burden, fell down straightway under the weight.

"You must go to the war on foot," he said to his master, "for you have transformed me from a horse into an ass."

He who slights his friends when he does not need their best offices must not expect them to serve him when he needs them again.

Causes of Thunderstorms.

The thunderstorm is caused mainly by the violent upward rush of moist air. As the weight of the atmosphere is greater at the surface of the earth than it is in the higher regions, this moist air has less weight to bear as it rises. It then expands, and the cooler upper air cools it, and condenses some of its moisture into drops of rain. These drops are united and torn apart again and so tossed about by the wind, especially by the upward currents that continually arrive, that the rubbing and tearing and friction set free what is called frictional electricity. When this process has gone far enough a sudden discharge of the electricity takes place, and we say, "It lightens."

The atmosphere along the path of this discharge is violently agitated, and the waves of pressure that travel out in every direction from each disturbed region produce the roar and rumble of the thunder.—St. Nicholas.

About Surnames.

If you look in the city directory you will find all kinds of trades represented—Smith, Turner, Carpenter, Wheelright, Goldsmith, Carter, Silverman, etc. Most likely the ancestors of the persons bearing any of these names worked at those trades and became known thus: John the Carpenter, Oliver the Goldsmith.

Other persons took their names from their surroundings. For instance, Belmont originally meant a pretty mount; Bergman, a man that lived among the mountains; Hamilton, a small town.

Some of our friends' ancestors were named after animals, such as Fox, Bear, Wolf, etc.

Others again, after their habits. For example, Drinkwater.

A Trained Alligator.

The problem of getting a line through sewers that are to be cleaned has been solved at Fort Meade, Fla., by taking into the sewer cleaning department a tame but very active alligator, named Nick, says Popular Mechanics. When a small sewer is to be cleaned it is first necessary to get a line through from one manhole to the next for pulling a scraper. This is where Nick shows his real worth. The line is simply tied around Nick's body and he is lowered into the manhole and headed in the right direction, and when he reaches the next manhole he is lifted out. The scraper does the rest.

A Canary's Adventure.

A canary flew away the other day while his mistress was moving from one house to another, and he was found entertaining a flock of pigeons, singing a solo with all the assurance of a Caruso. These pigeons had rescued him from some fighting sparrows, who had robbed Sir Canary of many of his tail feathers, and he was repaying them in the best coin he had. The pigeons stood in a circle enraptured, but the soloist was not permitted to give an encore. His song was recognized by a boy from the bird's own home, and he was caught and put in his cage in a hurry.

Puzzles.

Why are fixed stars like wicked old men? Because they scintillate (sin-till-late).

What are the most difficult ships to conquer? Hardships.

What is the best way to keep a friend's love? Not to return it.

When is a man duplicated? When he is beside himself.

What is that which is invisible, yet never out of sight? The letter S.

Why is the letter W like scandal? Because it makes ill will.

An Amusing Game.

"Third, second, first" is a "circle" game. One guest stands in the center and points rapidly in turn at three persons, saying at the same time, "Third, second, first." The one to whom he points when he says "first" is then "it." The fun in this game lies in the quick surprises, for no one knows who will be pointed to next.

Chronogram.

Write one thousand down, quite plain,
Then half of two, then add again
Fifty and one's final letter;
You can then do nothing better
Than, after every evening meal,
Walk the distance I reveal.
Answer.—M I L E—Mile.

LOCAL :: SPORTING NEWS :: GENERAL

NORMAL TEAM BUMPS LOCAL HIGH SCHOOL

Oswego Lads Drive O'Brien From the Mound and Take Kindly to Barnes' Curves; Final Score, 10-6.

By opportune hitting and good base running and fielding the Oswego Normal school baseball team was able to hang the crepe on the brow of the Fulton High school baseball team yesterday afternoon at the Athletic Park field by the score of 10 to . But the Normal team should not get all the credit for the victory. Markey Pullen helped along with a disastrous "bone" at a critical moment and although Mark didn't mean to pull the aforesaid "bone," the Oswego players were on the job and Keeler, who was perching on third base at the time after a neat triple, was called out. But more of that later.

This same Keeler had a bad slump some time ago, and yesterday he returned to the game. To say that he made his return auspicious is putting it mildly. In addition to leading his team at the bat with a double, a triple and a single, he played an errorless game in the field.

Oswego made its appearance without any of the widey advertised female continkent and the fans who went with the expectation that the game was to be of secondary importance were disappointed. For there were only two young women from the Normal present and they are, fortunately, residents of this city.

In the first inning the Oswego lads showed that O'Brien was no enigma, for, after Brownell had flied out, Jibson and Quigley hit safely and Carroll lifted a long one into that outled that Pullen gathered in. Coppernoll came through w iht a two-bagger and two runs were chalked up to Oswego before the local boys ad really commenced operations. Fulton went out in order in the first inning.

The second frame was productive of no runs for either side, but in the third, the locals showed their gameness by coming up from behind and tieing the score. After Pullen had struck out, "Specs" Caffrey caught one on the nose and stopped at third base. After the spectators had revived, H. O'Brien rolled a grounder to Kany and "Specs" beat the throw to the plate. Keeler hit for two sacks and O'Brien scored.

In the fourth the locals got busy once more and added three more runs With two down, Thompson got a life on Carroll's sacrific fly. on Kany's error. Pullen singled and Caffrey was hit, filling the bases. H. O'Brien singled scoring Thompson and Pullen. A bad throw to third base let Caffrey over but O'Brien was nailed at the plate when the ball was returned from left field.

The Normalites scored two in the fifth. Landers led off with a hit, but Brownell was out. Jibson hit to O'Brien, who attempted to catch Landers at third and both men were safe. Quigley walked and a wild pitch scored Landers. Jibson scored Fulton didn't score.

The next inning was the Waterloo for Fulton. Mahaney was out on a grounder. Fitzgerald, Kany and Landers hit safely and Brownell walked and O'Brien gave way to Barnes. The youngster made Jibson pop but Quigley came through with the needed it with three men on and Carroll also found the kid for a safe single. Coppernoll flied out, ending the agony, but Oswego had tallied five runs and they were never headed after that.

Things looked pretty bright for Fulton in the seventh, for Keeler led off with a scorching three-bagger into deep left. Pullen was coaching along the third-base line and as Brownell was about to deliver the ball, Pullen ran toward home evidently wishing to give Brownell the idea that he was the base runner. The Oswego captain promptly called Umpire Van Buren's attention to the rule that declares [illegible] runner out in the event of [illegible] and, while Van Buren didn't know the rule in question he took the Oswego captain's word for it and Keeler was sent to the bench. Bray hit safely immediately after and it is reasonable to suppose that Fulton would have tallied a brace of runs in that inning had Keeler been able to remain on third. As it was, Brownell, Kany, Quigley and Fitz-

Both teams got one in the ninth. Oswego's run was scored on a bad error by O'Brien who played short stop for three innings and a hit by Kany. Fulton scored when Keeler got his third hit, was advanced on a hit by Bray and scored when Quigley fumbled.

Keeler's hitting was one of the bright spots for Fulton, although Bray caught a good game and Caffrey's work on first was worthy of mention. tered. The Fulton outfield played a gerald put up stellar games for Oswego. Brownell's pitching was the big feature for the visitors as he struck out ten men, passed only two and although e was touced up for eleven hits he managed to keep them suattered. The Fulton outleld played a great fielding game, many long bingles that looked good for safties being gathered in by the outer guard after long runs.

Another sad tale:

Hits off O'Brien, 9; off Barnes, 5. Struck out by O'Brien, 3; by Barnes, 3; by Brownell, 10. Bases on balls, off O'Brien, 2; off Barnes, 0; off Brownell, 2. Wild pitches, O'Brien, Brownell. Double play Quigley to Carroll to Quigley. Passed balls, Bray, Quigley. Hit by pitcher, Caffrey. Umpire, Van Buren.

BASEBALL CHALLENGE

A baseball challenge boomed into Fulton this morning via Evening Times. It is in the form of a letter and says:

"I challenge the Phillips street or State Street baseball team to a series of two games to be played, one in Fulton and one in Oswego, these games to be played on Sunday afternoon, as that is the only time available. Replies should be written to Earl Perrett, 112 W. Second st., Oswego, N. Y.

Music.—Buell's Full Orchestra at the Onyx Confectionery, Saturday night. adv.

CURRENT COMMENT

By Edmund J. LaPorte

We wish to correct a statement made in last night's column to the effect that Hank Mott had left to join a carnival company. Hank did not go yesterday but will leave today, he says if the ticket comes. Hank was on hand at the ball game yesterday, was immediately recognized and was vigorously applauded when he returned a foul ball to the pitcher's box. Hank is to take on an unknown heavy weight in Albany when the show reahces that city and the Fulton fight fans will be kept well informed of his fistic activities through the column of The Evening Times.

* * *

Fulton is fortunate in having a mayor who believes in athletics and if the influence of Mayor Fox can do anything toward securing the high school teams a suitable playground in the next few years, the boys and girls can count upon that executive. At a meeting of the Common Council last night, the Mayor publicly commended the high school baseball team and said that they were putting up a very classy article of ball. He was an interested spectator at the game yesterday and showed his keen appreciation of several good plays by hearty applause.

* * *

The Mayor, in recommending the Falley seminary site for a high school at last night's meeting of the council, spoke of the need that exists for a playground and suitable athletic field for Fulton's teams. The Falley plot is large enough to provide for an extensive playground and a baseball diamond. The field in the rear of the property was used for a short time by the high school team for spring practise and is being used at present by the girls of the school for basket-ball The writer does not know just how much of the land in rear of the Seminary belongs to the plot or how much land is to be used when the new school is erected, if the plot is chosen as the site. The Athletic Park field, however, is some distance from the center of the city and there is no doubt but tat a centrally located athletic field, is something greatly to be desired. If the city ever sees its way clear to lay out an athletic field like some maintained by other cities, a plot should be selected upon which baseball and football games can be played and swings, a slide and other playground equipment can be placed and if possible large enough to accomodate a tennis court or two. The playground, if it is to be a playground, should be a complete one, not only for the use of the students but for every citizen of the city who engages in out door sports. In other cities the Playground Commission often derives a neat revenue from the base-ball field by renting it during the summer months to professional teams and many playgrounds are almost self-supporting.

The writer has in mind one city which received a plot of ground and a complete equipment of playground apparatus as a gift from a prominent citien who stipulated that the playground should bear his name and be maintained by the city. A similar donation to the city of Fulton would earn the everlasting gratitude of every pupil in the public schools and stand as a monument for all time to tne public spirited citizen wio made the donation.

The attendance and incidentally the gate receigts at the Fulton high school games are growing with every contest. At least thirty business men showed their interest in the activities of the local school by attending the game yesteriay. That is what the team needs, Support. The students also turn out well.

* * *

Oh, for an egg decrepit with age,
Gimme a brick or a stone!
The game was a cinch,
And right in the pinch,
Markeyhadapullabone.

* * *

The Independents may go to Phoenix Saturday but Captain MdCullum has not definitely arranged the game yet. Right here web reathe a prayer that the Phoenix boys will not attempt to emulate their Baldwinsville brethen. One game like the one played last Saturday in a season is more than enough.

* * *

O'Brien deserves credit for one thing—he had no alibis after his defeat yesterday. The Oswego batters had the stuff and he appened to be out of it, that was all. And fortunately there is a return game.

FIVE FISHERMEN HELD; TROUT UNDERSIZED

Watertown, May 20.—Five fishermen have been apprehended in Jefferson, St. Lawrence and Lewis counties with trout under the legal size since the season opened on April 16, according to information made public in this city this afternoon at the block meeting of the game protectors of the three counties. The meeting was held at the New Woodruff hotel, with all nine protectors and the division chief present. During the month of April a dozen violators of the state game laws were caught and fined with a recovery of about $350. There have been few violations at the foot of Lake Ontario so far this season.

WHY NOT A CHEESE DAY FOR FULTON?

Sheboygan, Wis.—The Sheboygan, Wis., Association of Commerce has started a movement to have "Cheese Day" observed all over the country every Fall.

It is planned to interest growers' associations in every city in country in the project, get them to make window displays of cheese for a week before Cheese Day; conduct a campaign of education through their advertisements in their local newspaper, showing the nutrition contained in a pound of cheese as compared to other foods; publish recipes for the use of cheese in various ways, and then on Cheese Day to get the hotels, restaurants, cafes, dining cars, etc., to feature cheese on their bills of fare.

Unsettled.

"I bear that they belong to the early settlers."

"Well, you wouldn't think so if you could see the bill collectors climbing their front steps."—Judge.

An Empty Dream.

Bobby—Say, sis, what's a "empty dream?" Dotty—One you have when you've been sent to bed without any supper.—Cleveland Leader.

NEW COMMERCIAL LINK IS ESTABLISHED

A statement issued by George C. Taylor, president of the American Express Co., indicates the close relationship that is bound to ensue between U. S. manufacturers and the Russian Empire. In this connection it is being made known that the American Express Co. is extending the sphere of its activities into the Far East, having appointed Edward F. Wales-Smith for many years traffic agent for the company at Paris, France, as commercial agent at Petrograd.

Before taking this advance step Mr. Taylor conferred with a member of the Imperial Russian Embassy in the United States, who approved the traffic idea. The president of the express company to further assure himself of the possibilities of the Eastern extension and to reinforce the activities of company representatives in Petrograd, has sent a New York representative of the freight department to Russia, with instructions to visit most of the leading cities for the purpose of placing importers in touch with American suppliers and to put in operation arrangements that will simplify the methods now employed in shipping between the two countries.

ALLAN DALE TO RUN IN 15-MILE MARATHON

A post-card received at The Evening Times office this morning tells readers that A. Dale of this city, was selected by the Scotsmen of the Hamilton, Ont., Y. M. C. A. to Captain their team and run at St. Catherines on May 24, Victoria Day. The events will include a Marathon race of 15 miles. Mr. Dale was selected for the position at a meeting of the committee held at the New American hotel, Hamilton, May 18.

A few broken lots of house paint at cost. Van Wagenen Inc. adv133

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 20.—Senator Anthony J. Griffin, a delegate to the Constitutional Convention from the twenty-second district, believes that judges permit their digestions and prejudices to influence the sentences they pass upon the unfortunates who have been convicted of wrong doing and is seeking to remedy this situation, which he says exists. He has presented a proposed amendment to the State Constitution which will empower jurors to fix terms of imprisonment.

The proposed amendment of Senator Griffin is so drawn that it allows jurists to diminish sentences but prevents them from increasing them. In all trials for felony, the jury, if its verdict is against the accused, is empowered under this proposed amendment, shall also fix the punishment.

In explaining the reason for the introduction of his proposition, Delegate Griffin, who is also a former State senator, says that under the existing law there is ag ross inequality in the sentences imposed by judges throughout the State for the same offences. "For instance, in the case of violation of the Sullivan pistol law, one judge will send the offender to jail for seven years; another for one year and in some jurisdictions simply impose a fine. This is merely an illustration as to one particular offense."

That judges are frequently swayed by animus, is declared by Delegate Griffin. The spleen may either be directed either against the prisoner or his counsel. "Perhaps upset by an attack of indigestion a prisoner is sentenced to a severe punishment.

Delegate Griffin has some acrimonious things to say concerning judicial prejudice. "In some cases," he says, "where a great public clamor is raised judges have been known to impose sentences wholly for their dramatic and newspaper effects and by catering to public feeling promote a transitory reputation."

In regard to other crimes than felonies, Delegate Griffin says that the same inequality as regards the imposition of sentences is frequent." In the State prisons, prisoners compare notes and when one finds that perhaps his cellmate, who was convicted for the same offence, will only have to serve two years while he himself will have to serve a far longer term, the result is discontentment which frequently leads to infractions of the rules. The prisoner who thinks that he has been discriminated against in the matter of punishment, does not make a very docile or contented inmate."

Under the amendment proposed by Delegate Griffin, the jury, composed of twelve plain men in the ordinary walks of life; with all the feelings and sympathies of human beings unaffected by public excitement or ambition would, after hearing the evidence, fix the punishment within the statutory limits, as he puts it. "The judge after this, if he deems the punishment too severe, may then reduce but may not enlareg the term imposed by the jury."

The Griffin proposition affects also homicide cases and allows the jury in such cases to determine whether or not capital punishment should be inflicted.

"It is not generally believed," continued Delegate Griffin, "that we are blood thirsty, but it is strongly felt that in cases of wanton murder under cruel and barbarous circumstances that the death penalty is the only adequate punishment."

White Man With Black Liver

The Liver is a blood purifier. It was thought one time it was the seat of the passions. The trouble with most people is that their Liver becomes black because of impurities in the blood due to bad physical states, causing Biliousness, Headache, Dizziness and Constipation. Dr. King's New Life Pills will clean up the Liver, and give you new life. 25c. at your Druggist.

SHALL WE GATHER AT THE BONFIRE?

GENERAL ASSEMBLY ATTEMPTS HEAVY CHURCH PROGRAM

Dr. J. Ross Stevenson of Princeton Elected Moderator, Receiving Unanimous Vote of the Assembly

Rochester, May 21.—Seminarians had the field to themselves in the contest for moderator of the Presbyterian General Assembly. Presidents of three theological seminaries were the nominees for whom the commissioners voted, and on the second ballot, J. Ross Stevenson, D.D., LL. D., head of Princeton Theological Seminary, the oldest training school for the Presbyterian ministry in this country. was chosen moderator of the 127th General Assembly.

In pre-election talk Dr. Stevenson was considered to have the best chance of attaining the moderatorship, but his supporters were given something of a surprise by the vote polled for Dr. Cornelius M. Steffens, president of Dubuque College and Theological Seminary, who ran second, on both ballots. Dr. George Black Stewart, president of Auburn Theological Seminary, was the third candidate. After the first ballot, on which Dr. Steyenson lacked twenty-two votes of the required majority, nearly one hundred of Dr. Stewart's supporters switched their votes to Dr. Stevenson.

The result of the second ballot follows: Stevenson, 502; Stewart, 71; Steffens, 265.

The choice of a moderator, the most important proceeding of the opening day of the assembly began immediately after roll call. Rev. W. H. Roberts, D.D., LL.D., of Philadelphia, who has been stated clerk of the General Assembly for more than thirty years and who has been called "the rudder of the General Assembly" named Silas F. Hallock, M.D., of New York, and William U. Follansbee, of Pittsburgh, as tellers.

Church Territory Divided.

For the purposes of election, the whole territory of the church is divided into twenty-two electing districts, with the presbyteries so arranged by combining the smaller synods and dividing the larger presbyteries so as to make nearly equal delegations. In this division, Rochester Presbytery is a part of section No. 2.

In each section one member is named as convenor and it is his duty to call his section to order and proceed with the election of a chairman and secretary. Ballots are distributed and the choice of the commissioners of the various sections is recorded.

Dr. Charles R. Erdman, professor of pastoral theology at Princeton Theological Seminary, in nominating Dr. Stevenson for the moderatorship, said that the assembly needed a man who would represent the whole church. Professor Erdman emphasized the pastoral work of Dr. Stevenson as a qualification that would fit the nominee for the highest office in the church.

HOME MISSION BOARD OFFICERS MAKE REPORTS

Rochester, May 21.—Mission work among college girls, among native Alaskans and Porto Ricans, among colored people, was interestingly although briefly described in the first session of the 36th annual meeting of the Woman's Board of Home Missions. Since it was the first session, the many speakers were confined to bare statements of things done, money raised, hopes blasted or realiized.

One man, Marshall C. Allaben, supcrintendent of schools under the board, has an active part in the meeting. Mr. Allaben, who was a college president before he took up mission school work, seemed to have much at heart the conlitions of Cuban and Porto Rican school. He believes that the Cubans should have been more thoroughly initiated into the mysteries of self-government before the United States withdrew.

In the last two years, Mr. Allaben said, he has visited all the schools under his charge, from Alaska to Porto Rico. In each institution, he reports, emphasis is laid upon industrialtraining under Christian influence. However, an opportunity is given the eyceptionally bright boy or girl to go to college.

BIG PROBLEMS TO BE SOLVED BY ASSEMBLY

Rochester, May 21.—Throughout the first day's proceedings of the Presbyterian General Assembly there were numerous references to the big problems confronting the church and the nation. And every time this keynote was struck it met with a hearty response from the commissioners. It is probable that the Rochester assembly will be noted because of the high idealism which dominated its proceedings.

"Not theological problems, not problems of government, but the great human problems of the nations call us," said Dr. Jenness. And it happens that all three Drs. Stevenson, Alexander and Jenness—are conservatice in their theology. But it is also true that they each have the reputation of having big ideas of the tasks of the church.

It is probable, therefore, that the questions to be considered by the assembly will be determined upon a high, broad plane, and that no mean motive will win.

It's an exhilaration to see a thous and men—strong men, every one of them—determined to do big things, unselfishly, and with no political game to be played, and no favorites to please. It gives one more confidence in the church—and in human nature. You couldn't buy or bribe one of them. They may make mistakes and here and there you'll find one who has a narrow conception of what religion and the church should stand for, but even these are usually sincere, and you can't help admiring them, much as you may disagree with them.

There's is no doubt that this is the church's day. It is the time of her opportunity. And the Rochester assembly make make history, not only for the Presbyterian Church, but for the church at large, for which the Presbyterian Church has eretofore spoken, and worked and pointed out the way.

There's much to be said against it, and all that one might say would be true, but it's refreshing to get away from details, once in a while, seeing its men and women, not as each one may at times represent the church, imperfectly, but seeing these men and women in the mass, with details blotted out in the composite picture that Rochester will see during these days that the assembly will be in session.

FESTIVAL PLANS COMPLETED

The Elks held a regular meeting last night at which the usual routine business was tranacted and several applications acted upon. The arrangements for the band concert next Wednesday night are now complete. "Bud" Fisher being in charge of the refreshment committee and L. W. Richardson in charge of the music. The musical program will be published next week.

THE BONFIRE

If the weather permits this evening the bonfire will be held as announced at 8 p.m. on the State land between Frst street and the Railroad, North of the mill district, on the East side.

The bell of the First M. E. church will be sounded at 7 o'clock p.m. if the bonfire is to be held. If no bell is sounded there will be on bonfire tonight. In that event the time and date of the bonfire will be announced later, probably in Monday's papers.

CHAMBER OF COMMERCE.

ITALIAN CIRCLES IN LONDON GLAD OVER ROME'S ACTION

London, May 21.—The news that the Italian Chamber had by a majority of nearly seven to one voted to make good her rights against Austria by force of arms, was hailed with intense delight inItalian circles, and this morning's newspapers express the greatest satisfaction.

The Salandra-Sonnino Cabinet, it is declared, leads a united nation in the defence of justice and liberty against a meace worse tha barbarism.

A strong anti-German sentiment is taking precedence over anti-Austrian sentiment. The reverse was the case up to a month or so ago. German barbarities and methods of war fare culminating in the Lusitania outrage have created an evergrowing indignation and loathing until now interventionist manifestos proclaim first a war against the German barbarians, afterward against the traditional foe.

Although war has not yet been declared, the union sacre already is complete in Italy. Signor yiolitti, formerly Premier, has left the capital and all parties are rallying around the government.

The socialist group in the communal juntas in Milan and other big centers, while reiterating their pacific doctrines, inlorse the justice and necessity of this war against Austria. The Milan socialists telegraphed to their group in the Chamber their conviction that the war will be short and victorious for Italy.

The leaders fo the woman's suffrage movement has issued a manifesto proclaiming the duty of all Italians to sink individual dicerences and unite for victory for the Italian arms. The labor associations, scientific bodies, student clubs and artistic sotieties all are flocking to the colors.

First and Greatest Clean-Up Day

The Clean-Up wagons began work early this morning and reports were received at the Chamber of Commerce that more vehicles were needed in all sections of the city. Fourteen teams were sent out by the Chamber and four single wagons volunteered their services this morning. The force sent into the West Side was inadequate, and two more wagons were added to the force there at 11 o'clock.

Almost every house in the city has been able to furnish its quota to the Clean-Up wagons, and all along the sidewalks barrels of rubbish have been standing since yesterday morning, in many instances, wating for the arrival of the wagons.

The citizens have taken great interest in the movement and a casual inspection of some of the dark nooks and corners of the downtown sections proves that the work of the Clean-Up Committee has not been without its result. When the movement started there were many who said the city needed no clean-up, and in some sections that may be true, but the committee was able to discover many alleys and buildings in the down-town section which were full of dirt and inflammable rubbish. These have been cleaned up, and the places objected to have assumed an entirely different aspect.

13 Lives Lost on French Trawler

London, May 21.—The French steam trawler St. ust of Arcachon was torpedoed and smashed to pieces near Dartmouthh yesterday afternoon, 13 of her crew being drowned. The captain was the only survivor.

It is declared that no warning was given to the vessel before she was torpedoel.

WEATHER FORECAST

Moderate to fair, with southeast to south winds; local rains tonight. Saturday, partly cloudy, with showers tonight and Saturday.

COLONEL JUBILANT AT FAILURE OF JURY TO AGREE

Judge Andrews Did Not Approve of Early Morning Verdict, Remanding Talesmen to Their Quarters

Special to The Evening Times.

Syracuse, 2.45 o'clock.—The jury in the libel suit of William Barnes vs. Colonel Theodore Roosevelt, after an all night session, returned to the court room this morning at 9 o'clock and the foreman annuonced that the jury wished to bring in a verdict for the defendant with the provision that the costs of the trial were to be equally divided. Judge Andrews said the verdict was illegal and refused to accept any verdict which was contingent on costs. The jury received further instructions and returned to the jury room.

At 11 o'clock, the jury again returned to the court room and announced that they were unable to agree, as one juror is standing out for Barnes, the other eleven votink for a verdict in favor of the Colonel.

At 12.30 the jury was taken out to lunch, and at 2 p.m. returned to the jury room.

The jury is still in consultation at 2.45 this afternoon.

It is predicted by those familiar with the case that the jury will disagree and a final announcement to that effect is looked for this afternoon. It is reported that the jury voted unanimously in favor of the ex-President this morning before returning the verdict which Judge Andrews refused to accept. One juror, it is reported has announced that he will not vote for a verdirt for the defendant unless the costs of the action can be divided.

The Colonel was jubilant this afternoon, and was confident that the jury would finally return a verdict in his favor. Barnes was non-committal, and seemed to be surprised that the jury should poll so heavily so heavily in favor of the defendant.

BRITAIN SAYS AMERICAN INTERESTS ARE UNINJURED

London, May 21.—The Foreign Office issued a enghty statement explanatory of Great Britain's attitude towards American ships and American cargoes caried in other neutral bottoms that have been detained in British courts under the provisions of the Order in Council that announced a blockade of Germany. Supplementing the explanation the Foreign Office makes the statement that cotton cargoes which the government agreed to purchhase under the cotton agreement all have been purchased. Payment for these cargoes is delayed, it is said, until proof of ownership and actual contract price are presented to the bovernment. It is mentioned that the delays are due primarily to the fact that much of this data must come from the United States.

In diplomatic circles here it is felt that the Foreign Office statement forestalls a note which the Washington government is considering for dispatch to London concerning alleged delays in the disposition of American shipping and property under detention.

The explanation has a paragraph attached showing exports from the United States to belligerent and neutral European countries and comparing the figures issued before the war with those issued since. These compare the exports of January and February, 1914, with the same months of 1915 and an additional table shows an increase in the exportation of bacon and lard to neutral countries for the month of March.

WELFARE STATION OFFERED BOOST

Within the last few days a woman, generous of mind and purse, who wishes her name withheld for the time, has offered to the Welfare Association to finance the Baby Welfare work in this city during the coming season.

The Rssociation has this season taken no action in regard to the work for the summer months. Individual members of the committee favor accepting the contribution. The members will meet with the Woman's Civic League this afternoon and an open discussion will be held. The committee will within itself, as an independent organization, decide in regard to the future plans for the work.

The balance on hand in the treasury is $85. Mrs. C. C. Teall, president of the organization, is in California. Mrs. [illegible] Merrill is acting executive during Mrs. Teall's absence.

Fighting the Submarine

Despite the intimation that had been made that the German sub-marine might refrain from attacking merchant ships, pending the preparation of the reply to the American note, it is reported that last Sunday the Anchor liner Transylvania, while proceeding along the Irish coast under convoy of a British cruiser, sighted a hostile boat of the U type. The liner altered her couse and began to zig-zag through the water. This exposed the submarine to the guns of the convoying cruiser, and it rapidly submerged itself. While this explanation of the escape of the liner is plausible, there is a suggestion that the submarine, if one was really seen, could have attacked the Transylvania had she chose to do so, but did not, in obedience to orders from the German Government, pending some decision in the Lusitania case.

Admiral Von Tirpitz of the German navy has declared that if the war lasts long enough for him to build them, his submarines will block every trade route to Great Britain. Simon Lake, America's foremost submarine architect, in commenting on the sinking of the Lusitania, endorsed the German claim thus: "If the present war continues another two years and Germany succeeds in holding her land frontiers, her submarines will be able to dictate the terms of peace. She has the capacity, both in shipyards, torpedo factories and submarine engine shops to build sufficient submarines to establish a submarine blockade of all English ports."

The Germans are now turning out two complete submarines of the latest U type every week, according to fairly trustworthy reports. These boats are said to be more than 400 feet long; to be able to stay at sea without supplies for three months; to have a surface speed of 18 or 20 knots an hour, a submerged speed of 10 or 12 knots, and to carry several powerful guns in addition to the six torpedo tubes, which fire torpedoes 17 feet long, one of which can sink a battleship. The menace of these submarines springs from the fact that no satisfactory method of fighting them has yet been devised. There are no submarine destroyers. The British submarines are unable to combat the German undersea boats, because they can neither see nor attack successfully so elusive a target. While seaplanes can distinguish submarines in clear water they cannot injure them, and the only mark presented to an attendant destroyer is an occasional sight of a gray periscopic tube three inches in diameter. The number of British trade routes and great harbors is not large and as then umber of German submarines increase Great Britain is likely to face a serious shortage of supplies, if not starvation, as Admiral Sir Percy Scott, Sir Conan Doyle and Mr. Lake have prophesied, unless an effective way is discovered of fighting these undersea craft.—Rochester Democrat.

THE SWAN SONG

Shades of the departed! A corporation to be put out of business; the investment of its shareholders to be impaired; its corporate franchise to be destroyed; the consumer to be deprived of its service—not because the corporation was doing anything immoral, or unethical, but simply that foreign interests within our gates might gratify a desire for fabrication, and seek with the stones of avarice to build their foundation for material gain upon the quicksand of doubt.

Public sentiment, always a potent factor, however slow in arousing, has within a short period of time in this community sent back to the originators of the unqualified falsehoods, its boomerang. Be still, and get thee hence with thy vain clamoring, "has been the verdict of those who read by the signs.

'Tis said of swans when dying their songs are heard afar. Has it been the swan song the roaring of Oswego waters has accompanied, or was it merely the shrieking of the loon as it winged its way along?

THE HANDICAPS

On some persons, nature seems to have imposed special disadvantages or impediments in order to offset their virtues. Nature seems to weave through the fabric of life this thread of compensation, and we all end up with the same epitaph. You never read on the tombstone, "Here lies Mr. James Makemoney, who accumulated $5,000,000 and lost all but one friend—his dog."

This idea of individual handicap is tommyrot. It's no compliment to you or your courage to be able to start with the "field." Any horse-chestnut will float on the surface of a stream, but all the wishing this side of Fool's Ferry will never change chestnuts into chestnut horses.

Stop wishing you were some one else. You will never, as long as you live, get out of your skin alive. But you can change your whole mental make-up.

Handicap! Why, man alive, handicaps are to help. They are the spurs and the prods. Life is a big battle, and the result is up to you personally. Opposition, contention, strife, are all a part of the fight.

You say, If I only had my other leg. Sarah Bernhardt does not say this, and she is expected to play the part of a perfect human being.

Why measure wishes? Measure swords. Fight, for your success in an affair of honor.

Did Marshall Field, with his eight years of schooling, quit? John Wanamaker began on two dollars a week. Did he howl over his handicap?

There are but two real handicaps in life; one, when you cannot get the body to perspire; the other, when the head refuses to prepare.
—The Silent Partner.

Railroads and Steamships

The unwisdom of Congress has seldom—fortunately for the country—been more clearly demonstrated than in the adoption of legislation which, under the interpretation placed upon it by the Interstate Commerce Commission, forbids ownership of steamships on the Great Lakes by the railroad companies.

The legislation in question was inserted in the Panama canal act in conference, after two houses, urged on by the radical element that was then occupied in baiting the railroads, had voted in favor of a provision declaring it to be unlawful for any railroad company to operate "any common carrier by water through the Panama canal." The theory was that the Panama canal was constructed to insure competition between the continental railroad systems and ocean transportation companies. There would be no competition, it was claimed, if the railroads were permitted to own steamship lines.

When the provision was in conference another clause was added, as follows:

Or elsewhere with which said railroad or other carrier aforesaid does or may compete for traffic, or any vessel carrying freight or passengers upon said water route or elsewhere, and in case of the violation of this provision each day in which such violation continues shall be deemed a separate offense.

The provision, with this blind and loosely drawn addition, was adopted hurriedly in the closing hours of the Sixty-second Congress, without examination or discussion, and apparently without a general understanding that it might be used to disrupt the enormous commerce built up on the Great Lakes by corporations transporting freight partly by rail and partly by water.

It now remains for the railroads to devise some scheme by which they may divest themselves of the ownership of steamship lines without serious loss to themselves or to lake shippers. How this can be done is not yet apparent, but perhaps a method will be suggested by the statesmen from prairie-grass and sagebrush states who were so eager to destroy prosperity.—Watertown Standard.

ENUMERATORS

Secretary of State Assures Public That Information Secured is Confidential

Albany, N. Y., May 19.—Numerous inquiries made to the Census Bureau reveal the erroneous apprehensions of a considerable element of the population of this state that their answers to the enumerators' questions in the next census, beginning June 1st, will cause increased taxation, legal entanglements, or injurious consequences to their persons and property. In order to quiet such unfounded fears, which would, unless removed, materially affect the accuracy of the count, Secretary of State, Francis M. Hugo, under whose direction the census is to be made, has prepared an official statement relative to the decennial census, its origin and uses.

"This statement," explaimed Secretary of State Hugo, today, in discussing the subject, "should furnish complete assurance to those concerned that information given the enumerators is to be held in the strictest confidence to the identity of the informant, as required by the policy of the Census Bureau and commanded by the law of the state. Therefore, it is earnestly hoped that clergymen, priests, physicians, school teachers, employers and other public-spirited citizens, who come in contact with large numbers of people, will co-operate with the Bureau by telling persons, who are believed to entertain erroneous opinions concerning the census, the real facts, urging them to give full replies to the enumerators. Teachers are particularly requested to speak of the census to the school children and ask them to tell their parents about it."

The Secretary pointed out that the Constitution requires a census of the population to be taken every ten years in order to re-apportion representation in the Legislature. That it is the means also of ascertaining the increase in population and other important information concerning the State's growth since the last census was taken in 1905. He emphatically declared that the information sought from the people of the State is to be used solely for general statistical purposes. "It will neither be published nor used in any other way to disclose facts regarding any individual or enterprise," concluded Mr. Hugo. "The census is not, never has been, and cannot be employed to obtain information that can be used in any way in the assessment of property for the purposes of taxation or for the deportation proceedings, extradition measures, army or navy conscriptions, internal revenue investigations, compulsory school attendance, child labor law prosecutions, quarantine regulations, or in any way affect the life, liberty or property of anyone."

Albion Firm Bids Low on Co. Roads

In opening proposals in Albany, Tuesday, for road repair work under State aid, Hucknall & Co., Albion, underbid Fulton's coontractors on Oswego county highways. The bids:

Thomas Hucknall & Company, Albion, N. Y., $2,251.68¾.
Pathfinder Construction Co., Inc., Fulton, N. Y.; $2,447.07.
Fred D. Dutcher, Fulton, N. Y.; $2,505.45.
DeBarber & Hill, Fulton, N. Y.; $2,605.44.
I. B. Contracting Company, New York city; $2,722.65.
Semper Brothers, Watertown, N. Y.; $2,813.06.

For the repair, under contract No. 747, of 10.75 miles of highways in Oswego county, by State aid, the following proposals were opened:

Thomas Hucknall & Company, Albion, N. C.; $3,766.63¼.
Fred D. Dutcher, Fulton, N. Y.; $4,233.61.
Pathfinder Construction Co., Inc., Fulton, N. C.; $4,290.44.
Semper Brothers, Watertown, N. Y.; $4,649.73.
I. B. Contracting Company, New York city; v4,65b.11.
DeBarber & Hill, Fulton, N. Y.; $4,725.76.

The names of the successful bidders will be made public shortly.

Rubber tires for buggies, also baby cabs and go-carts. Van Wagenen Inc. adv133

Frances Munds, state senator of Arizona, announces in a letter to the Woman's Journal that in her state the age of consent for girls has been raised from 16 to 18 years. The age of consent is now 18 in every equal suffrage state, except one, where women have helped elect a legislature.

* * *

The Reno Evening Gazette, which last fall opposed woman suffrage in Nevada, said on May 5 in its write-up of the municipal election which had taken place the day before, "Everyone must admit that no mistake was made in Nevada in giving women the right to vote."

* * *

The Child Hygiene Bureau which will make its bow to the public on July 1 in equal suffrage Kansas will receive notification of the birth of each Kansas baby. The Bureau will then see to it that the mother knows all about feeding, clothing, and caring for the helpless stranger, not by sending bulletins, but by personal visits to the home made by nurses and physicians trained in child hygiene.

* * *

The Survey, in commenting on the recent Conference for Education and Industry at Chattanooga, said, "Among the biggest sessions were those held by the women. Their innate capacity for politics shows itself even in the South."

Again we are reminded of the famous assertion of John Stuart Mill to the effect that politics was the one field from which women were hopeless excluded and the one field in which they had shown pre-eminent ability.

* * *

"While we are aware that divorce is increasing three times as fast as the population," said Professor Ross the distinguished sociologist, speaking before the Twentieth Century Club in Detroit, "we have no right to refer to the days of grandma as 'the good old days.' We are merely finding out what grandma thought of grandfather but dared not say. Grandma did not dare seek a divoree because she could not support herself."

Since the cat is let out of the bag and grandma's virtues thus shown to be the outcome of the economic conditions under which she lived, it may clear the way for the modern woman to go ahead and get the vote or anything else she needs to enable her to be a good mother and homemaker or a successful wage earner and not be constantly exhorted to take grandma for a model.

* * *

"I have been to the polls three times with my husband," said Mrs. Raymond Robins in a recent Boston speech; "I find it to be a very self-respecting experience."

The State Federation of Women's Clubs of Arkansas in session the first week of May unanimously endorsed woman suffrage. Arkansas is the twenty-sixth state to take similar action.

GIFTS POURED UPON PA AND MA SUNDAY

Among the presents showered upon "Billy" Sunday at his revival meetings in Paterson, N. J., were a coffee percolator, a bolt of silk, a Bible and a rubber doormat. The latter was of the "welcome" variety and bore his name, with a red star in one corner. As this is the last week of the revival, many presents are being given to Mr. Sunday and his wife, besides the collections of money at all meetings, which go to the evangelist.

Mrs. Sunday received a brass bird cage with a live canary in it, and when she accepted the present on the platform she said she received a similar gift in Philadelphia, and named the bird Phil. Therefore she said she would call this bird Pat.

THE QUIRK TODAY

Most wonderful cast ever assembled for a picture, appears in William Fox's "Kreutzer Sonata." Every artist a Broadway star.

Every principal role in the long list of characters in the William Fox presentation of Tolstoi's modern dramatic masterpiece, "Kreutzer Sonata," is filled by a Broadway star. The minor parts are enacted by equally well-known actors and actresses.

Nance O'Neil, the young American emotional actress, whose art is known on all four cotiments, plays the great role of Miriam, the wronged wife; who takes in the end a terrible revenge for her injuries. Miss O'Neil gives a veritably soul-shaking rendition of the character. Theda Bara, leading woman of the famed Theatre Antoine, Paris, adds another "Vampire Woman" to the part. William E. Shay, star of a dozen big productions and formerly leading man for Robert E. Mantell, Mrs. Minnie Maddern Fiske, Viola Allen, and other great artists, portrays, with wonderful brilliancy, the violinist, Gregor Randor, who plays his way into Celia's heart with "Kreutzer Sonata." John Daly Murphy, creator of "Charley's Aunt," and other famous farcieal parts has the comedy part of Sam Friedlander, the young "sport." Anne Sutherland, than whom no leading woman is better known to the American public, plays another important part.

Charles Chaplin in a roaring comedy, "The Kid Auto," also is on the bill.

SUMMER DAYS BRING OXFORD DAYS

Shoes for All Social Affairs

New York, May 21.—Wedding gowns, Commencement frocks, dainty practical attire for many Spring demands, and for the Summer that is in such a rush that it cuts in with 90 degrees in April, forces even the most dilatory planner to devote time and attention to things sartorial.

Fashionable assemblages look as if our grandmothers had suddenly been rejuvenated and appeared in the frock and fallals that they wore in the early 60's, when short dresses showed a daintly formed ankle and trim slipper below the fullest and flounciest of skirts. They never wore anything however, as abbreviated as the present Russian Ballet types. The high fancy boots carry these short flaring frocks off with comparative propriety now, but one wonders a bit how it will look when Summer makes the low shoe a necessity.

Spats

Spats are the answer now with many of the women already wearing low cut footwear and a very smart and practical answer it proves both as to looks and expenditures. Sand and light greys are rivaled by white in these accessories. The latter spat often of white canvas, which is again practical because easily cleaned, and inexpensive.

Novel and pretty and practical is the new Callot model wedding gown with its white satin Detachable Bolero with court train, to be worn over a foundation frock of white chiffon-crepe combined with lace. This in a moment may be converted into an adorable dancing frock with detachable colored girdles.

Marquisette, organdie, net, batiste, and many other suitable white fabrics make most girlish and dainty frocks for commencements which loom importantly at this time of year.

The season models are fertile in suggestions for this type of gown. Flounces and frills and surplice bodices for especially slender wearers and simpler straight designs, with hemstitched nishes and touches of simple embroidery. Organdie tucked or ruffled with finishes of dainty French Valenciennes makes exquisite attractive dresses, and while all white is correct for these momentous functions, variety of effect can be introduced for after-wear in dainty little silk coats of colored taffeta, as well as in girdles and sashes.

McCall Designs

Self Trimmings

Self-trimmings of the dress material are very modish. Puffings and ruchings, tucks and flounces, smocking are all to the fore, for adornment and embroidery in a number of quickly done styles. Some of the prettiest are simply braided with heavy silk threads or with beads strung as one buys them.

Stripes and checks are fashionable, the latter especially fetching inchecked blocks, printed on silk or cotton tissues that make pretty blouses and combination effects.

All over the town one meets white fox scarfs worn over thinnest of frocks and blouses, even when the altitude of the mercury must make their wearers decidedly uncomfortable. Becoming and dainty and the tip-of-the-mode are these, so we will see them all through the Summer, for they will beb oth worth whilo and pretty when sea breezes blow and winds are cool at high resorts.

THE ART OF WALKING

BY THE FRA

I regard it as an interesting fact, as well as a lamentable, that the Latin verb, ambulo, "I walk," has given to the English Language the word "ambulance." Sort of a subtle indictment on modern civilization, it would seem.

The art of walking, says a sage, is suggestive of the dignity of man.

Granting the truth of this statement, we must admit that most of us are little versed in this gentle art. Art is a way—the beautiful way. And we do walk beautifully? Not so you can notice it, Terese!

Stand at any street-corner in any city in the land, and count the folks whose walking is suggestive of dignity. The fact is, we are not a nation of walkers. It is different with our English cousins.

A ten-mile hike is nothing unusual for an Englishwoman. It is with her a common, almost a daily occurrence. When she sets forth for a constitutional, she wears the right kind of shoes—stout, thick-soled affairs that accommodate themselves to the movements of the feet, and do not cramp nor pinch. She comes back from her hike, and changes her shoes mor something lighter. She caters to her feet.

When you walk, walk! Don't amble and shamble. Let there be resiliency in your tread—grace, poise, power and dignity in your carriage. Above all, provide your feet with shoes that fit.

SHOES AND CHARACTER

By ELBERT HUBBARD

There are four primal necessities in life—only four.

These are food, clothing, shelter—love.

Shoes and hats are a part of our clothing. Also, they are secondary sexual manifestations, said Herbert Spencer. Spencer was a bachelor, and he knew.

And as women's shoes get more beautiful, skirts grow short.

Spiritless, dejected, whipped-out men advertise to the world their mental condition by their shoes.

There is a wonderful story by Tolstoy about a shoemaker whose shop was in a basement. When this shoemaker looked up from his work, he saw the feet of the people as they passed. Seldom did he see their faces—just their feet.

He judged them by their shoes, and his estimate was usually correct.

Once he saw a man go by barefoot. The shoemaker jumped up—but what is the use, read the story for yourself.

The title of the story is, Where God is, There Is Love.

Read it, and when you do, think of me and breathe a prayer of gratitude for having been introduced to one of the little big things in literature.

Shoes, sure, that's the subject!

Hope, courage, animation, ambition, are mirrored in your shoes. Look to your pedals. Terese, to your pedals. Your feet feature the facts. Shoes are a tell-tale.

Once there were people in America who never wore shoes. Now, we all do—a part of the time, at least.

The Kneippers do not go barefoot all the time.

John Wesley, when he was rector of the church at Savannah, Georgia, went barefoot even in the pulpit, to show his sympathy with the shoeless.

For to be shoeless was to be friendless.

Tolstoy went barefoot in the streets of Saint Petersburg, for the same reason that John Wesley went barefoot in Savannah, and was taken in charge by the police. And a celebrated painting of Tolstoy in bare feet was officially ordered from the shop-windows because the people stood before it in mute admiration.

The Best-Shod People on Earth

In America, friendless and shoeless humanity, practically, does not exist.

When we go barefoot we wade in the surf—what larks!

Americans are the best shod people on earth.

Our consumption of shoes is two hundred seventy million pairs a year —three pairs to a person.

Twenty-five years ago it was two pairs a year per person. We are getting more particular. Also, as the years have passed, our shoes have been bettered in style and quality. Most of us, even us common folks, have different shoes for different occasions. It's better for our feet, and better for our heads, as it lifts our self-respect When you change your shoes, your change your mind.

Shoe-manufacturers are a prosperous people. There is no "Shoe Trust," and there can't be, for there are thirteen hundred shoe-factories in the United States, and more are being formed.

I know of six shoe-factories in St. Louis, all started by employes, who have come out of one particular factory and embarked in business on their own account. And they are all making money.

From Nineteen Hundred to Nineteen Hundred Twelve, the products of our shoe-factories have increased a little over seventy per cent., while population has, during the same period, increased less than twenty-five per cent.

Our exports of shoes have jumped from two million dollars in Nineteen Hundred to over seventeen million dollars in Nineteen Hundred Twelve.

Monopoly is out of the question in the shoe business, for the simple reason that any one who wants to start a shoe-factory is not obliged to buy an outfit of costly machinery. He can lease shoe-making machinery, and get it on exactly the same terms that the biggest factories can.

If every shoe-factory had to buy or manufacture its own machinery, and thus keep abreast of the times, it would require such a vast capital, and also such a corps of inventors, that of necessity the business would be concentrated in the hands of a few.

Instead of thirteen hundred factories, there would be thirteen, and if there were only thirteen they would get together and we would have a Shoe Trust. As it is, we haven't.

Today, the boot and shoe industry is the one large business left in the world not run by a so-called Trust, and the United Shoe Machinery Company is responsible for that fact.

The "Machinery Trust" Bugaboo

Ralph Waldo Emerson once said that the man who makes a pair of shoes carpets the earth with leather.

Not so many years ago shoes were made by individual shoemakers. They put your pedal on a piece of paper and the shoe maker ran his pencil around your "tootsie," and then took various strange, peculiar and complex measurements, just as the old-time tailor did.

When you got your shoes, perhaps they fitted and perhaps they did not, but the breaking in of a pair of shoes was a terrible thing.

Personally, I much preferred to go barefoot—and I did until Winter, when snow and ice came along and made the wearing of leather a necessity.

The factories of New England began with home industries. Things were made in the kitchen, cut out with jackknife, stitched, polished, put together, peddled out by the family, just as the father of Henry Thoreau made lead-pencils and Henry went out on the road selling them by the dozen, the gross or one at a time, just as luck would have it.

America now makes the best shoes in the world. Europe is coming along fast, however, and the other day a German told me that it was because the Germans were putting in American machinery that they were able to compete with American shoes in style and quality.

OSWEGO WOMAN SUES FOR RIGHT OF DOWER

Maheda M. Robinson, through Barnes & Mournigham, has started an action against Carrie A. Horne and W. H. Robinson to recover her right of dower in property in Cochrane st., Oswego, left by plaintiff's husband, John C. Robinson, who died in November, 1913. Mrs. Robinson claims that it is now in the possession of the defendants, a niece and brother of the decedent, and she asks that it be sold so that she can get possession of her interest in the same.

YOUNG BRIDE AND GROOM ARE PARTED

As a result of action by Immigration Inspector Isaac Martin, two young hearts are sad. Notwithstanding the war between their countries, Germaine Lefevre, 19 years old, a French-Canadian young woman, and Adolph Schneider, a 22-year-old subject of Kaiser Wilhelm, developed an affection for each other, and the protests of relatives and friends could not keep them apart.

Schneider's Teutonic blood and name is said to have lost him his job at a Montreal hotel, when the war broke out, and he was forbidden to meet the girl, but did so clandestinely. Then Schneider sailed from Montreal to New York, and soon after the young woman joined him. Later they came to Rochester separately, and they say they were married here about three weeks ago.

The couple were traced to New York and here, Inspector Martin appealed to Captain Whaley, and Detectives Andrews and Seiner found them yesterday morning. The young woman must return to Canada. Schneider's case is complicated, as it will be difficult to find a boat by which to return him to Germany.

KNIGHTS TO CONDUCT SCHOLARSHIPS EXAMS.

The annual examination for the nine scholarships which have been established in the Catholic colleges of the State by the Knights of Columbus will be held on Saturday, June 19th. The candidates for these scholarships must be either Knights of Columbus, or sons or brothers of living or deceased members of the order, and must be of such circumstances that the collegiate education could not be obtained but for this assistance.

AT 1915 FAIR

Competitions Open to All Oswego Co. School Pupils; Interest Aroused

This year's educational exhibit at the Oswego County Agricultural Fair, to be held during the week of August 17 to 20, and open to any pupil of any school in this county, is bound to arouse more than ordinary interest.

One feature of the exhibit that will enhance the value of an admission ticket to the fair, is that the purchase of one admission ticket at twenty-five cents entitles the holder thereof to enter one or more classes in this department. This commendable department has been created by the society for the purpose of encouraging pupils of the schools to take greater interest in their work. This year's departure is but a beginning of a movement to make of the educational feature of the Fair one of the main drawing cards, and it will be enlarged as interest in it is warranted.

For the best map drawing on paper 18x24 inches, showing Oswego county, its towns, villages, rivers, lakes, railroads, etc., a first prize of $1 is offered, and 50 cents for the second award.

The drawing department will include perspective work, mechanical drawing, lettering, designing, the latter embracing wall paper designs, in color; tiles, book cover designs, etc.

The cooking department must embrace work only by school children—for the best loaf of bread, rolls, biscuits, layer cake, loaf cake, cookies, pie, etc.

The sewing exhibit will include the best domestic science outfit, consisting of cap and apron for seventh grade girls: embroidered bags, pincushions, doilies, dress and hat.

In manual training, boys of the fifth, sixth, seventh and eighth grades will have a try for making wood patterns and wood turning. Basketry will include reed basket and rafia work.

The collection department, the prizes will be $1 and 50 cents respectively for first and second and competitors must show native woods, mounted on heavy cardboard, dried grasses, weeds obnoxious to farmers and common grains.

In the miscellaneous exhibit the following articles are mentioned:

Insects, mounted and named; eggs of domestic fowls; wasp's nests; moths and butterflies named, showing life history; grains, showing seed, seedling, plant, head, etc; legumes; mounts of wildflowers; mount showing leaf, bark, wood, twig, fruit, etc.; mounts of leaves and fruit of oaks, maples, sumacs and evergreens; model of a poultry house, feed hopper or trough, chicken coop, etc.

Best typewritten business letter, of not more than 150 words nor less than 100. Open to those who have not completed the business course of the public schools. Paper should not be folded and should be 8½x11. Preferably a letter head of business firm.

The Oswego Fair is interested in the schools and the school children of our county, and with the assistance of the County Superintendent, will do everything possible to increase the interest of the pupils in their work.

Plan to visit the Fair and see the school exhibit.

Address all communications to C. I. Kingsbury, Secretary, Fulton, N.Y.

FOUR FINE HORSES COMING NEXT WEEK

W. H. Merriam, superintendent of grounds and buildings, announces that a string of four fine trotters will occupy the Oswego County Agricultural society's stables next week. These horses will remain at the track from now on until fair time, Aug. 17 to 20, and will be trained on the track which is said to be in better condition than ever before.

Mr. Merriam employes a force of men every day at putting buildings and grounds in spick-and-span condition.

CHRISTIAN SCIENCE LECTURE IN OSWEGO

To show that Christian Science heals the sick and that its mission is to help all mankind to its rightful heritage of good, is the mission of George Shaw Cook of Chicago, Ill., who will present a lecture on "God Is Good," at the First Church of Christ, Scientist, Oswego, Friday evening at 8 o'clock and also at the Wieting, Syracuse, at 4 o'clock next Sunday afternoon. This lecture, which is free with those established by the Board of Lectureship of the "mother" church in Boston, to present the true and authentic statements of Christian Science before the public. Mr. Cook is an authority on his subject, having been an earnest student of this religion for many years and having held office in one of the many Christian Science churches of Chicago. This religion has made such rapid advancement during the past decade that it has attracted the attention of all classes of people even though all do not agree with its principles. The lecture will be open to the public.

TWO LUDINGTON GRANDCHILDREN WRITE LETTERS

From the East, West, North and South there arrive at most frequent intervals, letters addressed by heirs and probable heirs of the late Moses Ludington who died in California about fifty years ago.

One of the latest letters to arrive is from Mrs. Ida A. Foster Irwin, of Battle Creek, Michigan. Mrs. Irwin says she is a granddaughter of Mr. Ludington's.

This morning a letter was received written by Mrs. L. M. Calkins, who lives in Takoma Park, Washington, D. C. She informs The Times that Moses E. Ludington was her mother's father, and that she is one of the nine grandchildren who survive Moses E. Ludington, and who at one time had twelve children living. The last of the twelve children to die was Austin E. Ludington, who was buried in Mt. Adnah cemetery, this city, last spring. Mrs. Calkins is in possession of a lot of information concerning the descendants of Moses Ludington and is ready to produce it, if desired.

RUTH PEARMAN HUMPHREY

Mrs. Ruth Pearman Humphrey, 44 years old, died in Plymouth, Mass., on Tuesday, where she and Mr. Humphrey have lived for nearly twenty years. The body will be brought to Fulton and will arrive here on Saturday at 8 a.m. Funeral services will be held Saturday at 3.30 p.m., at the home of Mr. and Mrs. Frederick Scholz, 425 S. 4th st., the Rev. M. G. Buck officiating, burial to be made in Mt. Adnah cemetery.

Mrs. Humphrey is remembered by numerous Fulton residents who know her for her many Christian qualities. She is survived by her husband and three children the eldest of whom is Carl, 22; Dorothy, 19, Harold 17; and three sisters, Mrs. Russell Draper, Mrs. Bert Jones and Mrs. Fred Scholz.

Mrs. Humphrey was a daughter of Mr. and Mrs. James Pearman, both of whom are dead. Mrs. Pearman was during his lifetime a foundryman and machinist, engaged in business in N. 1st st., near where now stands the plant of the Dilts Machine Works.

"OUR DAN" ACTED BEFORE ROTARY CLUB

Lest they forget him, the Syracuse Rotary Club enjoyed today the versatiliey of "Our Dan," who is known on and off the stage all over this fair land as a thespian of ability.

"Our Dan" received a telephone call yesterday from a member of the famous club of diners asking him to entertain today at the Onondaga, and actor-like Mr. Darleigh said, yes. His U-1 was speeded toward Syracuse this morning and from start to finish durin gthe entertainment "Our Dan" kept up a hot fusilade of Iring 17-inch projectiles.

Accused Massarvi of Giving a Kick

Elizabeth Anson, 15 years old, swore out a warrant for the arrest of Jerry Massarvi, on a charge of assault this morning and the case came before Judge Wilson in City Court. The girl claimed that the young Italian had assaulted her last night at the corner of Oneida and 2d sts, by kicking her while she was talking to him.

James R. Somers represented Massarvi and the girl had no attorney. The defendant claimed that he was standing on the corner of Oneida st. and bothering no one, when the girl passed accompanied by her mother and stopped to talk to him. In the course of the conversaiton, Massarvi alleges, the girl asked him to take her to the moving pictures or to give her the money to go. He says he never saw the girl before and was explaining to her that he was not accustomed to taking strange young women to the theatre, and while speaking shifted the position of his feet. One of his feet hit the girl and she immediately accused him of kicking her. He was afterward arrested.

The girl was accompanied by her mother in court this morning and after a consultation it was decided that the case should be compromised. Before allowing the parties to go, however, Judge Wilson warned Mrs. Anson to keep her daughter off the street and told her that another request for moving picture money made to a strange man would result in some serious trouble. Mrs. Anson indignantly denied that her daughter had asked for funds, but the Judge was of the opinion that the girl was rather forward for her years and warned her mother to keep her in chage. The costs of the action were paid by Massarvi.

INTERNAL REVENUE TAXES DUE JULY 1

Internal revenue offices in the various cities are preparing for busy times between now and July 1. On July 1 all of the special emergency taxes will expire and have to be renewed while at the same time the income tax will fall due, both on business and personal assessments.

Notices asking that those liable under any of the taxes pay in during June and facilitate the work of the office will be sent out from the Syracuse internal revenue office, headquarters for this district, about June 1, but a great deal of work incidental to the collection falls upon deputy collectors.

Special taxes on oleomargarine, liquor and opium can be paid a year in advance. The liquor tax is $25 for a saloon and $100 for a wholesale house; the oleomargarine tax is $6 for a dealer and $200 for the wholesaler and the opium tax is $1 yearly from all doctors. The law covering the special emergency tax on poolroom sand tobacco expires January 1, 1916, and it is not known whether these taxes are to be paid for one year or six months. Instructions upon this point are awaited by the revenue officers.

Special government agents are investigating personal and business incomes of individuals and corporations in this district and an especial effort is to be made to collect the tax from all those liable under the law. The income tax scale depends upon the amount of the income. Unmarried men are exempted with incomes not exceeding $3,000, while an income of $1,000 additional is permitted to those having a wife.

MISS DRURY WILL WED MR. VANALSTYNE

Mr. and Mrs. Walter Drury of West 4th st., have announced the engagement of their daughter, Elsie to Durlin van Alsyne, son of Mr. and Mrs. James van Alstyne of Cayuga st.

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 21. —If there is a taxpayer in the State who feels that he has an idea which may be developed into an amendment to the Constitution, let him now comef orward or hold his peace for twenty years.

The above sentence practically sums up what Delegate Richard H. Curren of the forty-sixth district has to say to those who may think that the document which contains the rules by which all good citizens are being governed is being tinkered with or is about to be revised by men who have selfish interests or are representing interests other than those of residents of the State in general.

The functions of a delegate to a Constitutional Convention do not appear to be universally understood, nor do the people seem to appreciate the full significance of the Convention. At least this is what some of the delegates think and is doubtless the reasonw yh Delegate Curren has said publicly that he wants the people of the State to keep in mind the fact that the doors of the Convention are open to all taxpayers and that everybody is privileged to make suggestions as to what amendments should be made to the Constitution by the delegates. Mr. Curren has extended an invitation to the public to "drop around now and then and air their views as to prospective changes.

Probably because the business of the Convention continues to be of brief duration each day and there have been no debates or arguments, there have been but few persons lately during the sessions of the Convention delegates. During the opening week the very unusual event drew large audiences to the Assembly Chamber, but of late there have been but a handful of spectators, auditors or visitors each day. Expectation, raised to a high pitch because much was published concerning the unlimited authority of the delegate body, waned when it was discovered that other than the introduction of proposed amendments and committee hearings, nothing of a definite character would be done by the delegates until a calendar, formed by the favorable reporting of propositions, was created.

Chairman Elihu Root has said that it is not the resolutions which are introduced but those which have been favorably reported and favorably passed upon by the Convention sitting as a committee of the whole, which are important. He has promised full discussion of each surh resolutions. It is these discussions which the good sense of the general public and stands readp to introduce a proposition if it appears sound. His challenge to the taxpayers is very likely to be taken up before the date upon and after which no more resolutions will bep resented falls due. This date is June 11.

There is ample opportunity for a taxpayer to meet a delegate and offer his reconstructive suggestion. Both before and after the sessions of the Convention the members are to be found in the Assembly Chamber or in the several committee rooms. All being vitally concerned in the work before them, any matter bearing upon the Convention is likely to receive immediate consideration. As a matter of fact, conditions similar to a legislative session exist; an amendment is presented to a delegate by a constituent in much the same fashion as a bill is handed to a senator or an assemblyman.

Police Kept Crowd in Trim at Sale

Three hundred people crowded into the Shipman store this morning when the doors opened for a special sale of granite ware, and as most of the shoppers were women, the resulting confusion became so great that it was necessary to call the police to keep the crowd in order. The women pressed forward and because of the rush many were obliged to seek the open air. The police were finally forced to close the doors and allow only one person at a time to enter.

In order to avert like occurrences at future sales Mr. Shipman announced this morning that he would arrange the goods in such a way that a circular aisle will be formed and people will be allowed to enter only by one door. The extra force of clerks were unable to cope with the large crowd that thronged the store this morning.

DYE INDUSTRY PLACED UPON FIRMER BASIS

New York, May 21—So many American consumers of dye-stuffs have signed the novel contract with the National Aniline and Chemical Company which provides that they shall buy dyes from this corporation for all the year 1916, that it looks as though a native industry were about to be placed on a much firmer basis.

Hitherto German competition in various kinds of aniline dyes and the "dumping" policy of the German manufacturers has made it hard for the American makers of dyes to withstand the competition.

The National Analine Company is enlarging its plant at Buffalo at a cost of $300,000 and expects to be able to furnish most of the dyes required within a short time. It is estimated that all the stocks from the German manfacturers will have been exhausted by July 1 and there will be no German dyes of any kind to be obtained in them arkets.

Meanwhile the requisite recovery plants in connection with coke works are being built. From the coal tar will be obtained which is the basis of hundreds of the aniline dyes.

Considerable activity is shown at Elizabeth, N. J., where the E. L. du Pont de Nemours Powder Company has bought the works of the Bayway Distilling Company. The Midvale Chemical Works, of St. Louis, are erecting at Elizabeth a large plant for the manufacture of aniline. It is believed that before long large quantities of aniline salt and aniline oil will be available. The normal price of aniline salt is ten cents a pound and there have been instances when nine times that amount has been obtained for it. Under the new arrangements it is believed that it may be obtained for thirty cents and in a year for considerably less.

SMUGGLING STOPPED BY ARMED GUARDS

Buffalo, May 20.—With orders to use their muskets if necessary, soldiers have been lined along the banks of Niagara river between Niagara-on-the-Lake and Queenstown, with positive orders to prevent any boats landing between sunset and sunrise, and all boats leaving the Canadian shore, whether empty or loaded, have to report the fact to the officer in charge of the guard along the frontier and obtain his special permission.

Even the Prussian leaders appear to be sobered by the prospect that Italy will soon be fighting on the side of the Allies. "The more enemies the more honor," is not a motto that commends itself to people of sane minds.

TO LAKE FORTUNE

Accuses Husband of Cruelty and Non-Support; Wants Money Allowance

James Merrill of New York City, one of the heirs of the estate of Elijah Lake of this city, is being sued at present in the Supreme Court of New York city for alimony. His wife, Isabella Merrill brings charges of cruelty and non-support and asserts that her husband has mistreated her in many ways.

Merrill is headwaiter in Churchills, the famous Broadway restaurant, and receives a salary of $125 monthly in addition to numerous tips which bring the total to almost $250 a month. His wife was a vaudeville actress at one time, but the hard times, she says, have wrought havoc with the profession and she is unabel to support herself without the aid of her husband. She sets her usual salary at $150 a week.

She purchased, with her own money, a farm in Phoenix and paid $3500 for it, but when engagements were few and far between she sold it and allowed her husband to persuade her to give him half of the proceeds, his share amounting to 11125. He has forgotten to return this small amount to her and she asks the court to compel him to refund the money. She still owns two lots in Pelham Manor and four lots in Jersey City.

Her husband is one of the many heirs who are contesting the will of the late Elijah Lake who died less than a year ago. The estate is valued at less than $25,000 and his attorneys are Reilly and Sullivan of Phoenix. By his will, Elijah Lake left his entire estate to his young son, Elijah Lake, Jr.

Justice Greenbaum, who has the Merrill case under advisement, may allow Mrs. Merrill counsel fees and an allowance pending the trial of the suit.

The idea of setting loose a "flood" of bees in the German trenches could be improved upon. Why not enlist an army of New Jersey mosquitoes?

DIOCESON CONVENTION LETS WOMEN VOTE

New York, May 21.—Convention of the Long Island Diocese of the Protestant Episcopal church yesterday adopted a canon which will permit women of parishes to vote for vestrymen.

The Committee on Canons was notable to agree on the proposal and in the morning the convention voted against it. This afternoon, when Canon William S. Chase called the matter up again under the proposal that women could vote if their individual parishes agreed to it the convention adopted the measure.

Pensions for aged and infirm clergymen also were voted. Under this arrangement parishes will pay into the national pension fund of the church seven per cent of the salary of their rectors. When the rector is sixty-nine years old he may retire on a pension of not more than $2,000 a year and not less than $600.

EDGELEY'S CONDITION REMAINS UNCHANGED

The condition of Clinton Edgeley, the young man who was injured in the motorcycle accident at Bundyville Tuesday night, was reported as unchanged this morning. He has recovered consciousness for short periods but never sufficiently to recognize anyone, and Dr. Anderson announced last night that the man is evidently suffering from a concussion of the brain.

The man's temperature and pulse are normal, and outwardly he manifests no signs of serious injury, but still remains in a coma and efforts to restore him to consciousness have been thus far unavailing.

BRADLEY COMPANY FINISH MIXING TOWER

The Walter Bradley Company contractors, in charge of the work of the erection of the new plant of the Oswego Falls Pulp and Paper Company, have completed the work of building the tower which will be used in the distribution of concrete for the foundation. The tool house which stood upon the site of the new plant, has been removed to a point nearer 1st st., and set upon a concrete foundation. The work of excavating for the foundation of the new plant will start immediately.

ARE YOU LOOKING FOR A SUIT?

We are selling our Suits at unusual reductions:

$12.50 Suits at **$6.00**
$20.00 and $25.00 Suits at **$14.98**
$15 Suits at **$9.98**
$27.50 and $30.00 Suits at **$19.98**

While we have not as large a stock on hand as we had, we still have a good assortment of sizes, and can fit your purse as well as size.

Have you taken advantage of the great bargains offered in our bargain basement where

TRUCK ENDANGERED PEDESTRIANS' LIVES

An automobile delivery truck filled with young men and women, made several circuits of the business section last night at a rate that shattered the speed limits and in many instances narrowly escaped running down pedestrians. The driver turned corners at high speed and handled the machine in a very reckless manner. There have been a number of complaints about the operation of taricabs in the city, especially in the down town section. The drivers of the hired vehicles run with the cutout wide open and at high speed and many pedestrians are beginning to wonder when the police motorcycle will be put into operation.

ZION CHURCH GETTING SUBSCRIPTION MONEY

At a meeting of the vestry of the Zion Episcopal church, held Thursday night at the rectory, the building of the new edifice in 1st st. was discussed. The reports of the finance committee were made and it is very probable that work will be commenced shortly, although it was stated that there was nothing definite to announce at present. The committee in charge of the subscriptions gave a very favorable report and some definite action will probably be taken at the next meeting which will be held at the rectory next Friday evening.

A REAL NECESSITY

No Advertiser can Successfully Develop Trade in the Market Afforded by the People of Fulton, Unless He Employs the Advertising Columns of

THE FULTON EVENING TIMES

¶ Remember that its circulation represents ONE-SIXTH of the population of Fulton, therefore it is necessary to use *The Evening Times* to make your proposition a success.

¶ *The Evening Times'* readers represent the same classes as any other paper circulated in this vicinity, who are, collectively, the all-powerful people for the advertiser to reach.

¶ The people of Fulton reached by *The Evening Times* buy ONE-SIXTH of everything sold in the city. They have money to buy luxuries as well as necessities, and they read THIS PAPER because it is their Home Paper—edited, printed and circulated by "Home Talent" who spend their money for the upbuilding of Fulton—your City.

¶ Readers of *The Evening Times* are a big, mighty crowd—to neglect them, to ignore them means a lack of business judgment, and it requires the support of the big crowd to put things over.

THE BIG CROWD OF FULTON—READ YOUR HOME PAPER

"A HERALD OF PROGRESS"

PROCESSION ON MEMORIAL DAY

By M. QUAD

Copyright, 19[illegible], by the McClure Newspaper Syndicate.

It was about a week before Memorial day a few years ago that one Horatio Sparrow, a resident of the village of Okemos, entered the drug store in that burg looking as if he had something serious on his mind, and on being encouraged a little he said to the druggist:

"Doc, don't say nothin' to a livin' soul, but the town of Okemos is to be jarred from center to circumference this evenin'!"

"In what way?" was asked.

"Never you mind, but be at the postoffice at 7 o'clock. Meanwhile get ready to feel the earth tremble!"

"Is it dynamite, Horatio?" was gasped.

"You be there and see!"

Horatio was a man that never got excited when he woke up in the morning and found a cow in his garden, and the druggist felt quite sure he had something big on hand. He must have told about fifty other people what he told him, for there was a big crowd at the postoffice at 7 o'clock in the evening, and all expected to hear big news. Deacon Holden took charge of things, as usual, and as the crowd got impatient he said:

"It is understood, feller citizens, that Horatio Sparrow is goin' to launch a thunderbolt here tonight, and it is with more than ordinary interest that I call the meetin' to order. Stand out, Horatio, and let's hear all about it."

Horatio stood out. He looked pale, but determined. He'd been thinking for a week of what he was going to say, and he started off as smooth as grease:

"The drums are beatin' a wild alarm. There is a wavin' of flags, a marchin' of men and a wailin' of women and children. War is upon the land. The life of the nation is at stake."

"By John, but that's flow'ry language!" exclaimed the deacon.

"Anything more, Horatio?"

"I jest want to call your attention to the fact that Okemos has never had a Memorial day parade," replied the orator. "We hev never paraded and never decorated."

"By John, but that's a strong p'int!" shouted the deacon. "Hang me if Horatio ain't knockin' things edgeways. No, sir; we've never had a parade nor decorated any graves, and we ought to be ashamed of ourselves. It is your suggestion that we celebrate the day this year, Horatio?"

"That's a p'int, deacon."

"And it's as strong as a log chain. Yes, sir; we'll celebrate the day, and in order to make it a howlin' success I'll agree to take charge of the parade."

"But I object to that," said Horatio. "Hevin' originated this idea, I think it's fur me to ride on horseback at the head of the procession."

There was a painful pause, and then Abner Jones, who was in fireman's uniform, jumped off the counter and said:

"There shouldn't be no jealousy about this thing. Horatio would look purty fine on his spotted horse, and the deacon would be no slouch in his cocked hat, but if there's to be any feelin' over it I'll take the job off their hands. As I'm foreman of the fire company, it comes in my line anyhow."

"I don't propose to give up my right for nobody," said Horatio.

"And I'm thinkin' I'm the man to boss things," added the deacon.

"It appears to me," said Silas Lapham as he stood up and rubbed his hands together, "that we are not workin' in complete harmony in this matter. It will be the event of the century. Let us sacrifice any selfish interests as individuals and work to make the affair a general success."

"That's powerful good advice," said the deacon as he rapped on the stove with his cane—"powerful good. I allus stand ready to sacrifice, and I hope the rest of you do. Any further p'int, Silas?"

"You can call it a p'int or not," said Silas, "but bein' there seems to be a controversy here I think it better be settled by selectin' me to boss things."

"I'll never surrender my rights!" said Horatio Sparrow.

"Nor me!" added Deacon Holden.

"Nor me!" yelled Abner Jones.

It was evident that the meeting was on the point of breaking up in a row when Joe Richard came sauntering in as calmly as could be. The deacon saw him and called out:

"Feller patriots, before this meetin' breaks up in a row that will send the price of Okemos real estate down 50 per cent and put our civilizashun back fifty years let's hear what Joe Richard has to say about it."

"What's the question?" asked Joe.

"About Memorial day. Shall we decorate?"

"Decorate what?"

"Why, the soldiers' graves."

"I don't see how you are goin' to do it," said Joe as he scratched his ear. "So fur as I know or hev bin able to find out nobody from Okemos went to war. It therefore follers that no Okemos man was ever killed. It follers, ag'in, that you might look the graveyard over fur a month and not find a soldier's grave to decorate. 'Pears to me that you had better git yer grave fust."

Two minutes later Joe was the only man left in the postoffice. It was as he had said—there was nothing to decorate, and all the blowing had been for nothing.

A Story of William Black, the Novelist, and Mary Anderson.

One time when Mary Anderson was playing in "The Winter's Tale" in Dublin William Black, the novelist, who was very intimate with Miss Anderson and her family, insisted upon assuming the part of one of the supers who was dressed as a very old man with a venerable beard and locks that fell upon his shoulders. When Black went upon the stage in this disguise he walked about among his fellow supers with unceasing restlessness and, judging by the wild motions of his arms, seemed to be addressing to each in turn an impassioned harangue. The audience began to wonder who the new actor was and what on earth he

"YOU TAKE IT."

was doing in a play in which neither Shakespeare nor the stage managers ever intended him to appear.

Presently came the time when it was the business of Perdita to distribute flowers among the peasants, among whom Black had his place. Miss Anderson, carrying on the practical jokes of the family circle, had prepared a surprise for this moment, and, having distributed flowers among the less favored supers, she handed to Black a large cake crowned with a wreath of laurel, saying as she did so, "You take it," in allusion to his triumphs in the contest of wits at the supper table.

To her consternation Black showed that he was quite prepared to carry out the jest, for, taking the cake from the hands of Perdita, he immediately distributed it in substantial portions to his hungry fellow supers who, finding it to be of excellent quality, began to munch it greedily, while the audience roared with laughter at the unusual sight until the curtain fell upon the scene.

Count Your Blessings.

Reflect upon your present blessings, of which every man has many; not on your past misfortunes, of which all men have some.—Charles Dickens.

Why Did He Do It?

One of the guests of a seaside boarding house had picked up a curiously shaped stone on the seashore that looked exactly like a half eaten crust of bread. It was being passed around the room, and the finder was evidently feeling pleased with himself at having found something really unique. Every one who saw it exclaimed how like a crust of bread it really was. It at last reached the quiet man in the corner, and the finder went up to him to get his opinion. "Yes," said the quiet man. "It is a striking resemblance. Didn't you think it was a crust of bread when you saw it on the sand?" "Yes," replied the proud finder. "I was completely taken in with it." "Then what on earth did you pick it up for?"

Startled the Actor.

Wilton Lackaye had invited a San Francisco editor to dinner. "How about 7 o'clock?" asked Lackaye.

"I can't," the editor said. "We have our conference at 7."

"Conference?" Lackaye echoed.

"Yes; we all get together every night and decide what shall go into next day's paper."

"Good heavens!" exclaimed Lackaye. "You don't meant to tell me you get out that paper deliberately?"—F. P. A. in New York Tribune.

An Article Balzac Didn't Write.

Balzac was once asked by a French publisher to write an article on the Rue Richelieu. He named his terms, which today would not seem excessive, but the publisher considered them outrageous, whereupon Balzac replied: "If I am to describe the Rue Richelieu in a way worthy of the street and of myself I must know it thoroughly and must not upon any account fail to investigate all that specially characterizes it. I shall have to commence by lunching at the Cafe Cardinal; then I must buy a gun and a cravat pin at the two shops next door to each other. After that I must go to the tailor's at the corner of the Rue St. Marc"— "Oh, don't go any further than that," interrupted the publisher in alarm. "You would come to the Indian shop next, and things there are a fabulous price!"

A Lifelong Regret

By F. A. MITCHEL

When the big European war broke out on the 30th of July, 1914, I was in Berlin. My parents being Germans, though born in America myself, I thought it would please my father if I volunteered to fight the allies. So I went off to Belgium with a company of uhlans and got into the thick of it at once.

My chief delight was scouting. While the German army was reducing the forts about Liege there was work to do in a different way, and I was much better pleased at doing it than hanging about camp, though even the cavalry was pretty busy. I would ride out in neutral ground with a small camera and take pictures of fortifications—that is, when I could get near enough to do so without being discovered.

One day I had been unusually successful and on my way back to my command stopped at a farmhouse for refreshment. A pretty Belgian girl served me, but evidently with a very poor grace, regarding me as an enemy of her country. Between the sexes there is always a special interest in making a conquest where the party to be conquered resists the would be conqueror. I said so many pleasant things to the girl that it was not long before I congratulated myself upon having quite won her over.

Having rested for some time, I was about to mount and ride away when she made an excuse to detain me. I was not unwilling to be detained and spent an hour longer with her, during which period I did more lovemaking than I had ever done before. I made several efforts to tear myself away, but my little girl looked so reproachful at my going that I consented to remain just a little longer.

I stayed just a little too long. Suddenly hearing the beating of horses' hoofs, I started up with a view to getting away, but before I could mount my horse a squadron of Belgian cavalry came down on me and made me a prisoner. With them was a boy of fourteen whom I had seen about the place when I had first arrived. It was evident that the girl had detained me while she sent him to inform the soldiers of my presence.

I heard the officer in command thank her for the information she had sent him, and she seemed quite proud of what she had done. I was searched, and the photographs I had taken were found on me, to say nothing of my camera. Upon this the officer turned to the girl and said:

"Mademoiselle, you have helped us to quite a prize. While the captive you have given us is in uniform, he has been taking photographs of our works and will be treated accordingly."

"How is that?" asked the girl, paling.

"He will be shot."

If any blood remained in the girl's face it vanished, and I thought she would swoon. It occurred to me that she had not considered the importance to herself in the part she was playing.

But there came another turn in the affair. I had gone so long on my scout that my captain, fearing I had got into trouble, galloped out on the road I had taken to look after me. Suddenly while the Belgians were off their guard he appeared at the head of his troops, dashing around a bend in the road from behind trees. The Belgians took to flight, and I was rescued. They were pursued for some distance while I was pulling myself together and getting the arms and accouterments that had been taken from me. When I had collected everything I could find I turned to the girl who had betrayed me.

I have never in my life seen such a perfect example of sudden change. Cringing before me, she looked up into my face with a supplication for forgiveness. I returned it with a stony stare, in which I threw all the contempt I could express. She cowered beneath it, and, turning my back upon her, I stalked out of the house, mounted my horse and rode away with my comrades.

We advanced on Paris, were driven back in the battle of the Marne, and six months after the episode I have related I one day found myself fighting again in Belgium. Upon a temporary cessation of the fight I looked about me, and the region seemed familiar to me. I was near a house that I recognized as the one in which I had been betrayed.

I had always regretted having, under the strain of narrowly escaping death, dealt so harshly with the girl who had betrayed me. I went to the house and called for her, intending to speak a kindly word to her, but when I asked for her I was told that she was dead.

I winced. She was beyond either my contempt or my forgiveness.

"Did she die of an injury?" I asked.

"No. A young uhlan came by here one day, and she detained him while she sent her brother to inform some Belgian cavalry of his presence. They came and captured him, but he was rescued by his own men. The girl never forgave herself for having betrayed him and pined away and died. It's likely that she fell in love with him without knowing it."

I turned away with a pang. It is not long since the end of the story, but somehow I feel that there will always be a sore spot in my heart, a lasting regret that I was unable to forgive her, possibly to save her from a premature death.

Points for Mothers

Moral Failings of Nervous Children.

Stealing is not as common as untruthfulness and usually takes the mild form of the pilfering of jellies or sweets. Thus frequently we find the physical basis right there in the demand of the system for more sugar. Some children will take from others what they consider trifles merely from a desire to possess and would not think of appropriating anything of great value. Such a child does not consider this a form of theft and if rudely awakened to the fact that it is will suffer marked nervous shock. In a hysterical desire to ingratiate themselves with parents or teachers some children will steal money and other valuables, but always with a desire to give it to others and reserve none for themselves.

Now, in dealing with any of these forms of theft the child must not be accused of being a thief; neither must his act be called theft. It must be clearly shown to him that the act is not right; that he has no right to anything which belongs to another, and then the promise may be exacted that he will respect these rights in the future. The child should not be impressed with the full gravity of the offense because he will then be in dread of the punishment which he sees meted out to ordinary thieves. But the parent must not overlook even apparently harmless pilfering of sweets. A continuance of such habits may lead to the taking of valuables, and it must be checked as soon as possible.

A Mother's Seven Commandments.

Make love to every one, including your own children. If you say pretty things to the kiddies they will say pretty things to you.

The larger number of children in a family the better are the opportunities for a natural education. Your youngest child is always the brightest, because one child learns from another quicker than from an older person.

Never say "don't" to a child. If he becomes mischievous try to interest him in something else.

Never force a child. There is no danger of overburdening his brain with knowledge as long as he is interested. When you see you are tiring him let him rest.

Keep your children cheerful and happy by being cheerful and happy yourself. A disposition can be made in youth.

Not every mother is adapted to educate her own children, but all who can should do it.

All mothers should believe in the fairies and should make their babies believe in them. As long as they are your friend you will be happy.

Give Children Plenty of Sleep.

Modern education imposes upon children who are industrious, but slow, an increasing mental strain, and such children require much time for sleep. but the matter of sleep can be overdone as well as underdone. "Early to bed" is always a good principle and applies to all children. "Early to rise" is also a good principle for most children, but not for all. The child who is drowsy and languid in the morning, who begins his day lacking freshness and spirit, should be allowed to sleep longer in the morning until it has been determined what the definite cause may be, and irrespective of the baneful effect of loss of sleep upon the health of the child a pupil suffering from such loss cannot be sent to its instructor except with the assurance that its best mental work cannot be accomplished.

Disturbed Sleep.

When a child wakens frequently this is generally due to nervous irritability. Not infrequently this depends upon poor or improper nourishment.

Careful consideration should be given to the question of diet, for it may be insufficient in amount or of such character that it is not easily digested. Fully half the instances of disturbed sleep are due to this one cause.

If the sleeping apartment is overheated or is poorly ventilated, so that the child is robbed during sleep of good fresh air or the bed coverings are insufficient or uncomfortable this will result in disturbed sleep. Naturally with these causes present any undue excitement will aggravate the trouble.

Moral Responsibility.

At seven a child should know clearly the difference between right and wrong. We do not mean by this that he can then decide finer questions of duty and morals, but he will be able to discern what is right from what is not; and, having that power, he is accountable for his acts, if normally developed. If there is a failure at this age to discern these clearly the child should receive the benefit of a thorough physical examination to discover the fault.

Help For Mothers.

For sore throats beat the white of a fresh egg with half a teaspoonful of sugar. Then squeeze the juice of half a lemon into this. Give a teaspoonful every hour.

For a sprain beat the white of an egg with a teaspoonful of salt. Dip cloth into this, then bind on sprain. As soon as cloth dries saturate it again.

Handsome Frock of Hand Embroidered Handkerchief Linen.

PRETTY SUMMER CREATION.

Hand embroidery is used lavishly this season in the creation of handsome summer robes. The bolero jacket lends itself to the scalloped edge, as do also the yoke and the bottom of the skirt. To give the touch of color the girdle is made of rose colored satin. A hat of white hemp is trimmed with pink roses, and the stockings are pink, worn with black and white pumps.

BEAUTIFUL DOGWOODS.

When This Shrub Blossoms Summer Is Again Here.

The magnificent magnolias spread their languid petals so early, while the trees are yet bare, that one fears it is all too good to be true. But with the delicious dogwoods it is another story. One knows summer is practically here. And the dogwoods are not only charming when their snowy sheets are spread; their foliage is vivid in the fall, a glorious crimson, and the berries are even more richly tinted. Unfortunately the hungry birds often descend upon a tree and devour every blossom. Like many other shrubs, its buds for the following year will be set this autumn. Even prettier than this dogwood is the pink flowering variety, but while the color is wonderful the form is not as characteristic.

The round topped, upward branching red maple is superb against a very blue sky. Then the dark gray bark looks black and the crimson blossoms, which grow on short pedicels, seem more than ever brilliant. In Georgia and Florida these blossoms are a superb sight in March and a delight to the northerner because they come so early.

One need not be forever looking aloft, however. Right down in the grass are floral riches a-plenty. The first favorite, no doubt, is the violet, the dear, modest little violet, which everybody loves and which blossoms everywhere.

The little blue hepatica was one of the floral early buds; likewise the pinky and exquisite arbutus, which some call the mayflower. In April and May the bloodroot is found, its pure white golden hearted blossoms being as lovely as the juice of its root stock is surprising.

Put Salt In Milk.

Milk will not turn sour if a teaspoonful of fine salt be added to every quart.

When preparing onions, turnips and carrots for cooking, cut across the fiber, as this makes them more tender when cooked.

In warming a steamed pudding or in steaming a stale cake never put the article on a plate or flat dish. Place the pudding in a colander in the steamer, and you will be surprised to find how much lighter and more delicate the pudding will be than if a plate had been used for the moisture to settle on and make the pudding heavy.

CREAM BLOUSES MODISH.

Cream is the modish tone for the spring blouse, not pink. Rarely lovely as the pink blouse is in delicate flesh or shell tones, its day has passed, and these blouses are offered for sale on the bargain tables, while cream and sand colored models have the places of honor among exclusive new spring wearables. Hemstitched blouses of sand colored khaki fine for sport wear have buttoned down pockets and plaits at front and back. Cream lace and net blouses meet the requirements of formal spring tailleurs, and there are good looking blouses of tan shantung, cream tinted georgette crape and ecru pussy willow silk, all with the long sleeves and collar high at the back, whatever its cut may be at the front.

FOR HOUSEWIVES

Device For Sprinkling Clothes Evenly and Quickly.

For the purpose of aiding in the operation of sprinkling the clothes prior to the ironing a resident of Canada has invented a cup which distributes the water very thoroughly and does it in a much more satisfactory manner than the old method of dipping the hand into the fluid and flirting it over the clothes. The new cup has a handle, and adjacent to the same, in a position convenient to be controlled by the thumb, there is a trigger which controls the flow of water through perforations in the bottom. Press the trigger and a score of tiny streams are released and flow in an even and gentle maner from the cup. Release the trigger and the flow is immediately stopped.

Roast Pigeons.

Select plump pigeons, pluck and draw. Rub the inside and outside lightly with salt and pepper. Make a stuffing of equal parts of chopped celery and breadcrumbs seasoned with a little minced onion and a pinch of powdered sage. Moisten this stuffing with milk and melted butter. Stuff the pigeons with teaspoonfuls of this mixture, dropped in lightly. Place a thin slice of fat bacon over the breast of each bird, securing it with a small metal or wooden skewer. Lay them in a buttered pan, breast upward, and roast in a moderate oven. Cook the giblets in a little salted water, chop fine and add to the drippings in the roasting pan. Thicken with flour and add water sufficient to make the gravy.

Boiled Leg of Mutton.

Remove entirely the thin outer skin, but not the fat from the mutton. Place in kettle and cover with boiling water. Bring quickly to boiling point, boil five minutes and skim. Set on back of range and simmer until tender. When half done add one tablespoonful of salt. If desired brown take out of water when tender, put in a hot oven for a few minutes and serve as roast. If not browned serve with a white sauce. In making the same instead of using milk use one-half milk and one-half mutton stock (the water in which the mutton was boiled). Into the sauce put two finely chopped hard cooked eggs.

Cabbage Salad.

Beat the yolks of three eggs and one-fourth of a cupful of sugar until light. Add two teaspoonfuls of flour, one teaspoonful of dry mustard, one teaspoonful of salt, one-fourth of a teaspoonful of pepper and one-half of a cupful of vinegar. Cook in a double boiler until thick and stir in one tablespoonful of butter. Cool and mix in lightly one cupful of thick, sour cream, either whipped or plain. Chop one small head of cabbage and one cupful of celery, add one teaspoonful of salt, mix with the dressing and chill.

Green Tomato Preserves.

Required, eight pounds of smooth green tomatoes, seven pounds of sugar, one ounce of ginger and mace, mixed, and the juice of four lemons. Pierce each of the tomatoes with a fork and put them in the preserving kettle with all the other ingredients. Heat slowly, then boil until the tomatoes are clear; then skim them out and boil the sirup until thick. Put the tomatoes into jars and pour in the hot sirup.

Creamed Potatoes.

Make a white sauce in the double boiler, using two tablespoonfuls of butter, two tablespoonfuls of flour, one-half teaspoonful of salt, pepper and one cupful of milk. Have cold boiled potatoes, sliced or diced; add to the sauce and serve when well heated through. Sprinkle with grated cheese or chopped parsley just before serving.

Ink Stains.

To remove ink stains from cloth or other absorbent substance dissolve four ounces of citric acid in two quarts of water that has been previously boiled and cooled. Then add six or eight ounces of a strong, strained solution of borax.

Bean Cakes.

Mold left over baked beans into cakes, first binding them together with beaten egg. Fry as you would fry potato cakes or fish cakes. Place on a dish and garnish with slices of pickle and sprigs of parsley.

spring resorts it is quite evident that we shall wear either linen or summer silk for morning. While there is much to be said for the fresh, crisp linens that bespeak coolness, if the truth must be confessed they are anything but cool, and the vote should go to the summer silk.

Now as to the method of fashioning the linen suits, they are to be the most military of all our clothes. Linen or mercerized cotton braids, frogs and buttons are to be employed in great quantities. The coats dip in the most approved fashion, are belted in the front and back or only at the sides and are black with white insets, all black, all white or white with black portions. Pockets have become necessary trimming, should one say? Well, they are certainly in evidence. As many as four are used on a Norfolk suit.

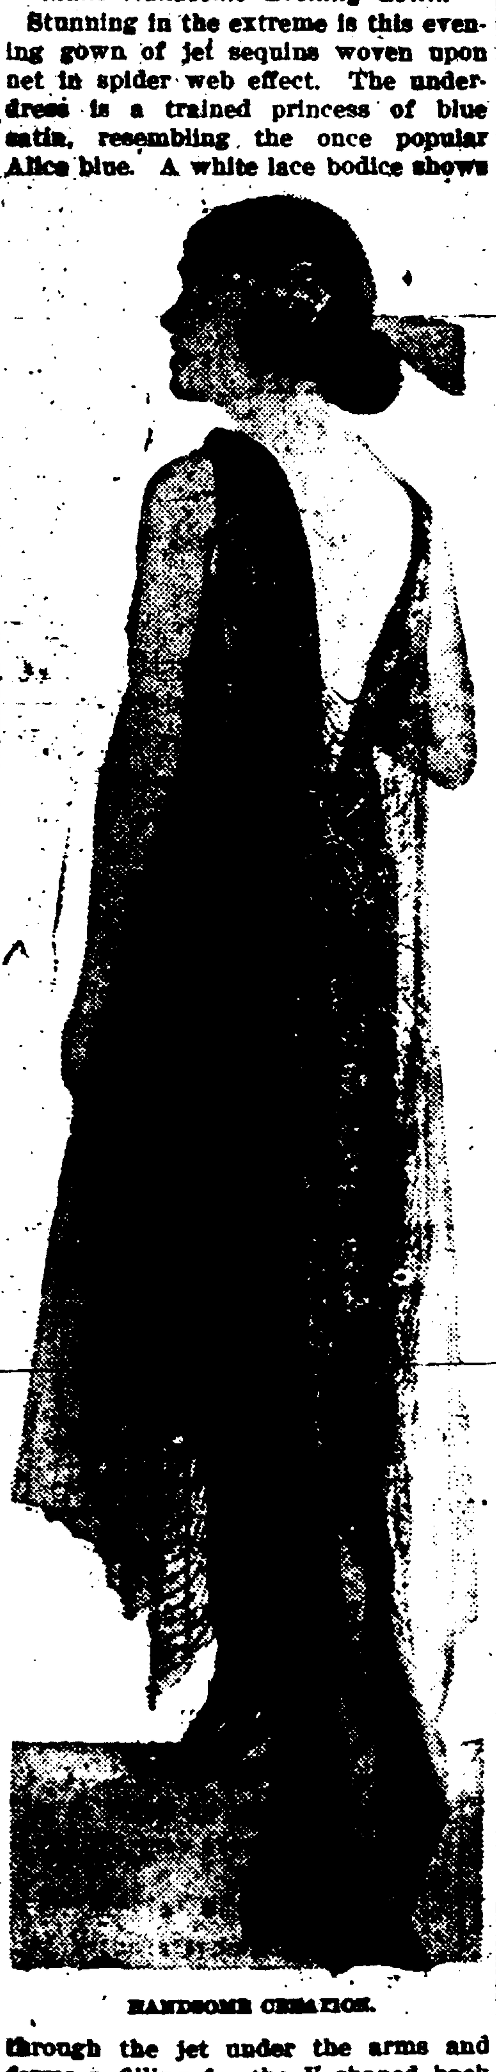
Speaking of the Norfolk suit, in linen it is to be mighty attractive, made of white or the natural color linen. Waists made on the lines of the Norfolk jacket are to be popular also. A tailored waist of this sort is certainly practical for wear with the plain tailored skirt. A trig little morning affair for the woman who needs to market, go to town or especially suitable for the business girl.

There are two effects to be obtained by the ever popular Norfolk—that with a yoke and that without. With the three plaits extending from the shoulder the line unbroken adds length to the stout figure, while the yoke is to be recommended for the very slender girl.

GORGEOUS FROCK.

Jet Sequins In Spider Web Effect Make Handsome Evening Gown.

Stunning in the extreme is this evening gown of jet sequins woven upon net in spider web effect. The underdress is a trained princess of blue satin, resembling the once popular Alice blue. A white lace bodice shows



HANDSOME CREATION.

through the jet under the arms and forms a filling for the V shaped back and front. The sleeves are chiefly conspicuous by their absence, which is the case in so many of the evening gowns in these days.

Apple Pie, German Style.

Grease an oblong tin well. Cover it with raised cake or cooky dough. Pare and cut four or five apples in slices. Lay them on the dough in parallel rows. Beat the yolk of an egg and three tablespoonfuls of cream together and drip around the apples. Bake for twenty or thirty minutes in a hot oven.

Fried Celery.

Clean well and cut out the stalks in good sized pieces. Put them in boiling water for a quarter of an hour. Dry on a napkin. Beat up an egg mixed with hot water or a soup stock. Season with salt and pepper. Roll in breadcrumbs and fry in a deep fat.

For the Children

Two Members of the Woodpecker Family.

Most children have seen and admired the woodpecker. Doubtless, too, they have heard him pecking away on trunk or limb of tree. What a lot of knocking he can do for such a small creature! There are five or six species of woodpeckers familiarly known in the eastern states. Above are shown pictures of two of them. The bird at the top is a hairy woodpecker, the other the downy woodpecker. They differ chiefly in size, their colors being practically the same. The males, like those of many other woodpeckers, are distinguished by a scarlet patch on the head. An examination of many stomachs of these two species shows that from two-thirds to three-fourths of the food consists of insects, chiefly noxious kinds. Wood boring beetles, both adults and larvae, are conspicuous, and with them are associated many caterpillars, mostly species that burrow into trees. Next in importance are the ants that live in decaying wood, all of which are sought by woodpeckers and eaten in great quantities. Many ants are particularly harmful to timber, for if they find a small spot of decay in the vacant burrow of a wood borer they enlarge the hole, and as their colony is always on the increase they continue to eat away the wood until the whole trunk is honeycombed. Moreover, they are not accessible to birds generally and could pursue their career of destruction unmolested were it not that the woodpeckers, with beaks and tongues especially fitted for such work, dig out and devour them. It is thus evident that woodpeckers are great conservators of forests.

A Boy Scout Is Thrifty.

The cashier of the savings bank is accustomed to see the boy scout at his window. He knows that when the khaki clad youth appears before him with a sum, no matter how small, he is living up to scout law No. 9—"a scout is thrifty."

A scout is thrifty. He does not wantonly destroy property. He works faithfully, wastes nothing and makes the best use of his opportunities. He saves his money so that he may pay his own way, be generous to those in need and helpful to worthy objects. He may work for pay, but must not receive tips for courtesies or good turns.

To become a second class scout a boy must earn and deposit at least $1 in a bank. To become a first class scout a boy must earn and deposit at least $2 in a bank.

Conundrums.

What herb is most injurious to a girl's beauty? Thyme.

Why are human eyes like persons remote from one another? Because, although they may correspond, they never meet.

Why is a schoolboy being whipped like your eye? Because he is a pupil under the lash.

Why are clouds like coachmen? Because they hold the rains (reins).

Why was the dumb waiter returned? Because it didn't answer.

Why is a fisherman's the most profitable business? It is all net profit.

Why It's Called Picnic.

The term "picnic" originated in the following manner: When what is now known as a picnic was being arranged for the custom originally was that those who intended to be present should supply the eatables and drinkables. A list of these necessities having been drawn up, it was passed round, and each person picked out the article of food or drink that he or she was willing to furnish, and the name of the article was "nicked," or ticked, off the list. The open air entertainment thus became known as "pick and nick." The custom is said to date from 1802.

The Rime of Porcus Prime.

There lived a pig
So fat and big
That hills he could not climb,
But used to lie
Inside his sty.
His name was Porcus Prime.

One summer day
He went away
Quite proudly in a van;
Poor Porcus, he
Had gone to tea
With Tom, the butcher's man!

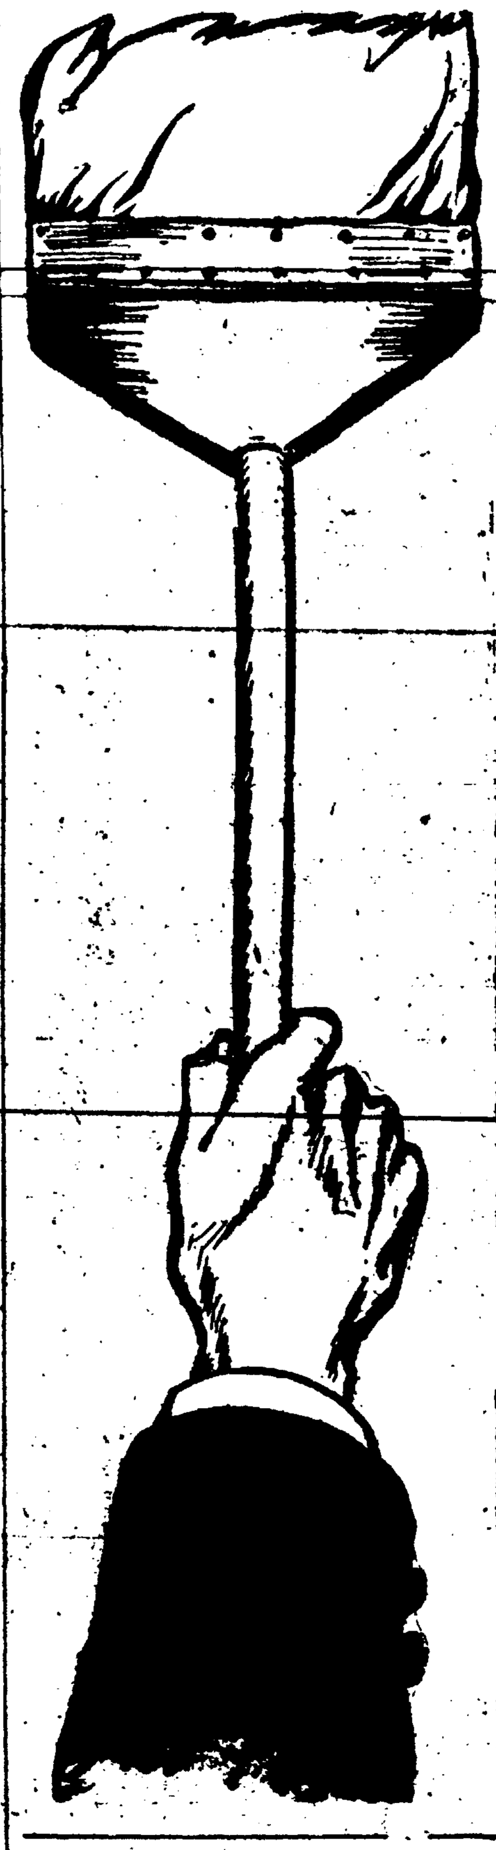
CLEAN UP
and
PAINT UP!



Origin of the Lone Star.

If a place name is often crystallized history, how much more a nickname! Witness the flowery synonym for Texas, which orators mouth as the Lone Star State. To most minds this symbolizes concretely the fact that the state was first an independent nation. Behind the fact is this story, vouched for by tradition more or less authentic. At the outset, after achieving independence, Texas lacked pretty well everything but men. The leaders knew state papers required a great seal to validate them, and in default of anything better they improvised one from a coat button which happened to bear a single star. A document so sealed fell under the eye of an imaginative journalist. He straightway exploited "The Lone Star Republic" in print so fervid as to persuade Texas here was the device most appposite for her seal and her flag.—New York Press.

Mother Brook.

After nearly three centuries of usefulness Mother brook, the first canal dug in this country, still finds itself utilized to some extent, though the requirements which brought it about have long since passed. Its construction was undertaken and completed by the hardy citizens of Dedham, Mass., in 1639, to provide water for mill purposes. The artificial waterway was constructed to connect the Charles river with East brook, covering a distance of about a mile. It was a great undertaking for those days, when every foot had to be excavated laboriously by hand, but the work was carried out with the usual determination marking the settlers of the day. The canal winds round the highlands of the town, and on both sides, extending almost to its border, may be seen well kept gardens.—Exchange.

Poetry of Words.

When I feel inclined to read poetry I take down my dictionary. The poetry of words is quite as beautiful as that of sentences. The author may arrange the gems effectively, but their shape and luster have been given by the attrition of ages. Bring me the finest simile from the whole range of imaginative writing and I will show you a single work which conveys a more profound, a more accurate and a more eloquent analogy.—Holmes.

They Knew Castor Oil.

The oldest medical book in the world was found in a rock tomb by the Nile, dating from about 2000 B. C. It is a roll about sixty-six feet long and carries prescriptions for all sorts of ailments. Castor oil is one of the remedies prescribed. It has been used pretty steadily ever since.

ROWANS READY FOR LEAGUE

The Oswego Team Must Get Grounds at Fort Ontario, However

Captain McCullum of the Independents learned last night that the Rowans of Oswego are willing to enter the Oswego-Onondaga county league, the organization of which was proposed by the sporting department of The Times some time ago. The decision of the Oswego team rests upon the result of negotiations now under way with the authorities at Fort Ontario, where the team plays its games. If the Fort authorities see fit to allow the team, the use of the diamond on the scheduled league dates the Rowans will formally accept theh invitation extended to them to enter the league.

As no opposition is anticipated in this matter, the league is now practically assured and a meeting will be called in this city next week, at which time the final arrangements will be made and the league will be started. The Fulton, Baldwinsville and Phoenix teams have already expressed their willingness to enter the league and the formation of the circuit has been resting upon the decision of the Rowans. With the entry of that team practically assured, baseball fans in this vicinity can count upon the first league game by the second week in June at the latest.

A schedule will be submitted at the first meeting of the organization and the usual election of officers will take place. Plans for the opening day, the engagement of umpires, the question of an admission fee, (which will be possible set for all teams except the Rowans who will be obliged to take up a collection at the Fort) will also be settled.

DINING ROOM FURNITURE

TABLES, CHAIRS, BUFFETS, SIDEBOARDS and CHINA CABINETS

No room expresses the good taste of the home-makers more directly or clearly than the Dining Room. Most people try to buy furniture for the dining room with an eye to durability and thought of harmony. Our experience in satisfying hundreds of customers has led us to reject that which is ordinarily considered good enough by many dealers.

We have an Elegant Assortment of Dining Room Suits Complete, Tables, Chairs, Buffets, China Cabinets, Etc., in Fumed Oak and in Golden Oak, both in the Dull and Polished Finish.

All we ask is a careful inspection of our stock. The *quality* and *prices* will certainly appeal to you.

HIGH SCHOOL TEAM AT SKANEATELES

The Fulton High school baseball squad, accompanied by about twenty loyal rooters left this city at 12.30 today for Skaneateles where the locals will take on the high school team of that place this afternoon. The trip will be made by automobile and six cars, well filled, composed the Fulton delegation.

After the game the team will go to Auburn where supper will be enjoyed and where several of teh team have pressing engagements this evening. The reutrn trip will start about — o'clock. Barnes will start the game today with O'Brien in reserve. O'Brien is being saved for the hard game tomorrow with Morrisville.

Current Sporting Comment

By E. J. LaPorte

The Fulton High school baseball team, just about now, is reclining luxuriantly upon the cushions of divers automobiles bound for Skaneateles. The team expects to reach that municipality some time before nightfall. The car that bears the gallant captain will no doubt break the tape first, if it doesn't "Stahl." The song they sing as they roll along should sound like this:

"Open the muffler wide;
Heed not the constable's spiel,
For we're Skeneateles bound,
With "Doc" Post* at the wheel."
But it doesn't.

*Omit flowers.

* * *

Morrisville will be on hand tomorrow with large gobs of confidence and it is up to the local boys to trim the visitors neatly. When Fulton lost to the Morrisville team at Morrisville some two weeks, the boys had an alibi—O'Brien's arm. Which may all be true. Then they alibied out of Wednesday's defeat with the words "Pullen's dome." Tomorrow it'll probably be "Wilcox's socks."

* * *

The Fulton outfield, taking it by and large, is the most capable department on the team. Pullen, O'Brien and Thompson staved off many a tally Wednesday by some great work in the outfield. The Oswego batters had no heart at all and the outfielders were very groggy after the sixth session.

* * *

In the excitement aroused by the advent of the new police motorcycle, the police force has almost lost sight of the fact that there is to be a ball game sometime, somewhere, between the bluecoats and the fire laddies. It is rumored, however, that several members of the force are practicing surepetitiously at home.

* * *

Fulton, Oswego, Baldwinsville and Phoenixin the "Double-O"—not the "Once-Over", but the Oswego-Onondaga County League, that is the latest morsel for the palate of the live baseball fan. That the league will be formed is almost as eertain now as rain Memorial Day.

The French are said to have canceled several large American contracts because the goods delivered were not up to the samples. The history of "war contracts" does not change much from generation to generation.

GUN CLUB MEMBERS WILL SHOOT IN SYRACUSE

Members of the Fulton Game and Gun Club to the number of twenty are making arrangements to attend the annual shoot of the Hunter's Club of Syracuse which will be held in Syracuse on Monday, July 5. The event is a banner one in the trapshooting world and marksmen from all over the state compete for prizes.

At a meeting held at the Onondaga, the Hunters' club made the final arrangements for the shoot and the committees in charge were appointed. The events will probably include a merchandise shoot, a walk-back shoot and ten fifteen-bird strings. There will be special events for professional marksmen and events open to amateurs only, and the prizes for all events will be costly and numerous. The Hunts' club holds the shoot each year, and in the past many Fultonians have participated.

The local club will hold its first shoot of the 1915 season some time early in June and the committee in charge is now planning the event. Many applications for membership have been received and any marksman in this section who wishes to join can obtain full information by communicating with B. J. O'Grady, of the Hotel Fulton.

INDEPENDENTS WILL NOT PLAY TOMORROW

The Fulton Independents were to have played the Phoenix team at Phoenix tomorrow afternoon, but as the weather of the past week has been rather cool and not a little uncertain, Captain McCulllum called the game oc yesterday. The game will be played a week from Saturday in all probability. The Independents, however, will not be idle tomorrow afternoon as Captain McCullum has called a practice of the team at the Athletic Park at 2 o'clock, before the Fulton-Morrisville high school game. All candidates for the team are expectel to appear in uniform, and an hour's hard practice will be indulged in.

If the Oswego-Onondaga county is formed in time, Captain McCullum hopes to arrange a game in this city for Memorial Day, but as prospects for the opening of the league on that date are slim, the locals may arrange a game with some other team.

FABER OF WHIT SOX BEATS MATHEWSON'S RECORD

Chicago, May 20.—A world's pitching record is claimed for Urban Faber of the Chicago Americans, as a result of his performance in defeating the Washington club, 4 to 1, here last Wednesday. According to baseball experts, Faber pitched only 67 balls during the nine innings, five less than the record established by Christy Mathewson of the New York Nationals several years ago. Frank Saffell, who operates an electric score board in Washington, D. C., telegraphed that the board recorded all strikes and balls and that his record, shawing that Faber pitched 50 strikes and 17 balls, was Carrect. In the record Saffell counted as strikes any ball that was hit by the batter.

In the third and fifth innings, Faber retired six men on six pitched balls, each batter hitting the first ball for an out.

WILL NOT CAMPAIGN THOROUGHBREDS NOW

Louisville, May 21.—Because of the hostile feeling in Canada against Germans, due to the European war, John W. Schorr, of Memphis, has decided not to campaign his string of thoroughbreds on the Canadian tracks this summer.

Schoor won $30,000 in stakes and purses in Canada last year, his David Craig capturing the rich Doval Derby.

The Schorr stable includes, among others, David Craig, Luke McLuke and Leochraes, three of the best horses in training.

FULTON TO PLAY MORRISVILLE HERE

The Fulton High school baseball team will meet the Morrisville team tomorrow afternoon at Athletic Park at 3 o'clock. O'Brien will twirl for Fulton and Krausse will play first base in the absence of Cazrey, who is in Philadelphia.

The Morrisville team has a close victory over the locals to their credit, having won the first game played at Morrisville some time ago by the score of 7-6, but the locals hope to even matters tomorrow.

The ghost of the Karlsruhe bids fair to haunt the Seven Seas as long as the Flying Dutchman.

Trinity Corporation can hardly enter a convincing plea of poverty, even though it has less than $12,000,000 above its debts.

The case of Italy is a bright and shining illustration of the truth of the adage that if a state hunts trouble long enough and earnestly enough trouble will eventually be located.

PEDRO SPOILED GREAT FUN; HE "FIX HIM!"

LORD KITCHENER MADE VICTIM OF SYNDICATE OF GREAT NEWSPAPERS

London, May 22.—The attack which is now being made upon Lord Kitchener is the outgrowth of a feud [illegible] the corporation known as the Associated Newspapers, Limited, and the head of the War Department. The corporation owns the London Times, the Daily Mail and the Evening News, and since the outbreak of the war it has been trying to compel Lord Kitchener to give to its correspodents carte blanche to inspect operations at the front, have access to all the secrets at Army Headquarters and publish everything they saw and thought, without any reference to the [illegible]sorship.

How unsafe it would have been for Lord Kitchener to entrust these correspodents with any secrets was shown during the retreat of the French and British forces from the Belgian frontier on Paris. One of these stray correspondents got loose at a critical time when news from the retreat was lacking. He was an excitable fellow, without poise or judgment, who had met a few equally excitable stragglers, and he got a dispatch through to London which, when published, caused the utmost consternation. It depicted the English army as hopelessly broken and in full flight, with Paris at the mercy of the pursuing Germans.

The Times afterward threw the blame on the Press Bureau, but the publication of this false news nearly wrecked the newspaper. It showed how unsafe it would be to allow such inexperienced men to go with the army. As a matter of fact, at the very time London was thrown into a panic by this lying report the English army had made good its retreat in one of the most notable exploits ever witnessed on the [illegible] the British arms with [illegible]. The command of Field Marshal Sir John French had rested and refitted and instead of being broken and in flight was ready to meet the foe, which it did the next day.

From that time until the present the War Office and Lord Kitchener have been steadily importuned to allow the reporter on the fighting line. One argument was that unless the newspapers could publish sensational news Lord Kitchener could never raise his army. Tiring of this, they declared that he could not raise two million men without conscription. As a matter of fact, he has raised them without subjecting the army to the danger of prematurely disclosed secrets and also without conscription. These newspapers, controlled by the corporation named, have on several occasions nearly caused the greatest loss to the British army by publishing plans ahead of time, but not for a day have they let up in their attack on the Secretary of War.

The grievance of these men against Lord Kitchener is known to every newspaper correspondent who has been abroad, and boast after boast has been made that Lord Kitchener would be put out.

So great is the debt that England owes to "K. of K." that it is to be much doubted whether private grievance, even backed by sensational newspapers, will succeed in displacing him. But the remarkable part is that such a campaign of animosity could attract the attention of the United Kingdom and lead sober men to think of "swapping horses while crossing a stream."

GERMANS USE 4000 GUNS TO CRUSH RUSSIANS

London, May 22.—General von Mockensen, on the San river, in Galicia, has adopted Sir John French's plan of literally blowing the opposing positions to pieces with big guns before sending his infantry to the assault. The British commander in chief introduced his plan at Neuve Chapelle when he concentrated three hundred pieces of artillery on a three mile front and obliterated the German intrenchments. General von Mackensen placed four thousand guns on a twnty mile line on the San and threw two million shells into the Russian ranks in four days to clear the east bank and make a way for his army to obtain a firm footing forits further investment of the Permysl fortress.

Ordinarily, say the military euthorities, the theory of battle

(Continued on Eighth Page)

Roosevelt-Barnes Jury Reaches Agreement; Burns Won Over

Special to The Evening Times

The curtain was rung down [illegible]ly after after 10 o'clock this forenoon, when Burns, the [illegible], came over to the side of the eleven jurymen who [illegible]day in favor of a Roosevelt verdict. When the jurymen [illegible] into the room at the opening of court Judge Andrews at once called upon the foreman for the result of their deliberations of the all-night session.

The only sensation was the objection raised when William J. Wolff objected to the reception of the verdict because the jury had been polled yesterday, but he was overruled.

Woman Asks Support and Mother Demurs

Lengthy testimony was given in the City Court this morning in the case of Commissioner of Charities Woodbury against Ellen Gardner. Judge Coville presided. The case involves a great deal of domestic financial difficulties, largely those of Edward Whorl and his wife, Letitia Whorl.

Edward Whorl, whose home is in York, Pa., married a daughter of Mrs. Gardner, and City Attorney Fanning's contention is that neither the daughter or Mr. Whorl are able to sustain themselves. It is a question whether or not the m[illegible]er must sustain the daughter in the [illegible] married, [illegible] Gardner's attorney, Robert Pendergast, stated before the trial began this morning that Mrs. Gardner is willing to assume the maitainance of the daughter provided shed oes not have to maintain the whole family. The city has been furnishing funds to the family through the Commission of Charities ad suit was begun to compel Mrs. Gardner to provide for the maintenance of the daughter by paying the city a sum equivalent to the amount being paid the Whorl family weekly. City Attorney Fanning announced that the city would not consent, however, to placing Mrs. Whorl in the county home but would insist that the sum be paid her wherever and whenever she might be in need of help.

Mr. Pendergast said that he would not consent to a settlement on those terms and the trial began with the testimony of Edward Whorl, called by Mr. Fanning. Whorl stated that he has lived in thisi city for three years and during most of that time has worked intermittently, as chauffeur, drillman and general gardener. He admitted that he had paid no rent during that time, and that his house and furniture had been furnished by the defendant. He told the court that he was still suffering from the effects of an accident that occurred six years ago, and that pains in his head prevented him from engaging in any steady labor. During the period from January 1 to the present date, he has earned about twelve dollars. He furnished the court with the names of people who had given him work and also people who had helped him and his family.

During the examination by Mr. Pendergast, Whorl admitted that the presence of a step-daughter, the child of Mrs. Whorl by her first husband, was distasteful to him. He refused to admit saying that he would support his wife but not the step-daughter. Mr. Pendergast laid great stress on this point and told the court that the presence of the child in the home was, in his opinion, the reason for Whorl's idleness.

In direct examination, Whorl stated that Mrs. Gardner had offered him $50 to leave town before the case came to trial, and had also offered to pay him $5 weekly for ten weeks. He would not admit that this money was offered for the purpose of getting him to vacate Mrs. Gardner's house which he was occupying.

The list of positions which Whorl has occupied during the past three months was a long one. When asked if he had worked for a certain prominent lawyer in te city, he answered in the affirmative, but stated that he had not been paid for his labor. He further stated that he had not yet made out his bill, but that it amounted to about fifty cents. When asked what his wife was doing when he met her in New York, he said "Living there."

Judge Coville adjourned the case at 1 o'clock and the trial was resumed an hiur later. Before the adjournment it was decided to have Drs. Fox and Terpening, who attended Whorl and his wife when they were sick, give their testimony this afternoon at 4 o'clock.

MORE THAN 150 LOADS OF RUBBISH TAKEN TO GREAT BIG HEAP

Yesterday Sunny Italy had her inning in this city. Pedro, one of her lusty sons, lit the match yesterday afternoon at 4 o'clock that set off the Community Bonfire. Dr. Anderson participated with Pedro in the event, and as a result the merry ha-ha went the rounds of the city last night.

Dr. Anderson, who was in charge of the preparation of the heap of material which was to make the Community Bonfire round which the children were invited to dance chose Pedro to assist him. The heap grew big and had all the ear-marks of being a good foundation for a Community Bonfire. Pedro's eyes twinkled approval, "Doc" Anderson smiled down from his height upon it. Satisfaction was extremely manifest.

However, as an extra assurance that the start off of the blaze would be prompt "Doc" said with gestures plenty, "Ho, good Pedro, dig into the heap and place these two bags of excelsior there—as a starter, you know, Pedro."

Pedro said, "Me fixa da fire," and bent to the task.

In the meantime "Doc" hauled on an extra board, and when he lifted his eyes behold, his astounded gaze found, Pedro, triumphant and the flames rising above the heap.

No words could describe "Doc's" feelings. His facial expression is to be imagined. Suffice it to say—the Community Bonfire was a success—and was well attended by both Pedro and Dr. Anderson.

Kind Mother Nature sent the rainstorm that the Committee might not be embarrassed at the evening's [illegible]

Hats off to Pedro and his little torch!

Chamber of Commerce Makes Public the Following:

Fulton's first clean-up campaign promoted by the Division of Public Safety of the Chamber of Commerce came to a glorious end last night. Upwards of 150 loads of rubbish and inflammable material were removed yesterday from the city streets where it had been placed by the householders.

Owing to a misunderstanding on the part of one of the laborers stationed at the bonfire, the huge pile was touched off shortly before 5.30. The pile of barrels, boxes and brush was between 15 and 20 feet across and nearly ten feet high. As subsequent events proved, the accidential firing of the pile at this time was the best thing that could have happened. Had the pile remained as it was during the thunderstorm which swept over the city between six and eight o'clock it would have been impossible to dry it out and light it for at least a week. It would probably have been necessary to pull the whole pile apart and spread it out to dry. As it happened the fire got a good start before the storm broke and managed to burn all the accumulated rubbish before it finally died out.

The members of the Division realize what a disappointment the school children feel in not having their bonfire, due to the bad weather and the accident. They are already discussing among themselves the possibility of providing some other celebration for the children. As yet, however, nothing definite has been hit upon.

The thanks of the city are due to the citizens whose generosity made possible the hauling of the rubbish yesterday.

However keen the regret may be that the celebration last night faild to materialize, it must be remembered that the city has disposed of between 150 and 200 loads of rubbish and inflammable material, that were a danger to health and to life and property. Fulton is today a cleaner and a safer city.

CHAMBER OF COMMERCE.

ODD FELLOWS MAY PARADE IN AUGUST

The Grand Lodge session of the I. O. O. F. will be held this year in Syracuse on August 18, and in this connection all Odd Fellow lodges in the first district of this county anticipate taking part in the monster parade on that date. Members of the order will not parade as individual lodges, but as units comprising the district.

Neatahwanta lodge members of this city were in Oswego Thursday evening to discuss with Oswegatchie lodge the steps necessary for bringing about a full representation of the order at the Grand Lodge session. It is proposed to hold the parade in the evening.

WEATHER FORECAST

Partly cloudy and cooler tomorrow. Sunday fair, with moderate west winds [illegible].

TIMELY TOPICS.

Our Big Heart.

"The Almighty heart is still stronger than the almighty dollar." No spellbinder made the statement. No politician made it as an appeal for votes. A foreigner said it the other day in a foreign country, in praising the stand this country has taken on the European war. Here and there across the water we still have a friend.—Detroit News.

Knows All About It.

A woman writer, unmarried, tells in a Chicago paper that she will "lay bare relentlessly the weaknesses which make for unhappiness in married life." Yep, it takes an unmarried person to "lay bare relentlessly the weakness that make for unhappiness in married life."—Philadelphia Inquirer.

Dope Fiends.

Those early impressions that the drug users had quit appear to have been too early. It is now feared that the worst is not yet known. Many cities report an astounding increase in the number of cases found by the police and hospitals. The evil was attacked none too soon.—Pittsburgh Dispatch.

The Unpopular Weather Man.

The government weather bureau, which has trouble enough making correct forecasts for one day, is taking a fearful risk when it issues weekly predictions for the benefit of farmers and shippers. But it might as well be hanged for a sheep as a lamb.—New York Sun.

The Bystander's Lot.

So long as Uncle Sam must be an innocent bystander he should felicitate himself that he can do his bystanding 3,000 miles away from the scene of trouble instead of next door to it. The neighbors to a first class row may be hit by flying brickbats.—Pittsburgh Dispatch.

Poetic License.

One interesting instance of poetic license is the way William Watson speaks of a man going out to meet the enemy with a whetted glaive, whereas really he lies on his stomach in one of the trenches and shivers in his wet khaki pants.—Ohio State Journal.

Different Seats.

The difference between stock exchanges and traction lines is striking. In the one you have to have a seat before you can hand over your cash. In the other—well, it's on the contrary quite the reverse.—Cincinnati Commercial-Tribune.

Laconic.

Kitchener of Khartum knew just what to do when he heard that a distinguished and recently married officer was being visited by his wife at his headquarters in the field. "One of you must come home," he wired.—Boston Globe.

A Long Felt Want.

Edison is said to have perfected an invention for keeping the air in submarines pure. We wish he would do as much for offices, hotels, city halls, prisons and other airtight compartments above water level.—New York Sun.

Toys and Titles.

The recent meeting of the American toy manufacturers in Chicago calls attention to the fact that we can manufacture every sort of toy in America that is made in Europe—except titles of nobility.—Chicago Herald.

Swat the Flies.

Swat the flies before they are born. You can do that by swatting the filthy places where the flies are hatched and brought into existence by the hundred thousand to torment humanity.—Pittsburgh Dispatch.

Passing of the Crown.

The emperor of Japan is to be crowned next November. The ceremony ought to be interesting, as the signs of the times are that it is going to become rarer and rarer.—Baltimore American.

Never Pays to Argue With 'Em.

If a woman wants to paint her face it's none of the state's business, declares a Cincinnati woman. And the state will probably drop the subject right there.—Knoxville Sentinel.

VALUE HOME ENTERPRISE

A tempest has been stirred up in the newspaper teapot of Fulton on account of the big Syracuse evening newspapers having suddenly and without notice discovered that the people of the city dared to want something that they themselves did not and could not supply, a home daily newspaper with a heart in it.

Ever since the inception of The Evening Times the doctrine of trading at home has been this newspaper's watchword. Frequently The Evening Times has mentioned the value of advertising in the home newspaper, and for more than one reason. In the first place, The Times has all along contended that in its circulation, in conjunction with two weekly newspapers, the buying public is reached more effectively, and at a lower cost to the advertiser than it is possible to accomplish through the medium of the big city daily whose high advertising rates are based upon a circulation extending throughout Central New York.

However, this tempest in a teapot has its amusing features, too, one of which is the stand taken by the Syracuse Herald and explained in a large advertisement in a recent issue of that paper. This advertisement was written by that sage of advertising men, William C. Freeman, who causes the Herald to tell its readers of "The Value of Advertising in the Home Newspaper."

For the benefit of those readers of The Evening Times who did not read Mr. Freeman's advertisement as well as for the benefit of those misguided young men who persistently hand the kibosh to their own home city by directing fusilades at a home institution—the people's newspaper—your newspaper, the great advertising man's admirable essay is herewith reproduced:

"Any newspaper in any community wields a greater power than any combinations of individuals in the community.

"Why?

"Because the printed word is read and leaves an indelible impression on the mind. Only a small proportion of the spoken words we hear leaves any impression whatever.

"If you do not believe that the printed word is a wonderful force, let me ask you these questions:

"Why are city officials, for instance, anxious to have the newspapers print their opinions?

"Why are organizations of business men always glad to have the newspapers give them publicity?

"Why are social organizations very particular to furnish the newspapers with their programmes?

"Why do individuals want news printed about themselves.

"I might go on and ask a hundred other questions. The answer to them all is—

"THE PRINTED WORD IN A NEWSPAPER IS THE MOST VALUABLE MESSENGER OF TIDINGS, GOOD OR BAD, IN ANY COMMUNITY.

"The business man who says, "I don't see much in advertising," is usually the first man to try to get in the limelight through personal publicity in his home newspaper.

"He recognizes the value of publicity to him personally if it be favorable, and he also recognizes its power to make him very unhappy and uncomfortable if it be unfavorable.

"There is always a great scramble among the people in every community to get their names in the newspaper, or else to keep their names out of it.

"The desire one way or the other is always uppermost because there is recognition of its power to make known everything that happens.

"Nobody can dispute its power. Every business in every community should make itself known to everybody in the community by using the advertising columns of the home newspaper.

"The advertising columns are news columns, too. The news of business is as important to a community as the news about its people, its city government, and the affairs of the state, the nation and the world.

" 'If the news of business is so important, then why not print it free?' some merchants may ask.

"The answer is that a newspaper has to be a commercial institution as well as an institution to serve the public. It must depend for existence mainly on the revenue from its advertising columns—just as any business must depend on sales to exist.

"Custom has decreed that a newspaper's mission in a community is to furnish its readers with information and entertainment, and to give merchants an opportunity to address themselves to the readers setting forth their claims to their patronage.

"Nobody has ever yet discovered a more direct or more effective or less expensive way ofm aking a business known to a community than by employing intelligent advertising in the home newspaper.

" 'Who is John Jones, Merchant?' some stranger in town asks of some resident of the town, and invariably the answer is, 'I don't know, unless John Jones advertises regularly in his home newspaper; then every schoolboy and girl, every man and woman, every policeman knows him, and can direct the stranger how to find him.

"The habit of many merchants in locating somewhere in a community, opening doors to do business, and then expecting trade to come to them without advertising, is mainly responsible for many of them closing their doors, or else doing such an indifferent business hat they ever become important factors in their home town.

"Merchants who advertise in the newspapers are the live wires in any community."

Opinions

New York and the Canal

One of the unlooked for effects of the construction of the Panama canal is that it is increasing the importance of New York city as a shipping point. Statistics for eight months of the commercial use of the canal show that 90 per cent of the value of the freight traffic from Atlantic and Gulf ports to Pacific coast ports has been shhipped from New York. Two-thirds of the vessels sailing for Western ports through the canal cleared from New York. Its accessibility as a railroad center is said to be one reason for its ascendancy over other ports. While most of the merchandise destined for shipment through the canal originates within 300 miles of the city, freight has been shipped there from points as far west as Iowa and then sent by water to San Francisco. Charleston, New Orleans, St. Louis and other cities had high hopes of receiving material benefit from the construction of the canal, but the statistics presented above indicate that shippers have a decided preference for the big city at the mouth of the Hudson.—Rochester Democrat.

Our State Census

One of our newspapers has been demanding why the Empire State should take a decennial census half way between the national enumerations. It is expected to cost $500,000 and to provide patronage for the party in power.

Many States have this State enumeration; and in none is there more apparent reason for than in New York It has been in many cases the occasion for scandals. Its statistics have no bearing on even the larger political apportionments, for the Nation requires that national apportionments be based on the national census.

The national work is in charge of a permanent, well organized, scientific establishment which, though its work may at times be imperfect, nevertheless is vastly better than the bureaus the States can get together.

There is no very apparent need for a State census. The Gevornment does the work once in ten years, and there is a positive reason for doing away with misleading statistics which are frequently foisted on the public by reason of using figures for different enumerations and then trying to compare them. To abolish all the State censuses would save several millions of dollars and it would be positively advantageous in that it would insure more trustworthy statistical service in many directions.—New York rPess.

Back-Stamping Letters

Former Congressman Murdock of Kansas is the editor of the Wichita Eagle and he is pretty well acquainted with postoffice business. In his newspaper he demands the restoration of the back-stamp on the envelopes which marks the time of delivery. Says The Eagle:

"The postoffice department should put back the back-stamp the time of receipt of a letter. The department sneaked out of the custom with the plea that back-stamping caused delay. That is balderdash. The trouble was that back-stamping let the public keep tab on the efficiency of the postal service, and led to a flood of complaint and protest, which was irritating certainly, but beneficial to the public and the service. The receiver of a delayed letter without a back-stamp cannot tell whether the delay occurred in the office of deposit, on the train, in the local office or in delivery. He is in the dark. But the receiver of a delayed letter can check up the local service at a glance, if the letter is stamped in the office at the hour of receipt. The country is demanding a return to the former practice. The postoffice department is resisting the demand. The country is right about it, and ought to have its way. And if it howls long enough and loud enough it will have."

The back-stamping being done by a mechanical contrivance at great speed occasions little delay. It is more important in some cases to have the receiving time stamped than the sending time.—Watertown Standard.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

My car used to make about eighteen miles per gallon of gasoline. This year it is not making over eight. It misses until speed gets up to ten or twelve miles per hour. When the engine becomes heated the spark lever works very badly. What is the cause of this?

Since your car misses only at speeds below twelve miles per hour and then only when warmed up, it seems likely that the heat causes a slight leakage either by warping a valve or by expanding a valve stem. Test the compression when the motor is warm, and if any cylinder is weak see whether it is not due to lack of clearance between valves and push rods or to a warped valve. These defects would cause enough leakage to make the motor miss fire when the throttle is nearly closed, but yet not enough to make it miss at wider throttle openings.

Faulty carburetion may also be the cause of the misfiring. Reduce the richness of the mixture when running slowly and see if this makes any difference. It is possible that the reduction in charge weight caused by the heating of the air is sufficient to decrease the ratio of air to gasoline enough to prevent combustion, although when the motor is cold enough air is taken in so that the motor will run all right.

Another possibility is that there is a leak in the intake manifold due to its warping out of shape when heated. Tighten up bolts holding the manifold and if necessary put in new gaskets. See that the brakes are not dragging and that the spark advance has not slipped so that you are running with it retarded.

Why are so many manufacturers doing away with radius rods?

The principal reason for discarding the radius rods is simplicity. It is obvious that when the drive is taken directly by the springs the manufacturer has saved on the cost of production and also reduced the number of wearing parts. Many manufacturers believe that the drive can be just as successfully transmitted through the springs as through radius rods, but as both constructions are widely used it is difficult to say which is better.

Is it easier to pump up a tire with the wheel jacked up when the weight of the car is resting on the wheel?

Theoretically it is slightly easier to pump up a tire when the weight is removed, but the difference is so small that it is doubtful whether any ordinary gauge would measure it. The extra work required represents the amount of work to lift the weight on that wheel through the distance that the inflated tire lifts the rim off the ground, this distance being approximately three inches. But this is divided up among so many pump strokes that the extra work is not felt, and it is probably just as economical of energy to do it this way as to jack the wheel up.

What are the specific advantages of six cylinder over four cylinder motors?

The advantage of greatest importance is that the six has a more even torque, or turning effort, than the four, because there are three explosions to each revolution against two per revolution in the four. The average six will throttle lower than a four of the same size.

Kindly inform me how to determine when the front wheels are out of alignment, and how can I straighten them?

The alignment of the front wheels can easily be determined by measurement. With the wheels pointing approximately straight, measure the distance between the two wheels, at the front and rear. They should be one-quarter inch nearer at the front, but not any more. The adjustment is made by shortening or lengthening the tie rod.

Please tell me how to place old shoes over new, and is it a practical thing to do?

To use the old tires do not cut the bead off. You have to take the casing off the wheel and force it into the old casing and then apply both to the wheel at once. Many claim this gives a practically puncture proof tire and one that lasts longer than the single shoe. It is desirable to have good inner tubes on account of its being too much trouble in changing in case an old tube gives way. So far as heat and sand are concerned, many claim they do not seem to amount to anything, though others declare they render the idea impractical. The old casing is supposed to fit so tightly over the good one that there is no slippage, and it protects the good tire from road heat. Some drivers, however, cut slits in old casings around the whole tread from bead to bead. They say it makes them easier to apply as well as to allow ventilation. These slits are cut about every four inches and about one-half inch of the material taken out. Authorities disagree on the practicability of the scheme of using old shoes in this way, but individual cases seem to have been satisfactory or the reverse according to the conditions and the intelligence used in applying the old shoes.

Please tell me how to prevent water leaking out of the grease cups at either side of the water pump?

You are using too light a grease in these grease cups, with the result that when the motor gets warm the grease becomes very fluid and allows the water to leak. In hot weather you should use a heavy grease. Probably the hardest that you can buy will be the most satisfactory. However, as soon as cold weather sets in substitute a lighter grease.

On my car a universal joint is used between engine and transmission, this universal consisting of a cross floating in the yokes of clutch and shaft. The assembly, unless kept carefully adjusted, is noisy and does not retain oil for any length of time. Could I substitute a leather universal?

The joint between the engine and gear box is designed to take up any misalignment between the clutch and the gear shift, but it often happens that the gear box drops, throwing the shaft out of alignment to such an extent that the drive becomes noisy, and this is probably the cause of your trouble.

It is doubtful if the fitting of a leather universal would be wise, because, although it would silence the drive, it would take care of the misalignment, the noise which shows that there is a faulty alignment would be gone, and there would be no warning to enable you to know when to correct this. It occasionally happens that a sudden jolt will cause a drop in the level of the gear box due to a looseness in the bolts which hold it in position. This can be remedied by restoring the gear box to its proper alignment.

It is also very probable that the rear axle gears are badly out of adjustment and that the vibration produced as a result of this is transmitted to the joint between the engine and gear box and given off at that point. You should not only have the engine and gear set aligned, but also have the rear axle inspected and the gears readjusted, should it be necessary.

I change the oil in my crank case about every 500 or 600 miles. Would the oil I take out be all right to use in the transmission or would it wear the gears?

It is a good idea to use the oil from the crank case in the gear box. After use for considerable time in the motor the oil takes on a gummy consistency, which renders it unfit for good motor lubrication, but good for use in lubricating the gears in the gear box on account of its tendency to adhere to the gear teeth. It is better to strain it for use in the gear box.

My motor heats too much and the thermo-siphon system does not do its work properly or the heating is caused by another source. I believe my carburetor is adjusted properly, there is no slipping fan belt or loss of compression, but still the engine overheats. As the car has not been run over 3,000 miles the carbon cannot be the cause. Can you explain this?

It is most likely that your trouble is due to driving with the spark retarded too far, although it is impossible to say with certainty that this is so. Try driving your car with the spark advanced as far as possible at all times without the motor knocking.

There are many other things that might cause your motor to overheat, however—carbonized cylinders, poor water circulation, incorrect timing of motor, dragging brakes or possibly excessive friction. Just as you state, it is not likely that the trouble is caused by carbon, but in looking for the cause it is not wise to neglect this possibility, for the reason that motor troubles are often caused by the most unexpected circumstances. Note whether the water is circulating freely, and if not try to find where the trouble is, whether it is due to dirt, loose pieces of rubber obstructing the passages or what not. Remember that with a thermo-siphon system the water will not circulate at all as soon as the level drops below the discharge header in the top of the radiator. Circulation of water in the thermo-siphon system is dependent on the fact that the column of water, considered as such for simplicity, in the pipes and water jackets is lighter than the column in the radiator because it is warmer, and water expands and grows lighter as it is warmed. Therefore if the level of water drops below the outlet pipe circulation must stop. It is well to note whether you have not been running with the water below this point. Or it is possible that you have a slow leak and that in the course of an afternoon enough water leaks out to lower the level enough to stop the circulation, as described.

If there is dirt in the radiator flush it out thoroughly, and if there is any grease in the water wash it with a hot solution of sodium carbonate in water, one handful of carbonate to a pail of water. See that the rubber hose connections are in good condition.

As a last resort check up the valve timing by the marks on the flywheel and if there are no marks you had better write to the maker for information on this point.

TO WILSON'S NOTE

France and England Commend It as Firm and Dignified.

WORTHY OF GREAT NATION.

Following Riots All Over Britain, British Government Decides to Intern or Deport All Germans and Austrians, and King George Strikes High Fees From Ancient Order of Garter.

President Wilson's note to Berlin demanding that Germany cease the killing of American citizens by torpedoing merchant ships without warning created a profound impression in England and France. In both countries the message of protest was regarded as firm, dignified and statesmanlike.

In London the general tone of comment was that President Wilson had added another to the list of great historical messages and had shown great strength in his entire absence of the use of any hard expression such as would make a proper reply from Germany impossible.

In Paris all comment was favorable to the firmness of the note, coupled with its dignity and propriety of tone. President Wilson is spoken of as "having listened unequivocally to his own conscience and the voice of his people" and as having spoken as the worthy head of a great nation.

The note represented more than three days of silent study of the situation. From the time that the first news of the sinking of the Lusitania was received until the meeting of the cabinet President Wilson did not confer with a single one of his official advisers.

Wrote It In Shorthand.

Usually when the president composes a communication in the privacy of the White House study he writes directly on his typewriter, but this time he dictated the famous note to himself.

The note was written originally by the president in shorthand. This is a familiar method of Mr. Wilson in making memoranda, and the fact that he utilized it in writing the momentous communication to Berlin indicates that he had his thoughts well in mind and understood in advance perfectly what he intended to say.

The shorthand characters of the president filled six pages of ordinary notepaper. After he had set down the communication in this way the president transcribed it on his own typewriter. As far as known no official or clerk of the White House had any part in the transcription of the document until after it had been presented to the members of the cabinet. Not even Secretary Bryan saw it in advance of that time.

The note is dated May 13. It was suggested that the president purposely held it over before transmitting it to Germany. He has always regarded 13 as his lucky number.

As a result of the sinking of the Lusitania and the riots against Germans which have occurred in London and all over England the British government at once ordered the internment of all Germans and Austrians in the British Isles who had been allowed to follow their vocations just as before the war. The bakery trade of the British metropolis is almost exclusively in the hands of Germans.

Men Interned, Women Deported.

All males between the ages of seventeen and fifty-five years are now being sent to detention camps. All women and children and old men will be deported. Premier Asquith said this act was necessary not only for the sake of the country, but for the Germans themselves, their lives being in danger from the indignation of the populace. Hundreds of German stores were wrecked in the riots. The rioters who were captured were heavily fined and the leaders sent to hard labor in prison.

Another outcome of the indignation over the sinking of the Cunard liner is that King George has given directions that the following names forthwith be struck off the roll of the Knights of the Order of the Garter:

The emperor of Austria, the German emperor, the king of Wurttemberg, the grand duke of Hesse, Prince Henry of Prussia, the Duke of Saxe-Coburg and Gotha and the Duke of Cumberland.

The Order of the Garter was instituted by King Edward III. about August, 1348. Since 1831 it has consisted of the British sovereign and twenty-five knight companions who were lineal descendants of King George I. and of sovereigns and extra knights who have been admitted by special statutes.

The first romance of the Lusitania has already been announced. Engineer John Welsh and Miss Gerta Neilson, a milliner, were married at Manchester, the home of the bridegroom. They first met aboard the liner and became engaged during the voyage. The bride fell from a lifeboat into the sea and was rescued by Welsh. Later both were picked up by a trawler.

He's Biggest Police Chief In World.

Grantsburg, Wis., a peaceful town which has less than a dozen arrests a year, is protected by the largest chief of police in the world. He is Gus Anderson, who is seven feet four inches tall and weighs 340 pounds.

JULIA SOON HAD ENOUGH.

Got Anthony by Mail, but Postage Came Heavy.

Detroit, Mich.—Anthony Merz, fifty-eight, wanted a wife and money and wanted them in a hurry, so he tried the mail order method in a matrimonial publication. Here is the result:

Monday, received an answer from Julia Bekeke.

Tuesday, she came to Detroit.

Wednesday, they were married.

Thursday, they quarreled.

Friday, a warrant charging him with threats was obtained by the bride.

Saturday, Anthony was tried before Justice Stein.

By noon Attorney Alpert said he would have on file a bill for divorce in the circuit court.

"He didn't want me," said the mail order bride. "Just wanted my money. I gave him $100 to open a restaurant, but he changed his mind about that and asked for more cash. Then I left him. I'm going to get a divorce."

THIS BOY OWNS BALL PARK.

Gardner's Father Bought It For Him to Play In.

St. Louis.—Prospects are bright for a humdinger of a time this summer for Rodgers Gardner, thirteen-year-old son of Russell E. Gardner, president of a big buggy company. His father has leased a whole ball park for him.

Heretofore the corner lot hierarchy reached its apex in the boy who owned a dollar 'n' a quarter baseball, a catcher's glove and an infielder's mitt. Even then he was always likely to be toppled from his throne by some interloper with a wagon tongue bat and an out drop curve. But when a fellow owns a whole park he's reasonably safe.

Russell E. Gardner the other night closed a lease on the vacant corner at Laclede and Euclid avenues and has arranged to have it fenced and laid out in baseball grounds by the time the son returns from a military school for his summer vacation.

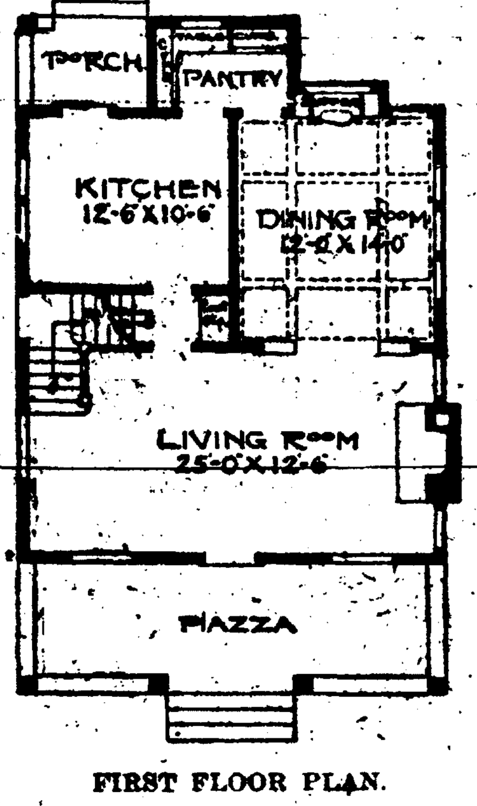
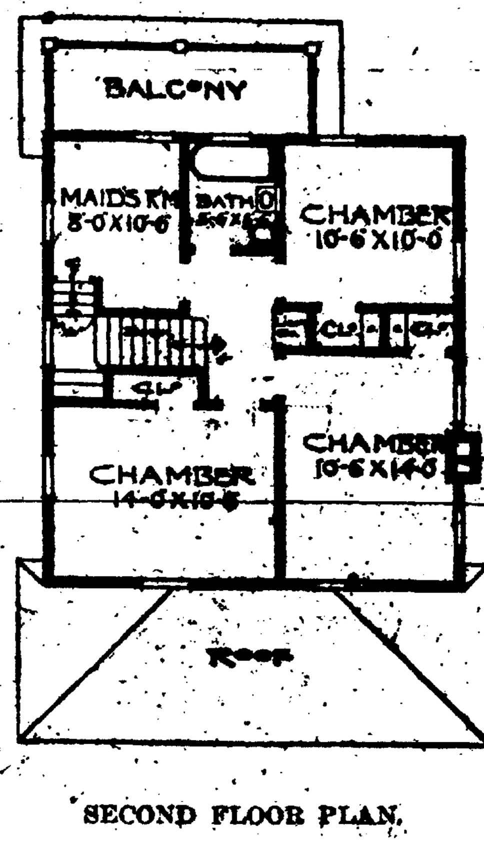
Design 628, by Glenn L. Saxton, Architect, Minneapolis, Minn.

PERSPECTIVE VIEW—FROM A PHOTOGRAPH.



FIRST FLOOR PLAN.



SECOND FLOOR PLAN.

This is a combination of rough cast exterior on the first story and siding on the second story, divided by a belt course. The wide piazza and large chimney add much to the general exterior effect. The large living room has a fireplace and plenty of windows. Dining room fitted with a built-in buffet, beamed ceiling and a battery of three high windows. A butler's pantry connects with the dining room and kitchen, with cupboards and table for serving. There is a grade door. Stairway leads from the living room. Size, 26 feet by 28 feet. First story, 9 feet; second story, 8 feet; basement, 7 feet under entire house. Cost to build, exclusive of heating and plumbing, $3,800.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains 310 designs costing from $1,000 to $6,000; also a book of interiors, $1 per copy.

ELECTRICITY.

Some Facts About This Wonderful and Puzzling Medium.

Here are some of the known facts about electricity that will enable those who know nothing about it to understand how it behaves. It must be understood that no one knows what electricity is. Only through its behavior can we arrive at an idea of its nature. The following facts are condensed from an article in the Electrical Experimenter:

All substances, from the heaviest metals to the lightest gases, are electric, but they differ widely in their electric qualities. Electricity is called positive when it exists or is excited in any body in an amount in excess of the amount natural to that body. It is called negative when it exists or is excited in any body in an amount which is less than the amount natural to that body. All electrical phenomena in nature depend upon the tendency of electricity to find an equilibrium between its positive and negative states.

Electricity resides in all substances and is, perhaps, an essential ingredient of their conditions, so every change in their state—whether from heat to cold or from cold to heat, from a state of rest to a state of motion, from solid to liquid or to aeriform, or vice versa, or whether substances combine chemically or are chemically separated—in every change the electrical equilibrium is disturbed, and in proportion to the degree of disturbance is the force exerted by electricity to resume its balance.

Electricity seeks to gain its equilibrium by passing through substances that are favorable to its diffusion. These are called conducting or nonconducting, according as they favor or oppose the passage of the electrical current.

Among the conductors are metals, charcoal, animal fluids, water, vegetable and animal bodies, flame, smoke and vapor. Among the nonconductors—also called insulators—are rust, oils, phosphorus, lime, chalk, rubber, camphor, marble, porcelain, dry gases and air, wool, silk, glass, transparent stones, wax and amber. Some of these become conductors when wet.

When electricity in considerable force, seeking its equilibrium, meets with insulating bodies intense heat and light are produced, in the evolution of which the electric force becomes expended. When the electric force is checked in its course by an insulator a spark is emitted if the current be strong. When currents pass toward each other along wires at the ends of which charcoal points are placed and these ends remain in contact, the electrical communication is uninterrupted and no light is emitted, but the instant the charcoal points are separated a layer of dry air, a nonconductor, is interposed, and the electricity in forcing its way through that nonconductor evolves intense heat and brilliant light. Such is an arc light.

Women as Executives.

David Grayson, writing "Hempfield" in the American Magazine, says:

"I think sometimes that women are far better natural executives and organizers than men. To keep a great household running smoothly, provisioned, cleaned, made sweet and cheerful always and to do it incidentally, as it were, with a hundred other activities filling her thoughts is an accomplishment not sufficiently appreciated in this world. The true women of the race have this capacity highly developed. They have a real genius for orderliness, which is the sanity if not the religion of everyday life."

Old London Firms.

Two tradesmen, or, rather, two firms, mentioned by Pepys still exist in London—Hill, the Bond street violin maker, and Dan Rawlinson of Fenchurch street, the first grocer to sell tea in England, whose concern survives under the name of Davidson, Newman & Co.

The identical sign of three sugar loaves that hung over Rawlinson's shop adorns the present establishment. There, too, may be seen the canisters and scales dating from the seventeenth century. Dan Rawlinson charged his customers $15 a pound for tea.—Exchange.

A Pupil of the "Best Teacher."

"Cheer up, old boy," advised the married man. "You know 'tis better to have loved and lost than never to have loved at all."

"Yes," agreed the rejected suitor, jingling a bunch of keys in his pocket; "better for the florist, the confectioner, the messenger boy, the restaurant waiter, the taxi cabman, the theatrical magnate and the jeweler."—Ladies' Home Journal.

Harvest Moon.

The harvest moon is the full moon that appears about the time of the autumn equinox. Because of the small angle that is made by the moon's orbit with the horizon it rises at the same time for several nights. The hunter's moon is the next moon after the harvest and is a like phenomenon.

Basis of Charge.

Baldheaded Gentleman (in barber's shop)—You ought to cut my hair cheaper. There is nothing much to cut.

Hairdresser—Oh, no. In your case we don't charge for cutting the hair; we charge for having to search for it.—St. Louis Post-Dispatch.

AFTER SURGICAL PROBE

Drank Lye When a Baby—Unable to Eat For Sixteen Years.

St. Louis.—Miss Katherine Besse, eighteen years old, ate the first breakfast, luncheon and dinner she ever ate in her life a few days ago. For sixteen years she had not tasted completely food of any description. The channel of her throat, the esophagus, was in position, but was entirely useless until Dr. Francis W. Kirsch performed an operation known as gastrotomy and brought her back to normal.

When she was two years old Miss Besse, who is the daughter of the widow of a grocer, drank a solution of lye while her mother was busy at her housework.

The lye burned away the membranes of the child's mouth and the lining of her esophagus and caused this channel from her mouth to her stomach to become strictured and to close tightly.

A physician who was called to attend her said she would die unless her esophagus was cut loose from her stomach and a new one made from parts of the stomach fashioned into a tube and sewed to the surface of her breast.

Her parents refused to permit the physician to cut away the deadened esophagus but granted him permission to bring the lining of the stomach to the surface of her body and make an opening near the solar plexus, through which liquid food might be given her.

Dr. Kirsch became interested in the case. He began a gentle probing with a slender pliable steel rod, which he forced down her esophagus. One after another the closed places in the old tissue were forced open and broken apart. As they were broken they were left attached to the inside of the new tissue that gradually had grown around the unused tube.

Nature then began its process of absorption until the new throat was clear of any stricture. Then the surgeon placed the patient under an anaesthetic and swiftly cut away the stitches that held the lining of the stomach to the old opening in the breast, sewed this together and dropped it in place, sewed together the muscles that had been severed sixteen years ago, cut away the abnormal tissues that had grown around the wound, stitched the severed skin together and when Miss Besse awoke from the ether told her she had become normal again.

TODAY AT THE QUIRK

In "The Gilded Fool," William Farnum; who plays the title role in thisg riping photoplay has been for several seasons a reigning favorite in the best of the Broadway successes. In the present production he has a part very much to his liking, and into it he injects every particle of his dynamic and forceful personality.

Maude Gilbert, leading woman with both Robert Hilliard and William Gillette in their greatest successes, gives charming support to Mr. Farnum. The company includes Margaret Vale, a niece of President Wilson; Charles Guthrie, Harry Springler and many other players of undoubted ability. Charles Chaplin in "The Fatal Mallet" is the added attraction.

Rain Interfered in Sixth Inning, to the Delight of Local Team

The Fulton High school baseball team dropped a game to the Skaneateles High school team at Skaneateles yesterday by the count to 9-6. The Skaneateles team was materially assisted by the umpire who was, in the opinion of the Fulton contingent, the worst official they have met this year, and that is saying a great deal. What the ump didn't know about the game would fill a big book, according to Manager O'Brien, who stated this morning that he was willing to set for once against his principles and bet ten dollars that the local team would wallop the Skaneateles team by ten runs when they came here to play.

The "Skinnies" started off, with the umpire in the van, and rolled up a lead of two runs in the first three innings. In the fourth the local warriors tallied five times. In the last half of the fourth the Skaneateles team made five runs and once more took the lead. In the fifth the locals tallied once and in the last half of the inning Skaneateles scored two more.

Pullen lined out a home run with three men on bases in the fifth but there were two down at that time and, in running the paths, O'Brien collided with the short-stop who stood directly in his way. The umpire called O'Brien out and the runs did not count. In the third inning O'Brien started to steal second and the Skaneateles pitcher made a palable balk, then turned and caught "Ober" off the bag. The umpire allowed the play.

The rain commenced to come down in torrents in the sixth inning and the game was called, much to the relief of the locals who were heartily disgusted with the robber methods of the home official.

No box score of the game was kept, the usual occurrence, but Pullen's hitting was one of the features for Fulton and Bray did some fine work behind the bat. Barnes started the game but was driven to cover in the second inning when the Skaneateles sluggers nicked him for three consecutive blows. O'Brien took up the burden at that point and was received just as warmly by the opposing team.

The trip was made by automobile, and the heavy rains at nightfall made the roads dangerous for the return trip, so the locals motored over to Auburn and put up at a hotel for the night. They arrived in this city this morning about 9 o'clock, thoroughly played out and in no condition to buck up against the fast Morrisville organization at Athletic Park today.

O'Brien will start today's game and the local twirler hopes to get revenge for his defeat of some weeks ago at Morrisville. In spite of the heavy rains, the Athletic Park diamond is in good condition and it is expected that a large crowd will be on hand to see the game which will start promptly at 3.30.

The Skanateles team will play the louals at Athletil Park next Saturday afternoon.

SYRACUSE-FULTON MAN HAS HEAVY LIABILITIES

The Fulton Savings Bank is listed as a creditor of Le Due Nichols, a Syracuse carpenter, who filed a petition in bankruptcy Thursday. The Savings Bank presents a claim of $3,000. Other claimants are Cicero Hancock of Oswego, $1500; Auburn Savings Bank, $9800; F. S. Sperry of Onondaga Valley, $2500. Mr. Nichols owned extensive real estate holdings in Syracuse and Fulton.

Nichols' liabilities are $49,569 and his assets, $4,550, including real estate. Attorneys Ott and Dunmuir represent Mr. Nichols.

ASKS MEETING

Board of Health To Be Told Conditions. Action Wanted

Yesterday the regular monthly meeting of the Woman's Civic League was held at the home of Mrs. Mary Suydam, Buffalo st., and matters of importance were discussed. Action was taken regarding the manner in which one of the licensed milkmen of this city is distributing milk to his customers. The milk is bottled in the streets, which is contrary to the law. The men when accosted by individuals who did not approve of this process were told by the milkman—"It is none of your business"—to which the women, especially those working for the Baby Welfare in this city, say "It is our business, and here's the beginning of our proof."

The case was laid before the Board of Health at its last meeting through one of the women in the city who has personally remonstrated with the milkman in regard to his method of bottling milk in the streets. The Board took no action in the case, and the League will ask a special meeting of the Board to be called that the case may again, in its full importance receive the consideration due it.

The garbage question was also discussed. Residents of the city who themselves exercise the greatest care in the disposal of garbage, find their neighbor over the back fence has piled a collection of "spoils" in his garden corner. The warm days bring out untold ordors and the flies and mosquitoes hold high carnival.

The Board of Health has not and does not meet the situation successfully. The housekeepers of the city who are interested in cleanliness in all forms want to know why the garbage problem can't be solved.

An investigation is on foot by the League to determine ways and means of ridding the city of this nuisance. It is understood co-operation between the Public Safety Committee of the Chamber of Commerce and the League, in this matter, will be brought about.

SPRINTER AFRAID TO TRUST MENTAL POISE

Every branch of athletics has its funny quirks and twists and track work is no exception.

Floyd Risley, coach of Hamilton College track team, ran up against one of the funniest of these at the Deerfield track when he brought his team to work out on the course on which they will compete in today's intercollegiates. As the men were dressing for the afternoon's labor, George D. Potter, a senior, told Coach Risley that a physician had forbidden him to participate in track athletics because competition might unbalance him mentally. Potter, it so happens, is the star sprinter. The other day on the hill he turned off 100 yards in 10 1-5 seconds, remarkable time when it is considered that he was running against the wind. On the Deerfield track it was expected he would lop off with fifth and win the event handily. He also was looked upon as good for five points in the 220-yard dash.

MACK WANTS CARROLL, FORDHAM THIRD SACKER

Connie Mack is still on the lookout for infield timber, and is particularly sweet on Carroll, the Fordham third sacker. Yesterday he dispatched Ira Thomas, his special envoy, to the Fordham-Mount St. Joseph's game, and the veteran catcher viewed the proceedings in general and the work of Carroll and Nolan, the visitor's second baseman, in particular, from the Fordham bench.

This is the second time that Thomas has viewed a contest at Fordham, and Mack himself saw the Holy Cross-Fordham game.

WILLIAMS COLLEGE WINS TENNIS MATCH

The New England intercollegiate tennis championship, both in singles and doubles, was won for Williams College yesterday in the final rounds on the Longwood courts.

C. F. Cutler, the Williams player, who has been the sensation of the competition, captured the singles event, disposing of S. A. Edsall of Trinity in straight sets, 6-2, 6-4, 6-2. Earlier in the day Cutler and R. S. Maynard defeated D. E. Woodbridge and J. S. Stewart of Massachusetts Institute of Technology in the deciding round of odubles, 6-2, 6-2, 6-2.

CANADIAN SOLDIERS GET SIGNED BASEBALLS

Famous ball players of the American League will be asked to autograph some of the baseballs which President Johnson will forward, among other paraphernalia, to the Canadian soldiers in France who want to while away the intermissions between battles in playing the American national game.

President ohnson said yesterday the material he would provide will include in the first consignment five gross of balls, fifty bats, six masks and six catchers' gloves, Six sets of new uniforms will go later.

Mr. Johnson has sent the following telegram to Mayor T. L. Church of Toronto:

"An appeal has been made to me to provide a big assortment of baseball paraphernalia, consisting of balls, bats, chest protectors and gloves, for use of the Canadian soldiers in France I am prepared to arrange for this donation. The American League club owners and players will cheerfully make the contribution. Kindly instruct me to whom I will send this shipment if it is wanted."

PHOENIX WOMAN GETS $2,500 VERDICT

A verdict of $2,500 in favor of plaintiff was awarded in Supreme Court, Justice Irving G. Hubbs presiding, in the negligence action of Eva E. Dean, of the town of Schroppel against the village of Phoenix.

O. M. Reilly of Phoenix, attorney for the village, moved that the verdict b eset aside on the grounds that it was excessive, etc., but the court denied the motion, granting the usual stay of execution of judgment.

Plaintiff sued for $5,000. The action arose from an accident on one of the streets of Phoenix in September, 1913, when a carriage in which was seated the plaintiff was overturned and in which she alleges she received personal injuries, claiming that the accident was caused by the bad condition of the road.

CARD OF THANKS

Mrs. William Furgeson wisheds to thank the friends and neighbors who so kindly assisted her during the illness and death of her husband; also the Master Masons, American Mechanics, Ladies' Relief Corps, Erie St. school and others who gave flowers; also the G. A. R.

Mrs. W. D. Furgeson.

JUSTICE EMPHASIZES SOME ROAD RULES

Charging a jury in a case where a pedestrian was run down by an automobile, in Utica yesterday Justice De Angelis laid down these rules of the road:

"New, with reference to the law governing the street, the right of the pedestrian in the streets of a city is equal to the rights of a person driving an automobile. Simply because an automobile can be driven rapidly and can cause injury to people, does not justify a person operating an automobile to ignore the rule that the pedestrian's rights in the street are equal to his.

"We overlook it every day. People run away from automobiles because they do not want to be injured, but the law does not require a person to run away from an automobile and if, on this occasion, the plaintiff was upon that crosswalk, moving along on the crosswalk with reasonable expectation that she could cross the crosswalk in safety, she had a right to be there and if she occupied the crosswalk first, her right was superior to that of the defendant, although he was running an automobile that might do damage to somebody. Do not forget that rule."

OSWEGO MEN LIKE CITY'S MANUAL TRAINING DEPT.

Yesterday's Palladium found something to praise in thish ity, as follows:

"Superintendent Richards and the members of the Department of Education are all very much pleased with the work they saw in the vocational school at Fulton yesterday, which is in charge of Professor Lawton. In many of the school that have been visited from time to time most of the work has been done by the students, who use machinery. In the Fulton school there isb ut little machinery, the students being made to saw and hew to the mark, educating their hands in the use of tools as well as their eyes. The girls do silversmithing and leather work.

"Probably next September will see the first vocational school in this city. It will be located probably in school No. 6. In time, however, with the building of the new High school the vocational department will probably be located there."

OSWEGO NEEDS JITNEYS; HAS BAD CAR SERVICE

Many Fultonians attended the Junior Prom of the Oswego Normal school last night and not a few of the Fulton people are condemning the car service of Oswego in no uncertain terms today. The last car to the city left the Normal at 10.45, about fifteen minutes before the dance closed. Expecting that there would be at least one special car and that a later car would make the trip through to the city, many people waited until 11 o'clock, and then attempted to ride to town. At that hour the last car came along and the conductor announced that it would only go to the car barns, about one-third of the distance to West 1st st.

The people who missed that car had to walk all the way in and several people from Syracuse, Phoenix and Fulton missed the last car on the inter-urban, and were obliged to stay in Oswego all night.

Thursday night, a lecture was given in the Normal and the magnanimous trolley company had two special cars waiting for a crowd of 200 people. Fultonians who missed their connections last night were informed by Oswego residents that the service is very poor all over the city.

VISIT HANNIBAL

Suffrage Cause To Get Renewed Vigor in Pretty Country Village

Hannibal, May 22. The coming week is to be "Suffrage Week" in Hannibal. Hannibal has one of the most flourishing suffrage clubs in the county, and plans a week of work. Mrs. J. S. Stevenson is president of the club, and has gathered together a splendid band of workers. Miss Eleanor Garrison, a granddaughter of Wendell Phillips, and an organizer for the Empire State Campaign committee, is to spend a week with the Hannibal women and they expect to have a lively week. Tonight Miss Garrison will speak before the South West Oswego grange.

Monday will mark the opening of the new suffrage headquarters in Hannibal. At 3 p. m. Miss Garrison will speak on methods of campaign work after which tea will be served. Everyone is invited to attend. Wednesday, May 26, is "Canvassing Day." The suffragists will meet at headquarters at 5 p.m. There they will arm themselves with literature and enrollment blanks and set forth to increase the suffrage enrollment in the town of Hannibal. Thursday, May 27, the Oswego Center Grange will open its doors to a suffrage speaker while Friday, May 28, the Hannibal Center Grange will give suffrage a hearing. Saturday, May 29, will find the suffragists taking part in the Memorial Day celebration in Hannibal. In the evening Miss Garrison will address a meeting of the Dexterville Grange, while a suffrage meeting is also being held at Bowen's Corners. Sunday afternoon, May 30, there will be a meeting at Granby Center.

The great event of the week, however, is to take place Sunday evening, May 30, in Hannibal. A mass meeting will be held at which Professor Roman of Syracuse University will be the principal speaker. Professor Roman is one of the most eloquent speakers in the State. He has recently returned from Springfield, where he addressed the Illinois State Legislature. This summer he will go to San Francisco to address the National Educational Association at its annual convention.

Maccabees Ladies Meet in New York

A four-day convention in the Waldorf-Astoria, New York, is to be opened on Monday by the Woman's Benefit Association of the Ladies of the Macabees of the World. It is to be the organization's quadrennial convention. Bina M. West, supreme commander and founder of the association, will make a report of the organization's progress in the last four years. In that time more than 26,000 new members have been obtained in the United States and Canada, making the present enrollment 187,000.

Miss West organized the association in Port Huron, its present headquarters, in 1892. In the twenty three years of the association's life she has signed away more than $12,000,000 in death and disability benefits. She was the sole member sented America at the International Council of Women in Switzerland.

New York State will be represented by nine delegates, besides Mrs. Eva L. McNett of Hornell, great commander for the State and acting past supreme commander for the association. The other New York women will be Mrs. Carrie L. McDaniel of Buffalo, Mrs. Delia J. Neafach of Albany, Mrs. Margaret Danford of Rochester, Mrs. Maude Sargent of Syracuse, Mrs. Mary A. Flaherty of Salamanca, Mrs. Hattie E. Wirtner of Dunkirk, Mrs. Alta B. Hodge of Gloversville, Mrs. Gertrude Murphy of Niagara Falls and Mrs. Catherine Doody of Rochester.

REV. AND MRS. OLMSTEAD HEARD BILLY SUNDAY

The Rev. and Mrs. Charles Olmstead arrived home this morning after spending the week in New York Flatbush and Paterson.

They attended the exercises incidental to the State Conference of the Congregational Church, which was held in the Central and Plymouth churches of Flatbush. Last night they visited the Billey Sunday tabernacle in Paterson where they saw Pa and Ma become laden with the gifts of a grateful throng of devotees. Billy was too interested in receiving gifts to do acrobatic stunts, states Mr. Olmstead.

DOUBLE SHOWER HELD YESTERDAY

Miss Mary Smith entertained the Royal Guards of the State Street M. E. church at her home on Friday evening, the object being miscellaneous shower for the Misses Muriel Wells and Evelyn Morley, whose marriages are to take place in the near future.

Music, games and a dainty luncheon were enjoyed. The brides-to-be received a number of handsome and useful gifts presented to them in the dining-room decorated with the class colors of green and white. About 28 guests were present.

Community Notes

Mrs. W. A. Williams, 314 Phillips st. entertained yesterday Circles No. 1 and 10 of the Congregational church.

* * *

Mrs. S. B. Ball and daughter, Chloa, and son, Anson, left this morning for Albany, where she will visit Mr. and Mrs. J. A. Osborne.

* * *

Mr. and Mrs. Fred Lamphere while on their way to the city yesterday from South Hannibal, met with a serious accident—the pole of the wagon breaking, causing the horses to run. Mrs. Lamphere had one arm broken and other slight injuries.

* * *

Frank A. Lovelace of this city has been in Syracuse, called there by the death of his father.

* * *

Mr. and Mrs. Elmer Green of South Hannibal were in the city to attend a birthday anniversary at the home of Merrill Milks.

* * *

Miss Gore of the West Side has been the guest of out of town friends.

* * *

Mrs. Georgia Wallace of Hannibal has been the guest of Mrs. George Wadsworth.

* * *

Mr. and Mrs. G. S. Northrop of Baldwinsville have been visiting Miss Lois Harrington in this city.

* * *

A number of Fultonians visited Oswego last evening to hear the lecture in Christian Science by George Shaw Cook, C. S. B.

* * *

Mrs. William Carr delighted the members of the W. H. M. S. with a very interesting talk on Alaska at the home of Mrs. George Palmer, Worth st. Mrs. Carr related her personal experience and also told of the customs and conditions of that country.

* * *

The members of the Columbie Circle are asked to meet in the club rooms Sunday at 7 o'clock promptly to attend memorial services at the Baptist church.

* * *

Miss Susan Kuzar will entertain the Up-Lifters at her home in South 4th st.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 22.—The fifth week of the deliberations of the delegates to the Constitutional Convention, which will begin on Monday, is to mark the commencement of a series of important hearings some of which will be joint and will be held in the Senate Chamber.

Being in doubt as to whether there should be drastic amendments to the state finance law, this important question is to be threshed out at a public hearing in the Senate Chamber on Tuesday afternoon, May 25th. Because there have been serious financial complications as the result of the state's system of dealing with appropriations each year, it has been generally agreed that drastic changes to the Constitution are necessary to safeguard the interests of the taxpayers and the treasury as well.

For several years the proposition of adopting a budget system has been in an embryo form. Attempts have been made to require heads of state departments to submit to the legislature early in the session the exact amounts of the appropriations necessary for their several departments. This scheme has resulted in only a partial solution of the financial tangle, as a consequence while the delegates to the Convention are sitting it has been deemed wise to go deeply into the subject of a budget system and the forthcoming hearing, at which state officials will be present, is expected to establish the policy of the state as to future financial preparation for the support of government.

Among the other important hearings for next week is that on the proposed amendment to the Constitution by Delegate Reeve's of Brooklyn, which seeks to create a land division to the supreme court. If the amendment is adopted and substantiated by the people, it will mean that all cases where real estate is involved will be tried solely before the land division of the supreme court. This hearing will be held on Tuesday afternoon of next week before the Judiciary Committee.

On Wednesday of next week the Committee on Legislative Powers will give a hearing on the proposed amendment of Ray B. Smith, which is to the effect that upon the final passage of all ill in either House of the Legislature three-fifths of all the members elected shall be necessary to constitute a quorum.

On the same day the same committee will consider the proposed amendment of delegate Lemuel E. Quigg which seeks to prohibit any kind of boxing exhibitions or fights for which the sale of tickets is desired. This proposition promises to be most interesting as there is a pronounced sentiment against further reform in connection with amusements or sporting events. Many have signified their intention of being present to oppose the adoption of the amendment. Delegate James W. Wadsworth, a former Congressman, will oppose it.

On Wednesday also there will be a hearing on the proposed amendment by Delegate Robert F. Wagner guaranteeing to cities and incorporated villages the right tom unicipal self-government; also upon the amendment of Delegate Sanders making it the duty of the Legislature to pass general laws applicable to all cities and incorporated villages and prohibiting the passage of local laws affecting municipal or incorporated village government; the amendment by Delegate Winslow providing that the hours of duty of an employe of a city or state department shall not exceed more than twelve hours each twenty-four except in cases of emergency.

PHOENIX MAN WANTS VILLAGE CURFEW LAW

At a recent meeting of the Village Board one trustee said he thought the village ought to have a curfew, to be sounded at 9 o'clock every night as a warning to all children under 16 years of age that they must scamper for home. The man who has charge of the fire alarm system, was directed to ascertain what arrangements can be made for the sounding of a special alarm each night as a curfew. A curfew ordinance will probably be adopted later. At present, the streets are full of children at almost all hours of the night.

Mrs. F. E. Goodjon has returned from a visit with friends in Syracuse.

Pulpit and Pew

Presbyterian Church

Charles S. Robertson, Pastor

Morning prayer at 10 o'clock, led by Mr. Farley.

Worship by families at 10:30 a. m., with sermon theme, "The Burning Bush."

Bible school at noon.

Vesper service at 5 o'clock, when the pastor's lecture-sermon will have the timely theme, "The Program of a Hero."

Christian Endeavor at 6.00 o'clock.

State Street M. E. Church

Rev. H. D. Holmes, Pastor

"The Costly Foundation," is the topic of the Rev. H. D. Holmes' sermon for Sunday morning. At noon the Bible school will meet in the usual manner, and at 3.30 p.m. the Junior League will have another interesting session.

Evening services: At 6 o'clock the Young People's Society will meet. There will be no reaching in the evening at 7.30, as the congregation will join in the union memorial services at the Baptist church.

Zion Episcopal Church

Rev. Minor J. Peters, Rector

Whitsunday, May 23d, 1915. Services as follows:

Holy Communion.......... 7.30 a.m.
Sunday school............ 9.30 a.m.
Holy Communion and sermon 10.45
Evensong and sermon....... 5.00 p.m.

Whitsunday is one of the high feasts of the church. It is the day set aside for the commemoration of the gift of the Holy Spirit to the church in Jerusalem which happened ten days after the Ascension. It is the day when the infant Christian church was infused with Divine Life from heaven and became the Living Mystical Body of Christ. It is therefore observed as the birthday of the church. All the services in Zion Church will be appropriate to the occasion.

First Baptist Church

Milton George Buck, Minister

The services for tomorrow are as follows:

Morning worship 10:30 a. m., subject, "Contagious Christianity." Bible school 12 m. Christian Endeavor at 6:30 p. m. Evening worship 7:30, subject, "True Patriotism."

The Post of the Grand Army of the Republic will attend in a body the evening services. Rev. H. D. Holmes president of the Fulton Preachers club, will preside and the other pastors of the city will partiipate in the service. The pastor, Milton George Buck, D. D., will preach the sermon.

Again we use the slogan of the Chamber of Commerce only changing the wording a trifle and say. "The Baptist church suits us, it would you." Come and enjoy the service with us if you are a stranger in the city.

The Bible school is open for all, old and young—classes suited for all ages.

"The Church of Cordial Welcome."

WANTED
Second-Hand Counter, Desk, Cash Register and Safe.
L. P. SMITH COMPANY

Congregational Church

Rev. Charles Olmstead, Pastor

At the morning service the pastor will use as his subject, "Paul's Method in Evangelism."

No preaching service will be held in the evening, as the congregation will worship at the Union exercises in the Baptist church.

Christian Science

55 E. First Street

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday, in the Van Wagenen Block. Mrs. H. A. Allen, first reader; Mrs. Noah Merriam, second reader. You will be welcome and interested to attend one or both services.

The subject for next Sunday is: "Soul and Body." Golden Text: Romans 12: 1. Responsive Reading: Psalms 43: 1-5; 54; 1-6.

When Poland Drank Hard.

Poland was a great country for hard drinking in the old days. Its last king, Stanislaus II., was solemnly warned by the grand hetman, Branicki, that he must never expect to become popular unless he got drunk at least twice a week. Pan Kemaresewski, who could empty a bucketful of champagne at a draft without noticeable consequences, once in company with [illegible]ski, high chamberlain of Volhynia, disposed of a whole butt of old Hungarian wine at a single sitting. One held his beaker under the bunghole until it was full and then drank while the other filled his beaker, and so turn and turn about, they achieved the feat.—London Chronicle.

A REAL NECESSITY

No Advertiser can Successfully Develop Trade in the Market Afforded by the People of Fulton, Unless He Employs the Advertising Columns of

THE FULTON EVENING TIMES

¶ Remember that its circulation represents ONE-SIXTH of the population of Fulton, therefore it is necessary to use *The Evening Times* to make your proposition a success.

¶ *The Evening Times'* readers represent the same classes as any other paper circulated in this vicinity, who are, collectively, the all-powerful people for the advertiser to reach.

¶ The people of Fulton reached by *The Evening Times* buy ONE-SIXTH of everything sold in the city. They have money to buy luxuries as well as necessities, and they read THIS PAPER because it is their Home Paper—edited, printed and circulated by "Home Talent" who spend their money for the upbuilding of Fulton—your City.

¶ Readers of *The Evening Times* are a big, mighty crowd—to neglect them, to ignore them means a lack of business judgment, and it requires the support of the big crowd to put things over.

THE BIG CROWD OF FULTON—READ YOUR HOME PAPER

"A HERALD OF PROGRESS"

Sir Francis Thought He Was the Monarch of California.

CROWNED BY THE INDIANS.

The Redskins Had Decorated Him With a War Bonnet of Feathers, but He Took It For the Real Thing in Crowns and Accepted the Title.

Hidden in the diary of Francis Fletcher, a sailor parson who acted as chaplain for the freebooters of Sir Francis Drake, is the story of the first hoax ever engineered by Californians.

The joke was on Sir Francis. Until his last day he believed the Indians of California had crowned him their king—king of California. As a matter of fact, all they did was to give him a feather war bonnet and perform some native rites before him, hoping thereby to get their hands in his gift box again.

It happened in June, 1579. Drake was looking for the mythical northwest passage after a successful year looting and plundering in the Spanish colonies. His ship, the Golden Hind, sprang a leak, and Drake put into a little bay, just north of the present San Francisco, for repairs.

An Indian paddled out to the ship in a canoe. He scattered feathers on the water and went through a lot of pantomime. Drake feared to land until he found out the intent of the natives. The one Indian went back to shore. Then, to quote from Chaplain Fletcher:

"He shortly came againe the second time in like manner and so the third time, when he brought with him, as a present from the rest, a bunch of feathers, much like the feathers of a blacke crowe, very neatly and artificially gathered upon a string and drawne together in a round bundle, being verie cleane and finely cut. With this also he brought a little basket made of rushes and filled with an herbe which they called tobah, both being tyde to a short rodde he caste into our boate."

Drake tried to give presents in return, but the Indian paddled away quickly. He took only an old cocked hat which some sailor had thrown overboard. The hat made quite an impression on the tribe apparently, for they all gathered around the possessor on the beach.

In three days' time Drake concluded the Indians were friendly, so landed his men and began to unload the ship. A fort was constructed as a matter of precaution.

While the crew prepared the Golden Hind for sea Drake visited with the Indians. A tale, apocryphal perhaps, says he took an Indian chieftain's daughter to wife. At any rate, he got on famously with the savages, aided, no doubt, by generous gifts.

As the time neared for his departure and gifts grew fewer, the Indians announced that they intended to give a festival for Drake and his party. Drake came in full armor, and the Indians danced and played games for his benefit.

At the close of the ceremonies the Indians signaled that Drake was to be honored in some way. First an Indian approached bearing what Fletcher calls "a scepter." Drake accepted this kingly accouterment. Then a chain was placed around his neck, and amid great shouting a "crown of feathers" was placed on his head.

Drake saw no other meaning of the ceremony than that he had been chosen king. What they really did was give him a pipe, a belt of wampum and a war bonnet. Drake drew his men up in line and, with a great flourish of trumpets and drums, accepted the kingship of California. As a postscript he added that he made no claims to being an independent monarch. He was still a vassal of Queen Elizabeth. He set up a monument to that effect:

"Our general caused to be set up a monument of our being there, as also of her majesties and successors right and title to that kingdom—namely, a plate of brasse, fast nailed to a greate and firme poste; whereon is engraven her grace's name, the day and year of our arrival there, and of the free giving up of the province and kingdom, both by the king and people, unto her majesties' hands; together with her highness picture and arms, in a piece of sixpence current English monie, shewing itselfe by a hole made of purpose through the plate; underneath was likewise engraven the name of our general."

The hoax was successful. After accepting the kingship Drake sent for a large assortment of gifts for his subjects.—Kansas City Times.

President's Pardoning Power.

The president of the United States has power to pardon only those persons convicted in the federal courts of the United States. This pardoning power extends to convictions for offenses committed on the high seas and to convictions in consular courts having extra territorial jurisdiction in foreign countries. The pardoning power of the president of the United States does not extend to convictions in state courts.

Answering the Full Description.

"Why do you consider this necktie my wife bought me a joke? It doesn't make me laugh."

"That fact makes it all the more a joke. Whether or not you laugh depends entirely on who it's on."—Washington Star.

Power is a fretful thing and hath its wings always spread for flight.—Wallace.

Attack Upon an Enemy.

The crows are masters of mobilization. Such mobilizations have frequently been investigated. Usually they prove to be for the attack on some enemy.

Thoreau speaks of the crows "bursting up above the woods where they were perching like the black fragments of a powder mill just exploded." When they are gathered for war purposes their cries will lead you to the spot where they are fighting, and these same bursts of black fragments above the trees, usually following an especial uproar of cawing, will direct you to the center of the battle.

Walter King Stone, the illustrator, and Charles Livingston Bull have told me of a mobilization they once witnessed, when the crows gathered for hours and the two observers were able to penetrate the woods to the exact spot beneath the feathered explosions. There they found a great horned owl flying low in the trees with a dead crow in his talons. Whether this was the original cause of the battle or whether he had grabbed the crow in one of the descents of the birds about his head they, of course, could not say. He was evidently struggling to find a dead tree where he could take refuge. He was saved probably by the coming of night.

Crows have even been known to attack foxes, as Winslow Homer's painting is the most famous witness.

A farmer near my home who has observed crows for many years and has the reputation of knowing more about them than any one else in the neighborhood tells me that almost invariably in his experience the cause of a large mobilization is either a big owl or a hawk. The little screech owls are also attacked, but by lesser numbers. He has also personally seen the crows attack a fox while it was crossing an open field, and once he watched a flock of nearly 100 crows worrying a Skye terrier dog, which was so thoroughly frightened that it was running in circles. I have seen crows attack a cat also, but the cat always is wise enough to make for cover.—Walter Prichard Eaton in Harper's Magazine.

CHARM OF ICELAND.

A Land of Wild Grandeur and Mighty and Beautiful Waterfalls.

In spite of its poverty Iceland is one of the most beautiful countries of the world. The scenery combines a wild grandeur, with ingratiating charm in an infinite variety of characteristic landscapes.

The mountain formations are majestic and powerful in outline, showing traces of the volcanic forces which are still active in some places. The large cupola shaped mountains, which rise like oriental temples from the ocean or the level plains, their tops covered with perpetual snow, are very impressive.

To this must be added a wealth of mighty and beautiful waterfalls, great lakes, steaming springs and craters still warm. The view is usually wide and open and the play of colors fascinating, especially in the fair, mild summer nights. The air is clear, healthy and invigorating, streaming alternately from the wide sea and from the snow covered mountains.

This natural beauty attracts many tourists to the country, and large ocean steamers, filled with travelers, visit it several times each summer. Owing to the lack of transportation facilities most of them must be content with seeing the coasts. When it gets railroads, modern hotels and other conveniences Iceland will no doubt become a popular tourist country.

Iceland has many possibilities for a fair future.—American Scandinavian Review.

Thackeray and the Eggs.

"Americans," says a writer in the London Chronicle, "have a way of serving boiled eggs which is apt to disconcert the English visitor. It is told of Thackeray that at his first American breakfast in Boston he ordered this dish. Among the array of things placed before him was a goblet filled with something that he failed to recognize, and he also missed the eggs. In answer to his inquiry the waiter said, 'That's them in the glass.' 'Well, but where are the shells?' asked Thackeray. 'You didn't ask for the shells,' was the prompt reply."

Tit For Tat.

He—These biscuits are not like those mother used to make. She—Of course they are not. I want you to understand that these biscuits are constructed in strict accord with the latest scientific formula and can be consumed without injury to the digestive system.—Richmond Times-Dispatch.

Tommy's Excuse.

"Why did you stay away from school, Tommy?"

"Me mudder broke her arm."

"But why did you stay away two days?"

"She broke it in two places."—Boston Transcript.

Truly So.

"Something shocking happened in school this morning."

"What was it?"

"The galvanic battery got overcharged."—Baltimore American.

Capital Punishment.

The term "capital punishment" refers to the punishment of beheading, which affected the head, or caput, of a person.

If you wish any blessing look for it yourself.—Ermat.

Its History a Romance of Philosophy and Mechanics.

UNCLE SAM'S FINE EXHIBIT.

The National Museum at Washington Shows the First Crude Machines Made as Well as Originals and Models of the First Locomotives.

Probably no museum collection in the world better illustrates the development of the steam engine, particularly the locomotive, than the exhibit of the United States National museum at Washington, which includes two of the earliest original locomotives and numerous models and accessories.

The history of the steam engine is a materialistic romance without parallel in the record of human achievements. It covers the stupendous and persistent efforts of many early philosophers and mechanics who found steam a mysterious uncontrollable force and left it a comprehensible controllable factor of public service.

No one knows how long after it was observed that by holding down the lid of a kettle of boiling liquid a certain force was created, due to the compression of the steam, before any use was attempted with this newly discovered force. It is certain, however, that a sort of steam engine was exhibited in Alexandria, Egypt, about 200 years before our era began, and it was described in a work on pneumatics by Hero of Alexandria, written between 150 and 130 B. C. This machine was a rotary affair, more theoretical than practical, as were many of the results of philosophy in those days. A reconstruction of this engine in model form is in the museum exhibits.

Nothing more is to be found concerning the steam engine for centuries, a fact which is no doubt due to the lack of interest in anything which did not have to do with war or warlike implements. A book published in Rome in 1629 gives a description of Giovanni Branca's crude steam engine, showing it to have been an elementary steam turbine, with the sole defect that it lacked any appliances for making the steam follow the vanes, or buckets, of the revolving wheel, so that more of its energy might have been converted into useful work. One author in a treatise on locomotives claims that had some genius improved upon this early device the reciprocating engine would probably never have been invented, but that we would have had the advantage of our modern turbines much sooner.

The museum possesses a model of a very early machine designed by Sir Isaac Newton in 1680 which was propelled by a jet of steam projected backward against the air and a model of Denis Papin's invention of about the same time. The investigations of Savery and Papin and the successful experimental engines of Thomas Newcomen in 1705 with his piston and cylinder soon followed. Newcomen's ideas were improved by James Watt in 1769, who also introduced the high pressure engines, the condenser and later the double acting engine. The development of the engine was advanced by Cugnot, Evans, Hornblower and Murdoch. A model of the latter's engine is on display in the museum.

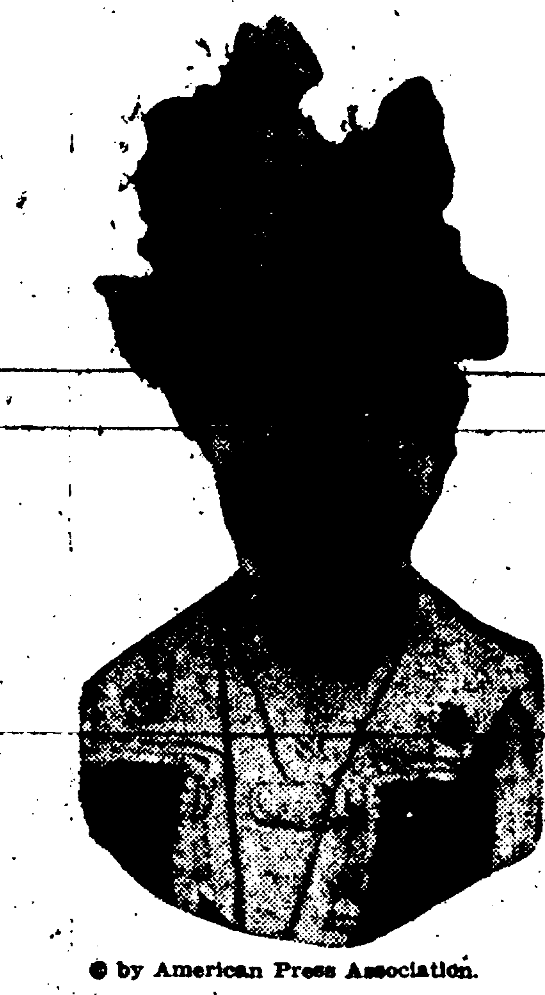
As the result of a wager made by a resident of Merthyr Tydfil, an important iron town of South Wales, that he could convey a load of iron nine miles by the power of steam alone Richard Trevithick made the first engine to run on rails in 1803 and won the wager for his employer the next year. Trevithick, it has been claimed, copied the stationary engine built in 1800 by Oliver Evans, an American, who was later ingenious enough to attach wheels to a scow and propel it by steam through the streets of Philadelphia in 1804. This curious creation, called the Oruktor Amphibolis, was the first motorcar to run on American soil.

A model of Trevithick's engine is to be seen in the National museum, as is also the model of the engine employed by John Stevens in 1825 and his original tubular boiler. Other models illustrate nearly all the types which began to put in their appearance soon after 1826, when the Stourbridge Lion was built in England and shipped to America, where it was the first engine to run on full sized rails. The museum possesses not only the model of this historic engine, but the original engine itself. The other original full sized locomotive to be seen in the museum is the John Bull, built by George Stephenson & Sons of England and shipped to America for use in 1831 on the Camden and Amboy railroad. It is interesting to recall that this old relic of early railroading in America made a round trip under its own steam in 1893 from New York to Chicago, where it was exhibited at the World's Columbian exposition.

Among the models of early and historic locomotives are George Stephenson's Rocket, which was built in 1829; the B. and O. engine Tom Thumb, built by Peter Cooper in 1829; the grasshopper type engine Arabian of 1831; the Best Friend, used in 1830-1; Baldwin's Old Ironsides, constructed in 1832; the Sandusky, built in 1837, and models of engines made by Asa Whitney in 1840 and G. A. Nicholls in 1848. Besides the two locomotives and the numerous engine models, there are in the exhibit coach and car models, sections of rails, spikes, wheels and models and parts of valves, pistons and other early accessories pertaining to locomotives and railroads.

Woman's World

How a Woman Deals With Vexing Labor Problems.



© by American Press Association.

MRS. HELEN GOULD SHEPARD.

Mrs. Helen Gould Shepard believes in arbitration. She goes about it with a simple directness which it might be well for male employers to imitate. The incident happened some years ago when Mrs. Shepard, then Miss Gould, was building a memorial chapel to her father, Jay Gould.

The workmen, so she was informed by the superintendent, were not satisfied.

"What is the trouble?" inquired Miss Gould.

"The men want more money and fewer hours."

"Then give them what they want," was Miss Gould's succinct reply, the finest settlement for a labor problem that any capitalist ever invented.

Helen Gould first became the talk of every town in the Union at the outbreak of the war with Spain. An announcement was made that a generous and patriotic woman had given $100,000 to the national government as a contribution to the cost of a righteous war. Shortly afterward the same generous hand gave $25,000 to the Woman's National Relief association. This was too much for the public. It wanted to know what manner of woman was this.

Then it was that her unobtrusive benefactions were made known or at least a few of them, for the full extent of Miss Gould's charities will never be known to any one but herself. Born into millions, with a natural place in the most ornate society, she has willingly cast aside all frivolity and devoted herself to the serious business of life and the philanthropic responsibilities of her position.

Scarcely a man who suffered in the war in Cuba, Porto Rico or the Philippines who has not been, directly or indirectly, benefited by her generosity. Her house in New York and her country home, near Tarrytown, were turned into hospitals when the transports began crawling northward with their freight of suffering. She cared for hundreds under her own eyes and lavishly contributed when help was needed elsewhere. To hospitals and homes wherever a sick soldier had found refuge she sent flowers and fruit, blankets, food and money. Nor did her efforts stop at easing the hardships of the fighting men. Her sympathies extended to those who are often the most grievously hurt by the war, the mothers and wives at home, who suffer and are wounded without the excitement of battle. She felt that no sacrifice was too great to make for the men who had answered the call of country. She is above all things, patriotic and takes a great and intelligent interest in the affairs of the republic.

Her income is much over a million a year, but of this very little is expended on its owner. Since her marriage to Mr. Shepard, a few years ago, her scheme of life has been the same. If anything, her benefactions are now carried out on a larger scale, for Mr. Shepard is an ideal worker along the same lines, and had been for many years before he met Miss Gould.

She regards her fortune as a sort of trust for the less fortunate. When she entertains, it is modestly, and her fashionable visits are few in the course of a season. Indeed, she is far happier when she is entertaining at one of her houses a group of self supporting working girls—a class in whom she is greatly interested.

In all her charities, and in all her work, there has been a practical and sensible spirit. She is not a sentimental giver nor one who gives for the appearance of munificence. She exerts herself to give where it will do good and looks to it that her benefactions will genuinely benefit those for whom they are intended. She has a very clear and right perception of what her duties are. Here, in her own words, is what she told the Woman's club of Cincinnati on the duty of a woman of wealth:

"I shall never cease to preach the gospel that women of means should do more than rush through life for nothing but their own pleasure. It is the duty of women who have wealth to help others, and especially other women, and to make life for them worth the living."

Gown Faintly Reminiscent of the Spanish Dancing Girl

Designed by Maison Maurice, New York.

IN the making of fashions we have found it necessary to call upon almost every country of the world.

In the gown shown here Spain has furnished us with the motif. The tiny bolero is reminiscent of the Spanish dancing girl, and you might fancy that Carmen had come out of the opera to pose for it.

The gown is developed of black sequins and jet, made over accordian plaited chiffon and a slip of black satin. To give the color note which every gown should possess two scarlet geraniums are used—one at the hem of the tunic, and the other is posed at the back of the bodice. It is only moderately decollete, and the sleeves are wisps of chiffon, daintily showing the bare arm of the wearer.

* * *

Many skirts, especially those of chiffon or silk, are bound with bias bands, usually self material, with the exception of marquisette, chiffon, tulle and lace, which are bound with silk.

Box plaits are held in place by narrow folds of silk.

Scalloped edged skirts, and there are many, are bound with narrow folds of the same material.

Full, double plaited ruffles have their edges pinked and add a quaint old fashioned air to taffeta and tulle gowns.

* * *

For a woman who always chooses a black parasol there is a model called "chapeau," for the reason that it resembles a sombrero. It is fashioned of black taffeta, but around the outer edge is a band of black velvet about three inches in width. The ribs turn up in a manner that gives the whole thing a very unique effect.

A very smart afternoon gown has a practical note that should appeal to women who have several remnants on hand which can be combined to form a comfortable gown for warm days. The skirt is of striped crepe de chine. The bodice is in coat effect and made of taffeta. It flares open in front and falls down the back in two long tabs. Long chiffon sleeves finished with deep cuffs of taffeta lend a transparent note.

Coin dots appear on many of the new sunshades, and, of course, to be conspicuous, they are always of a very different color from the parasol. Red parasols with black or with white dots are very prominent. A shade of such color proves useful when a costume needs one bright spot to make it snappy.

ANNA MAE.

HELPFUL HINTS FOR HOUSEWIVES

Dresser and Wardrobe For Use of the Baby.

A woman has designed an entirely new piece of furniture in the shape of a baby dresser and wardrobe, which at least has the distinction of being different from anything else that has been brought out in this line, and its construction presents a number of conveniences for the mother or nurse and comforts for the baby. All of the infant's essentials are rounded up in one place, so that they are all conveniently within reach of the caretaker. The top part is fitted with a mattress, on which it is designed that the little one shall repose while its clothing is being changed or it is being given its bath. Three sides are protected by a rail sufficiently high to prevent accident.

Salmon and Rice Loaf.

Grease a bread tin and line with a layer of cooked rice, laying it about an inch thick. It should be warm, so that it may be pliable. Flake the fish from a can of salmon (or use fresh salmon) and fill this into the center of the pan, pouring over enough white sauce, etc., to moisten. Put a layer of rice on top, cover with buttered paper and bake for an hour in a pan of hot water set in the oven. When cooked turn the loaf out on a buttered platter or chop plate, pour white or egg sauce over it, garnish with hard boiled eggs in slices or with cress, parsley and a few slices of pickled beets.

Cleaning Light Gloves.

To clean light gray doeskin gloves let the gloves soak in a saucer with sufficient gasoline to cover them; take out, do not squeeze, but let the dirty liquid drip off. Lay on a thick clean cloth and with a dry piece of rag rub down, working from the wrist to the fingers. Constantly change the surface of the rag, for as soon as it gets dirty it is apt to smear them. After this, if the gloves are not quite clean, put them through the same process again and hang in the air. This work must not be performed in a room with a fire or artificial light.

Kitchen Kinks.

Japanned tea trays should not be washed in hot water. If greasy, a little flour rubbed on them will give them a new look. If they are scratched rub with a little olive oil.

If a little salt is put in gasoline clothes that are cleaned will not have the usual yellow ring around the spots.

Soap jelly is made by shaving a bar of soap and letting it simmer in boiling water till it becomes thick like jelly. A teaspoonful of borax will soften it.

Nut and Cheese Roast.

Cook two tablespoonfuls of chopped onion in one tablespoonful of butter and a little water until tender. Mix one cupful each of grated cheese, chopped English walnuts and soft stale bread crumbs together and moisten with the water in which the onion was cooked. Add salt, pepper and the juice of half a lemon. Pour into a shallow baking dish and bake in the oven until brown.

Baked Rhubarb.

Wash and wipe dry the rhubarb. Cut into inch lengths without peeling. Put a layer in the bottom of an earthen baking dish, cover with sugar. Repeat this process until sufficient quantity has been used. Cover tightly. Do not add water. Bake one hour and serve cold. This is a delightful dish.

Creamed Celery.

Cut into inch pieces and parboil in salted water for ten minutes. Drain and substitute clear soup stock for the water. Add a small piece of onion or a pepper pod and boil until the celery is tender. Thicken with cornstarch moistened with cold water and season with salt and pepper.

Raisin Sandwiches.

With one cupful of seeded raisins chop an equal quantity of nut meats. Mix to a paste with fresh, sweet butter and spread between toasted crackers or thin slices of brown bread. A dash of lemon juice adds a piquant flavor.

Good Form

Regarding Week End Entertainments.

Spring days suggest the country, and the country suggests week end guests. Week end parties, as everybody knows, are delightful, but week end guests and their entertainment require skill and tact.

The woman who intends to have week end visitors, then, or house visitors of any sort needs to consider one thing before inviting the outsider into her home—is the prospective guest worthy of the honor? Is she to be trusted with one's life, ergo one's reputation? If not madam must not issue her invitations, and if she sees fit so to do once the stranger is within her gates all must be given her—full confidence in her integrity and entire liberty in every move that concerns her health and happiness.

As the hostess' captiousness sometimes comes from feeling that the visitor of a week or more is outstaying her welcome the English custom of arranging a visit within a prescribed period is an excellent one. If you ask Miss Guest to come on the 15th and stay until the 20th you have no reason to complain unless she prolongs her stay. This arrangement for the coming of the guest and her going puts the whole visit on a pleasant and easy basis, and the hostess and guest of good sense abide by all the requirements of politeness and kindly feeling as long as the visit lasts.

Some very definite obligations are involved when inviting a friend to partake of a home's hospitality for this stated period. The hostess must see to it that there are writing materials in the friend's room, stamps excepted. She must consult with her guest concerning the acceptance of any invitation to other homes. When callers come the guest must be asked to go down to the drawing room as a matter of course. The visiting friend must be included in every visit to other friends.

Things One Must Do.

A friend of Goethe's once remarked that if you wish to appear agreeable in society "you must consent to be taught many things which you know already."

You have had to sit many hours with a smile upon your face while some dreadful bore expounded supposed theories of his own which had been as axioms to you from youth up. You have had to listen to society traditions, in which you were not in the least interested, told by some sycophant, because you knew that what lay upon your thoughts light as thistledown encompassed her about like a royal robe. You may hate the molecular theory and despise the foolish vaporings about "society," but you have no taste for the life of the hermit, and you have at least to pretend that you are interested in the ponderous and the frothy. The question is whether you are not a bore yourself, at least to the man with a theory about creation and the woman who adores by way of the social register.

Have you ever tried to air your theories about child welfare and the solution of the poverty problem in the presence of the women who were all the time unconsciously counting your frills and speculating as to what sort of "beading" would have improved your costume?

If you have you will no doubt have recognized the set smile with which she pretended an interest, because it is part of her religion to appear always to be agreeable.

Two Sorts of Manners.

"Society is more conventional than it is good mannered at times," remarked a man of manners, "and I know persons of both kinds. Particularly I know a lady who is conventional and bad mannered, and I know a business man who is unconventional and, if not exactly good mannered, better mannered than the lady.

"Not long ago he was at an evening affair—he went because his wife wanted him to go—and he wore a shop tied tie, a gaucherie a man of conventional habits could not possibly be guilty of. The lady in question noticed it, and in her naive way she asked him why he wore that kind of tie.

"'Well, madam,' he replied, 'I do it for two reasons. One is to give stupid people a subject of conversation, and the other is to show that unconventional taste isn't much worse than conventional bad manners.'

"Of course he had no right to say it, nor, on the other hand, did the lady have any right to comment on his dress, so it may be called a standoff, though the man still wears a tied tie, and the lady does not make any comments."

The Merest Trifles.

It is always the merest trifles rather than the big things of life which indicate the manners and tastes of the average person. A glaring social error, a particularly rude action or tactless speech, are not made with too great frequency, but other less obtrusive faults are often committed, sometimes solely through ignorance or want of thought.

It is just as grave a mistake to be too polite as to be abominably rude. The painstakingly polite person is very trying to encounter, for extremes often meet, and he generally succeeds in being actually ill bred.

EVOLUTION OF THE CHAIR.

Benches Without Backs Served For Seats in the Middle Ages.

It seems odd to contemplate that, with the multitude of chairs to be found in every home these days, once upon a time there were no chairs as we know them in any home. In those days benches answered the purpose now served by chairs, and when a family drew up to the table for its meals in the middle ages they sat on long benches, which had no support for the backs, instead of chairs.

From long ago there were heavy thrones on which the rulers sat, but these throne chairs were so heavy that they could not be easily moved. Later the benches were given a back, and still later the chairs as we know them today were evolved.

It was not until 1600, in the time of Charles I., that the average Englishman knew of chairs or had them in his house, according to those who have made a study of furniture. The first English chairs were imported from France, and the native cabinetmakers and carpenters made chairs in imitation of these.

In those days the fashion in chairs changed with the fashion of clothes. When full skirts were the style the chairs became wider, so that milady and her skirts could be accommodated on one chair. The difference in the size of chairs that we have today, made in imitation of old styles, comes from this difference in clothes.—London Standard.

Why a Whip "Cracks."

In a lecture on "Mechanics In the Home" delivered to boys at the Royal institution, in London, Professor C. V. Boys tried to explain why a whip cracks. The Scientific American remarks that his explanation was only tentative, and the greatest authorities on dynamics have been at a loss to give the reason. Briefly, it has to do with the fact that, owing to the action of centrifugal and other forces, the speed at which the whip travels through the air is greater and greater throughout the length of its lash and so great at the end that it comes up to the velocity of sound.

Mimicking Death.

Sarah Bernhardt's fondness for playing death scenes (you remember her habit of sleeping in a coffin) made her an object of terror to the ex-Sultan Abdul Hamid. When the great actress visited Constantinople years ago Abdul refused absolutely to see her or witness her playing, declaring that he had no wish to come in contact with a woman who could mimic death to such perfection.—London Chronicle.

True, but Misleading.

"Dick hugged me last night before I had the faintest idea of what he was about."

"And what did you do?"

"Why, of course I was instantly up in arms about it."—Baltimore American.

An Awkward Situation.

"For $2 I will foretell your future."

"Are you a genuine soothsayer?"

"I am."

"Then you ought to know that I haven't got $2."—Kansas City Journal.

Economy.

"What! You are eating crabs just at the time they are most expensive?"

"Yes, I always have bad luck. When they are cheap I have no money."—Munich Fliegende Blatter.

GOOD CATCHERS.

They Must Be Quick Thinkers and Are Hard to Develop.

Good fielders and hard hitters there are who are not quick witted, but never a catcher, who is the first to see signs of weakness in the pitcher and sends word to the bench for another pitcher to warm up. Three years' experience with a major league is regarded as necessary to make a catcher competent. Only a few continue long enough to have such experience.

Good catchers say that when they hear the ball touch the bat their hands instantly fly toward the ball, no matter where it glances off the bat. Some after losing sight of a fly in the sun have the ability to reach it nevertheless.

Some catchers are unjustly blamed for not putting a runner out who gets a big lead off the pitcher, who is really at fault. Here not only a good throw will fail, but it is often useless to throw at all.

Good catchers make many unexpected throws. They must throw from an unnatural position and with a jerky motion of the arm. Archer threw with a snap of the arm while standing flat footed and put many out on first base.

The catcher signals second baseman that he is going to throw the next pitched ball to him; the pitcher delivers it a little to one side so that it can be handled easily; the shortstop knows the next ball will not be hit and so can back up second base. This unexpected throw often puts the runner out on second.

A similar play is when the runners move up every time the ball is pitched. If those on second and third both get well off the bags the catcher again signals the pitcher to waste a ball and makes as if he were going to throw to third, but instead throws quickly to second and retires the runner there, or makes as if he were going to throw to second, but instead throws just beyond the pitcher, when the baseman starts for second, and he, without stopping, runs up, catches the ball and sends it home to retire the man seeking to score.—Arthur Macdonald in American Education Review.

BEES HAVE PARALYSIS.

Oklahoma Entomologist Finds Evidence of Disease.

Oklahoma City, Okla.—C. E. Sanborn, state entomologist at the A. and M. college, has discovered that a disease which he describes as paralysis has attacked the honeybees in Oklahoma. Dead bees are furnished him for investigation.

He took live bees and infected them with the bacillus of the dead ones, and soon they died. He says:

"In death they showed the same action as bees ordinarily found with paralysis. Their abdomens became distended, their two front feet drawn up against their chests, the four hind feet stretched out, sprawling and quivering; the mouth parts extended and quivering and the head frequently turned to one side."

Picking a Chicken.

To pick a young chicken easily after being scalded wrap it in a piece of burlap and let it steam for three or four minutes. The pin feathers will then rub off as easily as the other feathers.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

PHONE 198

ISSUES CALL FOR VOLUNTEER ARMY

The National Security League Seeks Million Members For Defense Against War

Better coast defenses, a definite military and naval policy, a budget system for appropriating money instead of the present "pork barrel" method in congress, an effective mobile regular army, better government support for the national guard and the creation of an organized army and navy reserve are among the platform planks upon which the National Security league, New York, is sending out an appeal for the enrollment of a first American army of 1,000,000 volunteer workers and for funds to carry the work on.

Among the names which appear in the membership of this league for national defense are: Joseph H. Choate, former ambassador to England, honorary president; Alton B. Parker, honorary vice president; S. Stanwood Menken, president; former Secretary of War Henry L. Stimson, chairman of the army committee; J. Bernard Walker, chairman of the navy committee; Benjamin F. Tracy, former secretary of the navy; Colonel William C. Church, editor of the Army and Navy Journal.

Against, Not For, War.

In the call for volunteers the league points out that "until a satisfactory plan for disarmament has been worked out and agreed upon by the nations of the world the United States must be adequately prepared to defend itself against invasion and also that a military equipment sufficient for this purpose can be had without recourse to militarism." The league was formed, continues the appeal, "as a preparation, not for war, but against war."

There are today, according to the league, but 30,000 mobile troops in continental United States, and this small force is short of officers, ammunition and equipment. It is distributed among [illegible] widely scattered points, which would make it impossible to mobilize quickly at any given point.

The national guard, according to the league, is far below its paper strength in men, equipment and efficiency.

In the report of the naval committee our navy is described as "a peace navy," inadequately manned, without sufficient target practice, exceeded in tonnage by Great Britain, France and Germany and, moreover, with many of our ships obsolete.

"There is need of a navy of sufficient size," says the committee, "to prevent the capture of our insular possessions, to guarantee the neutrality of the Panama canal and to prevent the landing of a hostile force at any point upon our 21,000 miles of coast."

Has Big Peace Committee.

Among the standing committees being organized by the league is a peace committee, on which it is proposed to invite representatives of the church on a nonsectarian basis to serve together with men distinguished as publicists, whose services will tend to disarm those critics of the league who have brought the accusation that the league is being organized for the promotion of war.

The call for volunteers and for public support is being sent out in the form of an open letter addressed to present and former members of the cabinet, to members of congress, to governors of our states and territories, to mayors, to chambers of commerce and boards of trade, to merchants' associations, to university clubs and alumni associations, to colleges and universities, to patriotic organizations, to all women's clubs and to all American citizens in general.

It is the present plan of the league to make national defense an issue at the coming session of congress. With this program in view, branches are being organized all over the country.

Steps have already been taken for branches in nearly 200 prominent cities.

PLANTS HATE AND LOVE.

Blue Rockets Wage Merciless War on Animals, Says Professor.

"Blue rockets show fear, and the deadly nightshade is full of hatred. Both plants declare merciless war on all animal life. The blue rocket perfume carries one of the deadliest of poisons. One-sixteenth of a grain shot from its poison pistil has proved fatal to a man.

"Give this plant the semimuscular system possessed by the carnivorous plants and it will be more dangerous than the cholera," declares Professor Henry G. Walters, head of the plant research bureau at Langhorne, Pa.

The professor, who maintains that plants have memories and are capable of love, believes also that there are plants which exercise all the emotions of enmity.

Has Biscuit Served at Gettysburg.

T. F. Perkins of Hartsville, Tenn., a Confederate soldier, has a cracker which has kept fresh since the battle of Gettysburg. It is a specimen of the Confederate army hardtack and was picked up on the field July 3, 1863.

Food For Punsters.

"I don't see how Fussleigh gets any enjoyment out of his food. He's dieting, you know."

"Yes."

"He uses this new 'mathematical masticatory' system."

"Good gracious, what's that? So many chews to the mouthful?"

"No. He eats beans by the dozen, rice by the grain, fish by the perch and spaghetti by the yard."

"Does he seem better?"

"Measurably so." — Cleveland Plain Dealer.

Drink Plenty of Water.

A Roumanian scientist claims that any one can live to be 100 years old, barring accidents, if he drinks enough water. He declares he has discovered that old age is due to a decrease in the amount of water in the system and that Father Time may be checkmated by systematic water drinking during middle age.

Buying Wives.

Wives are still obtained by purchase in some parts of Russia. In the district of Kamyshin, on the Volga, this is practically the only way in which marriages are brought about. The price of a pretty girl from a well to do family ranges from $100 to $200.

Same Way.

"How did you find dear old Broadway?"

"That way yet."

"What way?"

"Old and dear."—Cleveland Leader.

Be satisfied with success in even the smallest matter and think that even such a result is no trifle.—Marcus Antoninus.

Scotch Profits.

"We have decided," said the head of a Glasgow firm, "to conduct our business in future on the profit sharing principle. We shall begin at once on the basis of last year's results."

"We are delighted to hear it," replied the foreman, speaking for the men. "May we ask what were the last year's results?"

"We lost a thousand pounds," said the employer, "and, therefore, on the profit sharing principle, there will be a reduction of 10 per cent in your wages."—Dundee Advertiser.

PLAGUE COMING

College of Agriculture Foretells Its Arrival and Prescribes Some Remedies

Recent examinations by an expert from the State College of Agriculture have indicated that serious outbreaks of grasshoppers may be expected again in those sections of the state where they were abundant last year. This is due, in part, to the fact that although large numbers of the grasshoppers were killed last year by the use of poison bait, they had a chance to lay their eggs before efforts were made to destroy them. As egg laying may commence in July, the importance of fighting the grasshoppers early this season can easily be understood.

At the present time, and until they get to be pretty well grown, the young grasshoppers are confined to the more or less localized areas in which they have hatched from the eggs. It is comparatively easy for any one to locate these breeding places now, and, according to the experts, just as easy to get rid of at least a large proportion of the grasshoppers before they can do serious injury to the crops.

Where to Look for Grasshoppers

Sandy pastures, well drained and thinly covered with vegetation, which have not been cultivated for several years, are favorable breeding grounds This is especially the case where the pasture contains a sandy knoll. Lanes and roadsides are often infested as well. Fields which have been recently cultivated are less apt to be used as breeding grounds.

An observant person, walking through the fields and pastures on a sunny day should be able to note the presence of the young grasshoppers, if they are at all abundant. All pastures and fields should be carefully examined and if found to be infested remedial measures should be put into effect at once. It is especially urged by the Cornell entomologists that no one should wait until the grasshoppers are full grown and damaging to crops, but should fight them early and often, while they are still small and easy to kill, and before they have a chance to lay eggs.

How to Get Rid of Grasshoppers

There are several methods of fighting these pests. They can be poisoned, or they can be caught in "hopperdozers" and destroyed. The so-called "Kansas bait" isperhaps as satisfactory a poison mixture as has been used.

The formula is as follows: 20 pounds bran, 1 pound Paris green, 2 quarts molasses, 3 oranges or lemons, and about 3½ gallons water. Mix the bran and Paris green together dry. If very much of the material is to be mixed, it is advisable for the person doing the mixing to protect himself from breathing the poisonous dust by tying a moistened sponge or handkerchief over his mouth and nose. Then mix the molasses and water together, squeeze the juice of the fruits into the water, and the skin and pulp chopped up fine, and moisten the bran with the liquid. Just enough of the liquid should be used to thoroughly moisten the bran but not to make it sloppy. Then it should be sown broadcast over the infested field, preferably early in the morning, so that the grasshoppers can get a chance to eat it before the heat of the day dries the moisture in the bran. It should be shown evenly and thinly over the field, not in lumps. Although the poison may not kill the grasshoppers for a day or so, it seems to stop their feeding as soon as they eat some of it. The amount of mixture in the foregoing formula is enough for 3 or 4 acres. Live stock of all kinds shouldb be kept from the treated fields for a few days to avoid any possible danger of poisoning them. If the grasshoppers are especially numerous it may be necessary to renew the poison bait after 4 or 5 days.

Where there is some sort of a spraying machine available, the infested fields may be sprayed with arsenate of lead or Paris green. The arsenate of lead is used at the rate of 5 pounds of the paste to 50 gallons of water. The Paris Green should be used in the proportion of 1½ pounds to 50 gallons of water, with a pound or so of good lump lime added to prevent burning of the vegetation. About 2 quarts of cheap molasses should be added to each 50 gallons of liquid.

Another material which may be as used as a spray is arsenate of soda, in which 1 pound of commercial arsenate of soda is used to 2 quarts of molasses and 50 gallons of water.

The Hopperdozer

Various mechanical devices have been used with considerable success to catch the grasshoppers, especially in the middle West. They are most useful on level ground and where the use of poison mixtures is not advisable. One of the most successful of these is the hopperdozer. This is simply a shallow flat pan made of galvnized iron, about 4 inches deep, 2 feet wide, and 8 feet or more long. This pan is mounted on runners, varying in height according to the crop to be protected and the age of the grasshoppers; for young grasshoppers about 2 or 3 inches above the ground is a suitable height. On the sides and back of the pan there should be shields of tin or cloth stretched on a frame, about 2 feet high, to prevent the grasshoppers from jumping or flying over. The pan is partly filled with water and kerosene oil, and drawn across the infested fields. Pans up to 6 or 8 feet long can be dragged by hand; longer ones will need horses. In the larger pans, cross partitions should be placed at intervals of 2 or 3 feet to keep the liquid from running all to one side on uneven ground.

Pretty Thin.

"My dear," said a thin little Brighton man to his wife, "this paper says that there is a woman down in Devonshire who goes out and chops wood with her husband."

"Well, what of it? I think she could easily do it if he is as thin as you are. I have often thought of using you to peel potatoes with."

The thin man laid down his paper with a sigh that sounded like the squeak of a penny whistle.—London Answers.

Education.

Education is not merely the writing of facts on the mind as one writes on a blank slate. It resembles rather the placing of fresh color on canvas on which earlier colors are not dry. The new colors mix with the old. So the living mind mixes new information with what is already in it, and judges the new in the light of the old.

Germans Use 4000 Guns to Crush Russians

(Continued from Page One)

places not to exceed sixty guns to the mile front. The chief of the Teutonic allies in this sector thus used three times the customary number of pieces for the territory in which they operated.

Petrograd dispatches, however, say this lavish use of steel and explosives defeated the very purpose for which it was intended in that th compactness and consequent immobility of the German formation prevented manoeuvres that might have threatened seriously the Russian flank.

Russian official reports say the Austro-German armies that succeeded in crossing the San as a result of this terrific bombardment have overflowed the region between Jaroslav and Lezochov, but that the defences of the river from Jaroslav to Permysl are maintaining a stout resistance. The movement from the river has for its purpose the encircling of Permysl, but as yet it has not progressed sufficiently to threaten the fortress from the east. The bombardment of Permysl from the west continues, apparently without inflicting serious damage. The fortress has been restored to a condition of efficiency by the Russians since it was surrendered by the Austrians two months ago, and is believed to be capable of withstanding a long siege.

BRITISH MAKE GAINS ON QUINQUE ROAD

London, May 22.—Sir John French, the British Commander in Chief, in an official communication made public says:

"Since my last communication of the 17th the operations have been hampered by the weather.

"But in spite of this our troops have made appreciable progress east and south of La Quinque road (near Neuve Chapelle). The main characteristics of these operations have been numerous local fights for strong points behind the enemy's original line. In capturing several of these points our infantry has again displayed great gallantry.

"On the remainder of the front there is nothing to report except minor artillery engagements.

"Last night we brought down a German aeroplane in the neighborhood of Ypres."

EAT BARK, LIVE IN CAVE.

Fate of Farmer and Two Daughters, Victims of Big Jinx.

Benville, Ark.—A man named Ewing has been found living in a cave five miles east of here with his two daughters, ten and eight years old. When discovered their clothes were worn to strings and, according to the children, they had subsisted on the bark of trees for ten days.

The older of them said:

"We haven't had a piece of bread for more than a month."

Five years ago Ewing was a well to do farmer. First his stock began to die. By the end of a year he owned only one cow and no other property. Two years ago his wife, who was the ruling spirit on the farm, died, and six months later she was followed by their only son and the only grown daughter. This left the old man alone with the two small children.

But the real climax came about seven months ago, when his house and all it contained were destroyed by fire. He then sold the cow and disappeared. No effort to find him was made, for when the neighbors had offered to help him in his trouble he became angry and exclaimed: "No, I cannot accept any gifts. No Ewing has yet ever stooped so low as to beg, and may God grant that I am not the first to do so."

HIRES PRISONER TO WIFE.

Wards of Wisconsin Sheriff Earn $10,376.81 For Their Families.

Janesville, Wis.—Letting out his prisoners to work for wages that go to their families instead of making them hammer stones, C. S. Whipple, Rock county sheriff, is demonstrating the possibilities of the Wisconsin commitment law.

During the two years the statute has been in force $16,775.85 has been earned by the prisoners in this county. Of this amount dependents of paroled persons received $10,376.81 and the county $1,210.41.

One man was paroled for a year to his wife to conduct a clothes pressing establishment.

Bad if He Couldn't Kick.

Church—How is your gout? Gotham—Oh, I can't kick. Church—Oh, is it as bad as that?—Yonkers Statesman.

Children Cry FOR FLETCHER'S CASTORIA

W. C. T. U.

Edited by Women of Fulton Union

Mr. Bryan and Alcohol

Mr. W. J. Bryan, the American secretary of state, has been expressing himself strongly on the question of intoxicants:

I am a teetotaler, and have been all my life. I do not use intoxicating liquor as a beverage, and whenever opportunity offers for the giving of advice, I advise others to abstain. I hold that it is not wise to drink, even in moderation. First, because drinking is an expensive habit. It is not wise to spend on a thing that is useless money which would yield a return in benefits if expended in some other way. The best that can be said of money spent for liquor is that it is wasted, and no one can afford to waste money, no matter how much of it he may have.

A Notable Testimony

Admiral Sir John Jellicoe, speaking at a temperance meeting in Gibraltar before the outbreak of the present war, said:

Any officer holding a command which carries with it any measure of responsibility for the defense of the empire must recognize, as I do, the value of temperance in promoting fighting efficiency. In the navy there are three qualities upon which efficiency mainly depends. They are discipline, straight shooting, and endurance, and temperance unquestionably tends greatly to the promotion of discipline, one has only to look at the punishment returns to realize how many of the disciplinary offenses are due at the outset to intemperance. As for endurance, medical research has amply proved the fact that temperance is a great asset in improving the physical qualities, and, therefore, the endurance of the human race.

Most captains also, if their ships are to fire at the practices in the afternoon, hold on to the grog issue until the evening.

FIFTY YEAR SEARCH ENDS.

P. C. Grimes, Seventy-five, Finds His Long Lost Sister.

Altus, Okla.—A search of fifty years, extending over a dozen different states, during the progress of which a small fortune was expended in an advertising campaign, ended at Blair when P. C. Grimes of Nebraska City, Neb., stepped from an express passenger train into the arms of his sister, Mrs. D. W. Jones of Altus.

Mr. Grimes is seventy-five years old. Fifty years ago, after the marriage of Mr. and Mrs. Jones, the family broke up. After a few years they lost trace of each other and all efforts to get into communication were unavailing.

Mr. Grimes then began his search. It was a mere accident that Grimes finally found his sister. He had written a letter to her, directed to Rix, a postoffice in Green county, long since discontinued. The letter was thrown to Mangum, and Postmaster G. B. Townsend, who happened to be personally acquainted with Mrs. Jones, forwarded the letter to her.

SHE QUIT PARSONAGE.

When Pastor-Husband Forgot Art of Kissing.

St. Louis.—Mrs. Eugenia Anderson, nineteen years old, seven months' bride of the Rev. Arthur R. Anderson, pastor of the Central Christian church in Granite City, has returned to the home of her mother, Mrs. Minnie Koch of this city, because she says her husband would not kiss her.

She told a reporter that in the last two months her husband had kissed her but once and that this lone salute was bestowed, not upon her lips, true lover fashion, but in a half hearted way on her cheek.

She said she did not wish to be divorced and would be glad to resume her place as mistress of the manse if her husband would only give her a little affection.

More Miracles Ahead.

Who can predict what the future will be, in view of what has already occurred in this generation of miracle working? New inventors, standing on the shoulders of those who so transformed things during the last half century, will doubtless learn still greater secrets of nature. Much of our worry over posterity is idle. While we are handing down many serious problems for posterity to wrestle with, we are also giving it the richest legacy any generation has ever had. Thanks to our inventions, the youth of tomorrow will live more before he attains his majority than "Methuselah did in all his stagnant centuries."—St. Louis Globe-Democrat.

Philosophy is nothing but discretion.—Selden.

"PAUL'S METHOD IN EVANGELISM"

A Sermon Preached Yesterday by the Rev. Charles Olmsted of the First Congregational Church, Fulton

The congregation of the First Congregational church listened attentively yesterday morning to the pastor of the church, the Rev. Charles Olmstead who chose as his subject the above caption:

I Corinthians 9:22.

"I am become all things to all men, that I may by all means save some."

This is an era that is peculiarly devoted to evangelism. There have been other periods of note. The new learning engaged men's attention at one time. The reformation was a great movement to establish the pure truths of the gospel in the hearts and lives of the populace.

History records the era of the great awakening in New England and elsewhere, the age of theological controversy, and so on, but this is the age of missions, the time when the propaganda or extending of the Christian Evangel is engaging the thought and attention of thousands and millions of people.

At home we are employing the method of great conventions, tabernacle campaigns, the printing press and organized agencies, besides the regular and continuous work of the individual and the church; while the missionary by focal preaching, tours through the villages and regions where he labors, and by personal conversation from house to house is seeking to extend the gospel tidings of peace and good will.

I. In any method to be employed the first thing to be considered is the work to be done. This is called by many and varied terms. Sometimes it is called evangelizing the community. A scriptural term is, "winning souls." Paul says, "To the weak I became weak that I might gain the weak. I am become all things to all men that I may by all means save some." He speaks of gaining and of saving. Some times a military term is used such as recruiting men for the kingdom of God. The work to be done is the enlisting of human souls under the banner Christ—the saving of all such from the dangers and pitfalls of an evil life and bringing them into a relation of safety, freedom and usefulness in their vineyard and kingdom of God. The term, winning speaks of tactics, victory and achievement.

When a man is won he is not merely saved as you would save a dollar or a tree, but he becomes an asset on the other side.

II. The object of such effort is human hearts or souls. Within the physical nature of man there is a nature that recognizes cause and effect, contemplates and worships his Creator, recognizes his relationship to the creatures and objects about him—a nature that can dominate his life and cause him to rise in the scale of manhood, or by giving way to base and ignoble influences, can sink his existence in depravity and vice. The soul may be lost to the ownership and control of God, to one's higher self, to the family, the church, human society and noble aspirations. Corrupted by depraved ideas and vile practices, swayed by corrupt affections and influences, chained by evil habits, desires and masters. A man is in need of restoration. Romance and history tell of many a young man who has proved himself a hero to win some worthy, though earthly good. Othniel won Kirjath-sepher for the fair hand of his cousin, Ochisah, upon whom he bestowed a worthy gift. Fortunes are won by honest toil. Places are won by successful competition. Battles are won by outflanking an enemy. But place, fame, riches, honor and companionship are not to be thought of as compared with the winning of human hearts as gems for the Redeemer's crown. What loss is so great as for a man to lose dominion over himself? I believe that God would rather lose from the galaxy of the blazing suns, of the starry firmament, many brilliant orbs of power and light, than to lose one soul which he has made and endowed with the capability of loving and praising him, day after day.

UNION SERVICE HONORS G. A. R.

Rev. M. G. Buck Gave Testimonial of Appreciation to Civil War Veterans

Veterans of the Civil War, ladies of the G. A. R. and Sons of Veterans paid tribute to the honored dead of their organizations at the annual memorial service held last night in the First Baptist church. The occasion was one of unusual significance because of the fact that it was the fiftieth anniversary of the re-uniting of the North and South after the Civil war. The platform was decorated with roses, carnations and palms. Clergymen of the city in whose churches no services were held were seated on the platform, with Rev. M. G. Buck, pastor of the church, and speaker of the evening.

One of the largest congregations which has ever attended a service in this church was present at last night's service and both the auditorium and the chapel were filled with people. Shortly after 7 o'clock the various organizations which attended the service marched into the church in a body. They were given seats in the central section, a portion of which had been reserved for them.

The sermon of the Rev. Mr. Buck was most eloquent and during its course he discussed problems of the day. He attacked frenzied patriotism as a false patriotism.

"The real traitor to this country is the grafter; the commercial defaulter; the crooked politician and the one who swears allegiance to a foreign government while enjoying the privileges of citizenship in the United States."

At the commencement of his sermon the speaker addressed members of the Schenck Post as follows:

"That is such a debt we owe to you, I do not believe one of us could rightly frame a sentence of appreciation. This is our golden anniversary; we meet here to celebrate the golden wedding of the North and South."

"We can be thankful to God that the people of all nations have come here and found the freedom and peace for which our forefathers fought. They have become America citizens.

"Why do men fight? In the answer to that question lies the pathway to peace. Few men fight for religion, few fight for glory, and none fight for money. It is more easily won in other ways. The ideals of peace is an end of religion itself."

"Men fight today for patriotism. Patriotism is the cause of war. And whosoever lives in this land of freedom should stand for its welfare at any cost.

"In these days it behooves everyone of us to think seriously, speak wisely, and act calmly that this country may stand as a mediator. God has placed at the head of this government men who are ultra-conservative, men trained for just such an hour as this."

"Today because of the sacrifice of the brave men who fought in the Civil War we have the American Union. There is a duty we owe to our heroes. They fought our battles."

"This country of ours has a great duty. It is to emancipate the down trodden from all oppression. Patriotism is not Christian unless it is sympathetic and fraternal. We are a member of the family of nations and we owe them sympathy and good will. Patriotism is capable of being counterfeited and perverted. All is not patriotism which has that label. The true patriot is a man who endeavors to make America the nation God had in mind when he made it."

"Patriotism easily degenerates into jingoism and runs to seed. When a man becomes extravagantly patriotic it is well to find the cause. If we would have our country hold the place it occupies, then we must teach in our public school the Holy Bible. Men of the G. A. R., I want to personally thank you for what you have done for me and my children and all the rest of us in these great United States."

LOCAL CLUB IN RECITATION

West Side Young People Appeared at Hannibal Saturday Night

The recently organized West Side Dramatic and Choral Club made its debut Saturday night at the Grange hall, in Hannibal, where a recital was given under the auspices of the Hannibal Grange under the direction of Miss Katharine Walsh of the club who teaches in one of the schools there. The club and several guests made the trip by automobile.

Following the program:

Baritone solo—"A Dream," Bartlett
Edward L. Walsh

Duet—"Rose of Italy," .... Carroll
Miss Marguerite McGovern, Soprano
Miss Rose Walsh, contralto

Recitation—"Extinguishing a Scorcher"
Ford Frederic Martin

Club Quartette—"Maytime", Sparks
Miss Marguerite McGovern, soprano
Miss Rose Walsh, contralto
Edward Walsh, baritone
John Reynolds, bass

Solo—"Marguerite,"......... Trotere
Miss Marguerite McGovern

Recitation—"The Trial of Ben Thomas"
Edward Carroll

Duet—"Sing Me to Sleep,"....Greene
Miss Marguerite McGovern
Miss Rose Walsh

Chorus—"In the Windows of the House Upon the Hill", by the Club.

After the recital the club was tendered a supper in the Grange hall, and dancing followed. The party returned at a late hour Saturday night.

Those who made the trip were the Misses Marguerite and Marie McGovern, Rose and Katherine Walsh, Helen McCrisken of Oswego and Messrs. Edward Walsh, John Reynolds, Frederic Martin, Mark Pullen and Edward Carroll.

7 LUDINGTON HEIRS WANTED

Attorney Seeks Further Information, Stating Valuable Estate is to Be Divided

The influence of a newspaper extends as far as results go, is made many times apparent in the case of the interest aroused and the information obtained by The Evening Times in the paper's efforts to secure knowledge of the whereabouts of heirs of Moses Ludington.

At the time of making the first announcement of this case The Evening Times was under a misapprehension, as it now appears that the San Francisco attorney, Sid M. van Wyck, Jr., conveys the information that he is seeking heirs of one niece of the late Moses Ludington.

The following letter is self-explanatory:

Fulton Evening Times,
Fulton, New York.

Dear Sir: Your kind favor of the 8th inst. duly received. I have been greatly pleased at the result of the publicity given by you to the search for the heirs of Moses Ludington. As a result I have received letters from a number of his grandchildren and am getting in a position to furnish the Probate Court here with much of the information it requires.

The descendants of Moses Ludington, of Fulton, New York, are not the only next of kin of the decedent whose estate is being settled.

Moses Ludington never came to California, but one of his nieces did come and left a valuable estate here. Being without any surviving descendants of her own, her next of kin are the children of her various aunts and uncles, including the children of the late Moses Ludington, of your city.

Moses Ludington was one of twelve brothers and sisters whose names were Moses E. Ludington, Nathaniel S. Ludington, Philip C. Ludington, Harley R. Ludington, Andrew L. Ludington, Eunice Ludington DeWolf, Polly Ludington, James Ludington, William Ludington, Patty Ludington, Elizabeth Ludington Winn and Sarah Ludington.

I have now succeeded in finding the names of the children of all of these excepting the children of Andrew, Polly, James, William, Patty and Sarah. I do not know that any of these resided in Fulton, New York, but the influence of the publicity you have already given has extended so far that letters have come to me from all over the United States and from Canada.

I am actively pushing my inquiries regarding the children of these other members of the Ludington family. Should you have any information regarding any of them I should be very glad to have it.

It sounds a little odd to speak of those whom I seek as children since if living they would all now be very aged persons.

Very truly yours,
Sidney M. van Wyck, Jr.

MRS. GARDNER OFFERED MONEY

Wanted to Rid City of Edward Whorl; Mayor Says Wife Unfit to Work

The case of Woodbury vs. Gardner was continued Saturday afternoon in the City Court, before Judge Coville, and startling testimony was offered by witnesses for both sides. The examination of Mrs. Edward Whorl, the daughter of Mrs. Gardner, whom the city claims is entitled to support from Mrs. Gardner, was given early in the afternoon and the testimony of Mrs. Gardner followed. Dr. Fox was also a witness for the city.

Mrs. Whorl under direct examination by Robert Pendergast attorney for Mrs. Gardner was obliged to give most of her history for the past five years. Mr. Pendergast endeavored to bring out the fact that she was able to work and had worked for the past six years up until a few months ago, but had meanwhile continued to receive support from her mother. Mrs. Whorl stated that she had met her present husband while she was operating a restaurant in New York city, where she had gone with her first husband, Fred Randall, who is now connected with the Franklin Automobile Company of Syracuse. It was brought out that Fred Randall had been awarded the custody of their child, Mary Randall, by the court that issued to him the decree of divorce. The child has continued to live with her mother, however. Mr. Randall has contributed to her support from time to time and Mr. Pendergast stated that he was willing to take her into his home now, but a question to Mrs. Whorl regarding her wishes in the matter was objected to strenuously by Mr. Fanning, and his objection was sustained. Mr. Pendergast stated that the child was evidently a drain upon the resources of her parents and that if she could be supported without any cost to them, it should be done.

Mrs. Whorl testified that she married her present husband in Ohio and had lived with him first at York, Pa., in his mother's home. He was employed irregularly in several hotels there ad then came to this city. He was employed during the summer months by the Stewart company during his stay here but in the winter he found whatever employment he could. Mrs. Whorl admitted that her mother, the defendant, had given her $800 at one time, and had also contributed to her support for the past several years by paying bills, and advancing cash whenever it was needed, and buying clothing. Mr. Pendergast brought out that Mrs. Whorl was an ardent "movie" attendant and that she had gone to the theatres several times a week since she has been under the care of the city. Mrs. Whorl stated that some one else had always paid her way.

Wanted to Drop Case

The statement of Edward Whorl to the effect that Mrs. Gardner had offered him $50 and $5 weekly for ten weeks if he would leave the city with his wife and household goods before the case came to trial was corroborated by Mrs. Whorl, who added further that Mrs. Gardner had cautioned them to get out of the state and had advanced $55 as a first installment of the $50. Mr. Pendergast succeeded in getting Mrs. Whorl to admit that she was ready to go and had even called up the Commissioner of Charities in an attempt to have the case dropped.

Mrs. Whorl denied making a statement to her mother that she would throw herself on the town if Mrs. Gardner did not immediately convey the house in which she lived to her daughter and also give her cash. Mrs. Whorl insisted that everything that her mother did for her was done without solicitatio, and that she had not given her any groceries during the past few months except a little piece of lard. Mrs. Whorl said that she had not paid any grocery bills but that she had heard that Mrs. Gardner had paid them for her.

Both Mr. Pendergast and Mr. Fanning had great difficulty in confining

ROSOFF GETS BIG CONTRACT

He Will Build Eleven Miles of State Road Near Walden —Cost $155,000

S. Rosoff, the contractor in charge of the work of filling the old canal bed here received a notice by wire Saturday night that he had been awarded a contract for 11 miles of state road in Delaware county, near the town of Walden. Mr. Rosoff's figure was $155,000 and the contract is the largest piece of road work that has been given out this year.

The specifications call for an excavation of 110,000 yards of earth and the road will be built of bituminous macadam. The length of the stretch will necessitate the purchase of vehicles for inspectors and Mr. Rosoff has already given an order to a local motorcycle dealer for two motorcycles, which will be delivered immediately. 200 men will be employed in the work and as soon as the contract here is completed the men working here will be offered work on the Walden contract. Although the work here will not be finished for two months at the earliest. Mr. Rosoff will begin work on the Walden contract immediately and ground will be broken tomorrow.

ROYAL NEIGHBORS

The Royal Neighbors will meet at Woodmen's Hall tonight. Important business is to come before the meeting and the president announces a fine will be imposed upo any member not present.

Boys and Girls at Communion

Fifty little boys and girls received their first Holy Communion at the Church of the Immaculate Conception yesterday at the 8 o'clock mass, at which Father Dooling was the celebrant. Father Dooling, assisted by Fater Lindsman officiated in the communion service. The little people were seated in the center aisle of the church and marched to the altar rail in a body. The little girls were dressed in white and the boys wore darks suits with a white ribbon on the right arm and the spectacle was a most ispiring one.

Father Dooling preached the sermon, in the course of which be gave the children some good advice and urged that they should always remain innocent and pleasing to God as they were yesterday. He advised the children to receive the sacraments frequently as that was one of the best aids to a holy life.

At the 10.30 mass, Father Lindsman officiated and the choir under the direction of Frederic Kenyon, the organist, redered special music. Father Lindsman i his sermon described the descent of the Holy Ghost upon the Apostles on the first Pentecost Sunday and spoke of the assistance and of the strength received by the Apostles through the help of God's grace. He urged his hearers to pray for grace ad to live in such a manner that their spirits were always strong in faith.

At 3.30 in the afternoon a vesper service was held, followed by benediction of the Blessed Sacrament.

WEATHER FORECAST

Unsettled weather tonight and Tuesday; moderate shifting winds.

Jitney Arrives--Down-to-the-Minute

A sure-enough jitney bus is Fulton's latest representative in the transportation world and no longer will the weary pedestrain have to walk into those sections as yet untraversed by the trolley line. The bus made its appearance on the "back line" at the New York Central station yesterday and of course, created an unfavorable impression immediately among the taxi owners who foresee a cut in profits by the competition. O. L. Warner is te manager of the bus and will drive it, but the car is owned by an Oswego man.

Warner stated last night that the bus will be at the service of persons who desire to take longt rips and will also be put into commission on a regular schedule between the city and Pathfinder Island, when the activities of the club commence. Although no definite schedule has been arranged as yet, it is probable that the bus will also make a trip from Oneida st. and 7th across the lower bridge and at Broadway and West 1st st. at regular intervals. The bus will return via 4th st. Cayuga and Oneida to 7th st.

The machine is modern and will accommodate twelve people comfortably. Baseball teams making long trips and outing and picnic parties will probably find its services desirable.

MRS. JONES DISCHARGED FROM BANKRUPTCY

U. S. Judge Ray has discharged from bankruptcy Nellie A. Jones of Fulton. The bankrupt entered bankruptcy owing $12,569 and having assets of $9,500. She is now free from all debts contracted previous to the time of her entry into the bankruptcy court.

Orders for the discharge of Ernest S. Manwaring of Oswego, and a number of other bankrupts were also filed in United States court at Utica.

Steamer Line Proves Popular

The steamer City of Fulton, Captain Burleigh, which began a regular schedule between this city and Syracuse with stops along the line, last Monday, closed its first week of business Saturday and according to Captain Burleigh the line has met with more support than he anticipated. The boat has made the down trip every day on schedule time and with a good cargo and on the return trip from Syracuse has been taxed to its capacity on several occasions. The merchants were quick to take advantage of the low freight rates and the quick service of the line has also been a point in its favor. The steamer leaves here early in the morning and ties up again at the Rochester St. pier at 7 at night.

Captain Burleigh reports a great deal of traffic through the canal especially farther down the line. The locks are in fine working order and the skipper predicts a rush of summer pleasure boat traffic through the canal as soon as the summer season opens.

Business and the Crops

"Winter lingering chills the lap of May." Cold, rains and drizzle do not stimulate the demand for spring and summer goods—but it is fine for the growing crops on which the trade largely depend. Remember the old couplet—

"A cold wet May
Fills the barn with corn and hay."

The "crop killers" are busy as usual at this season telling of alleged ravages by the Hessian fly, the chinch bug and other insect pests. Not infrequently these reports serve the purposes of speculators in Wall st. or in the Chicago grain pit, but the disinterested citizen should not take them too seriously.

It is not necessary to "go to the bugs" to explain a further rise yesterday of two cents a bushel in contracts for wheat to be delivered from the next crop. Exports of the cereal are still averaging more than a million bushels a day and shipments for the last week of 1,200,000 bushels of corn, asa gainst less than 30,000 bushels in the corresponding week last year, account for the rist and help to explain the enormous and increasing credit balance of this country in account with the Old World.—New York Herald.

A Wonderful Man

A man who will resign from a $5,000 government job in which he has scarcely any work to do is either honest or an egoist. He either wants to do the square thing by his country, or he desires notoriety. The odds are far and away in favor of his being honest. Such a man is City Chamberlain Bruere of New York city,who has handed up a report to Mayor Mitchel, advocating the abolition of the office he holds. He finds that the few duties which he has to perform as Chamberlain may be carried on easily by some other official. This man Bruere in 11 months has increased the interest from banks which have city deposits by $114,000, which to most minds would be sufficient excuse for maintaining the place. Still, the stubborn fact remains that other city officials could do this without materially lessening their efficiency at their regular task. Bruere is an exceptional man. If he is earnest, he is just the kind of man people ought to send to the Legislature and elect to office. A government service of such men would save that $1,000,000 a day that Senator Aldrich told about, and some more millions in State and city administrations. However, we are cynical enough to expect that jobs and expenses will go on as they have been doing. Brueres are not born every day.—Utica Observer.

Phosphate for lawns and gardens. Van Wagenen Inc. adv133

The June American Magazine

In the June American Magazine Ellis Parker Butler tells an exceedingly funny boy's story. It is entitled. "The Son and Father Movement." and it narrates the amusing adventures which a father had with mosquitoes, and other physical discomforts, when he decided to spend the night with his small son in order to keep on intimate friendly terms with the lal. The climax of the story produces a big laugh. Other fiction is contributed by Walter Prichard Eaton, who tells the first of a new series of love stories; Rebecca Hooper Eastman, whose story is entitled "Their Second Meeting"; David Grayson, who goes on with his serial "Hempfield"; and George Fitch, who writes a love story of 1921 entitled, "Cupid vs. Geography."

Ida M. Tarbell contributes another article in her business series entitled "The Golden Rule in Business"; Margaret Anglin writes a narrative of personal stage adventures including experiences with many celebrites, the title of her article being. "The Ambitions of an Altress"; a Jew contributes an autobiographical article entitled, "What It Means to Be a Jew"; Ring W. Lardner writes another amusing baseball article, descriptive of Ty Cobb, the famous Detroit player whom he calls the greatest baseball player in the world; Ernest Poole writes a war article in which he gives extraordinary first-hand glimpses of the Germans, and Hugh S. Fullerton writes entertainingly under the title, "How Women Voted in Chicago."

Humorous contributions are made by James Montgomery Flagg and Edwin L. Sabin. The latter describes "A Cold in the Head." Interesting People department contains five short stories and some wonderful portraits.

The prize-winning letters in the contest, "The Meanest Thing I Ever Did," complete an issue of rare liveliness and entertainment.

"ES EST VORBOTTEN"

The above significant caption greets the eye here there and everywhere in village, town and hamlet in the German Empire. Translated, it means, "It is forbidden." In Germany there are many things forbidden. In American villages, towns and cities also there are upon the pages of law books many things forbidden. The difference between placarding public places with the caption of this article and having upon books of law a list of things forbidden lies in finding a way to do and in doing what we find to do. The German is noted for finding a way to do things and then doing them. He does not think an excuse weighs as much as a result.

In American communities "Es Est Vorbotten" to place in a receptacle that is not airtight and watertight any garbage or other decaying refuse, yet do we see without molestation the casting upon heaps in the rear of a lot matter in process of decay that is not only offensive to the eye, but a source of annoyance and infection to an entire neighborhood.

"Es Est Vorbotten" to neglect cesspools and privies yet there are people who keep scrupulously clean their own premises and suffer in silence the result of the neglect of their neighbor.

"Es Est Vorbotten" to expose milk to the rays of the sun, yet it is next to impossible for a complainant to secure a verdict against a milk dealer who dares to defy even the rules of common sense by filling upon the public highway his milk bottles.

"Es Est Vorbotten" to keep within the city limits chickens, yet one may secure special permission for so doing by making application to the proper officer.

Es Est Vorbotten" to expectorate upon sidewalks, etc., yet one gets the impression at times that even in this matter special license is given.

"Es Est Vorbotten" to cast, throw, eject or deposit any loose waste papers, bills, advertisements, upon any public street, alleyway, lawn or lane within the city limits.

"Es Est Vorbotten" that a newsboy shall throw upon the streets a page or pages, or a wrapper from the material he is vending, yet there must be a special license for the householder who dares to defy all regulations by allowing the wrappings of household goods to be blown here and there at the will o' the wind, to litter the streets and to annoy the owners of green lawns and yards. If newsboys are forbidden to cast upon the streets papers and wrappings of the Sunday newspapers, why are so many of us allowed to throw into backyards, alleys and elsewhere, hay, straw, excelsior, old papers, etc.

Why overlook the many real causes for a town littered with objectionable matter? If our sanitary codes find for us a way to do things, why indeed, look for an excuse for not having clean, orderly villages, towns and cities.

POLITICAL VIEWPOINTS

Politicians divert attention from the evil effects of the spoils system by exploiting new theories of government and new-fangled methods of reform. Nevertheless, the chief consideration of the American people is the prosperity of the nation which in its essence revolves around the pocketbook, the dinner pail and the pay envelope. When these are full they constitute the most eloquent argument in favor of the party in power. When empty, they are the party's strongest rebuke.—Leslie's Weekly.

One of the New Republican state officials suggests to Governor Whitman that an item in the supply bill for repairing and rebuilding an automobile in his department be vetoed, and that if an auto is considered necessary a less expensive machine be secured. With what surprise must a Tammany man look upon such recommendations!—Troy Times.

Not only in the amount Gov. Whitman is saving from the appropriations of next year, but in the example he is setting pointing to a better financial system for the future is he doing the people the greatest service.—Watertown.

Governor Whitman himself is the sixth and final check upon appropriations this year. He will not only satisfy himself in regard to the necessity of every item in the bills, but also invites taxpayers to look them over and to call attention to any that may seem necessary.

After all this, if anything remains in the appropriations that does not belong there or that might well be cut out, it will be a wonder.—Batavia News.

Governor Whitman's first hearing on the appropriation bills resulted in the probable saving of more than $70,000. The governor thinks that he can cut at least $1,000,000 out of the appropriation bills, which total about $64,000,000. Good workd On Monday the Governor signed the bill providing for the $27,000,000 canal referendum. That is a proposition which should be approved by the people.—Buffalo Express.

Governor Whitman and the present legislature are confronted by the unpleasant task of righting wrongs that were perpetrated by a prreceding administration. If thep rorcess is necessarily burdensome, that does not obscure the fact that it is right and just and the blamem ust attach, not to the one who applies the remedy, but to the one, rather, who is responsible for the disease.—Gloversville Leader-Republican.

Assemblyman Alfred E. Smith has been making a red-hot speech in New York in protest against continuing the present Constitutional provision that no two adjoining counties shall ever control the Legislature. "Putnam County," hes ays, "gets a legislator for its 8,000; I represent 63,000. The votes in Albany are all the same. Can you justify that. You can't unless you are a country legislator." Mr. Smith seems to be completely out of touch with the genius of our institutions. He forgets that Rhode Island has as many United States Senators as New York. He overlooks the fact that the great aim of a free Government is to prevent majorities from oppressing minorities. Even if all of us who are so unfortunate as to live elsewhere than on Manhattan Island are mere "hayseeds." we have some rights, and no new Constitution is going to take them away from us.—Kingston Freeman.

Suffragists Will Sleep With One Eye on Albany Until the Constitutional Delegates Decide Fate of Suffrage Amendment.

Keeping up with suffrage is a strenuous occupation that grows more strenuous as each day brings the Woman Suffrage amendment nearer to Nov. 2, which will be "suffrage day at the polls." As if suffragists didn't have enough to do in conducting the educational and political campaigns always necessary to keep any issue foremost in the minds of voters, along comes the constitutional convention with all sorts of possibilities up its sleeve.

One of the leaders of the woman movement, who is most deeply interested in the deliberations of the convention and most acutely alive to the whole political situation, is Mrs. Norman de R. Whitehouse, chairman of the publicity council of the Empire State Campaign Committee For Woman Suffrage. Mrs. Whitehouse says frankly that she does not assume to comprehend the intricacies of constitutional law and precedent involved in the present crisis. What she does comprehend is that no matter how fair-minded the members of the convention may be, no matter how honorable their intentions, there are pitfalls to be watched lest suffrage be ditched, and precautions to be insisted on lest suffrage be overlooked.

"Part of the complication, of course," she reminds you, "grows out of the fact that the constitution now in force provides that if two amendments on the same subject are submitted to the voters, one coming from the legislature and one from the constitutional convention, the one submitted by the convention supersedes the one submitted by the legislature."

MRS. NORMAN DE R. WHITEHOUSE.

For instance, it is said that there is apt to be some minor amendment proposed, changing the length of residence in a district now required of a voter. In that case such amendment, innocent as it seems, would knock the woman suffrage amendment into a cocked hat. Even if both carried, the woman suffrage amendment would be void, because it wouldn't be the one submitted by the convention.

Two convention delegates have come to the rescue, one with a resolution, the other with an amendment. One is Herbert Parsons; the other is Louis Marshall. Mr. Parsons' plan is under fire, because resolutions are not in order in this convention, according to expert opinion. Mr. Marshall's amendment provides that if the legislature's woman suffrage amendment be ratified at the polls it shall be construed as a part of the constitution, whether the voters decide for the old constitution or for the new one submitted by the convention.

"Prominent members of the convention, suffragists and anti-suffragists alike," says Mrs. Whitehouse, "assure us that some action, not yet determined, will be taken to insure a clean cut decision binding on the new constitution. Senator Root advises us to go home and devote our attention exclusively to the voters and trust the convention to take care of our interests.

"Well, we accept the assurances and go home Next morning come reports that a new amendment has been offered requiring that an amendment to enfranchise a class must be re-approved by a majority of that class, after the voters have accepted it. That is just a scheme to defer the coming of suffrage. Of course the women would vote it in when it got to them, but meantime we are kept waiting just that much longer for the ballot. Besides to require a majority of all of a certain class to vote on any constitutional amendment is a burden against which all campaign leaders rightly protest. The constitutional convention itself is sitting by the grace of the decision of just 16 per cent of the voters of New York state."

This is the literal truth. Eighty-four per cent of the men of New York did not care enough about a constitution to vote whether the Empire State should have a constitutional convention or not. Of the 16 per cent who (in the aggregate) voted for the convention. A little less than 8 per cent voted against it. Eighty-four out of every one hundred men stayed at home and plowed or kept shop!

"Who knows what new amendment, directly or indirectly affecting suffrage will be introduced from one day to another?" asks Mrs. Whitehouse. "The friends of suffrage in the convention will do what they can, no doubt, but their attention is given to many things. The attention of the suffragists is concentrated. Just as a devoted but inexperienced mother feels she can care for her own child better than any professional nurse, so the suffragists feel that they, as well as friendly statesmen and fair-minded foes, must watch the action of the constitutional convention.

"Certainly the convention situation adds greatly to the stress and anxieties of a campaign that was already anxious and stressful enough. Now and then anti-suffragists make a division of labor between the sexes and classify voting as 'men's work.' Voting is not work. It should never in this world be set over in any such classification. Voting is the more significant matter of voicing opinion as to the conditions under which all classifications of work shall be done. But trying to get the vote is work and hard work, such hard work that it is not much wonder that suffragists yearn for the actual 'burden of the ballot'—yearn for that more leisured time ahead when dropping a bit of paper into a ballot box will take the place of the endless canvassing and street meetings and mass meetings and suffrage teas and baseball games and parades and suffrage shops and lunch rooms and publicity schemes which today are required of women in order to convince the public that suffrage has got to come."

SUFFRAGE DAY ON THE DIAMOND.

Society Turns Out In Force to See Giants and Cubs Play Ball.

Suffragists swarmed into the Polo Grounds on May 18 to see the battle between the Giants and the Cubs. It was "Suffrage day on the diamond," by arangement with the New York Baseball Club. For weeks suffrage fans had been in training trying to master the fine points of the game from the viewpoint of baseball fans. If the result left something to be desired, especially in the way of a baseball vocabulary, the fusion of suffrage and baseball interests certainly resulted in a great turnout for the game on suffrage day. Society, headed by Mrs. John Jacob Astor, was there in force. Mrs. Bourke Cockran, who used to captain a baseball nine herself when her hair hung down her back in a pigtail, had a box full of friends, to whom she explained the game with the finesse of Ty Cobb. Mrs. Richard Derby, she who was Ethel Roosevelt, was another interested box hostess. In fact, from tip to tip the big horseshoe of boxes looked not unlike the other big horseshoe on opening night at the Metropolitan in so far as well known people were concerned.

The suffragists had offered $5 a run to Giants and Cubs alike, so that interest in the outcome was pecuniary as well as aesthetic. Only one man, Schulte of the Chicago team, made any inroad on the suffrage strong box Before the game ended, however, so many suffrage fans had evolved into perfectly good baseball fans that there were reckless promises of $10, $25—any old number of dollars—to the Giant who would save the day for little old New York.

"Well, it's over," said one suffragist who had been actively identified with the "big stunt" of getting suffrage out on the diamond, "and I believe that in the result suffrage fans know more about baseball and baseball fans know more about suffrage. Anyway, life is going to be a lot simpler for me now that I am off the job of trying to make women talk baseball intelligently."

SUFFRAGE CAMPAIGN FUND.

More Than Committee Asked Pledged In One Afternoon.

The suffrage luncheon given at the Astor hotel, New York city, in May by the Empire State campaign committee was attended by 1,400 men and women. Governor Whitman was not able to be present, but Mrs. Catt, who presided, introduced Mrs. Whitman as the "first lady of the state." After stirring speeches by Granville Barker Dr. Anna Howard Shaw and Dudley Field Malone Mrs. Catt told the guests that the campaign fund must be brought up to $150,000.

At the great mass meeting at Carnegie hall last November $105,000 was raised, and $10,000 had been pledged on condition that the fund reach $140,000 by May 15. So it was obviously necessary to raise $35,000 that afternoon. The pledges kept pouring in until $50,000 had been added to the fund—$10,000 more than the high water mark asked for by the committee.

Mrs. Catt referred to the fact that the committee was accused of raising this sum to buy votes and added, "We need 900,000 votes, and with $150,000 we could give 24 cents apiece for them." She also took that occasion to deny the story recently published in the papers that within a month the Leslie bequest would be available for suffrage work. Many suffragists have felt that their hard earned dollars would not be needed when this sum which the papers say equals $1,500,000 was turned over. Mrs. Catt said that even if Mrs Leslie's will were eventually respected there was no hope that a dollar of the estate would be paid in until long after election.

VOTE IN AMERICA

Mrs. Catt Discovers Her In an Old Time New Yorker.

This is the season of county conventions for suffrage campaigners, who are organized by assembly districts along the lines followed by political parties. Chairmen of the campaign districts, which follow roughly the lines of the judicial districts, are rounding up their workers, county by county, and campaign officers are being elected in preparation for an arduous summer and fall campaign.

Mrs. Carrie Chapman Catt, who as president of the International Woman Suffrage Alliance guides the struggle for the women of twenty-six nations, as chairman of the Empire State campaign committee likewise guides the women of New York state in their suffrage activities. For weeks she has been on tour, going from one county convention to another, establishing schools for women watchers at the polls, heartening the local workers and welding them into closer organization. At the Rochester convention she took time to say that everywhere she found New York women fired with the ambition to become voters. "This ambition is a direct inheritance for women New Yorkers," said Mrs. Catt and straightway fell into one of her story telling moods.

"It is perhaps not so generally known as it might be that the first white woman to vote in America was a New Yorker. Her name was Lady Deborah Moody. Her voting was not extensive, but it was at least equal to that permitted to any man in the colony.

"In 1632 she was left a widow with one son. In 1640 she sailed for America and purchased a farm in Massachusetts. Evidently she was not possessed of a large store of worldly goods since a contemporary wrote of her, 'She is a good lady, but almost undone by buying Master Humphries' farm.' Possibly she was quite 'undone' later, since in 1642 she removed to New York and settled at Hempstead. However, in the year previous her Salem

CARRIE CHAPMAN CATT.

church had called her to task for holding 'that baptism of infants was no ordinance of God,' and history records that she came to New York in order to secure religious liberty.

"Liberty of worship she undoubtedly found, but she had literally jumped from the proverbial frying pan into the fire, as an Indian war was raging on Long Island. One day her house was completely surrounded by a large band of natives brandishing their battleaxes. She managed to disperse them, but for many months she lived, as did her neighbors, in constant dread of unexpected treachery. Lady Moody's voice was always heard at the councils continually called to consider problems of the war, and it was largely due to her wisdom and management that peace was finally restored.

"So bravely did she repel attacks of the Indians during the war that Kieft, the Dutch director general, gave to 'ye honored Lady Deborah Moody,' her heirs and two others a patent for the great tract of land now covered by the town of Gravesend, and there she lived until her death.

"It so happened that in the year 1655 Gravesend had neglected to make its usual nomination of officers to Director Stuyvesant, then the head of the colony. In consequence he wrote to Lady Moody, the oldest patentee of the town, and to two other inhabitants, asking them 'to perform the duty as required by their patent.' A month later the nominations were sent in a document signed by Deborah Moody and John Tillton 'in behalf of the rest.' Had it not been for this incident the fact that Lady Moody performed the same political obligations as the men of the colony would never have been known. For how many years she possessed the right and whether there were other women patentees similarly privileged the inadequate records of the times do not reveal.

"From all which it will be seen that whoever the woman who gets to the polls first at the first election after the longed for suffrage victory Nov. 2 it will not be possible for her to claim the proud distinction of being New York's first woman voter. Lady Moody beat all comers by 250 years."

AMERICAN LEGION GETS BIG RUSH AS RESULT OF PATRIOTIC FERVOR

Enrollment of Members In "Ready For National Defense" Body Trebles Within a Week.

Aim of Great Organization Is to Register All Able to Aid Country In Hour of Its Need.

RECENT events have made matters hum in the offices of the American legion. Since May 7 the number of citizens seeking membership has more than trebled. Hundreds of applications pour in by every mail, Secretary John E. Hausmann says.

"The objects of the American legion are now becoming more generally understood and appreciated," said Dr. Hausmann in an interview. "We are not seeking to keep men who are able to do so from joining the United States army or navy or the militia of their state. We are not a substitute for those forces.

"Those forces form the nation's first line of defense. We shall not prevent one solitary man from joining the national guard if he can. Our purpose is to make possible the nation's second line and maybe also the third line of defense and by the simplest form of organization to make it immediately available should the country have need to call upon it.

Is Not Militarism.

"We do not believe in militarism, but we do believe in being able to defend ourselves if attacked.

"The aim of the American legion is the accumulation of such data as to the available civilian material in the country as would be of value should the country have to face a serious emergency—such data as is not collected under any law, such data as in a nation like ours is perhaps best collected voluntarily and such as, in the event of a national crisis involving the ne-

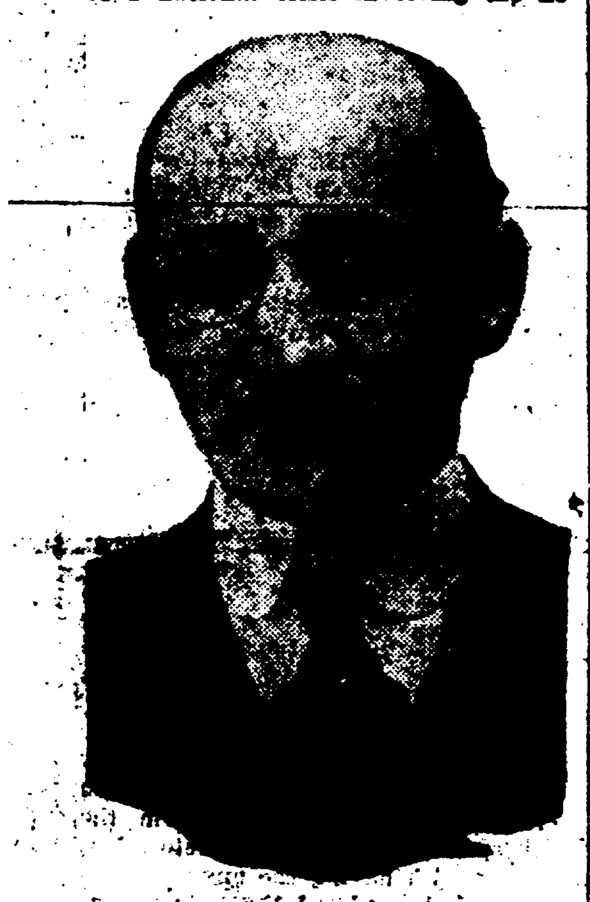

Photo by American Press Association.

DR. JOHN E. HAUSMANN, SECRETARY OF THE AMERICAN LEGION.

cessity of a call to arms, would furnish the means of swift and efficient organization. This is very different from militarism and really prevents militarism in all its objectionable forms.

"When the birth of the legion was announced two months ago an impetuous public jumped to the conclusion that it was to be a mighty fighting organization of armed, uniformed and regularly drilled men. Such is not the case. The members of the legion are not armed, have no uniform except a small button and no military exercises are provided for their training.

"All the legion seeks to be is a well organized, well managed, thoroughly reliable bureau of information, ready to supply at a moment's notice just such information as the government of the United States would need if suddenly called upon to back up its authority with force of arms. To enable the immediate location of the men who will be needed, such men as expert merchant navigators, chauffeurs, railroad engineers and firemen, telegraph operators, aviators, civil, electrical and mechanical engineers, experts in explosives, cooks, bakers, horsemen, blacksmiths, mule packers and men in other vocations whose services will be needed and needed quick; it is in that the American legion expects to prove its value in a possible time of trouble.

May Form Rifle Clubs.

"Locally the members may form rifle clubs and that sort of thing. That will be in their own discretion. There can be no doubt that the fact of membership in the legion will inspire Americans to have regard to their direct usefulness to the state and their ideals in the event of danger.

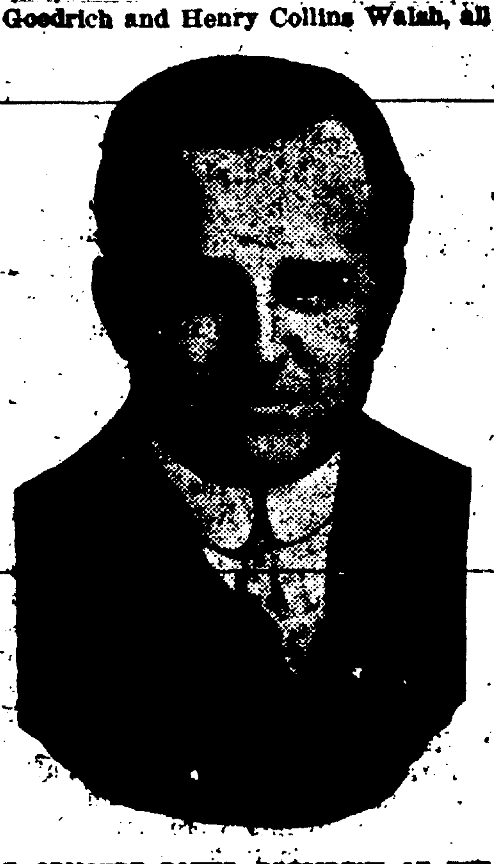
"Many dangers are possible. It must not be forgotten that when the war in Europe is over the European nations, particularly the victors, will be much stronger than before. We know that the United States was never so strong as at the close of the civil war. Then we had a great army of men who had had actual experience of war. So it will be with the powers in Europe. This circumstance ought not to be lost sight of.

"The amazing growth of the American legion shows that the idea and its efficiency have at once struck the fancy of the nation. In the two months of our existence we have been enrolling members at the rate of something like a thousand a day, and we have some of the leading men of the country at our head.

"Two ex-presidents of the United States, Colonel Roosevelt and William Taft; three ex-secretaries of war, Jacob M. Dickinson, Henry L. Stimson and Luke E. Wright; three ex-secretaries of the navy, Charles J. Bonaparte, George von L. Meyer and Truman H. Newberry; one ex-secretary of state, Elihu Root; one ex-attorney general, George W. Wickersham, and many other statesmen of note are on the council of the legion. Among them are Joseph H. Choate and Senator Henry Cabot Lodge.

Other Prominent Members.

"Other prominent men on the council of three hundred are Morgan J. O'Brien, Frederic R. Coudert, John G. Milburn, William T. Hornaday, William Barclay Parsons, Ernst Iselin and J. Mayhew Wainwright, Robert P. Perkins, Alexander S. Cochran, David M. Goodrich and Henry Collins Walsh, all



E. ORMONDE POWER, PRESIDENT OF THE COUNCIL OF THE AMERICAN LEGION.

of New York; Howard Elliott of Massachusetts, Nicholas Longworth of Cincinnati, William Allen White of Kansas, Harry P. Judson and Medill McCormick of Chicago, Frederick M. Alger of Michigan, Colonel Alexander R. Lawton of Georgia, and Crittenden Marriott of Washington.

"California is represented by Milton Esberg and R. M. Tobin of San Francisco, George B. Harrison of Sacramento, J. B. Miller of Los Angeles and Chester H. Rowell of Fresno; Connecticut by Carl M. Chapin of Waterbury, Indiana by William Dudley Foulke of Richmond, Minnesota by W. J. Dean of St. Paul, Nebraska by John G. Maher of Lincoln, New Jersey by Robert C. Maxwell of Trenton, and Tennessee by Hapsburg Liebe of Johnson City.

"The directors and officers are E. Ormonde Power, president; Julien T. Davies, Jr., vice president; Henry Rogers Winthrop, treasurer; Alexander M. White, Theodore Roosevelt, Jr., and Arthur S. Hoffman.

Men Sorted by Talents.

"No man already serving in the United States army, navy or marine corps or in the national guard of any of the states is eligible for membership until his resignation or honorable discharge. What we want are the men who have had military experience or who are qualified by some technical training that would be of service to the country in wartime. We have classified the eligible under seventy-two distinct heads.

"We are sorting out our men according to their various talents and will classify them so that they can be assigned to the jobs they can best perform. It is a waste of time to train a man to fix insulators on a telephone pole after war breaks out when in the infantry, struggling with a spade or rifle, is a man who in civilian life was a lineman, skilled and experienced by years of service. It would be a misfit to put a bank president to scouting, when he can serve better in the quartermaster's department, and to put an inexperienced boy to keeping accounts when his very blood tingles to get on a motorcycle and scout about the enemy's lines. 'Every man in the job for which he is best fitted' is the idea of the American legion.

"By means of membership in the American legion men give exact information which shows precisely what job they can best fill in wartime, all this being recorded in a great card index system.

"Advice of experts was obtained as to the best method of compiling and indexing this information, and the card cross index system established is such that if at any time the legion should receive from the government a call as to the availability of a given number of chauffeurs, aviators or men of any

---

other special vocation it could immediately respond to that call, giving names, addresses and exact qualifications of the number of men required.

"The idea of the American legion arose from a suggestion made early last summer by E. D. Cook, a young American adventurer, who was in Costa Rica and wrote to Arthur S. Hoffman saying:

"'My belief is that some time within the next ten years the United States may find herself in a man sized fight. I vote that all of us who are drifting around and who would volunteer to fight for our country when the need came should begin right now to form some sort of organization so that when something turns up we should be ready to volunteer in a body.'

"Mr. Hoffman published the letter in his magazine. So many men responded that General Leonard Wood was consulted quite unofficially as to the value of the notion, and then on March 6 the American legion was incorporated under the laws of New York state. The first meeting was held March 11.

"Curiously enough, since the receipt of his letter we have never heard from E. D. Cook, and we fancy he probably has been killed fighting in Mexico or maybe in Europe.

No Politics In Legion.

"There is no politics in our legion and no menace to peace. Although many branches may be formed, all applications for membership have to come to national headquarters in the Maritime building, 10 Bridge street, New York city.

"On acceptance members sign an agreement pledging them to the following obligations:

"'To report to the secretary of the legion, by letter or postcard, four times

ALEXANDER M. WHITE, ONE OF THE DIRECTORS OF THE AMERICAN LEGION.

a year, on the first days of January, April, July and October, giving my serial number in the legion and my permanent address in full at that time.

"'To notify the secretary promptly of change of permanent address between these dates.

"'To pay the annual dues of 25 cents on the 1st of January of each year.

"'To wear the insignia of the American legion, to hold it in respect and to do my best to persuade others who can be of service to our country to enrol in the legion.' The insignia consists of an enameled button, a blue star on a white field, on the outer edge of which is a red circle.

"There may be a difference of opinion as to the extent of preparation necessary for our national defense. There should be but one opinion as to the wisdom of lessening our present unpreparedness. No more conservative step in the direction of advance preparation than that advocated by the legion has yet been devised.

No Government Records.

"President Wilson has said that the United States in case of war must depend chiefly upon a 'citizenry trained and accustomed to arms.' But the government has no record of the present addresses and qualifications of its honorably discharged soldiers, sailors and marines, nor has it information of available men trained in the various occupations essential to the conduct of modern war.

"The work of the legion should therefore appeal to all American citizens, and it is earnestly hoped it will receive their active support and assistance in the attainment of the objects for which it was formed."

The National Security league in a statement just issued says:

"All those who have seen service in the regular army, as volunteers or in the national guard maneuvers, might well join the American legion. The American legion, which the National Security league has heartily indorsed, is recruited from past enlisted men in the army, navy or militia, as well as other special classes of citizens, such as telegraph operators, engineers, and the like, whose services would be useful to an army actually in the field."

CANADA IS DEAD

Spent Most of Life Ridding West of Robbers.

PUT END TO TRAIN HOLDUPS

Old Soldier, Most Famous Fighter In Battle of Civilization In Frontier Days on Plains, Wiped Out Many Gangs of Bandits Who Terrorized Union Pacific Road.

Bill Canada, professional outlaw hunter, the man who cleared the country between the Missouri river and the Salt Lake valley of train robbers and road men, and instilled such fear into the only two leaders remaining alive that for ten years they have been in Chile, afraid to come back, has just died peacefully at his home in Omaha, Neb.

For thirty years Canada fought the battle of civilization on the western plains, and with his death one of the most picturesque characters of frontier days is removed.

Canada went west immediately after the civil war, when he was eighteen years old. He was born in Kentucky, where the Tennessee river goes into the Ohio. He served in the Third Kentucky Confederate infantry, being promoted for bravery on the field of battle.

Cutthroats Infested Land.

When he got into the trans-Missouri country in 1866 he found a chaotic condition. The gold fever was at its height, and bands of outlaws and cutthroats infested the land.

The first transcontinental railroad was in course of construction. When it was completed thousands of rough characters found themselves out of work and ready for any venture that promised excitement and big pay.

After his arrival in the West Canada had been lumber salesman, mule driver, freighter, surveyor, sheriff and half a dozen other things. One day he was invited to a conference with the heads of the Union Pacific at Omaha.

"Just stop the holdups," General Manager Ed Dickson told him.

That was the beginning of the famous "bandit hunters," a body of twelve, every one a gun fighter. As horsemen they had no superiors. Their nerve was tested time after time and never found lacking. Cheyenne, Wyo., was their headquarters.

A special train, consisting of a sleeping car, a baggage car fitted with stalls for horses and another car used as a dining and telegraph car, was prepared for their use. Their horses could outrun anything on the plains. The riders could outshoot anything in the mountains.

Special Train Held Ready.

The arrangements were complete and perfect. Within fifteen minutes after a call for help was received at Cheyenne the special train, with the fighting men, their horses and their telegraph operator, could be en route to the scene of trouble.

The outlaw leaders of the Hole-in-the-Wall country, the Robbers' Roost and Hell's Acre looked upon the bandit hunters as a personal challenge. They were not men to permit a "defi" to pass.

Scarcely had Canada's men got used to their mounts when Flat Nose George Curry and five of his gang from the Hole-in-the-Wall swung a red lantern before the Overland Limited as it whizzed through the Red desert in central Wyoming one night. The limited stopped. The express and locomotive were detached and sent down the track a short way. The Pacific Express safe was dynamited, the passengers robbed and everything of value taken. Then the gang rode leisurely off toward the south. They simply were defying Bill Canada's outfit to come and get them.

The bandit hunters came. The engineer of the train ran his locomotive to the next station and notified Cheyenne. In a quarter of an hour the bandit hunters' special was speeding westward with a clear track.

At daylight the special arrived at the scene of the robbery, and a few minutes later a band of eight men were riding south on the trail of Flat Nose George. The chase lasted three days and extended over many miles.

Six Graves Mark Trail.

There is a grave at intervals along that trail. There are six such graves in all. The eight bandit hunters returned to their train. Several wore bandages. But they had vindicated Bill Canada's ideas on outlaw hunting.

Of the several brothers in the Curry family Lonny Curry was one. He wanted to get even for the death of George. So, accompanied by a bunch of his outlaw friends, he held up the Pacific express, near Tipton, Wyo. He had ambuscades arranged at different points along his line of retreat and into these he hoped to draw Bill Canada and his bandit hunters.

But among Canada's fighters there were past masters in the art of trailing. Forty-eight hours after the hold-up Lonny Curry had joined his brother. "Didn't get his hands up quick enough," said the coroner's jury. The one inquest did for the entire gang.

Two Mexican desperadoes held up a Union Pacific train near Hugeton, Colo., killed one passenger, robbed the others and escaped. Canada's bandit hunters got after them, rounded them He had a gun in each hand and evidently intended shooting his way to liberty. He was dead when his feet touched the ground, and examination showed ten bullets, any one fatal, had hit him. The other robber, seeing the fate of his companion, stood in a window when the flames got too hot, fired a bullet into his own brain and fell back into the fire. Neither was ever identified.

And so it went. Gang after gang met the bandit hunters. Leader after leader tried his hand against Canada. The result was always the same. Only two of the old outlaw type robbed a Union Pacific train and lived to tell.

Ben Kirkpatrick recovered from half a dozen wounds, spent ten years in a penitentiary and on release went to South America. Harve Logan, half brother of Flat Nose George Curry, after a holdup escaped to Knoxville, Tenn., killed two deputy sheriffs and made his way to Chile, where he joined Kirkpatrick.

They May Now Go Back.

"When Bill Canada dies we are coming back to America," they wrote friends in Wyoming.

And now that Bill Canada is dead they may return.

Another dramatic incident in Canada's career happened at the time of the San Francisco earthquake. When the world gasped in horror and knew nothing but that San Francisco had been destroyed and thousands killed Robert Brown, editor of the Louisville (Ky.) Times, at that time grand exalted ruler of the Elks, put $100,000 in cash in a grip, telegraphed to Bill Canada to meet him at Omaha and started for the stricken city to dispense help to Elks and others.

Canada slipped an automatic pistol in either pocket of his overcoat and for a week guarded Brown in his work. "There was never a moment when I felt uneasiness," said Brown afterward.

WOULD CURB LABOR EQUALLY AS CAPITAL.

Taft Declares Trade Unions Seek to Be Privileged Class.

"Labor and labor unions should be restrained in no less a degree than capital already has been restrained," declared Professor Taft in his speech at the Union League club, Philadelphia.

"The principle of labor unions I entirely support," said the ex-president. "The good they have done for the laboring men of this country I am able to point out and would be glad to elaborate if I had time. Putting the men on an equality with their employers was necessary in order that they should share the prosperity of a rising market and not lose too quickly on a falling market.

"They have brought about legislation of the most useful character that but for their information would not have been written on the statute books. They have exercised an authority not because they are a majority of labor, which they are not, but because they are well organized.

"But they must be restrained that they may not go on to do serious damage to our industrial community. They are seeking to be a privileged class. They are seeking to take themselves out of the operation of general statutes that ought to apply to them.

"We have got to learn, and our politicians have got to learn to be courageous and not be frightened by the threat that when they do not do a thing the labor unions will withdraw their support."

HIS TOKEN OF INDIGNATION.

Silk Man to Fly Flag at Half Mast Till Lusitania Is Avenged.

From an observatory on Garret mountain, overlooking Bella Vista, the beautiful suburban home of Catholina Lambert, millionaire president of a big silk firm at Paterson, N. J., an American flag flies at half mast. It was placed there by Mr. Lambert the night following the Lusitania disaster and will remain there, he says, "until the United States gets some satisfaction for the loss of our fellow citizens' lives."

"I have been a citizen for more than a half century and I boil with indignation when I think of this slaughter," declared the silk manufacturer.

Good Advice.

William—I must speak, but I'm so flurried! James—Bill, collect yourself. —Baltimore American.

Planet Jr. Garden tools and cultivators. Van Wagenen Inc. adv133

Sinking of Lusitania.

"The overwhelming horror of the sinking of the Lusitania," says L. Hollingsworth Wood, secretary of the American League to Limit Armaments, "has brought the war so close to each one of us as individuals that we can view the logical consequences of following the militarists' idea at closer range than even our newspapers have permitted us to do before.

"Let us be sure to interpret our abhorrence of this frightful deed into constructive action to abolish forever the possibility of its recurrence. Out of the jaws of death in this frightful disaster comes a cruel message which should rouse the American people to a realization of the results of a militaristic policy, where judgment has surrendered to a so called military necessity which knows no law.

"To suspend our judgment is not to minimize our condemnation of an act, but it makes possible a careful judgment of how the action of our country in this time of intense feeling can be made of constructive service to mankind for all time."

As to Jarley.

"That man Jarley is without any exception the most inaccurate man I ever knew," said Dobson. "Tell me, Jones, does he ever get anything right?"

"Oh, yes," replied Jones. "Anything that is left Jarley will always get right."—Judge.

2,065,000 MEN IN THE ITALIAN ARMY

Statistics Show That Naval Fighting Force Is Also Strong.

Rome.—In view of the situation now existing statistics showing the naval and land strength of Italy are interesting. They follow:

Army.

Infantry—Two regiments of grenadiers, 94 of infantry of the line, 12 of bersaglieri or light infantry and 8

© by Pach.

DUKE OF ABRUZZI, COMMANDER IN CHIEF OF ITALIAN NAVY.

of Alpine chasseurs, 61 regiments of mobile militia (corresponding to the German landwehr) and about 400,000 infantry of the territorials (corresponding to the landsturm). Each regiment of the first line has its reserve unit. Total infantry about 1,320,000 men, all mobilized.

Cavalry—Twenty-nine regiments, each with its reserve unit; 31 squadrons of militia, 30,000 territorials; total, about 150,000 men.

Artillery—Twenty-four regiments of field artillery, 1 of horse artillery, 2 regiments of mountain guns, 3 regiments of coast artillery, 3 of garrison artillery, 78 batteries of militia and 100 batteries of territorials; total, about 450,000 men.

Signal corps, engineers, medical corps, commissary, etc., about 145,000 men.

Total forces which may be put in the field, 2,065,000 men.

Navy.

First Squadron—Six Dreadnoughts, 5 mounting 13 12-inch guns apiece and 1 mounting 12 12-inch guns; squadron speed, 22.5 knots.

Ten first class battleships (pre-Dreadnought), 4 mounting 4 10-inch and 8 7.5-inch guns; speed, 22.5 knots; 4 mounting 2 12-inch and 12 8-inch guns; speed 20 knots; 2 mounting 4 12-inch, 4 8-inch and 12 6-inch guns; speed, 20 knots.

Five old battleships of small fighting value, 3 light scout cruisers, about 50 efficient torpedo boat destroyers.

For joint service with both army and navy 14 squadrons of 7 aeroplanes each and 10 dirigibles.

AT A RAPID RATE

Forty Knot Missile Probably Hit and Sunk the Lusitania.

DESCRIPTION OF THE DEVICE

Extreme Range of a Torpedo Is 4,000 Yards, but at 1,000 Yards It Is Much More Effective—Varies In Length From Fourteen to Nineteen Feet and Has Machinery For Guidance.

New York.—The German torpedo or torpedoes that destroyed the Lusitania were fired at a range of not more than 1,000 yards, and the torpedoes themselves probably traveled at a speed in excess of forty knots. The submarine or submarines from which the weapons were discharged were submerged not more than fifteen feet, and they had plenty of time to get the exact range before the torpedoes were discharged. Furthermore, the torpedoes were of the most modern and powerful type and of the highest possible speed.

That is the opinion of many of the American officers, all of whom have closely followed the German submarine activities since the underwater war was started by the Germans several months ago.

The extreme range of a torpedo, it was explained by these officers, is about 4,000 yards, but the evidence to be had indicates that all the German submarine work is being done at short range, perhaps less than 1,000 yards. At the lesser range the speed of the torpedo is greater and the aim correspondingly more accurate. At the 4,000 yard range the speed of a modern torpedo should be between twenty-seven and thirty knots, at 3,000 yards about thirty-two knots and at 2,000 yards between thirty-three and thirty-six knots. At lesser ranges the speed may vary from thirty-five to forty knots.

One of the American officers stated that in Charles W. Domville-Fife's book, entitled "Submarine Engineering of Today," there is a chapter on "The Life of a Torpedo," which describes in understandable language and in a correct way these terrible missiles of war.

"A first class battleship takes the best part of three years to build and may cost anything from $5,000,000 upward," the author writes. "This ponderous ship of war can be sent to the bottom of the sea in but a few minutes if struck by a torpedo.

"The modern torpedo varies in length from fourteen to nineteen feet and weighs up to half a ton. It has an extreme range of 4,000 yards. The blunt nose or 'war head,' as it is called, is the business end of the torpedo and contains the dry and wet guncotton and the fulminate of mercury necessary for the explosion. Behind the explosive head is the air chamber to hold the compressed air by which motive power is furnished. Then we come to the search chamber or 'brain' of the weapon, which contains most marvelous mechanism for directing and controlling the machine. Next comes the engine room and, at the tail of the torpedo, the buoyancy chamber.

"Every one of these little peculiarities indulged in by the torpedo is noted in the history sheet and referred to before the weapon is again fired. By this means all the slight defects can be allowed for and a much more accurate aim obtained. It is the duty of the torpedo lieutenant to make up all the 'history sheets' on a vessel, and he may be almost looked upon as a schoolmaster with a lot of small children to understand and manage. Sometimes, but not often during trials, a torpedo is lost. Perhaps days afterward the truant turns up, either washed ashore or towed in by some fishermen after having torn their nets to pieces.

"A small chamber in the torpedo carries compressed air. This helps to sink it to the required depth after it has entered the water. This air, escaping from the chamber by means of a regulating valve, drives the engine at a high rate of speed, which is almost uniform throughout the trip from the tube to the target. The engines turn two screw propellers at the tail of the torpedo. These revolve on the same axis, but in opposite direction, the object being to give stability to the weapon.

"The steering is effected by vertical rudders, which keep the torpedo in the required direction, while the proper depth in the water—usually from ten to fourteen feet—is maintained by horizontal rudders. The torpedo is kept submerged by means of the balance chamber and is controlled in its steering by the wonderful instrument known as the gyroscope.

"So marvelous is its mechanism that in favorable circumstances a torpedo well aimed may be depended upon to strike within a yard or two of the spot aimed at. Briefly described, the gyroscope is a rotating wheel which automatically controls the torpedo's courses.

"The method of firing a torpedo is very much like that of discharging a gun. It is expelled from a torpedo tube by compressed air. Upon reaching the water the torpedo is driven by its screws in the required direction. The missile is guided by a very ingenious invention called a 'torpedo director.' This is a little brass instrument fitted with 'sights' like a gun. When the sights are aligned on the enemy the officer in charge presses a key, and electricity causes the discharge."

Who Has Done Most For Mankind.

New York.—Thomas A. Edison has been voted the American who has done most to benefit mankind and has received the Civic Forum medal of honor for distinguished public service.

This medal, established to give recognition on the part of the rank and file of the American people to that one of their countrymen who in ways of peace performs some signal public service, was awarded last year for the first time to Colonel George W. Goethals for his work at Panama.

Dr. Nicholas Murray Butler, president of Columbia university, presided at the reception, and the speakers included Guglielmo Marconi, inventor of the wireless telegraph; Dr. Charles P. Steinmetz, consulting engineer of the General Electric company; Dr. Richard C. Maclaurin, president of the Massachusetts Institute of Technology, and Charles A. Coffin, chairman of the board of directors of the General Electric company. Percy Mackaye read a poem written for the occasion.

OREGON MEN NOT "FRESH."

Women "Hiked" It Alone, Unarmed and Unmolested.

Eugene, Ore.—Five Eugene young women have just finished a "hike" of sixty miles along the Oregon coast unarmed and unafraid of stories of bears told them at virtually every place they stopped. They carried packs weighing almost twenty pounds and took their chances at finding shelter each night.

They proudly boast that not one man "got fresh" and that it would be quite possible for a woman to walk all over Oregon alone without being molested.

The "hikers" were Miss Frieda Goldsmith, Miss Harriett Thompson, Dr. Bertha Stewart, Miss Mary Perkins and Miss Myrrha Hepburn. Four are members of the University of Oregon faculty.

CHEMISTRY ABOLISHES WORK WITH THE HOE

Weeds Killed by Arsenic and Much Labor Is Saved.

Washington.—Officials of the department of agriculture are greatly interested in reports received from Hawaii, to the effect that one of the big sugar companies has adopted as a regular field practice the system of destroying weeds by use of an arsenic poison spray instead of by hoeing.

Experts who have conducted experiments on Hawaii sugar lands estimate that by the spraying method a saving can be made in labor of $15 to $30 per acre per annum.

The latest developments along this line in Hawaii are discussed in a letter received from Professor H. P. Agee, director of the experiment station staff of the Hawaiian Sugar Planters' association. Before going to Hawaii Professor Agee co-operated with the department in experiments on Louisiana sugar land.

The value of this method in Hawaii is very great, because of the fact that, like most tropical regions, the islands are subject to torrential rains. The less the surface of sugar and other lands is disturbed by cultivation the less chance there is that heavy rains will wash off the top soil or immediately beat it into compact form.

A few years ago the department of agriculture issued a bulletin dealing with the weed factor in the cultivation of corn, following a series of experiments extending over several years, which apparently established the principle that it is the removal of the weeds rather than the cultivation proper that contributes most to the production of the corn crop. A series of 125 experiments were conducted, covering many states. On some plots the most approved methods of cultivation were employed, while on other plots there was no cultivation whatever, the weeds being eliminated by surface scraping with a hoe.

A general average of all these experiments showed that the plots that were simply weeded produced 95.1 per cent as much fodder and 99.108 per cent as much grain as those that were subjected to the most approved methods of cultivation.

The arsenic spray method will be given a trial on corn land in Louisiana this year by experts of the office of farm management in co-operation with local authorities, with a view to determining whether it is not available for use in that region, where climatic conditions to some extent approach those in Hawaii.

SKINS WAY TO DEGREE.

Student Pays Expenses by Trapping Muskrats.

Beloit, Wis.—A student at Beloit is literally skinning his way through college. He is Edwin M. Dahlberg of Cherry Valley, Ill., a senior, and he has earned a large portion of his college expenses by trapping muskrats on the Rock river, near this city.

Dahlberg began to emulate Daniel Boone last fall. He set a string of traps along the river above the city. Every morning he would visit them, starting out in his canoe at 5 o'clock.

Drifting downstream, he would skin his catches on the way back to Beloit. He cured the pelts on some rafters in the men's dormitory, which sometimes were upholstered by several hundred skins at a time.

HOW LINER SANK

Saw Elbert Hubbard and Wife Searching For Life Preservers.

TELLS OF HIS OWN RESCUE

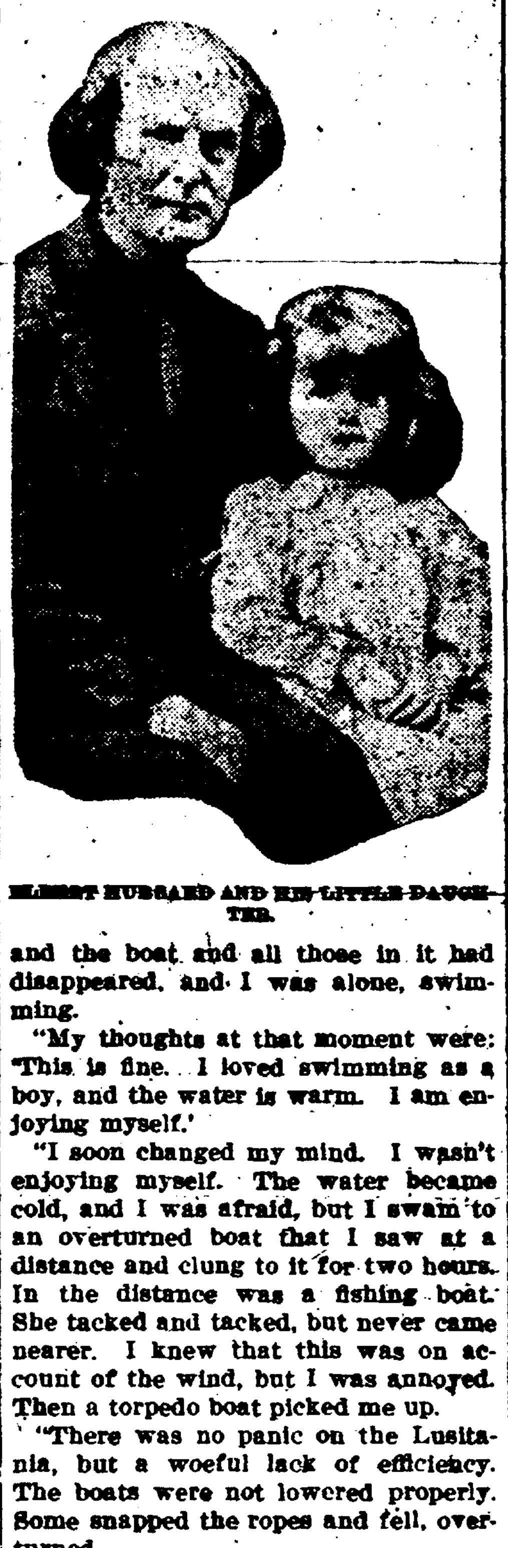
Swam For Hours Around Spot Where Lusitania Disappeared and Was Finally Picked Up by a Torpedo Boat. Fires on Doomed Liner Made the Water Warm.

London.—The fate of Elbert Hubbard and his wife, who perished when the Lusitania was sunk, was first made known by Robert C. Wright, a survivor. His version of the destruction of the big ship follows:

"I was standing on deck on the starboard side reading a novel when I heard a crash and an upheaval of water. Then an intense vibration shook the ship.

"Saying to myself, 'This isn't serious, but it is best to be prepared,' I started below to get a life belt. Then the thought came to me, 'This is serious' and I became afraid to go. After that I had a resumption of confidence as the stewards went calmly about the deck shouting that there was no danger, but when the list continued until a boat nearby was not more than three feet from the water, though still fastened to the davits.

"People already had crowded the boat when suddenly the ship gave a tremendous lurch, and I was thrown into the boat. A woman in the water cried, 'Help me!' I reached out my hands to help her, and it suddenly seemed as if the end of the world had come. There was a crash, followed by an upheaval. My ears rang with the concussion. Then, after a seeming eternity, the boiling waters calmed,



ELBERT HUBBARD AND HIS LITTLE DAUGHTER.

and the boat and all those in it had disappeared, and I was alone, swimming.

"My thoughts at that moment were: 'This is fine. I loved swimming as a boy, and the water is warm. I am enjoying myself.'

"I soon changed my mind. I wasn't enjoying myself. The water became cold, and I was afraid, but I swam to an overturned boat that I saw at a distance and clung to it for two hours. In the distance was a fishing boat. She tacked and tacked, but never came nearer. I knew that this was on account of the wind, but I was annoyed. Then a torpedo boat picked me up.

"There was no panic on the Lusitania, but a woeful lack of efficiency. The boats were not lowered properly. Some snapped the ropes and fell, overturned.

"I know that Elbert Hubbard was drowned. He was a conspicuous person on account of his long hair. I saw him and his wife start below, apparently for life belts, and never saw them again."

THIN CIGARS ARE SAFEST.

Chicago Doctor's Advice to Smokers and Motorists.

Chicago.—If you must smoke cigars smoke panetelas in preference to the clubhouse shape, and smoke them fast, and if you own an auto walk enough to ward off "chronic arterial spasms."

These bits of advice were given out at the Chicago Medical society meeting by Dr. Joseph Miller and W. P. Woley.

"Slow smoking allows more nicotine to pass in with the smoke," said Dr. Miller. "Combustion is greater in cigarettes than in cigars, therefore less nicotine passes in with the smoke. It is greater with a thin cigar than a fat one."

Pigeons Come Back.

Johns, Ala.—John Granger of North Johns had quite a unique experience with some Belgian pigeons that were given him by a friend in Chicago some time ago. He had them in his pigeon yard at North Johns, and in some way two of them escaped. In a few days he was notified by his friend in Chicago that his two pigeons were there. Mr. Granger ordered them sent back by express, and the pigeons have arrived safely.

POLAND A DESERT; FUTURE IS DARK

Every Second Man In the Country Is Now a Refugee.

PEOPLE IN WANT OF FOOD.

Robert Crozier Long Makes Extended Tour of Country and Finds Great Devastation and Much Suffering. Tells Exactly What He Has Seen and What People Face.

London.—Robert Crozier Long, author and special correspondent, has written an account of his extended tour of the war devastated districts of Poland. In it he says:

"'Finis Poloniae,' Kosciusko's epitaph on his country, has been realized.

"A tour of central and south Poland and the Polish parts of Galicia convinces me of that. I visited all the chief towns and many villages, or ruins of villages, in 10,000 square miles of country lying between the Austro-German lines and the Vistula in a semicircle from the Bzura to the Nida. I visited also the basin of the Dunajec and Willoka, the theater of the sanguinary May day outbreak. The country is a desert, the home of nomads. I got my first glimpse of it on the Bzura, west of Warsaw, where during a four months' artillery duel every habitation has disappeared.

"I reached this battle front first after dusk and from an observation tower saw the remnants were gaunt, erect pillars. This is typical of burnt out Poland. A street of frame cottages, often straw thatched, catches fire from the first shell and only ugly rows of brick chimneys are left.

"Isolated factories all have been destroyed, mostly by airmen's bombs on the suspicion that they were staff headquarters. Thirty villages either were burned or blown up.

"The governor of Radom assured me that in his province 500 villages had been burned. Refugees assure me that in a circle extending thirty miles around Lodz only five villages were spared.

"Poland's population is suffering as no Europeans have suffered since the Thirty Years' war. Every second man is a refuge. Warsaw has 60,000 refugees, a third of them Jews. In Radom I found 15,000 refugees, in Kielce 20,000.

"A Warsaw rabbi assured me that 100,000 Jews from the towns of Lodz, Piotrkow and Lowicz are without homes. Many refugees still tramp the roads, begging despairingly from people themselves beggars. Many thousands are huddled in the tottering fragments of cottages, while 10,000 are shivering in the abandoned trenches and terraced Russian dugouts at Skaryszom.

"I met many refugees without food or money and mostly ill clad. Near Ostrowiec was a dreary procession of men in thick sheepskin coats without other clothing, women in men's trousers and children in dresses improvised from shawls.

"Such is Poland's present. The future will be even worse. The country, ravaged and irreclaimable, begins to resemble the primeval Sarmatian waste. Roads, forests and even fields have vanished.

"The roads which have been repaired cannot bring food to civilians, for all are crowded by parallel transport columns. The fields were destroyed by transport and artillery trains, which, finding the roads too narrow, spread right and left, obliterating farms.

"Winter grain was not sown, and there is no seed grain for spring.

"The worst, because it is irremediable, is the forest destruction. Some woods have been hewn wholesale to make causeways through morasses, some to pave roads, some to make a clear field for artillery, some shelled to bits because they afforded shelter for troops, some drenched with petroleum and burned. This forest devastation means for Poland generations of beggary."

STOWAWAY ALMOST DEAD.

Seattle Man Hadn't Food or Water For Eight Days.

Seward, Alaska.—Leland F. Farmer, a young draftsman who stowed away on the steamer Admiral Evans of the Pacific Alaska Navigation company at Seattle, was found in the lower hold. He had been eight days without food or water, but will recover. When discovered he was wedged head downward between two bales of hay.

Farmer had heard that there are excellent opportunities for draftsmen at Ship Creek, Cook Inlet, where the government is assembling men and material for building the federal railroad in Alaska.

Cork Leg No Help to Him.

Cleveland, O.—Owen Kelley's cork leg instead of acting as a life preserver a few days ago when he fell into the lake from the pier at the foot of East Ninth street came very near being a life destroyer. Struggle as he would he could not raise his head to a level with his leg, which floated buoyantly. Commander Kelly of the Ohio naval militia steamer Dorothea was coming ashore and dragged the drowning man out.

Canes at the National Museum.

A collection of canes made of practically every kind of suitable material and representing forty-five foreign countries, as well as twenty-one states of the Union, forms one of the most interesting exhibits at the National museum at Washington. Forty different kinds of wooden canes are on exhibition, as well as canes made of ivory, bone, horn, skin, paper, tin, wire and other substances. In this collection are many canes that are artistic and others that are merely curious in shape, as well as some made for emergency uses. Among the latter are a sketching cane with drawing materials stored in the handle, a number equipped with match safes, mountain climbing canes with sharp spiked ferrules, an officer's "swagger stick" and sword and gun canes of various types. The most interesting feature of the exhibit perhaps is the historical element. —Popular Mechanics.

Xerxes and the Hellespont.

Xerxes was furious when a storm wrecked his bridge of boats in the Hellespont from Abydos to Sestos. Not content with having the engineers decapitated, he ordered the infliction of 300 lashes upon the strait and the letting down into it of a set of fetters. Herodotus discredits the story that Xerxes also sent irons to brand the strait. But the historian does give the "non-Hellenic and blasphemous terms" which the scourgers were ordered to use: "Thou bitter water, this is the penalty which our master inflicts upon thee because thou has wronged him though he has never wronged thee. King Xerxes will cross thee, whether thou wilt or not, but thou deservest not sacrifice from any man, because thou art a treacherous river of salt water."

Bookplates.

No book collector should be without a bookplate, and a bookplate once inserted in a volume should never be removed. When the plate is that of a good collector it constitutes an indorsement and adds a certain interest and value to the volume. I was once going through the collection of a friend, and, observing the absence of a bookplate, I asked him why it was. He replied, "The selection of a bookplate is such a serious matter."—Atlantic.

Knitting.

Knitting is a Scotch invention of the fifteenth century. Soon after its invention a guild of stocking knitters was formed, with St. Fiacre as its patron saint. Hand knitting was supplemented by machinery as early as 1589, when William Lee invented the knitting frame.

Times Change.

"What is the principal difference between modern and ancient times?"

"One of the main points was that the modern earn their living, while the ancient urned their dead."

Specifications Furnished.

"What does our party stand for?" asked the machine senator.

"You, for one thing," replied a raucous voice from the rear of the hall.—Philadelphia Record.

Herculean.

"Pa, what is meant by herculean labor?" "Hooking a woman up the back, son."—Birmingham Age-Herald.

NOT KNOWN

Coroner Crane Not Able to Obtain the Cause. Four Dead is the Toll

Saturday an explosion of dynamite at Spencr and Maltbie st., Syracuse, killed four persons ad severely injured eighteen others.

It was while a search was being made for the body of little Donald Willets who was drowned in the flume leading to Onondaga creek last Tuesday that the explosion took place. Some sticks of dynamite were in an automobile near the spot where the search was being made, and in some mysterious way the ignition took place and the automobile was a complete wreck, four persons were killed instantly and eighteen wounded.

Coroner Crane who is making the investigation is still mystified.

"The men who were right there when it happened are dead," he explained. "It will be very difficult to learn just what happened during the few minutes preceding the exploosion.

No more deaths were reported yesterday, and late last night physicians who are caring for the injured said that the list of the dead may be complete. There is still doubt, however, about the recovery of some of the most seriously injured.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 24.—Proposed amendments to the State Constitution affecting organized labor will be aired before the committee on Industrial relations on Welnesday, May 26. Samuel Gompers, president of the American Federation of Labor will appear before the committee and discuss the propositions which will benefit and those which have a detrimental affect upon the great army of organized wage earners of the State. James M. Lynch.State Commissioner of Labor and John Mitchell, at one time head of the State labor department, are also expected to be heard upon the amendments in question.

Keen in their scrutiny of the amendments which are presented each day, advocates of laws governing the working man have prepared a list of the propositions which they deem a menace to the well being of organized labor and these they will strenuously endeavor to have retained in the committee which at present has them in custody. Silent as to their attitude up to the present, these advocates and high officials of labor organizations will cast aside reserve and come out flatly for or against the resolutions which will be given hearings next Wednesday.

Among the proposed amendments which is to be given a hearing is that by Delegate Parsons which provides for a State department of Industry. The proposition provides for an industrial board of five members to be appointed by the governor for ten year terms to receive a salary of $6,000 a year each.

Another amendment provides for the election of a State Commissioner of labor every two years.

A third proposed amendment to the Constitution which will also be given a hearing is that of Delegate Rosch, which proviles that the legislature shall have power to provide for the establishment of councils of conciliation and boards of arbitration for the settlement of disputes between employers and employes. Under the amendment, strikes, lockouts and similar forms of industrial differences are declared subject to regulation by statute.

Delegate A. E. Smith has presented several proposed amendments affecting labor, one of which prowides that the legislatdre may directly or thru any duly constituted administrative agency, prescribe the minimum or living wages that shall be paid to women or children. Another empowers the legislature to delegate in its discretion, to any duly constituted commission, board or administrative agency, power to make rules and regulations modifying or supplementing laws which have been passed for the protection of the lives and safety of employees.

There are various other amendments to the Constitution which are in the custody of the committee on Industrial Relations but the above are likely to be brought up for discussion first and are epected to be debated to some length.

The delegates who will pass upon the advisability of reporting favorably any or all of the propositions which which will be given a hearing or who on the other hand, may vote to retain them in committee follow: Herbert Parsons, chairman; Seth Low, Richard Curran, William Berri, John Parmenter, Edward E. Franchet, Hubert C. Manderville, Joseph E. Eggleston, Cortland Nicoll, Frank M. Jones, John C. Leggett, Richard E. Weber, Thomas V. O'Connor, Alfred E. Smith, Michael Fogarty, James Dahm and Albert Unger.

The Fire Record

A leaky gaspipe probably caused a fire which summoned the fire department to the home of William Crouse of the West Side, at noon yesterday. The fire broke out in a partition in the sitting room and the house was filled with smoke when the firemen arrived and for a time the blaze looked dangerous. The new chemical tanks, were put in play and the blaze was checkd after only slight damage had been done to the wood work, although any of the household effects were damaged by smoke. The alarm was sent in by telphone.

* * *

At 9 o'clock Saturday night the fire departent was called to a house owned by Mrs. North in Beach st., which has been occupied for some time past by Italians who moved out at 4 o'clock aSturday afternoon. The fire was discovered by a neighbor and was rapidly making headway on a partition when the firemen arrived. The blaze was quickly extinguished and Chief Waugh conducted an investigation, but the cause of the blaze could not be learned. It was reported this morning that the Italians disclaimed all knowledge of the blaze and they are not suspected.

Chief Waugh thinks one of the Italians threw a lighted match or cigarette on the floor and that the blaze stated in that manner.

Hand-embroidered articles for sale; also special orders done promptly. Mrs. Fred Ure, 721 Cayuga st.

FRANK MASSARO FILES A JUDGMENT ROLL

The judgment roll in Frank Massaro's action against Kirk N. Sweet of Phoenix, to recover damages for injuries sustained by the plaintiff, was filed Saturday. Mr. Massaro was given a verdict of $150, which with costs now totals $223.45.

SIX ESCAPE IN RUNAWAY

Baldwinsville Residents Had Perilous Ride Down Oswego Hill

Yesterday afternoon six residents of Baldwinsville returning from a funeral at Lamon narrowly escaped death in a runaway accident on a Oswego hill road, which is near Baldwinsville.

William Loop, his wife and two sons and two daughters occupied the carriage which was drawn by a team of spirited horses. The party had reached Oswego hill and the descent was begun when one of the holdbacks broke and thus frightening the horses and tearing themselves loose from the wagon ran down the half mile hill, the carriage following. One horse received a broken leg and the other was badly injured.

The carriage kept to the middle of the road until near the bottom when the wheels struck a stone and the carriage turned sharply into the yard of Otis Bigelow, collided with a stone step and overturned.

All of the occupants were thrown out, but aside from a few bruises were practically unharmed.

The wagon was unbroken.

SARAH JANE BRIERLY

Mrs. Sarah Jane Brierly, one of the oldest residents of this city died at her home, 507 Cayuga st., early Sunday morning. Mrs. Brierly had been ill for several weeks. She was 61 years of age and had lived in this city for 50 years.

Mrs. Brierly was Miss Sarah Jane Burchin and was born in Bundyville. In 1880 she married William C. N. Y., one grand daughter of this city. She was a member of the State St. Methodist church and was active in church work.

Besides her husband she is survived by one son, Claude Brierly of Utica, N. Y., one grandd aughter of this city; two sisters, Mrs. Isabelle Newcomb of Syracuse and Mrs. Della Waugh of Bundyville; two brothers, Pedora Burchin of Minetto and Charles of this city.

The funeral arrangements have not yet been completed but the funeral will be held from her late home and interment will be made in the Bundyville cemetery.

Golf Ball's Strange Flight.

That a golf ball does not travel in a parabolic curve was asserted by Professor C. Vernon Boys during the trial of a patent suit in the British chancery court. Professor Boys, who had been called as an expert on ballistics, described experiments he had made with mechanically propelled golf balls and said that these when driven hard more than counteracted the attraction of gravity. "A good flight," he said, "is very nearly straight for a long time, then gradually rising and then falling."

Aztec Emeralds.

Among the Aztec treasures of Mexico were found many fine emeralds. They were exquisitely cut, and it is from this source that the magnificent emeralds now forming part of the royal collection of Spain were supposed to have come.—Exchange.

Imagination.

"A poet needs a great deal of imagination."

"Yes; if he really waded around in the wet grass looking at sunrises and listening for robins he wouldn't last long enough to write much poetry."—Washington Star.

Limitations.

Jack—I hear that you have quit the literary game. Jill—Yes; I despaired of ever writing up to my publishers' printed estimates of my work.—Life.

Aroused Suspicion.

His Wife—Oh, I'm so happy!

Her Husband—That so? Who's in trouble?—Exchange.

PRESBYTERIAN PASTOR LEAVES ON AUTO TRIP

The Rev. and Mrs. Charles S. Robertson left the city today in their auto, bound for Troy and Galway, N. Y. The return trip will be made Thursday.

To Take Impressions of Plants.

Burn a common cork till reduced to a powder, add a teaspoonful of olive oil, mix into a thick paste. Now paint the veiny side of the leaf with camel's hair or black sable brush, lay the leaf carefully on a piece of clean paper, painted side down, subject it to a strong and even pressure by placing it in a book under a weight for about a quarter of an hour, then remove the leaf carefully from the paper. Very veiny leaves are the best.

Heard In the Nursery.

"I thought you were very much attached to the book," said the stuffed dog to the picture that had once ornamented the cover of the book.

"I was," said the picture, "but Dora cut me out."

MRS. GARDNER OFFERED MONEY

(Continued from Page One)

the answers of the witnesses to the questions asked, and Mr. Pendergast was obliged to insist on a direct answer from Mrs. Whorl several times.

Mrs. Gardner when called to the stand, attempted to tell the whole story of the trouble in answer to one question, and it was only after repeated requests of the Judge and both attorneys that she would limit her answer to the question. When Mr. Fanning objected several times, Mrs. Gardner chided him in a matter of fact tone, calling him by his surname and provoking much laughter in the court room.

Mrs. Gardner said she had given her daughter and her husband about $1500 in cash and supplies, free house rent to the sum of several hundred dollars and had also furnished them with coal and food whenever it was necessary, but that her daughter was not content with that but wanted cash. Whenever Mr. Pendergast ran out of questions, the answers to which would tend to show that Mrs. Gardner had done everything in her power for her daughter, Mrs. Gardner would cause a ripple of laughter by prompting her attorney to ask her about some other item.

Mayor Testified

Dr. Fox was called to the stand later in the afternoon and testified that he had been the family physician for some time and that Mrs. Whorl was in no condition to work. He refused to make known the nature of her ailment, on ethical grounds, but afterward stated the trouble to the court and the stenographer.

After Dr. Fox had been cross-examined, Judge Coville adjourned court until 4.30 o'clock today. Mr. Pendergast announced later to a reporter for The Times, that he expected a settlement of the case before that time. When asked regarding the nature of the settlement, Mr. Pendergast said it would probably be a weekly stipend which would be paid to the city by Mrs. Gardner and then given to Mrs. Whorl by the Commissioner of Charities.

The city is bringing the case against Mrs. Gardner through the Commissioner of Charities, in an effort to make Mrs. Gardner support her daughter, the wife of Edward Whorl. The city would not accept the offer of Mr. Pendergast, made Saturday morning to support Mrs. Whorl provided she was placed in an institution and did not receive the money unless she was actually in the institution.

There are several other witnesses to be called, who will testify to the circumstances of the Whorl family and to the ability of Edward Whorl to work.

"The QUIRK TODAY"

"Vendetta," From the Novel by Marie Corelli

Fabio Ramant is the husband of the beautiful Italian girl, They have a charming daughter. Stella by name, and their life in Naples on Romani's great estates is one of love and happiness.

A great cholera plague ravages the populace of Naples anl Fabio one day decides to go to town, in spite of all danger. On his return he is seized with the cholera and drops to the street. He is picked up by the hooded doctors. As a precaution against infection, his body is placed in a cheap wooden casket and buried in the Romani vault.

After some hours of apparent death his body stirs. In escaping from his coffin he knocks down a coffin which is broken open. He immediately plunges into the casket and finds tremendous riches in gold, silver and diamonds. Almost overcome by his [illegible] agony of mental torture, Fabio's hair turns white in a single hour. He finally breaks free of the tomb and rushes through the garden to his mansion. From behind an oramental column he sees his old friend Guido embracing his wife and determines upon a horrible vengeance. Armed with almost inexhaustible riches of the treasure chest he assumes the name of Count Oliva, and after a lapse of time returns to the scene of his misfortune. He obtains an introduction to Guido, the two become fast friends. In the course of time he meets his faithless wife and soon becomes an almost daily visitor at his own home. His child Stella, is taken sick and dies. Before the little girl passes away Fabio makes himself known to her.

The wealth of Fabio dazzles Nina and being faithless, selfish and mercenary, he has but little difficulty in laying the foundation of his vengeance. Fabio announces a grand dinner in honor of Guido and announces to the assembled guests the engagement of himself and Nina. Guido strikes Fabio, and a duel follows. Guido is mortally wounded. Before he expires, Fabio reveals his identity to the dying Guido.

The night of the wedding arrives with its hundreds of guests. Fabio takes Nina by the hand and leads her to the vault. The ever mercenary Nina follows to the door of thev ault, where she hesitates. Fabio seizes her and throws her through the open door and then follows himself. He discloses his identity, and the shock drives Nina insane. Suddenly the earth moves beneath them. There is a rush and roar of crashing pillars, a mighty stone hurles through the roof of the tomb, striking Nina and killing her instantly. Fabio, believing it the vengeance of the gods, rushes from the ruined vault in panic. Thus is the vendetta accomplished.

"A HERALD OF PROGRESS"

Checkerboard Man

By WILLIAM CHANDLER

A stagecoach was bowling along over a road on "the plains," they being that portion of the continent lying between the Missouri river and the Rocky mountains. There were half a dozen passengers inside the coach, half of whom were ladies, and five men outside. Four of the outsiders were of the roughest element of the region, which in those days was not at all smooth. On the seat with the driver sat a man in a checkerboard suit.

The four men in his rear were talking in a vein not at all appropriate for the ears of ladies and so loudly that they could easily be heard in the coach below. The man in the checkerboard suit upon hearing a very coarse remark turned and looked at the man who made it, but said nothing.

"My young friend," said the man looked at, "do you see anything to admire in my appearance?"

"I don't see anything to admire in your language."

The man hitched a revolver around from his hip, saying, "What d'ye think o' that?"

"I have no use for firearms; never carry 'em myself."

The other clinched his fist. "What d'ye think o' that?"

"Oh, that's something I can understand. I carry those tools myself."

"Well, then, if you find anything more about me you don't like you'll get it behind the ear."

The checkerboard man made no reply to this, but when the other launched forth another coarse remark, accompanied by an oath, the former turned and said in a subdued voice:

"I say, my friend, you want to talk in a way that is unpleasant to my sensitive ears. We can't both have our own way. How would it do for us to stop the coach, get down and have a friendly set-to to settle the matter?"

"What! A little whippersnapper like you fight a six footer like me! I'd spoil your clothes."

"Oh, that won't matter. I can take them off above the waist."

"Go him, Jim," said one of the other men.

"Go him! Why, ef I'd hit him real hard I might break him. He's too purty to be smashed like a piece o' chiney."

Jim's companions were anxious to see a mill and insisted upon his accepting the challenge. The coach was halted. The two principals walked a short distance from it, followed by most of the men inside and outside, while the driver remained on the box and the ladies crowded to the window. The checkerboard man threw off his coat and vest, while his antagonist remained in woolen shirt and trousers tucked in his boots. One of the men relieved him of his revolver, while another drew a ring with the point of a dirk knife on the ground. When all was ready the principals started for the center of the ring.

The spectators were looking for the fight to begin when they were startled at seeing Jim lying on his back. His antagonist had planted his fist under his jaw so quickly that ordinary eyesight was incapable of following the action. Jim sat up and looked about him, indicating that he scarcely understood what had happened. Then he rose to his feet, but before he could square himself on his legs he was down again.

He began to get riled and, jumping up with fair agility, went for his enemy like a bull, aiming a blow at his cheek. But his enemy was not there, and before Jim could aim another blow an arm was around his neck, and he was receiving a quick succession of taps on his nose, bringing a stream of blood, which trickled on the virgin soil of Colorado. He struggled desperately to free himself, but that crooked arm was like iron and was choking him. When both eyes were closed and his nose resembled a beet he was released and stood tottering and groping. One of his party went to him and led him back to the coach.

Every one understood what the fight was about, and all united in a shout of triumph. The conquered man was helped up on to the coach by his friends. The checkerboard man resumed his coat and vest and climbed to his seat by the driver. When all were aboard the driver chirruped to the horses and the coach rolled on. It had been stopped just seven minutes.

At the next relay was an eating house, where dinner was served. All left the coach and before dining gathered around the checkerboard man, offering him congratulations, the ladies of the party being especially complimentary in their remarks. The four men who had done the loud talking kept by themselves, but when the conqueror was granted a respite his victim shuffled up to him and put out his hand.

"Stranger," he said, "whar did ye learn how to handle yer fists?"

"Oh, that's my profession. I run a school for boxing in Chicago."

"Y' don't mean it!"

With that the fellow slunk away, and when the coach started up again neither he nor any of his friends was with it. They had received so many marks of disfavor from the passengers that they did not care to finish the journey with them. As for the checkerboard man, he had the satisfaction of being alone for the rest of the ride, and at the parting every lady gave him some trinket as a memento of her gratitude.

Cheeky Drummer.

About Christmas time once the some time famous Josh Billings, humorist, was on his way to his old home at Lanesboro, Mass. On the train were three traveling men who wanted a game of whist. One of them pointed to the unpretentious and unprepossessing Josh and said:

"Let's ask Rube into the game and comb some of the hayseed out of his hair."

"My venerable friend," he said as he laid his hand on the shoulder of the old man, "will you join us in a game of whist?"

"Ya-as; we will get there in abaout three hours," replied Josh, putting his hand to his ear.

"You don't seem to understand," said the young fellow in a louder tone. "We want you to take a hand"—

"Ya-as; the stand o' corn has been unusual good this year."

"My friend," the young fellow then yelled, "will you take a hand in a game?"

"Ya-as; I was tellin' Mandy this mornin' how plenty an' how fat the game is this year."

"Oh, you go to the devil!" shouted the young fellow as he took his seat, while the other drummers unmercifully pestered him.

When Lanesboro was reached the old fellow got up, handed one of his Josh Billings cards to each one of the trio and then said to his interlocutor:

"Young man, while you are traveling on your cheek don't get any hayseed on your clothes or the other drummers will take you for a Rube and get you into some game and skin you."

Bright and Dark Days.

There are bright days and dark days, and we must take advantage of the former and be as little discouraged as possible by the latter. They are all in a lifetime.

A Tramp of Resource.

Much experience of thirsty tramps had caused the author of "An English Holiday," J. J. Hissey, to foreknow almost exactly what they would say to

"I BE MORTAL THIRSTY."

him. One day, when sending his motorcar slowly along a shady English road, he met one of this guild, who accosted him with the preliminary touch of his cap. Mr. Hissey anticipated him by exclaiming:

"I be mortal thirsty! Have you, good sir, the price of a glass of ale about you? I've driven nearly fifty miles today, and since the morning not a bite of food has passed my lips."

The look of astonishment that tramp gave me was a delight to observe. But this tramp was a man of ready resource, and, seeing I was a hopeless case, he rose to the occasion and promptly exclaimed, with what dignity he could command and with a comically serious expression:

"If there were a policeman in sight I would give you in charge for begging, that I would!"

Suite or Suit.

Pat had seen the word "suit" used in connection with furniture. Being in need of bedroom comforts, he entered a store with the purpose of buying some.

Pat—Hev yes a cheap bedroom suit?

Clerk (producing a pair of pajamas)—How would this do?

And the fight was on.—Minnesota Minnehaha.

A Hot Story.

A contributor to the Chino Herald, telling of experiences during a summer trip into the desert, narrates that while he watched a lizard run across a sunbaked open strip of sand it disappeared in a puff of vapor. The intense heat of the sand had turned the moisture of its body into steam, the pressure of which rose so high that the little creature was blown into bits so minute that no trace of it was afterward to be found. In backing up his statement he quotes an old prospector's allegation that in Death valley during the heat of the day water poured from a canteen will not reach the ground, being turned into steam as fast as it leaves the mouth of the canteen. Can you beat it?

Vacation

By MARTHA V. MONROE

Elisha Treadwell about the 1st of April saw in a newspaper among advertisements for summer hotels and boarding houses one that arrested his attention. It was this:

A widow with several grown sons and daughters, owning a country home, would like a few boarders for July and August. A small auto, tennis grounds and other means of amusement will be at the disposal of guests; references required.

Mr. Treadwell inferred what was not stated in the advertisement—that a guest would be received as a member of the family. He was obliged if he went on a vacation to go alone. Consequently he had no desire to go, for he was much dependent upon associates. In this country place he fancied he would obviate this difficulty. The "sons and daughters," especially the latter, seemed inviting. He entered into correspondence with the advertiser with the result that he engaged a room for his vacation in July.

He arrived in the evening about 8 o'clock, which was shortly before dark. A negro butler announced that most of the family had gone on a picnic and he expected them home at any minute. Miss Clara was somewhere about, but he didn't know where. Treadwell said he would wait. He went into the living room and, seeing a lounge, on which some one had evidently been reclining, for there were an afghan and a pillow on it, he sat down for a rest.

The twilight deepened. There seemed to be no one about to light the lamps, and the young man soon found himself in the dark. Tired from traveling, he stretched himself on the lounge. The first thing he knew, or, rather, didn't know, he was asleep.

He was awakened by a hand laid on his forehead—a soft hand, which he felt sure was feminine.

"Feel better?" The voice of the speaker was a melodious soprano.

Now, there was something extremely pleasant about this petting, which was, of course, intended for another, and Treadwell was not minded to bring it to a termination, so he simply said "Um!" without opening his mouth.

"I've brought up some supper for you. Do you want it?"

"Um, uh," grunted Treadwell, giving a negative intonation.

Meanwhile the hand was removed from the forehead and slid down to one of Treadwell's. This was becoming a member of the widow's family with a vengeance. Treadwell was somewhat troubled about the result of his accepting these attentions, but both the hand and the voice were so soft that he thought only of how to avoid interrupting them.

"I wish they'd come," the lady continued. "Mother said they'd surely be back by 7 o'clock, and it must be 9. I'm going to light up."

"Uh, uh!" grunted Treadwell, as though his throat were out of order, still holding on to the hand.

"Rather lie in the dark, eh? That's the way with me when I'm sick. I wonder what's become of the man who was to arrive this evening. If he should come and find the house dark it would be a poor reception. He might turn around and go back to the city. I wonder what he's like."

Treadwell could hardly help saying, "He's a fine fellow, and when you see him you will have met your fate," but he refrained. He was thinking that he would excite suspicion by silence when there was the sound of an automobile and a babel of voices approaching. Withdrawing his hand from hers, he rubbed his eyes, started up and exclaimed:

"I must have fallen asleep."

There was a subdued shriek. The girl hustled about and struck a match. She saw a strange man looking at her as if just awakened from sleep.

"Beg pardon," he said. "I'm Mr. Treadwell. I was waiting for some one to come in when I dozed off, I suppose."

"Are you sure you've been asleep?"

She raised the chimney of a lamp and touched the match to the wick. At the same time a noisy party of picnickers came up the steps and poured into the room.

"Mother," said the girl who had been petting the guest, "this is the gentleman that was to arrive"—

"I'm Elisha Treadwell," said that gentleman.

"Am happy to see you, Mr. Treadwell. I'm sorry you've had such a doleful reception."

"Don't mention it."

"Ethel, why didn't you light the lamps?"

"Why, mother, Jim was in here on the lounge, or I thought he was, and I didn't think he wanted a light. He had gone up to his room."

"He didn't," said Treadwell—"I mean I didn't mind sitting in the dark at all."

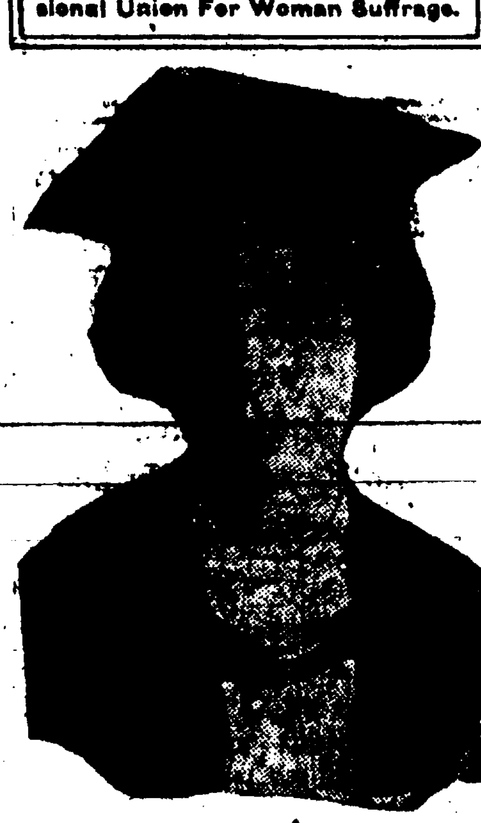
Mr. Treadwell was taken into the dining room, where a hot supper was served—with plenty of light—and it was evident to him that he had struck just the place he needed for a vacation. Now and again he caught Ethel looking at him suspiciously, but he put on an expression of unconscious guilt—if that expresses what he was trying to do—and at last she seemed satisfied.

The month of July passed only too rapidly for Mr. Treadwell, who found the companionship of the family very pleasant.

There is nothing more to this story barring the commonplace, except that Treadwell went back to the city at the end of his vacation engaged to Ethel.

Woman's World

College Girl at Head of Congressional Union For Woman Suffrage.



Copyright by Edmonston.

MISS ALICE PAUL.

Miss Alice Paul of New Jersey is chairman of the Congressional Union For Woman Suffrage.

Miss Paul is a graduate of Swarthmore college and has an M. A. and Ph. D. degree from the University of Pennsylvania. She is also a graduate of the New York school of philanthropy and studied at the Universities of Birmingham and London. She was formerly chairman of the congressional committee of the National American Woman Suffrage association and formerly a member of the board of the Pennsylvania State Woman Suffrage association.

The Congressional Union For Woman Suffrage is an organization which has as its basic work the establishment of a national suffrage amendment.

The women most interested in the suffrage movement felt that during the incoming of a new administration was the psychological moment for reviving interest or, rather, creating a new interest in the demand by women for an amendment to the national constitution embracing the enfranchisement of women. It was to this end that the Congressional union was formed, with Miss Alice Paul at its head, and which demonstrated in no unmistakable terms to President Wilson's administration the great strength of the movement for a national suffrage amendment.

Suffrage history was made that day preceding the inauguration of President Wilson, when approximately 8,000 women marched from the capitol at Washington up Pennsylvania avenue, past the White House and invaded the Hall of the Daughters of the American Revolution.

This demonstration was so beautiful in its pageantry and allegorical features that it very nearly overshadowed the interest excited in the minds of the people by the inaugural ceremonies themselves, and the Sixty-third congress entered upon its term of office fully informed upon one point at any rate—that many women were demanding the amendment.

STUNNING BATHING COSTUME

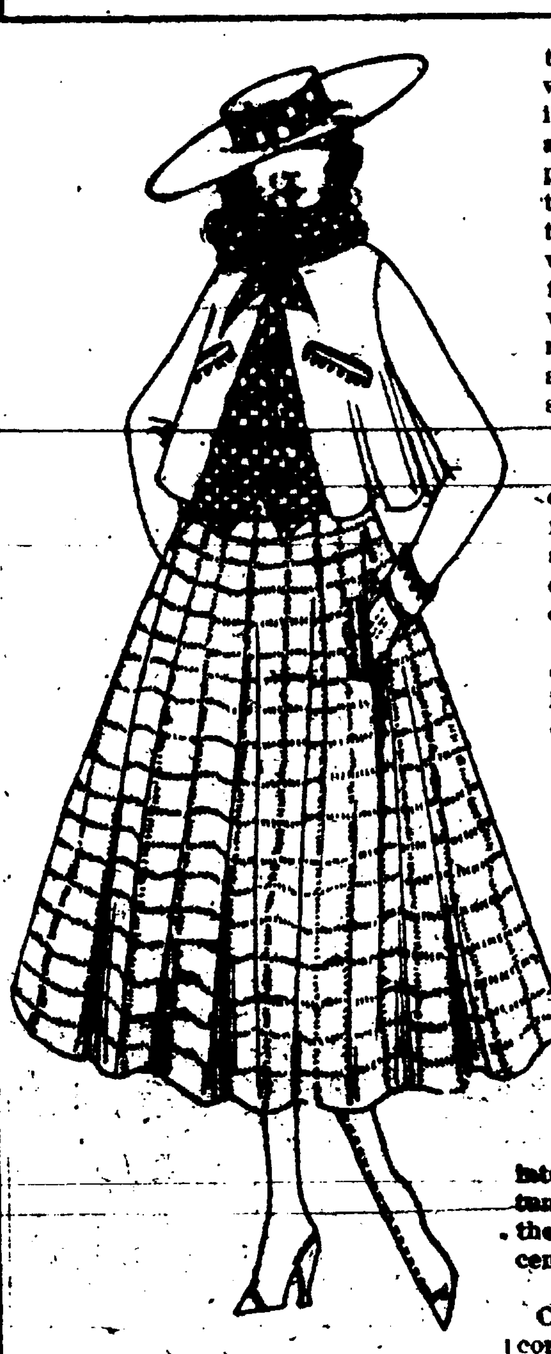
Black Satin Given Smart Touch by Red and White Striped Silk.

The girl who bathes in the ocean's briny waves this summer will like to remember herself afterward as having made a pretty picture on the sands with the alluring background of sparkling waves and cloud flecked summer

A SEASIDE FANCY.

sky. The costume pictured here will give her such a memory. It is of the ever serviceable black satin, lent distinction by an underblouse of red and white striped silk. The coquettish cap is red and white, and the white shoes are laced with red ribbons.

Swagger Gown Built of Two Fabrics With Picturesque Details



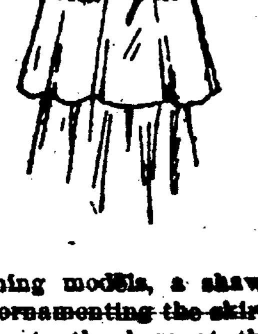
Designed by Hickson & Co., New York.

DESIGNERS this season are vying with one another in the revival of sweet simplicity and innocence in dress. A striking example of how much style can be included in one frock by the clever manipulation of two fabrics is shown in the gown illustrated. Any of the smart summer stuffs can be used in combination and perhaps black gabardine might be used for the full bolero coat.

The skirt might be of black and white check, and then as a swagger touch the check silk waistcoat and muffler could be of pink and white check silk. To make this extremely chic the skirt must be very short and full, and the same lines must be followed in the Eton jacket. To wear with this are high boots of black and white, with white silk hose, because in the swish and swirl of the skirt a dainty bit of hosiery may be exposed, and to be strictly in the picture the hose must match at least the shoe tops. The dashing sailor would have as its only garniture a flat band of pink and white silk, of which the waistcoat and muffler are made. Under the coat will be worn a soft blouse either of dimity or some of the wash silks.

* * *

For those who are fond of the checked suitings that are so smart for morning and general utility street wear there is a new variety of this design. Woolen suitings, checked, are showing shawl-like borders of the darker color in the check, these borders sometimes being five inches wide. The new checked material is cleverly made



into really stunning models, a shawl tunic frequently ornamenting the skirt, the point dipping to the hem at the center front.

* * *

Colored gloves are "in" again, in accordance with their annual spurt into fashion. While brilliant colors in gloves are not new, it seems very probable that they will be more generally accepted this year because of the extravagance in footwear. One usually associates gloves and shoes together. There are several compromises for the less daring woman who dislikes to clothe her dainty hands in bright blue, green and red kid. White gloves are very heavily stitched with these same shades, both at seams and on the back, giving a most attractive, smart appearance without being at all bizarre. Perhaps the prettiest turn of the new fashion is the repetition in fine kids of the lovely new shades of grays, tans and putty colors. They are unusually attractive in themselves in the soft, pliable leathers from which the new gloves are made. ANNA MAY.

MILLION MORE TO GET MAIL DELIVERY

Rural Route Changes Will Greatly Extend the Service.

Washington.—Mail facilities will be extended to 1,000,000 rural patrons before July 1, 1915, without increasing the present cost of service, according to a statement by Postmaster General Burleson. This, it is explained, will be done by readjusting present rural routes so as to eliminate duplications and unnecessary service and by means of the motor vehicle service authorized by congress.

Changes were authorized which, without curtailment of service, have reduced operating expenses $177,644. This sum has been utilized to establish 263 new routes serving 31,041 additional families, or approximately 155,205 additional persons. Extensions of existing service were put into effect involving 104 additional miles of travel by rural carriers. These extensions serve 1,202 additional families and approximately 6,010 additional persons.

In explanation of his plans Mr. Burleson says:

"The purpose is to enable the post-office department to meet just demands for mail service which thus far the department has been unable to provide. This can be done only by careful and painstaking readjustment of existing service. Thorough survey and study of existing conditions therefore have been made.

"In some localities it has been found there are unnecessary and unjustifiable duplications and retracings of travel by rural carriers. In other cases it appears that unusual privileges involving unnecessary service have been allowed. It is quite feasible to rectify these inequalities, and this is being done.

"Later we expect by utilizing modern motor vehicles on improved highways to extend many existing routes at no additional cost of service. As one of the results from this latter step the delivery zone from important postal centers will be doubled. Thus families in the area immediately tributary to these centers will be enabled to take full advantage of the parcel post as a means of transportation of farm products.

"Rural service will be extended to every farmer reasonably entitled to it as rapidly as the new adjustments can be made."

Slightly used 1915 Overland Demonstrator. $750.00. Van Wagenen Inc. adv133

"SPITE UMBRELLA" DID IT.

Landlady Kept It and Had to Pay $102.

Anthony, Kan.—The famous Harper county umbrella, which has been in litigation for several months, became the undisputed property of Mrs. Mary Schoeneman of Harper a few days ago when a jury in the district court assessed her $2 for the property rights attached thereto, together with the costs in the case, which have mounted to $100.

Mrs. Schoeneman is the landlady at a rooming house in Harper. Mrs. Lillie Smith, with her daughter and two grandchildren, contracted for a room with the Schoenemans. Mrs. Smith says the contract price for the bed for four was 50 cents. Mrs. Schoeneman says it was 75 cents.

Mrs. Smith would pay only 50 cents when she left, and it was accepted. She forgot her umbrella. Mrs. Schoeneman held it for the twenty-five cent balance.

Mrs. Smith sued. The justice court gave her a verdict for $3.50 and $7 attorney fees. Mrs. Schoeneman appealed to a jury, and it found again for Mrs. Smith, and Mrs. Schoeneman paid the costs and quit.

Room For All.

Any one can get a seat on the water wagon. It is one place where there is always plenty of room.—Philadelphia Press.

PRACTICAL HEALTH HINT.

Ringworm.

There are few diseases of the skin easier to cure than ringworm of nonhairy parts of the body. It is, however, difficult to cure ringworm of the scalp and beard—especially the former. The reason for the intractability of ringworm of the scalp and beard is that the fungus (a vegetable parasite, the trichophyton) grows down into the hair follicles, and it is very difficult to make well recognized antiparasitics penetrate to the seat of the trouble without damaging the skin. It requires easily six months to a year of treatment to cure ringworm on the scalp or beard. Any one suffering from ringworm should place himself under the observation of a physician or a specialist on diseases of the skin if he wants to be cured. A plain sulphur ointment of one dram of sulphur to an ounce of benzoated lard, a small portion rubbed into affected localities night and morning, will usually and steadily cure ringworm of the nonhairy localities.

The Buildings Are Being More Generally Used by the Public.

Public schools are more and more being thrown open for more general use by the public than the mere instruction of children. In many cities they are becoming social centers and especially places where free public lectures are held. This movement has been a very extensive one in New York city and is spreading to other communities. Philadelphia has thrown open its free schools for public use, but according to the board of education, which recently issued a statement through its president, Henry R. Edmunds, this fact is not fully appreciated in the Quaker City. Some criticism having arisen over the use for these purposes of the William Penn high school, Mr. Edmunds sent out the following statement:

"The board of education not only has no objection to the use of public school auditoriums as social centers, but actually encourages a more general use of these halls."

The infrequency with which the school buildings are used in the evenings in Philadelphia is due, not to the attitude of the authorities, but to the lack of interest manifested by the public, according to Mr. Edmunds. He added:

"There is assuredly no reason why such an auditorium as the one in the William Penn High School For Girls should not be open to any respectable organization that applies to the board of education for its use. The only cost would be a fee of about $2 for the janitor's services. Of course the public school buildings are closed to sectarian or political meetings, and I believe everybody agrees that they should be, but to their use for neighborhood gatherings, free lectures and entertainments there never has been any objection. If the halls are not often used for purposes other than formal education it is certainly no fault of the board of education."

Not only public school auditoriums but the halls in Carnegie libraries are available, at virtually no expense, for public gatherings, Mr. Edmunds pointed out, and for the use of the latter, too, he said, there seldom were any applicants.

Mr. Edmunds' view was in agreement with that of William T. Tilden, chairman of the board of education's committee on property, who has taken a leading part in the movement toward bringing the home and school into closer relationship. "So far as it is feasible all public property should give the greatest possible benefit to the public," he said.

A Municipal Aid.

The City Parks association of Philadelphia has for many years performed a most useful function for that city. It has managed to combine and concentrate the efforts of a large number of civic organizations upon a certain definite line of endeavor. This was originally, as its name indicates, the creation of a comprehensive park system—the enlargement of existing breathing spaces, the creation of new ones and the linking of all into a well ordered system. While this great work is still in the making, the association has expanded its functions, and it has done yeoman service in keeping alive high ideals of city planning, teaching the people of Philadelphia the importance of the larger vision in dealing with problems of urban beautification and pointing out far ahead of their actual realization the great works which must be carried through if Philadelphia is to continue to be a city of homes, alive to the progress of the times, a beautiful as well as a comfortable place to live and work in.

Portland (Ore.) School Garden.

The Shattuck school garden, located in the foreign residence section of the city, was organized in January of 1914, securing a piece of land 100 feet square. This lot was an unsightly dumping ground for all sorts of debris. The boys took quick action in clearing this ground and removed in all ten tons of rubbish, besides clearing the stumps, and within a very short time had transformed this eyesore into a garden which was a surprise to all after having first viewed the same place before its transformation.

Movies For Children.

The Atlanta (Ga.) chamber of commerce has definitely formulated plans to present moving pictures especially selected to please and instruct children. These children's movies will be shown every Saturday morning.

LENDS AUNT $5; NOW HEIR.

Youth Will Get Part of Large Estate Under Her Will.

Logansport, Ind.—As a result of lending $5 to an aunt in Greeley, Col., A. B. Judson of this city has become heir to a part of a large estate left by the woman, who recently died. Attorneys notified him that he had been named in the will, and he is now en route to Greeley to claim his part of the estate.

Judson had not heard from his aunt for several years until a year ago, when he received a letter from her requesting him to lend her $5. He complied with her request and received a letter of thanks. He never heard from her again.

Heart's Desire.

Warden—No. 41144, do you wish any book from the library? Prisoner—Yes; I'd like to have a railroad guide.—Philadelphia Ledger.

10 per cent. discount on Ford tires. Van Wagenen Inc. adv133

HELPFUL HINTS FOR HOUSEWIVES

Device For Sprinkling Clothes Evenly and Quickly.

For the purpose of aiding in the operation of sprinkling the clothes prior to the ironing a resident of Canada has invented a cup which distributes the water very thoroughly and does it in a much more satisfactory manner than the old method of dipping the hand into the fluid and flirting it over the clothes. The new cup has a handle, and adjacent to the same, in a position convenient to be controlled by the thumb, there is a trigger which controls the flow of water through perforations in the bottom. Press the trigger and a score of tiny streams are released and flow in an even and gentle maner from the cup. Release the trigger and the flow is immediately stopped.

Roast Pigeons.

Select plump pigeons, pluck and draw. Rub the inside and outside lightly with salt and pepper. Make a stuffing of equal parts of chopped celery and breadcrumbs seasoned with a little minced onion and a pinch of powdered sage. Moisten this stuffing with milk and melted butter. Stuff the pigeons with teaspoonfuls of this mixture, dropped in lightly. Place a thin slice of fat bacon over the breast of each bird, securing it with a small metal or wooden skewer. Lay them in a buttered pan, breast upward, and roast in a moderate oven. Cook the giblets in a little salted water, chop fine and add to the drippings in the roasting pan. Thicken with flour and add water sufficient to make the gravy.

Boiled Leg of Mutton.

Remove entirely the thin outer skin, but not the fat from the mutton. Place in kettle and cover with boiling water. Bring quickly to boiling point, boil five minutes and skim. Set on back of range and simmer until tender. When half done add one tablespoonful of salt. If desired brown take out of water when tender, put in a hot oven for a few minutes and serve as roast. If not browned serve with a white sauce. In making the same instead of using milk use one-half milk and one-half mutton stock (the water in which the mutton was boiled). Into the sauce put two finely chopped hard cooked eggs.

Cabbage Salad.

Beat the yolks of three eggs and one-fourth of a cupful of sugar until light. Add two teaspoonfuls of flour, one teaspoonful of dry mustard, one teaspoonful of salt, one-fourth of a teaspoonful of pepper and one-half of a cupful of vinegar. Cook in a double boiler until thick and stir in one tablespoonful of butter. Cool and mix in lightly one cupful of thick, sour cream, either whipped or plain. Chop one small head of cabbage and one cupful of celery, add one teaspoonful of salt, mix with the dressing and chill.

Green Tomato Preserves.

Required, eight pounds of smooth green tomatoes, seven pounds of sugar, one ounce of ginger and mace, mixed, and the juice of four lemons. Pierce each of the tomatoes with a fork and put them in the preserving kettle with all the other ingredients. Heat slowly, then boil until the tomatoes are clear; then skim them out and boil the sirup until thick. Put the tomatoes into jars and pour in the hot sirup.

Creamed Potatoes.

Make a white sauce in the double boiler, using two tablespoonfuls of butter, two tablespoonfuls of flour, one-half teaspoonful of salt, pepper and one cupful of milk. Have cold boiled potatoes, sliced or diced; add to the sauce and serve when well heated through. Sprinkle with grated cheese or chopped parsley just before serving.

Ink Stains.

To remove ink stains from cloth or other absorbent substance dissolve four ounces of citric acid in two quarts of water that has been previously boiled and cooled. Then add six or eight ounces of a strong, strained solution of borax.

Bean Cakes.

Mold left over baked beans into cakes, first binding them together with beaten egg. Fry as you would fry potato cakes or fish cakes. Place on a dish and garnish with slices of pickle and sprigs of parsley.

It Is the Air or Moisture That Makes It Look White or Red.

There is a general belief that sunlight is white and therefore that the sun is white. But this is a long way from the real condition of things. The sun is a bright blue, as blue in color as seems the water of a deep mountain lake. It is the air that makes the sun seem white.

Everybody has noticed when the air is very foggy that the sun appears as a red ball, as red as a redhot poker. Yet we know the sun hasn't changed at all. It is the mist in the air that makes the color seem different. And in the dawn and dusk, no matter how clear the air may be, the sun is much redder in color than when it is overhead in the middle of the day. The reason for this is that in the morning and evening we see the sun through a thicker belt of air. It is this thicker air which makes it look redder, just as it is the fog which has the same effect. If the air were taken away entirely, then we should expect the sun to be still less red.

Since in the middle of the day the sun is white, how could it be less red? By being blue.

The atmosphere is really like a thick orange colored veil spread between the world and the bright blue sun. Like a veil it dims the light, and its color acts as a filter. Actually the air stops most of the blue rays, but lets nearly all the orange colored rays come through.

It has been quite definitely shown that if it were not for the orange colored veil of the air we could not live upon the earth today. Even as it is the actinic rays of sunlight give sunstroke in summer, and it is in the blue and violet rays that the damage is done. The air softens the sunlight enough for us to bear it.

A few million years hence the sun will be yellow, and already some of its earlier blue heat is gone. But for a million years ahead—"we should worry!"—New York American.

TAKING A PERFECT BREATH.

Proper Method of Filling the Entire Lung Cavity With Air.

It does not suffice to breathe pure air. It must be properly breathed. All breathing should be done through the nose—never through the mouth—and, if possible, in the open air, or, at least, before an open window, and several times daily.

The passage of air through the nose has the advantage of being warmed and moistened and, in reality, filtered.

While deep breathing has been advised and written about during recent years, it is interesting to know that oriental teachers and philosophers have known and practiced it for generations. This best of all practices may not promote muscular strength or increase the size of the biceps, but it surely makes directly for the health of the lungs, heart, liver and abdominal organs, and thereby greatly and surely relieves the brain.

To take a perfect breath:

Stand erect by an open window or out of doors. Pucker up the lips as though starting to whistle and slowly blow out the breath and empty the lungs of air. Then, closing the mouth, breathe through the nose, inhaling slowly and steadily, filling the entire lung cavity, which is done by bringing into play the diaphragm, which, descending, exerts a gentle pressure on the abdomen. In the final movement the lower part of the abdomen will be drawn in, which movement gives the lungs a support and also helps to fill the highest points of the lungs. Retain the breath for a few seconds. Then once again pucker up the lips as if to whistle and through the small opening slowly and gently exhale the breath.—Boston Post.

The Sun In Alaska.

Noon on Dec. 21 at Fairbanks, Alaska, is identical with midnight, June 21, at the same place except that it is usually 130 degrees colder and there is snow on the ground. In winter the sun in interior Alaska rises about 10 o'clock and sinks out of sight again about 2 in the afternoon.

The temperature in the latter part of December usually is 40 degrees below zero. Sometimes it goes down to 60 below. In summer the thermometer on June 21 will often show 90 degrees in the shade, thus giving a range of 150 degrees.—Popular Mechanics.

Exchange of Courtesies.

One of the keenest journalists and wits, Moritz Gottlieb Saphir, had the better of the irate stranger against whom he ran by accident at the corner of a street in Munich. "Beast!" cried the offended person without waiting for an apology. "Thank you," said the journalist, "and mine is Saphir."

From an Author's Journal.

I mortgaged my home to purchase an automobile; then the auto, in a humorous freak, ran down and disabled for life the man who held the mortgage. And to think I had so many enemies I had hoped to put out of business with that same machine!—Atlanta Constitution.

At Our Boarding House.

"We become what we eat," said the theosophist without any excuse whatsoever.

"No wonder I feel like a menagerie," volunteered the cheerful idiot. "I've been eating hash for a month."—Philadelphia Ledger.

Bells.

The invention of bells is attributed to the Egyptians, who are credited with having made use of percussion [illegible] to announce the [illegible] of Osiris.

D/34

FULTON FELL IN A SWIFT GAME

Student Farmers Made Hits When Needed, Their Pitcher Proving an Enigma to the Locals

In a game that broke all speed records for high school teams in this section, the Fulton high school base ballists went down to defeat Saturday at the hands of the New York State School of Agriculture, of Morrisville. The final tally was 5-3 and, although the locals were out-pointed the entire route, they staged a rally in the ninth inning and had all the earmarks of a Garrison finish until a pop fly knocked it on the head. The locals showed speed, however, and deserve great credit for putting up a game fight against the older and more experienced college team. The Fultonians had a better fielding record but, as usual the hit column was not burdened with counts for the home lads, while the visitors pounded the pill hard at the proper moments.

Philpot, the Morrisville pitcher, gave one of the neatest exhibitions of slab work that has been seen here in some time. He had nothing but his glove and a prayer, but he used his thinking apparatus. Fulton boys could not seem to nick him when hits meant runs. Just to show that he had something in stock, he fanned nine Fulton lads, and many of those strickouts came when runners were perching on the pillows, begging for a bingle.

Barnes started out well, but in the fourth inning he caved and the "Aggies" bunched three hits and scored two runs. "Honey" pulled himself together and managed to plug along until the seventh when things began to look ominous again and O'Brien took the mound. One hit was the sum total of the visitors' efforts against "Ober" in the last two frames.

The visitors went out by the one-two-three route in the first. Fulton managed to get one man on by an error of Chase, the visiting short-stop who booted everything that came his way, but the runner, D. O'Brien, was marooned on second when Martin whiffed.

A snappy double play, engineered by Martin, Kraus and Keeler staved off a Morrisville tally in the second. Fulton went out in record time, Philpot pitching only five balls.

Both teams had men on the paths in the third. Morrisville, with two down started things with a hit by Dunton. Fritz left him on second with a weak roller to Barnes. Barnes drove one into Chase's slipper mitts and made first safely in Fulton's half of the inning. Keeler promptly fanned and Bray was out on a long fly to center field.

In the third, the visitors finally took Barnes' number. Robinson flied out to Thompson and Nuhn was out on a fly to Martin. Banner upset things with a two-bagger. Helfer picked out one for a single and Banner scored. George's hit scored Helfer.

Philpot actually passed a man in the fourth, but no one else reached first base for Fulton in that inning. In the fifth the locals tallied their first hit of the game against the Morrisville wizard, when Barnes hit into right field. Keeler speeded the game up by striking out. The farmers added another run to their count in the fifth. After Philpot had grounded out, Dunton hit safely, and went to third on Fritz's single. Robinson flied one to second base and Wilcox could not handle the ball in time to catch Dunton at the home station.

Fulton's hour came in the sixth. Bray flied out to center. D. O'Brien got a life on an error by Chase. Martin drove one at the same player and Chase booted again. Wilcox hit to Dunton but O'Brien beat the throw to the plate. Thompson and Kraus fanned.

The eighth was productive of two runs for Morrisville. O'Brien was on the mound in that inning and the first man, Nuhn, grounded out. Banner lined out a hit, stole second, took third when Wilcox joggled Helfer's hard hit liner and scorel when George hit to Martin. Martin had plenty of time to catch Banner at the plate but he uncorked a throw that Bray couldn't have reached if he were Larry McLean and two runners scored. Chase hit to O'Brien and after "Ober" threw to Kraus, George tried to score on the play, but was out at home by a large margin.

After Morrisville had gone out in order in the ninth the fans were crying for action from the local team and the boys went to bat with a determination to bring home the bacon. Wilcox hit along the third base line and when the first sacker muffed the throw, "Socks" made second by a hair. Thompson sent him to third with a neat bunt, but Kraus made it two down by popping to Fritz. It was O'Brien's chance to make good and the lanky lad produced the proper article in the shape of a two-bagger down the left field foul line, on which Wilcox scored. With O'Brien on third it was up to Keeler. James tried hard but a long fly to left was gathered in by Helfer and the game was over.

The outfielders of both teams put up games that savored of the big leagues. D. O'Brien, the local center fielder went back to the fence for a long fly from Dunton's bat in the seventh. Thompson took some hard chances and played his position faultlessly.

Kraus accepted fifteen chances on first base without an error, but was weak with the stick as usual. Holfer, Banner and Dunton starred at the bat for the winners.

About 250 people attended the game which was completed in less than one hour and fifteen minutes, a record for the park.

STATE ST. TEAM FELL BEFORE PICKETT

The Fourth St. School leaguers won a fast and exciting game from the State St. team on the Athletic Park diamond Saturday morning. The final score was 3-1. Draper did the twirlig for State st. and although he was very stingy with the hits his support failed him at critical times, and the winners were able to push over a lead of p runs in the 2d inning which was too much for the State streeters to overcome.

Pickett held the firing line for the winners and allowed two hits, fanning seven men. A large crowd of fans witnessed the battle.

The line-ups: State st., Walts, c.; Larber, 3b.; Crandall, 2b.; Allen, lf.; Palmer, 1b.; Sylvester, ss.; Draper, p.; Edgarton, cf.; Feldman, c.

Fourth st., Wallace, c.; Youmans, 1b.; Pickett, p.; Cole, 3b.; Lago, lf.; Rathbun, 2b.; Knight, rf.; Fitzgerald, cf.; DeBarbour, ss.

ROWANS WON IN 13 INNINGS

Pitchers Hit Hard by Sluggers of Both Teams; Weak Arms the Cause

Before a crowd of 500 people, the Red Men of this city went down to defeat yesterday afternoon at the Fair Grounds at the hands of the Rowan Stars of Oswego, in the thirteenth inning, by the score of 13-10. The game was loosely played by both teams ad was featured by heavy hitting. The conditions of the diamond made good fielding impossible and both teams are credited with hits that would have never passed the infield on a good diamond.

Johnnie Painter was in the pit for the Red Men and Feeley did the hurling for Oswego. Both men were lambasted to all corners of the lots. Twenty hits off Feeley are credited to the Red Men while the Oswego lads nicked Painter for nineteen safe bigles. Painter made his 1915 debut and his arm was in no condition for a full game to say nothing of an extra inning contest.

The visitors got to the Indian twirler in the fourth, when hits by Shainhholtz, J. Cotter and Foster netted two runs. In the fifth, hits by Heisler and Cavalier, coupled with two passes and a hit batsman, netted three more tallies for the visitors. Painter was very light on the control and passed seven men during the game.

Fulton tallied in the fuorth when B. Ingamells and Fayette came through with singles and Hart and McCullum repeated the stunt. Fulton got three in the fifth. One in the seventh and two in the eighth went to the visitors but Fulton tied up the score by bringin a quartette of tallies in the last inning.

The tenth, eleventh and twelfth rolled past with ltitle hitting and no scoring by either side. In the thirtenth, the vitistors began to think of their waiting suppers and started things. O'Neil was pased, Higgins fanned. W. Cotter also got a free trip to first and Heisler made it two down by flying out. Cavalier was safe when McCullum tried to catch O'Neil at home but failed. Shainholtz got a walk filling the cushions. J. Cotter walloped the pill into center and two men scored. Foster whiffed.

Hits by Ingmells and Brown were wasted in Fulton's half of the innig for the ext three me were easy outs.

The score:

Umpires Pringle and Van Buren.

The st Shortstops.

President Tener says the National league is better equipped with shortstops than the American. He names Bancroft of the Phillies, Maranville of the Braves, Fletcher of the Giants, O'Mara of the Dodgers, Herzog of the Reds and Gerber of the Pirates. President Johnson has filed a demurrer, declaring that his league boasts of real stars in Barry of the Athletics, Peckinpaugh of the Yankees, Scott of the Red Sox, Bush of the Tigers, Weaver of the White Sox and McBride of the Senators. Take your pick.

Players Pick Killifer.

National league players say that William Killifer of the Phillies is far and away the best catcher in that circuit, and they do not except Archer of the Cubs.

IN THE WORLD OF SPORT

Captain T. L. Huston, Part Owner of the Yanks.

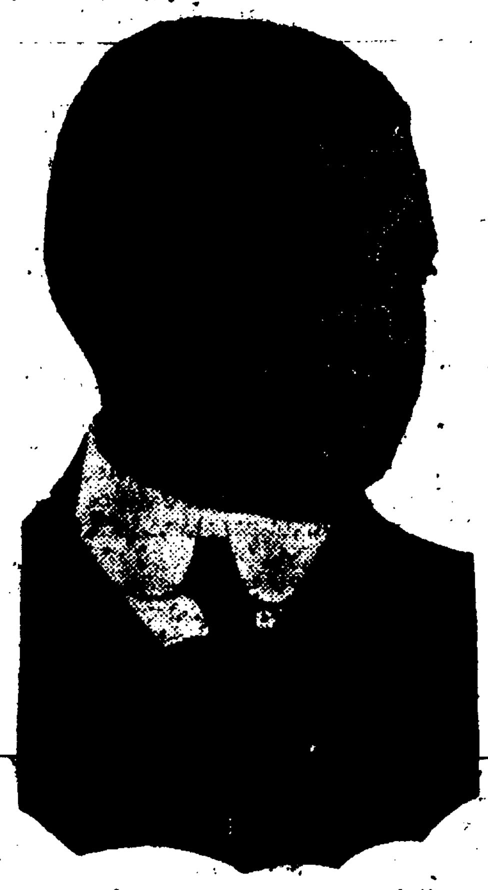

Photo by American Press Association.

Captain Thomas L. Huston, who, with Colonel Jacob Ruppert, owns the New York American Baseball club, is forty-seven years old and is an engineer and contractor by profession. He got his military title in the Spanish-American war and since that time has won fame and fortune dredging the more important harbors of Cuba. Captain Huston has always been an enthusiastic baseball fan and since acquiring wealth has desired to become owner of a big league team. It was he who made the mysterious bid for the Chicago Cubs last summer and for awhile had an option on them. He would not take the club, however, unless he could get John McGraw to manage it, and, finding that could not be arranged, he gave up the project. Last winter he and Colonel Ruppert bought the New York Yanks outright.

Mile a Minute Hydroplane.

Commodore James A. Pugh, the millionaire Chicago sportsman, has started construction of a twenty foot hydroplane into which he will crowd 2,000 horse power.

The new boat, to be christened Disturber V., will be, by all odds, the most heavily powered twenty foot hydroplane in the world, and Commodore Pugh's experiments are watched by speedboat men with immense interest. The new boat is designed by Ned Simmons of Chicago, who planned the Disturber IV., which went to England last year and was deprived of the opportunity of lifting the Harmsworth international trophy by the outbreak of the war, which caused the cancellation of the race. He expects the new Disturber to turn sixty miles per hour. The twenty footer has twenty-four cylinders.

Kling's Foresight.

Johnny Kling when he was a major league baseball catcher believed that idleness did not pay. Consequently the ex-Cub today is earning more money than he did when he was a member of the world's championship Chicago club. He is a billiard expert and in addition owns a handsome billiard room in Kansas City. And all this came about because he refused to be idle.

"I found that I liked billiards when I was a young man and devoted my spare time to that game. I did not do it merely as recreation, but with the idea that I would learn the game and the business and devote my time to it in the off season and when I quit baseball. Billiards is a scientific pastime, requiring a good eye and steady nerve. That is ideal recreation for a ball player."

A New Golf Marvel.

Harry B. Davis of San Francisco, who surprised the golfing world by beating a field including such prominent players as "Chick" Evans, Heinrich Schmidt, H. Chandler Egan and others, was never heard of in golf circles until late last summer, when his first real stunt was the defeat of Jack Neville. Davis is originally of Colorado Springs, having gone to Portland, Ore., from his home town and from there to San Francisco last fall. He gained national prominence by his performances in the tournament held under the auspices of the Panama-Pacific exposition, April 19-25.

Easier.

"After I wash my face I look in the mirror to see if it's clean," confided little Doris. "Don't you?"

"Don't have to. I look at the towel," joyfully rejoined Willie.—Browning's Magazine.

Officer Brown Gave Motor Good Try-out

Patrolman Brown will be assigned to the police motorcycle for the next two weeks, according to a statement made by Chief of Police Dyer this orning. Another officer will be detailed to the work at the expiration of that period and the men will alternate on the machine all summer. The machine was returned from the factory aSturday night, where it had been sent for repairs after one of the policemen had suffered a collision while trying it out.

The motor was given a thorough try-out yesterday by Officer Brown and is in first class condition. It was suggested today that the motor-policeman wear a khaki suit or clothes which will serve to keep his identity secret from speeders who are quick to recognize a mounted policeman and who moderate their speed while he is in sight. Chief Dyer stated that he did not think the men should be dressed in motor suits as the police have to furnish their own uniforms and every man would be obliged to buy a suit as they will all be detailed to the motorcycle.

The machine will patrol 1st st., on both sides of the river, Broadway, Oneida st., Cayuga st., 2d, 3d and 4th sts., Hannibal st., Worth st. and the state roads which are within the city limits. No vigorous campaign of arrests will be started, according to Chief Dyer, but the policeman detailed to the motor will be required to warn all speeders in the outlying districts at the first offense, and very little leniency will be shown to those caught violating the ordinance in the down-town sections.

SENECA HAS TABERNACLE.

Men Built It In a Single Day—Seats 1,000 Persons.

Seneca, Kan.—A community tabernacle was built here in one day. At 8 o'clock the business and professional men of the town gathered with hammers, saws, planes and nails and went to work. By 6 o'clock the immense building was completed.

The tabernacle has a seating capacity of 1,000 people and will be used during the summer for the Sunday night meetings and for a community center for social affairs.

The band boys co-operated in its erection and will use it for their weekly concerts. The ladies of the city prepared and served dinner at noon to several hundred people.

The Rev. Charles A. Richard is the community pastor and one of the prime spirits in the erection of this tabernacle.

Revenue from Hen's Eggs

The Census Bureau is authority for the statement that the crop of hens' eggs in this country last year was valued at $700,000,000, plus. By way of graphic comparison it is also stated that this sum is greater than the value of the average wheat crop of thec ountry for the past ten years. It is true that this enormous amount was by no means all profit for the owner of the hens, but the same may be said of any other commodity resulting from farm activities. Even if, as may well be supposed, the figures given to the census takers were exaggerated by non-mathematical farm owners, the American hen is a factor which mustb e reckoned with in enumerating the assets of agriculture.—Rochester Chronicle and Democrat.

A few broken lots of house paint at cost. Van Wagenen Inc. adv133

WARD'S BOXERS FIGHT FRIDAY

Fast Work Expected of Boys Who Have Already Made Good Accounting

Fulton will be represented in the Syracuse Arena for the second time in as many weeks Friday night when two promising young boxers from this city will take on two comers from the Flower town. Willie Meany, a protege of John ("Tunk") Ward, the local manager of boxers, will meet Young Ross, a fast young Syracuse lad, in a four-round semi-final set-to, and Eddie Beasaw rated as the fastest liltle man in these parts will meet Eddie Veau, the Canadian boxer, in a four-round bout at 116 pounds ringside. Meany will also fight at 116 pounds.

Both boys are well known here and have many good battles to their credit. They have been training faithfully under the tutelage of Ward and are in prime condition, ready to put up the battle of their young lives. Meany made a good impression in his Syracuse debut two weeks ago by hanging it on Young Crozier who is the idol of the Arena fight fans and who had never met his match untli the advent of Meany. Willie showed the Syracuse lad a few new tricks and outfought and outboxed him all the way.

Beasaw's ability is well known, in fact he is so fast and clever and packs such a punch that he has had difficulty in getting boys into the ring with him. His opponent Friday is an experienced and rugged fighter, who should be pickings for the clever local lad who excels at long range.

The boys will be accompanied to the Arena by a delegation from this city, and the trip will probably be made by automobile. Both boys will wind up theirh ard training Thursday and both are within a pound of the weight at the present time. Ward is trying to arrange for bouts for some of the rest of his string, but nothing definite has been arranged as yet.

Rubber tires for buggies, also baby cabs and go-carts. Van Wagenen Inc. adv133

LEGAL NOTICES

SUPREME COURT, COUNTY OF OSWEGO.—Edna I. Sharp, Plaintiff, against Lewlla Newton, J. Clifton Larkin, Bridget Gibbons, Henderson & Thompson Company, Defendants.

Pursuant to a judgment of foreclosure and sale made in the above entitled action, at a Special Term of the Supreme Court, held at the Court House, in the City of Syracuse, New York, on the 22d day of May, 1915, and duly entered in the Oswego County Clerk's Office, on the 24th day of May, 1915, I, the undersigned, the referee, duly appointed in and by said judgment for that purpose, will sell at public auction, to the highest bidder, on Saturday, the 10th day of July, 1915, at 10 o'clock in the forenoon, at the front door of the City Hall, No. 67 East First Street, South, in the City of Fulton, County of Oswego, New York, the real estate directel by said judgment to be sold, and therein described as follows: ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Fulton, New York, known and describel as three rods off from the East end of Lot No. 1 of Block No. 512 of the original Village of Fulton.

Dated May 24, 1915.

Italians of Fulton Will Not Leave Their Peaceful Pursuits

In spite of the fact that the Italian Government has called all the men born between 1875 and 1895 who are subjects of the Crown to the colors, and although there are at least two hundred Italians who live here who are eligible for military service under the latest edict, it is not likey that there will be any great exodus of Italians from Fulton, because of the war. In order to learn the sentiment of the Italian population here in this crisis, several leaders of the Italian element here were interviewed and the consensus of opinion seems to be that the sons of Italy who reside here are perfectly content to stay here and do not, for the most part, intend to go back to the old country for the war.

Antonio Fusco, generally recognized as the [illegible] of the Italia element here, stated this morning that there were at least 200 Italians in the city, and when asked how many he expected to leave for the war, said very emphatically "Not One!"

The same feeling seems to prevade the Italians of other cities in the United States and it is certain that the Italian Governmet will be disappointed if it anticipates the return of a large number of Italian reservists. The Italian who reach this country settle down and work for the most part and many of them would not consider a return to the war. It has not been learned whether or not the Italian government will adopt the same policy as the Greek government announced when the Balkan War started, viz: Confiscating the property of all those who did not return to fight, if they were eligible for military service. When the Balkan war started upwards of 30,000 Greeks left for their native soil in a month, but it is evident that the Italians here will not follow suit, although the war is the chief topic of conversation among them.

It had been predicted that a great labor shortage would ensue in this country if the Italian government declared war, but in view of the statements of several Italians here who are in a position to know, this city will not suffer.

ROUMANIA ENTERING WAR WITH ALLIES

London, May 25.—The Roumanian government is negotiating with the Allies. Great enthusiasm prevails.

Dr. E. J. Dillon, Rome ocrrespondent of the Daily Telegraph, is convinced Roumania will fight on the side of the Allies.

The general belief that Roumania is on the brink of war for the fulfillment of her national ideals has been strengthened by Italy's declaration of war against Austria-Hungary," says the Times' correspondent at Bucharest.

Celebrations of the anniversary of the coronation of the late King Carol were held on Sunday and were attended with unusual fervor. King Ferdinand and Queen Marie were present at a great military review.

SETTLEMENT EFFECTED IN GARDENER-WHORL CASE

The interesting case of Commissioner of Charities Woodbury vs. Ellen Gardner, the trial of which occupied all day Saturday, was settled last night when court reconvened at 5.30 o'clock. A settlement had been forecasted by attorneys for both sides Saturday. George M. Fanning, the City Attorney, represented the Commissioner, and Robert Pendergast appeared for Mrs. Gardner.

The city brought suit to compel Mrs. Gardner to maintain her married daughter, Mrs. Edward Whorl, who has been under the care of the charities bureau for some time. Edward Whorl, the husband, claims that he is unable to envage in steady labor as a result of an accident which he suffered six years ago, and Mrs. Whorl was also declared to be in poorhealth and unable to work, by Dr. Fox, who has attended the family. The Whorl family occupies a house owned by Mrs. Gardner and the mother has from time to time assisted the daughter by paying grocery bills [illegible]cing her money whenever she saw fit. Whorl has also supported his family without difficulty, except on a few occasions, until January of this year.

During the testimonf of Wrs. Whorl events which led to her divorce from her first husband, Fred Randall, a former resident of this city, were brought to light. Mr. Randall now lives in Syracuse and the divorce courts in awarding him the decree also gave him the custody of their child, Mary Randall, wo has continued to live with her mother.

The settlement effected last ebening calls for a payment of the sum of $1.50 weekly to the city by Mrs. Gardner, which sum shall be given to Mrs. Whorl for the period of three months, as long as she occupies the house owned by Mrs. Gardner. If, however, she leaves the house, the sum of $5 weekly shall be paid. Judg Cobille refused to allow any settlement which covered a period of more than three months. At the end of that time, the city must bring another action if it wishes to compel Mrs. Gardner to support her daughter further.

MRS. WELCH GETS $3050 DAMAGES

Railroad Company and Plaintiff in Damage Suit Effect a Compromise

The Ontario and Western R. R. company has settled the suit for damages brought by Mrs. Herbert Welch of 61 First st. for injuries received at the Fulton station last October. Mrs. Welch was run down on the platform of the station by a baggage truck, in charge of D. B. Soper, the baggageman. She sustained severe injuries to her side and one rib was misplaced, and as a result of her injuries she has been in poor health since.

Suit was brought in the Supreme Court and the case was dated for May 18. The sum asked was $10,000. Robert Pendergast represented Mrs. Welch.

C. W. Cullinan of Oswego, attorney for the railroad company, endeavored to effect a compromise for the sum of $1800, but this offer was refused. Two days before the case came to trial A. J. Andrus, the chief counsel of the Ontario & Western company came to this city and a conference was held, as a result of which a compromise was made, by which Mrs. Welch was to receive $3,050. The amount has since been paid in cash.

OSWEGO TO HONOR DAUGHTERS OF 1812

Three daughters of the War of 1812, Miss Esther Stone, Mrs. Lucy Elwell and Mrs. Martha Wright, all of whom live in Oswego, will receive honors at the Memorial day celebration, in the Armory, Oswego.

They are daughters of Philo Stone, who served as a private in the command of Oneida county volunteers under Major Hiel Stone, a great-grandfather. Their ancestors fought in defense of Fort Oswego in 1812.

WEATHER FORECAST

Moderate southeast to south winds, unsettled and warmer. Showers tonight on Lake Erie. Showers Wednesday and partly cloudy; warmer tonight.

BAVARIAN FORCE LEAVES INNSBRUCK

By Martin H. Donohue

From Switzerland it is reported the Kaiser intends personally commanding the army operating against the Italians. A large force of the Kaiser's beloved Bavarians is stated to be moving toward the frontier by way of Innsbruck.

The Kaiser is counselling the Austrians to be wary not to precipitate a battle with the Italians before he can take charge and handle things in his own "divinely inspired" way.

It is reported that the Kaiser at Cracow yesterday urged a corps of Austrians to make a heroic endeavor to conquer Italy. They have gone southward to reinforce Generals Boehm and Ermolis on the Italian frontier. The Kaiser proceeded to Breslau.

AUSTRIAN SUBMARINE IS NEARING VENICE

Geneva, May 25.—A number of armored trains and aeroplanes arrived at Trent today from Innsbruck. The Austrians seem to fear an attack from the Val Tellina region, and they are therefore making all preparations for that eventuality. Skirmishes occurred today on the banks of the Isonzo river, which flows into the Gulf of Trieste.

An Austrian submarine, probably from Pola, was seen off Venice this morning. Two German spies have been taken to Verona.

The Austrian Emperor's proclamation to his people, recalling the victories over Italy, has further inflamed Italian feeling.

Prince von Buelow, the German Ambassador, is expected to reach Chiasso at half-past nine o'clock tomorrow morning.

The Swiss government has informed the authorities of the Canton of Ticino that the Prussian and Bavarian diplomatic representatives at te Vatican will reside at the Episcopal Palace at Lugano during the war.

Advices from Innsbruck say that a furious crowd at Vienna broke through the lines of troops around the Italian Embassy and insulted the Italian Ambassador and the members of his staff, but the soldiers prevented the mob from entering the embassy building.

It is reported here that more than fifty Italians living in the Trentino were shot yesterday as spies because the railroad bridge at Meran was blown up.

The Italian troops on the frontier, it is understood will begin their forward movement tonight.

LORETTE HEIGHTS TAKEN BY FRENCH TROOPS

Paris, May 25.—In his report of the operations at the front made public here yesterday the semi-official observer with the French troops says:—

"The capture by French troops of the German works at Voie Blanche (the White Way) the evening of May 21 marked the victor-

FREE FALLING.

Just Collapse, Drop Limply and You May Escape Serious Injury.

It was stated in a description of a recent aeroplane mishap that the aviator had time to clamber to the upper struts of his machine and that when the crash came he was practically unhurt, the landing wheels and lower part of the machine receiving and absorbing the shock.

Flying men, too, in the early days of aviation frequently leaped from falling machines and escaped with minor injuries. There is a knack in leaping and an art in falling, and athletes and aviators know both. It is to "fall free" and to offer no resistance or as little as possible.

It is not Providence that specially guards drunken men and little children when they topple. They collapse, and as the muscles and sinews are not drawn taut and no resistance offered, but little damage and frequently none results. The bone of a limp arm would need some force to be applied before it broke. A "resisting" arm would snap almost at once. In a fall all attempts to recover one's balance, if unsuccessful, mean greater damage. Let yourself collapse—fall limply—and you may escape serious injuries. It is the strain and wrench on muscles and sinews which make the bones snap.

Fall anyhow. Don't try to save yourself—and you will.—London Answers.

Never Had 'Em.

Old Dick was an old plantation darkey. He was rarely if ever sick, and he always claimed that it was the way he had lived. One day as he was walking down the street a local merchant, taking advantage of his ignorance, accosted him thus:

"Dick, one of your best friends has just told me that you have ancestors of the worst sort."

"Now, look heah, Cap'n Gawg, I doan want to hurt nobody, but I jes' want to know who dat man was wot tol' you, and I sho will go atter him, 'cause he done gone and 'sult me. Me got ancestors? Why, cap'n, that's as big a lie as was eber told. I neber had nothin' in my life but the mumps and colic."—National Monthly.

The Telephone Pole.

The employer of a Polish girl who has learned quickly to speak English tells of her attempted mastery of the telephone. After its use was explained to her she was eager to answer every call. A ring came and she jumped to the phone.

"Hello," came from the receiver.

"Hello," answered the girl, flushed with pride at being able to give the proper answer.

"Who is this?" continued the voice.

"I don't know," exclaimed the maid. "I can't see you."—Philadelphia Ledger.

World's Longest Street.

In Seebohm's "Siberia In Asia" is thus described what is called the longest street in the world: "Siberia was half jestingly described to me as a big village, the main street of which, extending from Nishni-Novgorod to Kakh-ta, was about 5,000 miles long, where there were always half a million horses on the road and where everybody knew everybody from one end of the street to the other."

Nothing New.

"Here's a fellow eats a lump of coal on a bet."

"Well, history mentions many cases of ostentatious extravagance. Cleopatra, you will remember, dissolved and swallowed a pearl." — Louisville Courier-Journal.

Not Exactly a Compliment.

Hewitt—Ignorance is bliss. Jewett—You'd better get your life insured. Hewitt—What for? Jewett—You're liable to die of joy.—New York Times.

A Failure.

"Ma, is marriage a failure?"

"I guess so, my dear. I married your father to reform him." — Exchange.

THE GARBAGE QUESTION

The cleanliness of our city will depend in a great measure upon the system of garbage collection used. People of clean ways, who realize they may be a credit or discredit to themselves and to their neighborhood, keep their garbage in watertight, fly-proof cans and regularly part with ten cents that this source of evil odors and attraction for flies is removed.

However, the cleanly methods of the cleanly inclined individuals is not sufficient to warrant satisfaction. In the city are scores of homes where ten cents per week for garbage collections is an utter impossibility and as a result the rear of these homes is a spot infested with dogs, cats, flies, mosquitoes and foul odors. The neighbors have parted with their ten cents in vain. It is then clearly seen that until the city has a free garbage collection with regulations rigidly enforced the garbage question cannot be successfully met.

The new system of garbage collection in Syracuse as given in the American City Magazine evidently is the acme of success. It is described as follows:

The city of Syracuse, N. Y., has instituted a novel type of automobile garbage collection, by which it has rid itself of the nuisance of open wagons scattering garbage through the streets and giving off an unpleasant odor.

Two Chase trucks are used for the new service. Each is of three tons' capacity and carries 108 cans of 100-pound capacity. As the cans are not always full, the average load is about 3½ tons. Each truck employs a force of six men. Two are stationed at all times on the folding running boards. Their work is to place in position on the car the cans which are brought from the yards by the four collectors.

When loaded, the trucks go to the reduction plant outside the city, where the truck driver and two assistants empty the truck. These assistants stay at the plant; part of their duty is to wash the cans and have them ready for the next day's service. In the meantime, clean cans, which have been used on the previous day, are placed on the truck, which returns to the city for the next load. The trucks are neat and attractive in appearance, and if the system, which is in the experimental stage, proves satisfactory, a sufficient number of trucks will be purchased to extend the service over the entire city.

SELECTING MEN

Let us assume that you the going to buy a horse today; that you want a truck-horse, a heavy-harness horse, a real hard-working animal—a horse used to pulling and hauling. You would not buy a fat, lazy, flabby, sleek-looking horse. You would select a strong, sound, sinewy, steady animal for hard work. This is horse sense. Now let us assume that you want a man to do manual labor, hard work, What kind of man would you hire?

Now let us assume that you are going to select a ball team for the coming season. You want well-trained, disciplined minds—men with heads, hands and feet to play the game. With special care you will inquire into their records of these men. You would not hire fat, slow, sluggish minds and bodies.

Now let us assume that you want men for your office, your organization. Do you think it wise to employ men who eat two pounds of steak, and drink two quarts of ale, and smoke a pack of cigarettes and get to bed after midnight? Would you expect to win in business with such a bunch of rummies?

Business is a bigger game than ball ever thought of being. It requires the very best brains and brawn in men, and the very best men cannot be found out of their class.—Silent Partner.

JURORS DRAWN FOR JUNE COURT TERM

The following 56 trial jurors were drawn Saturday at the County Clerk's office to serve at the term of County Court to be held at Pulaski, by Judge H. D. Coville, Monday, June 7:

Oswego City—Patrick Donovan, Albert Decker, John R. Otis, Herman Czirr, Robert O'Hara, Michael Lykee, John Parker, John J. Scanlon, Edward D. Aiken, William Brady, John C. O'Brien, Peter Hickey, John Faherty, James Shay, E. J. Andelfinger, Dennis Regan.

Oswego R. F. D.—James A. Nichols, Charles Rhinehart, George Dart, John Davis, David Simons, G. Riley Hall, Samuel Coe,

Fulton City and R. F. D.—Edgar Coe, James A. Allen, Hartley Bateman, Melvin Burton, Elmer E. Hare, Charles M. Allen, Fred O. Howell, James Bogue, Charles B. Merritt, Henry Whalon.

Sandy Creek—Lewis Sherman, Edward M. Ingersoll, Arthur Presley, William Wade, James Christman.

Granby—Alonpo Lukentelly.

Constantia—Homer Dunn, Charles Blowers, James Penoyer.

Hannibal—Frank Stevenson.

Williamstown—George Hart, A. L. Jennings, Frank Pappa.

Schroeppel—Charles Spencer, Elijah Henderson, Henry Reynolds, Marin L. Porter.

Richland—Albert McKinney, Edward Boyd.

Mexico—Oscar Tooley.

Hastings—Edward Heagle.

New Haven—Gilbert Putnam.

Parish—James Smith.

Staked All and Lost

Mr. Barnes was never stronger nor Mr. Roosevelt weaker than when the editor brought the libel suit. The plaintiff would have won at Syracuse had he accepted the ekplanation of the defendant, which was substantially a retraction and an apology. Deciding to stake everything on a complete vin diuation by a jury, whirh would mean the branding as a slandered of a former President of the United States, Mr. Barnes must accept the result without a murmur. Possibly Mr. Roosevelt does not ascend as Mr. Barnes descends, but he certainly gets new life and a chance to deal, as he will, with the weaker men Barnes held in line, for reinstatement in the party. How far he can go may depend upon himself. Barnes will no longer be a factor in the relations of the Republican party to the apostle of violent righteousness, who offers to give it the halo he has insisted it needs. With Barnes laid out the cause of all the "burglars" of the Chicago convention suffers. Every man especially denounced by Roosevelt had regained prestige in his own state. No doubt every one of them looked toward Syracuse for the extinguishment of T. R. If Barnes couldn't check him Penrose and other foes may not try.

It may be granted that the trial revealed the colonel as insincere, as a fakir, an ingrate and an associate of the political forces he calls abhorrent. But the public doesn't mind that. It is satisfied with the headlines. The colonel won. There is nothing made by analyzing success.

Barnes may call himself the victim of the judiciary system he fought to protect; the colonel must be a convert to its integrity. There can be little question as to how much Barnes loses; it is a problem how much Roosevelt wins.—Watertown Standard.

Swiss in Hospitable Mood

Little Switzerland, with an area of less than that of Vermont and New Hampshire combined, is keeping a stiff upper lip, notwithstanding that, with the threatened entrance of Italy into the war, she may in a day or two be completely surrounded by great nations at war. More than that, she takes an optimistic tone, saying not only that business conditions within her borders have been showing marked improvement, but that her majestic mountains haven't lost their heads but are still at the old stands, desirous of receiving tourists from this open handed country.

The land of the Switzers suffered business depression after the war broke out, but it has been recovering itself. About half its army has been demobilized, the output of its factories has increased greatly of late, the earnings of the railroads have become about normal, and it apparently longs for the return of American sightseers.

The Swiss have been buying foodstuffs and raw materials heavily in this country, and they perhaps feel that rich Americans are therefore under some obligation to sow their hills and valleys with dollars in the generous fashion that has been their wont. In view of the Lusitania disaster and the present attitude of Italy, it is highly probable that there will be an interruption in this prodigality. Americans welmoce Swiss trade, but their own country looks pretty good to them just now, and they think it may be much more comfortable than some others. If the Italians should grapple with the Teutons, there might not be elbow room enough in Switzer land to suit a lively Yankee suffering with an attack of Wanderlust.—Rochester Chronicle and Democrat.

BAN IS PLACED ON BASEBALL LOTTERIES

The reform wave anent baseball pools and other lotteries, which is sweeping along the Niagara Frontier, has struck the Tonawandas. The police say they will not permit tickets for baseball pools or other games of chance to be sold here and any persons violating the law will be haled into court at once. Rumor had gained circulation that this sort of gambling was going on unrestricted in the Twin Cities.

SAVINGS BANK IS NOT A LA DUE CREDITOR

The Evening Times is informed that the claim of the Fulton Savings bank against the LaDue property which was in the form of a first mortgage on real estate in the city of Fulton amounting to $3,000, was paid in full February 4, 191g, so that the Fulton Savings bank is not ow creditor of the bankrupt.

More Difficult Task to Find Something to Take Place of Saloon Than to Close Saloon

Written By Charles Stelde and read to the Presbyterian General Assembly

The church has a tremendous opportunity to demonstrate the effectiveness of this marvelous thing that is called "the Gospel." But there's also a danger that some of us imagine that the hardest part of the task has been finished.

The average commissioner to the Presbyterian General Assembly is confident that the temperance program of the church is winning out, and that soon the fight against the saloon will be over. But your average commissioner doesn't know, in the first place, that the per capita consumption of intoxicating liquor in this country has increased from four gallons in 1850, to nearly twenty-three gallons in 1913, and that the increase has been practically continuous from year to year.

Furthermore, he doesn't stop to consider that when the saloons are closed, his work has just begun. What's to take the place of the saloon in the life of the average working man? Somebody will be compelled to face this poposition, seriously. The attitude of the boode fighter in the assembly must be not only destructive but constructive. He must not only close down the saloon, but he must open up something else. And the latter job is much more difficult that the former.

Country as Field for Work

It must have been apparent to those who attended the rural life mass meeting in Central Church yesterday afternoon that the church has a big job in the country. Poor farmers will always be poor supporters of the church, therefore the prosperity and continuance of the country church depend upon thhe prosperity of the farmer, but the country preacher must be a constant inspirer toward better general conditions on the farm, and since social advantages are so meager i the country, the church must in a peculiar sense become the center of the life of the community, even more than is the case in the city.

Several of the sermons preached in Rochester churches referred to the problems found in the city. It was pointed out that the city is the great whirlpool, into which all great social and religious problems lnally center. One-tenth of the population of theh United States lives in the three cities of New York, Chicago and Philadelphia. More than one-half the people in New York state live in New York city. The tendency of the people toward the city is a world phenomenon And every attempt to move the city's poor onto the farm will result in failure, because every such effort is flying into the face of inexorable law. What the country needs is not more farmers but better farmers. That's why the program presented by Dr. Warren H. Wilson of the assembly's Home Board for the improvement of the farmer, is sound.

This much is certain, however, the country will never solve the problems of the city. The country has troubles enough of its own. If it were possible to persuade a thousand thin-blooded men from the tenements to move on to the farm, they would meet on the road a thousand husky young farmers on their way to the city, because they had failed to make good on the farm.

Immigrant a Church Problem

When Dr. Cornelius M. Steffens was nominated for the moderatorsnip, several references were made to "the problem of the immigrant." Much will yet be said upon this subject. The Home Mission Board of the denomination has for several years been sounding the slogan. "A Million a Year!"—not dollars, but immigrants, who have been landing on American shores. The fact is, in spite of the rush of foreign-born to this country in past decades, the percentage of foreign-born has been just about fourteen for half a century. It hasn't varied more than one per cent. from this figure for fifty years. In talking about the "million a year," no account has been taken of the hundreds of thousands which annually returned to the fatherland.

Those who remained undoubtedly constituted a problem, although, as Dr. John Dixon, of the Home Board once asked the commissioners of a previous assembly, "How would you like to be regarded merely as a problem?" But the biggest problem, so far as the workingman is concerned, is not the immigrant as he lands at Ellis Island or some other port of enty, but as he advances in his experience as an American citizen.

Workingmen's Spare Time

The Home Board recently made a study of how workingmen spend their time. This was a most comprehensive investigation; covering other important phases of workingmen's lines. It was discovered that as a workingman increased in intelligence and general prosperity, and as the number of hours per day that he worked decreased, the less he was interested in what the church had to offer him. That is the real problem of the workingman in the United States so far as the church is ronrerned is not the overworked, underpaid man, but the high-grade artisan.

This man, according to this study, was being won by the labor man, by socialism, and by other big social and ethical movements which had become for him substitutes for the church. Apparently, then, the church has a big task ahead, when through the many influences now at work, the immigrants now coming along will develop into full-fledged American artisans.

The Week in Business

Domestic Consumption Affords Expansion, Says Dun's Review

New York, May 24.—The uncertainty regarding the European situation, and theb roadening scope of the war, have occasioned some hesitation in general business and reduced the volume of trading in the stock and other speculative markets. The effect of this, however, while adding to the underlying conservatism, has not materially changed the recent trend toward normal conditions in the principal industries and trades. The improvement has held its own; and as the special advices received this week from ninety leading cities clearly show is a slow but steady expansion in business. Activity is most pronounced in the trades that benefit from the big war orders, but progress also appears in domestic consumption, especially in the agricultural sections, which have profited by the high prices for farm products and aren ow sustained by the prospects for large crops this year. It is, moreover, shared to a considerable extent by the East, where liberal investment of captial has enabled many large loans, both foreign and domestic, to be taken up. Bank clearings and railroad earnings have increased. Money continues easy and more gold has been re deived from France. Collections are more prompt. Exports, while not so imposing are still heavy. The iron and steel industry is making gains, in spite of the international uncertainties, and urgent foreign buying especially by Russia, is supplemented by freer orders from railroads at home. The dry goods markets there is, in the main, a steady distribution and in some lines much activity, while exports of woolen goods are large. The shoe trade is moving slowly, but some improvement in present conditions and in prospects is noted. Retail distribution in all branches is affected for better or worse by the varying weather conditions in different parts of the country. The forward movement generally is slow, and the fact that there is no disposition to assume large speculative risks, in view of the international conditions with their serious problems, is altogether a healthy feature. While there has been some reduction in the volume of exports, the total—about $51,000,000 in the most recent week—is over $16,000,000 larger than the imports, so that the foreign credit position of the United States is further extended. Although fluctuations on the Stock Exchange were irregular, the general undertone was firmer and the average of 60 railway shares rallied from last week's low point of 77.12 to 77.94 Sensational reports of crop damage in the Southwest caused an early sharp rise in wheat, but all of the initial gain was subsequently lost. Cotton, however, was steadier, but the general tendency of the leading commodities was downward. 23 advances and 32 declines occurring this week in the 321 quotations regularly compiled by Dun's Review.

The arrival of 160 carloads of strawberries in New York in one day ought to have provided a sufficient supply to give the restaurant strawberry shortcakes a ruddy glow.

A Sermon Preached Sunday by the Rev. Charles Olmsted of the First Congregational Church, Fulton

(Continued from Yesterday)

III. The means of salvation is the blood of the Lamb of God shed for a guilty and sinful race.

"Neither is there salvation in any other; for there is none other name under heaven given among men whereby we must be saved."

Our salvation is made possible because God through Christ has bought us and sought us, meeting required conditions by His pure and spotless life, not only, but bearing our blame in his body on the tree. Because He loved He gave, and from the earliest apostle to the latest martyr, all have the same story to tell.

'Twas through the lamb's most precious blood
They conquered every foe;
And to His power and matchless grace
Their crowns of life they owe."

Like the workman who carved upon the walls of a church the figure of a lamb that had saved his life in falling from the roof, a similar epitaph might be ours—"Saved by the Lamb."

IV. The specific agency in evangelism is man. The work cannot be done by machinery. The best fruit is hand picked. The work cannot be borne forward by its own inertia. The effort was made to bore the Hoosac tunnel with a huge augur. At the left of the eastern entrance you may see the beginning that was made, but this plan was soon abandoned.

We may have groups of laborers, but of machine methods we need to beware. Each case calls for special adaption. Tasks vary and those who would respond must hear and heed the call. God speaks by His Spirit, but he has committed unto us the word of reconciliation. Some soul must intercede, directly or indirectly, to inform man of duty, or by appealing to his reason or sensibility, to arouse him to act for himself. Angels and ungodly men are unfitted for this work. They do not have the necessary position, nature or power. He who gives this great work to man honors him thereby. No greater task can be undertaken. There are great philanthropists, scholars and financiers but the least in the kingdom of God are greater by far.

V. We come now more fully to Paul's method in this great work. He says, "For though I was free from all men. I brought myself under bondage to all, that I might gain the more. And to the Jews I became as a Jew, that I might gain the Jews."

So of other classes, one would think, at first, that he was a shrewd and scheming politician, out in the field to buy votes, or a weathervane, whiffling about to suit the wind. But it was only in some non-essential that he seemingly set aside principle and preference. He cared not a fig whether he was Jew or Gentile—and he was, both, whether amenable to law or not, whether weak or strong, he was bound to the truth, to faithfulness and to principle. He could use sweetmeats conscientiously. No serpent could have been more tactful or sagacious. If he had been a parent he wouldn't have whipped his child and then apologized for it. Had he been a teacher he wouldn't have said, "You may this time, but you know you ought not." Had he been a doctor he wouldn't have said, "Your case is hopeless but I will do what I can." As he was a fisher of men, he never said, "Bite, you dogs, you." His tactfulness is everywhere on record. The name of Him for whom he stood appears ten times in the first ten verses of this epistle. He never flattered, wheedled or cajoled, but, on the other hand, he did not tell his readers what a disreputable place Corinth was. He will put himself on terms with his hearers before he speaks in reproof. He tells them that they are enriched in utterance—outerance. They had the gift of divulging what they possessed—the science of ejection. They had eloquence and were graduates of the school of expression. They could tell what they knew and had something to tell. They could reproduce what they had received, were enriched in all knowledge and came behind in no gift. And to these quarries of blessing and riches Paul would build a highway. He lifted up his opponent that he might bring him down to a level of usefulness.

Some people have an insane genius for saying and doing the wrong thing. One who had dragged her husband to a religious service, rose and said, "Go ye out into the highways and compel them to come in." He never appeared again. The worst kind of tact I know, hems and haws and beats around the bush with a patronizing air, instead of saying squarely what the speaker wishes to utter. Our minister did better when at the close of the obituary notice of a cranky, quarrelsome, profane man, he added, "One who will be missed."

Too much concession to the spirit of the age is to be deprecated. Daring is sometimes turned to diplomacy. We may do in Rome what the Romans do in non-essential things, Christianity possesses a divine breath and adaptation that rises above church forms and polity and uses every force that can be found to further her mission of peace and good will. Adaptation to environment is the spontaneously generated product of a divine mission. With Paul, a burning desire to win men opened his mouth and enlarged his heart. Every legitimate force paid its tribute to his zeal.

In patience, afflictions, necessities, distresses, stripes, imprisonments, tumults, labors, watchings, fastings, by pureness, knowledge, long suffering, kindness, love unfeigned, the word of truth, the power of God, the armor of righteousness on the right hand and on the left; by honor and dishonor, by evil report and good report, as deceivers and yet true, as unknown and yet well known, as dying and behold we live, as chastened and not killed, as sorrowful yet always rejoicing, as poor yet making many rich, as having nothing and yet possessing all things; in season, out of season pressed out of measure, above strength, despairing even of life; a Hebrew, a minister, a martyr to the cause; in labors more abundant, in stripes above measure, in prisons more frequent in death oft; scoured by his own people, beaten with rods, stoned, shipwrecked, spending a night and a day in the deep; in journeyings often, in perils of waters of robbers, by his own countrymen, by the heathen; in the city in the wilderness, in the set, among false brethren; in weariness and painfulness, in hunger and thirst, in cold and nakedness; bearing the care of all the churches; taking pleasure in infirmities, reproaches, necessities, persecutions, distresses for Christ's sake. Thus he labored on and poured forth his life till at last the little procession moved out through the Ostian Gate at Rome and rest came to ris weary brain upon the headman's block.

There is doubtless need of adaptation to the intellectual and critical londitions by fhich we are surrounded, the need of af riendly bearing toward scholarship without subordinating spiritual good, meeting the caviling intellectualism of skeptic with a finer brand, but immediate action is required and speculations must not be carried too far. Industrial commercialism and materialism are also to be met, and applied science to be welcomed and utilized. We need also to keep in line with the democratic spirit of the times such as the movement for which the Christian Endeavor Society stands. The larger and wider philanthropy of today must be harmoniously encountered, as we look not only upon our own things but also on the things of others.

The modern idea is that Christianity has been introduced to save man, body and soul. Regard must be held for the temple in which the soul dwells if we are to rescue and redeem its life. It is work that cannot be successfully postponed and the fear of failure is not a legitimate excuse for holding back. All classes furnish a fruitful field, especially the children.

Francis Xavier, worn to exhaustion with days and nights of service, said, "I must sleep. If I do not, I shall die. Whoever comes waken me not." Retiring to his tent, he returned with the pallor of exhaustion and said to his attendant "I made a mistake. If a little child comes, waken me."

The determined method of Paul is fruitful in suggestion for us.

If we can help men realize the greatness of their nature, the effects of sinful living, which physicians are able to reveal, and get them to realize the munificience of God's love and power, we shall accomplish something.

There is need of the martyr spirit if we would suceeded. This was the spirit of Horace T. Pitkin, who looked out from his missionary compound in China to see the ravaging havoc of the Boxers and knew that he would not be spared to see the light of another day. Turning to his attendants, he said in substance, "I want my son to be taken to America for his education and then return here to preach the gospel to those who are carrying on this destructive work."

This was the spirit of Thornton in Alaska. As he sat at his desk he wrote to a friend, "I see a ship coming in. On that vessel there will be rum. Some of my people will drink some of it, and then only God knows what will happen." Soon after, the officers of the American Missionary Association in New York received a telegram saying, "Your missionary, Mr. Thornton, was shot here last night by a drunken Esquimo."

VI. Were there time it would be interesting to note the wisdom of this work. It saves a soul from death and hides a multitude of sins.

"They that be wise shall shine as the brightness of the firmament and they that turn many to righteousness, as the stars forever and ever." Surely, "He that winneth souls is wise."

VII. We need, in it all, the example of one who touched our natures as no one else. Like the work of the potter, which needs the human touch, it needs the touch of love, the touch given by a mother to a wounded soldier boy in the hospital, the touch of power, sympathy, knowledge and skill, such as Mendelssohn gave to the great organ at Freiberg when the custodian had refused that he should play more than a few notes.

It is a work that calls for the touch of inspiration, such as led a soldier to say to Wellington by whom he had been delegated for a difficult task, "Let me have one clasp of your all-conquering hand and then I can do it."

Yes, we need the touch of the pierced hand as we go forth in the dewy freshness of morning to the duties of life.

The home is a fitting sphere of labor. Plain talk, anywhere, helps. Do not leave your child to learn from questionable schoolmates the sacred and delicate questions of human being. Neighborliness aids. The loan of a helpful book, the speaking of a cheering word, the writing of a friendly letter may be the cup of cold water in the name of a disciple, that shall not lose its reward.

Faithful effort is necessary, the determination displayed by the snapping turtle that dies hard and will not release its grip after its head has been severed from its body. During the weary weeks in which a sick lighthouse keeper waited the return of the government vessel, his faithful wife and childre nwere unable to keep the machinery repaired, but they kept the light revolving every night by hand.

Prayerful faith must not be omisted. This was the means of turning from darkness to light, men like Paul the persecutor; Augustine, the sensualist; Joseph Barker, the atheist; John Bunyon, the worlding, and son on. There is need of effort on every side. The captain of an ocean vessel was speeding through the waters when he saw a signal of distress some distance away. A glass revealed one man on a piece of wreck. To go to the rescue the ship must be put about and much time would be lost. "No," said the captain, "some other vessel will pick him up." He speeded on, his ship was in port in good time and he was commended for his swift voyage. But he could not get out of his mind the memory of that signal of distress out on the wild and tossing sea. The sight of that lonely, helpless voyager, that forlorn and shipwrecked brother, hungry, chilled, hoping, fainting, despairing, praying that in his perilous condition a sympathetic gaze might reach him and give him help ere he lost his hold and went down, haunted that coldhearted captain and could not be forgotten.

Do we not know of some to whom the way is long, the waters dark, strength almost gone, while the lashing surges of doubt and temptation roll their foam over a disordered life?

Are we hurrying on, these busy days unmindful of signals of distress on the great desolate wastes of human life? No call is heard, but can we not see where help is needed and would be, welcomed and blessed? I know how busy some are. Another yard of that fascinating lace must be made for the garment planned. That book must be finished, that curtain washed, dress mended, picture mounted, and piece of needlework completed. And all the while that clinging soul is at the point of letting go. Shall we turn awaf from our business, pleasure, ease, money getting and petty ambitions to rescue such as are within our reach.

Oh, the joy of getting into this game or redemption. It brings fellowship with the choicest people God ever made and clothes the heart with warmth and delight.

Alas! some know nothing of this joy. I see them coursing here and there on errands about as important as conventions to cultivate and develop earth worms whose tails shall not be too long for the rest of their bodies.

Shall we say we have no time to rescue our brethren, no time to lift up the fallen, or wipe away a tear?

Let no plaintive voice, no pleading opportunity, no memory of the perishing haunt us as "the stately ships go on, to their haven under the hill." Better is it for us so to live that as our bark enters the haven of rest we may say, "I am become all things to all men that I might by all means save some."

ORGANIZE WOMEN FOR HOME EDUCATION

Mrs. Schoff Has Already Enrolled Over 20,000 Members.

Washington.—The bureau of education is much interested in the tour of the country in the interest of home education by the National Congress of Mothers' and Parent Teachers' associations.

"While child welfare conferences are being held by the state branches of the Congress of Mothers in Alabama, Georgia, Connecticut, Mississippi, Missouri, Maryland, New Hampshire, Utah and Wisconsin," the bureau announced, "the officers and leaders of the congress, accompanied by repre-

Photo by American Press Association.

MRS. FREDERIC SCHOFF.

sentatives of the bureau of education, are crossing the continent, holding organization meetings in many of the western states. This tour is intended to make the benefits of the annual conference felt as widely as possible.

"This year's work of the congress is in close connection with the home education division of the bureau of education. Mrs. Frederic Schoff, president of the National Mothers' Congress, is director of the home education division, which, since its organization in September, 1913, has enrolled over 20,000 women from all parts of the country interested and able to co-operate in organizing parents for study of child nature and child making.

"The plan of the home education work, as revealed in the Congress of Mothers and in the home education division, is 'the organization of the parenthood of the world for study of childhood's needs and for the promotion of child welfare.' In the conferences which the congress proposes to hold some of the topics to be discussed are: 'Peace,' 'Encouragement In Habits of Thrift and Industry,' 'Spiritual Development of Children' and 'Helping Wayward Children.'"

Hospitals For Animals.

Rome.—The Society For the Protection of Animals announces that if Italy goes to war it will maintain four big hospitals for sick and wounded horses.

HIS TOKEN OF INDIGNATION.

Silk Man to Fly Flag at Half Mast Till Lusitania Is Avenged.

From an observatory on Garret mountain, overlooking Bella Vista, the beautiful suburban home of Catholina Lambert, millionaire president of a big silk firm at Paterson, N. J., an American flag flies at half mast. It was placed there by Mr. Lambert the night following the Lusitania disaster and will remain there, he says, "until the United States gets some satisfaction for the loss of our fellow citizens' lives."

"I have been a citizen for more than a half century and I boil with indignation when I think of this slaughter," declared the silk manufacturer.

...ay Women Can Be Relied on to Use Ballot Wisely.

All Washington state seems to have risen in wrath to repudiate Judge William H. Snell's charge, in a Massachusetts paper, that the women of Washington have not made a success as voters in his estimation.

Senator George U. Piper of Seattle, Wash., was both indignant and amused to find upon the occasion of a visit to New York that the record of the women of his state had been belittled by Judge Snell. "I could name not one but fifty instances to prove that the women can be relied on to use the vote for the good of the state and humanity," he told a member of the Empire State campaign committee and began forthwith an enumeration that reflected his direct experience in the history of the politics of his state. "It was the women of Washington who were my reliance when I was trying to force the passage of the women's and minors' minimum wage law," he wound up. "It's to the women one must look for help every time in trying to put through legislation of a social and humane natuse."

Senator Piper declares that the best reasons for woman suffrage in Washington are the opponents of suffrage. He says every white slaver in the state is against it; every exploiter of woman and child labor is against it; every enemy of a compulsory workmen's compensation law is against it; every liquor dealer, distiller, brewer, divekeeper and hanger-on is against it. He says it was the suffrage that opened the eyes of the supreme court and the legislature to what was due women. He says woman suffrage has brought power to the home and that 90 per cent of the men of Washington would as soon sacrifice their obligation to statehood today as to deny the suffrage to women.

The Woman's Club of Tacoma likewise refutes Judge Snell's statements in a crisp presentation of facts. "Having had but two representatives, the women can hardly be held responsible for all the freak legislation," writes Martha B. Gaynor, the club's president, to Mrs. Carrie Chapman Catt, "and in the face of such criticism as Judge Snell chooses to give us it is encouraging to know that we are responsible for strenuous and insistent work for prohibition, food sanitation, regulation of labor conditions for women and other constructive measures."

WOMAN'S PLACE.

It Really Seems to Be Wherever She Can Do the Most Good.

In response to the call of the British government for women for "special war service" in occupations usually carried on by men over 30,000 women had registered by the end of April. Six thousand of these declared themselves willing to work in armament factories, 4,000 in clothing industries, over 1,000 registered as shop assistants and 5,000 for clerical work. More than 4,000 applied for dairy work, gardeners' positions and various branches of agricultural work, and the government has offered to give the latter a fortnight's training in agricultural colleges, paying them meanwhile $5 a week as a living allowanse.

In addressing a meeting of the committee formed to encourage recruiting among employees in the wholesale and retail distributing trades of the country Premier Asquith reported that he had seen 3,000 or 4,000 women manufacturing shells in one of the largest engineering works in Newcastle. He pointed out that if good work could be done in an occupation so far removed from the normal activities of women it ought to be a far easier task in other trades. Prominent suffragists are urging the government to give the women the same pay as men received and also make some provision for them when the war is over and this special service comes to an end. They have received a promise that women employed on contract work for the government shall be paid the same piece rates as men, but are refused equal pay on the salary basis.

A regiment of women a thousand strong is quietly drilling at Liverpool It is composed of soldiers' and sailors' wives. The government is planning to enroll these women as orderlies in the local hospital.

In Glasgow the experiment of employing a dozen women as street car conductors has proved so satisfactory that the tramway committee has decided to have women fill all vacancies caused by men enlisting in the war. This one opening is expected to give occupation to about 400 women.

Billy Sunday says that tennis is a "sissy game." What would he say about croquet?

A Practice Quite Common Abroad Might Well Be Made General Here.

At small expense the denizens of a city can easily help in a material way to make it more beautiful. The beauty of many foreign cities is heightened by the co-operation of the inhabitants in placing in the windows of their houses or apartments small flower boxes. Nothing makes for cheerfulness more than a profusion of greens and bright colored plants. Some residents of a few of our cities now carry out this beautiful practice. If residents were to place small flower boxes outside the windows of their homes little trouble or expense would be involved. The cost would be trivial, and the care of the plants would take but a few minutes a day.

In all our larger cities the apartment house is coming more and more into use, and great numbers are now in course of construction. Builders might help make the city more beautiful by constructing in these apartment houses window boxes ready for use. Care must be taken that they do not fall.

MAYOR'S PUBLICITY PLAN.

Atlantic City Executive Would Have Advertising Done by Municipality.

To systematize resort publicity, which heretofore uas been largely a matter of individual enterprise, is the purpose of Mayor William Riddle. He expects eventually to have the municipality assume entire responsibility for advertising Atlantic City, N. J., and securing conventions, making ample provision through tax levy.

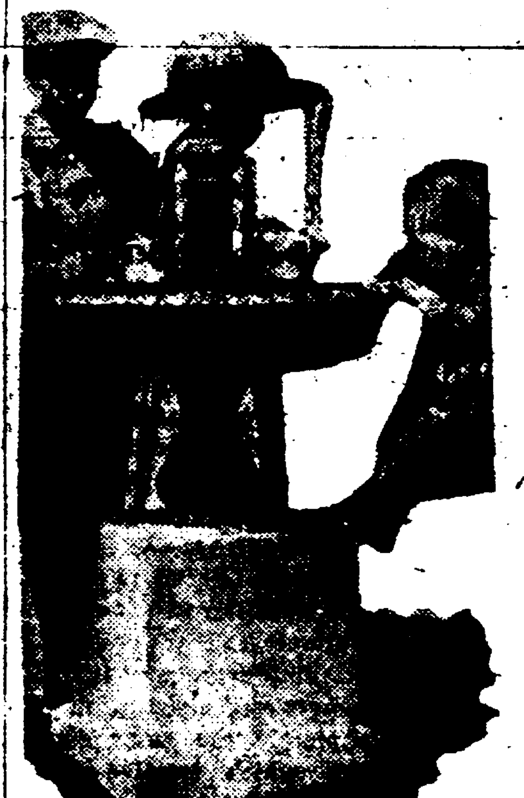
"We haven't been doing this thing as it should be done," Mayor Riddle said recently in announcing his intention to insist upon an initial appropriation of $25,000 for publicity and conventions in this year's budget. He believes that if the hotel men and other live citizens give the municipalization of publicity approval the appropriation can be doubled next year.

"There isn't any place under the sun where there is greater need of advanced methods for obtaining conventions and great numbers of visitors," the mayor continued. "Providing health and pleasure for great crowds is Atlantic City's business—our only business, because we haven't any industries. Yet we have been doing our advertising in a hit or miss fashion, depending upon individual expenditures by hotel men and a publicity bureau supported by a small number of people.

"What we need to do is to follow the lead of cities where this thing is done much better and put our publicity upon a business basis, financed as we maintain our police and fire departments and the board walk."

Fountains In Parks.

Fountains in city parks not only help to beautify the park, but are very popular as drinking places for the children who get thirsty at play. On warm days these fountains are apt to be surrounded with children, to whom drinking in this fashion seems to be



CHILDREN DRINKING AT A PARK FOUNTAIN

a part of their play, so thoroughly do they enjoy it. Also these fountains are much used by the birds, and these little creatures come regularly to them in the early morning and in the evening as well. Altogether these fountains are a boon and a blessing, and their multiplication should be encouraged.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 25.—Evidently determined to leave no stone unturned in their endeavors to have the Constitutional Conventio take up the propositions they advocated to Chairman Elihu Root some weks ago, the members of the committee representing national and local engineering socities, are again renewing their efforts to have preseted a number of recommendations which in their opinion will materially benefit the construction of public works in the State.

After they had discussed with Chairman Root theif ideas as regards to amendments to the Constitution, the members of the committee referred to above left Albany to prepare the proposed amendments advocated generally by civil, electrical and mechanisal engineering sorieties of the State. Thei arguments upon whirh the members of the committee base their belief that there should be amendments to the Constitution arise from their contention that there are few functions of government greater than the administration of public works and the regulation of public utilities.

It is maintained by the engineers who are seeking to have their recommendations adopted, that under the present Constitution the way is open for each two-year administration to change completely the management of enterprises which envolve operations extending over long terms of years and which can be carried out efficiently and economically only through to adhering tow ell considered plans determined at the outset.

They further contend that under current practice, changes often are due not to proven incapacity of superseded officials, nor to established merit of their succesors, but rather to political expediency.

It is pointed out that professional engineers are conversant with existing defects in the administration of public works and the regulation of public utilities as the result of conferences and discussions held upon the subject.

The engineers of the State are of the opinion that since engineering works and organizations are unfamiliar matters to many persons, and have not hereotfore been given substantial recognition in the State Constitution. For this reason, and because of the very large expenditures involved, and on account of the numerous interests affected, they earnestly urge a very careful study of these governmental functions.

Perhaps the most important of the amendmets to the Constitution desired by the engineers, is the one which would create a department of engineering and public works, to be created for the purpose of having charge of public lands and boundary surveys;of buildings, parks, highways, canals and other public works. "It is aimed to have this department divided into suitbale bureaus and that each bureau charged with responsibility for engineering work be headed by a chief engineer, selected by the three commissioners to be appointed by the governor to have charge of the proposed department. Twelve year terms of office for the commissioners are recommended.

A department of public utilities, with five commissioners, is another recommendation of the engineers. This department would be given jurisdiction over all comon carriers, water supply, irrigation, drainage, gas, power, lighting, heating, intelligence, transmitting and other public utility corporations operating within the limits of New York State, including similar activities on the part of any other State department or political subdivision of the State. The terms of office of the commissioners should be ten years, the engineers believe. Technical men are urged for appointment as well as men of expreience along public utility lines.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

A frost is about as welcome at this time in the month as a German sub-marine would be at the port of Rochester.

HELP BOYS

Business Men Help Club Members to Buy Pure-Bred Hogs

A number of banks in the South which have found it profitable to help farmers introduce better stock have found that it is a good investment to lend money to the boy and girl members of the pig clubs with which to buy good young sows. This new movement to encourage children to take an interest in agriculture seems to have started in Arkansas and has spread to other States. It is very active in Georgia, where in 10 of the 14 counties in which the pig-club work is now being carried on the banks have offered to lend money to junior members for the purchase of pure-bred pigs. In other counties wealthy residents, seeing the advantage of the plan, are also assisting the children with loans.

In some instances the indorsement of the member'sp arent or guardian is required when a loan is made, in others no security is asked. In all of the counties, however, each boy who borrows is required tog row one acre of corn so as toh ave abundant feed, have some corn to sell, and pay off his obligations. A bank in Brooks County, Ga., last year loaned as high as $10 each to boys over their own signature without security,and in only a few instances did the borrowers ask for an extension of time.

This movement by the banks instills thrift into the boys and often starts them with bank accounts. One bank in Macon has set aside $500 this year to loan to boys who wish to purchase pure-bred pigs. Recently a well-to-do farmer came into the bank and indorsed his son's note for $10. The cashier asked him why he did it when he had a substantial checking account of his own in the bank. "Oh, I just wanted to see how the boy handles this obligation. If he does not pay it, I will, but it will be worth $10 to me to know what kind of boy I have," replied the farmer.

An Endless Chain of Pigs

In one county a wealthy man wanted to do something for the worthy poor boys, so he bought pure-bred gilts and loaned them to 20 boys. These boys must join the pig club and do all that is required by its rules. This fall their hogs must be bred and next spring two gilts must be delivered to the owner by each boy at weaning time. When the boys have complied with all the requirements the mother and remainder of the litter become the property of the boy. The two gilts delivered by the boys are in turn loaned to two more boys in the county who are required to do as the first boys did. This plan is now in operation in two counties.

"The school house pig" is a new and popular phrase of extension of pig production in Georgia. A patron of the school gives a shoat or pig to the pupils. The big boys build a pen under the shade of some trees on the school house grounds. The little boys go into the woods and collect pine needles and make the bed. Others build a shelter over the corner of the pen and construct a feed trough. The girls, for surely the girls are interested, collect all the scraps from the lunch baskets at noon and feed them to the pig. The pupils also bring to school, occasionally, an ear of corn for their pet pig. On Saturdays and Sundays a boy living near the school does the feeding. Some of the schools barbecue the pig at the ed of the year, others hold an auction, and with the money buy library books or something for thes choolroom.

Care must be exercised that the pig is not overfed. At one place in Georgia he was foundered twice in one week.At another school the patrons wondered what was wrong.Children came home at night hollow to their heels and toted away in their dinner baskets each morning enough good food to gorge a hungry harvest hand. In time they discovered that a pig in a pen on the schoolhouse grounds was rapidly growing as large one way as the other.

All of the breeders who offered to sell purebred pigs to members last year at $10 each have renewed their offer this year, and a few new names of breeders have been added to the list of those co-operating to place Georgia on a pure-bred basis. The State is developing a new standard of agriculture, due largely to the activity of the juvenile farmer. This new agriculture spells pure-bred pigs and 100 bushels of corn to the acre. Last year 3,200 members of corn clubs raised an average of 58 bushels of corn on an acre of land, while the average yield of corn per acre in the whole State was under 18 bushels. The pig club boys, in some instances, raised pork at 3 cents per pound.

STAR PITCHERS

This Season's Crop Is One of Best in Years---Neyland's Great Record

Not in many years has a college baseball season developed so many pitching stars as this year. Already the performances of many college twirlers have attracted much attention, and games with an unusual number of strikeouts and a minimum of hits have been frequent.

Some of the present crop of college youngsters has displayed talent which has attracted the attention of many of the major league scouts. To ennumerate all the sterling pitching performances of the collegians this season would consume considerable space, but the achievements of just a few of the more prominent college players proves that this is an unusual year for high class college boxmen.

The pitcher whose work has attracted more attention than any of the others is Robert R. Neyland, Jr., of West Point. He has established a new record of twenty straight victories, which is one better than the mark of nineteen straight attained only among the major leaguers by Rube Marquard and Tim Keefe, both of the Giants. Neyland's record was not made, however, in one season. His willing streak began away back on May 24, 1913, when he shut out Notre Dame. The last team to defeat Neyland was Fordham on May 17, 1913. And he has been winning ever since.

Last spring he pitched in nine games and won them all. This year he has won nine straight, beating New York university, Stevens, Rutgers, Lafayette, Harvard, Seton Hall, Lehigh, Georgetown, and Washington and Lee.

Neyland has beaten the navy twice and expects to do it again when the army plays the navy at West Point on May 29. His best record was made against Colgate last year, when he pitched a no hit no run victory, 8 to 0. Only thirty men faced him. Neyland comes from Greenville, Tex., and he was developed at West Point by Sammy Strang, the former Giant, who has been coaching the army team for several seasons. Neyland is a six footer and weighs 175 pounds. He is also a star football player and the heavyweight champion boxer of the corps of cadets.

Columbia also has a pitching star in George Smith, who has been mainly responsible for Columbia's fine showing on the diamond this spring. This year Smith has won four games out of five, among the teams defeated being Williams, one of the best of the season's college teams. Smith is a right hander. He is a curve ball pitcher, has a fine change of pace and a telling cross fire delivery. Against Wesleyan, two weeks ago, Smith struck out seventeen batsmen and allowed only four hits. Smith comes from Port Chester, N. Y., and has been picked as an unusual pitcher by such good judges as Andy Coakley and Jack Chesbro. It is not Smith's intention to go into professional baseball.

Princeton this season has the strongest pitching staff in years in Deyo, Link and Chaplin. Deyo last season shut out Yale with three hits. He has been keeping up his fine work this season. He shut out Cornell, 1 to 0, allowing about two hits. Link this season won over Williams, striking out fourteen men. He also defeated Virginia, allowing but one hit, while only twenty-nine men faced him. Chaplin in a recent contest pitched a sensational one hit game against Lawrenceville, fanning eighteen batsmen.

There are also many other college pitchers who have done splendid work this spring. Way of Yale has shown superior form, and the Blue depends on him for its big games. A youngster named Moore from Bates pitched a fine one hit game against Harvard. The Crimson also has a good man in Frye, while Young of Williams and Bailey of Holy Cross have done excellent work during the season.

"GIVEN UP," LIVED 54 YEARS.

Confederate Veteran Left on Field Mortally Wounded.

Fulton, Mo.—Left on the battlefield dying with the surgeon's notation; "mortally wounded," written after his name, only to live fifty-four years and die a natural death, was the experience of the late John W. Davis, a Confederate veteran of Fulton. A letter just received here from Joseph A. Mudd, another Confederate veteran of Hyattsville, Md., tells the story as follows:

"I have just seen mention of the death in Fulton of John W. Davis. He was a member of the grand company of brave boys commanded by Captain D. H. McIntyre, afterward attorney general of Missouri—Company A, Burbridge's regiment. Ours was Company B, and we stood side by side in battle. Comrade Davis was just my age.

"At Wilson's Creek, nearly fifty-four years ago, I saw him shot, so badly hurt that the surgeon wrote 'mortally wounded' after his name."

"STOP THIEF" AT THE QUIRK TODAY

Mr. Carr is a kleptomaniac and his two daughters, Madge and Joan, are to be married to Mr. Cluney and Dr. Willoughby, respectively. Pretty Nell Jones, a light-fingered maid is engaged that afternoon by Mrs. Carr—and that is the real beginning of the rollicking, funny play.

Complications set in thick and fast. With the development of the second kleptomoniac in the house complications shriekingly funny come to pass.

Two real crooks add to the situation. However, thieves, kleptomaniacs and bridal preparations become seperated and all ends in a happy gale of laughter.

"Stop Thief" is a cure for the most chronic grouch.

CRIBB—CONNANT

To Rent—House, at 216 S. 3d st. Inquire D. C. Draper, 416 Rochester st. 139

Teamster Wanted—Steady position for first class man. J. W. Pratt, 177 S. 1st st. Phone 56 or 5125. tf

$75.00 Takes runabout, just overhauled and in good running condition. E. D. Parke, 29 S. 2d. 137

To Rent—Furnished rooms. 210 Cayuga st. 139

Girl Wanted—General housework, 419 Rochester st., or phone 3453. 134

Wanted—Dining room girl at once at the Clark House. 136

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

LEGAL NOTICES

Notice to Contractors

STATE OF NEW YORK, Office of the State Commission of Highways, Albany, N. Y.—Pursuant to the provisions of Chapter 30, Laws of 1909, as amended by Chapter 646, Laws of 1911, and Chapter 80, Laws of 1913, sealed proposals will be received by the undersigned at their office No. 55 Lancaster Street, Albany, N. Y., at 1 o'clock P.M., on Friday, the 4th day of June, 1915, for the improvement of the following highways:

Oswego County, Road No. 1287; Name, Pulaski-Williamstown, Part 3; Mileage, 7.75. Road No. 1288; Name, Pulaski-Williamstown, Part 1; Mileage, 5.12. Also, Rep. Con. No. 701; Class of Work, W. B. Mac. 2½ ins.; Resurfacing; Road No. 653; Name, Granby Roads; Town, Granby.

Maps, plans, specifications and estimates may be seen and proposal forms obtained at the office of the Commission in Albany, N. Y., and also at the office of Division Engineer, Chas. J. McDonough, 433 South Salina Street, Syracuse, N. Y.

The especial attention of bidders is called to "Information for Bidders" in the itemized proposal, specifications and contract agreement.

Proposals for each road or contract must be presented in a separate sealed envelope endorsed on the outside with the name and number of the road or contract for which the proposal is made. Each proposal must be accompanied by a New York draft or certified check payable to the order of the State Commission of Highways for an amount equal to at least five per cent. of the amount of the proposal which such draft or check accompanies.

This draft or check will be held by the Commission until the contract and bond are duly executed.

The successful bidder will be required to give a bond for fifty per cent. of the amount of the contract, such bond to be executed by a surety company to be approved by the Commission, or a bond secured by the deposit of collateral securities to be approved by the Commission.

The right is reserved to reject any or all bids.

EDWIN DUFFEY,
Commissioner.

I. J. MORRIS,
Secretary.

CITY AND COUNTY SEALERS RETURN HOME

Harry M. O'Brien, city sealer of weights and measures, returned yesterday from New York city where he attended a convention of sealers from all over the state. The convention was held on the roof of the Hotel McAlpin and according to the city sealer, an enjoyable time was had. Guides conducted the visitors around the city and explained the sights of the Bowery, Chinatown and the Aquarium to the party.

Mr. O'Brien addressed the convention on "Liquid Measure," and was prominently mentioned as state delegate to the national convention which will be held in Alpine, Tex., in October. While in the city Mr. O'Brien made his headquarters at the St. Regis.

Accompanying Mr. O'Brien were Frank H. French, the county sealer, and John Halloran, sealer of the city of Oswego.

K. OF C. TO DANCE IN AID OF A FUND

St. Joseph's Council, K. of C., will give a card party and dance at its rooms in Oneida st. Thursday evening, and all knights and friends of the council are cordially invited to attend. There will be prizes awarded the successful card players.

The K. of C. orchestra will play for the dancing which will be enjoyed in conjunction with the cards. Refreshments will be served at midnight. The proceeds of the affair will be put into the building fund of the council.

MEMBERSHIP DIVISION MEETS TONIGHT AT 7.30

The members of the Entertainment and Memebership Divisions of the Chamber of Commerce will meet tonight at the headquarters at 7.30 o'clock. Important business will be taken up and a full attendance of members is requested.

PULPWOOD COMING HERE

There is bustle about the Lackawanna railroad trestle in Oswego, preparatory to the arrival of a cargo of pulp wood from Anticosta Island, and consigned to the Granby Paper Company of this city. The wood will be transferred from the steamers to arrive and transferred to freight cars and then handled on the new conveyor at the company's plant.

Those You Know

The marriage of Flora Crouch May to Benjamin L. May, both of this city, has been annulled by Justice DeAngelis.

* * *

Captain and Mrs. Boyd, jr., of Mexico, and Mr. and Mrs. Nap Boyd and daughter, also of Mexico, were guests yesterday of Mr. and Mrs. W. C. Middleton of State st.

* * *

Miss Mabel McCrea will entertain the 1909 Shakespeare Class at her home, 419 Buffalo st., Thursday afternoon at 4 o'clock.

* * *

A son has been born to Mr. and Mrs. Vernon Fuller.

* * *

The Ladies' Catholic Benevolent Association met last night in Grange Hall. A class of candidates was iniated into the order and a general good time followed. Refreshments were served at a late hour.

* * *

The hook-and-ladder truck of the local fire department was hauled forth today from its winter's resting place and given a thorough cleaning by the men. The big truck is very seldom needed, but the wee laddies propose to have it spick and span anyhow. The truck will probably be given a few coats of varnish after the renovating process is concluded.

PASTURING

Ideal pasture; water, shade and good feel, close to town on trolley. F. C. Ives, 316 Worth st. adu135

ALREADY BUZZES

Pledges and Promises Go for Naught With the President and Advisers

Washington, May 25.—Generally speaking it is ridiculous to think of jealousy against a subordinate—but in this case Bryan is by no means as,sub ordinate as hem ight be, and the happennings of war-time abroad, have served to put the Department of State into the limelight to an extent hitherto unequalled. It is well known in some quarters outside of Washington—at Princeton, for instance— that Wilson insists on standing alone, shar ing neither the throne nor the limelight. At Princeton a professor had to bend the knee to Wilson, or quit, or fight. Most of the staff knuckled under, some of them resigned, but Dean West resisted—and it was Wilson and not he who had to go.

Up to now the Wilsonian attitude toward Bryan has had Washington guessing. No one can deny that Wilson owes his omination to Bryan, who violated his instructions from the Democrats of Nebraska in order to accomplish it. Wilson's election is a debt to nobody in particular; he owes it to a division in Republican ranks which has now substantially disappeared. Nevertheless, Bryan appeared to have a claim; he was taken into the cabinet and so long as he devoted himself to securing jobs for "deserving Democrats," to eking out his $12,000 stipend with Chautauqua fees, to advertising grape juice and such vagaries, all went well. To be sure, the State Department bumped the bumps rather audibly at times but in general, the President and his Secretary of State got on as well as though the former had nefer wished to knock the latter into a cocked hat.

Bryan the Pilot

Then along came the war, and all the belligerents began clamoring for our good will, their legations and embassia in hostile capitals passed into our hands, there arose numerous questions of neutrality, citizenship and the like, and the State Department emerged from its traditional reserve and loomed up as the biggest thing in the administration. From its cloistered walls there began to issue notes, memoranda, statements, warnings—all bearing Bryan's name, though obviously not of his preparation, and from that minute the White House appeared to close the eye of toleration for the Secretary of State. In various ways the talented Tumulty began to let it leak out that Wilson had become "his own Foreign Minister", that it was the presidential prudence which marked all the excellent pronouncements prepared in reality by the trained Republicans whom Bryan had not dared to displace, and that it was the Princeton pedagogue and not the Nebraska necromancer who was really piloting the ship of State through the troubled seas of strict neutrality.

Bryan appeared to take all of this lying down, and then the Wilsonian tactics, as so well known in New Jersey, began to develop. It was resolved to put Bryan to a further test of subserviency. The one-term plank in the Baltimore platform is Bryan's pet piece of platform architecture. A single term in the White House is a political fetich with him. Away back in 1896, when he clamored up to a crown of thorns with a cross of gold, his first act after being nominated at Chicago was to rip a leaf from a notebook and write upon it something like this: "In order that I may do my work with an eye single to the good of the people, I promise, if elected, not to be a candidate for a second term." Therefore, he regards the one-term declaration at Baltimore as sacrosanct.

Wilson Wants It.

Not so Wilson. In his mind nothing is to be free from impious desecration save his own notions—and the surrendering of power was never a Wilsonian trait. He is now and always has been a candidate for re-election; and, in pursuance of his plan, he has been putting out senatorial and secretarial and congressional feelers all over the country. Whenever and wherever of late, two or three Democrats have met to munch a ham sandwich and to call it a "Jeffersonian banquet," there has been a Josephus Daniels, or a Mitchell Palmer, or a Jim Ham Lewis, or a Tom Marshall, or a Redfield to declare that the President is loaded down even to his calculating eyelids, with vast responsibilities, and thus he merits and must have a second term with a similar declaration. But the plan has thhs far failed. Bryan has ignored all the springtime signals to "come on in, the water's fine." He has not "come across" with the desired endorsement. He has an unrivalled digestion, but he quails at eatin ghis own words on this subject of a single term in the presidency.

Accordingly, Wilson has moved upon Bryan from another angle. He has beyun to chasten him throubh the power of patronage.

Over in the Treasury Department there has been one lone Republican among the higher officers—W. E. Andrews of Nebraska, a former member of Congress, whom McKinley appointed as auditor of the treasury way back in 1897. It is a $4,000 job and many a Demolrat's mouth has watered for it. Mr. Andrews followed the traditions of the servile and resigned March 5, 1913, but it was only last week that his resignation was accepted.

This particular piece of patronage was claimed for Nebraska and Bryan had a candidate for it, as had Senator Hitchcock, also. Neither the Secretary nor the Senator would yield, and the President's original policy of choking Bryan with butter, forbade that he should offend him by takiny up Hitchcock's man.

But now that Bryan has hesitated to join the second-term chorus and so long as his purposes toward Wilson's ambitions are shrouded in mystery, the President has selected a harsher method—and all of a sudden, without warning, he selected Hitchcock's man for Andrew's job.

In well informed circles here this is regarded as a serving of notice on Bryan that he belongs to "the team" and that he must play the game as the captain orders. Wilson does not intend to have anybody sit in his "place in the sun," and whoever tries is bound to feel the weight of his jealous displeasure.

MINETTO WILL NOW GETS ITS BRIDGE

Governor Whitman yesterday signed the bill which calls for the construction of a new bridge across the Oswego rive and canal at Minetto. The bridge will supply a long felt want as the old wooden bridge which now spans the river there has been closed to heavy traffic for some time, which means a great inconvenience to the merchants of the town who conduct places of business on the east bank of the river, and also to the Columbia Shade Cloth Company whose large plant stands on the west side of the stream. The trolley line and the D. L. & W. railroad tracks are also on the west side.

The bill calls for an appropriation of $50,000 by the state and the towns of Minetto and Volney will pay equal shares of the costs. The contract for the bridge will be let in the near future.

MRS. EVA E. DEAN GETS A JUDGMENT

Eva E. Dean, who sued the village of Phoenix in the last term of Supreme Court, before Justice Hubbs, for $5,000 damages resulting from injuries she sustained by falling upon a defective sidewalk, filed in the County Clerk's office, Oswego, yesterday, judgment for $2.632.35. Mrs. Dean had secured a verdict for $2,500.

HENRY PENDERGAST WON AT HUNTERS CLUB SHOOT

Henry Pendergast easily scored the point necessary to secure permanent possession of the handsome silver trophy at the Hunters Club trophy shoot on Saturday. He broke twenty-four out of a possible twenty-five targets in the event, thus giving him permanent possession of the prize.

EDWARD LOUIS HAWKSBY

Edward Louis Hawksby, the six-year old son of Mr. and Mrs. Thomas Hawksby of 303 Pine street, died yesterday afternoon at the home of his parents.

A short time ago the boy fell, while at play, and injured himself severely. The result it is claimed caused his death.

Besides his parents, two brothers and two sisters survived him. The funeral will be held from the Church of the Immaculate Conception Thursday morning. Burial will be made at St. Mary's.

Finish the evening meal by eating Cookies made amidst sanitary surroundings. The Black bakings are as "good as mother's."—adv.

"A HERALD OF PROGRESS"

NOTE TO GERMANY

Country as One Backs Wilson's Stand on Sea Killings.

CRISIS UNITES ALL AMERICA

Statesmen, Headed by Ex-President Taft, Financiers, Churchmen, Men of Every Class, Rush Declarations of Support to Washington With Greatest Unanimity In History of People.

Perhaps never in the nation's history has an utterance of her chief magistrate called forth such instant and unanimous approval as has President Wilson's note to Germany demanding the cessation of such submarine warfare as resulted in the death of more than 100 Americans through the torpedoing of the Lusitania without warning.

Addressing in New York city 900 Methodist men whom he helped draw up a telegram of sympathy and support to President Wilson, ex-President Taft said:

"The note to Germany, admirable in tone, moderate in the judicial spirit which runs through the entire communication, dignified in the level the writer takes with respect to international obligations and accurate in the statement of international law, puts the case of the United States in a way that may well call forth our earnest concurrence and confirmation."

Ranks as Great Paper.

Champ Clark, speaker of the house of representatives, issued a statement in Missouri in which he said:

"The American note will attract worldwide attention. In all human probability it will rank as a great state paper. I have no doubt President Wilson will succeed in preserving peace with honor. The last sentence, asserting the administration's determination to maintain the rights of America and Americans, will be most generously applauded. One thing is certain—the American people will sustain the president in this crisis, for they doubt not his ability nor his patriotism."

Senator Atlee Pomerene of Ohio, member of the foreign relations committee, said, "The note was what the American people expected—fine in both temper and substance—and it shows President Wilson's great wisdom and ability to deal with a delicate situation."

Senator William Alden Smith of Michigan, member of the foreign relations committee, said of the note, "If trouble should result—which I do not anticipate—every patriotic citizen will sustain the course of the United States government."

What People Expected.

Representative Cyrus Cline of Indiana, member of the foreign relations committee, declared, "President Wilson has met the expectations of the people and will have their co-operation."

Senator G. M. Hitchcock of Nebraska.—We should insist on the president's demands even to the point of enforcement.

Senator Miles Poindexter of Washington.—This nation will give the president practically undivided support in enforcing his clearly expressed conditions.

Senator Lawrence Y. Sherman of Illinois.—President Wilson's note is in accordance with international law and the usages of civilized warfare. He deserves the support of all loyal citizens.

Senator Kenyon of Iowa.—I believe the president's demands will be complied with. He will never lead us to war if it can be honorably avoided.

Governor Walsh of Massachusetts.—It could not have pointed out the national injury in plainer language.

Governor Ferris of Michigan.—The president's note is a masterpiece of strength and diplomacy.

Governor Willis of Ohio.—The president has sounded a note which will be heard around the world.

Nation Has Spoken.

Governor Dunne of Illinois.—The American nation, through its president, has spoken, and the patriotic citizenship of the republic will sustain him to the end.

Governor Ralston of Indiana.—The administration's note is as vigorous as it is convincing. The American people stand back of President Wilson regardless of party or nationality.

Governor Capper of Kansas.—The note is all the more impressive because of its temperate and restrained language and its spirit of friendliness.

J. P. Morgan.—I think the president's note to Germany is perfectly splendid and admirable.

Henry P. Davison.—The note bore the indorsement of every American.

Frank A. Vanderlip.—Every sentiment in the note was correct. The American people will stand by it.

Henry Clews. — President Wilson's note is worthy of commendation from every citizen of the United States.

Cardinal Farley.—I do not believe people of any other nation in the world would have controlled themselves as our people have done under the stress of such circumstances.

The American League to Limit Armaments gave out a statement in which Bishop David H. Greer of the Protestant Episcopal church said: "I can only say what I think every loyal American citizen would say at such a time as this, that we should stand by the president."

Fires In Paint Barrels.

Many serious shop fires have had their origin in a paint barrel or tank used for dip painting. Such tanks or barrels occasionally take fire either spontaneously or through other causes, and when once in flame it is very difficult to extinguish it before damage is done. Water is useless, as it only spreads the burning paint; the ordinary fire extinguisher is in about the same class, and sand, while used by some with fair success, so fills the paint with grit and dirt as to render the entire batch unfit for further use. To put out a fire of this kind the American Machinist points out that a mixture of bicarbonate of soda and fine sawdust in about the proportion of ten pounds of bicarbonate to each bushel of sawdust has been found effective. The mixture is thrown into the burning tank and the cover replaced. The fire is almost instantly choked out by the heavy blanket of carbonic acid gas formed by the burning sawdust and sodium carbonate.

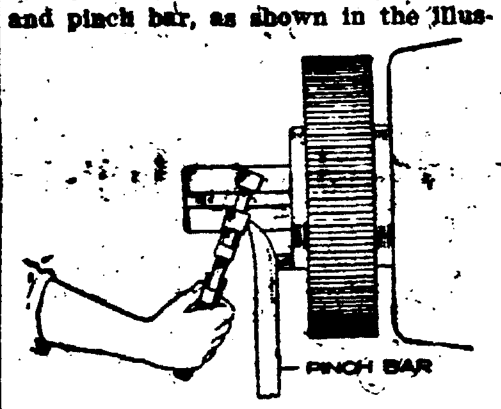
After the fire is out and the tank has cooled the charred sawdust dirt may be skimmed off the top, and the paint underneath will be found free from dirt and in as good condition as before the fire.

When Iron Is Inflammable.

Iron burns freely under favorable conditions, though such a metal is not commonly thought of as combustible. A piece of soft iron when whittled into a flame burns brilliantly. A recently discovered process, termed by its inventor "calorization," said to protect combustible metals from atmospheric action at high temperatures and make them available for a much wider range of usefulness than is now the case, was recently described in the American Machinist. The metals are heated in revolving drums containing, among other things, finely divided aluminium, by which a surface alloy containing aluminium is produced. Pieces which because of their shape and size are not adapted for tumbling may be calorized by packing them in or painting them with a suitable mixture and heating them. After iron is calorized the effect of heating is slight. Instead of burning and the scale falling off, as in the case of untreated iron, practically no effect can be detected.

Removing Plain Keys.

Considerable skill is frequently required to remove plain keys fitted in places where it is impossible to get at them with a drift, says Popular Mechanics. One of the simplest successful methods of obtaining the desired result is the use of a monkey wrench and pinch bar, as shown in the illustration.



METHOD OF USING WRENCH AND BAR.

For this purpose a wrench should be used that has sharp edges on its jaws, so these can get a good grip on the key. To further improve the method grooves may be cut on opposite sides of the key, so the jaws will fit better when straddling the key at a slight angle with the face of the keyed machine part. By using a pinch bar against the movable jaw sufficient force can be applied to remove the key unless it is so tightly driven or rusted in place that it will have to be drilled out before it can be released.

Repairing Marble.

With a little practice any mechanic can repair holes, cracks or chipped places on marble slabs, so that the patched place cannot be detected from the natural marble, says Popular Mechanics. Use the following mixture as a base filler: Water glass, ten parts; calcined magnesite, two parts, and powdered marble, four parts. These should be mixed thoroughly to a semifluid paste. Fill the crack or hole and smooth off level; then, with a camel's hair brush and colors made of aniline in alcohol, work out the veins, body colors, etc., as near to the natural marble as possible. It will depend on the application of the colors whether the repair can be seen or not. Artificial marble slabs can be formed from this mixture.

Cleaning Before Painting.

The proper cleaning of the surface of iron and steel parts before paint or other protective materials are applied is of the utmost importance. Paint which is put on a surface covered with grease or dirt does not come into good contact with the metal and consequently does not adhere to it. Sooner or later the dirt will fall or be knocked off and the paint will come with it. Beams and other parts which are coated with heavy oil or which have been allowed to lie on the ground until they are covered with mud and dirt should be thoroughly cleaned before painting if it is desired that protection of any permanence is to be secured.—Engineering Magazine.

Walnut Filler Ingredients.

A walnut filler is made of three pounds burnt Turkey umber, one pound of burnt Italian sienna, both ground in oil, then mixed to a paste with one quart of turpentine and one pint of japan drier.

THE LIMELIGHT

Admiral M. J. de Robeck, In Command at Dardanelles.

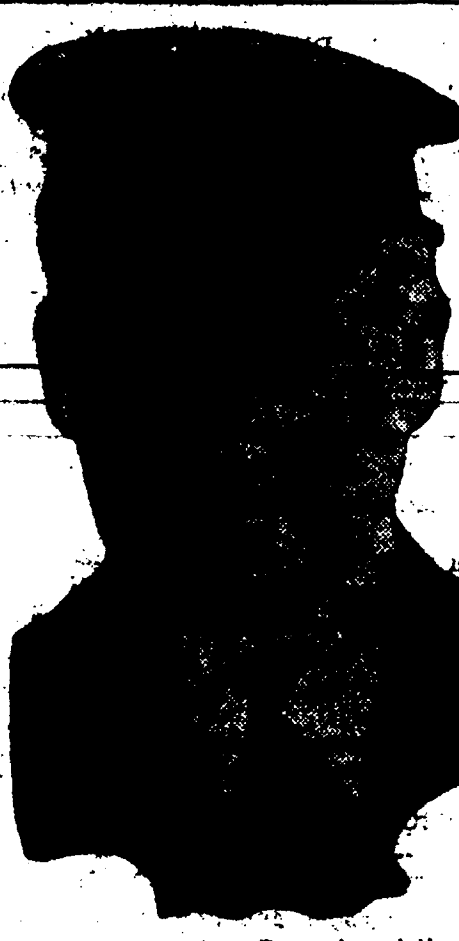


Photo by American Press Association.

Rear Admiral Michael John de Robeck, who succeeded Vice Admiral Carden as commander of the allied fleets operating in the Dardanelles, is an expert in the use of and defense against mines and torpedoes. He entered the British navy in 1875 at the age of thirteen and became a rear admiral in 1911. In 1912 he was made admiral of patrols, a command embracing all torpedo craft allotted to the coast defense in time of war and calling for expert acquaintance with every form of mines and mining.

The rear admiral (acting vice admiral) is an Irishman and is the second son of the fourth Baron de Robeck of Gowran Grange, Naas, Ireland. His brother, the present Baron de Robeck, is the only British subject holding a Swedish title of nobility. He is the great-grandson of John Henry Fock, Baron de Robeck, who fought for the American cause in the war of independence. He was a lieutenant in the Swedish army and with the permission of his king joined a French dragoon regiment sent to this country under Rochambeau. He was wounded at the battle of Gloucester and returned to France in 1783. Later he emigrated to Ireland, married a daughter of the brother of the Earl of Upper Ossory and by act of parliament was naturalized a subject of George III.

Register of the Treasury.

Houston B. Teehee of Oklahoma, who recently assumed the duties of register of the treasury, is five-eighths Cherokee Indian. He succeeded Gabe Parker, also an Indian, who resigned to become superintendent of the Five Civilized Tribes. The new register of

HOUSTON B. TEEHEE.

the treasury was born in 1874 in what is now Sequoyah county, Okla. He was reared on a farm and was educated in the tribal schools and at the Fort Worth (Tex.) university.

Mr. Teehee's first political service was as an alderman in the city of Tahlequah, and he was subsequently mayor of the city for two terms. Later he became county attorney and at the time of his appointment as register of the treasury was probate attorney in the Indian service. Mr. Teehee's father was assistant chief of the Cherokees. He served as delegate to Washington during the negotiations leading up to tribal dissolution. He had been connected with tribal politics during his entire adult life until the tribal entity was abolished in 1898.

Register Teehee is deeply interested in all efforts for the advancement of the red man, especially as they concern the people in Oklahoma. He said recently that, while quite a number of them are yet restricted as regards their property interests, he hopes "it will be but a few years until all are rendered capable and industrious citizens of the state in the true sense of American citizenship."

Cookery Points

Chocolate Schnutten.

There is a duty of 25 per cent ad valorem on this imported cake.

Cream together half a pound of butter and half a pound of sugar. Add the yolks of sixteen eggs, two and a half ounces of grated almonds, two and a half ounces of browned breadcrumbs, two and a half ounces of sifted flour, the soft center of half a vanilla bean, a fourth cake of sweet chocolate grated, and lastly the whites of the sixteen eggs stiffly beaten. Bake in shallow, lightly buttered pans in a moderate oven for from twenty to twenty-five minutes, and when done invert over plates to cool. When cold cut into two and a half inch squares. Split the squares with a sharp knife into two layers, spread the under layer with the filling and the upper layer with the glazing.

For the filling use half a pound of butter and half a cake of grated sweet chocolate melted and beaten together till smooth and creamy.

For the glazing, to a fourth cake of sweet chocolate grated add half a cupful of sugar and a fourth cupful of water. Let this boil up well, then beat until cool and creamy and spread lightly over the cake.

The quantity given in this recipe will make three ordinary eight inch square cakes.

For the Invalid Tray.

Bavarian creams of all sorts make delicious and nourishing desserts for invalids. For chocolate Bavarian cream, soak half a box of gelatin in cold water for at least half an hour. In a double boiler heat one pint of milk; add the gelatin and stir until dissolved. Next add half a cupful of sugar and remove from the stove. Turn into a deep bowl and add one teaspoonful of vanilla; set this bowl into a pan of ice water and stir until it thickens like a sauce; then add a pint of cream whipped stiff. Stir lightly, pour into a mold, wet with cold water, set it on ice and serve with whipped cream. This must be made very early in the morning if it is to be used for lunch or tea. If a fruit cream is desired substitute fruit juice, stewed and strained, or the juice from canned fruit, for the milk, omitting the grated chocolate. Both raspberry and peach Bavarian cream are delicious.

Cream Toast.

Make thin slices of golden brown toast, crisp and dry. After placing the slices in a wire sieve you steam them until soft over hot water. Then butter and put in a soup plate—about three slices, cut in half. Over them pour white sauce. Make this by heating a cupful of milk in a double boiler and then adding two tablespoonfuls of flour rubbed into two tablespoonfuls of butter. Cook gently over a low heat until the flour has lost its starchy taste. Season with salt and pepper and serve very hot. Such a dish loses its appetizing qualities if it is not hot when served, so it should be carefully covered in transit from the kitchen to the room where it is to be served.

Brown Potato Soup.

Cook two cupfuls of sliced potatoes and a little chopped onion and celery in a quart of salted water until quite tender. Place in an iron skillet a teaspoonful of butter and one of lard and when very hot rub into it sufficient flour to thoroughly absorb the butter and lard and keep stirring it about until dry and quite well browned and granular. When the soup is boiling rapidly sift in the browned flour while stirring and continue to add browned flour until the mixture is as thick as you wish.

Old Fashioned Bread Pudding.

Soak a pint of fine breadcrumbs in a quart of milk for two hours. Stir in four well beaten egg yolks, two tablespoonfuls melted butter, a scant half teaspoonful of soda dissolved in a little boiling water and a pinch of nutmeg. Last of all, fold in lightly the stiffened whites of the eggs. Bake in a well greased pudding dish, cover for half an hour, then uncover and brown. Send to the table as soon as done and eat with hot wine sauce.

Scalloped Fish In Ramekins.

Use boiled fish and cut in one-half inch cubes. Butter a cupful of breadcrumbs and put in individual ramekins that are well buttered. Put in a layer of shredded fish, sprinkle with another layer of chopped almonds and then a layer of fish. Cover with a tomato sauce and sprinkle with breadcrumbs. Place ramekins in a pan of hot water and bake for fifteen minutes. Serve hot and decorate with parsley.

Vanilla Ice Cream.

Boil a quart of cream, add a cupful of sugar and a teaspoonful of vanilla. Cool and freeze. Hot chocolate sauce: Boil one cupful of water and one-half cupful of sugar five minutes. Add one-half cupful of milk, two squares of melted chocolate and a tablespoonful of dissolved cornstarch. Boil one minute.

Minced Chicken Sandwiches.

Take minced chicken and add two tablespoonfuls of mayonnaise. Stir well. Cover bread with this dressing. [illegible] minced lettuce and strips of [illegible].

The Psychology of Color and a Blue Gown For a Happy Girl

Designed by Hickson & Co., New York.

It can be easily understood, if you are up in the psychology of color, why some colors irritate you and why others have a soothing effect. Physically strong persons with high vitality can wear the so called "loud" tones. The happy, light hearted people invariably choose the light shades, while the older, the fragile and subdued individuals choose darker or black lines.

As a case in point, the gown in the illustration is in a vivid shade of blue, suitable in material, style and color to the very young and temperamentally happy girl. Though simple in its general effect, it has some rather subtle touches, as witness the bits of gathering here and there in the skirt and the rows of buttons, which may serve to close the skirt or may not.

The blouse loses something of this subtlety in its general appearance, but it reappears again in the lacings down the front. The high collar finishes the neck, quite in keeping with the general ensemble, and the long sleeves carry out the suggestions made by the skirt.

* * *

Collars both high and low are to be found on the imported models. Some fasten directly to the chin; others are of the comfortable open variety, with dainty new touches so hard to describe and harder still to copy. One gown had added to the back of its bodice an oblong piece of black satin, faced with white, folded over at a third of its width and added to the bodice on the fold. It was unusual in effect, but very simple. Many are the new stocks offered, some of net, fastening to within three buttons of the chin, the top of which has small shaped pieces of taffeta, that are very smart. Jabots of various widths and construction are quite the latest touch.

* * *

For those who possess lace scarfs, no matter what the shape or length, quality or type, the season's latest adventure reveals a liking for these frivolous neck or shoulder fixings for wear with the new gowns for dance and evening wear.

Even the fluffs of tulle or malines which have been used all season in clouds of frothy white or in sunset tints of gorgeous colorings have their ends weighted by single metallic threaded tassels, or with silk made roses in bouquet forms, each one concealing a silk covered weight to keep it in position.

Chiffon scarfs from two to four yards in length are worn in colors to match one's gown. These are a yard wide and have their ends trimmed with knotted fringes to match from three to six inches in depth or with embroideries of silver or gold done in leaf forms or in conventional patterns.

The laurel leaf is a favorite pattern. Besides this, it is an empire motif or a classical revivification and in either case is a new note of perfect fashion, security.

You wear the four and five yard length chiffon or tulle scarfs carried across the shoulders and then wound around your arms; thence the long ends are supposed to trail along the floor, accompanying the wispy sweeping draperies of the evening gown with which the scarf is worn.

ANNA MAY.

Woman's World

Spirit of Human Kindliness Being Born in Spite of War.

PRINCESS PIERRE TROUBETZKOY (AMELIE RIVES).

"Human beings are growing kinder. A new spirit of brotherly love is being born within us. We are beginning to realize more than it was ever felt before that the woes of our neighbors are our woes and that he who would seek happiness must give happiness. It sounds old, doesn't it? But I tell you it is new. We are just beginning to feel our responsibilities to others."

Here is one who dares sound a note of hope in the face of the great world catastrophe, and the optimist who sees promise for humanity at even such a time is a woman and a novelist, the Princess Pierre Troubetzkoy (Amelie Rives).

But the war has not been the pyre out of which the princess' phoenix of brotherly love has risen. She believes that the great spirit of kindliness becoming more manifest in the world was being felt before that.

"The war has made some of us feel for others, but this great new spirit of kindliness was being felt before that," she explained. "The activities of the women of our country show that. The women here have been interesting themselves in all sorts of legislation to bring about better conditions for other women and other children than their own. We are beginning to understand the old philosophies of the east. I remember reading in ancient Hindu lore the belief that all human beings were part of a great whole and that instead of looking upon ourselves as separate individuals we should regard the whole."

The effect of this transitory stage which precedes a new social order is shown in the literature of our day, the princess believes. "There are no definite tendencies in literature today," she said, "because our books reflect a chaotic state." And then she went on to deplore the attitude of some American writers who are willing to "write for the market."

"I think that is the trouble with much of our literature," she deprecated. "It is written to order, just as clothes are made to order. Our plays, our novels, show this tendency. There are always people who are willing to sell their birthright for the mess of pottage. I couldn't write, however, if I ere ordered to write such and such a thing for so much money.

"And money means something to me. We are not rich," she confided. "I am a breadwinner, too, you see, my husband's helpmate. I believe in women working. That is the only way to be happy. Of course it is not right for some women to work so hard and so long as they do, and it isn't right either for some of them to do nothing. I think the proper adjustment will come."

EAT BARK, LIVE IN CAVE.

Fate of Farmer and Two Daughters, Victims of Big Jinx.

Benville, Ark.—A man named Ewing has been found living in a cave five miles east of here with his two daughters, ten and eight years old. When discovered their clothes were worn to strings, and, according to the children, they had subsisted on the bark of trees for ten days.

The older of these said:

"We haven't seen a piece of bread for more than a month."

Five years ago Ewing was a well to do farmer. First his stock began to die. By the end of a year he owned only one cow and no other property. Two years ago his wife, who was the ruling spirit on the farm, died, and six months later she was followed by their only son and the only grown daughter. This left the old man alone with the two small children.

But the real climax came about seven months ago, when his house and all it contained were destroyed by fire. He then sold the cow and disappeared. No effort to find him was made, for when the neighbors had offered to help him in his trouble he became angry and exclaimed: "No, I cannot accept any gifts. No Ewing has yet ever stooped so low as to beg, and may God grant that I am not the first to do so."

P. C. Grimes, Seventy-five, Finds His Long Lost Sister.

Altus, Okla.—A search of fifty years, extending over a dozen different states, during the progress of which a small fortune was expended in an advertising campaign, ended at Blair when P. C. Grimes of Nebraska City, Neb., stepped from an express passenger train into the arms of his sister, Mrs. D. W. Jones of Altus.

Mr. Grimes is seventy-five years old. Fifty years ago, after the marriage of Mr. and Mrs. Jones, the family broke up. After a few years they lost trace of each other and all efforts to get into communication were unavailing.

Mr. Grimes then began his search. It was a mere accident that Grimes finally found his sister. He had written a letter to her, directed to Rix, a postoffice in Green county, long since discontinued. The letter was thrown to Mangum, and Postmaster G. B. Townsend, who happened to be personally acquainted with Mrs. Jones, forwarded the letter to her.

SHE QUIT PARSONAGE.

When Pastor-Husband Forgot Art of Kissing.

St. Louis.—Mrs. Eugenia Anderson, nineteen years old, seven months' bride of the Rev. Arthur R. Anderson, pastor of the Central Christian church in Granite City, has returned to the home of her mother, Mrs. Minnie Koch of this city, because she says her husband would not kiss her.

She told a reporter that in the last two months her husband had kissed her but once and that this lone salute was bestowed, not upon her lips, true lover fashion, but in a half hearted way on her cheek.

She said she did not wish to be divorced and would be glad to resume her place as mistress of the manse if her husband would only give her a little affection.

PLANTS HATE AND LOVE.

Blue Rockets Wage Merciless War on Animals, Says Professor.

"Blue rockets show fear, and the deadly nightshade is full of hatred. Both plants declare merciless war on all animal life. The blue rocket perfume carries one of the deadliest of poisons. One-sixteenth of a grain shot from its poison pistil has proved fatal to a man.

"Give this plant the semimuscular system possessed by the carnivorous plants and it will be more dangerous than the cholera," declares Professor Henry G. Walters, head of the plant research bureau at Langhorne, Pa.

The professor, who maintains that plants have memories and are capable of love, believes also that there are plants which exercise all the emotions of enmity.

Has Biscuit Served at Gettysburg.

T. F. Perkins of Hartsville, Tenn., a Confederate soldier, has a cracker which has kept fresh since the battle of Gettysburg. It is a specimen of the Confederate army hardtack and was picked up on the field July 3, 1863.

Drink Plenty of Water.

A Roumanian scientist claims that any one can live to be 100 years old, barring accidents, if he drinks enough water. He declares he has discovered that old age is due to a decrease in the amount of water in the system and that Father Time may be checkmated by systematic water drinking during middle age.

Buying Wives.

Wives are still obtained by purchase in some parts of Russia. In the district of Kamyshin, on the Volga, this is practically the only way in which marriages are brought about. The price of a pretty girl from a well to do family ranges from $100 to $200.

HIRES PRISONER TO WIFE.

Wards of Wisconsin Sheriff Earn $10,376.81 For Their Families.

Janesville, Wis.—Letting out his prisoners to work for wages that go to their families instead of making them hammer stones, C. S. Whipple, Rock county sheriff, is demonstrating the possibilities of the Wisconsin commitment law.

During the two years the statute has been in force $16,775.85 has been earned by the prisoners in this county. Of this amount dependents of paroled persons received $10,376.81 and the county $1,210.41.

One man was paroled for a year to his wife to conduct a clothes pressing establishment.

Attar of Roses.

Over 3,000 pounds of rose petals are used in the manufacture of one pound of attar of roses perfume.

In the Spring

The days of cleaning house have come,
The maddest of the year,
When everything is upside down
And scattered far and near.
My meals are but a mere excuse;
My wife has grown a shrew,
The clothes I want are on the line;
My books the basement strew.

Each day, each week throughout the year
This house is garnished bright,
But when spring comes my wife declares
The dirt germs are a fright.
And then she gets her pails and mops,
Her brooms and soap galore,
And life becomes for days untold
A nightmare and a bore!

—Lida Keck Wiggins in Judge.

FAIRYLIKE CREATION.

An Evening Frock With Many Points In Its Fashionable Favor.

BEAUTIFUL DANCE GOWN.

An iridescent overdress over a satin underdress of peachblow colored satin is an expression of an evening frock which when seen would not soon be forgotten. The poising of a butterfly bow of faintest pink illusion at the back gives the creation an ethereal quality which it could not well otherwise have obtained. This frock flouts in no unmistakable manner the passing fad for the extremely wide skirt and gains added beauty and grace from its moderation.

GOLD AND BLUE.

A Garment Which Has Reached the Top Notch of Sweaterdom.

We used to think the sweater rather a plebeian garment, made uncompromisingly for use and comfort. But, lo and behold, we get them made very

HANDSOME SILK SWEATER.

swaggerly nowadays of silk, very expensive and very aristocratic.

The one shown in the illustration is of gold color and blue in corded effect; long tight sleeves and patch pockets. The buttons are blue with silk loops.

FLOWER FANCIES.

The most economical housewives in the world—the French—do not dream it an extravagance to keep always on their dinner tables a few cut flowers. Even the wife of the poorly paid artisan will stop to market and will not be content to go home with her purchases till she has bought a few cents' worth of flowers for her table.

And a good many American housewives feel the same way about flowers for the table. They have found that for a quarter or less flowers may be bought which with a few sprays of green thrown in by the florist will make the table attractive for a week. Yes, for a week, for with proper care cut flowers can be made to last a week—that is, except in the warmest weather, and in the warm weather we are most of us located so that we can get some sort of fresh flowers every day or so, if it is only a bunch of daisies or buttercups.

One of the best ways to keep cut flowers from fading is to see that the moment they are cut from their stems they be placed in water. But of course we cannot be sure that this is done in the case of florists' flowers. The thing to make sure of is that the sap in the stems does not dry out and one way to accomplish this—a way used by many florists—is to put a piece of wax over the stem of the flowers as soon as they are cut.

Brings Them In With "Paint and Brush Methods."

Greencastle, Ind.—The Rev. Julius Pfeiffer, who has charge of the Patricksburg circuit in the northwest Indiana M. E. conference, is making good. Pfeiffer is using a brush and liberal quantities of paint. He has advertised himself all over his circuit.

At the crossroads he has painted his name and the time of his meetings in big red letters. eH says "balks" and "kickers" and "threats" will not go with him as long as he is on the job.

One of his familiar phrases is: "I am on the job to stay; must see the thing through. If you want that soft taffy kind of preaching I am not the man to give it to you. As long as I am here I am going to talk about a big God, who has a broad humanitarian platform and who really makes folks do something."

Mr. Pfeiffer says his business is "picking up" since he started his advertising scheme, and he "expects to be running his shops on full time" by June 1. He desires to "double his output" by Sept. 15.

HUNTING BURIED GOLD.

Mayoralty Aspirant Has Men Digging For Indian Treasure.

Pendleton, Ore.—R. F. Kirkpatrick, a claimant for the mayor's chair and prominent rancher on the Umatilla Indian reservation, is using all his farm hands in an industrious search for supposed buried treasure.

The excitement was caused by Ko-ko-yea-lash, an aged Indian woman, whose land Kirkpatrick has rented. The old woman is ill, and, fearing she is about to die, she told Mr. Kirkpatrick that about nineteen years ago she buried a large quantity of gold in a tin can near her tepee.

She said she buried it about two feet deep, leaving a string attached and extending to the surface of the ground so she could find it again. The string has long since rotted off, and the woman has either forgotten the exact location of the treasure or is too ill to describe the spot. All the ground within a radius of several rods of her old tepee has therefore been plowed up and scraped away, but so far no treasure.

TO FEED WORLD ON 300,000,000 ACRES

United States to Become Cattle Raising Center.

Chicago.—One of the results of the European war will be great increase in American output of horses and cattle. This country will become the meat producing spot of the world. The annual output of 10,794,000 head will probably be increased from 20 to 50 per cent.

Reports from Europe have shown that the destruction of live stock due to the war is beyond all present realization. All the countries have been chary about emitting statistical information concerning it because they are trying to maintain an air of calm and confidence about their food supplies.

But the truth is getting out, and it is, in brief, that Europe will be impoverished in regard to live stock supplies sooner than in almost any other economic direction.

Two chief results are already beginning to be perceived. One, and the obvious one, is that all the world will need meat from the United States as never before.

The other is that the United States will change places with Europe in regard to supplying the finest breeding stock. The magnificent breeding stock of Holland, Belgium, Great Britain, France—cattle and horses, alike—are being sacrificed to the war, and it is freely predicted that after the war American breeders will be called upon to export fine animals in large numbers to countries from which in the past they have been wont to import.

Europe is the greatest live stock country in the world, taken as a whole. Its supplies are vastly larger than those of the United States, of South America or any other of what are commonly thought of as the stock raising regions. But Europe, because of its immense population, still has a deficiency that must be made up by importations, and so its place as a stock growing continent is not rightly understood.

The greatest of the stock raising territories are involved in the war. They are killing off first their horses, destroying them in battle and the deadly transport service and also making it impossible to raise the annual crop of colts. Thus the loss is really a double one.

For a long time the capacity of the western ranges for producing and maintaining stock has been growing less. As a result government statistics show a reduction of the number of cattle in seventeen western range states in a period of four years from 30,000,000 to 23,000,000 and of the number of sheep from 39,000,000 to 32,000,000. The range has been overfed in some sections until great areas of it are becoming well nigh denuded of grass and actually tending to reversion to desert conditions.

Mother Has Son Arrested.

Paris.—When two French soldiers returned to Paris and couldn't give a good reason for it the mother of one [illegible] called the [illegible] as deserters.

B C D/34

Lorette Heights Taken By French Troops

(Continued from Page One)

[illegible]ious ending of our offensive on the 'Massif de Lorette.'

"Lorettoberg is a word which for the last six months has appeared [illegible] the correspondence of the German soldiers. The Imperial [illegible] staff attached very great importance to the possession of th[illegible] heights. To conquer, defend and retake them the German soldiers have received a formal order which was so expressed as to make it operative until the last man was killed.

"In spite of the unusual difficulties of the ground and the desperate resistance of the enemy we triumphed. The battle of Lorette [illegible] a great battle a[illegible]ded in complete victory. In this part of the [illegible] fight[illegible] been going on uniterruptedly since October, 1914."

"[illegible] of intense, uninterrupted fighting resulted at two o'clock in the morning of May 22 in a splendid tactical victory. The enemy attached the greatest importance to the holding of the Lorette heights. On the plateau alone more than three thousand German bodies w[illegible]nted. One thousand prisoners were taken, as well as a great quantity of material, including machine guns, bomb throwers and rifles.

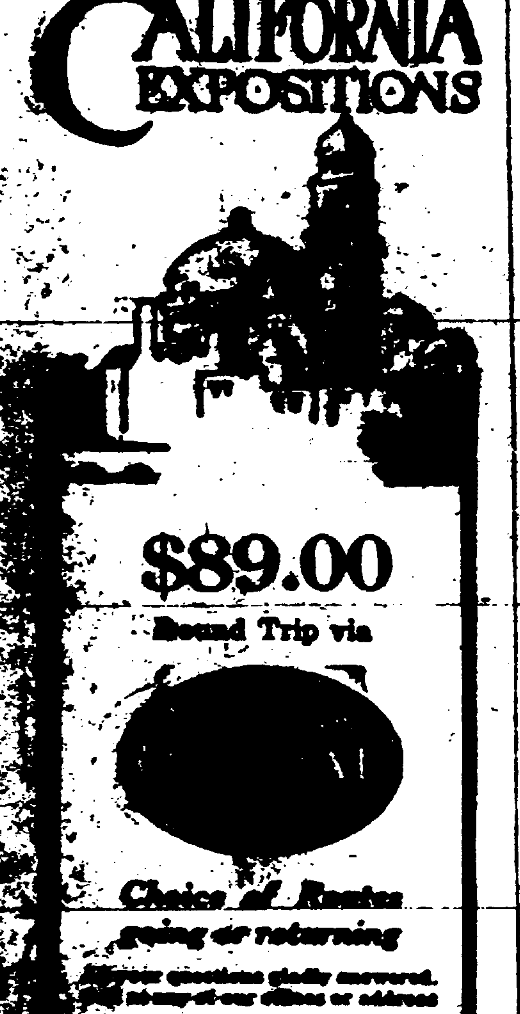
,'By this capture of the 'Massif de Lorette' oe of the principal objects of the operations north of Arras was attained and a severe check was inflicted on the enemy, who believed himself impregnable in his admirably organized positions.

OSWEGO AWAITS NEWS FROM ALBANY

The Normal bill, which will mean the appropriation by the State of $53,000 for the Oswego Normal and Training school was to be signed yesterday by Governor Whitman, according to reports received in Oswego from Albany. The money is to be used fo the maintenance and improvement of the buildings which are rapidly approaching a delapidated state. The contracting work was of the poorest variety, if some of the work on the front of the building is a criterion. The huge pillars which adorn the main entrance are disintegrating rapidly, and the white slabs which cover the pillars can be pulled off easily. It is said that the inside of the building is also urgently in need of repairs although it has only been in commission a few years.

"SENECA HILL" AND "BEACH" CARS RUNNING

Two open cars discarded, evidently from the Oswego lines, have been put in service on the local trolley road. One car is labeled "Seneca Hill" and the other "Beach," a fact which has its advantages and disadvantages. Although the cars do not go to Seneca Hill or to the Beach and some unwary traveler might board one with the idea that he was headed for a seaside resort. Nevertheless, the two distinct names convey the impression that the city boasts two trolley lines. Trolley patrons last evening found the new cars rather cool, but they will doubtless be appreciated during the warm summer months.



BITS OF SPORT NEWS

Fulton High school will meet the Oswego High school team at Oswego Friday afternoon. The boys will play Skaneateles here Saturday. O'Brien will pitch Friday's game and Barnes will probably be used against Skaneateles.

* * * *

The Rowan Stars of Oswego will meet the Independents at Athletic Park field Memorial day afternoon. Rowans succeeded in trimming the Red Men Sunday in a thirteen inning game, but the Independents have had more opportunity to practice together, and erpect to regsiter a win against the Oswego team.

The crowning infamy is disclosed in the report that the German submarine drove off vessels that attempted to go to the assistance of the Lusitania and even fired a torpedo at one of them.

BOLAND ALWAYS THERE.

Detroits' Hurler Stingy With His Hits In Minors as Well as In Majors.

When Bernard Boland of Detroit breezed merrily through nine innings against the Cleveland Indians recently, allowing but five hits and no runs, he was merely pulling old stuff for him. The records of the Central league and Southern association show a few hit pitching duels in which there is frequent reference to this Boland.

Red McKee recalls Boland's debut in the Central league. That was four or five years ago. Springfield was playing Dayton, and Boland held Springfield hitless until the ninth, when McKee got the sole swat off the young hurler.

The Southern association season wound up last year with a mound duel between Rube Kissinger, the league grandfather, and Boland, the kid of the circuit. It was a two hit extra inning affair. And these are just samples of the way Boland has always performed. Ever since Lee Fohl, now of the Indians, took him in hand at Dayton and taught him a thing or two Boland has always been a tight, accurate, brainy pitcher who invariably could be counted upon for a battle.

He showed his brains and stuff at training camp and occasionally did some good pitching, but it was feared that he was not physically strong enough to go the route in the big show. But against the White Sox he showed the folks that all leagues look alike to him. It is very possible, of course, that he may prove to be a flash in the pan, but since the fears for him had to do with his physical strength chiefly it looks very much as if Hugh Jennings had picked up a gem in the pitching line.

Minneapolis Has Twins on Team.

It has been a long time—perhaps some of the old timers can tell how long—since any club in a league of importance had a pair of twins on its roster. Minneapolis has such a pair this year in Jack and Steve Brown, pitchers, hailing from Lafayette, Ind. Steve was with Hastings, Neb., last year, and Jack played for awhile with Fargo. Both are right handers, and their age is twenty-two years.

Much Depends on Pitcher McQuillan.

Fred Clark's pennant hopes hinge largely upon his pitching staff, and particularly upon "Big George" McQuillan.

[illegible] WOMAN SUFFRAGE

Action of Churches With Regard to Votes For Women.

MOVEMENT WINS APPROVAL

Leading Clergymen of All Denominations Espouse Cause of Universal Suffrage—Many Church Conferences Have Adopted Resolutions Favoring Votes For Women.

Churchmen of all denominations are "coming out" for suffrage. Not only are they espousing the cause, but many of them are working for it with missionary zeal. Especially has the last year been marked by an access of interest in the subject in church circles. Church pulpits all over the country are freely lent to suffragists for the presentation of the suffrage cause, and preacher after preacher is declaring his suffrage faith. Many church conferences held this spring have adopted resolutions favoring woman suffrage.

One hundred and fifty Baptist clergymen, members of a recent conference held in the church of which Dr. Charles Eaton is pastor, Madison avenue and Thirty-first street, New York city, listened to a speech on Woman Suffrage by Mrs. James Lees Laidlaw, chairman of Manhattan Borough Woman Suffrage party, in May. The men who were present interrupted Mrs. Laidlaw with frequent "amens" and applause. Dr. Eaton, who has been a suffragist for twenty years, believes that women "not only ought to have the vote, but are going to have it in the not distant future."

At about the same time the Baptists of Philadelphia meeting in conference gave a similar approval of Woman Suffrage. This approval was thus expressed by Dr. E. B. Pollard of Crozier Theological seminary: "By giving women the ballot we are not going to take one iota away from all the things which go to make a good woman. We are not going to destroy woman's love for her home and her love for her babies. With women having a say in government we shall see better politics. I never knew women to apply themselves to anything and not improve it."

Methodists as Well as Baptists.

In the month of March and April at least seven Methodist conferences expressed by formal resolutions their belief in woman suffrage. It is gratifying to suffragists to find the Methodist church, of which Dr. Anna Howard Shaw is a preacher, foremost in indorsements of votes for women. The Methodist conferences that have indorsed suffrage are Philadelphia, Shamokin and Norristown in Pennsylvania, Atlantic City and Newark in New Jersey and Brooklyn and Saratoga in New York.

MRS. JAMES LEES LAIDLAW.

[Chairman Borough of Manhattan Woman Suffrage party.]

"Wives, mothers and sisters sharing in the responsibilities and perils of civilization ought not to be deprived of a view in the councils of nations," says the Pennsylvania resolution. "We hope to find the hosts of Methodism as solidly lined up in favor of woman suffrage as the hosts of evil are sure to be lined up in opposition," says New Jersey. "Believing that equal suffrage is in the logic of the democracy to which our nation is committed," is the opening phrase of one of the New York state Methodist testimonials for votes for women.

The Society of Friends.

Five of the seven yearly meetings of the Society of Liberal Friends have collectively announced their approval of equal franchise. "By reason of its inheritance" the Friends' organization says that it must indorse Woman Suffrage. Its very existence gives "evidence of the advantage which results to home, the meeting and the community through a full recognition of the dignity of woman and her right to complete development."

Episcopal Indorsement.

A valuable contribution to the sum of collective testimonials for the justice of the woman's cause was given by a group of Long Island Episcopal clergymen, who, without solicitation from woman suffragists, voluntarily drew up a promise to vote for the amendment next fall. This was signed by five Episcopal ministers, among whom were Dr. Spencer Roche, canon of the Cathedral of the Incarnation, Brooklyn.

Another effective indorsement from Episcopalians in council was that of the public forum of the Church of the Ascension, New York city.

This resolution not only approved woman suffrage, but urged the members of the forum to get out and work for the suffrage amendment in "their respective election districts."

Catholics For Suffrage.

Although the entire Catholic church as a body has not expressed approval of equal franchise, many Catholic clergymen are earnestly advocating it and adding vigorous efforts to forward the campaign. There is, however, one place where a body of Catholics took collective action. This was in the Catholic prohibition conference, Aug. 5, 1914, at Niagara Falls, where the following unique clause was inserted into the platform adopted by the delegates: "Equal franchise, with the provision that all persons convicted of intoxication be disfranchised for five years."

DR. ANNA HOWARD SHAW.

[President National Woman Suffrage Association.]

Dr. Talbot Smith of the Sacred Heart, Dobbs Ferry, enlarges upon this temperance attitude by saying, "The cause of suffrage is bound to win because," for one reason, "the men have absolutely and utterly failed as regards the question of drink."

The Federal Council of Churches.

Two prominent clergymen of the Federal Council of Churches of Christ in America, Dr. Batten and Dr. McFarland, have written personal letters indorsing woman suffrage. This council represents thirty denominations, mainly through branches of social service.

Dr. Samuel Zane Batten, the author of the "Christian State" volume of Christian sociology, says: "For years I have believed that women should have the vote and have spoken on this subject before legislatures and to the people. Every argument against woman suffrage applies equally against male suffrage. I find every political grounding against woman suffrage, and therefore as one who believes in temperance, purity, honesty and progress I have no difficulty in finding myself for it."

Says Dr. Charles S. McFarlane: "I am entirely convinced that from a practical point of view suffrage should be equal. * * * If any lines were to be drawn between those who were morally worthy of suffrage and those who were not these lines should not be drawn and would not be drawn by sex. On the ground of experience in activities for the improvement of human society I do not find that women are of less service than men, but, rather, in many matters of greater service."

Other well known men in the Federal Council of Churches who are believers in votes for women are Dr. William I. Haven, Dr. Shailer Mathews, Dr. Josiah Strong, Professor Edward T. Devine, Gifford Pinchot and Henry Wade Rogers.

LITTLE ANTI-ANTIDOTES.

Anti-suffrage.

"Women will either divide on issues in the proportion that men do, in which case they but double the vote without affecting the result, or they will vote in opposition to men, in which case they nullify men's votes."

Antidote.

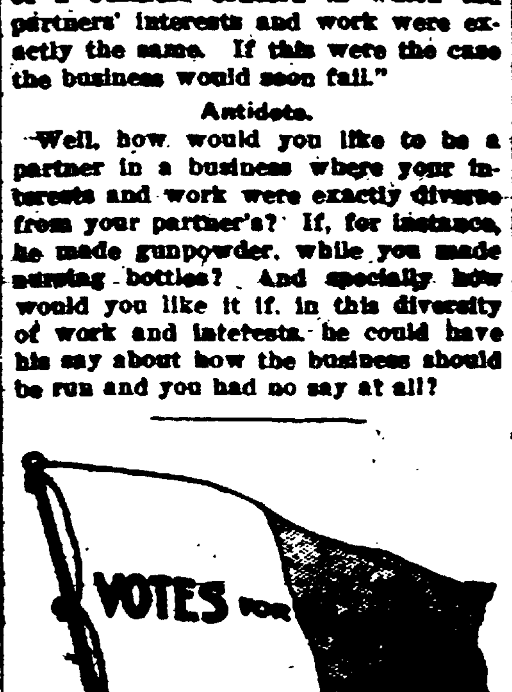
John Smith will either vote as Bill Brown votes or he won't. If he votes as Bill does he merely doubles the vote. If he votes contrariwise to Bill he kills Bill's vote. Which shall be disfranchised, Bill or John?

Anti-suffrage.

"As to women voting, the situation," says Miss Lucy Price, "would be that of a business concern in which the partners' interests and work were exactly the same. If this were the case the business would soon fail."

Antidote.

Well, how would you like to be a partner in a business where your interests and work were exactly diverse from your partner's? If, for instance, he made gunpowder, while you made nursing bottles? And specially how would you like it if, in this diversity of work and interests, he could have his say about how the business should be run and you had no say at all?



[illegible] DEATHS ON LUSITANIA AND TITANIC.

Some striking parallels suggest themselves in a comparison of the death rolls of the Lusitania and the Titanic disasters.

John Jacob Astor was the most conspicuous American lost on the Titanic, as Alfred Gwynne Vanderbilt was on the Lusitania. Each inherited a great fortune, each was a dominant figure in the social life of New York, each died in gallant self sacrifice.

Henry B. Harris was a notable figure in the theatrical world when the Titanic ended his career. Charles Frohman when the Lusitania went down was perhaps the most distinguished figure in the managerial world.

Jacques Futrelle was in the full flower of his fame as a writer when he became a passenger on the Titanic. Justus Miles Forman had come to a like period when he went on the Lusitania.

William T. Stead was an eminent figure among English journalists when he died on the Titanic. Elbert Hubbard, who died on the Lusitania, was at least as well known among American journalists.

BIG INCREASE IN SHIPS UNDER AMERICAN FLAG.

In Year 1,019 Vessels Register Under Stars and Stripes.

In the twelve months ended May 1 877 merchant vessels were built and officially numbered in the United States, according to an announcement from the department of commerce. The gross tonnage of these ships was 179,450.

"These added to 142 foreign built vessels of 500,705 gross tons," says the statement, "give a total increase in the American merchant marine of 1,019 vessels of 680,155 gross tons for the past ten months, which is considerably larger than the increase of any previous year. During the fiscal year ended June 30, 1907, the new tonnage added to American registry was 596,708 gross tons, and until that time the record was held by the fiscal year 1855, with 586,102 gross tons."

MRS. PENFIELD DECORATED.

Austrian Emperor Gives Cross to Wife of American Ambassador.

Mrs. Frederic C. Penfield, wife of the American ambassador to Austria, continues to be a Red Cross fairy to the hospitals in Vienna and to the wounded everywhere. She has given more than a million and a half of bandages, made and prepared in the embassy. The bowling alley of the embassy was turned into a bandage factory. She takes the entire output of one cotton mill in Bohemia.

In recognition of her work the emperor recently decorated her with the grand cross of the Order of St. Elizabeth. She is the only foreign woman ever to receive this distinction.

BASEBALL LEGACY FOR BOY.

$300 Left by Uncle to Teach Little Dan the Game.

Little Daniel McVey, Jr., of Newcastle, Pa., is to receive a bequest of $300 "to provide a baseball education." The odd legacy is left him by John McVey, an uncle. The boy is six years old.

John McVey was fifty-four years old and unmarried. In youth he was passionately fond of baseball and at the time of his death was still an ardent fan.

Little Dan now prances around the farm twirling a baseball. His particular hero is Hans Wagner, shortstop of the Pittsburgh Pirates.

MUST BE SOBER TO WED.

Georgia Doctor [illegible] Up Bill to Compel Eugenic Marriages.

A bill to permit only eugenic marriages in the state of Georgia is to be introduced at the coming session of the legislature by the Dr. [illegible] Emery, representative from [illegible] county.

The bill will [illegible] medical certificates must be produced showing that neither party in the proposed alliance is suffering from tuberculosis, epilepsy, cancer or any infections or contagious disease and that neither is addicted to the use of intoxicating liquor or "dope" of any kind.

JOHN BUNNY DIED POOR MAN.

High Salaried Film Actor Left Only $8,000, Widow Says.

Although John Bunny was one of the highest paid film actors in the world, he apparently died comparatively poor. According to the petition of his widow, Clara, filed for probate in New York, Bunny's estate will not exceed $8,000.

The entire property, which is personal, is left to Mrs. Bunny.

Left $1 to Pay For Suicide Gas.

Mrs. Elizabeth Heck, a widow of East Orange, N. J., sixty-four years old, who committed suicide at her home by asphyxiation, left a note inclosing $1 to pay for the gas she used in killing herself. A short time before she heard a neighbor play music and told a friend she felt like dancing again.

A SECRET SERVICE FAILURE

A Story For Memorial Day.

By F. A. MITCHEL

In the year 1862 I was a private in the —th Ohio cavalry in middle Tennessee, and a part of my company was detailed under a lieutenant to act as the headquarters guard to a division commander. I was one of these men, and my principal duty—when there was anything to do—was acting as courier for the general commanding. I carried dispatches wherever the military telegraph was not available.

One day the general handed me a communication that he told me I must not on any account permit to fall into the hands of the enemy. I promised him that I would defend it with my life. It was contained in a long official envelope, and I tucked it into my saber belt, where we couriers always carried our dispatches, intending when I got without our camp to put it in a less conspicuous place.

I was riding down a turnpike southward when I saw a young soldier on foot a short distance ahead of me. It occurred to me that he had a peculiar walk. When I reached him he turned and looked up at me. He was the youngest looking soldier I ever saw except among the drummer boys. His cheeks were rosy as a girl's, and there wasn't a sign of a beard.

"Like to ride, sonny?" I asked. "If so, I'll take you up behind me."

I noticed his eye turn upon the dispatch in my belt, but only as it might rest on anything about me, and he said he would like a lift if I didn't mind, since he had several miles to go before reaching camp. I noticed that his accent had the southern flavor in it and asked him what regiment he belonged to. He said he was one of an east Tennessee cavalry regiment that I knew all about. This accounted for his accent. He put his foot on mine, and, giving me his hand, I lifted him up to a seat behind me.

I chatted with him on the way, though I could not get him to say much. All of a sudden when we came to a part of the road where no one was near I felt my revolver being drawn out of its holster, and the first thing I knew after that I heard a click and felt the muzzle against the back of my head.

"I'll take that paper in your belt," he said.

It didn't take me long to form a theory of what all this meant. He was a Confederate who had got hold of a Federal soldier's uniform and come into our lines on secret service. But I didn't let on that such was my opinion.

"Oh, stop your fooling," I said, "or I'll put you down."

I knew he was more frightened than I, for I felt the muzzle of the pistol shake against my head, which indicated that his hand was trembling. However, he managed to control his voice sufficiently to say quite severely for a mere boy:

"You give me that dispatch or I'll make a hole in your head."

"Are you in earnest?" I asked.

"You'll find that out pretty quick if you don't do as I tell you."

He was so excited that he omitted to put a masculine tone into his voice and gave himself or herself dead away.

"Come, little girl," I said, "don't you think you have embarked in a pretty dangerous business?"

"Girl or no girl, I want that dispatch."

"Well, if you want it why don't you take it?"

There was no immediate reply to this. She was evidently thinking what to do. A man would have reached for the dispatch with one hand while he held the pistol in place with the other. I didn't believe that the girl would kill me intentionally, but I confess I was mightily afraid that in her agitation she would pull the trigger without knowing it.

"I'll tell you what I'll do," I said. "Lower the revolver and I'll give you the dispatch, on the honor of a soldier."

"Give me the dispatch or I'll fire."

I didn't believe she could bring herself to shoot me in cold blood. I resolved to risk it.

"You're welcome to it, my dear," I replied, "but you'll have to take it yourself."

I knew she was afraid that if she reached for it I would adopt some method to circumvent her.

"Suppose," I added, "I give you the dispatch. What will you do next?"

"You'll dismount, and I'll ride away on your horse."

"How do you know but I have a revolver in my bootleg?"

She didn't know, but I knew I hadn't. She made no reply, but I felt her trembling.

"If you're going to succeed in this job you'd better reach down and pull out the other weapon, for if you don't I can shoot you as soon as I've dismounted. I could give you the dispatch, get down and put a bullet through you as soon as I touched the pike."

"Why don't you?" she asked in a voice that had perceptibly broken away.

"Because I wouldn't hurt you, my dear girl, for the world."

This was too much for her. She broke down and put my revolver back in my holster.

I'm sorry I haven't time to tell the rest of the story. I can say, however, that after the war I took her north with me.

Italian Troops Near Gorz After Crossing Line, Driving Back the Austrian Army

Italy has lost no time in taking the offensive against Austria on land, and hurling a large number of troops across the northeastern frontier. Her forces occupied several important towns and compelled the Austrians to retreat.

The Italians occupy a strip of territory along the River Isonzo and are preparing to dig themselves in in anticipation of the predicted attack by Field Marshal von Hindenburg and the army of 700,000 which he is reported to be leading toward the new frontier.

The rapid stroke of the Italian army coming in the first thirty-six hours of her belligerency, would seem to bespeak a long preparation, bearing out what the press of the allied countries contended months ago, that Italy would throw in her lot with the Entente and was only waiting for an opportune time.

Rome's first bulletin dealing with the movements of the army indicates that two movements are under way—one to the northward, toward the Carnio Alps—and the other through the region of Friuli ostensibly aimed at Trieste and the Istrian Peninsula. Gervigano, one of the Austrian towns occupied by the Italians, is only about ten miles inland from the Gulf of Trieste. Both thrusts should develop severe fighting.

Just as Italy lightly characterized Monday's Austrian naval and air raids along her coast, so Austria characterizes the military operations to date as border skirmishes.

While yesterday's Rome official communication laid stress on the Italian rush across the border, the official statement from Vienna ignored it and gave letails of the Austrian swoop on the Italian coast, enumerating the damage and emphasizing the slight Italian resistance.

The German claims of succees for yesterlay embrace both east and west, notably around Ypres and north of Przemysl. In the latter region it is announced that General Mackensen is again surging forward and taking a colossal number of prisoners.

The British War Office admits that the British have been unable entirely to reform their line dented by the Germans east of Ypres, and this dovetails with the German claims of advances in this region of Flanders.

The most interesting statement in the British announcement yesterday is that "with due precautions" gas attacks can be "met and defeated." This is particularly pertinent, in that gas bids fair to be used more and more, possibly by all the contenders.

Attesting to the extremely sanguinary character of the recent land fighting at the Dardanelles where the British and French are seeking to dislodge the strongly intrenched Turks, came last night a list of 919 casualties among the Australians engaged in this enterprise.

The Turkish losses apparently have been greater, as it was necessary for them on Sunday last to get an armistice to bury their dead 3,000 of whom lay piled before the British trenches.

A radical shake-up in the British Cabinet is announced. The most interesting change is the transfer of Winston Spencer Churchill, First Lord of the Admiralty, to the Chancellorship of the Duchy of Lancaster, Arthur J. Balfour, the former leader of the Opposition, taking the Admiralty portfolio. David Lloyd George, Chancellor of the Exchequer, who vacates that office temporarily has been appointed Minister of Munitions.

OPPOSITION DEVELOPS TO WIDENING STREET

It was learned this morning that several residents along 1st st. are opposed to widening the street between Rochester st. and Broadway when it is paved, which will take place in the near future. George B. Mason, a property owner along the street, interviewed John W. Stevenson, of the Board of Public Works on the subject and said that many of the property owners along the street would vigorously oppose the plan to widen the street by cutting three feet off the property along the west side of the street.

Mr. Stvenson stated that the Board of Public Works intends that the paving shall be a permanent improvement and that if the street is not widened now when the paving is put down, it will cost the city more money later on as the street will have to be wider at some time. The board is of the opinion that paving the street without making it wider would be a great mistake and a waste of city money in the long run.

GOVERNOR'S VETO GIVES OWNERS RIGHT TO THE CANAL LANDS

Governor Whitman yesterlay vetoed one of the bills which would amend the city charter of Fulton, both of which were presented by Senator Elon R. Brown, of Watertown. Great agitation prevailed among many residents of the city who were of the opinion that the bill vetoed was the one which called for salaries for the mayor and aldermen, but such was not the case. The Governor vetoed the bill which amended the charter in regard to the limitations of the city to incur debts, a change which was intended to bring this city under the constitutional provisions, in other words, to limit the city to an indebtedness of one-tenth or less of its assessed valuation. At the present writing it is understood that the bill vetoed was the latter bill but nothing definite could be learned this morning.

The Governor also vetoed the Canal Lands bill, which would allow cities to have first call on the purchase of abandoned canal lands. A delegation from the local Chamber of Commerce went to Albany to urge the passage of this bill, but the Governor vetoed it yesterday and now the property owners who abutt on the canal lands will have the first opportunityto purchase the lands. It was learned today, however, that the property owner must buy the property at an auction and that any citizen can bid against him. The property owner will be able to purchase the land in preference to the other bidders if his bid equals any other, but the passage of the bills opens up a field for speculators who can, under its provisions, boost the price to a prohibitive figure or buy the land and hold it until the property owner is willing to buy.

The city wished to buy the canal lands here and although the projelt was opposed by several land owners along the canal, the veto of the bill was not anticipated. Now the property owners will have first call, but at the same time, they will have to bid in the land, while the bill would, if it had passed, provide that the city could purchase the land at its assessed valuation.

Some of the abandoned canal lands here were spoken of as a site for the public market.

Cost of Special Election Compared to That Junketing Dinner

All those advocates of the calling of another election for the purpose of voting on the Falley Seminary for a high school site who went over to the West Side last night with the intent of explaining to the West Siders just why the site should be purchased had their long trip for naught for in spite of the fact that Mahomet went to the mountain, the mountain had moved off the landscape temporarily, and just five residents of the over-river section were on hand to receive explanations. The others who attended the meeting were, including Mayor Fox and Superintendent of Schools J. R. Fairgrieve, just twelve in number, bringing the grand total up to nineteen. The meeting was announced for 7.45 o'clock but it was nearer 8.30 when the Mayor called the meeting to order having concluded that further delay was useless.

In opening the discussion the Mayor after a remark about the size of the meeting said, "Where lies the influence of the Chamber of Commerce? We have what is supposed to be a live wire organization here and this was one opportunity for them to show their interest in matters that affect the city."

William J. Lovejoy asked if any action had been taken officially by the Chamber of Commerce and in reply George B. Deuel stated that the Educational Division had taken the matter up and had even appointed canvassers to secure signatures to a petition asking the council for another vote on the question. Mr. Deuel further stated that he had no faith in the meeting and knew before he came over that no large number would attend, and in concluding regretted that but one a[illegible] hold up the rest of the city by refusing to vote for t[illegible] "It is the first time in many years," said Mr. Deuel, "that any alderman has asned his constituents how he should vote."

The Mayor submitted a list of objections to the proposition which he had heard advanced by the opponents of the measure, the gist of them being as follows:

That $16,000 was too much for the property; that there was no need for a high school; but an industrial school was what was needed; that the insurance and other expenses would be too large when the city took the property; that it would mean higher taxes.

Mr. Fairgrieve suggested that some of the gentlemen present who were in favor of the site should be allowed to answer these objections, and as a judge of real estate, Mr. Lovejoy was asked his opinion as to the value of the site. He said it would be cheap at $16,000 and stated that the title to the property was free and clear and not encumbered by any clause in the will or any lien as some of the people had been led to believe.

E. R. Redhead was asked to give his opinion. Mr. Redhead said that a boycott had evidently been instituted against the meeting by some few men who were in control and who opposed the site and

Mayor Lauds Public Spirit of the Movie Men and the Board Endorses His Action

Mayor Fox entertained this afternoon his newly c[illegible] self-appointed and widely heralded board—the Movie Censors.

The launching of this dreadnought of supervisorship over the picture houses of Fulton carried with it as much dignity as the occasion demanded.

Undesirous of reporting anything but the whole truth and nothing but the truth, The Evening Times uses that old familiar refrain, "It is understood." Does the reader grasp it?

"It is understood" that at today's meeting at the executive mansion the Mayor of Fulton called the session to order, giving his reasons therefore that this city has reached a point in its history when larger centers of population should be copied. "It is understood" that the Mayor has felt deeply the need of a board of movie picture censors for a long time, and he resolved to place Fulton on the same map as the leading cities of the country. "It is understood" that he may even go so far as to establish a theatre here in Fulton where all films can be scrutinized by his newest board before their submission to the eyes of a long-suffering public.

"It is understood" by those who were not in attendance at today's meeting that the Mayor, rather than have the city involved in additional erpense in carrying on a specially-designed and constructed movie house for the exclusive use of the censors he will request the proprietors of the existing establishments to set apart a time when the board and the members of the censors' families may visit the houses, free, to pass their judgment upon the fitness or unfitness of films. "It is understood" that in reply to a censor's inquiry, the Mayor said that the several movie men of the city welcome the guidance afforded by the 'steenth board of officials and further, that they will at all times be ready to co-operate in the work of purging films of naughty features by extending to the board's use free heat, free light and free services of all theatre attendants wherever and whenever they may desire to take a squint at films. This news was received by rounds of applause, indicating to the members of the board that Fulton's movie men are above reproach, and further that they fear not the prying eyes of the critics.

"Seldom, ("it is understood)", said the Mayor to his board, "Has this city responded on such a liberal manner to any of my advanced ideas of advanced municipal government, and ladies and gentlemen of the first board of movie censors, I am proud of you and the moral effect you have already inspired."

STEVENSON STANDS BY HIS FORMER RESOLUTION

Mayor Fox and John W. Stevenson had a warm argument on the West Side yesterday over the merits of the Falley Seminary proposition, when the Mayor endeavored to win Mr. Stevenson over to the plan. Mr. Stevenson when interview this morning, stated that he is and has always been opposed to the Falley site, for the reason that the price is too high and also because he does not think a high school is what is needed most at present as a vocational school would be far more in the line of improvement here, with an agricultural department which would serve to draw the young farmers into the city.

Mr. Stevenson said that he was sure the West Side people would defeat the project even if another election was called. The new parochial school will take many pupils from the public schools according to Mr. Stevenson, and if the congestion still prevails, two sessions can be inaugurated in all schools and the overflow can be taken care of in that manner. Mr. Stevenson stated that the two-session rule was in vogue in several cities of the state and could be used here until the city could afford to buy a site.

MAYOR FOX ADVOCATES EMPLOYING NEW OFFICER

A Times reporter in conversation with a prominent city official this morning learned that Mayor Fox is about to advocate the engagement of a City Bactoriologist, the incumbent to receive a salary of approximately $900 yearly. After the reporter had recovered from the shock he questioned the veracity of the statement, but city official vouched for it.

The duties of the bacteriologist have not been explained but his work would evidently consist in exhaustive studies of bugs, bacteria, and germs, and in examining the water from time to time, perhaps twice weekly, as well as assisting the Health Officer in his work.

There is absolutely no question as to the necessity of such an officer, the city needs one badly and a man who is qualified to corral bugs before they do any damage is worth $9,000 a year instead of $900.

Opinions

Enter the Catalo

We believe it was an English house wife, distracted by the problem of giving variety to her bill of fare, who fervently wished that "somebody would invent a new animal." Well, the incredible has happened and somebody has done precisely that. A new and edible animal has been "invented" by Western breeders. It is called the catalo, with the accent on the first syllable. The name is an attempt to combine "cattle" and buffalo." The animal is the offspring of the buffalo and the domestic cow. One is told in the New York Forecast that this product of cross-breeding thrives in arid country and yields excellent meat.

Therein lies the great advantage of the catalo. It will thrive in regions where it would be nearly impossible to raise ordinary cattle. It is declared that, unlike most hybrids, cataloes are not sterile, and if this is true it is reasonable to suppose that catalo meat might become much cheaper than beef. Regarding the usefulness of the catalo, the Forecast says:

The range is the natural habitat of the buffalo, and the catalo appears to inherit from its wild progenitors this love of the open. Turn the catalo loose in the summer and winter; it fattens much more rapidly than domestic cattle would under the same circumstances and its mortality rate is much lower. * * Water is not as essential to the catalo as it is to the cow. Nor is salt. * * Another advantage of the hybrid is its immunity from diseases which have so scourged the cattle-herd.

This paragon among domestic animals seems to be too nearly perfect to be a reality. But if, as we are assured, the catalo will live up to all the claims that are made for it, it is possible that the "new animal" will help us out in our very serious problem of reducing the high cost of meat. The Western cattle breeders appear to be taking the catado seriously, and the East will await hopefully the result of their efforts to make the catalo a commercial success.—Rochester Herald.

Showing the Facts

Governor Whitman's statement explaining his action on the appropriation bills and answering his critics on the levying of the direct State tax sets forth definitely and concisely the situation as the result of inefficient government during the four years preceding his term. When Governor Whitman took office he found the finances of the State exhausted and a legacy of obligations to be met that made a heavy burden for his administration. These obligations and the necessities of the State government have been provided for.

The Governor's reply to criticism of his administration, which came chiefly from New York city, and his exposure of the fallacies of its argument, is clear and convincing. No other administration has been alled upon to face more deplorable conditions in State finance and the Governor's explanation of the problems that were presented and the treatment of them bears aut his assurance that the appropriations that were approved give "opportunity only for carrying out the functions of the State with decency and the maintenance and protection of structures, canals and highways against wasteful deterioration."

The direct tax was necessary. The objection that it will bear inequitably upon the city of New York is not valid. New York city pays 72 per cent. of the direct State tax because the assessed valuationo f New York city's taxable property of the entire State. If some things are maintained by the State largely at the expense of New York city other things are maintained for New York city at the expense of the State. The State makes appropriations according to the needs of the State without discrimination as to locality and with equal justice to all of the State. Seventy per cent. of the expenses of the Election Bureau, the Workmen's Compensation Commission, the Tax Commissioners, the Banking Department and the Insurance Department is chargeable to New York city, and 70 per cent. of the total number of inmates in the State's penal institutions come from New York city. The State also contributes over $2,000,000 to the support of New York city's schcols.

Governor Whitman has performed his part in providing for the State's requirements with ability and sincerity and due regard to his pledges and oath of office.—Utica Dispatch.

TWO OF THE CITY'S PARKS

If the reader has not taken a walk through East Park, or if he has not cast an eye upon the narrow strip of green bordering the river between Rochester st. and the Public Library, then he has indeed missed for himself a treat. True there are no flowers—not yet—to irradiate those places for the benefit of the persons who love the beautiful in Nature, but there is every evidence of public spiritedness on the part of the man—and the noun is used advisedly—who has done so very much for the city by making the two green places greener and neater than ever before. Those two plots of ground bear witness to many points, but in one particular sense they show that in the man who has labored with hoe, rake, scythe and cycle charity is not measured by the dimensions of his own dooryard, or in fact, the points of the compass. Jesse A. Morrill has celebrated the extraordinary natural advantages of the two parks resulting from the foresight of those persons who saw the wisdom of setting aside the grounds for park purposes. Many months ago the gentleman grew tried of beholding untidy, unkempt parks, so he put his shoulders to the wheel to spur on the movement for park improvements, backing up that form of work with his muscle to create a different aspect in the respective localities.

The two plots of ground are good evidences of "Community Building," in that there is no fenced exclusion; and orderly citizens, poor or rich, may walk into the parks, breathe the pure air and enjoy the green trees and grass of the East Park in particular, and the comparatively smooth sward of the river bank strip of land. No one has special privilege.

Why should not the river banks present just as engaging an aspect? In reality there is no excuse for the condition of the river's banks, which suggest the happy hunting ground of the ashman and a herd of goats. Once set in order, it would not be much more costly to keep them clean, green and a perfect delight to the eye of the traveler than to keep them littered, squalid and repellant.

Such places as the East Park and the plot between Rochester st. and the Public Library may easily be object lessons to the entire population of the city in tidiness; or, they may suggest merely a drowsy, frowsy indifference to thrift and cleanliness that is a disgrace to any town and a cause of reproach on the part of every observant visitor. There are other spots than East Park and the eastern river bank that need immediate attention, but it is feared that there are not enough men like Jesse A. Morrill who cares to dig deep enough to get the desired results.

A Law of the Road

Thanks to Justice P. C. J. De Angelis of this judicial district for defining the rights of a pedestrian in a charge to a jury in a damage case. He said, "The right of the pedestrian is equal to the right of a person driving an automobile; we overlook it every day. People run away from automobiles because they do not want to be injured, but the law does not require a person to run away from an automobile." That seems to be forgotten by a good many automobile drivers. Thehy seem tot hink that they have the full right-of-way and the pedestrian must dodge them. The pedestrian is under no obligation to get out of their way; it is the business of the automobile driver to see to it that the pedestrian is not injured. It is not sufficient even to give warning honks. The pedestrian is not obliged to pay any attention to it while crossing a street at a proper crossing. The pedestrian has the first right of way and if injured may collected damages. Sounding a warning does not condone the offense as it does to a locomotive engineer making a crossing on his own right of way.

It is a matter of congratulation, however, that there are less and less automobile drivers who act contrary to this law of the road as laid down by Justice DeAngelis. It was the early automobilists who most violated this law and today it is the new and fresh automobilist who has not learned it but in his new machine still thinks he owns the earth. Old and experienced drivers seldom hurt anyone and then it is unavoidable. The rapid increase in the number of automobiles so that they fairly crowd city streets has compelled carefulness. Now and then, however, there is a reckless and careless driver who needs Justice DeAngelis' admonition.—Watertown Times.

NEW MODERATOR WANTS PEACE

Dr. Stevenson Says U. S. Have Gospel and Set Example to Others

Rochester, May 26.—"A nation which does not have the Gospel of Christ, the ethical life and power of a divine supernatural revelation cannot be dealt with on terms of Christian brotherhood until it gets that Gospel," said Dr. J. Ross Sevenson, newly elected moderatok of the General Assembly, in the course of a sermon on "The Imperative of the Gospel" at Central Church Monday. Dr. Stevenson held that the reverse also was true; that the United States with its enlightenment, freedom and progress, which, he said, were based on "the one and only foundation Jesus Christ, was not in a position to lead other nations toward the goal of a kingdom of truth and good will until it stood ready to share, at any sacrifice, its highest blessings with the farthest and lowest rates.

Dr. Stevenson took for his text, Mark xiii, 10: "And the gospel must first be preached unto all the nations."

"In these words, said he, "the great Teacher sums up the nation's supreme need—the world's paramount, though unconscious, desire and the main business of the church.

"Why is it that a nation nominally Christian must conduct its affairs in a strictly self-interested and un-Christion way? Why shouldn't America set the nations an example of good will by laying by the sword, by doing away with fortifications and armaments, confident that by reasonable and just dealing with all peoples there will be no occasion of war? Two answers would probably be given. First, we cannot yet trust other nations to deal fairly and squarely with us. If we should disarm they would take advantage of our weakness and destroy our liberties and possessions. Secondly, our own policies, controlled more or less by national pride, race antipatides, vested interests, local and selfish prejudices, have not yet reached the high level on which we can be sure that our treatment of other nations will commend itself to right thinking men. In other words, we are not yet sufficiently Christian to deal on the simple platform of the Christian principles of righteousness, justice and patience with nations which we regard as still less Christian than we are. What is the remedy for this diplomacy of distrust? The gospel of the kingdom, the doing of God's will in all departments and relations of life.

"The Gospel must be proclaimed at home with all boldness in its application to the whole life of man, so that we shall not be guilty before the world of glaring inconsistencies, and proclaimed abroad in its adaption to the deepest needs and largest hopes of any and every man. This imperative of the Gospel corresponds to the world's real desire."

KIBOSH PUT UPON FLOURISHING INDUSTRY

PennYan, May 26.—A scheme operated from this village by the Rex Co. has been stopped by the Post Office Department in Washington, through the issuance of an order preventing delivery of mail to the concern.

People answering the "ad" of the firm were told that from $8 to $15 a week would be paid for correspondents to write letters, but that the writing must be done with a certain kind of pen and brand of ink. It was a scheme to dispose of quantities of ink and pens at an excessive price.

ROCHESTER FACTORIES EXPERIENCING REVIVALS

Rochester May 26.—Representatives of large factories in three of Rochester's leading industries say that business conditions in Rochester are becoming normal and that their factories are running on full time force.

"In considering business conditions prevailing in the United States at large we are of the opinion that Rochester is much more fortunate than many other American cities," said William H. Dunn of the Utz & Dunn Company, manufacturers of shoes. "This is especially apparent in the shoe industry. Style changes have occurred with such rapidity during the past few months that our shoe merchants have been confused, hardly knowing how to make their purchases for the future. There has been a vast improvement in this regard however, and they are now placing their orders with much more confidence.

"As far as our firm is concerned, we are now working full time in all departments, making shoes for fall delivery. We have a good volume of orders on staple lines on hand and have every reason to expect a good business in novelties a little later on. We feel that conditions are improving daily and that they will continue to improve unless some unforeseen complication arises.

GERMAN CATHOLICS TO MEET IN SYRACUSE

The German Catholic Federation of New York State will hold its twentieth annual convention in Syracuse, commencing Sunday, May 30th, and lasting until June 1st. More than 1,000 delegates will be present including women who will form a woma's auxiliary of the federation. Preparations have been going on for months, and the convention is expected to be a success from the reception of delegates Saturday night to the close of the outing Tuesday, June 1st.

DEEDS FILED YESTERDAY

Alvin R. Larkin to Cheney Power; property in Scriba $900.

W. G. Tilton to Charles Jacobs, property in Mexico, $1,500.

Esau Dight to Phoenix Auto Sales Co. property in Phoenix terms private.

George E. Anderson to Herman F. Byer property in the First ward, Oswego, terms private.

Mary E. Ward to Wallace Hannibal. property in Hanibal $700.

Frank E. Woodard to Denois M Woodard, property in Scriba, $450.

Edgar Munson to Hannah M. Blowere, property in Parish, $750.

Blanche Stowell to Claude E. Minor, property in Orwell, $5500.

APPRAISERS NAMED

William D. Cowles and James R. Gault of Hannibal have been named as appraisers of the estate of Ransom Sturge late of Hannibal.

Citations have been issued to the heirs of Julia A. Boardwell late of this city returnable July 19. There were eighty heirs of the decedant to cite but many have waived service of citation.

Are You Rheumatic?—Try Sloan's

If you want quick and real relief from Rheumatism, do what so many thousand other people are doing—whenever an attack comes on, bathe the sore muscles or joint with Sloan's Liniment. No need to rub it in—just apply the Liniment to the surface. It is wonderfully penetrating. It goes right to the seat of trouble and draws the pain almost immediately. Get a bottle of Sloan's Liniment for 25c of any druggist and have it in the house—against Colds, Sore and Swollen Joints, Lumbago, Sciatica and like ailments. Your money back if not satisfied, but it does give almost instant relief.

GUNPOWDER.

Some In Which the Perforated Grains Are Three Inches Long.

The bigger the gun the bigger the grain of powder. For the rifles the men carry the grains are half as big as a pinhead. For the largest guns they are three inches long and three-quarters of an inch thick. Every grain is perforated lengthwise. Small grains have a single hole, while the largest sizes have seven.

These holes regulate in a wonderful way the rapidity with which the powder will burn. If you light a scrap of paper all round the edge it will burn toward the center and the burning surface will steadily decrease. If, however, you made a hole in the center of the paper and start the conflagration there the flame will steadily grow, and the most rapid burning will take place just before the fire has reached the outer edge. This is the exact principle which governs the arrangement of the perforations in big gunpowder. The burning starts along the surface exposed by the perforations and spreads always faster as the hole is enlarged, burning fastest at the instant it is consumed.

It is not intended that the charge in big guns shall exhaust its force instantly, says William Atherton Dupuy, writing on "Powder For the World's Guns." The beginning of the explosion starts the projectile on its way. The explosion continues, and as the projectile gains speed the force behind it continues to push. The powder is burning fastest and pushing hardest at the instant the projectile reaches the mouth of the gun. At that instant also it burns out and exhausts itself. Its work is done.—Pearson's Weekly.

A FRIEND IN NEED.

The Pleasure That Came With a Little Act of Kindness.

"I am one of your new neighbors, Mrs. Estabrooks," said a cheerful voice at our door in the very middle of our first attempt at moving. "No, I can't come in. I just brought you a bit of lunch, knowing you would be too busy to fix any. Please call on me—just next door—if I can be of any help. Goodby!"

My husband and I glanced at that tray with its two bowls of hot soup and steaming little pot of coffee and then at each other in dumb surprise.

We had just reached that dreadful state in moving when nothing is in place and the things wanted first are underneath the things wanted last—that awful moment when a sense of helplessness, weakness and homesickness combined swoops down upon you.

We had not realized that we were hungry and physically exhausted, but after sitting down at an improvised table and sampling that delicious soup and drinking the stimulating coffee we suddenly knew what had been the matter with us. Courage returned.

"Blessings on our neighbor!" cried Ben.

"Yes," I answered. "She's the jolliest caller I ever received. She has taught me how to introduce yourself to new neighbors and win their everlasting gratitude. Whatever happens in this neighborhood I'll stand by Mrs. Estabrooks—see if I don't!"—Woman's Home Companion.

How a Woman Deals With Vexing Labor Problems.

© by American Press Association.

MRS. HELEN GOULD SHEPARD.

Mrs. Helen Gould Shepard believes in arbitration. She goes about it with a simple directness which it might be well for male employers to imitate. The incident happened some years ago when Mrs. Shepard, then Miss Gould, was building a memorial chapel to her father, Jay Gould.

The workmen, so she was informed by the superintendent, were not satisfied.

"What is the trouble?" inquired Miss Gould.

"The men want more money and fewer hours."

"Then give them what they want," was Miss Gould's succinct reply, the finest settlement for a labor problem that any capitalist ever invented.

Helen Gould first became the talk of every town in the Union at the outbreak of the war with Spain. An announcement was made that a generous and patriotic woman had given $100,000 to the national government as a contribution to the cost of a righteous war. Shortly afterward the same generous hand gave $25,000 to the Woman's National Relief association. This was too much for the public. It wanted to know what manner of woman was this.

Then it was that her unobtrusive benefactions were made known or at least a few of them, for the full extent of Miss Gould's charities will never be known to any one but herself. Born into millions, with a natural place in the most ornate society, she has willingly cast aside all frivolity and devoted herself to the serious business of life and the philanthropic responsibilities of her position.

Scarcely a man who suffered in the war in Cuba, Porto Rico or the Philippines who has not been, directly or indirectly, benefited by her generosity. Her house in New York and her country home, near Tarrytown, were turned into hospitals when the transports began crawling northward with their freight of suffering. She cared for hundreds under her own eyes and lavishly contributed when help was needed elsewhere. To hospitals and homes wherever a sick soldier had found refuge she sent flowers and fruit, blan-

grievously hurt by the war, the mothers and wives at home, who suffer and are wounded without the excitement of battle. She felt that no sacrifice was too great to make for the men who had answered the call of country. She is, above all things, patriotic and takes a great and intelligent interest in the affairs of the republic.

Her income is much over a million a year, but of this very little is expended on its owner. Since her marriage to Mr. Shepard, a few years ago, her scheme of life has been the same. If anything, her benefactions are now carried out on a larger scale, for Mr. Shepard is an ideal worker along the same lines, and had been for many years before he met Miss Gould.

She regards her fortune as a sort of trust for the less fortunate. When she entertains, it is modestly, and her fashionable visits are few in the course of a season. Indeed, she is far happier when she is entertaining at one of her houses a group of self supporting working girls—a class in whom she is greatly interested.

In all her charities; and in all her work, there has been a practical and sensible spirit. She is not a sentimental giver nor one who gives for the appearance of munificence. She exerts herself to give where it will do good and looks to it that her benefactions will genuinely benefit those for whom they are intended. She has a very clear and right perception of what her duties are. Here, in her own words, is what she told the Woman's club of Cincinnati on the duty of a woman of wealth:

"I shall never cease to preach the gospel that women of means should do more than rush through life for nothing but their own pleasure. It is the duty of women who have wealth to help others, and especially other women, and to make life for them worth the living."

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

Paint-Wise

is to paint when your property needs it. Paint-foolish to wait for the price to go down.

But so many are foolish, they'll wait a good while.

The whole rise in the cost of a job is 10 percent. The first year's drop won't be more than half that, more likely a quarter.

Waiting for 5 percent, more likely 2½.

The average job (with Devoe) is $50; 5 percent, $2.50. Put it off for $2.50? Guess not.

You think of that job as $100. So it is with inferior paint.

Paint Devoe; do it now, if your property needs it.

DEVOE

L. P. SMITH & CO. sell it.

EDWARD AMHERST OTT is the man who made "Sour Grapes" popular. That is, he has delivered his great lecture on this subject until it has proved very popular indeed Ott is to appear at Chautauqua here. He is said to be one of the foremost orators of the country and to deliver a message of thrilling interest. He has his own style of thinking and his own method of treatment, and every phase of his discussion is said to contain many surprises. Mr. Ott has been a standard lecturer on the Redpath list for many years.

Good Form

Regarding Week End Entertainments.

Spring days suggest the country, and the country suggests week end guests. Week end parties, as everybody knows, are delightful, but week end guests and their entertainment require skill and tact.

The woman who intends to have week end visitors, then, or house visitors of any sort needs to consider one thing before inviting the outsider into her home—is the prospective guest worthy of the honor? Is she to be trusted with one's life, ergo one's reputation? If not madam must not issue her invitations, and if she sees fit so to do once the stranger is within her gates all must be given her—full confidence in her integrity and entire liberty in every move that concerns her health and happiness.

As the hostess' captiousness sometimes comes from feeling that the visitor of a week or more is outstaying her welcome the English custom of arranging a visit within a prescribed period is an excellent one. If you ask Miss Guest to come on the 15th and stay until the 20th you have no reason to complain unless she prolongs her stay. This arrangement for the coming of the guest and her going puts the whole visit on a pleasant and easy basis, and the hostess and guest of good sense abide by all the requirements of politeness and kindly feeling as long as the visit lasts.

Some very definite obligations are involved when inviting a friend to partake of a home's hospitality for this stated period. The hostess must see to it that there are writing materials in the friend's room, stamps excepted. She must consult with her guest concerning the acceptance of any invitation to other homes. When callers come the guest must be asked to go down to the drawing room as a matter of course. The visiting friend must be included in every visit to other friends.

Things One Must Do.

A friend of Goethe's once remarked that if you wish to appear agreeable in society "you must consent to be taught many things which you know already."

You have had to sit many hours with a smile upon your face while some dreadful bore expounded supposed theories of his own which had been as axioms to you from youth up. You have had to listen to society traditions, in which you were not in the least interested, told by some sycophant, because you knew that what lay upon your thoughts light as thistledown encompassed her about like a royal robe. You may hate the molecular theory and despise the foolish vaporings about "society," but you have no taste for the life of the hermit, and you have at least to pretend that you are interested in the ponderous and the frothy. The question is whether you are not a bore yourself, at least to the man with a theory about creation and the woman who adores by way of the social register.

Have you ever tried to air your theories about child welfare and the solution of the poverty problem in the presence of the women who were all the time unconsciously counting your frills and speculating as to what sort of "beading" would have improved your costume?

If you have you will no doubt have recognized the set smile with which she pretended an interest, because it is part of her religion to appear always to be agreeable.

Two Sorts of Manners.

"Society is more conventional than it is good mannered at times," remarked a man of manners, "and I know persons of both kinds. Particularly I know a lady who is conventional and bad mannered, and I know a business man who is unconventional and, if not exactly good mannered, better mannered than the lady.

"Not long ago he was at an evening affair—he went because his wife wanted him to go—and he wore a shop tied tie, a gaucherie a man of conventional habits could not possibly be guilty of. The lady in question noticed it, and in her naive way she asked him why he wore that kind of tie.

"'Well, madam,' he replied, 'I do it for two reasons. One is to give stupid people a subject of conversation, and the other is to show that unconventional taste isn't much worse than conventional bad manners.'

"Of course he had no right to say it, nor, on the other hand, did the lady have any right to comment on his dress, so it may be called a standoff, though the man still wears a tied tie, and the lady does not make any comments."

The Merest Trifles.

It is always the merest trifles rather than the big things of life which indicate the manners and tastes of the average person. A glaring social error, a particularly rude action or tactless speech, are not made with too great frequency, but other less obtrusive faults are often committed, sometimes solely through ignorance or want of thought.

It is just as grave a mistake to be too polite as to be abominably rude. The painstakingly polite person is very trying to encounter, for extremes often meet, and he generally succeeds in being actually ill bred.

HIGHWAY POSTER NUISANCE.

An act in relation to the unlawful affixing of advertisements on trees and fences along public highways, drafted by the National Highways Protective society, has recently been passed in Rhode Island and signed by the governor. A similar bill has been passed by the legislature of New York state, receiving Governor Whitman's signature.

After Sept. 1 next it will be unlawful in these states for any person to print or cause to be posted any business or commercial advertisement on trees, fences, buildings or other objects along any public highway or upon the property of another without written consent of the owner. The new law makes violation of its provisions punishable by a fine of from $5 to $25, or by imprisonment for ten days, or both.

No Use to Try and Wear Out Your Cold, It Will Wear You Out Instead

Thousands keep on suffering Coughs and Colds through neglect and delay. Why make yourself an easy prey to serious ailments and epidemics as the result of a neglected Cold? Coughs and Colds sap your strength and vitality unless checked in the early stages. Dr. King's New Discovery is what you need—the first dose helps. Your head clears up, you breathe freely and you feel so much better. Buy a bottle today and start taking at once.

AT CHAUTAUQUA

Strong Array of High Grade Talent of Wide Range and Appeal.

SIX DAYS OF GENUINE JOY.

Celebrated Orators—Men Who Are Doing Things—Women Debaters—Comedians and a World of Music Inspiration—Rest, Recreation, Education and Fun Galore.

FIRST DAY.

AFTERNOON. — Opening Addresses. Popular Vocal and Instrumental Concert.

WEATHERWAX BROTHERS QUARTET.

All brothers—All artistic entertainers.

4 P. M.—Organization of Junior Chautauqua for all children under fourteen years of age. Free.

EVENING.—Musical Prelude, High Grade Concert.

WEATHERWAX BROTHERS QUARTET.

Address, "Sour Grapes,"

DR. EDWARD AMHERST OTT

of Chicago,

A witty and purposeful speaker.

SECOND DAY.

AFTERNOON.—Grand Concert by a Great Company.

AIDA QUARTET and C. POL PLANCON

In a program of high order.

8:20 P. M.—Opening Series Lecture.

EVENING.—Musical Prelude, Choice and Snappy.

AIDA QUARTET and C. POL PLANCON.

Address, "The Mormon Kingdom of Today,"

HON. FRANK J. CANNON,

Ex-U. S. Senator from Utah.

A thrilling patriotic message.

THIRD DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude, In Variety Program,

ROBERT and HELEN BARNARD.

Cornet, Stories, Xylophone.

Debate—For Woman Suffrage,

MISS HELEN TODD of California;

Against Woman's Suffrage,

MISS LUCY PRICE of Ohio.

EVENING.—Musical Prelude. More of the Same Quality.

ROBERT and HELEN BARNARD.

Comedy—Shakespeare's "Much Ado About Nothing."

THE BEN GREET PLAYERS.

FOURTH DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Grand Popular Concert.

QUINTANO AND HIS BAND,

And HARRY BARNHART, Singer.

EVENING.—Musical Festival by a Real Master,

QUINTANO AND HIS BAND,

And HARRY BARNHART, Singer.

An entire change of program from afternoon.

FIFTH DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude of Rich Variety.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude With Ginger In It.

CHRISTINE GILES-BINGHAM CONCERT COMPANY.

Address, "Community Building."

J. S. KNOX.

EVENING.—Devoted to a Very High Grade of Fun.

CHRISTINE GILES-BINGHAM CONCERT COMPANY.

Entertainment,

RALPH BINGHAM

of Philadelphia,

One of the greatest humorists.

A joy night festival.

At the annual organization meeting of the Clifton Springs (N. Y.) Redpath Chautauqua Association, Mr. H. J. Van Dyne, secretary of the association, reported receipts and disbursements of $1. In explaining where he got the dollar Mr. Van Dyne stated that a lady insisted upon leaving it with him because her conscience troubled her for having paid only $2 (the regular price) for her Chautauqua season ticket. Next year's Chautauqua is guaranteed there by 300 people.

Opinions

Medicines and Human Psychology

A very interesting phase of human psychology in its relation to the taking of drugs is illustrated by the series of poisoning cases in the Middle West reported in yesterday's Herald. A number of persons received "free samples" of a remedy through the mails and, though the seals had been broken, quite a few of the recipients proceeded to take doses of it, some of them with fatal results.

There are a great many persons who will literally take any remedy that is offered or recommended to them. Free sample of drugs of which the recipients know next to nothing are swallowed in large quantities every day in this country. It seems impossible, but it is true.

When a colored maid of all work presents herself to a doctor with a large bottle of medicine to ask him whether he thinks there is anything the matter with her for which that medicine might be good it seems a joke. Such things have been known to happen more than once, and there are a large number of persons supposed to be far above the colored maid in mentality and still more in common sense who present the same attitude of mind toward free samples of medicine that may come into their hands. Could anything be more foolish? —New York Herald.

The Naval Academy Scandal

Nothing but deep mortification the country over greets the "cribbing" scandal now being aired at Annapolis. As the court inquiry proceeds it becomes apparent that this is no sporadic instance of student dishonesty suddenly come to light, but the exposure of sytematized fraud, in which, it may be, instructors conspired with studens to graduate from the academy officers not only imperfectly educated but lacking in a sense of honor, the basic virtue of a gentleman. And to aggravate the disgrace Senators and Representatives of the United States have interposed their political influence to save from trial and punishment the young men involved.

It seems a grievous blow, particularly at a time when things military are receiving unwonted attention throughout the world, to have the Naval Academy, of which the country was and is so proud, subjected to public odium. But there can be no two opinions about the desirability of seeing the dirty business through, so that the "system" of supplying "dope" regarding impending examinations may be exterminated.

Let the members of the faculty, if any, found guilty of fostering the dishonesty in successive classes be dealt with summarily and with the utmost severity. Mere dismissal is too good for them. As for the students, those found to have been in any sense go-betweens in the distribution of advance papers or information should be dismissed as morally incapable of maintaining the standard of officer and gentleman. The others may yet be redeemed for the proper service of the nation.—N. Y. Tribune.

Bryan Out

Mr. Bryan's desertion of the administration at a moment when the nation is facing the most delicate international problem in its recent history furnishes the crowning proof of his temperamental unfitness for the office of secretary of state, dumfounds his friends and justifies the worst fears of his political enemies.

The first place in the Cabinet was the price that he received for supporting Mr. Wilson at the Baltimore convention. His continuation in office despite every revelation of his incapacity, despite his complete failure to appreciate the dignity of his position, despite his constant desertion of his post of duty at the call of the notoriety-loving crowd, despite his grotesque efforts to promote Utopian schemes, despite the necessity of sending him to the rear every time important questions arose in the Department of State—that was the price that President Wilson paid for harmony in his party.

Mr. Bryan's action yesterday shows that thep rice paid by Mr. Wilson was far in excess of what he received. Mr. Bryan has been an agitator, a mischief maker, a dangerous counselor and a millstone about the neck of the nation for nearly twenty years. This final act reveals the fanatic and the demagogue so unmistakably that even the blindest can see him as he is. There never will be any excuse again for placing him in a position of responsibility on the plea that "he means well."

The effect of the resignation, so far as the United States is concerned, will be to give the President the united support of all loyal and patriotic citizens, regardless of party. The unfortunate feature lies in its possible effect abroad. Mr. Bryan has made it sufficiently clear that the President intends to maintain a firm attitude towards Germany. In taking this position the President is voicing the sentiment of the country.

But Mr. Bryan's course may lead the imperial government of Germany to believe that it could safely defy the President because the nation would not sustain him in a crisis. If pending negotiations with Germany fail, Bryan cannot escape the infamy of being the responsible party. Viewed from any other standpoint his departure from the Cabinet is a fortunate release for the President and the nation from a situation that has been all but intolerable from the start.—Rochester Chronicle and Democrat.

TRADE CAMPAIGNS

The trade at home campaigns that are being instituted throughout the country are not devoid of common-sense measures. However, to trade at home is not sufficient, but each individual interested in the prosperity of that community should lend a hand in encouraging trade at home habits. Both by practicing and preaching can the movement become a success.

Not alone with the individual shopper does the responsibility lie. Let the merchants get into the game also. Sometimes merchants themselves are guilty of not shopping on home territory; sometimes they urge trading at home through mediums not distinctly of home product. If the home product is not worthy of the hire in one instance why should it in the second? What is sauce for the goose is sauce for the gander. How can an intelligent, thinking public do otherwise than smile in the face of empty, selfish pratings no matter from what source they emanate.

The whole truth of the matter lies in the expression that if we want a bigger, better and more prosperous Fulton we've got to work for it—not in words but in deeds. It is as much up to the merchants as it is to the individual shopper.

Throughout the city are many women who give unofficial information as to why they do not shop at home. It is not fair to the merchant to be in the dark in regard to the real facts. He should know the facts, and then work to eradicate the difficulty.

If a card containing a return stamp were sent each housekeeper in the city asking the plain question, "Do you shop in Fulton, if not why not?" It is plainly evident that a lot of interesting facts would be collected. The merchants' attitude reflects upon the community at large. The attitude of the individual reflects upon the merchant and his success.

If we believe in "trade at home" let us reflect it, if not, then let "dog eat dog," but let us be frank about it.

Honesty is the best policy.

KNOTHOLE KIDS

A wealthy owner of a big ball park recently issued an order not to plug up the knotholes. How well I remember the days when we poor kids held those outside season passes, and how well I remember my individual knothole in the old high ball fence!

After the game was over, I would stick that well-fitting knot back in that hole and conceal my special advantage from the rest of the boys.

But even at that a knothole was personal property, and my title to it was better than a deed of record. Why, I can see my initials now over that knothole. It was the biggest piece of personal property I ever owned—that knothole.

When big men remember the knothole boys the country is safe.
—Silent Partner.

LINDSEY FACES JAIL FOR BOY CONFIDANT

Denver, June 9.—Judge Ben B. Lindsey defied the district court and district attorney today, saying he would go to jail rather than reveal what Neal Wright told in confidence of the murder of his father. His mother, Bertha Wright, is charged with the crime.

The judge has been subpoenaed as a witness by the prosecution, with a view of impeaching the testimony of the twelve-year-old boy that he, and not his mother, killed Wright.

Judge Lindsey declared that he would not reveal the conversation he had with the boy, on the ground that Neal had come to him as a chancellor and such information as he had given was of the highest privilege. He could not betray a confidence of that nature, he said, and rather than do so he would go to jail for contempt of court.

The conversation between Neal Wright and Judge Lindsey too place on the afternoon of May 15, two days after the boy had confessed that he had snatched the revolver from his mother's hand and killed his father.

A Prayer For Light

Lord God of peace and war,
Thy presence we implore!
Descend from heights afar
And lead us as of yore!

The nations stagger, blind
And perishing in night.
O, let us once more find
The long delaying light!

Deal gently with our sin,
Deal gently with our grief.
Thou who has shut us in
This place of unbelief.

Thou who has spread a veil
Before our mortal eyes,
So that earth's noblest fail
Thy way to recognize!

Thy pity we invoke
Upon our darkness here.
O lift the battle smoke
And let thy light appear!
—M. E. Buhler.

KAISER, AS PATRIOT, IS MORE LOVED THAN EVER.

Emperor Has Added to His Popularity at Home, Observer Finds.

The "neutral observer" of the London Times in Germany writes that he has noticed a subtle change in the position of Kaiser Wilhelm in the estimation of the German people. He has fallen into the background when compared with Von Hindenburg, Von Mackensen or Von Weddigen, but at the same time he was never so popular before.

"Nobody makes the kaiser responsible for the war," the correspondent writes. "Everybody believes he tried to prevent it and that when it was brought on by the determination of foes the kaiser shouldered the heavy burden with the deepest sorrow.

"He sacrificed all his personal interests for the sake of the country. He willingly accepted a subordinate position to give free play to men able to command a victory.

"He is regarded as having set an example of simple living and is said to have shown the utmost regard for the susceptibilities of the federal sovereigns and their people. He has thus gained a great hold on the affections of the Bavarians and Saxons.

"He is represented as having waived every consideration that might have militated against practical efficiency in waging war. This has greatly added to the love his own people have for him.

"The crown prince, on the other hand, is in a very different position. He was hailed at first as a great leader, but he has gradually faded out of sight and is scarcely ever mentioned. The kaiser's other sons have also ceased to enjoy prominent publicity."

GIRL PREACHER WINS FAME.

Child Who "Died and Came Back" Seems Suddenly Inspired.

Mary McCain, thirteen, of Longview, Miss., a girl evangelist, is leaping into fame all over the south as the child preacher who "died, went to heaven and came back."

Physicians shake their heads when told that Mary died and came back, but her parents are emphatic that Mary was dead. She had no pulse, her heart was not beating, and her body was cold and rigid, they declare.

The following morning, when her body was to be embalmed, Mary McCain came "back to life" when her grief stricken parents entered the room.

The remarkable thing about the young missioner is that Mary had never been to Sunday school, never saw a Bible and seldom heard the name of God except in a curse.

MAIN POINTS IN DECISION THAT STEEL COMPANY IS NO TRUST.

In the suit brought by the government against the United States Steel corporation the federal court decided that:

The corporation had not violated the Sherman law.

It deserved the commendation of the public for fair dealing.

Mere bigness of business does not constitute a trust.

The famous Gary dinners were unlawful, but had been discontinued.

President Roosevelt was justified in refusing to interfere with the absorption of the Tennessee Coal and Iron company, the absorption being legal.

Andrew Carnegie is exonerated from illegal participation in the sale of the Carnegie company.

In ten years the steel company had increased its business about 40 per cent, but nine great competing companies had increased from 63 to 3,700 per cent.

And the field of enterprise was as open to competition as before the corporation was formed.

Suit was filed Oct. 26, 1911.
Hearings began May 6, 1912.
Suit argued in October, 1914.
Case decided June 3, 1915.
Testimony filled 15,000 printed pages.

Government alleged that capitalization of $1,402,846,000 contained $800,000,000 of "water" and that plants acquired by the corporation controlled between 60 and 82 per cent of the country's total production.

Suit cost $500,000, of which about $400,000 was borne by the corporation.

SHOWS VALUE OF LIFE AND COST OF DISEASE.

Dr. A. L. Light, health officer of Dayton, O., has presented to the annual conference of the state board of health a schedule of the economic cost of preventable diseases and the loss of life due to them. Here is the table:

Value of life of baby at birth, $90; at ten years of age, $2,801; at fifteen, $4,236; at twenty-five, laboring men, $5,448; professional men, $25,806; at forty, professional men, $29,384; at seventy, laboring men, $70.

Average loss by each death due to preventable disease, $3,000. Cost of each case of preventable disease: Measles, mumps, etc., $10; diphtheria, $30; scarlet fever, $50; smallpox, $60; typhoid fever, $200; tuberculosis, $8,000.

BUSINESS IMPROVING, OFFICIAL FIGURES SAY.

Railroads Earn More Than Year Ago. Treasury Balance Expands.

With the decision of the federal court that the United States Steel corporation is not a trust it is confidently expected that business will now quickly take big leaps.

That conditions are greatly improved is emphasized by a statement by Comptroller of the Currency Williams showing that on May 31 the Aldrich-Vreeland emergency currency still outstanding aggregated only $2,508,940 out of the $383,502,645 originally issued. This outstanding currency is held largely by banks in the cotton states.

A report by the interstate commerce commission shows that the net revenues of the great railroads for April were $33,821,308 as against $30,322,791 for April, 1914. The gross revenues were $2,000,000 less, but the operative expenses were $6,000,000 less.

Secretary McAdoo and other officials of the treasury department are confident that the turning point has come in national finances and that by July 15 there will be in the general treasury fund a working balance of at least $160,000,000.

KAISER HAS PLENTY OF MEN.

But Losses Are Seven a Minute and Flower of Youth Is Gone.

Colonel Repington, the military expert of the London Times, discussing the new German army, says:

"The classes of 1915 and 1916 and part of the ersatz and landsturm will soon be supplying the Germans with their usual quota of good men, and it would be a fallacy to suppose that the German operations will be any more hampered this present year by a lack of men than by a lack of munitions and food.

"The Germans do not lack the means to continue the campaign vigorously. Nevertheless it must not be forgotten that the German casualties have been ten times those of the British, and the strain of fighting simultaneously on two fronts has been immense.

"No nation can go on losing seven men a minute day and night. The original German army disappeared long ago. Their supply of men is not exhausted, but to a large extent the flower of the German youth has withered."

THANKS FOR AID TO RYNDAM.

Holland-American Line Praises Naval Men For Brilliant Seamanship.

Secretary Daniels has received a letter from the Holland-American line expressing the company's appreciation and gratitude for the aid given by the battleships Texas and South Carolina to the steamship Ryndam when she was injured in collision off Nantucket May 26.

The South Carolina took on board the passengers and crow of the Ryndam, totaling 230 persons. Among the passengers were thirty-two women and ten children, including four babies. The accident occurred at 3:40 a. m., and all the passengers and crew were transferred to the South Carolina by 4:30. The Texas convoyed the Ryndam to the Ambrose lightship.

The letter remarks on the efficient work done by the officers and crew of the naval vessels and the hospitality shown the passengers and crew of the stricken ship and states that it will always be remembered as a brilliant example of good seamanship and splendid comradeship.

WAR NO BAR TO RED TAPE.

French Surgeon Checked In Work by Lack of Printed Forms.

One of the best known doctors, who is directing a French military hospital, recently had need of a certain surgical instrument. He wrote to the authorities for it.

"Make your request on a printed form," came the answer. The doctor replied that he had no printed forms. Second reply from the administration, "Make a demand for printed forms." The doctor again wrote and received a third reply, "Make your demand on a printed form."

WAR CUTS DOWN BIRTH RATE.

Paris Has 2,040 Fewer Babies In Month, Statistics Show.

Births in France are beginning to show the effects of the war.

According to the statistics for Paris there were 1,850 births in May, the [illegible] of the war, as compared with 3,890 in the [illegible].

MT. PLEASANT

The annual Children's day exercises will be held Sunday, June 13th, at 11 o'clock.

Mrs. Mable Graves Palmer of Hannibal has been the guest of her parents, Mr. and Mrs. Granville Graves.

Margaret and Arline Pratt of Fulton were recent guests of their aunt, Mrs. Byron Distin.

Ross Rowlee resumed his studies at Fulton High school after his narrow escape.

Mr. and Mrs. Julius Kelson and son of Pulaski, were recent callers at Harley Simon's.

Miss Alice Whittemore is spending a few weeks with her parents in Syracuse.

Elbert Frost and family visited his brother's family in Granby recently.

Miss Hazel Cooper of Granby is spending the week with Miss Mable Grant.

Miss Mildred Cole of West Fulton enjoyed a few days' vacation last week with her parents.

Mr. and Mrs. Mills of Rose Hill, notored to Albert Paddock's on Sunday and took Miss Lottie Powell back with them. Mr. Mills is her employer.

Mr. and Mrs. Glen white visited her cousin, Violet, at New Haven over the week end.

DRAMA ON WANE

Edwin Arden Blames Directors For Decadence of Stage Art

NOT ENOUGH ORIGINALITY

Actors Become Mere Puppets and Managers Pull Strings, View of Noted Player—Pessimistic As To Future.

Edwin Arden, the famous actor now starring in pictures with Pathe, has some interesting things to say about the decline of modern dramatic art, and lays the blame upon the stage directors.

"I would infinitely prefer to be a poor original than a good copy," he says with emphasis, "and now after many battles with directors who wanted to do my thinking for me and make me imitate some one else, I am left alone to play my parts in the way I conceive they should be played. I had a lesson early in my theatrical life upon this very question, and it made a lasting impression upon me, coming as it did from the great Edwin Booth himself. At the time of which I speak I was a member of Mr. Booth's company, playing Shakespeare in the old Boston Museum, that great school of

Edwin Arden.

the best dramatic art. One day I was to play a part in Othello and went to Mr. Booth asking him how he wanted me to play Cassio, and if he had any ideas for my instruction. 'No, I have not,' said Mr. Booth very gently, 'but the part must be played well or tomorrow some one else will play it.'"

Mr. Arden, considerably disturbed but put upon his mettle, went home and studied the part as he had never studied before. He analyzed it until he had gotten a clear conception of Cassio's character, of every emotion of which he was capable. He played the part and in a way to meet Mr. Booth's approval, and then and there became convinced that to play a part properly one must take no second-hand knowledge, but really think and live the character.

Not long afterwards the young actor was out of an engagement, and starving in a hall bedroom in New York. He denied himself food in order to keep his clothing presentable, and thus make it easier to place himself. Finally he was offered a small part with the Madison Square Company, at that time the most prominent of all the New York companies. He was given his part, studied it carefully, and then went to the rehearsal. After he had played the character as he conceived it, the director yelled at him. "Here, you," he said, "I won't have you play it that way. Do this and this and this," and showed him what he meant. Young Arden replied "do I understand you to say that you want to do my thinking for me, and that you leave me no option as to how I shall play my role?" The director replied that that was correct, and that he was paid to do the thinking, and the actors were merely to carry out his ideas. "Then you want another man for this part," said young Arden, "I refuse to be a parrot," and he left the stage and the job which meant so much to him. As he was leaving the theatre a man sitting in the darkness in the back of the house stopped him and asked him where he had played before. Mr. Arden told him with Thomas M. Kean and Edwin Booth. His questioner then told him to go back on the stage and play his role his own way, and informed him he was Mr. F————, one of the owners of the company. From that day to this Mr. Arden has always insisted upon a free hand where it came to his own work.

Mr. Arden is frankly pessimistic as regards the future of the American stage under present conditions. He says that since directors do not want originality and initiative in the actors these qualities are becoming atrophied. When the few real stars of the stage are gone there will be none to take their places, for the newer generation, with few exceptions, has not been permitted to develop its own talent.

A MUVIE DRAMA

Rise of Donald Mackenzie Reads Like Film Play

BORN AND BRED IN SCOTLAND

Poor Boy of the Highlands Now Famed as Screen Director—Many Successes in America for "Gillie" of Seventeen Years Age.

Some sixteen or seventeen years ago, in one of those sections of the Scottish Highlands so remote that Gaelic is still spoken and the old men still tell legends their fathers told them of "Prince Charlie," an English nobleman leased several thousand acres of land for the shooting.

Arriving at the tiny village on the property which he had leased he sought information as to the best man available for him to hire to accompany him on his shooting trips. The answer he received was the same from each man he asked—"Donald Mackenzie is a guid mon." The Englishman sought out the popular favorite and found a square jawed, square set young fellow of some seventeen or eighteen yars old, who vowed with quiet confidence that he could give satisfaction. That was the parting of the ways for the Scotch boy. Sprung from godly parents who had taught him the best they knew how with the few books at their command he knew as well as they that the ambitions which controlled him could find no attractive goal in his native village—that neither wealth nor fame lay for him among the frowning mountains, along the flashing streams or where the heather empurpled the upland pastures. The Englishman took a great interest in the lad. The long days of close companionship on lonely moors brought them together in a way unusual between employer and employee, and when the season ended, the young man bade farewell to home and parents, turned his back upon the foggy mountains and accompanied the nobleman to London.

There the education of the Scotch boy went on apace. Treated as a friend by his patron he enjoyed all the advantages that good society could give. It was found that he had a splendid bass voice, and he was much in demand at private musicales. One day a prominent theatrical man heard him and offered him an operatic engagement at Daly's Theatre in London to play the part of Lord Enchester in "The Country Girl." He accepted and made good in the role, and so was secured by the late Augustin Daly to play the same part in the United States.

Engagements with Lulu Glaser in "Dolly Varden," the W. T. Carleton Opera Company, "The Mayor of Tokio," and "The Time, the Place and the Girl" followed. Mr. Mackenzie tells with gusto how he got his first big chance. He made it a rule to understudy every big part to which he was suited, and one night he was playing in "When Johnny Came Marching Home," when W. T. Carleton, who was playing the general, became seized with heart failure in the biggest scene of all, staggered to the wings and then fell. Quick as a flash our Scotchman shot out of the front, took up the part where it had been left off, and to the amazement of the company finished the act in that part without making a single error. At the close of the act, while the doctors were attending to Mr. Carleton, Mr. Mackenzie changed to the sick man's costume and finished the performance as the general.

The next day Mr. Carleton showed his gratitude by raising Mr. Mackenzie's salary and giving him the part. A friendship sprang up between the two which has endured through the years and which was shown by Mr. Mackenzie giving to Mr. Carleton the part of the governor in his fine picture, "The Pardon."

Mr. Mackenzie has been associated with Pathe for over three years as actor and producer. In the "Perils of Pauline" he not only appeared in several episodes as "the pirate" (a part which made a big hit), but he directed the production of many of the episodes himself. Today he is reputed to be making big money by producing pictures which are released through Pathe. His most recent production the fine three-part Pathe drama, "The Pardon," has received flattering reviews and has been booked by the Loew theatres for fifty days solid.

NOVELS TO BE FILMED

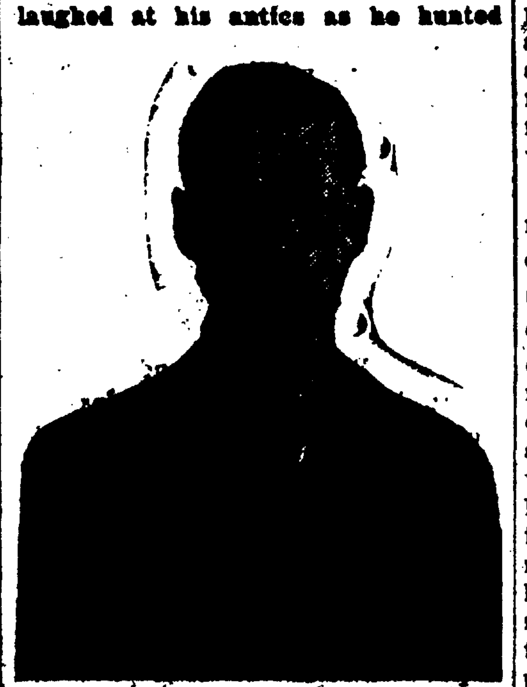
William J. Locke's "The Beloved Vagabond," and Richard Harding Davis' "The Galloper," are to be picturized by Pathe.

"The Beloved Vagabond" is one of Locke's most successful novels and was presented on the London stage by Mr. Beerbohm Tree, England's most famous actor.

"The Galloper" was played by Raymond Hitchcock for a number of seasons, and was then made into a musical comedy. It is a highly amusing farce detailing the adventures of a young millionaire who finds himself compelled to take upon his shoulders the identity of a muchly married war correspondent, Kirke Warren. The story has a Graeco-Turkish atmosphere, and the millionaire while dodging bomb shells and divorced wives goes through many uproarious situations.

Interesting Description of Tedious Process—Thousands of Drawings Required for One Film—Latest Idea in World of Motion Photography Explained, in Interview, by Originator J. R. Bray

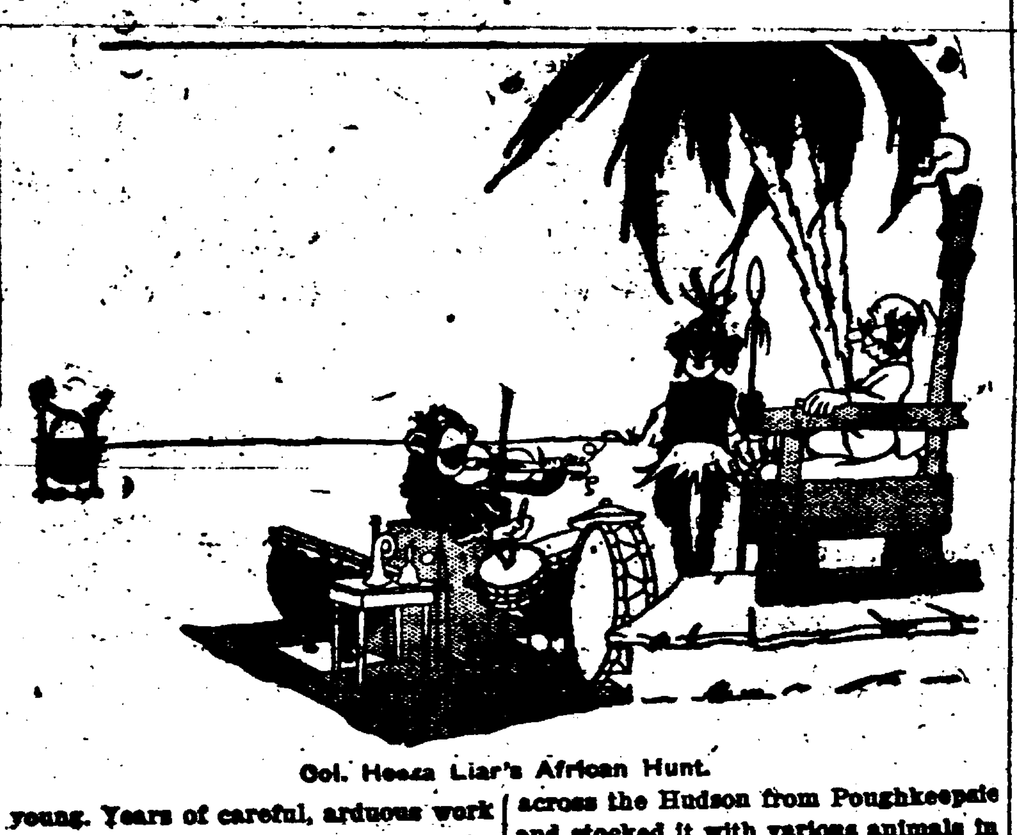
Mention the name "Colonel Heeza Liar" to almost anyone and you'll see his or her face light up and a smile spread all over it. Who doesn't know the funny little Colonel—who hasn't laughed at his antics as he hunted



J. R. Bray, Film Cartoonist.

wild beasts in Central Africa, outwitted cannibals on the River of Doubt, cultivated his farm with the aid of some strange assistants, and hunted ghosts in Castle Clare? The Colonel's friends are legion—probably no films made have as large a following young and old alike as these, and speculation has been wide as to how these pictures are made—what gives the drawings those life-like motions, and who is the genius who creates them.

J. R. Bray is the originator and creator of these drawings, and he was the first to put motion into the drawing itself. That there is no royal road to success is again proven by the fact that Mr. Bray started his experiments over seven years ago, and that was when motion pictures were still very



Col. Heeza Liar's African Hunt.

young. Years of careful, arduous work were necessary before the results satisfied him. Today he is the head of an organization devoted to making his pictures, has a corps of artists working under his supervision and has patents on his process which cover the use of transparent material or

Topical Cartoon from Pathe News.

material made transparent by any agency whatever in the making of animated drawings.

Mr. Bray was found in his sunny New York studio engaged in conducting Heeza Liar through another series of escapes. Tall, slender and blond, he looks more like a successful business man than an artist. Mr. Bray readily consented to talk about his work.

"The public," he said, "demands drawn illustrations which reveal the personality of the artist. The newspapers and magazines all prove that. It is easily seen that to illustrate fiction, for instance, a photograph rarely can be well used. The artist's drawing, on the other hand, can be idealised to fit the situation. This value of the illustration was recognized in everything but motion pictures, and now there too it has found its place. It is well to remember that an artist can draw that which is a physical impossibility for an actor to enact before a camera. The artist's possibilities are unlimited. The opportunity for real humor may be seen when one reflects that the humorous is almost invariably the unusual.

"Very few artists have the ability to make drawings that move. An extraordinary imagination is absolutely essential, as is also a perfect knowledge of the science of motion. Problems come to the artist in this work that never arise in ordinary art. I have employed some very able artists to assist me in this work, and find that very few of them can get the knack. For instance, one of the hardest things in the world to handle in these animated drawings is perspective. To have a figure come from the far horizon straight toward the observer—to have it grow from a dot to the proper size and preserve the 'balance'—makes an almost insurmountable problem. I think I am correct in saying that not one artist in a thousand can put motion into drawings."

Few people would have the patience to do Mr. Bray's work. It takes between four and five thousand drawings to make 1,000 feet or one reel of film. In addition to the colossal toil of the art work it takes a week to photograph the drawings one at a time. Great speed united with unvarying accuracy is essential. Every stroke of the pen must count. Mr. Bray works so fast that he is able to keep four trained artists "inking in" the outline drawings which he makes. The necessity for accuracy is evident when it is learned that the drawings are magnified on the screen at least 35 times.

Mr. Bray spent years in study before he attempted to make an animated cartoon film. For months he haunted the Bronx Zoo in order to study the animals there and analyze their motions. He even bought a large farm across the Hudson from Poughkeepsie and stocked it with various animals in order to further extend his knowledge of animal anatomy. The result of these studies finds expression in the life-like motions of the various animals which move across his films.

He was born in Detroit, Michigan, and has lived in New York since 1901. He was for seven years a newspaper artist, being also a steady contributor to the humorous weeklies, such as "Life," "Puck," and "Judge." He took his ideas to Pathe Freres over three years ago, since he felt that such a house, with its many foreign branches, could give him a larger international circulation than any other. The Pathe officials at once saw the value of his work, and from that day to this he has dealt only with Pathe. Millions of persons have laughed and are laughing at the "Heeza Liar" and "Police Dog" series, and his political cartoons in the Pathe News, the motion picture weekly, have attracted widespread newspaper comment. Mr. Bray has truly originated a new school of art.

SHOT AT FRONT

Intrepid Movie Photographer Hurt Taking War Pictures

PRESENT AT PRZEMYSL SIEGE

Shrapnel Hits Photo Man With Besieging Troops—Petrograd Grants Him Russian Decoration for Bravery.

It's a long, long way from New York to the place with the unforgettable, unpronounceable name, Przemysl, but it seems less when one sees certain very fine pictures of the siege in the Pathe News pictures and learns that the special correspondent, Ercole, who took them, has been wounded and decorated for bravery under trying conditions.

When it was learned that Przemysl was destined to become famous in spite of its name, the Pathe News sent its special war correspondent in Russia, Mr. Ercole, straight to the Galician front to the Russian army besieging the city. He was sent there to get pictures, and he did so. While he was turning his camera he was hit by a piece of shrapnel and painfully wounded, but he did not cease to turn and in consequence has been decorated by the Imperial Government of Russia with the Cross of the Order of St. George.

His films were rushed by way of the Pathe Agencies in Moscow, Stockholm and London to the United States, so on the very day the newsboys were using their 57 different ways of pronouncing Przemysl to tell the public that the Austrian fortress had fallen, all over the United States people were seeing in the "News" one of the big scoops of the year.

Mr. Ercole is not resting on his laurels. He has been sent to another place where important things are going to happen, and in consequence expects shortly to put over another big scoop.

PEARL WHITE, FAVORITE

"World's Champion Movie Fan" Calls Pretty Star Best.

Mrs. Barbara Guentert of St. Louis is called by the "Post Dispatch" of that city, "the world's champion movie fan," and with good reason. It seems that Mrs. Guentert has missed only two evenings in over five years in seeing the picture show at the Fairy Theatre on Easton Avenue.

Every night Mrs. Guentert and her little son are to be found in the same seats watching the pictures with as much interest as though it was their first experience. Together

Pearl White.

they have spent 1,800 evenings at the theatre, have paid $180 in admissions, and have seen 9,000 different films.

Mrs. Guentert, it may be seen, can certainly lay claim to being a picture expert. When asked to name the players she thought the best, she mentioned only four, all of them famous, one of them being Pearl White, the Pathe star.

SPLENDID STUDIO SITE

Secures Extensive Property at Ithaca, N. Y., for Filming of Dramas.

The Pathe producers, Wharton, Inc., have leased with option of purchase, Renwick Park, a well-known lakeside resort at Ithaca, N. Y. The property has been used as an amusement resort for some years and comprises 46 acres of land situated at the head of beautiful Cayuga Lake and lying between the lake and the city. A city trolley line runs into the park and furnishes excellent service.

A number of large buildings such as auditoriums, pavilions, etc., on the place needed only a little remodelling to make them very well adapted to picture work. There are frontier settlement streets, log cabins,—all the locations necessary to western work, as well as a splendid 400 foot pier extending into the lake.

Equally beautiful locations would be difficult to find anywhere in the East.

A PICTURE STAR

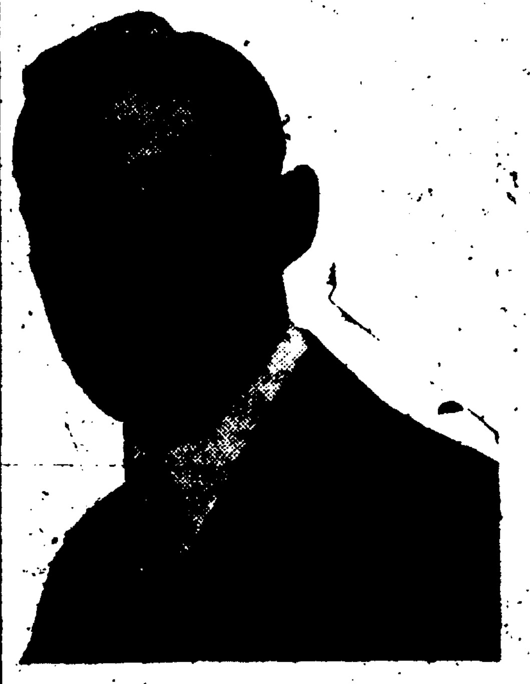
Lionel, Brother of John and Ethel, Featured on Screen.

STUDIED PAINTING ABROAD

Now Finds That Making Pictures is More Profitable Than Painting Them—Added to "Romance of Elaine" Star Company.

Lionel Barrymore, nephew of John Drew and celebrated brother of the famous John and Ethel Barrymore, will be featured in motion pictures this summer.

This is not Mr. Barrymore's first appearance on the screen—he has had important parts in several big productions, but it is with the legitimate stage that his name has been most associated. He was broken into the profession by his uncle, John Drew, with whom he played for a number



Lionel Barrymore

of years. Among the famous plays with which he was identified were "The Mummy and the Humming Bird", "The Other Girl", Barrie's play "Pantaloon", "The Best of Friends", and "Sag Harbor", with James A. Hearne. After playing in "The Other Girl", Mr. Barrymore fulfilled youthful aspirations by going to Paris to study painting, an occupation so fascinating that it held him in France for three years. Mr. Barrymore says that when he returned to America he found his fellow artists in the cast of "The Other Girl" all famous—Richard Bennett, Wally Eddinger, Doris Kean, and Tully Marshall, which caused him to think hard upon the old saw about the cobbler sticking to his last. Then he decided there was more money in acting in pictures than in painting them and worked in a number of feature productions.

Mr. Barrymore owns a fine summer home at Rocky Point, Long Island, but says that he has been trying in vain for years to get acquainted with it. No sooner does he start to leave town than he is offered a fat engagement which no same man could refuse.

History repeated itself with him this year since on the eve of his departure for Rocky Point he was offered an engagement with Pathe to play the "heavy" in "The Romance of Elaine", a well known serial photoplay. The fact that his work would take him to Ithaca, N. Y., where his lines would be cast in pleasant places, reconciles Mr. Barrymore to another summer's exile from the mansion he cannot use.

U. S. REGULARS IN BIG FEATURE

Mackenzie Uses Cavalry in Stirring Scenes.

Donald Mackenzie, the Pathe producer, has just finished making a four-reel feature called "The Fortunes of Peter," which has all the earmarks of a notable success. Mr. Mackenzie had a cast of well-known players, most of whom have already achieved fame on the screen.

George Probert, who won golden opinions as Oskar Von Guggen in "Innocent" and the Cadet in "The Lure," has the lead and this picture marks his debut before the camera. Mr. Probert confesses that his first two days of picture acting were little less than torture to him. The sight of the lens staring at him all the time was infinitely more dreadful than the batteries of critical eyes on a big "opening night."

Paul Panzer, after weeks of successful vaudeville touring, returns to the screen again in this picture. Mr. Panzer, it will be remembered, made himself the best-hated villain in the country through his work as "Owen" in "The Perils of Pauline."

Other members of the cast are Miss Alma Martin, a popular favorite in the "legitimate," Sam Ryan, who has been in many Pathe pictures, and Charles Bunnell, who was with the Pathe St. Augustine Company in the winter of 1913-14.

The picture required hundreds of supers and Mr. Mackenzie made arrangements for a troop of cavalry, regulars of the United States Army, to appear in a number of stirring scenes.

George Bronson Seitz wrote the scenario.

ENTERTAINMENT GIVEN IN MISS DARLING'S HONOR

A pleasant occasion was enjoyed at the rooms of the Daughters of Liberty last evening. Following the regular business session a reception was given by Mr. and Mrs. Fred Quonce in honor of their sister, Miss Nellie Darling, who is soon to leave the city.

A feature of the entertainment was a mock wedding staged by the members of the lodge and followed by an elaborate supper.

A variety shower was also a feature, all bespeaking the high esteem in which Miss Darling is held.

HEIRS WANTED

A. E. Ludington Who Is Dead Left Children and They Are Wanted

Several weeks ago this newspaper first published the information that Sid M. van Wyck, San Francisco attorney, desired to learn of the whereabouts of certain Ludington heirs. The Evening Times gave its space to assist the lawyer, and results of a surprising order reached the western man.

Notwithstanding the number of heirs who have appeared in line for a share in the estate of a niece of Moses E. Ludington, there remains to be found the heirs of Austin E. Ludington.

If readers of this newspaper have knowledge of the persons who are indicated in Mr. Van Wyck's letter as Ludington heirs will communicate with Sid M. van Wyck, jr., 519 California st., San Francisco, Cal., they will perhaps save time for themselves and for those who are to be directly benefited.

Mr. van Wyck's latest letter to The Evening Times follows:

Fulton Evening Times,

Gentlemen:—Much obliged to you for sending me the letters from Mrs. Ida A. Foster Irwin, of Battle Creek, Michigan; Mrs. Louisa M. Calkins, of Washington, D.C., and Mrs. Clarinda E. Iden of North Scituate, Rhode Island. These three ladies are grandchildren of Moses E. Ludington. Each of them has also written directly to me.

However, the letter written to you by Mrs. Calkins contained a very important item, none of the other descendants of Moses Ludington have mentioned. This was that Austin E. Ludington, the only son of Moses Ludington, died in the spring of 1914.

As I have written you the estate in question is that of a niece of Moses Ludington and her heirs, under California law, are her first cousins surviving at the time of her death. These first cousins excluded second cousins.

It now appears from the letter written to you by Mrs. Calkins that the late Austin E. Ludington died a few months after his cousin whose estate I am settling. The rights of Austin E. Ludington vested at the death of his cousin and could not be destroyed by his own subsequent death but would pass to his children. It, therefore, appears that Austin E. Ludington is one of the heirs.

Through the publicity given by your paper, I have also learned of four other first cousins, being the children of Philip C. Ludington, a brother of the late Moses Ludington. I am now endeavoring to locate the children of the late Austin E. Ludington and to verify the date of his death. If it took place after January 22, 1914, then he is an heir as his cousin died on that date.

I have no doubt that I shall soon have the names and addresses of the immediate family of Austin E. Ludington since I am in correspondence now through your paper with a number of his nieces and nephews.

Thanking you for your many courtesies and confessing my surprise at the widespread publicity which has resulted from the articles which you have published,

Very truly yours,
Sidney M. van Wyck, Jr.

SAILS AWAY

Will Carry Two Years' Supplies In Hold for Baffin Bay Regions

With two years' supplies in her hold—to be used in the event of an early winter up in Baffin Bay—the schooner Cluett, owned by the Grenfell Mission, slipped out of the harbor early this morning bound for Labrador. Some of the cargo is consigned to the mission, to which the vessel was presented in 1911, after it was built by George B. Cluett, of Troy, but the bulk of it will be consumed by members of the Donald B. MacMillan expedition sent out by the American Museum of Natural History to find Admiral Peary's Crocker Land.

Captain Pickels, commander of the Cluett, had his vessel all shipshape recently. Whether he would be able to bring the members of the exploring party out of the North before ice sealed the water he was unable to say. He would do his best. That was his only statement.

The Cluett, after discharging the mission's stores, will head North along the Labrador coast, and pass through the Davis Straits to Melville bay, on the shore of which, at Etah, the base of the Crocked Land Expedition, is established. Dr. E. O. Hovey, of the museum, will go to Labrador in the summer, and board the Cluett on her northward voyage. If MacMillan is at Eath when he arrives, and it is thought best to abandon the expedition, the staunch little schooner will turn about and rely upon her white oak hull and her 80-horsepower engines to crash thru the skim ice before it grips the ship firmly.

"You can't fetch stuff from a grocery around the corner up there," Captain Pickels said, commenting upon the supply of foodstuffs that were loaded on the Cluett. Three hundred pounds of coffee, 100 pounds of tea, onions, potatoes and a big quantity of lime juice to ward off scurvy during the winter, 300 pounds of rolled oats and nearly 100 gallons of molasses were some of the items on the manifest. In addition, the vessel carried a capacity cargo of coal and a large stock of medicines. The total value of the relief stores is in the neighborhood of $15,000.

The total cost of the trip will be about $25,000. To meet it a subscription is being taken by the American Museum of Natural History, but to date little more than $5,000 has been received.

The Cluett is a three-masted schooner, measuring 142 feet in length and of twenty-six beam. Every foot of timber in the outer shell of her is of white oak, measuring from eight inches in thickness on the sides to two feet at the bows, where an iron sheathing affords protection from the ice. Behind the first shell is another foot of timber, which is braced inside the ship with a second layer of white oak, six inches in thickness, reinforced with drift bolts.

Her engines, for use in an emergency, give her great freedom in the ice-packed waters. Along the Labrador coast, the Cluett is known as one of the finest sailing ships that ever worked in the north. The principal achievement of Captain Pickels was a circuit of Hudson Bay, in the summer of 1914, when the schooner was chartered by the Carnegie Institution for magnetic survey.

RAISED A FAMILY AND GOT HER A. B.

Philadelphia, June 9.—Among those who will get their degrees from Swarthmore College at its annual commencement next week is Mrs. Rebecca Webb Holmes, wife of Dr. Jesse H. Holmes, professor of the History of Religion and Philosophy.

Mrs. Holmes entered Swarthmore in the fall of 1885, and attended the college until her junior year, when illness forced her to leave. Later she met and married Dr. Holmes, who has been professor at Swarthmore for 15 years.

Mrs. Holmes, who has two sons, a few years ago decided that she would like to complete her studies at the college. So besides her household duties she found time to spend ten hours each week in classes. She finished her work this spring, and on June 16 will be graduated, twenty-seven years after her own class left the college.

LAWYER CAHILL PLEADS GUILTY

Charged With Grand Larceny in Second Degree—Asks for Suspended Sentence

Pulaski, June 10.—Attorney Frederick T. Cahill of Oswego pleaded guilty to a charge of grand larceny in the second degree before Judge H. D. Coville in Country Court here yesterday. The plea was made in the indictment charging Mr. Cahill with having misappropriated $300 given him by Mrs. Lizzie Boudiette, a client, to pay a fine imposed on her in County Court. This plea of guilty automatically disbars Mr. Cahill from the practice of law. Sentence was deferred until Monday next.

A number of attorneys appeared in court and recommended clemency for Mr. Cahill, stating that the disbarment from pratice, coupled with restitution of the amount involved, would be sufficient punishment for the offense. A suspended sentence was suggested as best under the circumstances.

Those who spoke in the above vein and urged clemency for Mr. Cahill were D. P. Morehouse, Judge C. I. Miller, Harry C. Mizen, Spencer Grownell, Francis E. Cullen and Clarence E. Pitts.

Nothing was said in court about the proposal to have Mr. Cahill examined as to his sanity and sent to the State Hospital at Ogdensburg for treatment. District Attorney Culkin, it was said, held that the only means by which the insantiy defense could be sustained would be by Mr. Cahill pleading not guilty on the ground of insanity. He would then be sentenced to the Matteawan State Hospital for the Criminal Insane.

Mr. Cahill had been indicted on five other charges, three of grand larceny, one of delaying a client's suit and one of robbery.

John Leydon was indicted for burglary, third degree, and grand larceny second degree; another indictment charged Leydon with burglary in the same degree and petit larceny. It was alleged that defendant with others broke into the railroad station of the New York Central Railroad Company at Phoenix in June of last year and since that time has managed to elude the authorities until a few days ago, when he was arrested and brought to Pulaski on Monday. He was arraigned with other prisoners and pleaded not guilty to the indictments. When Leydon was arraigned yesterday afternoon he withdrew his former pela and pleaded guilty to burglary and grand larceny. Judge Henry D. Coville thereupon sentenced him to serve three months in the Onondaga penitentiary.

OSBORNE ADMINISTRATION CRITICIZED BY COMMISSION

Dannemora, June 9.—Charges of graft and cruelty on the part of officials of Clinton prison, made by Alexander B. Fischer, of New York, a former convict, were dismissed by the state commission of prisons at the conclusion of its investigation tonight.

The commission recommended that some additional privileges be granted the inmates. These included more time for conversation, two quarts of water a day for prisoners in "collers" instead of two gills a day, elimination of handcuffs from the observation cells, more exercise in the open air and hot tea and coffee with Sunday night meals.

It also was the sense of the commission that the disciplinary methods obtaining in Sing Sing prison under the regime of Warden Osborne, be made more stringent. The liberties enjoyed by the prisoners there, the commissioners decided, tended to destroy to a certain extent, the discipline in the other state institutions. No formal findings concerning Sing Sing methods were reported.

WOMEN SIT IN SILENCE AS NATURALIZING IS DONE

New York, June 9.—Thirty women, dressed in collegiate cap and gown and yellow sashes, bearing the inscription "Votes for Women," appeared in the United States District Court, where Judge Hand was administering the oath of allegiance to newly naturalized citizens today, and watched the proceedings in purposed silence. Their action was announced as constituting a silent protest against being deprived of the rights of citizenship granted to foreigners of the male sex, but denied to both foreign and native born women. The delegation was led by Mrs. Catherine Ely Tiffany, president of the College Equal Suffrage League.

The proceedings were conducted by Judge Hand as if nothing unusual had occured.

OUR MOVIE INDUSTRY

Even the hundreds of thousands of motion-picture fans fail to realize the extent of the "movie" as an industry, remarks "The Buffalo News." According to the Federal Census Bureau 68,000 miles of film were manufactured for the United States at a cost of $37,000,000 in the last three months of 1914. There is nothing now that the motion picture does not reproduce for the amusement and enlightenment of its patrons. America could not well get along without the "movies."

BUYING METHODS

General Electric and Other Negotiations Based on Larger Amounts

New York, June 9.—While no definite news of any new ammunition orders was forthcoming in the financial district today there was continued talk of large foreign buying of both arms and ammunition. In relation to the reports of large orders received recently by the General Electric Company, it was learned from an authoritative source that this corporation has not as yet closed any very large contract.

It was stated, however, that important negotiations were under way which probably would come to a termination soon, and that these affected contracts aggregating close to $100,000,000. These will be solely for various forms of ammunition. An authority on the war order situation gave an explanation of conditions as he saw them.

Military experts, he said, have revised their opinions as to the quantities of ammunition that will be needed in the present war, and are now convinced that tremendous amounts will be required, as compared with the previous estimates. The latest estimates ran as high as 250,000 shells a week.

On account of this change in views, it had been decided that the purchase of such munitions of war should be made only from companies having very large plants, able to turn out ammunition in much greater quantities than were ever required before. The General Electric Company, it was added, has plants large enough to undertake the wholesale manufacture of munitions, and for this reason it was selected for the present negotiations.

This company, it was stated, will not do all of the work for which it contracts, but will operate in connection with other companies so the required amounts of ammunition may be provided within the time specified. The General Electric Company, according to this scheme, would be the center of a group working in co-operation.

At present, the company is operating between seventy-five and eighty per cent of the capacity of its plants. To make the additional ammunition required, a large amount of machinery will have to be installed, and when that work is done, it is expected the corporation's plants will be operated in full. Other companies participating in the work will have to install similar machinery to fill their contracts. If necessary, it was said, the General Electric Company will lease or purchase other plants to carry on the work.

In the talk of profits accruing to American concerns through the demand for war material, the Tennessee Copper Company today figured more largely than at any previous time. This was due to the news that it had closed a large contract with the Du Pont powder interests for various forms of acid needed in the manufacture of explosives.

The contract calls for large amounts of sulphuric acid, of which the Tennessee Sopper Company is one of the most important producers. In addition, the Tennessee company is negotiating another large contract for acid.

THE QUIRK

A special program has been prepared for the benefit of the Order of United American Mechanics which takes place today. "The Price He paid," produced from the peom by Ella Wheeler Wilcox, in five parts, is a master-picture, such as is seldom seen at the 5 and 10 cent price, so that with No. 5 of the "Who Pays" series, in three parts, entitled "Unto Herself Alone," an unusual program of quality is prepared for the enjoyment and approval of the people. Tomorrow "The Outcast," a Mutual masterpicture, in four parts, "O'Flannigan's Luck" and "The Butterfly," will constitute the program.

PENDERGAST, OF PHOENIX, DID PERFECT SCORING

Rochester, June 9.—In a heartbreaking race that put a vivid crimson daub on the opening-day program, Henry J. Pendergast, of Phoenix, N. Y., won the Interstate Trap-Shooting Association's Amateur State Championship at the beach traps yesterday afternoon. To do so, he not only had to survive the scheduled fire on 100 birds but had to succeed in the shoot-offs of triple and double ties.

After the monotonously recurring victories of Frank S. Wright, of Buffalo, the success of Pendergast, a newcomer to the New York Sportsman's Association shoot, struck a popular note. Pendergast is a man of the corpulency that Irvin Cobb describes as belonging to a man who, when he basks at the water's edge, boats mistake him for a dock and if he takes a sunbath on the beach and sunburns, there is so everlasting much of him to be sunburned that the practically amounts to a conflagration.

Pendergast will get something more definite than the title of interstate champion. Finishing first gives him a trip to Chicago in August to compete in the Grand American Handicap, which is the world's series of trapshooting, with all expenses paid; a gold medal and a purse of $25. His breaking of the double tie by demolishing twenty birds without a miss gave the spectators their deepest thrill of the day.

Each having broken 97 of their 100 targets, Pendergast, Floyd S. Kinney of Batavia, and Dr. W. N. Vanderhoff, of Watkins, faced a shoot-off for first place when the last gun had spat. A triple tie also obtained at 96, with F. Wright, of the Audabon Gun Club, of Buffalo; David Wadsworth of Auburn and W. F. Hopper of Batavia, owning interests in the place honors. There was nothing to choose between prizes, however, the leading seven receiving medals.

MALCONTENTS SHOULD JOIN REAL DRY PARTY

Cincinnati, O., June 9.—"Government reports on the increase of illicit distilling prove that prohibition neither prohibits or lessens the demand for liquor," said Samuel Wooner, jr., of Peoria, president of the National Wholesale Liquor Dealers' Association, in his address here today before the annual convention.

Congressman Jacob M. Meeker, of Missouri, said that members of the Democratic and Republican parties "who now are trying to foist prohibition on those parties should get into the prohibition party with all the other political malcontents who are trying to ride into public favor on this single issue."

NEW PROPOSAL

Justice Jenks' Sympathy for Poor Men Who Suffer Through Bad Attorneys

Albany, June 9.—Justice Almet Francis Jenks, of Brooklyn, presiding Justice of the Appellate Division, Second Department, advocated the creation of a "public defender" today before the Judiciary Committee of the Constitutional Convention.

"I believe there is a great deal in the idea of a public defender," said Judge Jenks. "I have seen so many poor, friendless, homeless wretches have their liberties put at stake thru some inefficient tyro being named to defend them that I feel very strongly some change should be made.

Justice Jenks also urged that the judges of the Appellate Division should be able, by unanimous vote, to modify criminal sentences. He said he had seen cases where he thought the punishment was cruel and severe, and that justices were likely to be swayed by popular clamor and love of approbation.

Opposed to Direct Primaries

In regard to direct primaries Justice Jenks declared emphatically that he did not believe they were desirable in any case where justices are concerned, but he opposed any appointive system as contrary to the ideals of American institutions and the sentiment of the people of the State.

The reapportionment fight, which promises to be one of the warmest of the convention, broke out on the floor today. In a report from the Legislative Organization Committee, of which Edgar T. Brackett is chairman, Robert F. Wagner, democratic leader of the Senate, thinking he saw a Republican move to forward reapportionment, objected.

"My suspicions are aroused about any re-apportionment with which the Senator from Saratoga has anything to do," he said. "This report is a way of clearing the road."

"The report has nothing to do with re-apportionment," Mr. Brackett responded. "I hope the Senator will apologize later for his remarks," and I think he will."

"In my long service with the Senator in the Senate I never said anything to him for which I had occasion to apologize," Mr. Wagner responded.

Favors Two House Form

The report favored the retention of the present two house form of the Legislature and the election of Assemblymen and Senators from districts only, as at present. The adoption of this report would kill the proposal to select Senators at large.

A minority report, signed by Messrs Aiken, Denison and Burnstein, favored a single house Legislature. Declaration was made that a single house would prove more economical and would expedite work.

President Wilson advised the convention by letter that owing to the foreign situation he would be unable to address the body. He had been invited to speak at his convenience.

DAUGHTERS OF POCAHONTAS ELECT STATE OFFICERS

At the state convention of the Daughters of Pocahontas today officers were elected as follows: Mrs. Anna Van Alstine, Amsterdam, great prophetess; Mrs. Mary L. Glover, Brooklyn, great Pocahontas; Mrs. Betrha Paul, Great Wenonah; Mrs. Alice Birdsell, Binghamton, great Minnehaha. Two hundred delegates attended the convention.

BIRTHDAY CELEBRATION

Frank Black's birthday was celebrated this past week at the home of his parents, corner of Fifth and Union sts. The invited guests assembled at four o'clock and, after listening to several selections were treated with a supper. Later a photograph of the assemblage was taken. In addition to several friends of Mrs. Peck who assisted her in entertaining the young people there were present the Misses Arlane Pratt, Catherine Francis, Edna Francis, Alice Francis, Elizabeth Pratt, Florence Theibeau, Catherine Duffy and the Messrs. Millard Francis Frank Francis, Leman Pratt, Leslie Fink, Kermith Fink, Kenneth Paget, Lloyd Yardley, Jesse Yardley, John Duffy and Glen Stiles.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, June 10.—Whether it is because the number of divorces has been growing alarmingly larger, or because the wrangling of husband and wife disturb the fine judicial attributes of judges of the Supreme Court, is not known, yet nevertheless for some reason not set forth in the proposed amendment, a proposition has been presented to the delegates to the Constitutional Convention which seeks to create a Domestic Relations Court in cities of the first class throughout the State.

The author of the proposed amendment to the Constitution, Delegate Floyd J. Adams of Brooklyn, believes that there should be at least one judge in each city, except New York city where there shall be four to hear and determine divorce and other cases where the husband and wife have failed to agree. The legislature, is given power to increase the number of domestic relations judges so that there shall be one for every three hundred thousand of population.

The proposed judges are to be appointed by the mayors of the several cities of the first class to serve ten years. Their compensation is to be fixed by the board of estimate and apportionment. They are to have jurisdiction in respect to all actions suits and proceedings for divorce, annulment of marriage, separation, the custody and control of children. They are also given sole jurisdiction in all proceedings for non-support and have power to award the custody and control of the children in such proceedings to their respective parents or relatives or institutions.

The provision relative to the appointment of the contemplated judges are somewhat strict. No person is eligible unless he shall have been admitted to practice as an attorney and counsellor-at-law of the Supreme Court of New York State at least ten years prior to the date of his appointment.

Although the fact may have not been the cause of the Adams proposition, it is known that in the cities of the first class there are numerous divorce actions yearly and the trial of civil and criminal cases have been retarded as the result. Cases on nonsupport have frequently found their way in to the police court, where they are regarded as being out of place. Under the proposed new order of the Domestic Relations Court will attend to all these matters.

It is possible that Reno may lose some of its attraction after the Domestic Relations Court is established, if it is established, and that instead of journeying across the country to obtain a divorce the husband or wife anxious to sever the connubial tie will hie to the local rendevous of separation.

The Adams resolution is another of the several propositions which aim to separate the duties of the courts of the State which at present consider all matters of litigation. A division wherein matters bearing upon real estate be exclusively considered is incorporated in a proposed amendment which has been before the delegates for a number of weeks.

Divorce statistics are not easily obtained, yet it is said that there is scarce a term of the Supreme Court in any county of importance which does not consider one or more actions to sever the bond of matrimony.

WOMEN TAUGHT EFFICIENCY

Value of Home Conveniences Demonstrated by Agents of Department of Agriculture — Data Show Amount Spent and Outline the Visible Results—Work Is Just Started.

Washington.—Secretary of Agriculture Houston is going to try to solve the problem of unrest among country women by improving their condition.

"The chief objections of women to country life," according to a statement issued by the department, "are usually the generally small returns from farming, the drudgery of farm work and the social isolation.

"Data taken from the records of the department and relating exclusively to work of this kind in the thirty-three northern and western states show the following distribution of funds: For meetings and movable schools, at which demonstrations are given in cooking, sewing, household conveniences and for the organization of women's clubs to study home economics, \$81,555; for canning clubs to teach girls and women how to prevent many of the wastes of the farm by canning and preserving fruits, vegetables and meats by cheap and rapid commercial processes, \$56,197; for county agents who help farmers and their wives to

Photo by American Press Association.

SECRETARY HOUSTON.

increase the net income of the farm and thus make possible the introduction of labor saving conveniences and other improvements \$1,027,312.

"Extension work designed to be fundamentally helpful to farm women seems to include within its scope certain matters, as follows:

"First.—Plans to increase the net income of the farm. Farm women need more money for home purposes. The purchase of home conveniences, the installation of water, sewerage, lighting and heating systems, kitchen and other conveniences and the bringing of literature and music into the home are, in the majority of country homes, dependent upon greater net profits in farming. Knowledge of these conveniences and other desirable things is good, but money to buy these desirable things is a vital necessity if country life is to be made as acceptable to women as town life.

"Second.—Plans to teach and demonstrate efficiency in farm home management. These include such matters as wholesome food properly prepared and served in adequate supply and variety throughout the year, the care of the home and the family linen and wardrobe, the care and management of children and sometimes the handling of certain farm enterprises like poultry and eggs, milk and butter, the garden, small fruits, etc. Efficiency in farm home management contemplates the maximum of accomplishment with the minimum of effort to the end that the farm family may find satisfaction and contentment in the home and that the time of the farm woman may be conserved.

"Third.—Plant for leisure and development. The farm woman needs time for reading, self development, child teaching, social life and recreation.

"In the development of home economics demonstration work there needs to be kept in mind the point of view that the problems of country women must chiefly be solved by country women. The county agent movement in some sections of the north and west started out primarily as a city man's movement, but it has succeeded in exact proportion as the farmers of the county have taken hold of the work and made it their own."

Monument Set Up For Ape.

Summit, N. J.—The grave of a pet monkey which was owned by Mr. and Mrs. Frederick Humphreys of New York and was buried here a short time ago on the estate of Mr. Humphreys' mother, Mrs. T. St. John Gaffney, is now marked with a handsome headstone.

"WHO COMES HERE?"

By M. QUAD

Copyright, 1915, by the McClure Newspaper Syndicate.

"Halt! Who comes here?"

"Friends, with the countersign."

"Advance one and give the countersign."

It was the relief going the rounds to change the pickets, and I was dropped out at post No. 7. We had fought Lee all day long on the strangest battlefield of the whole war—in the Wilderness. From right to left flank, from front to rear, we were hemmed in by forest and thicket. There were swamps in which lizards and serpents lurked, thickets in which the coy whippoorwill built its nest, dense spots of forest which seemed never to have echoed the ring of the woodman's ax.

Post No. 7 was under a large tree on the edge of a thicket. It was a lonely place, well away from the camps, the dead and the dying, but I was glad to be alone. I had been nearly an hour on the post without anything happening to alarm me, when I heard a person moving in the thicket across the open strip.

Rustle, rustle! Step, step! It was a cautious movement. Whoever it was hoped to reach me without discovery, but there were dead leaves underfoot, and the thicket was dense. A hare could not have moved without betraying its presence.

"Who comes here?"

There is silence for fifteen seconds, and then a woman's voice answers:

"I can't find the place! It's so dark I can't find the place!"

Aye, it was a woman's voice, and it had a sob in it, too—a woman there in the darkness between the hostile lines with powder smoke still in the air, with stray bullets darting through the thickets with a whiz as of some great insect stirred to anger.

"Who comes here?"

"I wish it wasn't so dark! I am so tired!"

And then she comes across the open strip toward me, making no stop, never hesitating, walking straight up to me, as if she could see as well by night as in the sunshine of day.

"I can't find the place!" she sobbed as she came to a stop within arm's length.

"Good God, woman, what are you doing here?" I gasped, almost terrified at her presence.

"See! See!" she replied, holding a bundle out toward me. "One time I saw a beautiful spot in the woods and said to myself that if he died I would bury him there, but I can't find it—I can't find it!"

"What is it, woman? What have you got there?"

"See! See! Don't be afraid. He's dead. He can't speak or move. Take him!"

She put a bundle into my arms, and I cried out and let my musket fall. It was the body of a baby about a year and a half old. Dead? Yes—dead from a cruel bullet which had pierced its little body and left a great wound, which looked horrible to me in the dim light; dead and cold and bathed in its own blood—dead for hours! And when I reached out and touched the shawl or wrap worn by the mother my fingers burned at the feel of blood!

"Was it your baby? Did you live in the cabin beyond the thicket?" I asked, still holding the little corpse.

"He was so happy!" she said as she patted the little bare head with a motherly hand. "And I was so happy too! He won't ever laugh and crow again, will he? I've got to find that beautiful place and bury him, haven't I? And you'll help me? Yes; I know you will, for you don't swear and curse at me."

She had lost her mind. Think of it—an insane mother wandering over a bloody battlefield with her dead child in her arms! She had but one idea—to bury it in a dell which she had once visited and remarked its beauty, a dell in which Federal and Confederate were doubtless then burying their own dead.

I knew not what to do. I could not leave my post, and I did not want her to go wandering farther. I was trying to soothe and quiet the woman when she suddenly cried out:

"Ah, it's not so dark now, and I can find the place! I'll go on ahead and dig the grave, and you follow on with the baby. Poor baby! He won't know that he is buried, will he? I can find the place, and you"—

"Come back! Come back!" I called to her as she fled away in the darkness, but she was 200 feet away as she answered me:

"I'll find the place! Poor, poor baby!"

And when the relief came I told the story and pointed to the bundle resting on the ground beside me.

"God pity her!" whispered the sergeant as he lifted his cap.

"God pity her!" echoed all the others as they stood uncovered around the poor little corpse.

Time meant human lives that night. Grant was moving by the flank. Lee was moving by the flank to match him. The morrow was to witness more slaughter—make thousands of other widows and orphans.

"Dig here!" said the sergeant, and with our bayonets we scooped out a shallow grave in scarcely more than a minute's time.

"Carefully now! Poor little thing! Now fill in. That will do. God knows where it lies! Fall in! Forward, march!"

And yet men write of the glory of war!

AVIATION CORPS

National Reserve of Air Fighters Being Formed.

FOR USE IN CASE OF WAR.

Headquarters In New York, but District Bases Are to Be Located In Other Cities—Plans For 1,500 Landing Stations In All Parts of the Country—Other Schemes For Defense.

New York.—The Aero-Military Service Federation of America, a volunteer organization of which August Belmont is president general and Mortimer Delano deputy president general, has announced the proposed formation of a national reserve of aviation volunteers for use in case of war. The program outlined by Mr. Delano contemplated the establishment of district bases in New York, Richmond, Chicago, St. Louis and San Francisco, with twenty-

Photo by American Press Association.

AUGUST BELMONT.

eight aero squadron centers and 1,500 landing stations scattered from coast to coast.

Mr. Delano explained that under the federal law at present there is no authorization for the formation of an aviation regiment and that therefore his organization is a provisional body. He says efforts will be made to have the next congress authorize the First Aviation corps, the formation of which is the ultimate purpose of the Aero-Military federation. The federation also plans a propaganda to urge upon congress federal control of all aviation.

The prospectus of the organization says its purposes are patriotic and educational. The membership is divided into three classes, aviators, officers of the United States army and navy and civilians who are unable to serve in an aviation corps.

Mr. Delano said that in about 50 per cent of the squadron branches had been formed and were busy recruiting. He expects a membership of 25,000 in three months. When this is reached he plans the establishment of the hundreds of landing stations to make aviation easier and safer in all parts of the country.

About three years ago Mr. Delano attempted the formation of a similar organization, which lapsed into desuetude. Mr. Delano credits this to circumstances over which he had no control, and says that now, with the awakened spirit for national defense, citizens in all parts of the country will join the federation.

Lindley M. Garrison, secretary of war, received a letter from Alan R. Hawley, president of the Aero Club of America, in which it is proposed that the government establish a squadron of eight aeroplanes at Governors island for the defense of this city. Whenever accounts of aerial attacks on cities appear in the news the Aero club receives inquiries from residents of New York asking how the city would be defended by aeroplanes.

"The aerial attack upon Venice by Austrian aviators, who flew to Venice from a base more than 100 miles away," said Mr. Hawley, "and the recent fight near Brussels, when twenty-seven aeroplanes defended that city from an attack of a Zeppelin, have increased the number of inquiries. The attacks upon cities and ships by aeroplanes which start from distant bases and the use of aeroplanes for range finding compel people to realize that aerial attacks could be made upon New York by aeroplanes starting from ships fifty or a hundred miles at sea, and large guns, delivering 2,190,000 foot tons of metal per minute at a range of 20,000 yards, and aided by aeroplanes, would quickly reduce any coast defense not adequately protected.

"The east is entirely without aeronautical protection. The military centers have no aeroplanes. The troops have never maneuvered with aeroplanes and the men behind the coast defense guns have no aerial eyes to give them their accurate range. I submit that this is an unnatural and shocking condition. I deem it my duty to urge that steps be taken immediately to provide aeroplanes for the defense of this part of the country."

THE ROSE FROCK.

"Queen Rose of the Rosebud Garden of Girls" Describes Gown.

LINGERIE GOWN.

The month of roses, with its brides and weddings, brings out many versions of the "rose frocks." The gown shown here to be worn at a midsummer evening function is one of the prettiest of the season's offerings in rose.

The gown is of faintly rose chiffon, very simply built, just a straight hemmed and gathered skirt and surplice waist, which serves also for sleeves. But the charm of the frock is in its trimming of roses and the color in which it revels.

The roses are tiny and set upon the skirt in alluring little circles as finishings of the ribbon trimming. The girdle of ribbon is trimmed in the same manner, and in her arms the wearer will carry a bouquet of pink roses.

CURTAIN LAUNDERING.

How to Correctly Wash Lace Curtains and Dry Them.

There is a right as well as a wrong way to do curtains.

First, take the measure of all the curtains before putting in the tub. Keep this slip of measurements to adjust the stretchers correctly.

Second, fold the curtains lengthways and crossways until they are about a foot either way and keep them this way until they are ready to put on frames. This will keep them from stretching.

Third, soak in slightly warm water for a half hour, then squeeze gently (never wring) and put in warmer water and rub them good with any white soap. Let soak while the curtain frames are being cleaned by using a small whisk broom and soapsuds, then rinse and dry. Now squeeze the curtains carefully (never rub on a board), remove from this water and place in a boiler of warm suds and ammonia and let come to a boil and boil about ten minutes.

Fourth, suds, rinse and blue. Now for the starching, which is a very important part. For six pairs use three tablespoonfuls of good starch to three and one-half quarts of water. Dip a small piece of net in the starch to try it and then dry it quickly and make sure the stiffness the curtain will be when dry.

Fifth, now they are ready for the frames. Take the first one and put over the pin in one corner of the top of the curtain; then go to the bottom of the curtain on the same side and catch up the other corner, then the opposite corners. Now begin in the middle of the curtain and pin two or three, then in the middle between this and the ends either way. Same way with the other sides, also the ends or top and bottom.

Do not draw them along the edges, but with both hands bring them up to the pins in a straight line.

Keep the threads of the curtains always straight and ease in any slight fullness, should there be any, rather than let it come out at ends.

When dry remove carefully and do this one important part: Lay the curtains lengthwise on a bed not in use and fold in the middle lengthways, then once again lengthways, never crossways. When the curtains are on the poles they will hang in lengthwise folds.

The surprise and satisfaction that come from curtains done the right way doubly repay one for all the work.

Scalloped Onions.

Boil six or eight onions until tender, changing the water once. Separate them with a fork and arrange in layers in a buttered earthen dish, alternating the layers with buttered breadcrumbs. Season with salt and pepper, pour over the whole enough rich milk to nearly cover, spread with melted butter and brown in a moderate oven.

Care of the Baby In Summer

Bottle Feeding.

[Prepared by the children's bureau, United States department of labor.]

The first and most important thing to do for a baby is to find the right food for him. When for any reason he is deprived of the one "right" food, his mother's milk, some substitute must be found. Experience in feeding many thousands of babies in this and other countries has shown that clean, fresh cow's milk is the only food that can be depended upon to take the place of breast milk with even a fair degree of success.

In order to have milk that is clean enough for a baby's food, the greatest care must be taken to keep it clean from the time it is drawn from the cow until it goes into the baby's mouth. If a cow is kept on the place it should be possible for the mother to see that the cow is brushed clean before being milked, that the teats and udder are washed before the milking begins, that the hands and clothing of the milker are clean and that a partly covered milk pail is used, which has been scalded with boiling water before use.

It is sometimes advisable to boil the milk, especially in hot summer weather. Usually the method of treatment called pasteurization renders it safe. Here is a simple method of pasteurizing:

Put a gallon of water over the fire in a large kettle. When the water is boiling hard remove the kettle and let it stand uncovered for ten minutes. Stand the filled and corked bottles in the hot water, cover the kettle and allow it to stand for half an hour. Remove the bottles and cool them, under running water if possible, until they are cold, and keep them on ice or where they will be cold until needed.

Perfect cleanliness must be observed in making up the baby's feedings. The mother's hands should be washed clean, and she should wear a clean apron. All the dishes and articles to be used should have been boiled before being used, and as far as possible they should be kept for the baby's use alone. Milk is very readily tainted by being put into dishes in which food has been cooked. If convenient have on hand a kettle large enough to hold eight nursing bottles at a time, a two quart bowl or pitcher to hold the milk mixture, a funnel through which to pour it into the bottles, a long handled spoon to stir it with, a bottle brush, enough nursing bottles and nipples for all the nursings in twenty-four hours, and the same number of new corks. A graduated measuring glass is a convenience, but a nursing bottle having a scale in ounces blown in one side may be used instead.

It is most important that the bottles shall be kept cold from the time the milk is prepared until it is used. Here is a cheap and effective icebox:

Use a lard or candy bucket or a wooden box for the outside receptacle. In the bottom put a layer of sawdust an inch thick. In the middle of this box place an eight quart tin pail with a cover and fill all the space around it with sawdust. Inside this pail put the ice and the bottles and cover both the inner pail and the outer box. If the ice is broken up and put into a small covered pail which is set inside the refrigerator it will keep longer than when it is not thus protected. If the outer box has a cover on hinges, as will be most convenient, a thick layer of newspapers may be tacked to the underside of the cover. Or a cushion stuffed with hay, straw, excelsior or sawdust, made to fit the cover of the box, may be fastened to it. If properly made this little device will keep the baby's bottles sweet for twenty-four hours with very little ice, provided they are very cold when put in.

When it is time to feed the baby take one of the bottles out of the icebox and put it in a small pail or pan of water over the fire to heat. The water should come up to the milk line on the bottle. Do not make the milk too hot. The mother may test the heat by sprinkling a few drops on the inner surface of her arm; when it feels just comfortably warm to her skin it will be right for the baby.

After the feeding is finished, remove the bottle at once and empty out any milk that may be left. Rinse it with cool water and leave it filled with water. At some convenient time wash the bottles with warm soap and water using the bottle brush to scrub them clean inside. Rinse thoroughly and put them over the fire to boil. The kettle used for pasteurizing may be used for this purpose. The water should cover the bottles and they should be boiled for fifteen minutes. They may stay in the water until the feedings are made up. Wash and boil the corks at the same time.

To clean the nipples, wash and scrub them in warm soapy water. A little common salt rubbed on the inside will remove the milk. Rinse well and drop them into boiling water for five minutes. They will dry with their own heat when removed and should be put away dry, in a dry glass jar, which has been boiled with the bottles. Cover the jar and keep it out of the light. Handle the nipples only by the lower edge, and never by the top, which is to go into the baby's mouth, and guard especially against flies, which like nothing better than to swarm over the baby's bottle and nipple. If this happens, put on a fresh nipple before feeding the baby. Flies are a deadly enemy to humanity.

Faille Silk Gown, Taupe In Color, With Embroidery Done In Beige

Designed by Joseph, New York.

THERE is a tendency this season to substitute faille silk for satin, and many of the extremely modish frocks are developed in that material; also we are wearing subdued colors, for we have been psychologically affected by the war abroad, and our days of riotous colorings are over for the present. Of course when the whole world is painted in somber shades the dress of the world's femininity must reflect the general tone.

This may account for the desire for the faille silk, which has a subdued sheen, and also for the shades of beige and taupe, which are so popular.

Pictured in this illustration is a faille silk gown, taupe in color, with embroidery done in beige. The apron effect is new, reminiscent somewhat of the Swiss peasant costumé. This is edged with embroidery, as are the tiny jacket, the sleeves and girdle. Worn under this jacket is a satin and grenadine striped blouse. ANNA MAY.

SUMMER ACCESSORIES.

The Fan With Bag Is Another Mid-Victorian Resurrection.

TWO BAGS AND A FAN.

Mesh bag with gate top and silver chain of size just large enough to hold a bit of change. Evening bag and matching fan of flowered satin. The sticks are of white painted wood.

PAINT AND PAINT BRUSH.

Now Is the Time When Bright Sunlight Shows All the Dingy Places.

Paint and paint brush should be as close friends of the housewife as are needle and thread. Perhaps it is the unconscious psychology exercised on women by good paint advertising or perhaps it is because they are skillful at it that they enjoy odd bits of painting about the house. The can of "ready mixed" covers a multitude of sins of commission from heels, hands, knocks, scrapings and rough treatment generally.

There is the baby buggy of wicker, stained and dirty from long use. A small can of stain and a couple of coats of black on the springs and wheels will make it withstand the still harder test of spring showers. Then baby's iron crib looks as though it has [illegible] where baby had dented off the enamel with the stock of its toy gun. Two coats, or, better, three, of white paint and enamel will cover up the blisters and make the crib as sanitary and pleasing as when new.

On close inspection the gas stove and its pipes appear rustily dingy and down-in-the-mouth, as it were. Ah, just the thing! A small can of special stove paint in black will make the stove gleam happily again and remove its unkempt air. Perhaps, too, the radiators are spotted and shineless. It is only the work of a half hour to paint them with special silver or gold radiator paint.

The kitchen is an important field for the use of paint brush and paint. Frequently unsightly plumbing can, as suggested, be made attractive by the various lacquer paints. The pantry shelves need never be hard to clean if they are treated to one or two coats of white enamel. Table drawers also can be painted, which will prevent them from absorbing grease and getting so dirty. The legs and front of the ordinary kitchen table will look better and stay cleaner longer if given a coat of paint harmonizing with the other colors in the room. Wooden salt boxes, strips on which to hang utensils, the space between shelves in many closets, can all be made brighter and more sanitary by a liberal use of paint.

Under the head of paint must be included the great variety of stains combined with varnish or various other wood finishes. These are particularly useful in "touching up" floors, woodwork, certain pieces of furniture, and in staining soiled wicker and basket work. Perhaps it is a favorite rocker which has been kicked and knocked until the finish is spoiled. It is not very difficult to touch it up or to refinish it entirely, first sandpapering it to remove the old varnish and then handling it as if it were an entirely new piece. Taborets, small tables, stools, all these can be made to wear longer and appear like new if treated to the magic of the paint brush.

All woods with exposed pores absorb moisture and grease. Water enters the pores, causes them to swell and thus become disfigured. The more impervious the wood surface can be made the easier it is to keep it clean and the longer the wood will last. Paint, varnish and stain, whose base should always be the best linseed oil, fill the pores of the wood, coating and rendering it impervious. And paint is not hard to clean. It is the open, untreated woodwork which looks dingy, absorbs grease and is hard to care for.

Polishing Silver.

An excellent silver polishing cloth can be made in the following way: Buy an ounce of jeweler's rouge, mix with a little water, rub into a piece of chamois skin and dry.

GOSSIP AND ADVICE.

Scrap Books Excellent Way of Conserving Much Valuable Information.

Many times you have seen in a magazine or newspaper an article or suggestion that you determined to save—and then either lost the magazine or clipping or threw it away during some cleaning up period. Why not reform?

One woman of methodical habits keeps a series of scrap books for just such articles and finds this a very neat and effective way of preserving ideas for future use.

One book is marked "Garden." In this book she has pasted every illustration or item of information on the subject that has intrested her. There are pictures of trellises, arbors, pergolas, water gardens, benches or bordered paths, which she hopes to be able some time to add to her own garden; suggestions about flower or vegetable culture; advertisements she wishes to keep for reference; garden plans from various garden magazines, etc.

The other half of this book is devoted to notes on her own garden—dates on which she has planted, her success with various plants and seeds, the garden expense account, and any point that she may wish to recall at any time.

Another book is marked "House." In this she keeps articles and suggestions on household decoration. Samples of chintzes, denims and upholstery materials; illustrations of fireplaces, window seats, cupboards, stair railings, etc., that have appealed to her. Here, too, are written down the dimensions of each room, the number of windows and amount of material needed for curtains, the dates on which the last papers, rugs and curtains were bought, and the price of these. This system saves much time and trouble when a room is to be redecorated, for all the necessary information is at hand.

A large part of the book is devoted to the kitchen. In these pages are all the suggestions that have interested her. There is a list of various brands of tinned goods, cereals and other foodstuffs. This is labeled "Pure Food Products," and only tested and approved brands are listed.

In the kitchen pages also are pasted notes on or advertisements of improved utensils and labor saving devices—washing machines, mayonnaise mixers, butter churns, silver cleaning pans, in fact, any approved labor saving device that she may wish to purchase.

In this way every item of household information that has interested her is preserved in accessible form with very little trouble. Recipes are not put in the scrap book, as they occupy little space and are more conveniently kept in a card index box on a shelf.

DEAR FRIEND WAS MOTHER.

Girl, Given Away Because of Poverty, Now Knows Parents.

Lacrosse, Wis.—Hazel "West," fifteen-year-old girl, who was taken away from Fred West, her foster father, by Judge Brindley because he had neglected her, has found her mother in a woman she has known all her life as a dear friend. Mrs. Fred Green, the mother, appeared before Judge Brindley and told the remarkable story of how she had given Hazel to the Wests when she was a baby because of her inability to care for the baby.

A mysterious telephone call to the Home of the Friendless, where Judge Brindley placed Hazel, effected the reunion of mother and daughter. The message said that if Hazel would come to one of the downtown stores she would be given a heavy coat. Hazel went downtown alone and did not come back. Investigation revealed her at the home of Mrs. Green, who had met her in the store and told her the story of her parentage.

In explaining the case to the judge Mrs. Green said: "I was the mother of another child when Hazel was born, and we were too poor to care for both of them, and at Mrs. West's urgent plea I let them take her.

"Not a week has passed since that I have not seen her. The Wests were better able to care for her than I, and I have been happy in the thought that she was being brought up in the right way. But since Mrs. West's death I have been worried, and now that she has been taken away from West I intend to keep her."

Mrs. Green is the wife of a railroad engineer. Hazel's father is dead.

Cleaning Raincoats.

To clean raincoats sponge them with a mixture of alcohol and ether, to which a tablespoonful of ammonia to a pint of liquid has been added.

Points for Mothers

A Christening Party.

Christening parties usually are not very large ones, since even the fondest young parents can scarcely expect that there are many persons outside of their immediate families who will be deeply concerned in the new baby.

There may be a few friends living at some distance who should be invited rather formally by written invitations, but the grandparents and near relatives need be bidden only over the telephone or verbally.

If you wish to send formal invitations the following would be a correct wording:

Mr. and Mrs. John Brown
Request the Pleasure of Your
Company at the
Christening of Their Daughter
On Thursday, April 14,
At 4 o'Clock,
37 Bank Street.

The traditional color for a boy baby is blue and for a girl pink. Many mothers, however, prefer to have no touch of color in the little christening outfit for the baby, feeling that white better typifies the purity and innocence of babyhood.

The decorations for the house and for the christening feast, if you are to have one, may be either delicate blue or pink or in white. The choice of most mothers would be delicately tinted flowers rather than all pure white.

The christening should take place in daylight, preferably. If for any reason it is done in any room that is slightly dark and candles are lighted, these should have white shades. If the ceremony is sufficiently elaborate to include music, the most proper music would be cradle songs.

The christening feast should be in no way elaborate. Cake and wine are frequently the only refreshments served.

Story Telling.

All small children prefer to be told a story rather than trouble to read for themselves, and nothing is more delightful when time is at one's disposal than to weave a fairy romance or unfold a tale of heroism to a group of attentive and interested young people. In this way their interest is aroused, and soon when it is impossible for mother or father to sit down and spin these fancies for the children the little hands will open a nearby book, and the boy or girl will search for romance or adventure in the printed pages.

This is a precarious time in the mental development of a child. In this early age it will be determined whether a love of good literature or an interest in "trash" is to accompany the boy or girl through life, for if when young only good books are brought before the children's eyes you can be sure only good books will be read by the youngsters, and once having made the acquaintance of literature of a high order and enjoyed the adventures and romances written by some of the best word painters there will be no incentive to take to cheap, trashy books, for these latter will seem tame and uncouth after a taste for good books is developed.

Give a growing lad all he wants of Robert Louis Stevenson's adventures, of Scott's romances and some of Poe's mystery tales and you will find he will never be tempted to look into the pages of a cheap dime novel or to seek the lure of a love story of the trashy order.

Some children seem to be born with a love of books, and these youngsters instinctively take good care of their treasures.

Looks Like a Sticker.

Jitney or nickelette bus or five cent automobile—the thing itself multiplies, and the name doesn't much matter. Still, it looks as if jitney will stick.—Philadelphia Ledger.

Crowded For Room.

Flower gardens in Berlin will be turned into vegetable gardens this year. Here they're turning 'em into space for garages.—Detroit Free Press.

O. E. S. WOMEN AT CONVENTION

Local Delegates Spent Yesterday in Oswego at Annual Session

The annual convention of the twenty-second district of the Order of the Eastern Star comprising the county of Oswego, was held at the Masonic Temple in Oswego yesterday afternoon.

Mrs. J. A. Bort, worthy matron; Charles Brooks, worthy patron; and Mrs. Vernon Calkins, associate matron, with sixteen other delegates represented the local chapter of the order of Eastern Star. More than 200 delegates and members in all assembled.

The convention was held under the auspices of Lake City Chapter, No. 352, and Miss Grace L. Johnson,, district deputy grand matron, was chairman of the reception committee. The following grand officers were present: Marguerite D. Clauson, most worthy grand matron, New York city; Orson W. Middaugh, most worthy grand patron, Syracuse; Sophie P. Paul, associate grand matron, Rochester; Grace L. Johnson, district deputy, Oswego, and Ruth D. Latham, assistant grand lecturer, Phoenix.

The regular session of the convention opened at the Masonic Temple at 8 o'clock this evening. In addition to the exemplification of degrees addresses yeer delivered. The grand matron told of the worw of the Eastern Star, confining her remarks princpall yto fraternity. She also told of the Eastern Star Home and Infirmary which is soon to be built at Oriskany.

An interesting address was delivered by Most Worthy Grand Patron Middaugh of Syracuse. His remarks weer on the condition of the order in reference to the present strength of the districts outside of the metropolitan districts. Mr. Middaugh urged an amendment to the constitution of the order htat would make the grand chapter a movable body.

Arbitration is patient and long suffering, but [illegible] nations [illegible] at it too fast for sane [illegible].

[illegible]

[illegible] this year as ever.

[illegible] urging the president [illegible] should be returned [illegible] "Collect charges!"

[illegible] diplomatic papers bearing on the new deal will of course be a yellow-yellow book.

U. S. SHOE LACES WANTED ABROAD

Needles, Too, Made Here for Use in England; Wheat Soaring

Special Correspondence.

Washington, June 9.—War orders from Europe continue to stimulate business conditions in the United States. Though industry has not yet reached the degree of activity enjoyed two years ago, it is noticeably better than last year.

One of the disclosures of the past week was the effect of the European war on the market for copper. The price of copper had rapidly advanced and copper mining and smelting companies began doing a profitable business in the last two or three months; yet there was no noticeable demand for copper from Europe. Investigations as to the cause for renewed prosperity in the copper industry brought the information that the use of copper in the manufature of brass, in making cartridges, shells and other war equipment had created a new and enlarged demand. Exports of brass for the first three months in 1915 amounted to nearly 19.000,000 pounds, as compared with 1,781,000 pounds for the same period a year ago.

The entry of Italy as a party to the European war has called attention to the fact that for the last few months that country has been an enormous buyer of American products, either in preparation for her own needs during the war, or as an intermediary in supplying material to other European nations. For nine months ending in March, exports to Italy amounted to $138,700,000, as compared with $58,800,000 for the corresponding period of 1914. Shipments of wheat alone during this period amounted to 41,370,000 bushels as compared with 1,400,000 bushels for thes ame period in 1914. This shows, in a large measure, the reason why farmers have been getting a high price for wheat.

Dispatches from Chicago give the information that British and Belgian buyers have been taking American horses freely and paying as high as $200 each. Market reports from Kansas City contain the information that the European war has added enormously to the value and demand for grain and has provided a market for thousands of horses for which the farmer had little need.

It is apparent that although Germany is cut off from direct communcation with the United States, it is securing American products in large quantities from other sources. For example, in March of this year our exports to Denmark were more than $11,500,000, whilef or the same month a year ago; they were only $1,350,000. Other countries bordering on or adjacent to Germany, show corresponding increases in purchases from this country, leaving no room for doubt that goods sold to them find their way to German buyers.

It isn ot alone in munitions of war and foodstuffs that America has found enormous demand in Europe. A Providence, R. I., concern ships hundreds of thousands of pairs of shoe laces each week to England; and a Philadelphia factory filled an emergency call for 10,000,000 needles in one lot to Liverpool. Drugs, chemicals and hospital supplies add very materially to the demand. Automobile exports in February, 1915, aggregated $4,807,812 in value as compared with $2,461,955 in the same month in 1914, an increase of more than 93 per cent.

All this not only creates a market for American products, but provides business for steamship companies that necessarily do part of their own buying in this country. The French line alone has within the past three weeks placed under charter 37 steamers to be utilized mainly for the transportation of war freight from the Atlatic seaboard to Europe.

But even all these orders for American products are not sufficient to keep up the price of some commodities under competition with products given free entry under the Democratic tariff law. Last week corn declined about one cent a bushel, largely on account of prospects of larger shipments of corn from Argentina.

Zinc Ointment For Red Nose.

A red nose is often constitutional, or the sign of indigestion, but more often than not it is caused by a too thin skin. When the latter is the cause zinc ointment is a splendid remedy. You should apply it to the nose every night. You will find it does wonders in hardening the skin, and in this way the tendency [illegible] will gradually disappear.

GLISMAN-WELLS WEDDING TODAY

The Ceremony to Take Place at the Home of the Bride in Park Street

This evening at 7 o'clock Miss Merrell M. Wells and Carl Henry Glisman of 911 Bellevue avenue, Syracuse, will be wedded at the home of the bride's parents, Mr. and Mrs. S. D. Wells, 212 Park st., by the Rev. H. D. Holmes. The ceremony will be performed beneath a canopy of evergreens and flowers.

A twin sister of the bride, Lorrell Wells, will act as maid of honor, while two other sisters, Cassie and Frances Ruth Wells, will be the bridesmaids. The double ring service will be used, and a niece, Mary Louise Carver, will act as flower girl and ring bearer, with Richard Wells, a nephew, also as ring bearer. The ribbon bearers will be the Misses Geshe Margaret Grube, of Bainbridge N. Y., and Mabel Seymour of Fulton.

Harry Bixby, of Syracuse, will attend the groom. Dr. L. S. Preston, of Oneida, and Ernest Thomas, of Fulton, will act as ushers.

A color scheme of pink, green and white will be carried throughout the decorations. The two bridesmaids will be gowned in pink chiffon taffeta and will carry hand bouquets of pink roses. The maid of honor will wear a pink pussy willow taffeta frock with a shower bouquet of pink roses, while the flower girl will be dressed in white with pink ribbons.

The bride will wear a gown of white pussy willow taffeta, with net train and pearl trimmings, and tulle veil. She will carry a shower bouquet of roses and lillies of the valley.

Arches of evergreens have been placed in the doorways connecting the rooms. The fireplace and mantel are banked with ferns and pink roses.

An orchestra of five pieces will render selections and the Lohegrin wedding march will be played by violin and piano.

Only relatives and intimate friends of the couple will witness the ceremony. Syracuse guests bidden are Mr. and Mrs. J. Henry Glisman, Mrs. Anna Glisman, Mrs. Etta Glisman, Mr and Mrs. Charles Herbert Barnes, Miss Louise Leonard, and Miss Elizabeth White. Also Miss Blanche Bort, of Norfolk, Va., and Miss Ruth Bowen, of Utica.

After a wedding trip the couple will reside at 120 Gordon avenue, and will be at home to friends after July 6th. The groom is employed at the Syracuse branch of the U. S. Rubber Co., and is a graduate of Syracuse University, clas sof 1913. He is a member of the Phi Gamma Delta fraternity. Miss Wells is an Alpha Gamma Delta member and graduated from Syracuse University with the class of 1912.

TWO HUNDRED ELKS BOARDED SPECIAL TRAIN

About two hundred people boarded the special train, which left here this morning at 6.30 bound for the Elks convention at Troy. Accompanying the excursionists was the band of 31 pieces.

Edward Cole, who had charge of the excurision, and who will also be a marshal in the parade, was very well pleased with the crowd, as the number going far exceeded his expectations.

The thirty-one members of the band will participate in the parade dressed entirely in white, with regulation band hat, and there is no doubt but what they will make a strong bid for the one hundred dollar prize which is offered.

The excursion train will return late tonight.

AMARANTHS IN BIG CONVENTION

Election of Officers to Take Place Today; Mrs. McNair to be Honored

Syracuse, June 10.—The past year has been one of progress in the New York State Order of the Amaranth. This is shown by the attendance of nearly 300 delegates to the annual convention being held at the headquarters of Syracuse Court in the Greyhound building.

The sessions opened yesterday morning, and nearly every delegate was in her seat when the grand royal matron, Mrs. Elizabeth Patchin of Rochester, brought the convention to order.

Mrs. Patchin's comprehensive report showed that during her term she closed three courts and opened four new ones, all of the four now being in fine financial condition. Among those closed was Kismet of Brooklyn, which was the subject of much earnest discussion yesterday afternoon.

The majority of the delegates voted that Kismet should not have its charter returned, it being contended that it had not obeyed the rules of the order.

The reports of other officers showed that the state order now contains 3,600 members in good standing and is making rapid strides.

Is Young Order.

The order is much younger than that of the Eastern Star, members of which are affiliated through its male relatives with the Masonic fraternity of the United States. The Amaranth is a higher order, corresponding to the Knights Templar in the Masonic order, the first requirement for women's membership being that one is affiliated with the Eastern Star. The men members, who may become members directly from the Masonic order if they have been Master Masons.

The session today will center about the election of officers, and, as it has been a rule for all the state elective officers to advance one step each year in their order of holding office, Mrs. Amelia E. MacNair of Brooklyn will be elected grand royal matron. Mrs. MacNair has been associate grand royal matron durin gthe past year. Her husband, Richard F. MacNair, has been the grand royal patron, whose term expires with this session of the convention. Mrs. MacNair has been a favorite in the state order, and the members look forward, it was said yesterday, to a year of harmoney and progress if she is elected. The installation of the new officers, and such other business as arises, will conclude the convention for 1915.

The banquet and reception to the Royal Court was held last evening at the Jefferson, covers being laid for 300 delegates and members of the order. The dining room was appropriately decorated. In the receiving line were Mrs. Patchin, Mr. and Mrs. MacNair, Mrs. Nora McKinley, royal matron of Syracuse Court, and Chas. H. Johnson of this city, assistant grand lecturer and chairman of arrangements.

SECOND PRIZE SHOW WINDOW EXHIBIT HERE

In the L. P. Smith store window is a reproduction of the exhibit which won the 2d prize durin gthe Style Week Exhibit at Syracuse.

The window is draped effectively in deep purple and against the background is a huge plain gold frame inclosing the "Nobby Tread" Auto Tire. Hidden electric bulbs make the window an attractive night display. The general effect is simple but artistic in every detail.

Within the store is a product of raw rubber which every student of geography should see. The product is known as a "rubber biscuit." It is a longitudinal section of a solid rubber bulb and is built one layer upon another. In the rubber fields a paddle is dipped into the liquid rubber, then held in a dense smoke until its solidifys. Then it is redipped and again held in the smoke. This process is often repeated; the result is a huge solid rubber bulb, built layer upon layer.

Geography kiddies should see this bulb before it is returned to the Syracuse branch of the United Rubber Co. whose property it is.

BODY OF WILLIS NOT YET FOUND

The dragging operations for the recovery of Lewis Willis' body has been transferred to the vicinity of the cofferdam several hundred yards downstream from the place of the actual drowning. This is due to the positive declaration of Homer La Beef, one of the divers engaged in the search, that after a dive yesterday he sighted the body wedged against the dam. Repeated dives, after La Beef's discovery, failed to reveal the presence of the body.

Chief Dyer has redoubled efforts. It is his belief that if the body is not now wedged against the dam, it must have been carried into the eddy formed by the intersection of the race and the dam, and rests on the river bottom nearby.

COURTED IN JAIL.

Youthful Prisoners Wed When Released.

Morgantown, W. Va. — A courtship that began in jail and developed there into love, although the principals could not get a good look at each other during their courtship, resulted a few days ago in the marriage of Minnie Brooks, twenty, and John Bohis.

The girl was serving a sentence of six months for threatening to kill a suitor. When three months of her time was up Bohis was brought to jail to serve ninety days. The girl was on the second floor of the jail, and Bohis was on the first.

AMERICANS MUST BE SAFE, SAYS WILSON'S NOTE

New Note to Germany Has Firm, Friendly Tone; U. S. Offers to Help Settle Issues

Washington, June 11.—The new note to Germany was made public by the State Department at 6 o'clock. The note is less aggressive, less provocative in its language than the note of May 15. It does not dissent from the view expressed in that note.

The new note does not contain a suggestion of bluster. There are no such phrase in as "strict accountability" or "omit any word or act necessary," such as gave the note of May 15 a menacing character.

The absence of such phrases created the general impression that the new note gives assurance of a peacable settlement of the issue between the two countries.

But there is no abatment of the insistence upon the principles of international law which the President sought to uphold in his previous communication.

He maintains that the sacred rights of humanity were violated by the sinking of the Lusitania, and that all the questions raised by Germany as to the character of the vessel are irrelevant.

He reasserts that "upon this principle of humanity, as well as upon the law founded upon this principle the United States must stand."

He insists the sinking of the Falaba was unjustified.

He declares that the United States "very earnestly and very solemnly renews the reprersentations of its note transmitted to the Imperial German Government on the 15th day of May."

He still asserts that American citizens bound on lawful errands have a right to travel on merchant ships of belligerent nationality without being placed in jeopardy by German submarine warfare.

And he concludes by saying:

"The Government of the United States therefore deems it reasonable to expect that the Imperial German Govrnment will adopt the measures necessary to put these principles into practice in respect of the safeguarding of American lives and American ships, and asks for assurances that this will be done."

In his first note, President Wilson, in effect, said to Germany that it was practically impossible for Germany to carry on submarine warfare against merchant vessels carrying contraband and observe the rules of international law, and therefore, he declared, practically, if not in specific terms, that the United States expected Germany to cease such warfare.

But in the note made public today he leaves it to Germany "to adopt the measures necessary to put these principles (the principles of international law), into practice in respect of the safeguarding of American lives and American ships."

He is no longer assuming to regulate German submarine warfare except to the extent that it may effect American lives and American ships, and he leaves it to Germany to decide upon the method by which that may be done. All he asks on that point is assurance that it will be done.

His suggestions that the United States act as the medium of any representations Germany may desire to make to Great Britain on the subject of the blockade "in an attempt to come to an understanding with the Government of Great Britain by which the character and conditions of war upon the sea may be changed," is regarded as one of the most important suggestions of the note.

That suggestion, it is believed, must impress not only the German Government but the German people with the desire of the United States to be both just and friendly to Germany.

Diplomats see great possibilities in that suggestion. They are hopeful that if Germany sees fit to adopt it some understanding may be reached which would be the initial step toward peace.

Unless Germany is absolutely fixed in her determination not to alter the character of her submarine warfare in any particular, it is believed that the United States may reasonably expect a friendly reply and one which will start negotiations which, if cautiously carried on, will result in a complete understanding.

If Germany is so determined, then a break between the two governments is conceded to be inevitable.

Undoubtedly if Germany shall reject the proposals of the United States, Mr. Bryan would consider the rejection as a vindication of the soundness of his advice. But already the friends of the President are saying with some bitterness that if Germany does reject the American proposals the responsibility will be with Mr. Bryan.

Germany, they say, may see in Mr. Bryan's resignation and his announced course of action an opportunity to divide American sentiment by refusing to meet the demands of the President.

What would be the course for the President to take in such a situation?

Could he without objection permit Mr. Bryan to continue to stir opposition to a policy and line of conduct to which he was committed and to which he had committed the country?

That is a question which some of those close to him are asking today.

The question provoked another—What could he do?

One suggestion has been offered. The suggestion is that immediately the note is rejected—if it shall be rejected, which, of course, everybody patriotically hopes it will not be—he issue a call for a special session of Congress and lay the whole matter before Congress for its decision.

A joint resolution, it is believed, would be introduced approving the foreign policy of the Administration. If Congress adopted such a resolution, the effect, it is said, would be to stop all opposition. Mr. Bryan would have to stop his arguments—for the time being at least.

Under the Constitution Congress alone can declare war. Therefore, those who oppose the proposals by the President to Germany, which they think may lead to war, are strongly of the mind that Congress should be called together before the nation is committed any further than it already has been to the taking up of arms.

WILLIS' BODY FOUND NEAR INDIAN POINT THIS MORNING

While Ernest Reynolds was exploding dynamite in the Granby mill race in the vicinity of the cofferdam, at which point Homer La Beef had sighted the body of Lewis Willis, who was drowned Tuesday attempting to recover a drifting canoe, Undertaker J. A. Young, of the firm of Young & Hill, together with Henry Wood and Frank Potter brought the body to the surface at 10.30 this morning at Indian Point, about half a mile north of the scene of the actual drowning. Mr. Wood and Mr. Potter, since the unfortunate accident, have been operating a skiff up and down the channel, dragging the bottom with grappling hooks. The body being brrought to the surface was towed to the shore and Coroner Cusick notified. After an examination, he had the remains taken to Young & Hill's establishment, where it now rests, awaiting word from the drowned man's wife as to disposition. It is expected that Mrs. Willis will arrive here from Syracuse sometime this afternoon, as the coroner wired her at once that the body had been been recovered.

B. P. O. E. BAND WINS 1ST PRIZE

Famous Musical Organization Held at Bay Other Parade Bands

Our hustling little city this morning nearly burst the buttons from its coat with just pride when it became known our local band boys had walked off with first prize at the B. P. O. Elks convention at Troy yesterday.

The boys, in order to capture first prize, had a real test of ability to meet. Among the bands in line was the well known Remington Typewriter Band of Ilion; the Doring Band of Albany; Campaniello Band, of Cohoes; Thirty-seventh Regiment Band, of Hoosic Falls; Schenectady City Band; the Cohoes City Band, and several smaller bands.

The test given by the judges was different than that used previously when the judges sat in a stand and heard each band individually. At this time the judges followed in the wake of the musicians by auto, and no band knew at any time when it was being judged.

The four points on which the bands were checked were: 1. Formation and appearance; 2. Temper, or time; 3. Balance; 4. Quality of tone. Suffice it to say Fulton led the day, and the whole community is proud of the fact. Manager Richardson, and Director Pooler are to be congratulated for the enjoyment afforded the communty and too for putting "Fulton on the map."

The Elks as a whole left an impression in Troy of Fulton that will not soon fade away. Real modesty on the part of the local lodge prevented it from walking away with the entire list of prizes.

The Fulton Elks were headed by John W. Stevenson, who presented an invitation for the 1916 convention, but lost to Peekskill by a few votes.

At the closing business meeting yesterday morning the delegates representing 3,800 Elks in the State, approved a telegram prepared by Edwin M. Wells, of Syracuse, which was sent to President Wilson, approving his stand in connection with the foreign warring powers, and pledging allegiance to him in his actions.

Retiring President William C. Burgess of Auburn, was presented $100 in one dollar bills, offered in a chain, which reached across the Court House as a testimonial for his efforts in securing the membership of every lodge in the state this year.

EMBASSY TALKS WITH BERLIN

Summer Home of German Ambassador Has Exclusive Wire Service

New York, June 11.—With wireless facilities for communication with Berlin nearby, the official German Embassy now is located at Cedarhurst, L. I., and the residents of the colony found an element of mystery yesterday in the precise arrangements that have been made to keep the Ambassador here and the imperial government in touch at all times.

Messages may be put on a telegraph wire at a temporary booth erected for the benefit of the summer Embassy, about one hundred feet away, and may be despatched to Berlin by wireless with only one relay, that being where the telegraphed message is transformed into a wireless.

So quietly and unostentatiously have the officials of the embassy gone about the leasing of the cottage that many persons living in the vicinity did not know yesterday that despatches of international importance were being sent from Cedarhurst to the cnter of the European conflict. The working office of the embassy is an unpretentious house in the north side of Central avenue, two blocks from the railroad station.

No German flag flies in front, nor is there an emblem of any kind to distinguish the place as anything but an ordinary dwelling. In striking contrast and seeming to punctuate the present diplomatic moment between the United States and Germany two large American flags nearby whipped and gleamed in the blue sky as if they were illuminated. One was on a school house and the other on a fire engine house.

The coming of the German Embassy has been with so little fuss that few persons would have known that it had been attending to the business of the imperial German government there since Monday morning. Several days ago the Postal Telegraph Co. erected the temporary structure, of corrugated iron and wood. This is the only Postal Telegraph station on Long Island, except one in Long Island City. There never has been one out on the island before. This little station which has half a dozen men for day and night service, has a direct wire to the wireless plant of the Atlantic Communication Company, at Sayville, L. I., which operates the Telefunken system. The Postal handles practically all of the wireless messages that go to Berlin by way of Sayville. The Western Union Company operates through the plant at Tuckerton, N. J.

While the Postal officials would not discuss the situation, the reason for placing the temporary structure so close to the embassy is obvious. This will put the embassy in almost instant communication with Berlin at all times when atmospheric conditions are right. Sayville is only thirty miles from Cedarhurst.

There is a force of about twenty men at the summer embassy. Fifteen or more clerks are required to transact the clerical business. The four officials live in a large yellow house in the south side of Central avenue, which is so surrounded and overhung with trees that it barely can be seen from the embassy.

Count von Bernstorff will not spend much time at the embassy, it was declared, and will not live in Cedarhurst. He will come into New York each day as soon as his day's business at the summer embassy is transacted.

BRYAN OPENS UP NEW WHITE HOUSE IN WASHINGTON

Crowds Flock to Former Secretary's Home, and Wilson Followers Call Nebraskan Traitor

Washington, June 11.—William Jennings Bryan has already written a dividing line between himself and the Wilson Administration and has builded a new White House at Washington in Calumet place.

The initial Bryan note, the first act of the ex-Prime Minister's political liberty, alienated the majority of the Administration's official friends and established an antagonism which will survive the settlement of the German controversy.

And within six hours of his noon hour farewell to the State Department the stately old Logan mansion at Calumet Place had become a new white house, in which the late Premier had established his democratic court, in which he receives his swarming visitors; where, every evening at 6:30, he gives audience to the newspaper men just as President Wilson does; from which he daily issues the proclamations which are astonishing and startling the Wilson government, and to which Bryan friends and followers are beginning to flock from all parts of the country.

The sensation as distinct as the European war is already staged, and yesterday's first gun of an astonishing war for peace is to be followed by the roar of heavier artillery.

There is no concealment anywhere of the fact that Government officials are amzed and indignant that former Secretary Bryan should have forestalled the President's official note to Germany by his personal statement. This indignation is to be deepened and intensified when Mr. Bryan meets and parallels the official publication of the Wilson answer to Germany by a carefully prepared and fully charged column of his own.

It is a bold, frank challenge to test the Bryan strength against the Wilson strength in the mighty lists of American public opinion.

And neither the diplomatic protest of officials nor the perfunctory reassurance of hosts of interested politicians can blind the eyes of the people to the potent fact that the battle of the Democratic organization is on, and that it has started in a way that gives no promise of a peaceful progress or a harmonious conclusion.

The Administration people are saying now—some softly and some openly—that Bryan is already a traitor to his party and has betrayed the President and the Cabinet.

There can be but one possible outcome of the spirit and temper and terms of the talk that is radiating now from the Capitol to the country.

These two are strong men, and they are lghting men—obstinate in conviction, resolute in temper and fearless in advocacy.

Nor is either of these men of a calibre to be convinced by any numerical settlement of the issue, or to be forgiving to the man whose power has thwarted the triumph of his most cherished idea.

It is undoubtedly true the majority opinion of the hour is that Mr. Wilson would have every advantage of Mr. Bryan in a Presidential contest between the two. He is the President in a period of stress and peril. He has so far carried the country and Congress with him. He is the ablest writer of public addresses in the country.

If the conclusion of this controversy and the Presidential primaries find our country still at peace, then say the President's supporters, no man in either party can have a chance with him before the people.

"On the other hand," say the Bryan followers, "Mr. Bryan is more essentially and certainly the evangel of peace than Mr. Wilson is. If Mr. Wilson's plan will probably preserve peace, Mr. Bryan's plan will certainly preserve peace.

"Mr. Bryan," they say, "has a larger personal following than Mr. Wilson. It was the recognition of that personal following that put him in the Cabinet. Mr. Bryan is more human than Mr. Wilson and his very faults endear him to some of the people.

Mr. Bryan's resignation, it is believed here, has shifted in a night the German-American vote who, on Monday, were bitterly denouncing and whose public journals are now universally acclaiming Bryan as statesman and patriot and friend to the German-American. Mr. Wilson, they say, is popular by turns, riding the crest of the wave today and under popular condemnation tomorrow. But Bryan's friends are his all the year round.

The Prohibition vote sharply antagonized by recent Presidential utterances, might rush to Bryan as an expression of their resentment. Then, too, Mr. Bryan is as prominent with his tongue as Mr. Wilson with his pen. And above all things in this controversy, he is right."

WEATHER FORECAST

Showers tonight and probably Saturday; moderate northwest winds.

D/34

GREAT RUG and CARPET SALE

AT PATTERSON'S FOR THE NEXT 15 DAYS

¶ Though the prices on Rugs and Carpets are steadily advancing, for the next 15 Days we will sell our stock at less than old prices:

Rugs 27"x63" were $1.50, for . . $1.00 each
Rugs 27"x63" were $2.00, for . . $1.59 each
Rugs 36"x72" were $3.50, for . . $2.50 each

pared to That Junketing Dinner

(Continued from Page One)

who had made definite plans to keep people away. He said the West Siders had turned down the sewers and streets when they were first proposed and that he believed some hard work by supporters of the site should have results.

Mr. Deuel, at that point, recounted the $18,000 cash offer that had been made for the site some time ago and in speaking of the value of the property cited this offer as the real value of the land.

Mayor Fox said that there were only 32 high school pupils from the second ward, or in the ratio of one in ten.

Rev. C. C. Olmstead approved of the site, saying that the city had been fair with the second ward in building the Oak st. school and that the ward should reciprocate now by favoring the Falley site. He spoke of the sentiment attached to the property and said that he should dislike very much to see the land used for anything except school purposes.

Mr. Redhead suggested that several men contribute to guarantee the cost of the election and offered to head the subscription list. There were several in the gathering who followed suit. Alderman Sullivan then declared that the money question did not enter into the case with the people of his ward, but they were opposed to it for many reasons, too numerous to mention.

At this point Miss Ada Thayer, a member of the Educational Committee of the Chamber of Commerce and a tax-payer, created a veritable sensation for a moment by calmly asking the Mayor, "The election won't cost any more than a banquet, will it?" Miss Thayer evidently referred to the banquet tendered Mayor Cox of Middletown by Mayor Fox and the Aldermen last September, the expenses of which are said to be $200 and the cost of which was borne by the city.

The Mayor said in answer, "Gentlemen, we are approaching a new era, in fact we are already in that era—the era of Woman's Suffrage and it is only fair that we should hear some opposition from that quarter." Miss Thayer made no further remarks, however, except to volunteer five dollars toward the fund to guarantee the expense of the election.

Thomas Marvin, Alderman Sullivan and one or two residents of the West Side gave their opinions of the proposition. Mr. Fairgrieves read a letter from the Gilmour estate to the effect that the $16,000 option would not be renewed but that the price would be $18,000 after July 1.

Mr. Lovejoy was of the opinion that several influential men who were opposed to the Falley site had used their influence with the Chamber of Commerce which accounted for the fact that the Chamber had practically dropped the subject.

Many of the prominent men who figured prominently as supporters of the site in meetings held in the past were conspicuous by their absence last night, including several members of the Board of Education and several Aldermen who had declared themselves in favor of the election at a recent council meeting.

STEP TAKEN TO SETTLE STRIKE

Conference in Watertown Between Federal and Union Officials

Watertown, May 25.—Following a conference which Daniel J. Keefe, a representative of the United States department of labor is said to have had during the forenoon with the managers of the St. Regis Paper Co. and the Remington-Martin Company, a meeting took place at the New Woodruff this afternoon between Mr. Keefe, J. T. Carey, president of the paper makers' international organization and J. H. Malin, international pesident of the pulp workers. The meeting may become the first step towards the ultimate settlement of the existing trouble at the mills of the two companies where over 1000 men are now on a strike. Both President Carey and President Maline expect to attend a meeting of the strikers at Deferiet later this afternoon.

On Sunday and yesterday President Carey and Malin visited Norwood and Raymondsville where mills of the Remington-Martin Company are located. Meetings of the striking paper makers were held and attended by the presidents in both places. Norfolk, where a third mill of the company is located, was also visited. Upon their return to Watertown, both Mr. Carey and Mr. Malin expressed themselves as satisfied with the outlook in the towns north of here.

A stop was made at Potsdam also where the Unity Paper Company is about to begin operating a good sized mill which will be unionized from the start.

President Carey was asked this morning if today's conference with Commissioner Keefe of the federal department of labor would perhaps bring about arbitration or a settlement of the strike.

"It is far too early to discuss or make any predictions," was Mr. Carey's reply.

While neither of the presidents of the international organizations have been at Deferiet since last Saturday when a big mass meeting was held there, they have been constantly in tourh with the situation by telephon. Mr. Carey said today that the action taken by the St. Regis Paper Company in ordering the strikers from their homes within a 30 day period, perhaps leaving them in destitute circumstances, was being freely commented upon both by union paper makers in mills north of here and by proprietors of mills themselves.

Mr. Carey said that he understood that the hotel at Deferiet had ejected the strikers but was being kept open to others. He will investigate the story on his contemplated visit this afternoon.

WILL TAKE CENSUS FOR STATE JUNE 1

Census day has been scheduled for June 1. On that day each individual caught by the census man will be bombarded with an array of questions.

Again "Ann" will be asked to tell how old she is.

BLUNDER AFFECTS PAPER MAKING

Underwood Law Shows An Error in Wording Fatal to Industry

Washington, D. C., May 26.—A typical eyample of inereustable blundering by Congress in the enactment of a statute has been argued recently before the Court of Customs Appeals. The court is asked to interpret the meaning of paragraph 408 of the Underwood tariff act, the first important law of the present administration.

The paragraph provides free entry for "waste" of any of the articles therein described "suitable" for the manufacture of paper. Careless use of the word "suitable" in drafting the law plunged it into uncertainty, for it admits a wide latitude of construction. Will free entry be given to anything that might be used in paper making; or must waste be used only in paper making in order to enter free of duty?

Already two opposing constructions have been placed upon the statute one by customs officials who imposed a tax, another by the Board of U. S. General Aprraisers who allowed free entry. Now the higher court is appealed to for a third opinion as to the intent of the law makers.

The blunder is more notable because the language of former tariff acts was an ample guide, clearly emphasizing the need for unequivocal diction. The act of 1897 provided free tnry for waste "It only" to be converted into paper. The corresponding paragraph in the 1909 act extended free entry to waste "used chiefly" for paper making.

With these provisions in the old law, it seems as though intelligent revision would have been simplicity itself. But with their fatal gift of blundering the Democrats seized upon and inserted "suitable" in the law, the one word that neither customs officials, lawyers or business men affected could understand, and which rendered imperative the litigation now in the courts before the statute can be finally enforced.

NEWSPAPER SCENTS DANGER TO AUTOISTS

Yesterday's Oswego Times believes that in this city employing a motorcycle-cop to command a reasonable amount of the respect due the average citizen by autoists, the city is once more setting a speed trap.

The Oswego Times says:

"According to The Fulton Times that city has again prepared to welcome the auto tourists for the summer of 1915. The speed traps have been set and baited on all thep rincipal thoroughfares of the city and the police force and city judge are all ready to act as a reception committee. "Welcome to our City" will be accompanied with a fine of $25 more or less with the alternative of a number of days' free entertainment in the county jail.

"The police have a nice new motorcycle and the cops have been practicing running starts thereon. It has been planned that the motorcycle cop shall beu niformed in the conventional khaki of the ordinary motorcyclist so that the automobilists will not suspect they are being sleuthed."

From the above article it appears that Oswego autoists would have this city open its gates to the hogs described so effectually by Justice De Angelis the other day in Utica.

THESE THINGS ARE DONE IN SOME STATES

Sorority girls at the University of Colorado have tired of sewing socks for soldiers. They are going to help local needs and have turned their spare moments to sewing dainty "track trousers" for the varsity track team. Fifty such garments are being made and several of them have been finished and presented to the stars of the team. Many of the fair co-eds could not refrain from putting dainty touches on their creations, with the result that a lot of perfectly good lace and ribbon has been strewn around the campus by the less appreciative athletes.

AT THE QUIRK TODAY

In "The Naked Truth," which appears at The Quirk today the story is laid in the Latin Quarter of Paris, where lives Lolette, who is known throughout the artists' colony as the handsomest girl in Paris. She poses ony for Armand Bouchard, a mediocre painter who befriended her when she was left a penniless orphan several years before. Under Bouchard's humble roof she lives the life of the Parisian studio dweller, happy and content, the idol of her benefactor.

In those early days before success touche Pierre's palette with its golden promise, when they fought life's bitterest fights with the invulnerable weapons of youth and hopefulness, love smiled into the little studio and ambition blossomed under its warmth.

Material success is the wayward companion of love. In altering life, it alters the heart, dries up the springs of quick sympathy and makes of sacrifice an abstract virtue. Gradually, Pierre forgot Lolette and the part she had played in step to fame. Wealth left Lolette untouched; Pierre, it blinded.

GIVES VACANT LOT AS SCHOOL PLAYGROUND

Miss Margaret Green has kindly given the use of her vacant lot in Park st. to the State St. school children for a playground. The plot has been graded and rolled and tennis and basketball courts will be laid out at once. The playground should be open for the use of the children some time next week.

A school basketball leageu has been organized, comprising one team of teachers and two teams of students.

The boys and girls raised money to fit out the grounds by holding two candy and pop-corn sales recently in the school builling and several public-spirited residents of that section have voluntarily contributed money to the fund.

The teachers will supervise the play, ground and the different classes will be allotted certain lays on which they may use the grounds. The State st. suhool also supports a baseball team which figures prominently in the school league.

WILLIAM McCORMICK DECLINES TO SERVE ON COMMITTEE

William E. McCormick, who was appointed by Mayor Fox as one of the members of the City Planning Commission, announces he has declined to serve.

The Committee was recently formed by the Mayor.

EDGELEY IMPROVING

Clinton Edgeley, the young man who was seriously injured in a motorcycle accident at Bundyville last week, is improving slowly at the Lee Memorial hospital. Yesterday he regained consciousness for almost an hour and this morning his condition is reported as greatly improuel. His speely recovery is anticipated.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 26.—Delegate George E. Green of Binghamton has come to the aid of the veterans of theh Civil War who are State employees and who are seeking pensions. He has introducted a proposed amendment to the State Constitution which seeks to provide pensions for such veterans who have been employed by the State for ten years or over and are under Civil service regulations. In addition the veterans must be at least seventy of age. The pensions are to amount to one half of the wages received prior to retirement.

For two years there have been bills introduced in the legislature practically identical with the Green Constitutional amendment but for one reason or another the proposition hahs failed either to pass both houses or to receive the approval of the governor.

There are about fifty veterans employed by the State who would come under thep rovisions of the Green proposed amendment and because of proposition should be adopted. It is the small outlay it is argued that the further declared trat a pension of half pay is but a small recognition of the old soldiers who at the age of seventy are hardly strong enough to fulfill the requirements of the offices which they occupy.

Another argument used is that it would be an act of injustice to discharge an old soldier for incompetence yet to retain him would mean that the efficiency of the department in which he is employed would necessarily be retarded.

It is specifically set forth in the Green proposed amendment that in no case shall the pension exceed the sum of one thousand dollars; this means that the State would be required to pay out each year not more than fifty thousand and probably a sum considerably less as there are a number of veterans employed who do not receive a salary which is as large as two thousand dollars.

During ther ecent session of the legislature Assemblyman Seldon C. Coldbridge of Herkimer county, himself a veteran of the Civil war, championed the pension bill for old soldiers. He declared that it was astonishing how little the well being of the Civil war veteran was being considered in this State and in other States.

There have been presented during the present Constitutional Convention several proposals seeking to place veterans of the Spanish American war on the same footing as Civil war veterans both as regards civil service preference and other privileges, but it is forecasted that this result is not likely to be affected. Several legislatures have passed the proposition by.

That patroitism was by no means lacking in the "sixties" and that youth was more enthusiastic than maturity, if anything, it is pointed out that of the vast armies recruited in the North, 104,987 were boys fifteen years old and younger; 231,051 were sixteen years and under; 1,151,438 eighteen years and under and 2,159,798 were between eighteen and twenty-two years of age. It is also a fact that there were 1,523 youths in the ranks who were under fourteen years of age and 300 thirteen years of age and under. The youngest recruits were ten years and under of whom there were 28 while 38 were eleven years old and under.

It is the hope of Delegate Green that his proposed amendment will prevail. He is confident that if adopted by the Convention it will be ratified by the people at large.

REFEREE IN ACTION FOR BREACH OF CONTRACT

Attorney G. S. Piper acted as referee yesterday in an action of the D'Olier Co. of New York vs. the Hayes Knitting Co. of Oswego, to recover $5,000 for alleged breach of contract in the purchase of a lot of yarn.

The defendant denies the alleged breach and claims that the goods were not furnished in accordance with the terms of the contract.

Cincinnati's Leader Intends to Let Umpires Rule From Now On.

Manager Charley Herzog of the Cincinnati Nationals says he is through umpire baiting. The Reds' pilot recently had a fist fight with Umpire Rigler in St. Louis and was set down for five days by President Tener. In talking about the affair recently Herzog said:

"I had made up my mind when the season started out not to be put out of

Photo by American Press Association.

MANAGER CHARLEY HERZOG OF CINCINNATI.

a game this year. The recent incident was quite out of the ordinary and was due to Umpire Hart not seeing the play, which should have been decided by him. I was justified in questioning Rigler's decision, under the circumstances, but all I get is the worst of it. I will have no more trouble with the umpires and will be in every game from now on unless kept out by injury."

KRAMER VETERAN CHAMPION.

World's Greatest Cyclist Has Held Honors For Fifteen Years.

Since the passing of Jack Johnson, Frank Kramer, the world's champion cyclist, is the only one of the old champions now remaining in any line of sport. Kramer is now upon his fifteenth year in the bike game, and if his present condition is any criterion he will retain his title another year.

Kramer is without doubt the cleanest living athlete in the world, and it will be a long time before old Father Times grabs the East Orange, N. J., boy.

Kramer is thirty-five years of age and has been riding a bicycle for seventeen years. Dissipation of any kind is a thing not in Kramer's repertoire.

Numerous foreign champions have been imported to this country to take Kramer's measure; but all have failed. This year Francisco Verri and Caesar Moretti of Italy, along with Therwald Ellegard, the Danish champion, will attempt to wrest the honors of the cycling championship from the American rider.

GERMAN AIR RAID ON PARIS A FAILURE

Paris, May 26.—Describing the defence of Paris from two German aerial raiders by six French aeroplanes, an official statement issued here last night gives details of a stirring chase in the air. The statement follows.

"Two German machines were signalled at various points by cannonading. This warned the Paris Aero guard that enemy machines had broken through the frontier patrol.

"As soon as the machines appeared French aircraft gave chase. When the enemy saw the city so fell protected they turned tail and escaped over the frontier."

LEROY BOYCE

Leroy, the year-old son of Mr. and Mrs. Leroy Boyce, of 568 West 1st st., died at his home early this morning after a short illness with pneumonia.

The funeral will be held tomorrow afternoon from the home at 1.30 o'clock anl the Rev. C. C. Olmstead will officiate. The burial will be made in the Ira Union cemetery.

Nothing ever feazes the Washington newspaper correspondent. He can write guests about Germany's replay as fluently as he discusses presidential possibilities.

Hanford's Balsam is an antiseptic and germ killer.

Saratoga's springs have been rehabilitated, and it looks as though Saratoga's former glory as a summer resort might be restored in part this season.

WILLY'S FANS TO HAVE FUN

McGraw and Jennings to Give Toledo Plant Another Real Treat

Overland Day, June 21, when the New York "Giants" and the Detroit "Tigers" journey to Toledo to give 11,000 employes of The Willys-Overland Company their annual baseball festival, will have considerably more than local interest for the sporting world.

At his personal expense John N. Willys, president of the Overland Co., will bring the two big league teams together for the first time in baseball history. Managers McGraw and Jennings have both promised that their teams will take the field with their full playing strength and that the Overland fans will see the two famous teams at their best.

Although the Overland employes are the most important guests on this occasion, there will be present, also, Ban Johnson and John Tener, presidents of the American and National Leagues, Vice-President Daly of the New York Cetral Lines, and a number of other men whose names are prominent in business and financial affairs. It is the intention of Mr. Willys to run private train from New York to Toledo for the accommodation of hisg uests.

This is the second year that Mr. Willys has arranged for two major league teams to play in Toledo during the regular league season in order to provide his employes with an afternoon's recreation. Last year the Philadelphia "Athletics" and Chicago "Cubs" furnished an exhibition which attracted widespread attention.

While the American Association team was in Toledo, it was the custom of the Overland Compay to close up the big factory for an afternoon and send all employes to one of the games early in the season. On this occasion Mr. Willys purchased the entire allotment of seats in order to provide room for the army of automobile builders. Last year, when the "Mud Hens" were transferred to Cleveland, it was decided to give Toledo a glimpse of real big league ball. This year, negotiations of the same sort have been successfully carried out.

The big Overland factory will close at noon on the day of the game. A giant parade with all of the Overland fans in line will form at the factory shortly after, and headed by the Overland fifty-piece band, will march to the ball park in ample time to see the preliminary practice of the teams. Seven brass bands, as well as the Overland Glee Club of seventy-five voices, will help enliven the occasion.

MACHOLD WANTS TO RETURN TO ALBANY

Watertown, May 26.—H. Edmund Machold assemblyman from the first district, living in Ellisburg, is anxious to again return to the Assembly. He has served four terms at Albany, being re-elected last fall by an increased plurality.

Recently a number of church Brotherhoods in the city adopted resolutions against Senator Brown and Assemblyman Machold.

Transformation

By ESTHER VANDEVEER

When Colonel Bankhead of the British army went to fight with the allies in Belgium his daughter, Gladys, insisted on going also to the front as a nurse. The colonel endeavored to persuade her, but she was a girl of strong will and strong character, and his objections proved futile.

About the time the war broke out Thomas Faxon, an American, came of age. His mother, a widow, had previously had the whiphand of him, for his fortune had been left to her in trust for him until he should attain his majority. Meanwhile Mrs. Faxon continued to regard her son as a child, and when he was twelve years of age he was in care of a nurse who the moment he started in for some boyish sport that would soil his clothes or by which he might possibly get hurt would clap her hands on him and drag him away.

Tommy, as he was called, while he occasionally rebelled against such treatment, could not help being lamentably affected by it. Indeed, so maidenly did he appear that no one would suspect there was a spark of manliness in him. However, Tommy became the possessor of his estate just before the war broke out abroad, sniffing the air of liberty and of battle at the same time. He resolved to go abroad and see what was going on. So accustomed was he to obeying his mother that it was with great difficulty that he broke away from her, but once the breach had been effected he struck out with what manliness there was naturally in him, mingled with the feminine effects of his training.

One day Tom turned up on the northern coast of France occupied by the English army. He told a soldier that he wanted to enlist. The man looked at the immaculately dressed Tommy, with difficulty repressing a smile at his spats and kid gloves, and pointed to the quarters of Colonel Bankhead. Tommy proceeded there and found the colonel with his daughter, who was in Red Cross uniform.

"I want to be a soldier," said Tom.

The colonel looked at him in surprise, asked him if he knew anything about soldiering and when answered in the negative told him he had better go to England and enlist there to be trained. This didn't please Tommy, and he declined the advice. Then spoke up Miss Bankhead:

"I think the gentleman would be of more use as a Red Cross nurse."

Now, Miss Bankhead was a very comely young woman, and Tommy, who was like a bird that had just left the paternal nest, was ready to wing in any direction that pleased his fancy.

"Thank you very much," he said, with a low bow. "Can you tell me where to go to work?"

"Come with me."

When Tommy was put to work nursing the sick and wounded it was remarked that he should don the uniform of the women nurses. It was laughable to see him perform his duties, but in time he grew accustomed to them, taking his instructions from Miss Gladys, with whom he at once became violently enamored. She laughed at him, but at the same time soothed him.

With the first fight that came on after Tom joined the Red Cross he was sent forward with others of the corps to pick up the wounded. While doing so a hailstorm of bullets swept the field, and every man of the corps sought cover. Tom was at the time ministering to a youngster of eighteen who was badly hit. Since he was looking in the direction from which the bullets came Tom did not see that he was the only nurse left on the field. Then, turning and seeing what had happened, he took the wounded boy in his arms and started with him for cover.

Now, the soldier weighed pretty nearly as much as Tom, and Tom staggered under the load. The boy begged his rescuer to drop him and save himself, but Tom staggered on amid the storm of bullets and finally entered the British lines in no worse condition than a bullet in the fleshy part of his leg, from which streamed the red blood.

Tom put down his burden and, not heeding a cheer that greeted his feat, turned fiercely toward the enemy. Near by he saw a regiment sallying forth on a bayonet charge.

"I want a gun!" cried Tom, the hot blood boiling in his veins. "Where can I get a gun?"

"Take mine," said a wounded soldier.

Tom seized the piece and ran like a deer to the advancing regiment and fell into its ranks. When he came in from a bayonet charge he was carried part way, being faint from loss of blood flowing from a wound of which he was ignorant.

Such deeds usually become quickly known. Miss Bankhead heard of Tom's exploit and reported it to her father, the colonel. Tom soon stood upon his legs again and was ordered to report at regimental headquarters.

"You have accomplished a feat," said the colonel, "worthy of the Victoria cross. Enlist at once if you choose, and I will recommend you for a commission and the cross as well."

"I don't care for the cross, colonel," said Tom. "I want your daughter."

"We will see about that at some other time."

But Tom and Gladys found time to plight their troth, and Tom became a captain in the defense of Calais.

But the Price Had a Shade the Better of the Flavoring.

"I don't kick at having to pay good prices," an irate patron of high priced restaurants was saying yesterday, "but, I ask you, isn't $1.50 for garlic rather strong? As for me, the recollection almost makes me weep.

"I was giving a dinner for six last night, and as a part of the dinner I ordered two racks of lamb. The price on the carte du jour was $8 a rack. That's pretty high, but these are high times. I have a great opinion as to the merits of a dash of garlic in cookery, so to the waiter who took my order I suggested that the dish on which the lamb was to be served should be rubbed with garlic, as one frequently does in making a salad.

"When the bill came the item for the racks of lamb was not $16, but $17.50. The waiter could not explain the increase. I called for the head waiter. He went to the checker and came back.

"'The rack of lamb plain would have been $16,' he explained. 'The extra $1.50 was for the garlic.'

"One cent would have covered the cost of the garlic, and another cent would have covered labor and all overhead charges. I figure that the profit to the house on that garlic was 7500 per cent."—New York Times.

MAN AND BREAD AND DONKEY

A Daily Spectacle In Spain Between Alcala and Seville.

Bread made in Alcala, Spain, is of such exceptional goodness that the village is famous throughout the country as "Alcala of the breadmakers." Each loaf is carefully stamped with the trademark of the town before baking.

An early train leaves Alcala daily for Seville, and before daylight long lines of pannier laden mules begin to arrive from all directions. At the station the panniers are removed and placed in freight cars, the donkeys being driven into similar cars, and mules, drivers and bread are all transported by train to Seville.

Here amid scrambling, hallooing and shrill cries the animals are unloaded, panniers adjusted, and the bread sellers go forth into the streets of Seville, calling their wares and boasting of the fineness of the Alcala bread. They return at midday, pack their empty panniers into the cars, drive in the mules, light their cigarettes and enter the third class carriages to be taken back to their home town, ready for the following day's trade.

A charge of 18 cents is made by the railway company for the round trip of donkey, man and bread.—Argonaut.

Scotch Dogberrys.

The simplicity and ignorance of the rural Scotch magistrate often quite equaled that of the English, immortalized by Shakespeare in Dogberry, and here are two examples, quite in the true Dogberry vein.

"That is a most tragical event which has just happened," said a friend to Baillie Blank. "Your neighbor, Mr. B., has committed suicide."

"Wha on?" inquired the baillie eagerly.

Perhaps it was he—it was certainly another Glasgow baillie—who, his health being proposed at a banquet in honor of his recent dignity, responded nobly to the toast:

"I canna but say, ma friends, that I'm proud of the honor of being made a baillie of this great city, and I'm even, I think, entitled to the honor, for I've gone through all the various stages of degradation that a baillie has tae dae tae reach it."—Youth's Companion.

His Quaint Suggestion.

A Frenchman who appears to have been of a thrifty turn of mind conceived the idea in 1878 that too much valuable time was being wasted in cleaning sardines when preparing them for the market. He found a way of preparing them without cleaning them, and on this he took out letters patent. Apparently he had some slight misgiving as to whether the public would be perfectly suited with his invention and so in his claim he makes this parenthetical entry:

Fish put up by this process may be slightly unpleasant to the customer at first, but he soon gets used to it.

First Moving Pictures.

The first moving picture machine was patented in 1867. In 1893 the cinematograph was produced by Lumière. This was the first machine to project on a screen pictures from a film. Edison improved upon this machine in 1896, when he produced the vitascope. These machines provided the models for the improved types in use today.—Philadelphia Press.

Women.

"Women are dreams," murmured the sentimentalist, gazing on a group of them in silk attire.

"You bet they are," the practicalist snapped back at the murmureus one, "and dreams go by contraries, all right."—Judge.

Not Enough.

Betty Goldust—Did you have a satisfactory interview with papa? Jack Brokeleigh—Not very. He said all he could give us was his consent.—Philadelphia Record.

Entente Cordiale.

The phrase "entente cordiale" was first used to express the friendly relations existing between France and England in 1843.

The greatest mistake is to become discouraged because you have made a mistake.

PART

By WILLIAM CHANDLER

"Mr. Kenworthy," said Mrs. Middleton when that gentleman appeared for her dinner party, "before we dine I wish to speak a word to you about the young lady I have assigned to you for a dinner companion. She has a mild form of insanity, or rather monomania. She fancies that every man she meets is in love with her, and no matter what he says she considers it a proposal of marriage. But don't be alarmed; the next day she forgets all about it."

Kenworthy assured his hostess that he would excuse the young lady for anything that might occur between them, and she left him to attend to other matters connected with her dinner party, without giving him any other information about the young lady he was to take out to dinner, not even mentioning her name.

At the last minute the sudden indisposition and regrets of an invited guest rendered a change in the arrangement of the couples necessary. When dinner was announced Kenworthy had not been presented to the lady that had been assigned him for a dinner companion. The procession had started for the dining room when a sister of the hostess hurried toward him and, leading him to a young lady sitting by herself, introduced him. He bowed, crooked his arm, and the two formed the last couple to take their seats at the table.

Among the changes made was Mr. Kenworthy's dinner companion, and in the hurry the card bearing the name of Miss Bliss, beside whom he was to have sat, had not been changed for that of Miss Steele, the lady who had been assigned him in her stead. Miss Steele glanced down at the card on taking her seat, and a strange look came over her face. Then the corners of her red lips quirked upward, and a mischievous look came into her eyes. Kenworthy, too, gave a quick glance at the name and opened conversation.

For three hours the guests regaled themselves with Mrs. Middleton's table delicacies, and Miss Steele had ample time to win Mr. Kenworthy's good opinion, to say nothing of his admiration. During the early part of the dinner he was quite troubled lest she should construe something he said into a proposal of marriage, but about the time the game was served he began to think that he wouldn't mind it much if she did. Then he became curious as to what she would consider a proposal, and lastly he began to put forth certain tests. Pretending a mistake, he took up the glass of wine before her and sipped it, remarking at the same time that it must be a different brand from what he was drinking, for it tasted far sweeter. The supposed Miss Steele dropped her eyes, but said nothing. This started a succession of delicately turned compliments on the part of Mr. Kenworthy, to all of which the lady listened with apparent emotion.

It is the nature of the small boy to see how near he can skate to an air hole in the ice without breaking in. Urged on by a similar impulse, Mr. Kenworthy proceeded to see how far he could talk "soft" to the monomaniac without making love to her. The basis of his investigations was curiosity. If he had become infatuated with her in so short a time he was not aware of it. The dinner came to an end, and on retiring from the table Miss Steele led the way to a window seat quite apart from the other guests.

"Mr. Kenworthy," she said, opening and shutting a fan she held in her hand as though struggling with some deep emotion, "I confess that the period of our acquaintance has been very short. Nevertheless I believe in quick love. I have always felt that I could recognize my mate instantaneously and my mate would recognize me as quickly. The flattering words you have spoken to me have convinced me that I am not mistaken in believing that you have honored me with your love, and I am sure you would not have given me to understand that you love me without proposing marriage."

Mr. Kenworthy had skated too near the edge of the air hole and had tumbled in.

At the same moment Mrs. Middleton approached the couple with a young lady beside her.

"Mr. Kenworthy," she said, "I wish to present you to Miss Bliss, who was to have been your dinner companion had not regrets from one of my invited guests caused a change at the last moment."

Kenworthy alone noticed the twinkle in the eye of Miss Steele as she gave place to Miss Bliss and walked away with the hostess. The next morning Miss Steele received a note from Mr. Kenworthy regretting the interruption of the night before and begging permission to call upon her for the purpose of making arrangements for their wedding. Miss Steele laughed heartily and replied that she had no remembrance of anything that had occurred to warrant Mr. Kenworthy's assumption, but she would be happy to see him as a valued friend.

Mr. Kenworthy spent a year trying to induce Miss Steele to marry him, but failed. It was reported that at the time of Mrs. Middleton's dinner party she was as good as engaged to the man she married, but friends who heard the story of her playing monomaniac said she was not quite so mean as that.

HANNIBAL NEWS

Mrs. W. D. Cowles spent last week at the home of Mrs. Benjamin D. Smith at Utica.

Miss Belle Brackett was called from her work in Syracuse last week to care for her sister, Miss Eva Brackett who is ill.

Mrs. Betsy Wright is ill. Dr. Gale was called Sunday.

Mr. and Mrs. Smith of Oswego are working for George Dersolf.

Miss Martha Hines of South Hannibal is visiting her uncle, James Allen and family.

Health Promotes Happiness

Without health, genuine joy is impossible; without good digestion and regular bowel movement you cannot have health. Why neglect keeping bowels open and risk being sick and ailing? You don't have to. Take one small Dr. King's New Life Pill at night, in the morning you will have a full, free bowel movement and feel much better. Helps your appetite and digestion. Try one tonight.

MT. PLEASANT

The W. F. M. S. have postponed their June meeting at Mrs. Rockwood's from the 2d until the 9th, so the children could attend. This is the annual children's day in the society and children are especially invited. Mrs. Albert Paddock is preparing an interesting program for their benefit. Supper will be served by the following committee: Chairman, Mrs. Sidney Austin; Mrs. Hattie Grant, Mrs. Lillian Grant, Mrs. Hattie Foster and Mrs. Rockwood. Don't forget the date and be sure to come.

The announcement is made of the marriage of Miss Ruth Bartlett, daughter of Monroe Bartlett, and Amos Dubois, jr., both of this place, by the Rev. George Ward.

Mrs. Milton Graves is ill.

Mr. and Mrs. Samuel Wright are located in their new home on East Broadway, Fulton, where they will be pleased to meet their friends.

Mr. and Mrs. Irving Bartlett of Michigan announce the birth of a son.

Mrs. Hannah Austin of South Granby is visiting relatives here.

Edward Durfey has taken a position as foreman with Hartwell & Co., on the roads near Watertown.

Edward Kellar and W. Baldwin each lost valuable young horses last week.

Mr. and Mrs. Mark Osborne spent the week in Oswego the guests of Mr. and Mrs. Glen Van Buren.

Fred Spink has been very busy this spring putting up new stones in the cemetery. He does his work well and is entitled to local patronage; most of which he gets.

Fred Osborne has been remodeling the interior of his residence and Duane Streeter has improved his with a coat of paint.

Charles Porter can attest to the benefits of osteopathy for autoback if it is at the hands of the Elder and Justice of Peace.

The L. A. S. met at Mrs. Stillman Hill's on Wednesday of last week and re-elected the officers of the past year, after which the President, Mrs. Howard, appointed Mrs. Grace Rowlee, flower committee, in place of Mrs. Paddock. Joe. Salladid brought an auto load from South Scriba to supper.

Rev. Williams preached an exceptionally peaceful sermon Sunday to the veterans and a full church of visitors. Mr. O. Cole was able to meet with the veterans and gave the glad hand to many.

The L. A. S. has had the parsonage roof painted and several rooms papered.

Mrs. Jane Pearsons is the guest of relatives here.

Mr. and Mrs. Delbert Osborne and family of Constantia called on relatives here recently. They made the trip by auto.

Mr. and Miss Gemran of Fulton were week-end guests at Edward Durfey's.

Margaret and Everet Pearson were guests at O. Coles over the week-end.

PALERMO VILLAGE

While workig in G. D. Trimble's cheese box factory on Monday, Frank Marshall was caught by a pulley and drawn into the machinery, breaking his left arm in three places and injuring him very badly. Dr. Fox of Fulton and Dr. Gale of this place, were called to reduce the factures.

Mrs. Carmine Millard and daughters, Ruth and Delma, of Meridan, Oklahoma, came last week to remain the summer with her parents, Mr. and Mrs. Charles Marshall and family.

Mrs. Margaret Burhaus of Mexico has been the guest of friends in this place the past week.

Frank Hills of Phoenix was the guest of his mother, Mrs. Mary Vincent, a part of last week.

J. Max Vincent was the guest of his sister Mrs. Isaac Poole, of Oswego last Wednesday.

The Palermo Grange will hold a mystery social at Trimble's hall on Saturday evening, May 29, an entertainment will be given and a mystery supper served.

BUNDY'S CROSSING

Mrs. Samuel Graham and daughter, Goldia, of Battle Island, called on Mrs. Jane Wells on Monday.

Mrs. Alice Adams went to work at Minetto on Monday morning.

Mrs. Bryon Wells and daughters called on Mrs. Samuel Graham on Monday.

D. E. Wells and Bryon Wells and C. J. Euhard were in Fulton on Monday.

Misses Bertha and Lizzie Eshard have come home to remain for the summer.

Miss Goldia Graham spent one day the past week with friends here.

Mr. and Mrs. James Stevens, Mr. and Mrs. Ula Adams, Mr. Norman and Gordon Dodge, Mr. and Mrs. Edward Echard went to Fulton by auto.

George Echard and daughter, Pauline, Mr. and Mrs. Charlie Pevey and daughter, Mr. and Mrs. Benjamin Congdon were in Fulton on Saturday.

Our cemetery is being cleaned for decoration.

Mrs. Della Waugh has been called to Futlon on account of the death of her sister.

Charlie Brown went to Battle Island on Sunday.

Walton Adams does not improve in health rapidly.

Mr. and Mrs. C. J. Echard and family and Mr. and Mrs. Edward Echard and daughter were in Oswego on Sunday.

Mr. and Mrs. Ula Adams called at C. J. Echard's Sunday.

Mr. John Lynch of Cortland was in this place on Sunday calling on his friends.

Walter Adams's friends regret to hear he is advised to have another operation performed.

Mr. and Mrs. Rowlee of Battle Island spent Sunday with their son, Melvin Rowlee.

Seven wagons of gypies went thru thisp lace on Sunday.

Mr. and Mrs. R. Dumont called on Mrs. Ray Frost on Sunday.

Mr. and Mrs. G. Rickert spent Sunday with her parents.

BERNHARDS BAY

William Marcellas of Constantia has hung paper for Mrs. Clayton Winn.

Mrs. R. J. Raymond and Mrs, Frank Winn were in Cleveland Tuesday.

The B. B. Grange has had the scales reset they purchased some time ago.

George Sickles and E. Deely are working for the railroad company.

Mrs. William Wood, Mrs. E. Deline and Mrs. Cecil Pierce spent Thursday at Constantia Center with Mrs. R. Woolridge who has been ill for some time.

Cecil Pierce and Walter Wood spent Thursday fishing at the Francis pond.

Mrs. D. Bailey spent several days of last week in Oneida.

Mrs. Archie Short and son left Thursday night for Syracuse on their way to Smithport, Pa.

Mrs. Kate Pickens returnd Wednesday night from Syracuse; she has been with her daughter, Mrs. J. Hill.

Mr. and Mrs. George Deno have returned from Wilcox, Pa.

The North Shore Sunday school convention is to be held at Constantia Center June 5.

A cold water plunge is highly recommended for the benefit of health and a prominent young man of our town tried the experience Monday night when he tried to explore the bottom of Scriba creek, making his high dive from the stone wall near the bridge. Some of his friends think that he did not do this for the benefit of his health but that he got tired of this life and was going to end it all in the deep waters of Scriba creek. Finding that the water was not deep enough for this kind of a job he changed his mind and walked ashore. He was helped out of the water and up the bank by another prominent man of the town, who it is understood, will apply for a medal.

Miss Lula Taft has been engaged to teach school the coming year.

Mrs. Clarence Row of Constantia Center spent Friday with her sister, Mrs. William Wood.

The church and society will meet with Miss Mary Beach at the Dickerson homestead Thursday afternoon, May 27th. Everybody cordially invited.

Rev. R. W. Conklin, former pastor of the church here, and family are now located at Ridgburg, N. Y.

Miss Mary Beach was in Oneida last Tuesday.

The mill is running most of the time now.

JENNINGS—JACOBS

At 5 o'clock Saturday afternoon, Charles Jennings of this town and Mrs. Mable D. Jacobs, daughter of Mr. Frank E. Dickson also of this town, were married by Rev. William H. Yard at his residence; in Oneida. They were attended by Mrs. Clarence Batchlor, daughter of the groom, and Miss Elizabet Dickerson, sister of the bride.

The bride was attired in a gray traveling suit with hat to match and carried a bouquet of pink and white roses. Immediately following the ceremony the bridal couple left for Syracuse, where they remained until Monday.

The bride is an ardent church worker and an accomplished woman in every respect. She has lived in Oneida for the last six years and was born on the farm upon which she now takes up her residence. The many friends of both bride and groom extend the heartiest of congratulations, wishing them many years of prosperity and happiness.

THE HOUSEWIVES' BATTLE.

The Buzzing Fly One of the Deadliest of Insects.

This is the time to begin your warfare upon the fly and precautions taken now are worth all sorts of preventives later on. Every fly that you see buzzing through your rooms and allow to live may breed millions, each one of which may in turn breed millions more. Very often a housewife will not take the bother to chase a single fly, whereas if her rooms were filled with any number of them she would start a clearance at once. If she could only realize that the numbers would never be there if she killed the single one perhaps she would exert herself more at the first glimpse of the dreaded pest.

The spring of the year is the breeding time for flies. In another month, for every single fly that you allow to live today you will find hundreds of thousands. Let that sink into your mind thoroughly. That first fly you just saw buzzing about in the sunshine —look through and beyond that single fly and see its thousands and thousands of progeny. Don't you think you will save time and trouble later on by killing that single fly now?

Swat the fly! Let this be your slogan if you wish to keep your household free of sickness and disease this summer. Teach your children to swat them too. They will do it gladly if you will just arm them each with a weapon which looks very much like a miniature tennis racket made out of flexible wire, and turn them loose in the rooms. They will make a game of it and will clear up all the flies in sight.

SWAT THE FLY.

NEW JERSEY DELAYS WOMAN SUFFRAGE.

Legislature Passes Woman Suffrage Bill, but Ties Up Votes For Women For Another Year.

Hope had run high with the women of New Jersey that the object of their arduous labors would be attained with this legislature and the ballot would be put into their hands. Partly they were satisfied, but not wholly. The bill granting the vote to the women of New Jersey was passed, but with a string tied to it. Instead of the bill introduced by Assemblyman Peacock, setting the date of the special election on proposed amendments at Sept. 21, a substitute bill by Assemblyman Read, which set the date of election at Oct. 19, the last day for registration previous to the fall elections, was the one which was passed. If the woman suffrage amendment is ratified by the popular vote this fall the women will not have an opportunity to vote for at least another year. New Jersey papers have been loud in their deprecation of what they call the "trick played the women."

Modern Buildings.

Probably not one out of every 10,000 buildings standing in all parts of the world and built by modern masons will be standing 500 years hence. We do not know how to put stones and bricks together as the ancients did, and consequently the buildings we raise nowadays are really mere temporary structures and will be in ruins when the ancient buildings of Greece and Egypt, built thousands of years ago, are in as good condition as they are now.

Programs for Commencement Exercises printed at The Evening Times office. adv.

OSWEGO POMONA GRANGE MEETS JUNE 8th

Dinner and supper will be served by Parish Grange.

For wire cuts, stings, lameness, swelling and other external ailments of horses and cattle, apply Hanford's Balsam to cleanse and heal. Having a bottle on hand may mean saving the life of a valuable animal.

WENT DOWN WITH FUNNEL.

Philadelphia Man Tells of Miraculous Escape on Lusitania.

Samuel M. Knox of Philadelphia, who was on the Lusitania, gives this account of his escape:

"When it was certain the liner was sinking I went overboard at once and attempted to get clear of the ship which was coming over slowly. I was caught by one of the smokestacks and carried down a considerable distance before being released.

"On coming to the surface I floated about for a considerable time, when I was picked up by a life raft.

"This raft, with others, had floated free when the vessel sank and had been picked up and taken in charge by Mr. Gauntlett of Washington and Mr. Lauriatt of Boston, who picked up thirty-two persons in all. It was equipped with oars, and we made our way to a fishing smack about five miles distant, which took us on board, although it was already overloaded."

STARCHED COLLARS USED.

Starched linen and pique collars are attractive below round, youthful faces, but they are hopelessly trying on thin faced women and on women past the freshness of youth. With these childish collars are worn knotted ties of soft silk in striped black and white or dotted black and white effects, or of crepe de chine in sombre shadings. The effect with one of the new mannishly tailored suits is very smart, indeed, but women of mature years do best to confine themselves to a more formal type of collar of handkerchief lawn or batiste touched with a little hand embroidery or finished with hemstitching. A collar of this sort, however, must turn over on the dark tailored coat to give it the correct air.

VAN WAGENEN, Inc.

We Wish To Call Your Attention

FIRST TO THE

Overland

Which, of course, is too well known to need much comment

WE ARE HEADQUARTERS FOR

Automobile Supplies and Tires

We will help you to *"Trade at Home"* by guaranteeing all tire prices against those quoted by Syracuse dealers.

Ford sizes, guaranteed 3,500 miles, Front Shoe, $8.10; Tube, $2.10; Rear Shoe, $10.40; Tube, $2.40.

No matter whether you buy your car from us or not we want to sell you your supplies and will guarantee satisfaction on everything you buy or will refund your money.

OUR GARAGE

is at your service with a competent foreman in charge. We also do VULCANIZING and GUARANTEE all work. You need not send tires out of town—we will fix them.

We have several LIVERY cars always ready. Holiday trips to Syracuse, Auburn, Rochester and a dozen other cities are popular, and the prices are very reasonable.

Children Cry FOR FLETCHER'S CASTORIA

WHAT THE STATE MUST PAY; AND WHY

Governor Whitman Submits His Action on the Appropriation Bills to the Taxpayers

When He Took Office the Finances of the State Were Exhausted—Today the State Is on a Business Basis—Every Appropriation Approved Represents a Necessity.

"WHEN I took office I found the finances of the state exhausted through failure of the previous administration to provide means for the payment of its obligations and the state departments hampered and embarrassed by the further failure to make proper provision for their maintenance and operation."

The above quotation from the memorandum of Governor Whitman, filed with his action on the appropriation and reappropriation bills, summarizes succinctly the conditions that confronted the Whitman administration when it took over the government of the state on Jan. 1.

How it has dealt with these conditions, provided for the payment of obligations incurred by its predecessor, restored orderly government and put the state squarely on a business basis is set forth in sufficient detail for the understanding of every taxpayer.

The memorandum takes up the suggestions made to Governor Whitman for avoiding a direct state tax one by one and shows conclusively the fallacy of each.

The entire subject of appropriations is gone into so thoroughly as to make it readily understandable to any one who cares to inform himself. The memorandum is in marked contrast to the pleas for avoiding a direct tax and the criticisms of the administration for its policy of clearing up the debts which it found in that it is simple, direct and convincing. It omits half truths and insinuations, states simple facts and states them plainly. The memorandum in full follows:

Albany, May 22, 1915.

I have vetoed items to the total amount of $2,565,380.43 in the appropriation and reappropriation bills submitted to me by the legislature. In order to arrive at a conclusion as to my action on the thousands of items included in these measures I have held many public hearings at which department heads and other officers of the state, representatives of the governments of the city of New York and other cities of the state, and of civic bodies, were invited to attend. My action in every instance has been governed by the facts which have been laid before me as to the necessity of the appropriations sought. When I took office I found the finances of the state exhausted through failure of the previous administration to provide means for the payment of its obligations, and the state departments hampered and embarrassed by the further failure to make proper provision for their maintenance and operation.

Either because of ignorance of the actual situation or deliberate intent to shield the previous administration from criticism the sponsors of that administration have furnished the public press with statements which, were it not for the possible effect on the minds of the persons who read them, might properly be ignored.

Appropriations Represent Necessities.

I wish here to set forth as definitely and as concisely as possible my answers to the criticisms that have been raised. In the first place, I wish to assure the people of the state that the appropriations which I have approved represent necessities that are actual and that the total of these appropriations, no matter what the amount, gives opportunity only for carrying out the functions of the state with decency and the maintenance and protection of structures, canals and highways against wasteful deterioration.

In addition to the misinformation as to the appropriation needs of the government, there has been an equally vigorous campaign of misinformation waged with respect to the source from which these appropriations shall be paid. For instance, in order to avoid provision for the annual interest and sinking fund charges of the state the governor and the legislature have been asked to violate the constitution and the contractual relations with persons who have bought state bonds.

In place of making proper provision for the appropriations required to continue canal construction, I have been urged to violate the constitution and the finance law of the state by permitting the creation of a debt for this purpose, dependent for its liquidation on the outcome of a referendum to be voted upon at the next election, instead of complying with the requirements of the constitution and making this a charge against the general fund, with the attendant necessity for providing for its payment out of general fund resources. Irrespective of my own judgment on these suggestions, each one has been submitted to the attorney general, who is my legal adviser, and each has been rejected by him as unlawful.

Plausible, but Fallacious.

Of all the plans for avoiding the necessity for a direct tax the most plausible was presented to me at a public hearing by the acting mayor of New York city. His suggestions, presented, I am sure, in perfect sincerity, were:

First.—That the sinking fund charges of $9,090,620.92 be levied directly upon the county treasurers by the state comptroller without legislative action.

Second.—That the appropriation of $3,654,000 for carrying out existing contracts for the barge canal should be financed with borrowed money.

Third.—That the indirect revenues of the current year will so far increase in the coming four months as to offset the $5,000,000 loss in the last eight months.

Fourth.—That the governor could cut out $2,500,000 in the appropriation bills in addition to the reductions already made.

I wish to point out the fallacies in this program. The first suggestion does not avoid any part of the direct tax, but [illegible]

upon the people of the state would be precisely the same in both cases. In fairness I must say that no claim was made that this plan offered a means of exempting the people of the state from paying sinking fund charges on their bonds. Its purpose was to provide a way of collecting the money in case I should see my way clear to veto the $19,500,000 direct tax. But I am advised by the attorney general that there are grave legal difficulties in the way of adopting it even though the remaining $10,000,000 of the direct tax should be proved unnecessary.

An Impossible Proposition.

The second suggestion is equally objectionable. It is to the effect that drafts could be made upon the bonds of the J. R. Shanley Estate company taken in settlement with the sureties of the Shanley-Morrissey, Inc., on barge canal contracts, which have been defaulted by the contractors, which was claimed upon the argument before me to aggregate $1,800,000. The answer to this is that the state owns no such bonds.

The Shanley-Morrissey, Inc., the defaulting contractors, have been adjudicated bankrupt and the estate distributed in bankruptcy.

To secure the faithful performance of their contracts they gave surety company bonds to the state aggregating not $1,800,000, as contended, but $469,716, which amount is the aggregate security which the state owns.

The surety companies writing these bonds are either in the hands of receivers or have repudiated their liability. The surety companies, however, when they executed these bonds to the state took indemnity to protect themselves against liability, which is now reduced to the bonds of the J. R. Shanley Estate company aggregating $469,600, and it is proposed that they turn over these bonds, plus interest received thereon and dividends received from the Shanley-Morrissey, Inc., in bankruptcy, aggregating $40,714.32, in full settlement of the state's claim against them by reason of their suretyship.

Acts of the legislature have been passed authorizing the canal board to make this settlement if the board deems it to be for the best interests of the state. This settlement has not yet been made, but if it had been and the bonds and cash were now the property of the state they would not be available for the purpose of this appropriation until an act of the legislature should be passed and approved by the governor appropriating the money for that purpose.

It was further suggested that in default of using this money we could mortgage future revenues in the expectation that the people will vote next fall in favor of the barge canal bond issue. This suggested procedure, as I am informed by the attorney general, is also illegal.

The third point, based on the optimistic view that the state can make up in four months what the indirect revenues lost in eight months, has no support either on the books of the state comptroller or any reasonable financial expectation.

Income Must Be Cared For.

The fourth point was supported by concrete suggestions of appropriations to be vetoed. These suggestions involved cutting out such provision for the increased population of the state institutions as I have felt to be absolutely necessary this year. The inevitable consequence of such spurious economy would be to increase to an inhuman degree the already serious condition of overcrowding in such institutions of the state, and to force out on parole many hundreds of dangerous persons who are not cured of their insanity and who should be under restraint for the protection of themselves and the communities in the state to which they are returned. I feel sure that on further consideration the acting mayor of New York city would not advocate such a policy.

I am sure that the only proper course is to provide consistently and continually for the increasing number of such wards, and I must therefore decline to accept suggestions looking toward the elimination of [illegible]

which will provide such additional accommodations.

In the same way I have rejected the suggestion to deprive the canals of adequate funds for maintenance and operation. The state has an enormous investment in these canals and neglect of them would mean a loss entirely out of proportion to the amount necessary to keep them in order. It should be remembered in this connection that the new barge canal, because of its size and the complex mechanism of its operation, will from the start be more expensive to operate and maintain than the old canal which it will ultimately displace.

No Discrimination Against New York City.

Practically all of the criticism and misinformation and suggestions for illegal budget making and false economy have come from the city of New York. The subject of the state budget is of great importance to the city because 70 per cent of the direct tax necessary to finance the state appropriations is raised within the greater city and becomes an item in the city's annual budget. The citizens of New York city should not forget that, whatever the expenses of the state, the largest items are for the maintenance of state institutions, canals, the department of education and the highways.

The inmates of state institutions almost to the percentage represented by the tax borne by the city of New York are from that city. The maintenance of the canal is of benefit almost exclusively to the cities of New York and Buffalo. I think I am safe in saying that the proportion of benefit to the city of New York is fully equal to the proportion of its cost which the city pays.

The expense of the department of education includes a large sum annually paid directly into the treasury of the city of New York. A very large percentage of the expense for the normal schools is represented in preparation of teachers who find their service in the New York city schools.

A statement could be prolonged indefinitely showing the intimate relations of the state departments to the citizens of the municipality of New York. I feel that the citizens of my own municipality should clear their minds of the impression which seems to prevail that their share of state expenses means a complete loss to themselves and realize that the expenditure of state appropriations is returned to them practically to the extent of their share in their payment.

The supply bill, the construction bill and other special bills to meet the needs of the state within the current fiscal year, also the appropriation bill to provide for the administrative cost of government for the new fiscal year beginning Oct. 1, 1915, and the bills to provide the sinking fund charges for the new fiscal year, which were transmitted to me by the legislature, are here grouped in accordance with the principal state activities, as follows:

Making Good Last Year's Shortages.

The larger appropriations of the present year represent not only increased cost of government, due to new activities or increased cost of existing activities, but also grow out of the failure of the preceding administration to appropriate sufficient funds to meet departmental necessities. The failure to grant these allowances relieved the preceding administration of responsibility for providing resources to meet them by the amount of the cuts made, but increased the burden of the present administration to the extent that resources must now be provided to finance the new appropriations granted to make up these deficiencies.

Some of the larger items of appropriations for new activities and to meet deficiencies are the following:

Building construction and permanent betterments	$4,000,000
Barge canal construction	3,654,000
Sinking fund contributions, increase due to increase in outstanding bonds	1,500,000
Grade crossing appropriations (ignored for several years)	752,000
Constitutional convention	500,000
Support of common schools (mandatory increase)	316,600
State census	465,000
National guard, deficiencies and maintenance items	340,000
Inadequate appropriation for canal maintenance	726,000
Deficiency in allowance for state hospitals	341,000
Deficiency, workmen's compensation commission	425,000
Legislative printing	200,000
Indemnities for diseased animals (some claims five years old)	432,782
Yorktown condemnation	80,000

An Inherited Deficiency.

Every appropriation placed upon the books of the state should be represented by actual or assured resources to liquidate it. Facts submitted to me by the state comptroller of conditions existing as of May 15, 1915, show that there are appropriations on the books of the state comptroller's office (exclusive of those made by the present legislature) which exceeded by $753,700.24 the actual or anticipated resources of the state up to Sept. 30, 1915.

This means that without regard to the appropriations of the present legislature added revenues to the amount of $753,760.24 must be provided to meet these obligations or that existing appropriations where possible must be vetoed when presented for reappropriation.

Vetoes to Wipe Out Deficiency.

I have vetoed items in the reappropriation bill to the amount of $736,445.02. Under circumstances ordinarily prevailing in state finance these vetoes would release moneys which could be applied to the liquidation of new appropriations. In this instance their effect is only to wipe out the amount of present deficiency between old appropriations and resources.

As the result of this deplorable condition of state finance it is obvious that no provision for the liquidation of the appropriations of the present legislature can be made from existing state surpluses or from the resources of the state up to Oct. 1, 1915, which are mortgaged to meet old appropriations.

To carry on the business of the state we must therefore look to the anticipated indirect revenues of the next fiscal year, and to the extent that these anticipated indirect revenues are insufficient they must be supplemented by direct revenues through the imposition of a direct state tax.

While the liabilities imposed by the appropriations of the present legislature apply in part to the present and in part to the next fiscal year, the [illegible]

BOARD OF ALDERMEN TO VOTE TONIGHT UPON HOLDING SPECIAL CITY ELECTION

Prominent Citizens Ready to Bow Before West Side Opposition

Tonight at 8 o'clock the Common Council will meet at the City Hall for the purpose of voting on the resolution introduced at a meeting two weeks ago to the effect that the council shall call a special election for the purpose of voting on the Falley Seminary as a site for a new high school. It is probable that a large number of citizens and taxpayers will attend the meeting.

All of the aldermen except Mr. Sullivan of the Second Ward expressed themselves as in favor of the election at the last meeting and several recommended the purchase of the property. Although a meeting was held in the Oak St. school Tuesday night for the purpose of explaining the merits of the site to those citizens of the Second ward who are opposed to the election, nothing was explained as no Second Warders turned out to litsen. This is taken to indicate that the ward will not consider an election for the reason that the people do not approve of the purchase of the site. Alderman Sullivan believes himself governed in this matter by the wishes of his constituents.

It is expected, in fact, authoratively stated, that Alderman Sullivan will refuse to vote for the election tonight, and therefore the project will be defeated, as a unanimous vote is necessary. It was learned yesterday that there is a possibility of Alderman Baker voting against the election as he said at the last meeting that he would not favor an election unless he was sure that the measure would pass and the city's money would not be wasted.

A petition was drawn up among West Side residents yesterday morning and, inside of two hours, 150 signatures were taken of citizens who are opposed to an election. Alderman Sullivan at the last council meeting offered a petition which 140 taxpayers of the Second Ward had signed expressing their objections to a special election, and the appearance of this new petition tonight, which will bring the total of opposition signers almost up to the number of those who signed for the election, is expected to change the minds of several aldermen on the subject.

A meeting was held yesterday morning which was attended by several prominent business men, among whom were prominent members of the Chamber of Commerce. The Oak St. school meeting was discussed and the concensus of opinion seemed to be that the project should be abandoned for the present in view of the organized opposition to it.

It is universally conceded that the opposition of John W. Stevenson, the president of the Board of Works and a resident of the Second Ward is a great factor against the project. Mr. Stevenson stoutly maintains that it would be a mistake to purchase the site and, as his influence is great among the residents of his ward, and his opinions carry weight, the large majority of the tax-payers there are solid against the election.

One Member Opposes Taking Chances by Holding Election

Statements have been made to the effect that the proposition is almost certain to carry this time as there has been a great change in public sentiment in regard to it, but the opposing element claims that the opposition this time is even greater than before.

It is quite likely that the Board of Education will decide to drop the matter for the present, in view of the opposition to it. Under a bill recently introduced in the Legislature, the Board would have been empowered to purchase any site it sees fit without the formality of an election, but this bill has been dropped for another year.

A prominent member of the Chamber of Commerce stated yesterday that this opposition and the stand of Alderman Sullivan were the best possible things that could happen at the present time, as the proposition is sure to be defeated now, whereas it may be carried without difficulty in two or three years.

WILSON SAVED POLACK'S LIFE

Expert As a Swimmer Woolen Co. Employe Wins Fight Against Odds

Edward Wilson, yard foreman at the American Woolen Company plant risked his life yesterday in saving an unknown Polak from drowning in the mill race at the company's plant. The Polak was trying to row out into the river from the bank and was caught in the swift mill-race. His boat overturned and the man, unable to swim, called loudly for help.

Wilson was supervising some work in the company's yard and heard the cries of the drowning man. Running to the bank, Wilson took in the situation at a glance and throwing his coat dove into the swift stream.

An expert swimmer, Wilson soon reached the man's side and grasping him by the collar attempted to pull him ashore. Some other employes came running with a rope about that time but the current took the rope out of the reach of the men in the water and for a few moments, Wilson had a hard struggle to keep himself and the drowning man above water. The Pole lost his head after the rope had been carried past a second time and clasped Wilson about the neck in a death grip. After a hard struggle, during which the swimmer was forced to give the Pole several blows, Wilson managed to calm the man and grasped the rope, by which they made their way to the shore.

Wilson was almost exhausted and the Pole collared when they reached the bank. First aid was given at the company's plant and both men went home. The Pole was profuse in his thanks and his family afterward tendered their gratitude for Wilson's brave act.

I. O. O. F. MEMBERS TO JOIN UNION PARADE

Members of the local lodge of Odd Fellows are requested to meet at the hall at 2 o'clock on Sunday afternoon in preparation to joining the Memorial parade. It is requested members wear badge and gloves.

WANTS TO RECOVER FOR COST OF FURNACE

An action for damages growing out of a breach of contract was started in City Court this morning before Judge Wilson by Joseph Bidwell, a carpenter, against William Church, a contracting plumber and steam-fitter. Frederick G. Spencer appeared for Bidwell and Robert Pendergast represents Church.

Bidwell engaged Church to install a furnace in his home, ahe furnace to be placed according to specifications drawn up by Bidwell. After the furnace was installed, Bidwell claims his home was not heated and accordingly brought suit to recover the cost of the furnace.

The testimony of Bidwell occupied the greater part of the morning and the court adjourned at noon to continue this afternoon at 1.30 o'clock.

TONY CARRIED A GUN

Anthony Cabotto, an Italian, was arrested last night in North 1st st. by Chief Dyer and Patrolman Brown charged with carrying concealed weapons. A searth at the police station revealed a revolver and a long knife. Cabotto is considered a dangerous character and, as he is a stranger here, he will be held for investigation.

Twenty Italians who have been hanging around North 1st st. were searched last night but no other arrests were made.

ACADEMY OF MEDICINE MET WITH DR. TERPENING

The Fulton Academy of Medicine met with Dr. Terpening last night at his home on West Broadway. Every member of the association with the exception of one doctor, who was out of the city, was present.

Dr. E. M. Anderson read a paper on "Protective Therapy in Acute and Chronic Nephhritis."

At the next meeting Dr. E. E. Gladman will read a paper on "Eclampsia.

After the meeting the Academy enjoyed a dinner and an informal session until a late hour.

WEATHER FORECAST

Fair tonight and frost. Friday, fair and warmer, with moderate northeast winds.

King Victor Emanuel at Front Directing Troops Against Teutonic Allies

London, May 27.—From the vicinity of Lake Garda to the Gulf of Trieste Asutro-German and Italian troops are in touch. With the exception of one point, in the Carnic Alps, all the fighting is on the Austrian side of the frontier. The Italians made appreciable progress in the Isonza region, and their advance line has come into contact with the main Austrian defence positions.

A battle in force is in progress along the Isonza, in the neighborhood of Goritz, which probably will attain to its greatest violence on the line from Dornberg to Nabrisina. This line follows in a half circle, extending toward the west, a range of hills having its center fifteen miles southwest of Dornberg, and which reaches a maximum elevation of 1,200 feet. It provdes a natural barrier to an advance from the Italian frontier to Trieste by the coast line and has been strongely fortified by the Austrians. The frontier force has been working hard for two months increasing the defensive values of the hills, and they are depended on by the Austrians to halt any offensive movement.

In the vicinity of Ploecken, twenty-five miles north of Udine, in the rear of Padon Pass, northwest of Marmolata and at several points in the mountain passes of the Trentino actions of more or less severity occurred, which, Rome says, were successful.

Numerous small villages and passes of great stragetic value in the Trentino are occupied by the Italians, who pursued the retreating Austrian frontier guards. These retiring forces blew up all bridges behind them, and in many cases practically blocked the passes through which they had retreated. The Italian engineers, however, rapidly replaced the bridges and cleared away the obstructions in the mountain passes.

Little information reaches London regarding the disposition of the main opposing armies on the Trentino front, but it seems probable there will be no offensive operations there until some decision is reached in Friuli unless an invasion down the Aige Valley is understaken by the Austro-German forces. The engagements in this sector in the last two days, it is believed, are primarily for the purpose of obtaining control of the heights of the Alps possessiong strategic value and of the passes which command the Adige Valley.

King Victor Emmanuel left Rome last night for the north-eastern frontier, where he will take supreme command of the army.

Artillery Attack Is Unparalleled

The sinking of the British battleship Triumph in the Dardanelles by a submarine and the damaging of the American-Hawaiian Company's steam ship Nebraskan off the south coast of Ireland by a mine or a torpedo are outstanding features of the war news.

The Triumph probably was a victim of a German underwater craft, as the British legation at Athens recently offered a reward for the sinking of German submarines supposed to be in the Mediterranean.

The British Admiralty last night reported that a majority of the officers and men, including the captain and commander, were saved.

The Nebraskan was badly damaged by her contact with the explosive, but was able to keep afloat, and no lives were lost.

The British Admiralty reported the Nebraskan was torpedoed by a German submarine. Washington declined to accept this view and has ordered a complete investigation. As the steamship was in ballast and offered no reason for an attack except wantonness, State Department officials are said to be inclined to take the view that the

(Continued on Page Four)

[illegible] CO. TO EMPLOY BIG FORCE OF WORKMEN

Work on the construction of the new plant of the Oswego Falls Pulp and Paper Company, in charge of the Walter Bradley contracting company, is progressing rapidly. The concrete tower is now complete and the bins for the mixing of the concrete have been built as well as the forms. Excavation has been started for the foundation of the pulp mill which will occupy the land along 1st st. directly south of the present plant and ten feet of earth will be taken out.

The power house is to occupy the site of the old pulp mill on the land between the canal and the river owned by the company, and a coffer dam is now being built into the river at that point. It is expected that the coffer dam will be completed within a week and then the excavations for the new power house will begin. Blasting will probably benecessary at that point. A trestle is being built on the ground between the canal and the river. About 175 men are now employed on the contract and the force will probably be doubled in a month's time.

POLL TO DECIDE FATE OF EARLY CLOSING HOUR

The early Saturday night closing hour has not been established without a certain amount of adverse criticism by shoppers and the merchants themselves.

In order to get to the bottom of the dissension individual members of the different lines of trade went about this morning among their brother merchants to get a poll of the sentiment for and against extending the closing hour from 10 until 11 o'clock.

It is contended by those who are dissatisfied with the Saturday night 10 o'clock closing hour that in too many instances patrons of stores are yet waited upon when the established hour arrives; thus customers complain and merchants have something to say about the loss of trade that is bound to ensue because their patrons cannot be served in the way they desire.

BAKE FOR PIANO

The pupils of Erie Street school will hold a bake sale at Druse's store Saturday afternoon.

The proceeds will be used for the school piano fund.

CENSORS OBJECT TO CORELLI FILM

Differ With Verdict of National Board of Censors; Watching the Films

The Moving Picture Censors held their lrst meeting yesterday afternoon at the home of Mayor Fox. With the exception of Mrs. C. E. Robertson, who was not in the city, every member of the committee was present. Mayor Fox read the ordinances in regard to the production of films here and explained the tentative rules to the commission. The commission will hold another meeting in two weeks at which time definite steps will be taken in the censorship work. In the meantime the censors will visit all the local moving picture theatres and any films which do not come up to the required standard will be reported.

Some of the members of the commission were heartily in favor of starting work at once in the active censorship, as it is understood that there has been a great deal of objection to several feature films which have been shown this week by a motion picture theatre here, among them a novel by Marie Corelli, which has been dramatized and photographed. The management of the picture house in question has stated that uncensored films are not produced in that house, but in spite of the censorship of the National Board, some of the members of the local board have expressed opinions differing vastly from those of the National Board on the question of this particular film.

STORES MAY CLOSE MONDAY AT NOON

While the result of a canvass made this morning by members of the Division of Retail Trade to secure the signatures to a petition for the closing of all retail stores in the city on Monday next, could not at the hour of goin gto press be announced, it was apparent to the men engaged in the work that such action will be taken by the retailers.

Opinions

The Smell of Powder

If ever there will be a year when the people should be glad to observe the Fourth of July without fireworks it should be this year. The smell of powder does not exactly reach our nostrils from the battlefields of Europe, but these events make the touching off of explosives for such purposes repulsive. There are ways far better and far more admirable to observe the anniversary of the birth of the nation than in the setting off of powder crackers, the bursting of bombs and the shooting of rockets, not forgetting the element of danger that has been so characteristic of past Fourths. May Americans show this year that they are above such a way of observing a day of unparalleled importance to this nation and may they express themselves in a more dignified and fitting manner, that the whole world may profit by the example of the American nation.—Albany Journal.

The Real Germany

Americans, whether well informed or not, are likely to look at big questions with some degree of common sense. When the war broke out, Americans knew little about European politics. But they have persisted in maintaining the sensible view that the Germans in Germany are the same peaceable, likable people as the Germans in the United States. We have found it impossible to believe that the harsh measures employed by the Prussian war machine expressed the will of the German people. It is certain that the German people are united, now that their country is in such grave peril, but that fact by no means proves that they approve of all the acts of the Kaiser and his staff.

This American view, while it has been ridiculed in some quarters, is strongly supported by E. R. Hedrick, a professor in the University of Missouri. He was educated in Germany and intensely admires the people of that country. He claims to know them well, and does not hesitate to assert that he has found the average German citizen to be a better balanced individual than the average American. He comments on the German war policies as follows:

Let us not despise Germany nor codemn her. These acts that are called piracy and barbarism are not of her doing. They injure and afflict Germany more than they do us or any other nation. These and other acts of her government are exposing her to shame, and to the possibility of harsher and more ruinous terms of peace, that will spell misery to all Germans after the inconceivable horrors of this war. Pity rather than condemn her. * * * And when you speak of Germany, do not confuse Germany with the imperial German government. Among the enemies of Germany, name that government first.

These are unequivocal words. Yet we know that the imperial government which Mr. Hedrick condemns has in the last half century welded Germany into a marvelous nation, where slums and dire poverty have come almost a negligible quantity. Is there not, then, a little madness in the Kaiser's terrible ferocity? Have not the Prussian militarists nurtured ideals mhich warped their vision and made them believe that physical powerand violence are the only forces in the world which need be considered? We believe that other nations of Europe will take this view when peace is declared, and that the German people will not be made to suffer "ruinous terms of peace" because of the wrongdoings of the Hohenzollern regime. But it is possible that the Allies will declare that the Hohenzollern dynasty must forever be eliminated from the government of Germany.—Rochester Democrat-Chronicle.

A Short Shrift for Becker

There was never any general doubt in this city that Becker was a grafter in police uniform and that he instigated the murder of Herman Rosenthal in a futile endeavor to cover up his offieial treachery. Therefore, there can be nothing but satisfaction over the refusal of the Court of Appeals to interfere a second time with his execution. His agents, the four gunmen, have paid the penalty for their crime and have almost faded from memory. If there be any value to society in capital punishment, it is meet that Becker soon join them.

Already it is nearly three years since he was indicted for that murder of which the Court of Appeals now declares he was fairly convicted. The Tribune believed that the overturning of the first verdict was a triumph of technicalities over justice. The evidence submitted to the second jury was substantially that submitted to the first. Schepps having been discarded as corroborator, his place was taken by a negro stool pigeon of Becker's and Mrs. "Lefty Louis" Rosenberg, whose testimony has proved acceptable legally to the state's highest court—and the testimony at both trials had relation to the same general state of facts.

Becker has had every chance which the law permits and decency demands. He never presented a clean defence—he trusted to technicalities and the inability of the state to "get anything on" him. The fact remains that, after delays which gravely discredit the system of justice in this state, he is again within the shadow of the electric chair. Facts as two juries have understood them have triumphed over every obstaile, every attempt at delay. Becker, a sworn servant of the public and upholder of its laws, deserves little now but the quickest carrying out of the penalty for his treachery to the public and defiance of those laws.—New York Tribune.

ELIMINATE THE FAILURE

No man or woman should be permitted to grow to manhood or womanhood without being able to do something intelligently that the world wants done; without being sufficiently skilled to earn a respectable living and enjoy the better and finer things of life.

No man or woman should be permitted to grow up into middle life without an occupation, without a trade, without a training along a certain line, or without a profession. This is a problem that should be handled by the State and the Nation working in conjunction; and training schools should be established and factories should be erected for the purpose of bringing out this end.

This is a very simple proposition, and to any of us who have an inquiring mind the idea occurs logically and naturally. It is so simple, in fact, and so evident, that no one can possibly walk around the proposition or walk away from it.

The average money paid for unskilled labor is $1.50 a day. This labor is unintelligent, untrained, misdirected, and represents less than one-tenth of individual efficiency. It is the labor of those who have developed neither brain nor hand; of those who have never been trained, and who have never trained themselves to do anything intelligently that the world wants done. And just here we may say that no man can develop his hand without developing his brain.

The training of boys and girls, of young men and young women, is the most ignorantly handled of anything connected with our modern civilization, and this ignorance is responsible for the greater part of our poverty; for the suffering and sickness that usually come from poverty and is responsible, in a very great degree, for the unhappiness and the misery that exist throughout the human family.

As a nation, we are supporting a vast number of battleships, and along with the navy we are supporting thousands of idle men who become, by the nature of their environment, professional "do-nothings." Young men who select the navy as a vocation are not only dependent on someone else for the food they eat and for the clothes they wear, but the nature of their calling is such that they are almost entirely unfitted for any useful vocation in life.

As a nation, we are supporting an army of men who do not work and who do not study—an army of professional idlers. And this is, without doubt, the greatest travesty in our modern civilization. That the Government should keep an army of men, either on land or sea, that produces nothing, that does nothing but consume and destroy, is the greatest mystery of our time. The policy has been handed down to us from a semi-civilized period of the world when the soldier and the priest were a burden on the peasant who toiled in the field and suffered under taxes to support them.

Our battleships are out of date almost as quickly as the style of woman's dress, and ready for the junk-heap. Every year millions of dollars are spent to build these steel monstrosities of idleness, and every year millions of dollars are spent to feed and clothe and transport an army of idlers. Instead of having an army of a few hundred thousand young men, we should have an army of ten million young men, and each of these men should be trained and educated by the Government to earn a living; to be useful to the Government while they are working for the Government, and at the same time fit themselves to do skilfully and intelligently something the world wants done when they grow up to manhood.

A half hour each day is enough time to devote to the routine of military training. That a young man should be paid by the Government to parade around, covered with brass buttons and braid instead of producing something useful for the Government and for himself, is a crime against tax-payers and a crime against the man who is lured into this life of idleness.

How long will it be, I wonder, until we develop a race of thinking men and women—a race of individuals intelligent enough to do away with this organized "Army of Parasites?" (L. A. B.)

Two Americans Abroad

By F. A. MITCHEL

Wilkinson enlisted for the Spanish-American war when he was seventeen years old, went to Cuba and fought the dons and returned with his command at the end of the fracas. When the great European military conflagration broke out, desirous of seeing something more of fighting, he went to Canada, enlisted in the first expeditionary force that went to England and thence to France.

Wilkinson was a machinist and very ingenious. When the British commanders learned of this they wanted him to go into the mechanical corps of the army, but he said he had had enough of that at home. He preferred to remain in the ranks, where he would get something different. So he became a trench fighter like the rest of them.

But it is not every man who can get just what he wants, no matter how he arranges for it. Wilkinson had no sooner got into a fight than he was captured and taken to the rear. This was in Flanders during the late autumn of 1914.

One day an officer came into the prison where Wilkinson was confined and asked in English if there were any mechanics there who would volunteer to work at bridge building. Wilkinson, whose active nature rendered confinement unbearable to him, called out that he was an engineer by profession. The officer accosted him, asking if he would agree to give his services to the German government in good faith. It turned out that the officer, Captain Kaufman, was a German-American, who had gone over to fight for the fatherland.

Wilkinson and Captain Kaufman being both Americans became quite chummy. Wilkinson impressed the captain so favorably with his knowledge of engineering that the latter proposed to take him to the chief engineer with a view to his entering the engineer corps of the German army in a prominent position. Wilkinson assented, or, rather, pretended to assent, for he was simply looking out for an opportunity to get back to the army of which he was a legitimate part.

Captain Kaufman took the prisoner into an automobile for a ride to a point where a large railroad bridge was being rebuilt. There he expected to find one of the chief engineer officers of the army to whom he expected to turn over the American for service. During the ride the two men chatted about America and what they would do there on their return at the end of the war. Naturally Kaufman was warm in his advocacy of the German cause, while Wilkinson's sympathies were with the allies. But they talked little on this subject, for Wilkinson, who had a plan to get away from his captor, led the conversation in a line that would facilitate his doing so.

"I tell you what we'll do, Kaufman," he said. "When this slaughter business is over and we both get back to the land of the free I've got the biggest scheme on hand for making money you ever saw. It's a device that may be applied to all pumping mechanisms. Its use will be enormous. I'll take you in with me and we'll make our everlasting fortunes. You attend to the sales while I attend to the manufacture—see?"

"Where will we get the capital?" asked the captain.

"Capital! Why, there's capital enough in the United States to promote any scheme if it can be proved all right. I can get millions for anything I propose. My device is so simple that a child can understand it. Let me have a pencil and a piece of paper and I'll make you a drawing of it."

Kaufman had the wheel, so he couldn't get into his pocket without stopping, but they were approaching a village, and he said he would stop for something to smoke. Pulling up at a small store, Wilkinson went in and returned with some cigars, a pencil and a sheet of paper. He also had something else that his companion did not see. Lighting up, the two proceeded, Wilkinson making a sketch of his device. Kaufman, who had no knowledge of mechanics, did not understand it, so Wilkinson proceeded to make a practical demonstration. Rolling the sheet of paper into a tube a trifle smaller at one end than at the other, he crumpled a small portion into a little ball, which he dropped into the tube; then, while the captain's gaze was on the road ahead, he dropped into it some red pepper.

"You can't watch the road and my demonstration at the same time. Stop the machine for a moment."

Kaufman brought the auto to a stop and turned his face to his companion.

"This tube represents the pump, and the crumpled bit of paper inside is my patent ball valve. The greater the pressure on the ball the tighter it is in the tube. When I blow on it like this—see?"

Kaufman did not see, because Wilkinson had blown red pepper into his eyes. Wilkinson jumped from the auto and ran like a deer till he struck a road, where he disappeared.

A few months later Captain Kaufman returned to America minus a leg that he had lost in the defense of the fatherland. One day whom should he meet on the street but Wilkinson.

"Hello, captain!" said the latter in his cheeriest voice. "When did you get back? Come in here and have a drink."

The captain scowled for a few moments; then the scowl gave way to a smile, and the two pledged each other under the star spangled banner.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

What is the easiest way of locating a loose push rod?

A loose push rod can easily be found by feeling with the hand. If there is too much clearance between the stem and the top of the rod it can be ascertained by rattling the push rod, and if this is the case it should be adjusted, preferably while the motor is warm. Make the space about one one-hundredth of an inch, or the thickness of a sheet of writing paper.

If the rod is worn in the guide a certain amount of lateral movement will be noticed when force is applied to the rod by the hand.

When I put my foot on the electric starter on my car it makes a noise as though every gear were being stripped. Can you tell me the cause and how to remedy this?

It is possible that the gear teeth are worn or that the armature bearings allow play. Inspection should show whether this is so. It may be that the gears need oiling. It must not be forgotten that a starter should make a little noise, the amount depending on the design, workmanship and material.

When I change from intermediate to low or from high to low very quickly my gears go into high and low both. The car stops with a jerk and I cannot change to neutral until I get underneath the car and kick out high. When I change slowly it is all right. Is there any way of adjusting the spring tension on the clutch of this car?

Either the shifting rods are not the right length or the springs that bring them back to neutral are weak. Replace these springs, and if this does not remedy the difficulty try adjusting the lengths of the rods.

The tension of the clutch spring can be adjusted by screwing up on the nut that holds the thrust bearing in place. It is possible that this will not make the clutch hold. If it does not, then the clutch leather should be replaced. To do this it will be necessary to remove the clutch cone. Take the universal apart and then unscrew the bolt that holds the thrust bearing in place. After this the clutch spider can be removed.

What effect have moth balls on gasoline? Friends who put them in their gasoline say they get more power from their engines.

The use of moth balls will increase the power slightly, but they have a corrosive action and tend to carbonize the motor.

If I place a plate on my pistons to obtain higher compression, will it cause excessive vibration at high motor speeds?

Many owners have fastened plates to the piston tops in order to increase the compression and gain power and speed, but the construction is not advised, as the results obtained are not worth the expenditure in time and money. All depends upon the weight of the plates as to whether the vibration will be high.

Is half kerosene and half wood alcohol a good carbon remover?

Half kerosene and half wood alcohol is a good carbon remover. After taking the carbon from the cylinders the oil in the crank case should be renewed in order that the lubricant will be in good condition.

Is it possible to adjust the detachable rims on a 35 by 4 wheel so that a 36 by 4½ tire can be put on? If not, what is the reason? The wheel at present will take a 34 by 3½ or 35 by 4 tire.

A 36 by 4½ tire can be put on a 35 by 4 rim because this is the oversize for that tire. It cannot, however, be put on a 34 by 3½ rim, as the oversize for this is the 35 by 4 and not 36 by 4½.

Is it advisable to wash a car with water each day?

Cars should not be washed unless it is necessary. Sometimes only wiping of the body and dusting of the cushions are needed.

My car misses in the front cylinder. It will run from one to twenty miles, and then it will miss. The spark plug gets oily and will not fire. I have put in a new plug, and it does the same thing. What is the trouble?

Evidently there is a leakage of oil, due to loose fitting rings or pistons. Remove the piston and rings and examine them carefully. Replace them so that the joints of the three rings will be equally spaced around the cylinder, as it is possible that they are all in line now.

Does a six cylinder start easier on the magneto than a four, and does not the armature on a six cylinder magneto make more revolutions to the crank shaft than does one on a four?

The magneto in a six travels one-half as fast as the crank shaft, just as it does in a four cylinder motor. The reason a six may start easier on the magneto is because in one revolution of the crank shaft there are three explosions, whereas in the four there are only two. This makes the chances of firing a charge greater in the six than in the four.

As soon as I go into third or high gear my car runs in a jerky manner. If I go back into second speed and push on the accelerator to give the engine more speed for about half a square and then go back into third or high it runs smoothly. What is the matter?

It seems most probable that the motor is missing, or at least does not run smoothly at low speeds. Adjust the spark gaps on the plugs to one thirty-second of an inch, tighten all wiring connections and look for short circuits caused by poorly insulated or bare wires.

See that the brushes on the magneto are in good condition and adjust the breaker points if they need it. There may be a temporary short circuit in the switch at times. Adjust the carburetor carefully. The air valve is for high speed and the needle valve for low. Test the compression. It may be that the valves need grinding, or there is a leakage past the pistons or the valve stem guides.

What is the best way to keep tires from sticking to the rims?

In order to keep the tires from sticking to the rims it is necessary to prevent the rusting of the rim, and this is most satisfactorily accomplished by the use of flake graphite. The graphite is mixed into a creamy paste by adding a small percentage of gasoline. This is then applied to the rims the same as ordinary paint. The gasoline evaporates and leaves the graphite, which not only prevents rusting to a large extent, but holds the bead of the tire away from the metal of the rim.

Is it economical to use oversize tires?

Many tire makers advocate the use of oversize tires for the following reasons:

Take, for instance, a 33 by 4 tire which fits on a 32 by 3½ rim. In addition to having considerably more air capacity or cubical contents, there is naturally a little more tread, and the oversize tire is, generally speaking, of a heavier construction. The greater air capacity naturally makes more of a cushion, thus making the tire easier riding for the occupants, and, due to the advantages mentioned, caused by the fact that the tire is of heavier construction and has a greater air capacity, it will throw off strains which a tire of similar diameter and circumference would not throw off.

In addition to the above, the circumference of the oversize tire in this instance is slightly over three inches more than the 32 by 3½ which we are using for illustration. This additional running surface means, of course, that the tire will revolve fewer times in making a mile than the 32 by 3½, which, everything being equal, should insure greater mileage than the smaller size tire.

What are the advantages and disadvantages of the disk friction chain drive compared with other types of transmission now more commonly used?

The advantages of the friction transmission are that it offers an infinite number of gear ratios, is silent, cheap to manufacture and simple. The disadvantages are that the friction disk must be renewed every few thousand miles—this is a small matter, but worth noting—and that the amount of horsepower that it will transmit under the conditions found in automobile design is limited. Therefore it has never been used to any extent on large cars, but has found favor on some cars of medium size and on more small cars.

Would a reviver of enamel brighten up my fenders or would you advise varnish?

Varnish would probably brighten up your fenders satisfactorily. Before applying the varnish it is necessary to be particularly sure that the surface is clean and bright. The varnish then used should be the best grade of finishing varnish.

I have been having trouble getting the water to circulate through my radiator. I have put pressure on it with a hose, but the water went through only very slowly. I did this a number of times and there did not seem to be any loose sediment of any kind coming out of the radiator. I have heard that washing soda dissolved in boiling water will clean it; also boiler compound. Can you advise me regarding this?

Common washing soda dissolved in boiling water is an excellent remover of the scale that forms in the radiator. The radiator should be thoroughly flushed out with a solution consisting of about two heaping handfuls of soda to an ordinary pail of boiling water. The soda solution should be allowed to remain in the radiator for a short time, and it should then be flushed out with clear warm water.

It is inadvisable to use boiler compounds in automobile radiators unless the constituents of the compounds are well known. Some of the boiler compounds contain ingredients which corrode any metal surface with which they come in contact. The result is that, instead of merely removing the scale, the metal itself is decomposed, and in a short time the radiator becomes leaky.

TO BE DEBATED

Miss Helen Todd and Miss Lucy Price to Clash at Chautauqua.

TO PRESENT BOTH SIDES.

Lively Time Predicted When Champions of Both Sides of Woman Suffrage Question Line Up For Verbal Battle Under the Big Brown Tent.

It is quite in keeping with the progressive spirit of the Chautauqua that it should present a debate on one of the most interesting and most important subjects of the day. The third afternoon of the Chautauqua week will include a debate on "Equal Suffrage" by two of the foremost authorities on the different sides of that question.

For the affirmative Miss Helen Todd of California, known throughout the country for her manifold activities in social welfare movements, will hold forth. Miss Todd is eminently fitted to assume this work. She has been

MISS HELEN TODD.

educated in our leading universities and also studied for three years in Berlin, Paris and Dresden.

Miss Lucy Price will represent the anti-suffragists in this debate. Miss Price is a graduate of Vassar, where she majored in philosophy and logic. She is the executive secretary of the Ohio State Anti-Suffrage association and was a large factor in defeating the equal suffrage amendment in the recent election in that state. She has been very prominent in debating the question throughout the country and is considered to be one of the most eloquent, forceful and logical speakers that have appeared on either side.

COMMUNITY BUILDER FOR CHAUTAUQUA.

Mr. J. S. Knox, President Knox School of Salesmanship, to Deliver Address.

The name of J. S. Knox stands for something. It stands for a man who knows the business conditions of the country as few men know them. It stands for a man who knows what the business conditions need. It stands for a man who knows what the individual business men need in order to get the best results. It stands for a man who understands community problems and how to meet them. In short, it stands for an authoritative speaker on community building.

Mr. Knox is president of the Knox School of Salesmanship and Business Efficiency. He is the author of several textbooks on the subject, textbooks that are widely used in the leading commercial schools in the country, texts that are unique in that they not only treat the subject from a common sense practical standpoint, but also furnish the necessary inspiration to put into effect the high business principles ennunciated.

Mr. Knox has for some time been recognized as one of the few great business speakers. Last summer he was on this same Chautauqua circuit and is being repeated because of the unanimous request for his return. This had heard. One town writes:

"The effects of the speech of J. S. Knox on 'Community Building' before the chamber of commerce have been incalculable in value. The whole community has been uplifted, and a better spirit of unity prevails. Some of the more modern movements which may be attributed in a large measure to this speech are the agitation in favor of a city agent, the commission form of government and the move to secure better roads to divert country trade into the channels of the city."

This is the speaker for whom the business organizations should be waiting. In many of the towns the business men will march in a body to hear Mr. Knox. Wherever they have done this it has yielded big returns. Get in line to hear Mr. Knox and his big booster co-operation message.

EVOLUTION OF THE CHAIR.

Benches Without Backs Served For Seats In the Middle Ages.

It seems odd to contemplate that, with the multitude of chairs to be found in every home these days, once upon a time there were no chairs as we know them in any home. In those days benches answered the purpose now served by chairs, and when a family drew up to the table for its meals in the middle ages they sat on long benches, which had no support for the backs, instead of chairs.

From long ago there were heavy thrones on which the rulers sat, but these throne chairs were so heavy that they could not be easily moved. Later the benches were given a back, and still later the chairs as we know them today were evolved.

It was not until 1600, in the time of Charles I., that the average Englishman knew of chairs or had them in his house, according to those who have made a study of furniture. The first English chairs were imported from France, and the native cabinetmakers and carpenters made chairs in imitation of these.

In those days the fashion in chairs changed with the fashion of clothes. When full skirts were the style the chairs became wider, so that milady and her skirts could be accommodated on one chair. The difference in the size of chairs that we have today, made in imitation of old styles, comes from this difference in clothes.—London Standard.

Why a Whip "Cracks."

In a lecture on "Mechanics In the Home" delivered to boys at the Royal institution, in London, Professor C. V. Boys tried to explain why a whip cracks. The Scientific American remarks that his explanation was only tentative, and the greatest authorities on dynamics have been at a loss to give the reason. Briefly, it has to do with the fact that, owing to the action of centrifugal and other forces, the speed at which the whip travels through the air is greater and greater throughout the length of its lash and so great at the end that it comes up to the velocity of sound.

Mimicking Death.

Sarah Bernhardt's fondness for playing death scenes (you remember her habit of sleeping in a coffin) made her an object of terror to the ex-Sultan Abdul Hamid. When the great actress visited Constantinople years ago Abdul refused absolutely to see her or witness her playing, declaring that he had no wish to come in contact with a woman who could mimic death to such perfection.—London Chronicle.

True, but Misleading.

"Dick hugged me last night before I had the faintest idea of what he was about."

"And what did you do?"

"Why, of course I was instantly up in arms about it."—Baltimore American.

An Awkward Situation.

"For $2 I will foretell your future."

"Are you a genuine soothsayer?"

"I am."

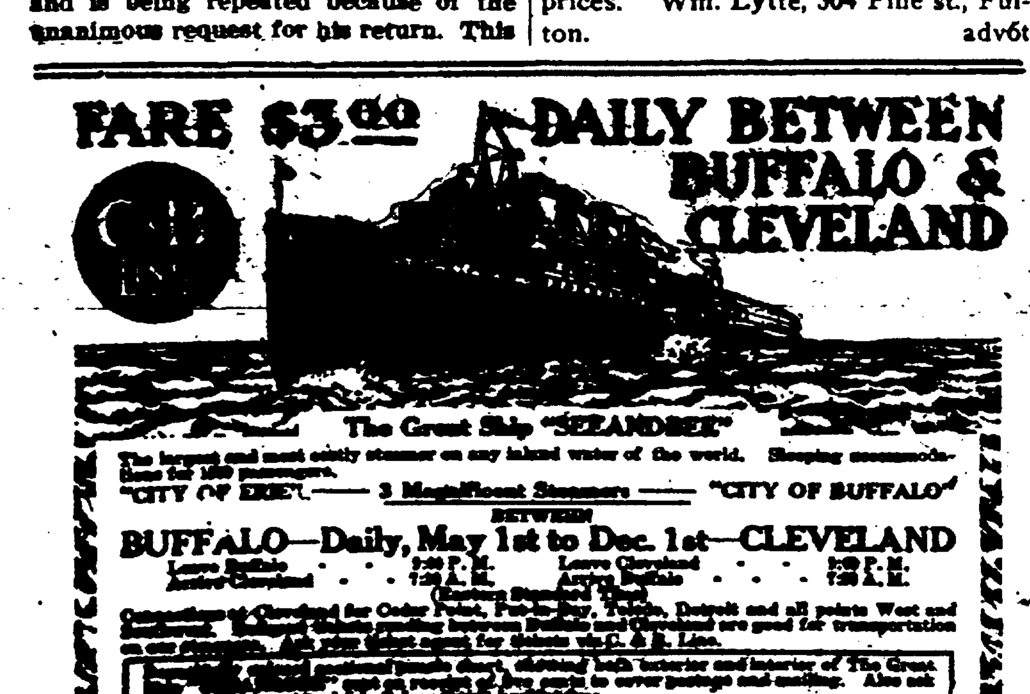
"Then you ought to know that I haven't got $2."—Kansas City Journal.

Economy.

"What! You are eating crabs just at the time they are most expensive?"

"Yes. I always have bad luck. When they are cheap I have no money."—Munich Fliegende Blatter.

Chairs re-seated—cane, splint or leather; upholstering at reasonable prices. Wm. Lytte, 304 Pine st., Fulton. adv6t



HON. FRANK J. CANNON is coming to Chautauqua to deliver his great message on "The Mormon Kingdom of Today." His father was a Mormon apostle and one of the early dignitaries. Mr. Cannon has served Utah in the United States senate and is a powerful orator. His indictment of Mormonism is most severe and his story one of the most interesting ever delivered. He is a strong man and lifts his audiences to high flights of enthusiasm.

THE DOMINION OF CANADA.

That's the Official Title of England's North American Daughter.

The official title of Canada is the Dominion of Canada. It embraces eleven provinces—viz, Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Québec, Saskatchewan, Northwest Territories and Yukon Territory.

The government is federal, centered at Ottawa, the capital of the Dominion, while each of the provinces, like our states, has its local legislature and capital. The head of the federal government is a governor general, appointed by the king of Great Britain and holding office for five years. Each province has a lieutenant governor, appointed by the federal government for a term of five years.

The federal or Dominion parliament consists of a senate with eighty-seven members, nominated by the governor general and appointed for life by the king, and a house of commons of 221 members, elected by the people of the several provinces for a term of five years, the right of suffrage being subject to a property qualification.

The provincial legislatures are elected by the people of each province. Each province has its own courts of local jurisdiction, and there is a federal supreme court consisting of a chief justice and five associate judges.—Philadelphia Press.

BEE CULTURE.

It Doesn't Cost Very Much to Start It In a Small Way.

It is simple, and not very expensive, to start bee keeping in a small way. About $25 to $30 will do it. The amateur bee keeper needs but one colony of bees, a good queen and a couple of hives. Of course he should have two or three books on bee culture, a veil, gloves and a smoker.

The smoker is for the purpose of slightly confusing the bees when it is desired to open the hive. The extra hive is necessary because, as bee keeping is usually started in the spring, there must be some place for the swarm which may soon leave the parent colony. It is by swarming that increase comes about, and this may be so regulated by the bee man that his profit will be entirely through increase. Or, if he chooses, he can retard increase and work for honey only.

With an outfit such as that mentioned above the amateur can in most seasons produce enough honey for a family of five persons, and he can do this by giving no more than a few moments daily, or perhaps half an hour during the course of the week, to the care of his bees. Starting with two colonies of bees, he ought to be able to provide for his own family and have a surplus of honey to sell.—Philetus Barnard in the Countryside Magazine.

Grim Scot Wit.

A Scottish minister had among his parishioners a man who dealt in old horses, alternating his spells of labor with heavy sprees. During the period of depression which followed each over-indulgence John habitually took to bed and there diligently studied the family Bible. During one of these fits of attempted reformation his condition prompted his wife to call in the Rev. Mr. Wallace, the parish minister, who at the time happened to be passing.

"Oh, Maister Wallace, come in and see our John; he's rale bad!"

"What's wrang wi' him?"

"He's feart to meet his Makker," said Mrs. John.

Quick as fire came the crushing reply: "Humph! Thell'm he need na be feart for that; he'll never see'm."

Lawn Mower Hospital at Roy's Quick Shoe Repair, 110 Cayuga st. ad

Fly Rod For Trout Fishermen.

Rods of split bamboo are produced by cementing together a number of triangular strips split from the whole cane to form each joint; the rod of six strips is the choice of most anglers. Weight for weight—and, of course, within reason—the lighter the rod the better—split bamboo rods are stronger and have more casting power and better action than rods of any other material. Very properly conceding that the choice of a fly rod is practically limited to the rod of split bamboo, you cannot go far wrong in selecting one nine feet in length. Such a rod for the light work of our average trout streams should not weigh over five and a quarter ounces.

Any rod seriously worth consideration has snake guides, german silver reel seat and ferrules and a solid cork hand grasp.

It is very well when making your selection to try out several rods answering to the above specifications, in order to avoid, if possible, getting a rod that is either too stiff or too flexible.—Outing.

Strength In Hollowness.

The stems of bamboos, grasses, wheat and oats are hollow, although they grow to great heights in comparison to their thickness. It might naturally be supposed that to gain strength as they grew the stems ought to be solid at the base, but it is not so. Careful experiments have proved that a solid column subject to bending strains is no stronger than a hollow one. Consequently all iron shafts are made hollow, and the steel shafts which drive the screws of steamships have a hole bored down the center to reduce the weight. But this does not reduce the strength. The thickness of the branches of trees is in proportion to the weight to be borne. Horizontal branches, such as those of the cedar and elm, are much thicker than the almost vertical branches of the poplar. The average natural factor in breaking is about one in ten, exclusive of wind pressure, and engineers employ a factor of six in building with timber.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

Public Penance.

A quaint old law for the punishment of petty offenders exists to this day in Middleburg, the Netherlands, and anything resembling it is not known to exist elsewhere. Owing to dampness weeds quickly spring up in the streets between the paving stones, and here, under the eye of a none too severe guard, the offenders are put to work with a large trowel shaped knife clearing away the upspringing blades of green. Each is provided with a wooden stool, hence it may be imagined that they are not hard driven. Here men and women alike who have been convicted work in this manner.

Joy of Anticipation.

The youngest girl of a Baltimore family was recently much distressed at dessert to discover that there was ice cream for dinner.

"Oh, papa," exclaimed the youngster reproachfully, "why didn't they tell me this morning that we were going to have ice cream?"

"What difference would that have made?"

"Lots," sighed the child. "I could have expected it all day."—Exchange.

A Roland For an Oliver.

Manager—I say, can we get anything like a real doctor in this jay town to attend a sick actor? Village Inhabitant—Sure. Just go to that corner grocery. You'll find a man there who's all right at curing hams.—Baltimore American.

From an Aeroplane.

In answer to a correspondent who asks to what extent a man in an aeroplane can watch the movements of a submerged submarine boat the Scientific American replies:

"We have consulted a naval aeronautic expert on the visibility of submarines from an aeroplane. He states that if the surface of the water is smooth and the water is fairly clear a submarine can ordinarily be observed visually from an aeroplane at any depth the submarine is likely to travel, which is usually not over 100 feet. Experiments have been made at Guantanamo, Cuba, and Annapolis, Md., and in the latter case the submarines were able to avoid observation at first by sinking to a muddy bottom. But the aviators soon learned to pick them out by some sign, such, for example, as escape of air bubbles."

In another article on the subject the Scientific American says that when the sea is rough it is much more difficult to discern a submarine. The captain of a warship can watch the course of a submarine by the bubbles it sends to the surface when the sea is smooth, but these bubbles are scarcely discernible when the sea is choppy. The disturbed surface inevitably makes it more difficult for an observer in an aeroplane to see what is going on below.

AN INCIDENT OF WAR.

General Hugo and His Meeting With a Wounded Moor.

General Hugo, father of that literary genius, Victor Hugo, was a daring soldier and officer. He served brilliantly in both Italy and Spain and especially distinguished himself in putting down bandits and guerrillas. That he was a man as magnanimous as he was brave is attested by a little incident of his career that his son narrated. General Hugo, accompanied by a single trusted hussar orderly, had occasion, at the close of a day of fighting, to ride across a portion of the battlefield as dusk was beginning to fall.

"He heard a feeble sound in the shadows," wrote Victor Hugo. "It was a soldier of the Spanish army, who dragged himself along the roadway, pale, bleeding, gasping and who cried, 'A drink, a drink, in the name of pity!'

"My father, touched, handed his canteen to his faithful hussar, and said, 'Here, give a drink to that poor, wounded fellow.' Suddenly, as the hussar, stooping, leaned over him, the man, a Moor of some sort, snatched the pistol he carried and fired it at my father's head, crying, 'Caramba!' The bullet passed so close that the hat fell, and the charger reared wildly backward.

"'Give him the drink all the same,' said my father."—Youth's Companion.

Punch and Judy.

Turkey is far from being the only oriental land in which a performance very like the English Punch and Judy can be found. Travelers have described entertainments of the kind in Persia, Japan, Kamchatka, India, Egypt, Syria, Nubia, Siam, Pegu, Ava, Cochin-China, China and Tartary. Mr. Villiers Stuart observed the Egyptian Punch flooring the mamcur (chief magistrate) and his cavasses quite in the style of the British Punch's conduct toward beadles and policemen, though in the Egyptian version the play ended morally with the hanging of Punch. The hero belongs to all ages as well as to most lands. Some have traced him to the Atellan farces of early Italy, and he has even been recognized in ancient Egyptian hieroglyphics.—London Standard.

Chanak-Kalesi.

Chanak-Kalesi, the straggling town near the "narrows" of the Dardanelles, means "earthenware castle" in Turkish and is so called from a celebrated pottery on the Asiatic side of the strait. An agent from this pottery used to be always on the lookout for a wandering European and hooked on to every passing ship. His boatload of gaudy crockery was generally more remarkable for gilding and tawdry color than for taste. But the forms of the vessels were often graceful, even classical, and specimens of the tall water jugs he sells, or once sold, can be seen throughout the Levant, though seldom in London.—London Chronicle.

A Swiss Philanthropy.

The custom still obtains in Switzerland, though not so generally as formerly, of newly married couples making a small gift of money immediately after the wedding ceremony to the school funds as a sort of thanksgiving for their education. These funds are used to provide shoes and clothing for poor pupils who would otherwise be unable to attend school.

On Her Brow.

"Before we married you promised me rings and brooches and beads to wear."

"Well, what of it?"

"I was just thinking that the only beads I've ever worn since are beads of perspiration."—Detroit Free Press.

What For?

"Pop, what kind of crops can they plant in the sea water?"

"No crops, you foolish child."

"Then why are vessels always plowing the ocean?"—Exchange.

A Considerate Girl.

Madge—He said you were very punctual. Marjorie—Why shouldn't he? I never kept him waiting more than half an hour in my life.—Lippincott's.

If you cannot get grapes, says a Russian proverb, try an apple.

BUT NO POSSUM

Celebrated McGrath Brothers of Stage Fame Coming to Chautauqua For a Day.

ALL KINDS OF RICH STUNTS

Presenting Programs With Pep and Ginger In Them and Featuring High Grade Music In Connection With a World of Popular Jingles—A Great Pair With a Strong "Punch."

The McGrath Brothers of Boston will be one of the very attractive and popular offerings of the musical program at Chautauqua. They are two brothers who know all that there is to know about the banjo. Their reputation as stars of the vaudeville and lyceum

make them a very desirable addition to the great week.

They present a dashing program, wonderfully interesting, daringly brilliant and full of variety. Their repertoire includes everything from the popular music of the moment to marches and the classical selections. They specialize in the best types of music. They play with the fire and mastery of long experience. They are artists and assuredly something different. A pianist works with them at each entertainment.

This is a classy little company and is said to put on programs of such action and enterprise that everybody gets enthused. They are just the antidote for summer ennui and a sure cure for the bookworm.

THE ENTERTAINMENT ART IN ITS VERY BEST FORM

Christine Giles Company to Royally Entertain Chautauqua Folk In Rousing Program.

The Christine Giles Company to appear at Chautauqua here is one of those organizations that devote all their energies and genius to the art of entertainment.

Christine Giles is herself a masterful platformist. For years she has starred

as a standard Lyceum attraction. She has always had associated with her a high grade of performers, who have supported her work admirably.

Now, with the addition of Ralph Bingham of Philadelphia, the premier funmaker of them all, the company takes first rank as a cure for the blues. It is said to be a genuine joy to hear and see a program by this great entertainment organization.

Some time ago George S. Dalgety of the New York Redpath office went into the hotel for his grip with its little Redpath paster on the side. He found a card tucked in the bag which read:

Do you belong to the Redpath family? We leave at midnight. Be in about 7:30 or 8 o'clock.
(Signed) WEATHERWAX BROTHERS.

That tells its own story and shows the big hearted, glad hand method that has made the Weatherwax Brothers the popular attraction that they are.

The long distance ticket selling campaign record is held by the Oneonta (N. Y.) Redpath Chautauqua. Mr. H. Bernard of Schenevus, N. Y., remitted $4 from England in order that two season tickets might be reserved for him.

AS COADJUTATOR

Is Rector of Baltimore Church and Will be Stationed in Utica

Utica, May 27.—The Rev. Charles Fiske, D.D., rector of the Church of St. Michael and All Angels, Baltimore, Md., was elected coadjutor bishop of the Episcopal diocese of central New York at the annual convention of the diocese in Grace church yesterday. The election occurred on the fourth ballot and the utmost harmony prevailed during the contest. Dr. Fiske's nearest rival was the Rev. H. G. Coddington, D.D., of Syracuse. Friends of Dr. Fiske in the convention stated that they were assured that he would accept the office.

Dr. Fiske is 47 years old and in his early life was a journalist. He was graduated from St. Stephen's College and the General Theological Seminary in 1896. For a while he was connected with the Associate Mission, Trenton, N. J. Later he was rector of churches in Westfield and Somerville, N. J., and other places, and he was secretary of the diocese of New Jersey. He was sent to San Francisco on a church mission after the earthquake. He was rector of a church in Norristown, Pa., on his return.

For the last five years Dr. Fiske has been rector of the Church of St. Michael and All Angels, Baltimore, which is said to be the largest Episcopal church in the South. It has more than 1,700 members. In that pastorate he succeeded the present Bishop Murray of Maryland. His acquaintances say that Dr. Fiske possesses a very attractive personality and he has been very prominent in civic movements. He is married and has a son.

Jewelry Men To Use Printer's Ink

W. C. Morgan, returned last night from the State Convention of Jewelers which was held the first three days of this week at the Hotel Onondaga, Syracuse. Mr. Morgan was accompanied to the convention by Mrs. Morgan.

B. J. Doyle, a former newspaper man, who is now conducting a jewelry business in Germantown, Pa., was one of the most interesting speakers at the convention. Mr. Doyle is managing a nation wide campaign of advertising which will be inaugurated by all the jewelers of the country commencing August 1. 1700 newspapers have already been engaged for the work of the campaign and there will be 3000 papers represented before August.

Mr. Doyle has succeeded in introducing some novel forms of advertising into his business with great success and at the present time is running a store which had never done a business larger than $11,000 yearly since its opening. Under Mr. Doyle's management it has done $31,000 in ten months. At his opening he displayed a widow full of one-dollar bills, offering to give them away to anyone who asked for them and in his speech at the convention yesterday, he stated that only three people had asked for the bills.

The convention closed last night with a banquet at the Onondaga which was attended by 250 members of the New York Association and their guests.

MAYOR INSISTS UPON HAVING NEW OFFICIAL

Many of those who doubted the veracity of the story which appeared in last night's Times to the effect that the Mayor was considering the appointment of a City Bacteriologist, took the trouble to interview the Mayor on the subject and learned that the story was founded on fact. The Mayor told one young man in particular that he was very much in favor of the appointment of a City Bacteriologist and thought that one was needed here.

In view of this statement it is expected that the Common Council will be asked to express its opinion on the question in the near future.

"THE CLEMENCEAU CASE"

Today's presentation at The Quirk is Teda Bara, in The Clemenceau Case, in which Dumas has attained the capstone of his towering genius. Iza's sinister beauty and its fatal effect on the lives of two noble men form the main plot of The Clemenceau Case. Pierre, her husband, whom she casts off for Constantin Ritz, she leaves with his career as a talented sculptor blasted forever. In turn she toys with the infatuated Ritz, shattering his hopes, ambitions and home life.

Pierre saves Ritz against himself. With heroic self-sacrifice he allows himself, apparently, to fall once more under Iza's spell. As she presses her false lips to Peirre's, he stabs her to the heart just as Ritz enters.

"I have saved you for your wife," says Pierre calmly as he telephones for the police. "As for me, Iza killed my heart years ago."

Charles Chaplin also appears with Mabel Normand in a roaring comedy, "Mabel's Married Life." On Monday the great New York Hippodrome production, "America," will play a return date. Patrons will remember with great pleasure this monster production.

"HEARTS ADRIFT"

Miss Mary Pickford will be presented by Daniel Frohman at the Happy Hour tomorrow afternoon and evening. In this play Miss Pickford depicts Nina, a twelve-year-old Spanish girl, the sole survivor of a shipwreck, which occurs just off one of the South Sea islands. Clinging desperately to the spar of the ship, Nina, half unconscious, is tossed by the waves upon the beach of this island. The little one survives the ordeal of the shipwreck and the hard life of the uninhabited island, subsisting on a diet of fruit, fish and herbs. The child thrives, makes friends and companions of the birds and beasts of the island, and skillfully contrives rude garments from skins and fibres.

Years later a wealthy couple, the Grahams are also shipwrecked near this island. Their yacht burns, and in the excitement husband and wife are separated, and each fears the other has been lost. Mrs. Graham is put into a boat and her rescue effected, but her husband, is washed ashore on the desolate island. Nina discovers his body on the beach, and seeing him move, timidly runs away. Every night while Graham sleeps Nina brings him food. One night, puzzled by the supply of food, Graham pretends to be asleep and catches Nina. She escapes and flees from him, but later observes that he appears friendly, and finally permits his approach.

In fear of a terrific thunder-storm Nina runs to Graham's cave for refuge. Graham shields her from the storm. Gaham tells Nina they must "marry", and he performs an impromptu marriage ceremony. For a while Graham is a bit remorseful, he is eventually happy in his love for Nina and their baby. Nina is supremely happy, but one day a boat comes to the lonely island. In it is Graham's wife, still persevering in a search for her husband. There is a happy reunion between the Grahams, while the poor little girl of the island is forgotten. But Nina sees the meeting and understands all. Sadly, slowly, she walks away, when Graham turns to look for Nina he sees her poised upon the brow of a cliff, her babe in her arms. Only a moment she stands there, and then leaps to death.

MILITIA COMPANIES TO GUARD PAPER MILLS

Watertown, May 27.—District Attorney Alverson and Sherif Hosmer are keeping a close watch on the strike situation at the Deferiet mill of the St. Regis Paper Company, where about 35 deputy shreiffs are guarding the property of the company.

At the first appearance of the development of such a situation, a call will be made for the militia to cope with the situation, and Company C of the National Guard, stationed in this city, will undoubtedly be the firts to be sent to the scene.

Sixty-three strike breakers, direct from New York, arrived here on a special train early this morning to begin work in the paper mills in place of the men who struck.

The total number of strikers is 450, ad of this number 300 are feirgners. The foreigners are Poles, Italians, and Hungarians. The fact that there are so many foreigners among the strikers makes the situation especially bad, as they are easily invited to trouble.

Artillery Attack Is Unparalleled

(Continued from Page One)

vessel struck a British mine and is withholding a decision until the facts are determined from American sources.

The Austrians and Germans resumed their offensive in middel Galicia yesterday. In a hard battle near Przemysl they report they have made progress. Vienna announces a crossing of the San has been forced east of Radymno. The number of Russian made prisoners is said to have been increased 25,000 in the last two days.

In addition, it is said the Austro-German army has captured fifty-four light and ten heavy canno. Sixty-four machine guns also have been taken.

In Flanders and Artois the Germans continue to make vigorous attacks in an endeavor to regain ground they have lost in recent weeks.

The Germans admit the British have captured part of their trenches to the northeast of Guenchy.

The fighting continues on the whole western front, but it is largely trench warfare and has not been decisive at any point.

The King of Italy is reported to have assumed supreme command of the army and navy forces and to have left for thef ront incognito.

The Italians, who havec rossed the Austrian frontier to the east, along a front of sixty miles, toward the Isondo River, have not yet met with serious opposition.

No important battle is expected until the invaders reach the river, as it is here that the Austrians are established, and on this line they will make their stand.

It is probable they will oppose the Italian advance by means of the same methods as caused the deadlock in Flanders.

London, May 27.—The Times correspondent at Petrograd telegraphs:

The enemy is developing a fierce artillery fire, under tcover of which certain movements of troops along the front are proceeding. Military observers consider Permysl at present is quite safe, and there is no reason to apprehend the envelopment and blockade of the fortress.

The conflict is proceeding on those fronts of Permysl constituting a continuation of the line in all other collisions on this front."

The Times correspondent with the Russian forces, telegraphing an acount of the Russian retreat from the Dunajec to the San, describes the German attack on the Dunajec as unparalleled in the history of war.

"The batteries," he says, "were massed firts in tiers of field guns, then howitzers and then the heaviest mobile artillery, which by a torrent of uninterrpted shell fire destroyed the Russian center, through which the enemy poured. In spite of the fury of the attacks the Russians retired undemoralized, and when the San was reached the gap closed and the armies were stiffened by the serveres, and here the Austro-German onslaught was stayed."

GERMAN BREWERIES IDLE; TEA THE CAUSE

New York, May 26.—Before the annual convention of the National Association of Manufacturers, which began its sessions yesterday in the Waldorf-Astoria, one of the most distinguished members of that body asserted that the Germans are rapidly becoming a nation of tea tasters, instead of what "Billy" Sunday calls "beer boosters."

John Trix, president of the American Injector Company, of Detroit, made the statement that within the last five or ten years the consumption of beer in Germany has decreased not less than fifty per cent., and that this result, contributing largely to the efficiency of the German industrial worker, has been brought about without any prohibition, temperance or local option agitation, simply by the introduction by German manufacturing concerns of a good brand of tea conventiently and cheaply served in bottles, where the men can get it during working hours.

Mr. Trix's conclusions ware based upon personal observation and investigation throughout the German Empire not long before the outbreak of the European war. He said German brewers admitted the enormous falling off in beer consumption at that time and that the proprietor of one of the handsomest brewery buildings in Munich while riding with him past the place deplored the fact that half the establishment was idle and that he didn't know what was to become of the business.

NORTHERN FEDERATION OF WOMEN'S CLUBS MEET

The Northern Federation of Women's Club is in session at Watertown. Fully 300 delegates are in attendance and a number of noted speakers are on the program.

The opening session of the convention was held this morning at Trinity House, and will continue through the afternoon and evening and tomorrow also.

Dr. Henry Turner Bailey will speak this afternoon. He is well known in the art world and his address will be "Color as a Source of Pleasure."

Mrs. Ella A. Boole, vice-president at large of the National W. C. T. U. will also be heard this afternoon. Her topic will be "Our Patriotic Problems."

Other speakers will be heard in subjects bearing on home efficiency, civic problems, and club work in general.

Last evening a reception was held at the Black River Club house. Prominent women and men throughout Northern New York were present.

WILL SPEND SUMMER AT GREAT MOOSE

Mr. and Mrs. G. B. Farley and daughter Ruth leave on Monday for Great Moose Lake. Mr. Farley will return after a fortnight's vacation and Mrs. Farley and Miss Ruth will remain for the summer.

Mr. Farley is an angler of reputation and he has supplied himself with plenty of tackle in anticipation for coaxing the little fishes from Great Moose.

Underwood Bill Caused Importation of Millions of Cotton Socks

Philadelphia, May 26 Special correspondence).—At Indianapolis President Wilson boasted that he is not a business man. In this city the other day he was roasted because this is plainly shown to be true.

The National Association of Hosiery and Underwear Manufacturers has just held its annual convention here, and all the speakers discovered that the one sure-fire method of getting a roaring response from the delegates was to hand out a slam at the administration for its lack of business sense.

The manufacture of socks and stockings, is not one of our greatest industries, but its products reach every person in the republic and it may therefore serve as an illustration of the results of the Underwood tariff. That tariff placed a minimum duty of 30 per cent. ad valorem upon cotton socks and stockings, a considerable reduction from the Payne-Aldrich tariff which had levied a minimum of 70 cents a dozen and 15 cents ad valorem, amounting to about 90 per cent. ad valorem. This reduction caused an average increase of 40 per cent in the importation of socks and stockings during the first seven months of 1914, at the end of which time the war put a check to importations of all kinds. In less technical words, about 7,000,000 more pairs of foreign-made socks and stockings were sold in this country during that period, than during the same period of the previous year.

General business was no better in 1914 than it was in 1913. In fact, general business was getting worse all the time in that year. So it cannot be claimed that the business of selling hosiery improved in any such degree as to account for this tremendous increase in the importation of foreign stockings, and there is, therefore, no other conclusion than that sales of socks by our own manufacturers were approximately 7,000,000 pairs less than they would have been under the old tariff. And the consumer has not been able to discover any difference in price. The manufacturer has been deprived of business, the laborers of employment, and no one in this country has been benefitted in the least.

At any rate; that is the way the manufacturers looked at it, and their sentiments were well expressed by Mr. Lincoln Cromwell of New York, who declared that the Wilson administration "scorned the counsel of business men in framing its tariff law, warning them away from Washington, as if, one and all, they were robber barons. It framed the Income tax law in spite of security experts and nobody knows yet just what it taxes. It pronounced the Federal Reserve act "A perfect measure" while it was in a form soggy with Bryanism, its notes redeemable in whatever happened to be currency instead of gold.

It defied the warning of commercial bodies everywhere in its struggle to jam through the Ship Purchase bill, and it passed the Seaman's bill which undoes our conventions with twenty foreign countries and creates new obstacles for ship owners. Add to this, while our revenues are rapidly shrinking, it appropriated the record sum of $2,231,000,000 in two years and asked Congress for $84,000,000 more than it got.

"These are some of the performances of officials who would redeem America from business men," he said. "With what promises they came into office! The robbery of a protective tariff was to be exchanged for a condition where everything sold cheaper but wages were higher. Our factories were to run overtime on exports. Our farmers and merchants were to get money for the asking which was formerly kept back for friends of money trust. An income tax was to trim the rich and lessen the burden of the poor. We are going to hearten 15,000,000 peons in Mexico by getting them ballots and making them owners of happy farms and prove ourselves to such a model of peace on earth and mercy mill that war the world around would cease to be.

"I would waste your time by detailing the failure of every item in this program. No retail price was reduced by the Underwood tariff. It decreased our exports and increased the imports from the day it passed until the war broke out in Europe. Our factories have been on part time and place-loan before the Federal Reserve Banks were opened. The income tax has been shifted to the poor through higher rent and mortgage rates. There never was such a fiasco in government benevolence.

"It is a sad thing that high ideals sincerely held and expressed with exquisite grace do not always square their theory with facts. Mr. Wilson's theory of the tariff and the high cost of living was wrong. Foreign goods under the new tariff can change very few retail prices under our selling conditions. Imports will be landed just enough under American prices to get the dealer's orders and no lower. The consumer gets no benefit, but our factories close and the workmen lose their wages."

BUILD FOUR HOUSES IN ANTI-SALOON FIGHT

Binghamton, May 27.—In twenty-four hours four dwelling houses have been completely constructed, furnished and tenanted in Binghamton's fashionable residential district in the war begun yesterday to prevent the granting of a saloon license.

The first of these was begun at 6 o'clock last night. At 9 o'clock this morning a four-room bungalow had been completed and occupied.

Seeing defeat, the saloon man, whose workmen had in the meantime completed the erection of the cafe, at once began rebuilding a barn within the required 300 foot radius. Two hours later the barn had been transformed into a three-room residence and tenants occupied it. Application for the transfer of the saloon license was then made, the proprietor having the approval of two of the three residents.

At 1 o'clock this afternoon the anti-license faction had fifty more carpenters on the job, and two more four-room bungalows were rapidly completed and occupied. Both sides claim a victory.

MACCABEES MUST RAISE PENSION FUND

Members of the Maccabees in this city and all over the State will be asked to pay their share of a fund of a million dollars which the Supreme Tent, at its meeting in San Francisco, voted to raise for orphans and aged members.

Under the plan that was adopted each member of the order will be asked to give $1, and each new member will be required to pay $1, toward a nucleus for the fund.

The Supreme Tent is considering a change in the by-laws of the order to permit youths between 16 and 18 years to become social members.

EDWARD HAWKSBY BURIED

The funeral of Edward Louis Hawksby took place this morning from the home of his parents, Mr. and Mrs. Thomas Hawksby, 303 Pine st., at 9 o'clock and from the Church of the Immaculate Conception at 9.30. Many attended the services.

The mass of the Angels was sung by the choir under the direction of Prof. Kenyon and the officiating clergyman, Rev. Father Lindsman, was robed in vestments of white and gold instead of the customary black. Miss Genevieve McCormick rendered a solo during the recessional. Burial was made at St. Mary. The bearers were cousins of the deceased.

Mr. and Mrs. Edward J. Yung, Mrs. Louis Lagoe and Mrs. Fink of Oswego attended the funeral.

K. OF C. DANCE IN AID OF BUILDING FUND

The Knights of Columbus will hold a card party and dance at the lodge rooms in Oneida st. tonight. Euchre and five-hundred will be enjoyed on the main floor and the council orchestra will furnish music for dancing in the ball room. Invitations for 200 have been issued and it is expected that a large attendance will grace the occasion.

Refreshments will be served at midnight and prizes will be awarded to the successful card players. The proceeds of the affair will go into the building fund of the council. The committee in charge comprises Messrs. Kavanagh, Flynn and Murphy.

SCIENTIFIC TEMPERANCE WILL BE DISCUSSED

The W. C. T. U. will meet at the home of Mrs. S. E. Morin, 708 Oneida st., Friday, May 28th, at 8 o'clock.

Miss Sevia Roberts, superintendent of the Department on Scientific Temperance Instruction of Onondaga County, will be present to make an address. A large attendance is desired.

GENEVA CITIZENS MOVE TO GET COMMISSION PLAN

Geneva, May 27.—A movement for a commission form of government in this city was launched at a meeting held last evening in the Common Council room in the City Hall, and attended by a number of representative citizens. Lopis J. Licht, former president of the Board of Public Works presided and Attorney E. J. Cook was secretary.

After the general advantages of the commission form of government were discussed, a committee was appointed to consider various plans which are optional under the general law providing for commission government.

It was explained that to form a commission government in Geneva a petition of at least 277 electors will have to be filed with the city clerk, who in turn will turn it over to the Common Council. The council can submit it to the electors at a special election, or it may be submitted at the next general election on November 2d. Should the voters decide upon any one of the seven plans before July 1st, officers under the new plan would be nominated by the various political parties at general primary day in September and voted upon in November.

SUED TO RECOVER FOR HIS DISCHARGE

Justice Emerson has set aside a verdict and granted a new trial in the case of Gerald B. Owens who was employed in 1914 by Falk and Menzies, highway contractors. The order was filed yesterday in the County Clerk's office. In March a jury awarded Owens $302.40. Owen's contention is that he was employed for the season and that the defendant firm in discharging him violated the contract. He worked for a time near this city but was later transferred to Livingston county. His wife became ill and he visited her here, remaining two weeks. Upon returning to his work the employers informed him his services were no longer required.

Justice Emerson holds that the question should be submitted to another jury.

FROSTS LAST NIGHT KILLED STRAWBERRIES

A heavy frost last night which caught many farmers unawares seriously damaged the county strawberry crop, according to statements of farmers this morning. All the berries were rapidly ripening and many farmers expected to market their product in ten days, but all the fruit touched by the frost will now turn black and is unfit for sale.

Although the strawberry raising industry has fallen off somewhat in the past few years, there are nevertheless many thousands of dollars invested in berries in Oswego county and the loss is a severe one to the strawberry growers.

Make Your Front Door Smile A Welcome

When the varnish on a front door begins to look weatherbeaten it's time to get busy with brush and varnish. And it's important to choose a varnish that's wind and weather-proof like

Luxeberry Spar

This finish was originally used for marine purposes only, but is now widely used for all exterior surfaces of natural wood exposed to the weather. Luxeberry Spar is absolutely waterproof and never turns white. Rain, snow and hard weather fail to dim its lustre or mar its beauty.

We handle varnishes and paints for every purpose and will be glad to advise with you if you care to have us.

"A HERALD OF PROGRESS"

THE LIMELIGHT

Louis D. Brandeis, Special Treasury Counsel.

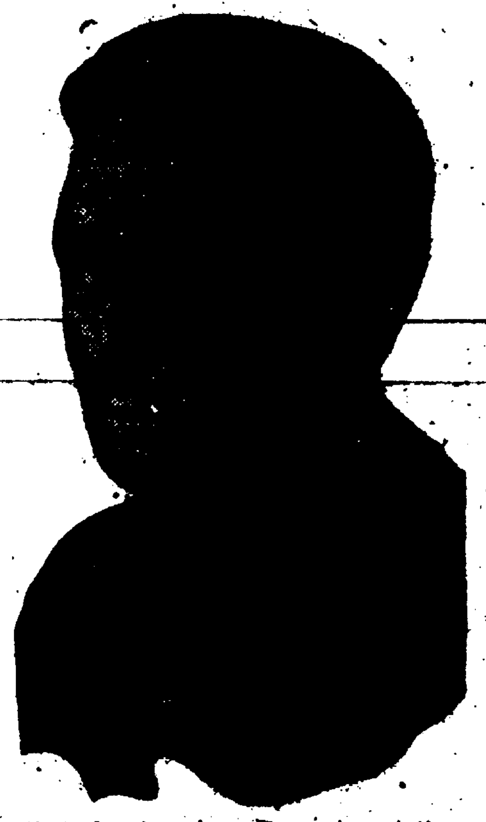

Photo by American Press Association.

In the trial of the suit instituted by the Riggs National bank of Washington against officials of the United States treasury department Louis D. Brandeis of Boston will act as special counsel for the accused officials. The bank has accused Secretary of the Treasury William G. McAdoo, Treasurer John Burke and Comptroller of the Currency John Skelton Williams of conspiracy to wreck it.

For many years Mr. Brandeis has been a national figure in American public life. He is an advocate of social reforms, a publicist of renown, a lawyer of distinction, who has served as special counsel for the government in many celebrated cases. Mr. Brandeis is regarded as an expert in legislation and administration efficiency.

While Mr. Brandeis is largely a product of New England, he is not a Yankee. He was born of German-Jewish parents in Kentucky in 1858. After a preliminary education in Germany he went to Harvard Law school, was a professor there for awhile and then began practice in Boston. Soon he was recognized as one of the most successful lawyers and acquired one of the biggest practices in the city. Although a man in public life, Mr. Brandeis is not in politics. His use of politics has been merely as a means to the end of pushing social and economic movements. Several years ago his admirers tried to get him to run for mayor of Boston on a nonpartisan ticket, but failed to get him interested.

Nephew of the Czar.

Recent dispatches from the scene of war operations in Poland have made

Photo by American Press Association.

GRAND DUKE DIMITRI.

mention of Grand Duke Dimitri of Russia, who was attached to the army which invested Przemysl and compelled the capitulation of that fortified city. Grand Duke Dimitri is a cousin of the czar, being a son of Grand Duke Paul, brother of the late Czar Alexander III. He was born near Moscow on Sept. 6, 1891, his mother dying six days later.

Like all of the Muscovite grand dukes, he was educated for a military career, and after graduating from the war college he entered the cavalry. After serving as a subordinate for a time he was appointed aid-de-camp to the adjutant of the Eleventh regiment of Grenadier guards and later was made captain in the Second regiment of the fusileers of the Imperial guard. Since hostilities began he has been on the fighting line and recently was decorated as knight of the order of Seraphim in recognition of meritorious services in the field.

I am the sea devil's daughter,
  Spawned where the dead men dwell.
I shoot through the hissing water,
  A lance from the prince of hell!
And ever I come to slaughter
  As mermaids ring a knell!

The pride of the seas of Britain
  Is the wreck of a huckster's cart—
Smitten as whales are smitten
  When the swordfish dares to dart!
The little gray shark has bitten
  A hole in the kraken's heart!

I am the eel of lightning;
  I blast whatever I strike.
The sea top fishes frightening
  As the shark affrights the pike!
Oh, but the bones are whitening
  Of things I did not like!

I am the babe of the devil!
  Deep hidden I skulk and lie,
Till a liner laughs in revel
  And then I dart on high
And kiss with the kiss of evil,
  And what I kiss must die!

—John O'Keefe.

AMERICAN LEGION WANTS ALL THESE TO JOIN IT.

"Be Ready For War" Body Seeks to Register Available Men.

The American legion, whose headquarters are at 10 Bridge street, New York city, is registering men who could help their country in a national crisis. It is classifying them under seventy-two heads, as follows:

1—Ex-soldier.
2—Ex-sailor.
3—Ex-marine.
4—Master.
5—Navigator.
6—Mate.
7—Yachtsman.
8—Merchant seaman (steam).
9—Merchant seaman (sail).
10—Diver.
11—Rigger.
12—Shipfitter.
13—Machine gun experience.
14—Powder man (experience with explosives).
15—Topographer.
16—Lithographer.
17—Photographer.
18—Surgeon.
19—Physician.
20—Nurse (trained, male or female).
21—Pharmacist.
22—Miner.
23—Engineer, mining.
24—Engineer, civil or marine.
25—Engineer, mechanical.
26—Engineer, hydraulic.
27—Engineer, sanitary.
28—Engineer, electrical.
29—Electrician.
30—Dynamo tender.
31—Surveyor.
32—Radio operator.
33—Radio mechanic.
34—Telegrapher.
35—Telephone operator.
36—Lineman.
37—Stenographer (male).
38—Motorboat.
  (a) Operator.
  (b) Owner.
39—Airship.
  (a) Operator.
  (b) Mechanic.
  (c) Owner.
40—Balloonist.
  (a) Operator.
  (b) Owner.
41—Motorcar.
  (a) Operator.
  (b) Mechanic.
  (c) Owner.
42—Motorcyclist.
  (a) Operator.
  (b) Mechanic.
  (c) Owner.
43—Machinist.
44—Plumber.
45—Railroad personnel (state exact nature of service).
  (a) Operation.
  (b) Construction.
  (c) Repair.
46—Stationary engineer (gas or steam).
47—Transport driver.
48—Mule packer.
49—Blacksmith.
50—Veterinary.
51—Farrier.
52—Horseshoer.
53—Saddler.
54—Wheelwright.
55—Carpenter.
56—Lumberman.
57—Cook.
58—Baker.
59—Butcher.
60—City police.
61—City fireman.
62—Constabulary.
63—Cowboy.
64—Explorer.
65—Guide.
66—Scout.
67—Trapper.
68—Hunter.
69—Chaplain.
70—Dentist.
71—Printer.
72—Construction foreman.

REFUSE $100,000 FOR BABY.

Parents of Little Girl Reject Offer of Schwab's Brother-in-law.

Mr. and Mrs. Howard Gray of Roaring Branch, Williamsport, Pa., have just refused an offer of $100,000 for their two-year-old daughter Vivian. The bid was made by John Mock, a brother-in-law of Charles Schwab.

Mock met Vivian out toddling with her parents, and it was a pure case of love at first sight. He suggested to the Grays that the little girl be allowed to visit him and that he adopt the child.

Mr. and Mrs. Gray ridiculed the idea, but Mock insisted he was serious, offering to pay as much as $100,000 for the girl.

"Not for ten times that much," said the mother.

"Not for twenty times," said the father.

Sadly Mock turned away and left Roaring Branch for the Panama-Pacific exposition with Mr. Schwab and some friends in a special train.

WAR SETS NEW FASHION.

Frenchwomen Will Look Only at Men With Beards.

Almost every French officer and private who returns to Paris from the front wears a beard. Too much occupied in fighting to bestow a thought on their facial appearance, they allow their beards to grow. They get accustomed to hirsute pendants and do not consider it worth while to remove them when they come to Paris.

Unknowingly they have set a fashion. Frenchwomen no longer will look at a smooth shaven face. So from Furnes to the Vosges every man wears a beard. For woman the beard means that a man has fought for his country, and it is prophesied that the new fashion will last for two seasons at least after peace has been concluded, and it will be for men a mode as glorious as was the necktie a la Steinthal after the brilliant victory won over the Statthalter by the Duc de Vendome.

Hit by Sermon, Wed on Spot.

In the midst of a sermon entitled "Take Unto Thyself a Wife" the Rev. George W. Whiteside of Frederick, Md., was interrupted by a man who whispered something. A moment later Hilleary C. Rockwell and Miss Nellie B. Barger stood in front of the pulpit and were married.

Paint Not Impermeable.

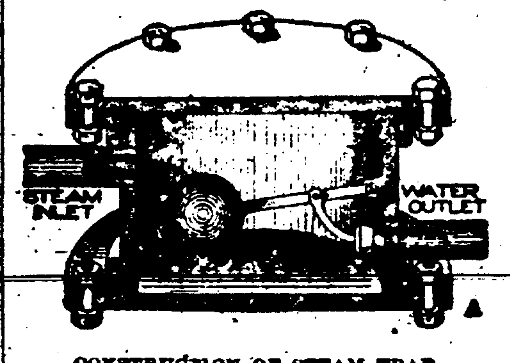
A study of paint films has shown that some are much better excluders or water shedders than others. It has been shown that linseed oil films are markedly porous, with the result that water soon penetrates to the surface below and, if it is of iron, sets up corrosion. Most dried paint films are porous, although this porosity may be lessened or prevented by the use of varnish, thus producing a film which is a good excluder. By the use of finely ground pigments the size and number of pores in a film may be very materially reduced, but even then the film is not necessarily a water shedder. Certain pigments seem to convey a peculiar property to a film in that it becomes wet with difficulty or not at all. Water rapidly evaporates or runs off from it and apparently none is retained upon the surface or in the pores.—Engineering Magazine.

Forcing Oil Into a Bearing.

Sometimes when a bearing becomes heated and requires oil it will be found that the oil will not flow down in the oil hole. Either the hole is clogged with dirt or the heat may cause the air to rise and prevent the oil from entering. Where a wire cannot be used effectively, the following remedy, although it is not infallible, is almost sure to make the oil reach the bearing: Fill the hole with oil and quickly place the thumb over it to prevent the air from escaping, and if the oil cup does not leak the heated air inside will rise above the oil, and in two or three minutes it will be forced into the bearing, even if it has to pass considerable dirt. When a bearing cannot be reached in this way, and when light oils, such as kerosene, are ineffective, try placing a little mercury in the hole and allow it to remain a few minutes, then use oil.—Popular Mechanics.

Easily Made Steam Trap.

An inexpensive steam trap can be constructed from a piece of eight inch pipe six or eight inches long, two flanged heads and a float, says Popular Mechanics. The pipe is threaded for the flanges, which are to hold the heads after they are prepared. One side of the pipe is drilled near one edge to receive a pipe from the lowest part of the steam system. The other side is fitted with a ball float and lever hinged near its center. The float lever is fitted



CONSTRUCTION OF STEAM TRAP.

with an arm shaped properly to carry a tapered valve on that end which enters the outlet pipe.

The action of the trap is as follows: The water from the condensation in the steam system falls to the lowest part and enters the trap. When the level has risen sufficiently to lift the ball at the valve is opened and the steam pressure forces the water out. The lowering of the water in the trap allows the ball float to close the opening.

Clock Repairing.

When the ordinary clock has served its usefulness and is apparently worn out, the jeweler's price to overhaul it frequently amounts to almost as much as the original purchase price, says Popular Mechanics. One weak place in the clock is the escapement wheel. The points soon wear down, thereby producing a greater escapement and pendulum movement, resulting in an increased strain and wear of the clock. If the tips of the teeth on the wheel are bent up slightly with a pair of pliers, the swing of the pendulum will be reduced, thereby increasing the life of the clock. Many of the grandfather's clocks can be put in order in this manner so as to serve as a timepiece as well as a cherished ornament.

Electric Air Brake.

Electric pneumatic brakes are soon to displace the air brakes used on the passenger trains of the Pennsylvania railroad, says the Scientific American. This form of brake has been found necessary because of the weight of trains made up of all steel cars. In long trains the shock and surging accompanying the application of the brakes has proved very objectionable indeed. In a twelve car train it takes eight seconds for the full braking force to be felt at the last car. With the electro pneumatic brake the braking power will be exerted at the same instant on all the cars, and within two seconds after the application of the brakes the whole braking force will be exerted throughout the train.

Dripless Skylight Glass.

The problem of eliminating the drip that forms on skylights from the condensation of the moisture in the air has apparently been solved in a new type of glass that has just been placed on the market. In this glass the under surface is formed in webs or channels running with the pitch of the roof and so shaped as to give the greatest degree of capillary attraction. The result is that all condensation is held and is gradually conducted to a gutter at the lower edge of the glass sheet. This glass is said to be effective in preventing drip on a pitch as low as 10 degrees.

INTEREST CENTERS ON WATERLOO AS CENTENARY NOW DRAWS NEAR

Great Battle In Which Napoleon Lost Struggle For World Rule Was Fought June 18, 1815.

Fiercest Fighting In New World War Is Now Taking Place Within Sight of Historic Field.

WATERLOO—a century long this name has stood the synonym for defeat overwhelming and disaster irretrievable. In that sense the term was born June 18, 1815, near the then obscure crossroads in Belgium, a few miles south of Brussels, where now stands, or did stand, the great mound commemorative of Napoleon's fall.

Today the interest in great historical battles of a hundred years ago is as keen as it was when the first news of it was carried into the Belgian capital and made known that the peril of world dominion had passed.

At Elba Napoleon dreamed and plotted while his conquerors debated and quibbled over a new political destiny for the French people. Counting upon republican hatred of the restored Bourbon regime, he stealthily embarked on Feb. 26 in his private brig with three small troop vessels filled with his bodyguard, 1,100 strong. Landing was made near Cannes and march began to Paris, more than 300 miles away, and with 200,000 Bourbon soldiers between the invaders and their goal.

Gathers His Own Army.

Lyons was reached, and France was in an uproar. His old marshal, Ney, brought a Bourbon corps into his camp, and in twenty days Napoleon entered Paris at the head of 100,000 soldiers.

There were no railroads or telegraphs to spread the news, but Napoleon learned somehow that the Duke of Wellington had assembled an army of 106,000 English, Dutch and Belgians, with Antwerp for its base. He also learned that his old foe, Marshal Bluecher, with Liege and the lower Rhine as his base, was preparing to march 117,000 Prussians to join Wellington. A third army, he learned, was on the upper Rhine ready to cross the border east or southeast of Paris and strike in unison with Bluecher and Wellington. This army would be supported after June 27 by a Russian contingent and number 250,000 men.

A map of the seat of war in Belgium in 1914 will serve as a guide to the Waterloo campaign of 1815. Napoleon led his army rapidly from Paris and on June 14 was at Beaumont, twenty miles southeast of Mons. The allies had been warned of Napoleon's coming and tried to meet it, but were nevertheless surprised when on the morning of the 15th the French attacked Bluecher's outposts on the Sambre.

Napoleon anticipated Wellington's column some hours at Quatre Bras by having Ney there with a corps early on the 16th, but Bluecher was already at Ligny, six miles southeast of Quatre Bras, on the Namur road. Napoleon hoped to wipe out the Prussians before Wellington's superior forces could beat Ney. In a five hour battle, beginning at 2 p. m., the 16th, Napoleon defeated Bluecher and bowled him off north toward Wavre, a divergent course from Wellington's.

Ney had two corps, and his orders were to carry Quatre Bras, then swing to the right, coming in upon Bluecher's right flank and rear at Ligny. With the First corps Ney attacked and almost won the fight. The second took the wrong road, and just as Napoleon was about to give the order for a grand charge at Ligny the columns of this corps appeared coming from toward Quatre Bras. They might be Wellington's troops hastening to aid Bluecher or they might be Ney's.

Wellington Repulses Ney.

Napoleon called a halt. The new troops proved to be the Second French corps, and Napoleon allowed it to return to Quatre Bras. It reached there too late, for Wellington had repulsed Ney.

Napoleon sent Grouchy with 30,000 soldiers to look after the fleeing Prussians while he marched to a junction with Ney and pushed after Wellington, who was also in retreat. The march ended at Waterloo, where Wellington, with 67,000 men and 156 guns, occupied a semicircular ridge south of the village.

About noon of the 18th Napoleon attacked Hougomont, a brick chateau serving as the key to the right flank of the enemy. Then followed the charge which answers to that of Pickett at Gettysburg. A battery of seventy-four guns rained missiles upon Wellington's center and left center. Ney led out 18,000 soldiers in four columns, three striking the enemy's left center at La Haye Sainte, a cluster of brick buildings, and a fourth the right, toward Hougomont. The main body swept away the Dutch and Belgian allies and plunged among some abandoned guns on the crest.

Wellington's second line, the division of Picton, only 3,000 strong, stood below the crest. Its leader was another Ney. Spreading his line out two deep to cover the wide front, he charged the mass of Frenchmen. For a moment the French halted and Picton gave the order to use bayonets. He was shot down as the French reeled and staggered down the hill.

Instantly the British cavalry of Somerset and Ponsonby rode in on either flank of Picton's line and dashed among the fleeing French, chasing them beyond the great battery. Life guards and dragoons sabered Ney's gunners and cut the throats of the horses, so disabling the entire armament that it was useless for Napoleon the rest of the day. Milhaud's French cuirassiers rode at the guards and drove them back up the hill, but victory had been wrung from the grasp of Napoleon.

Ney's grand infantry attack began about 1 o'clock and was ended in an hour. At that time strange troops were beginning to appear away off on the French right. They were Bluecher's. A mass of cavalry mustering all told over 12,000 sabers was brought forward by Ney. The space available for the movement was about 900 yards abroad, extending west of the Brussels-Charleroi road, near the Wavre crossroad, and the column moved in five lines.

In front rode the cuirassiers, wearing bright plates on their breasts. As the leading squadrons approached the British guns these were double shotted with canister and at every discharge tore great gaps in the French ranks. Some of the guns were fired when touching the breasts of the horses.

When the cuirassiers reached the crest they struck into a gallop and disappeared from view of their fellows behind, leading them to suppose the English had fled. They, too, set out at a gallop. But in an instant the tables were turned by Wellington's infantry. His third division, numbering 6,000 men, stood as if rooted to the ground in nine squares, five in the front row and four behind them, covering the intervals. Not a musket was fired until the cuirassiers got within thirty paces. Then the slaughter was awful.

French Charge to Death.

Although the force of the charge was broken, the French did not retreat, but rallied again and again—twelve times Wellington and other authorities declare—from 4 to 6 p. m. and rode forward in as many separate and desperate charges. It ended in the total destruction of Napoleon's magnificent corps of horsemen.

In the meantime General Buelow of Bluecher's command had got so close to the right flank and rear of the French at Planchenoit with a division of troops that Napoleon was compelled to detach the Young Guard and go in person to head him off. In the chief's absence Ney was to continue his attacks upon the English center.

With the infantry of the First corps Ney stormed and took from Wellington the position at La Haye Sainte. Ney planted some guns so as to rake the English line from right to left, and the French infantry made such use of the chance that they actually broke up some of Wellington's famous squares, according to French reports. Many of the leading officers were killed or wounded, and it was then that Wellington sighed for "night or Bluecher." The hour was 6:30. Ney held La Haye Sainte. Wellington's ranks were exhausted, and the danger was grave.

Having repulsed, as he supposed, Bluecher's attempt to turn his right, Napoleon returned to Ney's battleground. Eight battalions of the Old Guard and Middle Guard were formed in column, with Ney at their head. He was to charge diagonally across the battle front between La Haye Sainte and Hougomont. At the same time French infantry established at La Haye Sainte stormed from that vantage ground the British center. But the columns did not co-operate.

Grouchy had failed to keep Bluecher from throwing his weight upon Napoleon, doubling the opposition at Waterloo. When Grouchy overtook Bluecher at Wavre, the point where he must decide to fight or turn westward on a lateral route to unite with Wellington, the Prussian marshal left a single division to be sacrificed in holding off Grouchy, and with his main army hurried to Waterloo.

Last Dramatic Stand.

The last fight of Ney was dramatic at every stage. For some reason he marched so far to the left that he lost touch with the infantry from La Haye Sainte that broke Wellington's center and also carried his line under the fire of the English still occupying Hougomont.

However, his horsemen pushed on over the crest. There Wellington stood in person behind Maitland's English guards. Maitland's men were lying down out of sight of the French, who rode on until within fifty yards of the concealed foe. Suddenly Wellington, or a subordinate, roared the famous battle cry, "Up, guards, and at 'em!"

Springing to their feet, Maitland's men, four ranks deep, poured their fire into the intrepid horsemen and drove them down the hill. The Fifty-second British infantry lay along the angle formed by Hougomont on the flank of Napoleon's guard as it stormed the slope. With a left wheel, it poured bullets into the guard, ending it with a bayonet charge that sent the horsemen flying back in confusion. Wellington threw forward his cavalry reserves just as Bluecher's leading division struck the wavering French at La Haye Sainte, and the jig [illegible] was end for Napoleon on the field of Waterloo.

YOUNG FOLKS' CORNER

Game of Bird Sellers.

The players stand in a row, and two are left outside. These are the bird buyers. Each child is given the name of some bird. One is a blackbird, one a thrush, one a robin, one a humming bird, etc., until every child has been named.

Then one bird dealer says to the other:

"I want to buy a bird."

"What kind of a bird?" asks the other dealer.

"A bird that's strong on the wing," replies the first dealer.

"You can make your own selection," says the second dealer.

"Very well," says the first dealer. "I'll take a crow."

Of course, as soon as he says "crow" the child who bears that name must leave the row and run about and try to dodge back and forth before the dealer can catch him.

If the dealer succeeds in tagging and making the bird prisoner the bird is "out" until all the other birds have been selected and caught.

Names For Campfire Girls.

Here is a brief list of Indian names suitable for use by campfire girls: Neoskaleta, maid of the mist; Allaquippu, the queen; Wenonah, firstborn girl; Uncas, faithful; Itah, the bowl; Alletah, an Indian maiden of beautiful form; Tonguwa, autumn; Minnewankaru, the maid of the water Winola, an underground spirit; Adota, the stars; Minnehaha, laughing water; Iscoda, Ojibway word, referring to camp fire or the light emanating from council brand; Andoka, a worker; Kodo, a friend; Swatara, sweet water, referring to the sweet taste of water of a creek; Opessah, trustworthy; Ioka, beautiful place; Leola, Iroquois for the willow tree and Leni Lenape for bright eyes; Ioska, Indian word for the reflection of the moon in the water; Opitsah, sweetheart; Mitanka, youngest daughter; Sapana, the lily; Lakota, united; Keneshaw, a young eagle; Letavyana, daughter of the star; Leotowana, the weeping willow.—Chicago News.

Boy Scouts In Japan.

The worldwide boy scout idea is growing in Japan, although slowly at the start. Organized in Tokyo in 1913, it is now spreading in the provinces. The Tokyo boy scouts, who are under Major General Isaki, are being brought up in the ideas of patriotism and loyalty, in fulfilling their promises and in tempering body and mind. The troop comprises some 500 boys. The city of Shidzuoka had its boy scout corps formed in April last year; Fujine, Iwate and Kodaira, Akita, in August and Osaka city in October. These local troops, besides attending to the regular boy scout program, are making themselves useful in the war on injurious insects and are also learning simple engineering work. These exertions bring them remuneration, which they devote to the upkeep of their organization. The age of the scout ranges between eleven and seventeen.—East and West News Bureau.

Work Up or Scrub Ball.

In this game of baseball in its most complete form all of the positions are filled and there are three or more batters. When a batter is put out by any of the prescribed baseball plays he goes to the left field, the catcher becomes a batter and the whole field of players moves up one notch in positions. The order of succession is from left field to center, to right, to third base, to second, to first, to shortstop to pitcher, to catcher, to batter. This is a particularly valuable game for boys for the reason that it puts every player into every position and gives in the course of an afternoon's play all of the players more exercise and action than they possibly could have had in regular club play with specialized positions.

Pictures on Railway Cars.

The Western Railway of France runs an express train in the morning between Paris and St. Malo, the carriages of which have pictures upon them. One has an elephant, another a harp, another a snake, and so forth. There are anchors, balloons, flags, bunches of grapes, birds, a pair of scales, a star and an angler with his fishing rod. The explanation given is that passengers can remember pictures better than numbers, and if they leave the carriage temporarily they can regain it more readily. It is certainly a very Frenchy idea.

Vanishing Spoons.

Vanishing spoons are a source of amusement and are made from this alloy: Bismuth, eight ounces; lead, five ounces; tin, three ounces. As soon as boiling tea is poured into the cup in which they are placed the spoons disappear from view. The drawback about this experiment is that the spoons do not reappear. Of course the tea must not be drunk.

The Fairy's Watch.

One night when I lay very still
And could not get to sleep
I felt that on my window sill
A fairy watch did keep.

For shadows that I used to fear
Upon the dim lit wall,
Seemed not to creep that night so near
Or waver in the hall.

The neighboring frogs croaked soft and low,
And e'en the whippoorwill
By his faint whistling seemed to show
Who stood upon my sill.

The insects in the evening dew,
The cricket's voice less shrill
Showed well such tiny creature knew
A fairy watched my sill.

—Philadelphia Record.

Dancing Gown of Orchid Silk

Quaint Trousers Effect, Girdle of Opalescent Bandings and Bodice of White Chiffon

Designed by Joseph, New York.

ORIENTALISM, with all its glow and sparkle and color, is suggested by the gown in this illustration. Dreams of the harem and the lazy life indulged in by its inmates dance before our mental vision. The skirt only suggests, however, the trousers of the harem since it is developed upon an underskirt and simply turned up at the bottom and sewed fast to the underskirt.

The long waisted bodice is attached to the skirt by a girdle of opalescent bandings, the same trimming outlining the top of the bodice. The gown is developed in orchid silk. The bodice is of white chiffon. The trimming around the top of the bodice and the girdle is linked together by strands of iridescent beads. Chiffon is used for the tiny sleeves; also to build up the top of the bodice. Both sleeves and neck are outlined with iridescent beads.

There is a marked difference in the belts and girdles of today. In the first place, they are much narrower, and, in the second place, nearly every one of them has a military touch.

Gilt tassels are being worked very hard to do their part toward giving the military note, and brass buttons are employed to add to the soldierly appearance. Very convenient for small change are the two small pockets which frequently appear on each side of a belt. The coin is quite safe, for each receptacle is provided with a button and buttonhole to fasten the pocket flap to the belt proper.

The somberness of a black moire girdle is relieved by three rows of gilt braid, arranged down the front, and two gilt tassels, which suspend from the points of a turnover effect placed at the top of the girdle.

Biscuit and blue is a substantial old fashioned combination, and its revival is cordially welcomed. For the street it is admirable in cloth or linen, and we shall see much of both of these before the summer is advanced. In the evening there is a strong inclination to drop dark blue over mastic colored satin, but the effect is not so good as when the colors are contrasted in a less violent way. A biscuit colored satin girdle on a blue chiffon gown goes very well, and blue collar and cuffs in the cavalier fashion on an afternoon frock of mastic colored satin are well worth adopting.

ANNA MAY.

PRETTY LINGERIE.

Simple and Dainty Night Robe, Lace Trimmed.

DIMITY AND LACE NIGHTGOWN.

This is a year when many women are making their own lingerie so they require models that are not too intricate of execution. Shown in this illustration is one of the very prettiest patterns for a simple night robe. The yoke and sleeves are of lace and the gown part is of dimity.

INVENTIONS WE NEED.

Plenty of Opportunities For Would Be and Could Be Edisons.

The world is full of would be Edisons, and the point we want to bring out is that quite a lot of them are could be Edisons.

A man invented the stocking frame for weaving silk stockings. He got the idea while he sat watching his wife work. But surely he wasn't the first man who sat and watched his wife work.

There is a huge fortune for the man who can commercialize weeds. The raw material is inexhaustible, for it renews itself automatically every year. It might pay a reader in the paper making trade to follow up this idea.

Then we want a paint that will last as long as the material upon which it is placed and an iron that won't rust. We want something that will counteract the wearing effect of the atmosphere. It's going to be invented some day, and it may as well be done now, and you who read this may as well be the person to do it.

In some remote corner of the earth today a could be Edison may be experimenting with the possibilities of cities on the sea. There are millions of square miles of water that are more or less wasted, and sooner or later, as the land area of the earth becomes crowded, people will inevitably take to cities on the sea.

Above all, keep your eyes on Nature, who is continually making inventions which she never protects with patents.—Stray Stories.

More Miracles Ahead.

Who can predict what the future will be, in view of what has already occurred in this generation of miracle working? New inventors, standing on the shoulders of those who so transformed things during the last half century, will doubtless learn still greater secrets of nature. Much of our worry over posterity is idle. While we are handing down many serious problems for posterity to wrestle with, we are also giving it the richest legacy any generation has ever had. Thanks to our inventions, the youth of tomorrow will live more before he attains his majority than "Methuselah did in all his stagnant centuries."—St. Louis Globe-Democrat.

NEW LINGERIE.

Antebellum Underwear Would Be Bulky Now.

ETHEREAL QUALITIES LIKED.

Inset With Filmiest Lace, the 1915 Undergarment Is Fragile, but Lovely, and Suits the Gowns of the Present Season—Resume of Earlier Styles.

"Do with our outer garments what you will," we say, "but don't expect us to adopt antebellum underwear, because we won't consider it!"

Picture those chemises, of thoroughly "durable" material, trimmed with zigzag cotton braiding or the even more horrible cross stitch in colored embroidery cotton!

Think of the long sleeved, ample night robes, with their band collars, buttoned in the front with one button, and their solid embroidery trimming!

Remember the series of petticoats, beginning with a short, scalloped flannel one and continuing outward in layers of starched cotton, and then bless anew those filmy but practical, becoming and altogether comfortable garments which are hidden by the gowns of 1915.

Let us discuss first the wisps of chiffon cloth and chiffon displayed in all seriousness as underwear by the lingerie shops this spring, because they are so exquisite, extravagant and ridiculous.

One set is called "dawn mists" and is worthy of its name. Of filmy rose color, the nightgown, envelope chemise and princess slip are all trimmed with nothing but wide hems of their own material, through which are run the thinnest of white satin ribbons.

Other sets, in empire form, are decked with groups of tiny chiffon roses. Some are inset with finest valenciennes.

A bit less ethereal and really very wearable and alluring are the creations of chiffon cloth, much like indestructible voile, which are found in lovely one colored sets, or in white grounds with groups of Dresden flowers in pastel shades, or in the more startling Poiret bouquets.

UNDERWAIST AND DRAWERS.

Some models are just touched with filet lace, for this variety is enjoying a great vogue just now, and appears also combined with crepe de chine, handkerchief linen and batiste.

Crepe de chine as a material for underclothes is thoroughly established. The charming, almost untrimmed models in the heavy quality, which were seen all last winter, are giving way to the lighter weights, lace trimmed or ribbon run, which are more appropriate to the warm weather.

Untrimmed garments in this weight are also procurable for those who have adopted the simple line in lingerie, which the pussy willow taffeta, requiring no ornamentation beyond its beautiful self, first taught us to like. Advocates of crepe de chine for summer wear—and there are many—extol its noncrushable qualities.

It is well to remember in buying silken undergarments that a flesh color or pink is preferable to white, as washing only makes it prettier, while the white is almost sure to become yellow after laundering.

Lovely as the silken materials are, practical as they have shown themselves, there are women after all for whom linen remains the material par excellence for underclothes.

The combination underwaist and drawers shown in the illustration is made of finest handkerchief linen with inserts of filmy fillet lace with edgings of val. The waist and drawers are attached together by beading through which ribbon is run. Ribbon quite broad, about an inch, is run through the openwork of the lace on waist and drawers.

Featherstitching and hand run tucks form the only decoration of some of the new French "dessous." Many gowns and chemises have no ornamentation at all except large buttonholes in an empire line through which are drawn inch wide pink ribbons. Filet lace and Russian lace are substantial in wearing qualities and look ephemeral.

The favorite envelope chemise, which has been adopted with so great an enthusiasm, is procurable now in different priced qualities of handkerchief linen, as well as in the humbler batiste, in both the mercerized and unmercerized varieties.

D/34

By Edmund J. LaPorte

Without taking the merits of the Falley Seminary site into consideration it might be stated here that the plan to use a portion of the site for a high school athletic field is not feasible. The grounds left when the school is erected, no matter how small the school might be, would be too small for a full-sized baseball field and while it might do well enough for grammar school league games, it would not suffice as a high school athletic field. A very small plot of land is large enough for spring practice which entails base-running, batting and infield practice for the most part, but a piece of ground 150 yards square is none too large for an adequate athletic field. The fact that residences border the property and the residents would naturally object to the noise and clamor which attends any athletic contest is also a point against the advocation of the site as a possible athletic field.

* * *

Any athletic field is a far, far dream of the future, it is well understood, but when the time comes, enough land should be purchased so that the football, baseball and out-of-door basketball games can be taken care of on the same playground.

* * *

"New Pitchers Needed by Local Ball Club."—Syracuse headline.

After we located the Stars, sagging the bottom of the league standing with a mark of .188, we heartily agree with the headline and suggest that a few new catchers, first-basemen, second base-men, etc., as well as a new manager and new financial backer would not be amiss. When Syracuse makes 15 hits to Scranton's 10, and then loses the game 9-8, the pitcher is not the only one in need of soothing syrup.

* * *

Watch for the batting average of the Fulton High school team—they will appear on this page in a few days—or as soon as we get time to dope 'em out.

* * *

There are a few players on the local high school team who are soreheads. In other words, they seem to think that knocking consists in telling the truth about their playing. We can think of one man in particular who objected strenuously when The Times box score charged him with three errors in a certain weird game. In reality the player in question made five miscues, but the scorer was lenient. This particular player in the last game, did not accept a chance that did not practically walk into his hands. In other words, he laid down on his fielding average, for the reason that he doesn't like the knocking, or truth-telling, whichever you choose to call it which necessarily follows five consecutive miscues, some of them on easy chances. Any man can be off his game, but when he kicks at the truth he is "off" elsewhere.

* * *

Willie Meany knocked his sparring partner cold yesterday with a left-hand uppercut at close range, a punch which the local lad has been perfecting for some time. He intends to give this punch a try-out against Veau in tomorrow's night's bout, and if it lands it's "Good Night" according to Meany's followers.

* * *

No wireless messages have been received from Hank Mott, but it is assumed that he is still doing the triple turn with the carnival company at a generous stipend, which includes, of course, provender of some sort or other. Hank could pass up the pecuniary item on occasion, but woe unto the manager who tries to cut into Hank's rations.

* * *

The public spirit shown by Miss Margaret Green who has generously given the State st. school children the use of a plot of ground for athletic purposes is to be commended most highly. The land will be used for basketball and tennis and the grounds will be fitted out with funds raised by the pupils. If one resident in every ward would emulate the action of Miss Green, there would be many grateful school boys and girls in this city. A play-ground, and particularly a tennis court is something that can be used during the summer vacations as well as during the school terms. It keeps the children off the streets and, if the sports are properly supervised, great benefits can be derived.

* * *

The Skaneateles High school team plays Fulton at Athletic Park Saturday afternoon. Barnes will pitch and the boys will not forget the loss of the game last week nor the terrible officiating that graced the occasion. Regarding the officiating, the following facts are vouched for by members of the local team: The bases were full and the pitcher threw four balls. The runner dropped his bat and started for first base, but was halted by the umpire who yelled "Hey—you can't go there—there ain't no room for yuh!"

Pitcher Foster, Who Looks Like Boston Red Sox's Best Bet

Photo by American Press Association

THE Red Sox, picked by many experts to romp away with the flag in the Johnson circuit, have been a sad disappointment to date, and but for the brilliant work of one or two of the team's stars one would have cause to wonder why the team was so highly rated. George Foster of the hurling staff is one of the "bright shining stars" who have thus far sent their gleams shimmering through the rifts of dark and dismal gloom which permeates the atmosphere in the Red Sox camp. Right from the opening of the season George has been performing in big league style, and already he has taken the measure of some of the best batters in the league, and he has bested men like Johnson and Caldwell in pitching duels. With the rounding into form of the balance of his staff Manager Carrigan might yet show the fans that no mistake was made when his charges were made favorites in the race for the American league bunting.

BEASAW IS IN FINE SHAPE

He and Meany Are Bound to Meet Foes Worthy of Their Steel

Eddie Beasaw and Willie Meany, two promising young local fighters, who are under the wing of John "Tuck" Ward, the local fight manager, will meet two fast boys in the Syracuse Arena tomorrow night. Beasaw will meet Young Ross, an Italian boxer who tips the beam at 116, and Meany will try conclusions with Eddie Veau, of Solvay, who is reputed as a fast and clever lad, with a good punch.

Beasaw has not made an appearance in public in some months, as his fine showing in his first battles caused some of the would-be's to fight shy of him, and there have been few who wished to try any of his game. Ross, however, makes a pratice of meeting all comers, and has a long string of victories by the K. O. route to his credit. Beasaw has all of the earmarks of a first-rater, as he is fast, clever, wields a wallop and has plenty of heart. He should have little difficulty in disposing of Ross, as he has kept himself in prime condition despite his long lay-off and is good for a twenty round go at any time.

Meany is new at the game, but he showed up so well in his workouts that Ward two weeks ago in his battle matched him with Young Crozier who has proved himself a stumbling block in the path of aspirants to fistic honors in this section of the state. Meany, in spite of his ignorance of ring-generalship and his age, made Crozier look foolish, as the Syracuse lad had been touted as a world beater, and Meany had him covering up and stalling many times in four rounds. Meany meets a man tomorrow night who is not considered Crozier's equal, and Willie's friends predict a win by a knock out.

The fighters, their seconds and two score of fight fans from this city will leave for the battleground early tomorrow night in a large auto bus and in private automobiles. The boys have been training at Ward's fight camp at Stop 33 and their manager reports them in fine condition with no excuses to offer should they lose.

DOUBLE LEAGUE GAME JUNE 12

Fans of Four Towns to Meet Here for Opening of 1915 Season

Unless something unforeseen happens before that time, the baseball fans of thisc ity will be treated to a real-dyed-in-wool "Opening Day" in this city, Saturday, June12, at which time the Double-O League comprised of teams from Baldwinsville, Fulton, Phoenix and Oswego, will kick off the lid and sally forth into the light of the 1915 baseball season with flags flying. It was definitely stated yesterday that the Rowans of Oswego have made arrangements with the authorities at Fort Ontario, by which the team will be able to use the diamond for Saturday games, and with this announcement the entrance of the Oswego team into the league fold is assured. The Baldwinsville and Phoenix teams have already signified their willingness to enter the league, and the sentiment of the Fulton fans is too well known to receive further mention. The league idea here is going big and this town should set a record for support unsurpassed by any other in the circuit.

It is planned to hold a league meeting in this city next Wednesday night at which time two representatives from each town will be on hand. The newspaper representatives from each town will also be present and the schedule of the league, as well as numerous points coincident with the organization of the circuit will be decided upon.

In view of the fact that the Independents will play the Rowans of Oswego here Memorial Day, and have already arranged a game for Saturday, June 5, it will not be possible for the league to make a formal start until June 12. In the interim, the members of the various clubs will get busy and some sort of a celebration will be decided upon. Each town will have an "Opening Day" and the two sites for the first games will be decided by a toss.

On the second Saturday of the season, the losers of the toss will hold their "Opening Day" and in that manner all the teams will get a chance at this popular means of starting the ball rolling.

It is certain that Fulton will be represented by one of the strongest teams in its history. Feeley, the star Rowan pitcher of last season is employed in this city, and it is rumored that he will cast his fortunes with the local league team. The rest of the line-up will be practically composed of players of the Independent team, all of whom are fast men and well qualified to represent this city in the league.

RACING RESUMED IN BERLIN; AMERICAN WINS

Horse racing was resumed in Germany today with the opening of the spring meeting at Hoppegarten track, in a suburb of Berlin, in the presence of a crowd almost as large as is usually present in peace times. The pari-mutuel system of betting has been temporarily abandoned, but bookmakers are allowed to accept wagers, although the odds are not published.

There are large fields for all races with twenty-six starters in the principal event. Subjects of nations at war with Germany are barred from the grounds. This rule applies to trainers and jockeys as well as to spectators, and was adopted as a measure of precaution to prevent hostile demonstrations against British race track followers, many of whom were engaged on the German turf before the war began.

It had been feared the controversy over the shipments of munitions of war from the United States to nations hostile to Germany might result in some exhibitions of feeling against American trainers and jockeys, but two victories to the credit of Archibald, an American rider, seemed the most popular of the day.

Do you know the real clean kind of Boston Brown Bread? Get Black's baking and you shall have the answer. adv

Oswego's First Cinch to be Its Last

When Oswego High School meets Fulton team at Oswego tomorrow afternoon they will face an entirely different line up from that of the first game—the same faces perhaps, but players with a different spirit. In spite of the fact that Oswego won the first game, which was played here about two weeks ago, the local boys do not concede the Oswegonians fair victory as the opposing players employed unsportsmanlike methods several times during the contest. Wiggins, the Oswego captain, deliberately tripped Pullen while Markey was rounding third and a fist-fight was narrowly averted. One of Oswego's runs was corralled by a player who claimed that he had been hit by a pitched ball, whereas the spectators could plainly see that the ball never touched him.

The officiating at the game was not what it should have been in spite of the fact that a man who has in the past, umpired many league games, was handling the indicator. It is expected that the officiating in the first game will eclipse, by far, the handling of the game tomorrow, as the Oswego umpires are a particularly distasteful species to Fulton ball players.

O'Brien will pitch for Fulton and the rest of the line-up will be as follows: Bray, c.; Caffrey, 1b.; Barnes, 2b.; Wilcox or Martin, ss.; Keeler, 3b.; Pullen, lf.; D. O'Brien, cf.; Thompson, rf.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. adv

Game and Gun Club to Hold a Shoot

The Fulton Game and Gun Club will begin the work today of distributing a consignment of 12,000 trout which have been shipped by the State Game Commission. Charles Stewart and George Nichols have been appointed a committee to distribute this shipment which will be placed in streams near this city and throughout the county.

The local club has made no definite plans for the coming season but a meeting will be called in the near future at which time something in the nature of a club shoot and an affair of a social order will be decided upon. The club is still maintaining its traps at Stop 28 and many gunners are anticipating the opening of the trap-shooting season. The club now boasts more than 100 members.

ACCIDENT VICTIMS IMPROVE

Clinton Edgely, who was injured in a motorcycle accident last week and who has since been confined in the Lee Memorial hospital, has recovered sufficiently as to be able to talk with his friends for short periods and his rapid recovery is expected.

Pentus Ingersoll, the six-year-old boy, who was run over by a wagon a last Saturday and was taken to the hospital yesterday is improving slowly, but the exact extent of his injuries have not been determined as yet.

Steamer Rugs for cool evenings in the auto. VanWagenen, Inc. adv

F. H. S. Players Witnessed Relays

James Fairgrieve and Harold Caffrey of the class of 1915 of Fulton High school returned yesterday morning from a trip to New York city, Philadelphia and Princeton University lasting four days. The young men left this city Friday and went to Albany, thence to New York by the steamer C. W. Morse. They attended the relays in Philadelphia Saturday, which were interrupted by rain late in the afternoon. The Fultonians, however, managed to see the tennis matches between Williams and Church and some of the relays. While in Quakertown the young men were the guests of Thomas Johnson, an alumnus of Fulton High school who is taking a course in finance and commerce at the University of Pennsylvania.

On Sunday the young men went to Princeton University, at Princeton, in order to get definite information concerning the entrance requirements there as both expect to enter the arts course at Princeton next fall.

Suppertime comes, you're not ready for it? Then order from the grocer Black's fresh-every-afternoon rolls and buns.—adv.

Picture Taken From Cyrus Townsend Brady Story Is Under Ban

The first action of the Fulton Board of Moving Picture Censors was taken yesterday when notice was served on the Happy Hour Theatre by Irving Galusha, the chairman of the Board, that the picture "Hearts Adrift," featuring Mary Pickford, the celebrated movie star, which will be shown at the theatre today, must be shown to the Board of Censors before it could be screened publicly. The management of the theatre is indignant at the order, and Manager [illegible] stated that he would start civil action if the local board attempted to out the film.

According to reliable authority the picture has been passed upon by both the Pennsylvania and National Boards of Censorship. The story is from a novel of Cyrus Townsend Brady, "Sparks Fly Upward," and as Mr. Brady is a retired clergyman, the story is not expected to contain anything objectionable. The film has been shown here before and there were no exceptions taken to it. Miss Pickford does one dance which might be termed suggestive by one very critical, but during the dance Miss Pickford is far away from the camera.

The management of the theatre stated today that this move is only the first of the censorship board. The operator at the theatre, said this morning that Mr. Galusha, the chairman of the committee, has also taken exception to scenes where cigarette smoking is in evidence and that action would shortly be taken to "cut" these scenes. Drinking at dinners and in private homes as pictured in several famous films also comes under the ban of the chairman of the local board, and the board proposes to compel the theatres to omit these scenes.

It may not be possible for the theatre to show the picture to the censors before the matinee performance as the film is not scheduled to arrive here until 1.30 o'clock. In that case the afternoon show will have to be held up until the censors see the film, unless the board consents to view it with the audience.

The fact that Mr. Galusha was at one time the owner of a moving picture house here, and made no attempt to question films at that time, adds to the indignation of the theatre owners.

This morning the management of a thatre and the chairman of the Board of Miving Picture Censors had a warm argument regarding the activities of the new board. Many witnesses were present and the war of words attracted much attention.

It appears that one manager was visited last evening by Mr. [illegible] of the Board. Mr. Galusha annoyed the [illegible] and afterward in a conversation with the manager, Mr. Galusha stated that he did not approve of certain scenes which depicted men smoking cigarettes and also objected to scenes wherein toasts were drunk, and wine glasses were in evidence.

This morning the subject was taken up again and after the particular manager had listened to the different scenes which were to come under the ban, the manager said to Mr. Galusha, "When you were running a moving picture house and I was manager for you, you didn't care what pictures were shown."

Following the sensational happenings of the morning came the resignation of one member of Mayor Fox's censors, that of Mrs. Charles S. Robertson, who in the following terse manner informed the Mayor of her desire to be relieved of duty:

Fulton, N. Y., May 28, 1915.

"Hon. Frank E. Fox,
"Fulton, N. Y.

"Dear Sir:—I hereby tender my resignation as a member of the Board of Moving Picture Censors.

"Sincerely,
"Mrs. Charles S. Robertson."

ROY MUST ANSWER FOR MISAPPROPRIATION

Little Miss Clara Monta goes to [illegible] but in the afternoon she earns [illegible] taking care [illegible] Mrs. [illegible] yesterday [illegible] Clara was wheeling the [illegible] down Cayuga st. accompanied by Marion, the daughter of [illegible] and Mrs. Fitzgerald of the [illegible] Army.

[illegible] had gone into The [illegible] about an hour previous and [illegible] was taking the baby up to his [illegible]. Before leaving the child the [illegible] put her pocketbook in the [illegible] carriage and the little one was [illegible] with it. In front of the Happy Hour theatre the baby leaned [illegible] of the carriage and dropped the pocketbook on the sidewalk.

Roy Hall enters the plot at this [illegible]. He saw the pocketbook and, [illegible] either little girl could pick it [illegible] appropriated it to his own [illegible] and neither threats nor supplication could make him give it up. Then [illegible] girls decided to go for the [illegible] [illegible] be called to account in City Court today.

[illegible]NDER CLUB HAD [illegible]HILLY OPENING DAY

The Pathfinder Boat Club opened the summer season with the first field day of the year this afternoon at the club grounds on the island south of the city. An auto bus service between the City Hall and the Club made trips at regular intervals thruout the afternoon and many members and invited guests made the trip in automobiles before lunch.

A team composed of married men of the club is trying conclusions with the single men this afternoon in a game of baseball and the tennis courts have been busy all day.

This evening a special dinner will be served under the supervision of thec lub steward, and reservations for 150 have been made. In spite of the cool weather the attendance this afternoon, when the field day program began, was much larger than the club officials had anticipated.

WEATHER FORECAST

[illegible]

TOO FEW TO ATTACK, TOO PROUD TO GIVE IN

London, May 28.—The British "Eyewitness" in a dispatch from Flanders says the Germans in the opposing trenches are growing weary of the war and are [illegible] to go home. The report tells of comparatively small actions in various parts of Flanders, and the writer says the German losses [illegible] have been very heavy.

"A building in La Bassee used by the Germans as a bathing establishment was hit recently by one of our howitzer shells while it was full of German officers," he relates. "Between twenty and thirty of them were killed or wounded.

"Not far from Ypres our anti-aircraft guns brought down a hostile aeroplane, which fell [illegible] on a parapet of the German trenches within sight of the French lines. Both the pilot and the observer must have been instantly killed. The French, noting that the falling machine was exciting considerable interest among the occupants of the enemy's works, trained machine guns on the spot and waited until a sufficient number of Germans had collected; then they opened fire on them."

Continuing the observer relates how a detachment of Germans, attempting to make use of their deadly gas at Ypres, were themselves suffocated by this gas after a French shell had burst the cylinder containing it.

The Germans are still extracting the utmost from the country they occupy. Mention is made of one incident in connection with the recent sporadic bombardment of Lens by the Allies.

"Six shells fell on the Lens station," the writer says, "and the town was fined 3,000 marks ($750) for each projectile, or a total of 18,000 marks ($4,500), part of which was distributed among the soldiers. The ground for the fine was the allegation that some of the inhabitants must have been in communication with the enemies of Germany, hence the bombardment.

"That some of the enemy at least are not enjoying themselves in Flanders is shown by the following message flung into the British trenches:

"'We are too few to attack, too many to retire and too proud to surrender; but we all want to go home.'

"A few days ago a kite was flown over our lines. On it was written:—'Please send this back when the wind is favorable. Wouldn't you like to come over here, as you have no more [illegible] left? Won't you give up soon? We do not like it any longer.'

"Similar overtures have been made at different points on our lines."

The only considerable advance by the British forces that the "Eyewitness" chronicles was on the evening of May 20, when they seized points to thhe northeast of the Festubert-La Quinque road, gaining ground a quarter of a mile deep and a half mile wide.

120,000 ITALIANS FACE 15-MILE AUSTRIAN FRONT

Paris, May 2j.—Driving the Austrian guard before them Italian armies crossed the Isonza early yesterday and have advanced to the vicinity of Malfalcone, a town on the Golf of Trieste, twenty miles from thec ity of Trieste. The river crossing was made after almost twenty-four hours of heavy artillery action during which the Austrians in the hills east of the Isonza suffered severely.

Further to the north the Italians attacked at several points along the Corinthian frontier and a battle of some importance is under way in the Carnik Alps in the region of Ploecken. West of the Praedid pass in Austria there is fighting of a serious character, but in the Adige valley little but skirmishes are reported.

In an official statement issued in Rome last night the Italian War Office said of the operations:

"On May 25, on the Tyrol-Trentino frontier, the Italian troops occupied the heights of Montbanno, from which point the enemy was forced to retreat, abandoning tents and material. The Italian artillery located Tonezzo and silenced the enemy's fire.

"In Carnia our success around Val Degano is confirmed, the Italians occupying Sasella and Prevola.

"In the Raocolano Valley our losses were four killed and one officer and ten men wounded. The enemy's losses were heavy.

"The general situation is entirely satisfactory.

The Italian forces which entered the Tyrol at Candino and the first army which captured Cormous have reconstructed the railway to Gorz, and now are marching on that city.

The Austrian position before Gorz is one of immense strength, and this fact explains in a measure the readiness of the Austrian commanders to withhold a major action until the Italian troops had advanced into territory [illegible] they could be [illegible] from commanding ground. The [illegible] occupied by the Austrians extends from Dornberg east of Gorz in a westerly direction toward Gradisca, and then in a southeasterly direction to Nabrisina. The entire ground covered between these points is marked by a high range of hills, 1,200 feet in altitude at places, with the Fsonzo River flowing along the base of these hills from Gradisca southward until it empties into the head of the Adroatic river far below Monpalerne.

Facing the Austrian position is an army of 120,000 Italian troops, massed on a frontage not more than fifteen miles in extent, with the left beyond Cormons and the right now resting near Mont[illegible] line running from Cormons to Cerrignano, thence to Terzo and on to the Adriatic, near Montfalcone. Between the Italian front and the Austrian position on the heights beyond the Isonzo heavy advance guard engagements are now taking place.

The striking feature of the engagement now pending is the comparatively narrow frontage on whichh the Italian troops are massed. From Comous on the north to Torzo on the south the distance does not exceed twelve miles, and from the extreme flanks north and south the distance covered by the Italian army of 120,000 men does not exceed fifteen miles. From Gorz to Nabrisina is a distance of about ten miles, and from Cormous, where the Italians are now in force, to Gorz, the distance is about seven miles. The heights of Nardisea command fully five miles of this intervening ground between Cormous and Gorz, and makes it of great importance that these heights be carried before any further advance is made on Gorz.

Upon the ability of the Austrians to hold the heights of Gradisca rests largely the fate of Trieste.

One Alderman's Vote Ties Up for One Year Falley Site Purchase

The meeting of the Common Council last night was short and to the point. The session did not consume over five minutes, but in that short time, one of the most agitated and important questions which has attracted the attention of the taxpayers for some time was disposed for for some months to come.

A large attendance was expected at the meeting which was called for the purpose of having the council vote on the question of a special election for the purchase of the Falley Seminary site as the location of a new high school. Only ten citizens were present including four newspaper representatives, as the meeting at the Oak st. school Tuesday evening evidently proved that the Second Ward would stand against an election.

A section of the city charter stipulates that a second election cannot be called within a year on any question which has been defeated unless the council votes unanimously to call the election. As Alderman Sullivan of the Second Ward has stated time and again that he would not vote for the election unless his constituents desired it, the defeat of the measure was a foregone conclusion.

After the Mayor had called the meeting to order, the City Clerk read the resolution introduced by Alderman Diston to the effect that an election should be called. A vote was promptly taken and five aldermen vote for the election while Sullivan voted against it.

Alderman Baker seconded Alderman Sullivan's motion to adjourn and the council will meet again next Tuesday night. At last night's meeting Alderman Sullivan produced another petition signed by 150 taxpayers of the West Side asking that the special election should be refused.

DAMAGE CASE DENIED RE-TRIAL

Miss Agnes Frawley Sued Railroad for Injury Received in a Fall

P. W. Cullinan, attorney for the O. & W. R. R., filed notice of appeal yesterday to the decision of Judge Wilson in City Court denying a new trial in the case of Miss Agnes Frawley vs. the O. and W. company. Miss Frawley sued the railroad for injuries alleged to have been received by falling from a train near the New York Central station. Thomas L. McKay represented her and she was awarded $500.

Mr. Cullinan has filed affidavits showing that the plaintiff had testified that she had never been in any accident and had never suffered any injury prior to the one sustained by the fall. Mr. Cullinan further states that the plaintiff had been in a previous accident and had recovered damages for a fall over a wire when the Broadway bridge was in the course of construction. At that time Miss Frawley brought action against the Cleveland Company through Frederick G. Spencer and recovered $75 damages.

Miss Frawley admits this suit in her answering affidavits but says she did not recall it when questioned and furthermore had recovered from the effects of the first accident before she fell from the train.

STORES HAVE RIGHT TO REMAIN OPEN LATER

The Retail Trade Division of the Chamber of Commerce yesterday morning telephoned all merchants who had signed the early closing agreement, asked them to express an opinion relative to the Saturday night closing. Some critirism of the hour had been received by members of the Division and it was thought best to consult the merchants directly interested. The answers to the queries revealed the fact that 10:30 p.m. was too early and with their consent the division now announces that the signers of the agreement will close not later than 11:00 p.m. Saturday nights. This does not mean that any of them will feel obligated to remain open until 11:00 p.m. it merely gives an opportunity to those whose bdsiness demands it to stay open until that hour.

CITY OFFICIALS GOING TO MAYORS' CONFERENCE

The Mayors' Conference which will be held in Troy June 1, 2, 3, will be attended by Mayor Fox and City Attorney Fanning of this city. It is expected that almost every city in the state will be represented at the conference, which will take up several matters of municipal interest.

And the Poor Man Pays

While relief projects for the members of the Danbury hatters' union are remote in prospective fulfillment, or decidedly misty, there is nothing either distant or vague in the expense and inconvenience to which the 185 workingmen directly concerned are being put.

Their homes are attached, their little savings are seized, and whatever recompense is ultimately made to them, whether by the national hatters' organization, the Federation of Labor, or both, for the present this Danbury group of wage-earners are like a forlorn hope, under close and heavy fire. Theirs is the anxiety, theirs the uncertainty, theirs the peril, theirs the worrying and the waiting, even if every cent they owe is finally paid for them by the bodies with which they are affiliated.

Any way this $285,000 judgment is discharged, the payment of it will come out of the poor man. Help by the national hatters' union, by the American Federation and other organizations, will simply distribute the burden. But even though the mulet be apportioned among so many that the weight on the individual is slight, nevertheless that tax, such as it is, will be felt by labor as a whole, and not by the few who led this particular company of workers into trouble.

It is well for labor to look with suspicion on advice whose consequence is likely to be costly litigation, and, as in this case, a lawsuit lost. An unsuccessful contest in court may be of as serious consequences for the laborer, as an ill-advised strike.—Buffalo Times.

Germany's Efficiency

Germany astonishes the world by her tremendous recuperative powers. When she started the war it was acknowledged that she had the greatest military machine that has ever been put together, but it was prophesied that if that machine could be stopped in its onrush toward Paris, it could be worn down and that time would fight in favor of the allies. Time does fight in favor of the allies, but not as rapidly as predicted. Germany was checked, but has held its own on the line it established, taking in nearly all of Belgium and a good portion of France, which it has successfully held. Then it could still send a mighty army against Russia, which has forced itself into Russian territory and prevented Russia from gaining any German territory. Having invading armies, its losses have been immense, and yet, by some magic its depleted ranks are always filled. Now, in answer to Italy's challenge, a new army springs up for that campaign alone, without depleting the armies facing the allies in France or the Russians in Galicia and along thel ong line of the German frontier. It is a marvelous exhibition of fighting power. Germany must have had, with those now present and acounted for, some 8,000,000 men in the field, and yet the streets of the German cities are still thronged with young men, trade goes on the same and the fields are cultivated and raising the usual crops, and factories are full of workmen turning out munitions of war. It is a wonderfully efficient country and, if it is wrong, as most of the world thinks it is, still the world cannot withhold its admiration for its marvelous efficiency.—Watertown Times.

LET'S ASK 'EM

If a community would be representative of a high-grade citizenship it must begin, not with those who are full-fledged citizens today, but with those who are in the community's cradle—the schools.

Intelligent, enthusiastic citizenship is a matter of growth and training. It does not come on the stroke of 12 when a man reaches his twenty-first birthday. Ask the average young man or young woman twenty and a half years old to express an opinion regarding municipal affairs and the chances are one would be rewarded with a blank stare. It is then exceptional youth who is interested in the affairs of the city in which he lives, and why? Surely not because it is uninteresting. Indeed, a close student of municipal business affairs will often find stories that for breadth of imagination involved will exceed Anderson's own fairy tales, or an excitement equal to "Dick Dead Eye" adventures.

Fulton has not yet interested itself in that phase of community building which is citizenship building. To build citizenship is quite as important as to build business blocks. What is the cocoon when the moth has flown? What is a community without a public spirit?

Rev. M. G. Buck, who returned yesterday from Binghamton, remarked having seen an inspiring sight in that city.

The pupils of the city high school announced a public mass meeting to be held in the evening from the court house steps. Hundreds congregated and the thing the young people put before the meeting was that they desired members of the Binghamton school board, be elective rather than appointive. Then, too, they denounced the fact that as an apportionment had been voted into the taxes for the construction of a fire-escape on the high school building and as yet no fire-escape had been placed.

Think of a body of high school students discussing in the open these questions which they believed concerned them directly, and they themselves took up the issue in public with their own voices. Is not that a healthy sign of a coming citizenship which is quite capable of taking care of itself?

Do our high school boys and girls have any questions which concern them directly. What is their sentiment regarding a high school—no, not for themselves, but for those who follow after. Has their expression been asked publicly, if not, why not?

Let's make a beginning and ask 'em—as a starter you know.

COME ON, BOYS

If your business is bad, get down off the load and take a look. Find out where the fault lies. Remember, when you get down off the load, this helps some. You may find right in front of the left hind wheel there is a rock, the rock of indifference on the part of your organization.

You will never see this rock unless you get down off the load.

They probably saw you riding up front. You cannot say to good men. "Go on, boys and lick 'em." You must say, "Come on, my boys, and we will clean 'em up." You are the leader. Lead.—Silent Partner.

TWENY-EIGHT CASES LISTED FOR JUNE TERM

The Pulaski term of the County Criminal Court, which begins on June 7, will be noteworthy from the fact that twenty-eight cases are listed for trial. There are five indictments against attorney F. T. Cahill. Four of the indictments charge grand larceny and grow out of transactions with clients, the fifth is for delaying a client's suit, and the sixth robbery, first degree, resulting from a charge made by C. Owen Geer, president of the Oswego Mercantile Company, that Mr. Cahill and his brother, Martin Cahill, also indicted, forced him under threat to sign a satisfaction of judgment.

The other indictments that will be moved for trial follow:

George Callum, assault, second degree; John Abbott, corrupting the morals of a child; Lillian Garrison and Guy Crouse, violations of the penal code; Albert LaLonde, attempt to commit unnatural crime; Fred Rosa, attempt to commit burglary; William Lewis, burglary third degree and grand larceny; Merritt Miller, burglary third degree and grand larceny; James Trowbridge, violation liquor tax law; Frederick H. Van Dyne, perjury; Frederick H. Van-Dyne, attempt to commit bigamy; David McAuliffe, violation liquor tax law, two indictments; Earl Randall, Violation of liquor tax law; Hollister Bassinger, violation of liquor tax; Nelson Weiner, criminally receiving stolen property, knowing the same to have been stolen; Martin Cahill, robbery, first degree; James Signorelli, violation of liquor tax law; Daniel Buckley, violation of liquor tax law; Peter C. Campbell and Fred Nelson, grand larceny second degree, two indictments, and conspiracy. These charges grow out of the sale of rags by Campbell, a New York dealer, to the Volney Paper Company, by which Nelson was employed.

Gasoline, Oils and Greases. Van Wagenen, Inc. adv

ANTIS PREPARE TO FIGHT ROOT

Their War May Be Directed Also to Defeating the Constitution

Albany, May 27.—Active steps to "protect the liquor traffic from the people," as the organization puts it, have been taken by the Anti-Saloon League of New York. This reform body is endeavoring to have certain amendments which it favors written into the new Constitution.

In the words of the Anti-Saloon League of New York, "any Constitution drafted by a Convention so completely in the hands of the 'reactionaries is bound to have strenuous opposition from many quarters in any event. If any attempt is made in the document to tie the hands of the people or their representatives on the liquor question, the Anti-Saloon League and allied temperance forces will accept the moral issue thereby raised and undertake to rally for the defeat of the entire document—not only the Christian temperance forces, but also the representatives of all social reform movements which will necessarily be sacrified in the effort to head off prohibition."

Recently the Anti-Saloon League addressed a letter to Senator Elihu Root, the presiding officer of the Constitutional Convention in which the ideals of that organization were expressed. The letter states that the liquor interests of the State have recently awakened to a realization that they are no longer safe and fear the passage of the Optional Prohibition Referendum bill of the League will result in banishing the saloon from practically the entire State except the larger cities.

"Those who are following the situation closely," continues the letter, "believe that a shrewd and desperate attempt will be made to slip something into the proposed Constitution which will weaken if not destroy the power of the legislature to give relief to the people from the insolence and tyranny of the liquor traffic."

This sentence of the letter is addressed personally to Chairman Root: "It is generally believed that you are opposed to prohibition. You voted in the United States Senate against the passage of the Web law designed to allow the States to enforce their own prohibition against invasion by liquor dealers from other states. It has been reported and believed by some, that brewers or other manufacturers of alcoholic liquor have been included among your clients."

In another paragraph of the letter it is pointed out that if Chairman Root should see fit to make it clear that he is not helping directly or indirectly to prevent the submission of proposed amendmnts to the people relative to the liquor question, it will be a source of great gratification to his many admirers "who desire that the Constitution shall be free from the taint of any sort of attempt to bolster up a vicious and harmful traffic which the American people are in process of pronouncing judgment of conviction against."

In order that its attitude might become as widespread as possible, the Anti-Saloon League has given considerable publicity to the letter it has sent to Cchairman Root. It has also made it plain that in the event that Chairman Root makes an explicit disclaimer, his word will be accepted; on the other hand his refusal will be accepted as the signal to get ready to defeat the entire Constitution if necessary.

The letter sent to Chairman Root bears the signature of William H. Anderson, State superintendent of the Anti-Saloon of New York.

WITH THE SUFFRAGISTS

King Christian of Denmark, so runs an Associated Press dispatch from Copenhagen, will sign on June 5 which is the anniversary of the first constitution in 1849 the new constitution under which women will vote and hold office on equal terms with men.

Eight years ago women in Denmark could not even serve on a board of public charities, and now full suffrage is theirs. "For which happy result," the press report states, "the Danes can thank the war."

* * *

The Pennsylvania State Federation of Labor in session at Harrisburgh by a vote of more than three to one endorsed the woman suffrage amendment to the state constitution.

If the rank and file of labor vote in the same proportion at the polls next November, the end of the year will add Pennsylvania to the suffrage map.

* * *

A woman, equally with a man, is eligible to any office from President or Judge of the Supreme Court down, under the Constitution of the United States, according to a statment issued by Chief Justice Clark of the Supreme Court of North Carolina.

* * *

In Milwaukee U. S. Judge Geier has handed down a decision that a wife cannot testify in a case against her husband under the Federal White Slave law unless the acts were subsequent to marriage.

In Tennessee the Legislature has passed a law permitting a wife to testify in a case against her husband in the criminal courts. Thus does the progress of the married woman toward full individual liberty haltingly make way.

* * *

Nearly a thousand copies of the Woman's Journal were sold on Boston Common at a recent band concert. From which the suffrage newsies concluded that, if suffrage failed in Massachusetts next November, it would not be because the public lacked interest.

* * *

"Do you men in New York stand for a little girl like that being heckled by that type of loafer?" said a man from equal suffrage Colorado to ex-Senator Platt at a New York street meeting about the Suffrage Van of the Women's Political Union.

And the result was that the ex-senator mounted the steps of the Van and gave a stirring speech himself for woman suffrage. Even so does the East take lessons in chivalry from the equal suffrage West.

DEATH IS PRETTY HARD IN ANY STONE QUARRY

Binghamton, May 28.—Death is never so hard as when it comes in a stone quarry, as any undertaker knows. So today when Isaac Rock slipped on some rock chips, fell down the face of a cliff and to some stone flagging and some blasted rock fell after him, those who reached him first knew that hope was slight.

"This comes of the idea that you can work your life out in a stone quarry and die a natural death," said Isaac to those about him. This has happened to me so often it has got to be a joke, but today I know that it is no joke. This is the stone business. This is quarrying. I wish I never heard of stone."

Within a few moments the nearest physician arrived at Mr. Rock's side.

"What is your name, doctor?" asked the patient, "you l ook familiar enough."

"Iam Dr. C. P. Granite," said the physician.

Isaac groaned, even as another carriage stopped and a physician jumped out.

"Who are you?" asked Isaac as Dr. Granite began to dress his injuries.

"I," said the newcomer, "am Dr. A. R. Boulder."

"Lord!" said Isaac.

"Can I live?" asked the patient, after a bit. "I feel pretty shaky."

"It's very doubtful, Mr. Rock," said Dr. Granite and Dr. Boulder, as they helped carry the patient across the quarry pit.

"All right, then," said Isaac. "Take me home and call up Elty Marble."

Elton Marble is the nearest undertaker. He has not yet been called.

WRECKING CREWS IN BIG LEAGUES

Famous Combinations of Heavy Hitters Are Recalled.

DETROIT TIGERS LEAD NOW

In Cobb, Crawford and Veach Jennings Has the Greatest Trio of Pill Picklers in Game Today—Are Now Setting the League Afire.

Crawford, Cobb and "Peekaboo" Veach, the famous fence busting crew of the Detroit Tigers, are just tearing things loose this season. If they can maintain the pace all past records will be dimmed or totally eclipsed. Perhaps the greatest slugging trio the game ever had were Ed Delehanty, Sam Thompson and Larry Lajoie. These three were on the lineup of the Philadelphia Nationals from August of 1896 until midsummer of the following season and generally followed each other on the batting list.

Since 1907 Crawford and Cobb have formed the nucleus of the fence busting brigade, using in different seasons

Photos by American Press Association.

DETROIT'S GREAT OUTFIELD TRIO.

[Upper picture shows Crawford; on lower right, Veach; on left, Cobb.]

such swatsmen as Rossman, McIntyre, Veach, and they even used little Donie Bush as the third party one season. During the season of 1909 Cobb, Crawford and Bush made 546 of the 1,355 hits credited to the whole Detroit team. The best efforts of Crawford, Cobb & Co. were made during 1911 with J. Delehanty as filler in. This great trio made 649 base hits. The total number made by the team stood 1,546. There are just four records in the history of the game which excel the above mentioned record, and they were all made during the season of 1887, under the four strike rule.

One of the slugging combinations to make a record was "Tip" O'Neal, Robinson and Charlie Comiskey of the St. Louis Browns. In the season of 1887 these three made 700 hits. The best record ever made in this respect was created by Pet Browning, "Red" Mack and Hub Collins of the old Louisville club in 1887. They raised the St. Louis combination's mark by twenty points, making 720 hits, which is the record for all time. The old Baltimore team of 1895-6-7 had a great slugging combination in Keeler, Jennings and Kelly. The great trio of the Philadelphia Nationals from 1891 until 1895 were Delehanty, Thompson and Hamilton, and later Lajoie was added. They were wreckers of ball games, also of the hopes of many hurlers.

New York had three batsmen who made the welkin ring with their terrific batting from 1886 until 1890. The names of Roger Connor, Jim O'Rourke and Mike Tiernan were feared by all hurlers. Less than a dozen seasons ago Mike Donlin, Mertes and Browne were the slugging triplets.

Honus Wagner, Clarke and Leach were the cleanup crew for Pittsburgh for several seasons, with Beaumont helping out.

In the American league teams having a battery of heavy artillerists are scarce. The great trio of sluggers who carried the men of Mack on to many binations, and hurlers had good reason to quake when facing them. For four seasons this bunch have led all slugging trios in the American, but the Detroit three have held the honor in five different years, Crawford and Cobb always forming the main offensive force. Lajoie and Flick of the Clevelands, with a third party, were a big force in winning games for their team.

No Skiff Racing In England.

From the present indications skiff racing, which is a popular sport in England, will probably be abandoned this season, as at the annual meeting of the Skiff Racing association held in England recently it was decided to postpone the 1915 regatta.

Rough Sledding For Bedient In Feds.

Hugh Bedient, former Red Sox curver, is having a hard time of it in the Federal ranks.

WHEN CHANCE WOULD HAVE GIVEN EVERYTHING FOR A BASE HIT.

Frank Chance always was a hard loser, and Joe Tinker tells this one on him as an incident of the world's series in which the Athletics cleaned up the Cubs:

Chance was awfully blue after the loss of the third game. He went home with his head on his chest.

"When he reached his hotel he was a fit subject for the deaf and dumb asylum. Mrs. Chance tried in vain to cheer him up. She talked to him and conned him along, but Frank refused to be cheered. Finally in desperation Mrs. Chance in a tone that would have won the heart of a lion said to Frank:

"'Now, dear, don't take it so hard. Come on, cheer up. What if you do lose this series. Remember, dearie, you have me.'

"'Yes, I know I've got you,' said Chance in breaking his speechless spell, 'but there were spots in that game today when I would have traded you for a base hit.'"

SPEAKER IS HARDEST, SAYS TWIRLER STEEN

"Tris Speaker, the Boston Americans' star outfielder, is the hardest player in the American league for me to pitch to," confesses Bill Steen of Cleveland.

"He can hit anything I throw up to him. I simply can't fool him. I've tried everything in my pitching repertoire with Speaker up, but it has availed me nothing.

"He refuses to hit at balls inside, and when he gets one outside he slams it down the foul line at a mile a minute clip.

"It's easier for me to pitch to Baker and Collins than any of the other famous swatters.

"Crawford and Cobb are hard to fool. Both show their greatest weakness in going after slow balls."

There's a Reason For Everything.

"Wouldn't you try to get a divorce from a woman who abused you and neglected your home and thought more of her club than she did of you?" thundered the big man.

"I don't think I would," replied Henry Peck. "I am afraid Henrietta would not let me."—Philadelphia Ledger.

Coral Builders.

Coral reefs and islands are formed by the coral building polyp. These animals only live in clear water, the depth of which is not greater than twenty-five fathoms, and the temperature of which does not sink below 68 degrees F.

The Extreme Limit.

"How did your cake turn out, my dear?"

"Pretty badly, I fear. Even the children wouldn't have a second piece."—Louisville Courier-Journal.

The Secret.

"This is very confidential, Marian."

"Yes, dear. I shall be most careful to whom I repeat it."—Philadelphia Ledger.

He who did well in war just earns the right to begin doing well in peace.—Browning.

Black's Cookies tickle the palates of old and young, because they are right. adv.

ANDREWS WANTS TO HAVE NATIONAL BOXING BOARD

There is in the course of organization an association that may become the greatest factor for the regulation of boxing in the United States.

This is the national boxing association which is being promoted by Tom Andrews, in connection with several of the leading boxing promoters in New York.

The national association is to be patterned something after the Amateur Athletic Association, and to rule and control all clubs, all boxers and to govern all championships.

Such an organization is held to be absolutely necessary to check the greed of fighters.

A meeting has been arranged to be held either in Chicago or New York in late June.

The heads of representative boxing clubs in every city where boxing is permitted will be asked to attend the meeting.

The objects as announced are:

First—To establish and maintain a scale of weights for the various classes of boxers.

Second—To establish a uniform set of rules to apply to all matches.

Third—To draft laws governing the holding of the title bouts and setting a limit on the time any titleholder may remain "champion" without fighting.

Fourth—To adopt rules to protect promoters from grasping managers.

A good pair of auto gloves or a good duster, $1.00. VanWagenen, Inc. adv

CHASE'S WRONG ARM.

Harry Tuthill, conditioner, tells this story on Hal Chase and the colored trainer of the Chicago White Sox.

Says he:

"A day or so after Chase joined the Sox, back in 1913, he went into the clubhouse with a complaint about the soreness in his throwing arm. Doc, the Sox trainer, bustled around, got his valise containing liniment and bandages and asked Chase to sit down on one of the rubbing boards.

"Chase followed instructions and Doc, being very gentle with such a prize player, took the right arm carefully in one hand and massaged it for fully half an hour.

"Then, stepping back, he grinned and asked:

"'Theah you are, Mistah Chase. How does that feel?'

"Chase started to laugh. Then noting the bewildered look on the trainer's face, he said:

"'It feels great, Doc, but I'm left handed.'"

YANKS ARE MAKING A GREAT SHOWING

These New York Yankees continue to do the unexpected and are playing great ball. Let that team continue to show its present pace, and the chances are that the new owners will get back the first year a great part of the money they paid for the club.

That New York club will draw splendidly at home and on the road, but in New York is where it will get the best returns, for with the Giants away to a bad start the fans of the big city are sure to turn to the Yankees because they are playing on the Polo grounds.

Bill Donovan already has made a success of his regime if he does not do anything more. He has his players hustling and got them away to a flying start. He has been responsible for the existence of more interest in the American league team in New York than ever before.

A SETBACK FOR WALSH.

Chicago Pitcher Contracts Grip, Which May Put Him Out of Running.

It now looks as if Ed Walsh's days as a major league pitcher are about over. For the past two months in Los Angeles, Cal., the Chicago White Sox hurler has been preparing to get back into shape to take his turn on the slab. In practice he showed some of the

Photo by American Press Association.

ED WALSH, CHICAGO AMERICAN VETERAN PITCHER.

form that made him famous, but recently a severe case of grip put him out of the running. And it appears as if his "comeback" stunt has been put into the indefinite future.

Walsh's physician predicts it will be several weeks, if not months, before he will again be in condition. A year ago Walsh's arm went back on him. In his day he was considered one of the greatest pitchers that ever hurled a ball.

PHONOGRAPH FOR ATHLETES.

Indiana University Coach Adds Novel Features to Training.

In addition to moving pictures Coach C. C. Childs of the football and track squads of Indiana university has adopted the phonograph as an aid in developing athletes. The coach has had a phonograph installed in the track oval and the football and track men are to be put through their paces to the accompaniment of the latest dance music. The music, it is said, is of great aid to the hurdlers in regulating their stride.

Coach Childs says he has a number of other innovations which he will introduce later as the season advances. He has been using moving pictures of football games of last season to illustrate the methods of attack and defense as the first course in spring training.

Broken Noses Seem a Fashion.

Broken noses are all the go in the major leagues this season. [illegible] Petty Perritt and Charlie [illegible] are on the hospital list. They all came in a different way.

HEAVY BURDEN

Leader of Giants No Longer Idol of Gotham Fans.

TEAM'S SHOWING THE CAUSE

New Yorkers Are Beginning to Question His Superlative Qualities and to Demand That He Deliver the Goods. Club Has Too Many Vets.

New York fandom seems to have turned against the Giants and transferred its affections to "Wild Bill" Donovan's Yankee outfit, which has been going at a lively clip recently.

John McGraw is no longer the popular idol he was in his pennant winning days, when he could do no wrong, but was lauded throughout the east as the world's greatest diamond leader. His friends are beginning to question his superlative qualities and to demand that he deliver the goods.

He gave them further cause for complaint in his silly attempt to get Kauff away from the Federal league, one of the rawest and most amateurish tricks the wily Gotham leader ever tried. He has put over a few good ones in his day, but he must have thought the baseball powers had taken leave of their senses when he tried to force Kauff down organized baseball's throat.

This spring has demonstrated that McGraw is no better loser than any other manager. He was a mighty good winner. He stood out fine when things were coming his way and when he had nothing whatever to worry about except the division of world's series receipts. But the tide has turned, and McGraw is now feeling the sting of remarks which have not for years been hurled his way. And he is not accepting the situation with good grace. He is falling back on stereotyped old alibis, which he would not have thought of when his team was a topnotcher.

McGraw's veteran players have gone back. They do not act like the same players who helped him win championships. When he was on the top wave of prosperity it was a favorite saying of New Yorkers, "McGraw is the team." But evidently McGraw was not the team. The men under him did their work well. When they were no longer able to deliver the goods McGraw's reputation suffered, just as much as that of the men under him.

In former years any move made by the Giant manager was accepted as the only thing to do. Now he is being scored for allowing players to escape who are doing good work on other teams, either in the big show or in the minors. In some cases McGraw could not help himself in these moves, as he was forced to get down to the twenty-one player limit, and men he might have let out otherwise were protected by long term contracts, which made solid their positions, even though they could not deliver the goods.

McGRAW WANTED TO KILL THE MAN

John McGraw, manager of the Giants, was standing in the Imperial glowering out at the weather. He was sore about it. Three games in a row had been postponed and his ball club needed work. No wonder he was sore and no wonder he was speaking about the rain with sharp words.

In the door came a plump optimist—one of thek ind that causes the rest of the world to become pessimistic. Beaming, he walked over to the scowling McGraw and slapped him on the shoulder.

"Never mind," cooed the optimist, "into each life some rain must fall. Some days must be dark and dreary.

Friends seized McGraw before he could fire.

POUGHKEEPSIE

Plans Completed for the State Convention Next Week Tuesday

The 20th annual meeting of the New York State Council Knights of Columbus will be held in Columbus Institute, Poughkeepsie, beginning June 1, and continuing for three days. Monday night, May 31, arrangements have been made for a monster parade to be held prior to the opening of the convention. Councils from this section will be well represented ann at the conclusion of the parade a demonstration will be held in Columbus Institute at which Hon. Bourke Cockrane will be the principal speaker.

The convention will be opened by John J. Mylod, chairman of the local committee of arrangements, who will welcome the delegates on behalf of the citizens of Poughkeepsie and State Deputy William P. Larkin will respond for the visitors. The Long Island delegation, which includes the oBrough of Brooklyn, will have headquarters at the Nelson House.

Among those who will be present as delegates are Rev. Francis J. Sullivan, a chaplain of the fire department, New York; Congressman Danjel J. Griffin of Brooklyn, Magistrate Henry W. Herbert of Manhattan, James E. Finegan of Brooklyn, Cabot Ward, park commissioner of New York; Dr. J. F. Gaffney, Amsterdam; Dr. John H. Hurley, Little Falls; Frank W. Smith, chief clerk, court of special sessions, New York; Thomas F. Hennessy, mayor of Oswego; P. J. Tierney, city judge of Plattsburgh; Dr. F. M. Mone of Ithaca; William J. Dolan, Far Rockaway; D. V. McNamee, county judge of Hudson; Senator Bernard M. Patten, Queens; Dr. R. A. Heene, of Hudson Falls; Magistrate James J. Conway, Queens; Dr. John G. Coyle, of Manhattan; William J. Duffy, president National Bank of Highland Falls; Fred J. Shiede, supervisor, Suffolk county; Judge John F. Kelly of Kings Park; J. David Enwright, Syracuse.

The arrangements for the convention are in the hands of Bernard H. Fee, of Far Rockaway, state secretary.

The present officers of the society are: State deputy, William P. Larkin, Manhattan; state secretary, Bernard H. Fee, Far Rockaway; state treasurer, William E. Carney, Philmont; State advocate; J. J. Butler, Carthage; state warden, John F. Kelly, Brooklyn; state chaplain, Rev. F. J. Sullivan, Manhattan.

MASSENA MAKES BUTTER FOR UNCLE'S JACKIES

Massena, May 28.—The Diamond Creamery Co. of this village commenced filling an order for 110,000 pounds of butter for the United States navy, this being the third order this company has filled for the navy during the past five years.

Thomas Cornelinson, of the U. S. agricultural department, of Washington, is here for a few days, and Inspector N. J. Wells will remain here until the shipment is complete, which will take until some time in August, from 2,500 to 2,700 pounds being turned out every day.

The plant of this company was chosen for this work on account of its excellent equipment and cleanliness, and the butter for the navy must score at least 95 per cent., be made while the cattle are eating grass and only sweet cream can be used.

The cream must be taken from fresh milk and skimmed at once. It is then cooled to 46 degrees, until taken to the churning room, and there it is heated to 150 degrees, and is kept at that heat 20 minutes, that it may be perfectly pasteurized. It is cooled again to 46 and remains at that temperature for two hours before churning.

The salting is another particular feature, for it must not contain less than 2½ per cent. nor more than 3¼ per cent. and as for moisture, it must not contain more than 13 per cent. of water.

Every precaution is used all the way through the process and the butter is finally packed in five-pound tns, which are hermetically sealed and labeled to show the net weight, maker's name and date.

The cans are packed in crates and shipped by the carload to the Merchant's Refrigerating Cold Storage Co. at Jersey City, where the butter is distributed to the war vessels on orders from the navy department.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 28.—Delegations from a number of civic organizations of New York city, including the Proportional Representation League, will attend the hearing to be given by the committee on Suffrage of the Constitutional Convention on the proposed amendment by Delegate Seth Low on Wednesday, June 2. The amendment in question seeks to permit the election of all deliberate bodies in New York State by the system known as proportional representation.

The Low amendment as presented, follows:

The legislature may provide that the election of the members of the legislature, either or both houses, or of a Constitutional Convention hereafter to be held, or of any elective body or board of thhe State, or of any political subdivision thereof, shall be by any plan embodying the principle known as proportional representation and may provide for preferential voting for the election of any officeholder to be chosen by the electors of the whohle State, or of any political subdivision thereof, anything in this Constitution to be contrary notwithsanding.

The Proportional Representation League, of which Hon. William D. Foulke is president, advocates that every party or proup of voters shall be represented in law making bodies in exact proportion to their votes; thus making such assemblies practically ac ondensation of the whole voting population. Every method provides each party or group elect as many representatives as they have quotas of votes; a quota being found by dividing the whole number of votes cast for all candidates by the number of legislators, preferably seven or more to be chosen in each district. Each voter may vote forbut one candidate. The difference between the several methods applies only to the rule for transferring surplus and other non-effective votes received by a candidate.

Real representation cannot be secured, advocates of the Low proposed amendment maintain unless these rules are followed:

Secure in assemblies a fair and just representation of all political parties or temporary groups of voters according to their true numerical strength, so that no party or group shall have more nor fewer representatives than it ought.

Provide as nearly as possible that the vote of every voter shall actually count in the election of a representative, so that no votes shall be cast fruitlessly or be wasted, and that every voter shall be represented by a representative for whom he has voted.

It is held further that until such representation is provided, "legislative and ordinance making bodies will rank no higher than they do now in the respect of the people; Constitutional Conventions and even legislative bodies themselves under stress of public opinion, will go on providing for so-called Czar executive, officials and commissions which actually discharge legislative functions."

Hon. John H. Finley, State commissioner of Education is an advocate of the Low proposed amendment as are Prof. Eelix Adler, Prof. Charles A. Beard, Richard S. Childs, Harold J. Howland, Prof. Jeremiah W. Jenks, Dr. Albert Shaw, Dr. Charles P. Steinmetz, J. DeLancy Verplanck and Prof. J. Salwyn Schapiro and others are all members of Proportional Representational League of New York State.

AMENDMENT URGES ROTATION IN COURTS

Albany, May 26.—In the hope that it may bring about a reform in the Supreme Court bench of New York city, a proposed amendment was introduced in the Constitutional Convention today by Isaac Sargeut, of Brooklyn, providing for rotation of justices of the Supreme Court.

The proposal provides that assignments of justices to hold trial and special terms shall hereafter be made by the Chief Judge of the Court of Appeals and the presiding justices of the judicial departments convened for the purpose. So far as practical, these assignments shall be arranged so that each justice shall hold court in as many separate districts as practicable throughout the year.

"There is no reason why justices of the Supreme Court should not rotate," said Mr. Sargent tonight. "The Federal judges rotate and so do police magistrates in New York city. The system has been found not only to be workable, but conducive to a better administration of justiee. If the Supreme Court justices rotated, there would be no grounds for the scandalous charges that a patronage trust exists among certain New York city justices who have been accused of bestowing refereeships and receiverships on political favorites."

DUMAS, AUTHOR AND GENIUS, AN IDOL

Alexandre Dumas, the son of the celebrated author of "Three Muskateers," is a world-famed genius. Like his father he was a prolific writer and practically everything that he penned was eagerly sought after by an international public. His nobels, plays and poems have been translated into every civilized language on the face of the earth. He was the idol of Parisian society and the intimate knowledge of life in the French capital which he thus gained is reflected brilliantly in his works.

"Camille," the earliest of his works to create a profound sensation, was published when Dumas was hardly out of his teens.

"The Clemenceau Case" is, as Dumas himself said, "a work that thrashes society with a living whip."

"In it," he continued, "I have tried to paint in the most vivid colors possible the lengths to which a woman of the pantherish nature of Iza will go when her instincts lead her. The character of Pierre Clemenceau is based upon real life. I have described in detail some scenes for which I have been unjustly criticized, but my reason for doing so was to disclose the three vices which were to ruin first Pierre and then Iza, namely, Immodesty, Ingratitude and Sensuality. Iza, at the beginning of the book, is a woman who is unfaithful in mind, only, but nevertheless she is unfaithful. Each one of the pages that I have penned and you have read has detached itself from me as if it were a particle of the events which I have narrated. I have tried to show that there is a divine Being who punishes indulgence and rewards the good and true. If I have succeeded in pointing out this in 'The Clemenceau Case' I shall have gained my end."

HUNTER BETTS EXPECTS TO BE REAPPOINTED

SUNDAY FUND $26,000

Paterson, N. J., May 27.—The total offering received by Billy Sunday for his seven weeks' campaign in the city was more than $26,000, according to the official announcement made today. This includes a $500 check from Elbert H. Gary, chairman of the United States Steel Corporation and $1,000 given by Mrs. Garret A. Hobart.

The big tabernacle will be sold at auction Thursday afternoon. At the same time furniture valued at $1,000 bought for use in the house the Sunday party used here will be sold at auction. So will the house itself, which is the residence of O. W. Shelley, a retired contractor.

Another feature of the sale will be the auctioning of a supply of lost articles found in the tabernacle and unclaimed.

CONGRESSMAN MOTT TO MAKE SPEECHES

"The Naval Militia and Its Relation to the Federal Government," is the subject assigned to Congressman Mott at the second annual dinner of the Western Naval Reserve at Hotel Leroy, on June 18. The congressman will also address the alumni of the Lowville high school on June 19 upon "Federal Aid to Agriculture."

GERMS IN TEETH

The Toothbrush Army Killed Microbes; Children to Be Healthier

New York May 28.—After a week of preliminary skirmishing the final assault on the deadly germ found in the teeth of the elementary school children of New York was made today. Officially, this was Toothbrush Day.

In all the city's elementary schools this week the children have drilled and maneuvered in pantomime against the time when, with real brushes, they could chase the lactic acid germ off the field with a vengeance. This morning all the children who didn't forget had their brushes with them in the classroom, and, with paper cups full of water as an aid, go through the actual process of cleaning their teeth. Many of the teachers instructed their classes in the making of the cups from a square piece of heavy paper as well as in the motions of brushing the teeth.

Not only have the teachers led the class drills, but they have also given talks on hygiene and the effect of bad teeth on general health.

Lectures and Movies Used

Trained lecturers have been heard in many of the schols, and in assemblies and the meetings of parents' associations lantern slides and motion pictures have been sh[illegible] to emphasize the inroads a s[illegible] germ can make in a defective t[illegible].

The children have [illegible] told where they can go to have their teeth attended to without charge, and pamphlets designed for their parents' eyes have been sent home to follow up the school work.

Every class was reviewed as field tactics are practiced, and the best brushers from each school were sent to the front, which means simply to Central Park, or Prospect Park in Brooklyn, where other brilliant brushers of incisors, bicuspids and molars were met.

The most accomplished jousters in this tournament of the toothbrush will be awarded prizes by Board of Health officials, who have take a great interest in the otthbrush campaign.

Moving picture cameras have caught up with the advance guard, and in the biggest motion picture house in town there was shown a class of girls on the roof of one of the schools brushinb their teeth rhythmically, as if to music.

The toothbrush week idea, brouphť to a focus by Dr. C. Ward Crampton, head of the department of physical training in the public schools, is an outgrowth of a movement started years ago by the oBard of Health, part of which are free dental clinics in all five boroughs.

FINED $20.00

Italian Was Arrested for Carrying Gun Without Securing Permit

Antonio Canbotta, the Italian who was arrested Wednesday night charged with a violation of the Sullivan law was fined $20 yesterday afternoon in City Court by Judge Herbert J. Wilson. Canbotta entered a plea of guilty but stated that he was carrying the gun for his own protection as several of his enemies had threatened to "get him."

The trial disclosed the fact that there are many gun-men in the Italian colony here and a close watch will be kept in the future by the police in that section. Wednesday night, Chief [illegible]yer and Officers Hartigan and Brown arrived on the scene just as a crowd had gathered in North 1st st. and a fight between two notorious Italians and two Americans was imminent. The police, probably averted some gun-play by their prompt action.

400 SHIRT WAISTS

Values 50c, 75c and $1.00

On Sale Saturday Morning, 9 a.m.

at 36c

A special purchase we were fortunate in making for the benefit of our patrons. All sizes in the lot from 32 to 44. Every waist fresh and clean and just from the hands of the best manufacturers.

$22.50 and $20.00 Tailor-Made Women's and Misses' Suits at $13.88

Unrestricted choice of any of our best suits selling up to $22.50. An unusual opportunity to buy a high grade suit for the price of our lowest priced ones.

$15.00 Suits at $9.98. $12.50 Suits at $6.98

Just the kind of a garment for Decoration Day.

New Millinery for Decoration Day

A lot we bought for the benefit of those who wear a sun hat for Decoration Day.

SCHOOL MONEY TO COME NEXT WEEK

County Treasurer Herman W. Kandt is in receipt of information from Hiram C. Case, chief of the Statisitcs Division of the University of New York, in which that official states the reason why the public money has not been paid. Mr. Case authorizes Mr. Kandt to announce that there were not sufficient funds appropriated by the legislature of 1914 to meet payments. The department was obliged to wait until Governor Whitman signed the supply bill, which he did on Monday. On that date a warrant for the school money was placed in the comptroller's hands for the payment of school money, and County Treasurer Kandt is looking for the arrival of the check next Tuesday.

PARISH GETTING READY FOR POMONA GRANGE

W. H. Vary of Watertown, Master of the Grange, will open the quarterly session of the Oswego County Pomona Tuesday, June 8th. He will be the principal speaker at that session.

The entertainment committee of Parish Grange is making extensive preparations for the gathering. The morning session will open at 10 o'clock in the fourth degree. Joseph West will deliver the address of welcome and the response will be given by J. H. Mace of Volney, master of Pomona Grange. After the opening exercises will come a business session.

PATROL BOX LIGHTS DO NOT WORK WELL

At the next meeting of the Fire and Police Board it is quite likely that the patrol box lighting system will come in for some warm criticism. At the present time trouble develops almost every night in some of the boxes and the lamps do not light. Last night box 4 was out of order and repeated calls for the officer along that beat were of no avail. The system has been repaired several times but attempts to put it into steady working order have thus far been fruitless.

FULTON MAN WANTS PAPERS

Justice Hubbs will hold in Oswego on June 19 a naturalization term of the Supreme Court when John Wallace of this city will get his fourth hearing; Pietro Rodriguez, Oswego, third hearing; Charles Fred Chubb, Michael Kopenekas, Fulton; John Tobolka, Santoro Picone, Alfred Percy Wise, John Musico, Andrew Kaziski, Luigi Richi, Oswego.

Black's W[illegible] Bre[illegible] sold by all grocers. [illegible] is in demand [illegible] everybody. adv.

PATHFINDER COMPANY BEGINS ROAD WORK

The Pathfinder Construction Company of this city, has been busy this week removing machinery from cars at Antwerp, where the company has a contract to pave with brick a street in that city. Real work begins on the job on Monday.

CARD OF THANKS

The undersigned wishes to thank the Grand Army, also the American Mechanics and the Borrowed Time Club for the flowers; also the Rev. Mr. Barrett for his services.

Mrs. W. D. Furgerson.

The traditions of over half a century of highest grade piano manufacture are exemplified in the

Shoninger Piano

Musically and architecturally perfect. It delights the ear—the eye—the touch. Tone, action, durability and beauty are developed to the highest point.

Known to your father's father

The moderate cost of the Shoninger makes it possible for even the family of ordinary means to enjoy the enthusiastic sense of possession that accompanies the ownership of this highest grade instrument. Call and hear it—see it—try it.

JITNEY OWNERS KEPT BUSY ASKING INFORMATION

Albany, May 28.—"We are overwhelmed with requests for interpretations of the new law regulating 'Jitney traffic.'"

This was today's report of the upstate public service commission, on the recent statute bringing "jitney service" under the supervision of both local authorities and the public service commission.

"Jitney" owners of the state, many of whom have had to seek operation through the workings of the law, are declared to be in arms agains the statute. Local vehicles still operate while their owners press the city authorities for the legal permissions, preparing the way for the needed "certificate of necessity and convenience" from the public service commissioners.

200,000 WOMEN TO AID LEO FRANK

Chicago, May 28.—Representatives of the Leo M. Frank committee and the Anti-Capital Punishment Society today appointed a committee to wait upon the Governor of Georgia in the interest of clemency for Frank, sentenced to death for the murder of little Mary Phagan.

The committee is composed of Judge John M. O'Connor, Chief Justice of the Criminal Court; the Rev. Johnstone Myers, pastor of Immanuel Baptist church, and Mrs. Mary Blany Fisher, representing women's organizations with a membership of 200,000. The committee will leave for Atlanta tomorrow night.

FORMER FULTON GIRL TO WED MR. WOLEVER

Mr. and Mrs. William Acker of Flower City Park, Rochester, have issued invitations to the wedding of their daughter, Miss [illegible] Acker to Arthur Porter Wolever of this city. The wedding will take place at high noon on Thursday, June 10, at the home of the bride's parents.

Miss Acker is a former Fultonian. Mr. Wolever with his father have a garage in Oswego but makes his home in this city.

Fulton Keynotes

L. J. McQuade of the Clark Hotel returned yesterday from a brief visit at Oriskany Falls.

* * *

Nehasne Rebeakah Lodge will entertain Tuesday evening by giving a mock trial in the I. O. O. F. hall. This trial will be open to the public.

* * *

Oswego Power Commission was in the city yesterday to inspect the new power house of the American Woolen Co.

* * *

Mr. and Mrs. George McKay of this city were over-Sunday guests of Syracuse friends.

* * *

Miss Nellie Wright of Syracuse has been the guest of Fulton friends.

* * *

The members of the local chapter of the Eastern Star will be guests of the Phoenix Chapter this evening.

* * *

Miss Nellie Paige of Syracuse is the guest of Mr. and Mrs. G. McHewitt, 519 Oneida st.

* * *

Mrs. Cecelia Sanford of S. 3d st. has gone to Albany for a short visit

* * *

Mrs. J. W. Rigley of West Broadway is entertaining Mrs. Chappell of Grand Rapids, Mich.

* * *

Mr. and Mrs. George Fairman of West Broadway spent Tuesday in Syracuse.

* * *

Mrs. Addie Tyler of Phoenix has been the guest of Mr. and Mrs. [illegible] Summerville, West 1st st.

* * *

Mrs. Thomas McCormack of Hannibal st. is the guest of her daughter, Mrs. C. T. Lynch, in Geneva.

* * *

Mr. and Mrs. A. W. Wiltsie were recent guests of friends in Hannibal.

* * *

Mrs. Fred Dolbear of Worth st., was in Syracuse Wednesday to attend the funeral of a cousin.

* * *

Mrs. W. H. Osborne of West 3d st. entertained recently Mrs. C. F. Mills and Mrs. W. J. Voorhees of Baldwinsville.

* * *

The engagement of Glen Chester of this city and Miss Dorothy S[illegible] of Syracuse has been announced.

* * *

George Baker, who has been visiting his parents, Mr. and Mrs. W. Baker, of Cayuga st., has gone to Buffalo to take up work in connection with the New York Central Railroad Co.

The war will not be referred to at the Harvard commencement this year. The undergraduates must have a very warm feeling for Professor Muensterberg.

MODERN WOODMEN TO JOIN SUNDAY'S PARADE

Fulton Camp, Modern Woodmen of America will participate with the city's various fraternal and patriotic orders in the street parade on Sunday. Members are requested to meet at the lodge rooms Sunday afternoon at 2 o'clock, when especially designed Memorial day badges will be distributed to each man.

NEW REGISTRATION DAYS

Under the election law just signed by Governor Whitman, registration this year will be made on each evening for a week and all day Saturday instead of on four full days as in the past. As a result, it is hoped to get better election officials in the larger cities than have been available in the past.

"A HERALD OF PROGRESS"

Colonel Bunker

By M. QUAD

Copyright, 1915, by the McClure Newspaper Syndicate.

"I was just thinking, suh," said Colonel Bunker as he sat looking out of the window—"I was just thinking of an incident in my early career as a duelist. In fact, suh, when this thing came about I had not yet drawn my rapier on the field of honoh. In the southern town where I first hung out my shingle as a lawyer were a dozen gay bucks of young men, and I was one of them.

"We were sports, suh. We rode, we gambled, and we swaggered. We talked about our honoh, and we took no advice from our elders.

"It was a wonder we kept clear of the duello among our own selves, for we were hotheads. But destiny had something laid up for us, and at the proper time we learned what it was. When a dapper little man dropped into the town one day and gave his name as Professor Mayne and explained that he was something of a naturalist we had no idea that his coat covered destiny.

"It was about a week after the professor's arrival, and none of us young blades had made his acquaintance yet when six of us sat on the tavern veranda of a summer's evening arranging a fox hunt, when the stranger appeared among us, and, looking directly at me, he asked:

"'May I have the honoh of asking your name?'

"I gave it as Bunker, of co'se.

"'Bunker? Bunker?' he repeated. 'Did you evah spell it with an H?'

"'Suh! Suh! What do you mean?'

"'Was [illegible] name originally Junker?'

"Egad, [illegible] the man was deliberately insulting me!

"I always thought I carried things off very well for a first time. I raised my hat, handed him my card and turned away. He received it with a bow and also turned.

"There you were, suh—there you were! A duel for sunrise was arranged for within an hour, and I was a hero.

"Could a professor of natural history handle a rapier like a young buck who was always at it?

"No, of co'se not, and I should play with him. Should I kill or only wound him? That question could wait and be settled after the blades had crossed. The most I had to fear, as my friends told me and as I firmly believed myself, was that the professor would either send an abject apology or sneak away during the night. He did neither, however.

"We talked the matter over, and all the bucks thought I ought to run the professor through the heart, and thus at once establish my reputation, but I decided that a wound that would lay him up about six weeks would do.

"It was only when the word had been given and our blades had crossed that I found out I had caught a tartar. Why, suh, the professor made me look like 15 cents! He disarmed me twice in ten minutes. He could have killed me during the next five, but he stayed his hand.

"At length, after humiliating me for the best part of half an hour, he pinked me in the shoulder and I was out of it. I wept bitter tears as the surgeon dressed my wound. The young bucks didn't know what to make of it, but agreed that they must find excuse to challenge the professor until some one had landed him.

"Egad, suh, they didn't have to go hunting far for excuses. He brought them along and laid them at the feet of those who waited. He stopped Dick Bascomb on the street and politely said to him:

"'Suh, nature has made a mistake in your case.'

"'What do you mean, suh?' asked Dick.

"'That your nose is screwed on crooked.'

"'Suh, you must answer for this insult!'

"'Yours to command.'

"A second duel, you see, suh, and with the same weapons. I wasn't there to see, but they told me that he made a bigger monkey of Dick Bascomb than he did of me. When he had made a show of him long enough he gave him the point in the same shoulder he had me and walked away whistling.

"We had a sensation in that town now and for fifty miles beyond it. The professor had made two victims and was liable to make others, but there wasn't much feeling against him nor much sympathy for those who had felt his steel.

"Joe Beaumont was to be his third. It was rapiers again. I rode to the grounds to see the duel. Joe went at it from the first like a butcher with a long knife and was disarmed every other minute. He got so mad that he cried like a boy.

"It was the same old story—wounded in the same shoulder.

"Three smart bucks. Three duels.

"Three same in three slings.

"Three of us trying to explain why it wasn't the other fellow who was pinked.

"It was humiliating, suh, and yet it was the proper remedy. It broke up the cabal and settled us down to take a more serious view of life. As to the professor, he wasn't a naturalist at all, but a famous fencer, and I believe he was hired by those who wished us well to come there and administer the remedies our systems seemed to require.

"That's all, suh, and it's a fine day, suh, and if"—

But the waiter was already bringing it.

They Usually Mass Themselves For Attack Upon an Enemy.

The crows are masters of mobilization. Such mobilizations have frequently been investigated. Usually they prove to be for the attack on some enemy.

Thoreau speaks of the crows "bursting up above the woods where they were perching like the black fragments of a powder mill just exploded." When they are gathered for war purposes their cries will lead you to the spot where they are fighting, and these same bursts of black fragments above the trees, usually following an especial uproar of cawing, will direct you to the center of the battle.

Walter King Stone, the illustrator, and Charles Livingston Bull have told me of a mobilization they once witnessed, when the crows gathered for hours and the two observers were able to penetrate the woods to the exact spot beneath the feathered explosions. There they found a great horned owl flying low in the trees with a dead crow in his talons. Whether this was the original cause of the battle or whether he had grabbed the crow in one of the descents of the birds about his head they, of course, could not say. He was evidently struggling to find a dead tree where he could take refuge. He was saved probably by the coming of night.

Crows have even been known to attack foxes, as Winslow Homer's painting is the most famous witness.

A farmer near my home who has observed crows for many years and has the reputation of knowing more about them than any one else in the neighborhood tells me that almost invariably in his experience the cause of a large mobilization is either a big owl or a hawk. The little screech owls are also attacked, but by lesser numbers. He has also personally seen the crows attack a fox while it was crossing an open field, and once he watched a flock of nearly 100 crows worrying a Skye terrier dog, which was so thoroughly frightened that it was running in circles. I have seen crows attack a cat also, but the cat always is wise enough to make for cover.—Walter Prichard Eaton in Harper's Magazine.

CHARM OF ICELAND.

A Land of Wild Grandeur and Mighty and Beautiful Waterfalls.

In spite of its poverty Iceland is one of the most beautiful countries of the world. The scenery combines a wild grandeur, with ingratiating charm in an infinite variety of characteristic landscapes.

The mountain formations are majestic and powerful in outline, showing traces of the volcanic forces which are still active in some places. The large cupola shaped mountains, which rise like oriental temples from the ocean or the level plains, their tops covered with perpetual snow, are very impressive.

To this must be added a wealth of mighty and beautiful waterfalls, great lakes, steaming springs and craters still warm. The view is usually wide and open and the play of colors fascinating, especially in the fair, mild summer nights. The air is clear, healthy and invigorating, streaming alternately from the wide sea and from the snow covered mountains.

This natural beauty attracts many tourists to the country, and large ocean steamers, filled with travelers, visit it several times each summer. Owing to the lack of transportation facilities most of them must be content with seeing the coasts. When it gets railroads, modern hotels and other conveniences Iceland will no doubt become a popular tourist country.

Iceland has many possibilities for a fair future.—American Scandinavian Review.

Thackeray and the Eggs.

"Americans," says a writer in the London Chronicle, "have a way of serving boiled eggs which is apt to disconcert the English visitor. It is told of Thackeray that at his first American breakfast in Boston he ordered this dish. Among the array of things placed before him was a goblet filled with something that he failed to recognize, and he also missed the eggs. In answer to his inquiry the waiter said, 'That's them in the glass.' 'Well, but where are the shells?' asked Thackeray. 'You didn't ask for the shells,' was the prompt reply."

Tit For Tat.

He—These biscuits are not like those mother used to make. She—Of course they are not. I want you to understand that these biscuits are constructed in strict accord with the latest scientific formula and can be consumed without injury to the digestive system.—Richmond Times-Dispatch.

Tommy's Excuse.

"Why did you stay away from school, Tommy?"

"Me mudder broke her arm."

"But why did you stay away two days?"

"She broke it in two places."—Boston Transcript.

Truly So.

"Something shocking happened in school this morning."

"What was it?"

"The galvanic battery got overcharged."—Baltimore American.

Capital Punishment.

The term "capital punishment" refers to the punishment of beheading, which affected the head, or caput, of a person.

If you wish any blessing look for it [illegible]

A MYSTERY

By F. A. MITCHEL

Billings was a commercial traveler. Troubled with insomnia, he would often get out of bed in the middle of the night and walk the streets. One night he was walking them in a quaint old town in New England. There were houses in the place fully 200 years old. Billings was an educated man and appreciated the antiquity about him. He fancied one house to be the old tavern and that the bar was still there concealed by a [illegible]. Another house must have been that of a nabob, for the front door was elaborately made.

Billings wandered about in the moonlight wondering about the different places and occurrences that might have taken place in them. Apart from the rest was a house which both from its construction and tumbledown appearance must have been older than any he had yet passed. Whether it was occupied or not he could not tell, for like all the rest of the houses it was dark. Billings stopped before the front door to admire it, its side lights, its arched lights above and the antique beadwork on it, wishing that he could remove it and use it on his own house in his home city.

Suddenly the door opened. There was no sound from the old hinges and it seemed that the door moved of itself. But in another moment a face appeared in the opening, the face evidently of a young girl, though since she was in shadow Billings could not see her distinctly. She beckoned to him, but did not speak. He drew near her and she whispered:

"A tragedy has occurred here. A man has been stabbed. I and my sister are alone. I wish you would come in and help us."

Billings had no inclination for what was asked of him, but the girl's voice was so soft, a nearer view showed her so comely, that he entered the vestibule. There was no light, and when the door was closed behind them it was pitchy dark. The girl took Billings' hand to guide him, and a cold chill followed her touch, which was icy cold.

"Will you strike a light?" he asked.

"Oh, no. I would not attract the attention of the watch for the world."

Billings would have retreated, but was ashamed to do so. Besides, the cold grip on his hand would not be easily shaken off. He suffered himself to be led through a spacious hall and up a winding staircase. On reaching an upper hall the girl opened a door and led the way into a bedchamber.

The windows were open, and the moon, which was an hour high, cast a flood of light into the room, illuminating with its pale light a four post bedstead with canopy overhead and valance beneath. Beside it knelt a woman, and on it lay a man, who appeared to be dead. The light of the moon gave a ghastly hue to his features, and he was stiff and stark.

It seemed to Billings that the costumes of both the women corresponded with the antique furniture. Both wore white caps on their heads and kerchiefs around their shoulders and across their bosoms. Billings stood looking on the scene in wonder and horror.

"We must remove the body before day," said the girl.

"Why so?" asked Billings, scarcely knowing what he said.

"He was killed. He who killed him was a near relative. He has fled, but should the tragedy be discovered he would be pursued, and if captured we should have to endure another death. Feeling that we must have a man to help us and seeing you from the window about to pass the house, I stepped down and called you. You will not betray us, will you?"

"Certainly not. But"—

"Oh, don't say that you will not help us. We are two women with no man to rely on. You and I can carry the body to a secret closet. We can put it in there for the present, and it can be removed later."

Billings' brain was in a whirl. The girl went to the bed, drew away the woman kneeling beside it and, taking the lower part of the body, motioned to Billings to take the heavier part. Then the two carried it to an adjoining wainscoted room. The girl touched a spring in the wall. A panel rolled aside, revealing an empty space. They threw the body in, closed the panel and left.

The next thing Billings remembered was standing without the door of the house, hanging up to an iron railing. He seemed to have awakened from a dream. He staggered into the street and looked up at the house. It was dark and silent. Then he ran as if to leave his [illegible] experience behind him. On reaching his hotel he went to his room and threw himself on the bed. In the morning he awakened, feeling as if all his strength had oozed out during the night.

During that day he made inquiries about the house he had visited and was told that it was called the Berwick house, from the family that had lived in it a century or more before. It had been empty for years.

Billings related his experience to several persons and persuaded them to go to the house with him and force an opening to the closet where he had helped deposit the body. They did so and found the skeleton of a man.

What the tragedy had been no one knew, nor had any one ever heard. Evidently it had been concealed. There was, however, a tradition of one of the Berwick family who had mysteriously disappeared.

For Young Folks

Crown Prince of Belgium, Who Became a Soldier.

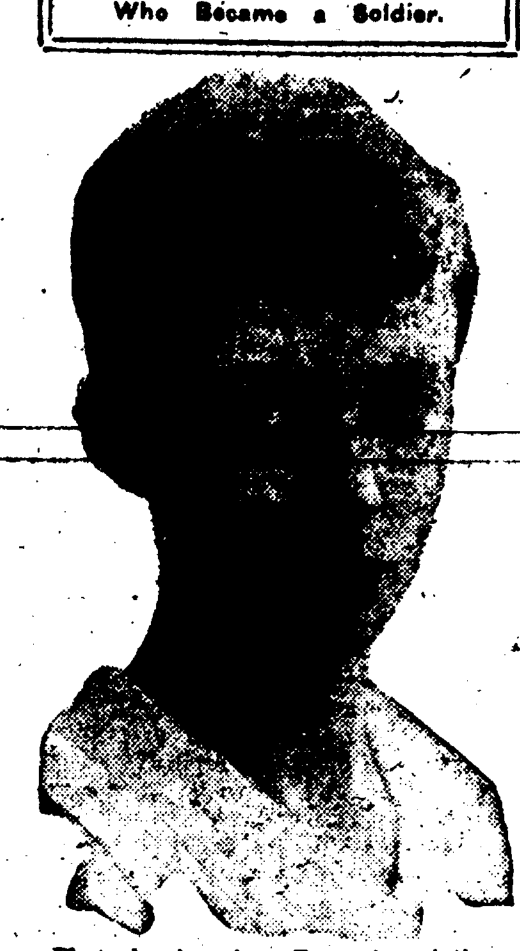

Photo by American Press Association.

Of course all well informed children have read about the dreadful war that has been raging in Europe since last summer. They know the pitiful plight of the people of Belgium, and doubtless many young readers have contributed in various ways to the relief of that sorely stricken people. Recently news was received that the little Duke of Brabant, crown prince of Belgium, had shouldered a rifle and is now fighting in the trenches in northern France. He will be fourteen years old next November, so he is very young for the perils of warfare. Still such incidents have been noted in the history of all wars. In the great civil war of our own country, that ended fifty years ago, many boys younger than the Belgian prince went to the front as drummer boys. Sad to relate some of them were killed and perhaps that may be the fate of Prince Leopold.

A Paddle Trick.

Take a piece of wood four inches long, one inch wide and one-half inch thick and form a handle on one end. Drill three holes about the size of a match in the wood, beginning one-half inch from the top with the first and spacing them one-half inch apart. The first hole is drilled only halfway through the wood, the second and third run through. This completes one side. Turn the paddle over, and the first hole will be one inch and the second one and one-half inches from the end. Space off another half inch and drill a hole halfway through the wood. This completes the paddle for the trick.

Break off a piece of a match three-quarters of an inch long and run it through the center hole of the first side. Turn the paddle over, and the peg will be found in the first hole of the second side. If the peg is put in the center hole of the second side then when the paddle is turned over it will show in the lower hole of the first side. Show the audience that the peg is inserted in the center hole of one side and tell them to watch it change. Swing the paddle and at the same time turn it, and the peg will appear to have changed.

Historical Saying.

Each of the following sentences contains a word of a famous historical saying:

There are millions of people in the world.

The man asked for food.

The lawyer for the defense spoke briefly.

There was but one thing to do.

I did not know the girl.

Only one person survived.

Not a cent was found.

He was rewarded for good behavior.

The monument was erected as a tribute to his memory.

Answer.—Millions for defense but not one cent for tribute.

"The Skin of My Teeth."

It may be interesting to note that this expression, which by many is regarded as vulgar slang, has really the high classical authority of the Bible. It is Job (19:20), who exclaims in his anguish, "I am escaped with the skin of my teeth!"

Some common sayings, such as "God tempereth the wind to the shorn lamb," "Pouring oil on the troubled waters," "The war horse scents the battle from afar," are supposed to be in the Bible, though not so. But there are not many who, in using the expression of hanging on or being saved by the "skin of their teeth," know the high authority for its use.

Overheard In the Hall.

"I wonder what's on foot today?" asked the hall light.

"I guess I am," said the rubber boot; "it is wet out."

"Where is the silk umbrella?" asked the mackintosh.

"Oh, he's in the hospital," answered the cotton umbrella. "He was attacked by a strong wind yesterday and three of his ribs were broken."

Riddles.

What key is the hardest to turn? A donkey.

Why is O the only vowel sounded? Because all the rest are in-audible.

Why is a gun like a jury? Because it goes off when discharged.

Despite the Damage He Does He Is a Good Scavenger.

In spite of the crow's instinct to feed on the eggs and young of other species (which he shares in common with several other birds), who would really wish to see him quite exterminated, even if it were possible to exterminate so resourceful a fellow?

His destruction to crops is certainly far less than that of the bobolink in the southern rice fields. He is an efficient scavenger, and his destruction of white grubs, cutworms, wireworms and grasshoppers is of great value. Above all, however, his place in our landscape is such that his passing would leave a dreary void.

Winter or summer we are conscious of him against the sky, against the fields or sentinel on a patriarch pine. In the misty mornings of summer when the sun has not yet rolled up the curtains of cloud from the mountains we hear his voice far off in the woods, rousing us from slumber, and when autumn has come and our sugar groves are a glory of crimson he is still there, his distant call floating down sweetly from the upland woods and testifying in some strange way the height of the peaks beyond.—Harper's Magazine.

LAY OF THE NIGHTINGALE.

Why It Stops When the Little Birds Come Out of the Shell.

It is generally assumed that a bird sings because he is happy, but science goes deeper for an explanation of the why and wherefore of the bird's song. Nature's optimistic joy in constructive progress is expressed in the singing of the male birds who charm their mates to further their wooing and continue after eggs are laid to encourage the fulfillment of hatching.

The song stops when the little birds come out of the shell. The nightingale for weeks during the period of nest building and hatching charms his mate and human ears near him with the beautiful music of his love song. But as soon as the little nightingales come from the eggs the song changes to a sort of guttural croak, implying anxiety and sense of responsibility.

If the nest and contents were destroyed the nightingale would at once resume his beautiful song to inspire his mate to help him build another nest and start all over again the loving work of being fruitful and multiplying.—Cincinnati Commercial-Tribune.

Economizing Labor.

Two laborers were engaged to deepen a well which had become dry. One of them sent his mate down into the well while he sat at the top and directed the work. He first ordered the other man to "dig a bit on this side," then "dig a little more on that side," until the latter, tired of both the work and the orders, exclaimed, "You sit up there and use your tongue, while I have to do all the work!" "One man here giving directions," said the man at the top, "can do as much as ten men down there." Thereupon his mate threw down his pick and climbed up beside the other man. "What are you doing here?" inquired the latter. "Two men up here," answered his mate, "can do as much as twenty men down there!"—London Strand.

Skiing on the Water.

The ski is recommended as both a life saving device and a pleasure craft, combining safety with novelty. It cannot sink, makes better speed than a swimmer and does not tire the rider as swimming does. It is more practicable for long distances and can go through water where there is a heavy undertow, as it sits so high in the water that it is not caught in the grip of the undercurrent as the legs of the swimmer are. It doesn't take a long time to master, as the surf board does; requires no skill in balancing and sticking on and has the great advantage of being equipped with a motive power, whereas the ordinary surf board must be pushed and paddled out to sea before it can be ridden in.—Outing.

Where Art Ceases.

All art is a matter of nature or life acted upon by man; a part taken out of its accidental surroundings and given artistic form. At either side of the field of true art is a waste place where art ceases to have beauty. And the waste on the one side is reached when the artist becomes so enamored of life that he forgets to interpret, to give artistic form, and only brings forth a photographic image, while the waste on the other side is reached when the artist perfects his form but forgets to put life into it.—Sheldon Cheney.

The Outdoor Life.

"The doctor says I don't take enough interest in outdoor pastimes."

"Are you going to profit by his suggestion?"

"Yes. I'm going to sit down and read every word on the sporting page."—Washington Star.

Cause of the Pessimism.

Orator—On the surface things are often right, but it is when we explore the depths of things that we see the deceptions of our fellow creatures. One of the Crowd—Guvinor, you've been buying a barrel of apples, haven't you?—London Tit-Bits.

The Real Need.

Book Agent—This book will teach you how to economize. The Victim—That's no good to me. What I need is a book to teach me how to live without economizing.—Philadelphia Ledger.

The song that nerves a nation's heart is in itself a deed.—Tennyson.

Faille Silk Gown, Taupe In Color, With Embroidery Done In Beige

Designed by Joseph, New York.

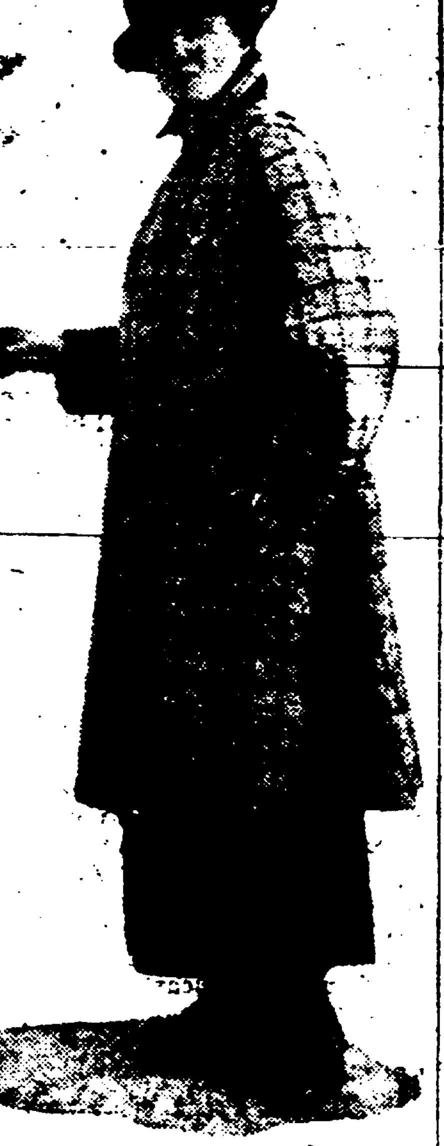
THERE is a tendency this season to substitute faille silk for satin, and many of the extremely modish frocks are developed in that material; also we are wearing subdued colors, for we have been psychologically affected by the war abroad, and our days of riotous colorings are over for the present. Of course when the whole world is painted in somber shades the dress of the world's femininity must reflect the general tone.

This may account for the desire for the faille silk, which has a subdued sheen, and also for the shades of beige and taupe, which are so popular.

Pictured in this illustration is a faille silk gown, taupe in color, with embroidery done in beige. The apron effect is new, reminiscent somewhat of the Swiss peasant costume. This is edged with embroidery, as are the tiny jacket, the sleeves and girdle. Worn under this jacket is a satin and grenadine striped blouse. ANNA MAY.

ROUGH AND READY.

A Garment For the Mountains, For Motoring or For the Seashore.



PLAIDED SPORTS COAT.

Anywhere in this country of changeable climate milady will find that a woolly "comfy" topcoat is one of her most valued possessions. For a swift ride in a motorcar, a motorboat trip on the lake or a moonlight walk beside the sea the coat shown in the illustration will be invaluable.

It is developed here in black and white plaid, with a raglan set-in sleeve, satin rolled collar and large bone buttons.

Philosophy is nothing but discretion.—Selden.

GODMOTHER TO FORTY BABIES

Hungarian Countess Takes Upon Herself Strenuous Duties.

The Countess Magdeleine Hunyady von Kethely, the wife of a great landed proprietor of Hungary, is taking under her motherly wing all the posthumous babies born in the county of Esztergon, where her husband's principal estates are situated, whose fathers gave up their lives upon the battlefield in this war. Already she has become fairy godmother to nearly forty children. A handsome young matron of thirty-six, with a daughter of her own fifteen years old and a son of twelve, the countess is accepting duties which will extend over many years, involving the dedication of her time and fortune. That she is a Belgian by birth, belonging to the princely family of Caraman-Chimay, which has suffered almost as much at the hands of the Germans as the royal house of Belgium, does not seem to have blinded her to the misfortunes of her husband's country.

Countess Magdeleine Hunyady's sister-in-law, Countess Marie Henrietta Hunyady, has been for some years the wife of Count Emil Szechenyi, and the women of the two famous Hungarian houses will probably divide among themselves the care of the little children for whom Countess Magdeleine will stand sponsor before the end of the war.

A Polishing Glove.

To the woman who cleans and polishes her own shoes nothing is more useful than the "polishing glove." It is made in the form of a mitt. The palm side is sheepskin with the woolly side out to form a polishing surface. The back of the mitt is a piece of leather. After you have carefully anointed your shoes with the paste or polish and let it dry thoroughly slip on the mitt and polish with a will. In a moment your shoes will be shining nicely.

1915 Overland Demonstrator, Electric Starter and lights, $$750.00. Van Wagenen, Inc. adv

Girl Made a Lieutenant.

Petrograd.—Army orders contain the promotion of a young woman, Alexandra Lagerev, to lieutenant, with sixteen other girls belonging to families of Don Cossacks.

She has been fighting alongside male relatives since the beginning of the war. Eight of these have been killed, and Miss Lagerev was a prisoner, but she killed her guard and escaped and led a reconnoitering party which captured eighteen uhlans.

Fine Mouthful of Teeth.

The great armadillo has ninety-two teeth—more than any other animal possesses.

London's Bridges.

At a time when the population of London was well over a million and her houses lay for miles on each side of the river she was apparently well content with her one London bridge. At length in 1734 Westminster was seized with the desire to have a bridge of her own. Application was made to parliament for powers only to encounter the fiercest opposition from the city, the 40,000 watermen, the inhabitants of Southwark and the west country bargemen, all of whom implored the commons to protect them against this new enemy. The result was that the bridge was not built till 1750. Blackfriars, at first called Pitt's bridge, was finished in 1760 at a cost of £200,000, defrayed by tolls. Waterloo was opened on the second anniversary of the famous battle with great pomp by the prince regent in person, accompanied by his royal brother, the Duke of York, the Duke of Wellington and many distinguished people.—London Answers.

"No Quarter Given."

"It is forbidden to declare that no quarter shall be given." So say The Hague regulations. That is a more modern rule than you would think. The Duke of Wellington said that he understood that the defenders of a fortress taken by storm had no right to quarter, although he himself did not, as a rule, adopt such a cruel practice. A century ago, when a feeble garrison stubbornly held out in a feebly fortified place against a force manifestly superior and apparently able to take it eventually, it was usually refused quarter. There was an attempt to justify the refusal by a doctrine of "futile resistance"—that he who uselessly resisted and caused assaulting or besieging forces unnecessary loss of life did not deserve to have his own life spared. But that doctrine has been rejected. Carried to its logical conclusion it would mean that every member of a weaker force in any kind of armed contest could be killed.—William M. Collier in Forum.

A Troublesome Cargo.

"An elephant's shoulder is never still" is a Hindu saying with reference to the restlessness of the animal. An Englishman tells how the elephant's passion for moving about once came near wrecking a ship.

A number of elephants were taken on board a vessel at Calcutta, and the steamer went down the Hugli river. At night it anchored off Saugor point. The sea was as still as oil, but the ship rolled so much that she was in danger of going over. The elephants had found that by swaying to and fro all together they could produce a pleasant rocking motion. As the ship had no other cargo and rode light the captain was much frightened. The mahouts, or keepers, were hurried down into the hold, and each one, seated on his own beast, made him "break step," but they had to stay there for a long time.

Why Milk Sours.

We are told by those who study the ways and ravages of the mischievous microbe that he is very fond of sugar and that he delights to gratify this liking by turning the supply in milk into an acid which sours the milk. These microbes are constantly in the air, alive though invisible, and ready to drop into the milk when they can. If it were possible to keep the milk from the air after the cow is milked it would not turn sour. Warm milk is particularly inviting to the microbe and favorable to his operations. He does not get along well under chilling conditions, and that is why the sweetness of milk can be preserved if it is kept cold. Boiling fresh milk changes the sugar in such a way that the microbe cannot feed upon it.—Baltimore American.

Precious Manuscripts.

Considered one of the finest manuscripts in this country, the "Evangelistarium sive Lectiones ex Evangeliis," illuminated and of French-Carlovingian origin, may be seen in the New York Public library. The manuscript is of vellum and consists of 200 leaves. Its date is set in the neighborhood of 870 A. D. The late twelfth and thirteenth centuries are also represented, and among the works from the fourteenth century is the oldest extant complete manuscript of the Wycliffite version of the New Testament in English.—Argonaut.

SOME NEW WRINKLES.

Before removing ribbon from lingerie, etc., sew tape—the same length—to one end of the ribbon. In drawing the ribbon out the tape takes its place. When the ribbon goes back again sew it to the end of the tape and the tedious task of drawing the ribbon through in the old way is removed.

After washing the hair, a good way to thoroughly rinse it is to fill a common tin flower sprinkling can with water and suspend on a nail or hook above the head over the bathtub. The water comes with just force enough to rinse, and the sprinkler can be filled as often as necessary.

After washing woolen blankets, dry them on curtain stretchers, which will prevent them from shrinking.

A handy little dish washer for the milk bottle, etc., too narrow for the hand and cloth, is made from the wire handle of a grape basket, which is straightened out, with the hook left on one end.

Instead of the ordinary method that is used for removing rust stains try the lemon juice and salt as usual, but place over a steaming kettle. The rust spots will be removed in a few moments.

For the Children

Jess Willard, Jr., Son of a Famous Athlete.

Photo by American Press Association.

The handsome and wholesome little boy shown in the picture is Jess Willard, Jr., son of the famous athlete, champion prizefighter of the world. Prizefighting is a sport that is abhorred by many thinking persons, because it is regarded as brutal and has a tendency to lower those who engage in it. Boxing, however, is considered an excellent exercise and is practiced in gymnasiums and at the various colleges. Boxing is said to teach self reliance, quickness of eye and brain and when indulged in with soft gloves for points of skill only is healthful and beneficial. To become a champion requires steady nerves and great staying as well as mighty strength. Only those succeed who live clean lives—that is, avoid the use of alcohol, tobacco and excesses of any sort. This is true of almost any undertaking. The boy who wishes to reach the top might follow the example of Jess Willard in his mode of life. He neither drinks nor smokes. Little Jess is only a baby yet. He is but two years of age.

Catching Monkeys.

In the Philippine Islands the natives catch monkeys in such a funny way!

The monkeys are very fond of the meat of cocoanuts, which grow as plentifully there as apples do in our country. They are very lazy, though, about gnawing through the outer bark and will only do so when very hungry. The natives take advantage of their greed and indolence by cutting a small opening through the shell, just large enough for Mr. Monkey's long, thin hand to penetrate.

When he once gets inside he gets his hands full of delicious, dainty meat, and his hand is naturally wider in this act than when it entered. Finding his hand will not come out, the monkey chatters and scolds, plainly showing his indignation at the way he has been trapped, but never thinks of loosening his hold on the cocoanut and withdrawing his hand as easily as he put it in. There he stands, an angry monkey, until the man who set the cocoanut trap comes and takes him captive.

Pure Drinking Water.

There is a common belief that clear water is pure water. Boy scouts who are going out camping during the present summer should be very careful over their drinking supply.

While water which looks dirty is sometimes harmless (peat colors water considerably, but does not harm it to any great extent), danger may exist although the water is sparkling and clear.

As it is often impossible to carry a filter, scouts should always bear in mind that a very simple and effective safeguard is to boil the liquid for from 5 to 10 minutes before using it for drinking purposes.

Conundrums.

What is the difference between a funny fellow and a butcher? One deals out wit, the other wit-tles (victuals).

Why have turkeys no fear of a future state? Because they have their next world (necks twirled) in this.

Why is [illegible] deceased poor doctor like a dead [illegible]? Because they both have done quacking.

Why [illegible] is Shakespeare a good broker? Because he furnished many stock quotations.

[illegible]at instrument of war does an [illegible]y lover resemble? A cross-bow (beau).

Charade.

The answer to this is one of the United States.

The first, in a great flood, saved many,
While two, just try—is part of any.
The next leads always in stripes and in stars,
While the last two letters are half of Mars.
Placed correctly together, find a state
Whose people are, beyond all doubt, first-rate.

Answer.—Ark, an, sas—Arkansas.

ALLIES NEED AID OF ITALY NOW AS MUCH AS AT ANY TIME IN WAR

Germany Discloses List of Great Concessions Austria Offered to Keep King Victor Still Neutral.

Italians, Frenzied For Appeal to Arms, Compel Parliament to Vote Free Hand to Cabinet.

WHATEVER [illegible] of Italy's [illegible] into the war, it could not now be said, as it might have been a little while ago, that [illegible] all the hard work was done [illegible] the fight was won she rushed to the side of the victor merely to grab [illegible] of the spoils. The reverse [illegible] by the Russians shows the [illegible] military power of Germany [illegible] proves that if she is to be beaten the task is yet a long and severe one.

For longer than nine months the Italian government has been on the brink of war, while the people clamored for an attack upon their old foe. There was no quarrel with Germany except that she wanted to hold Italy to the triple alliance, but did not consult her before Europe was plunged into war. But with Austria there were old scores to settle and lost provinces to recover.

Moreover, there was strong feeling throughout the country that Italy should help her friend France in any case. But Italy stood off, though, while her merchants amassed vast fortunes through the sudden extraordinary increase in business due to providing the decried Teutons with supplies, she continued to make great war preparations—and to negotiate.

Italy's Demands Secret.

The full extent of Italy's demands on Austria as the price of neutrality is not exactly known. Her ministers declare that they never made any proposals, but only received and rejected those made by Austria.

When it began to be obvious, as it must have been even to the German

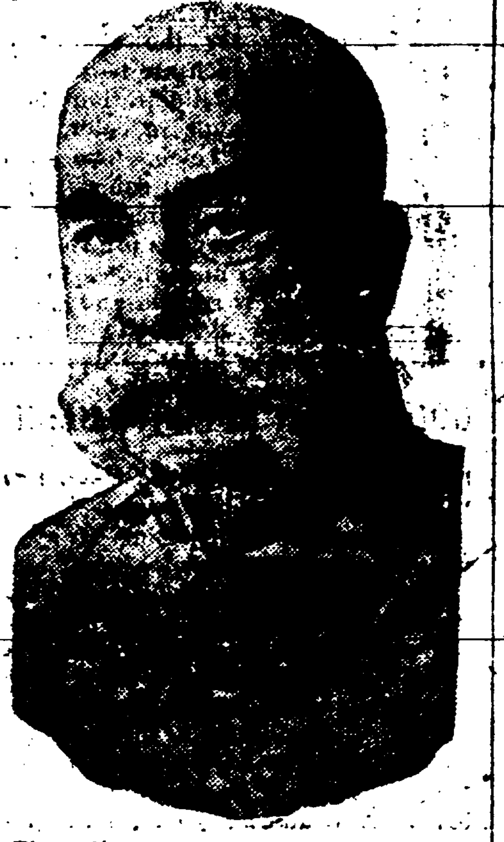

Photo by American Press Association.

EMPEROR FRANCIS JOSEPH, WHO OFFERED TERRITORY TO ITALY.

general staff, that Germany had undertaken more than she expected the kaiser, it is said, insisted that the emperor of Austria keep Italy on the brink or the safe side of it at any price.

For a long while the aged Francis Joseph, dispatches reported, steadfastly refused to give up an inch of his territory. Then, according to the reports, the kaiser himself began offering to give slices of Austria himself and sent Prince von Buelow to Rome to do it and also a special emissary to the pope to obtain assistance from the Vatican to keep Italy at peace.

What Austria Offered.

What Austria eventually offered to Italy, as made public, was disclosed in the German reichstag by Dr. von Bethmann-Hollweg, the imperial chancellor. These farreaching concessions were as follows:

Part of Tyrol inhabited by Italians was to be ceded to Italy.

The western bank of the Isonzo, in so far as the population was purely Italian, and the town of Gradisca, likewise to be ceded to Italy.

Trieste to be made an imperial free city, receiving an administration which would insure the Italian character of the city and to have an Italian university.

Italian sovereignty over Avlona (a seaport of Albania) and a sphere of interest belonging thereto, to be recognized.

Austria-Hungary to declare her political disinterestedness regarding Albania.

The national interests of Italians in Austria to be particularly respected.

Austria-Hungary to grant amnesty to political and military prisoners belonging to the ceded territory.

The further wishes of Italy regarding the general question to be assured every consideration.

Austria-Hungary, after the conclusion of the agreement, to give a solemn declaration concerning the concessions.

Mixed committees for the regulation of the details of the concessions to be appointed.

After the conclusion of the agreement Austro-Hungarian soldiers, natives of the occupied territories, shall not further participate in the war.

Germany to give a full guarantee for the loyal fulfillment of these offers.

Even after this, as 200,000 Romans marched to the Quirinal demanding war, there were still further offers of more concessions on the eve of the fateful meeting of the Italian parliament [illegible]

[illegible] and it is thought the [illegible] would have been [illegible] had King Victor Emmanuel decided on acceptance against the loudly expressed wishes of his subjects.

The Italian demands, as reflected by the Italian press and interviews with statesmen, sought not only to recover the territory which once belonged to Roman Italy and the great Italian states of the middle ages, but also to rectify the boundary line elsewhere. Italy laid claim to the entire Trentino section of the Tyrol on the north and on the east wanted to extend her frontier to the crests of the Julian Alps, thus obtaining the cities of Trieste, Austria's most important seaport, and Fiume, Hungary's seaport, and the Austrian naval base of Pola—in fact, the entire peninsula called Istria.

Arrangement Near Once.

Further, Italy wanted a clearer arrangement as to the eastern shore of the Adriatic, down which Austria owns a narrow strip excluding from the sea the small Balkan states in the rear. Avlona, the coast town which Austria offered, is the principal seaport of Al-

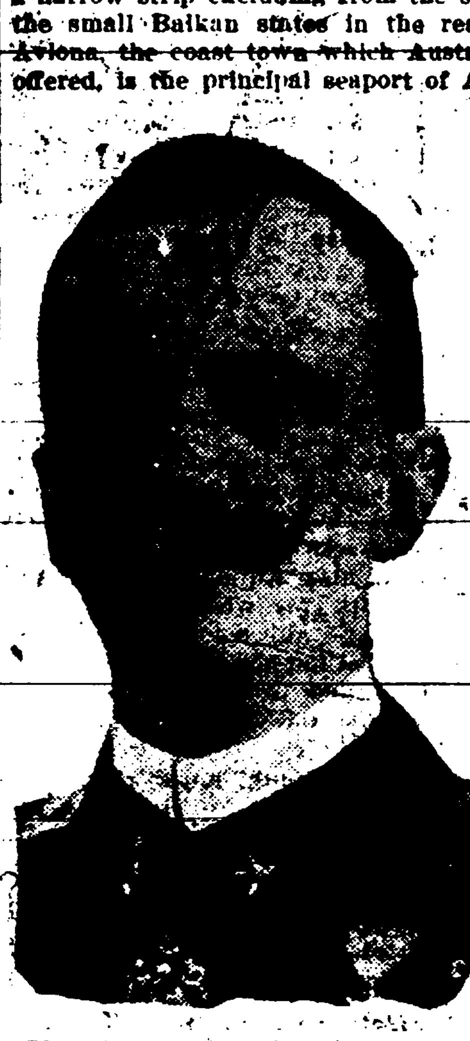

Photo by American Press Association.

KING VICTOR EMMANUEL, WHOSE SUBJECTS DEMAND WAR.

bania, which was already more Italian than Austrian, for it is in possession of Italian forces landed there in December to suppress a revolt of Mohammedans.

For a few hours recently it seemed that Italy was on the point of coming to terms with Austria. Backed by General Brusati, the king's aid-de-camp, Signor Giolitti tried to separate Victor Emmanuel from his cabinet. His avowals for peace brought about a ministerial crisis in Rome. Premier Salandra resigned. But neither Giolitti himself nor any one else could form a new cabinet or even a coalition ministry, and Salandra resumed his post.

On the eve of the meeting of parliament the fallen dictator, Giolitti, deserted by his friends and escorted by police to protect him from the mob, hastened from Rome to the shelter of his home in Piedmont, fleeing as once before he fled in the days of the Banca Romana scandals of twenty years ago. He declared he had been misunderstood.

Italy has 484 miles of Austrian frontier. Most of it lies in the Dolomites, where the peaks form a natural barrier and the passes are heavily fortified. [illegible] point from which [illegible] threat, is the terminus of [illegible] from Innsbruck [illegible] war route of the [illegible] miles from the frontier are heavily fortified, and the farther [illegible] miles from the frontier [illegible] are fortified [illegible]

Trieste Point of Attack.

Trieste, while open to attack from the sea, is only [illegible] miles from Venice, and the road by way of Udine and the shorter one by Cervignano are both good. Italian feeling in Trieste has been so strong for days that the Austrians trained their own cannon on it and more than fifty persons were killed in the suppression of one riot in which the name of Francis Joseph was hooted.

In her first line of troops Italy has 800,000. Behind these every regiment has its reserve, more than doubling the force, and altogether she has available 3,150,000 men. The first and second lines have been newly equipped with modern weapons based upon the experience already gained in the war.

Italy possesses now the most powerful machine guns in existence, capable of firing 1,400 bullets a minute, covering an area of 500 square yards. She has also adopted a new type of gun [illegible]

[illegible] which had experience in Tripoli, has all been remodeled during the last nine months.

Italy's navy is one of the most powerful. Before the addition of her four new super-Dreadnoughts—C. Colombo, F. Morosini, Caracciolo and M. Colonna—it was regarded as stronger than that of Austria. Under the Duke of the Abruzzi it has been reorganized as a single unit under his command.

The recent ships of the Italian navy are generally regarded as representing the acme in naval architecture. The Dreadnoughts carry twelve inch guns of the British type, but the super-Dreadnoughts are of the British Queen Elizabeth type, and each carries eight fifteen inch guns.

The French warships which have been guarding the Adriatic, [illegible] in the [illegible] will now be available for service at the Dardanelles. It is assumed the Italian plan of campaign will involve a close inner blockade of the Austrian naval forces as a precaution against any transportation plans which the Austrians may have in mind as across the Adriatic. For the present the base of the Austrian fleet is based on Pola, the naval arsenal lying below Trieste. The distance from Pola to Venice is only seventy-five miles, and to protect Venice from attack by sea it will be necessary for the Italian forces to bottle up the Austrian fleet where the latter is now anchored. It is doubted whether this can be accomplished without a major engagement at the head of the Adriatic.

The defenses of Pola were reported in the middle of April to have been completed, and the port was said to have been made impregnable against attack either from sea or land. Recently Austria has added to her flotilla of submarines twelve of the large German type, which fire twenty-two inch torpedoes and have a radius of action up to 3,000 miles.

Roumania Hesitates.

When Italy finally came off the brink it was almost certain that she would not be alone in doing so. Roumania has been "on the verge of war" ever since August, just as Italy, but without great offers of inducements to keep her out. It has been understood that Roumania and Italy had come to an understanding that they would strike simultaneously.

But while the Italian parliament was voting a free hand to King Victor's

Photo by American Press Association.

KING FERDINAND OF ROUMANIA, WHO IS STILL ON BRINK OF WAR.

cabinet, together with a big war fund to back them, King Ferdinand of Roumania appeared to be hesitating. It was said the situation of the Russians at the moment looked too perilous for him and he would postpone his momentous decision [illegible]. There was the [illegible] Roumania moved Bulgaria would likewise start. In that [illegible] felt, he [illegible] Bulgaria and [illegible]

[illegible] explanation to the Italian [illegible]

[illegible] as a state she has [illegible] the world of nations a[illegible] of moderation, concord and [illegible] she can proudly proclaim [illegible] accomplished this mission [illegible] which has not wavered [illegible] ful sacrifices.

Puts Blame on Austria.

"The ultimatum which the Austro-Hungarian empire addressed last July to Servia annulled at one blow the effects of a long sustained effort by violating the pact which bound us to that state, violated the pact in form, for it omitted to conclude a preliminary agreement with us or even give us notification and violated it also in substance, for it sought to disturb, to our detriment, the delicate system of territorial possessions and spheres of influence which had been set up in the Balkan peninsula.

"But, more than any particular point, it was the whole spirit of the treaty which was wronged, and even suppressed, for by unloosing in the world a most terrible war, in direct contravention of our interests and sentiments, the balance which the triple alliance should have helped to assure was destroyed and the problem of Italy's national integrity was virtually and irresistibly revived.

"Nevertheless, for long months, the government has patiently striven to find a compromise, with the object of restoring to the agreement the reason for being which it had lost. These negotiations were [illegible]

BRITISH WOMAN WINS HIGH MILITARY HONOR

Freed From Jail, She Builds Hospital For Wounded.

London.—[illegible] her [illegible] doing its bit to Miss Louisa Garrett Anderson, who now holds [illegible] equal to that of a major in the British army. Her work has to do with great things for the wounded. [illegible] demonstration, and in the early weeks of the war she and the British government fell mutually [illegible] another. Her first hospital was opened under French authority.

The [illegible], the war office asked Miss Garrett Anderson to come home and [illegible] a hospital in London. Out of her own resourcefulness, experience and initiative she is making her hospital. It has 500 beds. It is to be in working order in record time.

The family record is an extraordinary one. Her mother, Dr. Elizabeth Garrett Anderson, was one of the first of women doctors. She began her medical studies in 1860, and though the College of Surgeons and the College of Physicians refused to admit her to their examinations, she obtained a license to practice from the Society of Apothecaries in 1865.

Paris had fewer prejudices than London, and, passing the medical examinations of its university, she received her M. D. degree. Later on, when England realized that she was not to be denied, honors were not lacking, and her daughter's degree is a London one. After a long career in London Dr. Elizabeth Garrett Anderson retired to her native town of Aldsburgh and was elected mayor.

NEWSPAPER IN AN EGG.

Clergyman's Wife Finds News Item Wrapped Around Yoke.

Sedalia, Mo.—That a hen may swallow a news item and live to immortalize the digested information in an egg memoranda was shown when Mrs. J. A. Jared, wife of a clergyman, who corroborated their sensational breakfast, wrecked a boiled one and read the truth, or at least read the truth as near as a newspaper ever gets it.

The fragment of newspaper, about a yoke and a half wide, was wrapped around the egg under the shell instead of the usual thin white shawl that protects the white of the egg in most instances. Mrs. Jared carefully removed the newspaper and found that every letter on it was readable and in fairly good English.

HE RACES, USING A CRUTCH.

Moline Schoolboy With One Limb Is Good Sprinter.

Irving school of Moline, Ill., boasts of a one legged sprinter in Walter Johnson, a lad of fifteen. He has been allowed to enter in the hundred yard dash despite the fact that he is compelled to use a crutch.

He made such a remarkable showing in the preliminaries that he will participate in the annual tournament among the Moline schools. There are fifty-five entries.

Ball Player Turns Food Man.

SAYS WOMEN DRINK MORE.

Fight Against Liquor Stronger Except With Them, Says Bennet.

Philadelphia.—In an address at the fiftieth anniversary celebration of the National Temperance union ex-Congressman William S. Bennet of New York, after describing the progress made by the foes of drink, said:

"The [illegible] of the girls and women constitute the one point in which there has been retrogression. It is my observation that there is much more drinking among women than there was twenty years ago. As men are giving up the habit, women are drinking to a greater extent than they used to do."

Mr. Bennet said that in 1870 virtually [illegible] under the influence of the liquor interests, but that now only two, one eastern and one western, are so influenced.

"Drinking has decreased in New York. Now the men who refrain from drinking at a banquet are in the majority. Few men drink during their business hours."

PRODUCTS CO. FURNISH SPLIT PEAS FOR NAVY

Cape Vincent, May 28.—The Agricultural Products Corporation, of Cape Vincent, has secured a contract to furnish the United States Navy with H-U split peas. The award was given this company on the sample—not the [illegible] roves that the policy of [illegible] preparing the goods [illegible].

Some [illegible] from foreign countries [illegible] this month, and the [illegible] Company [illegible].

THREE AMERICANS ABOARD WHITE STAR LINER

New York, May 28.—With three Americans among her 285 passengers, the Adriatic, of the White Star line, left here at noon for Liverpool. In her holds the Adriatic, which now is the largest British vessel in the trans-Atlantic passenger service, carried 14,000 tons of merchandise. On her decks were several heavy automobile [illegible] and trench diggers.

The Japanese emissary who says that the union railroad station in Cleveland is the most amusing thing he has ever seen, must have a perverted sense of humor.

BEVERIDGE SAYS BE AMERICANS FIRST

New York, May 28.—At a dinner given for him in the McAlpin Hotel last night by the Twilight Club, Albert J. Beveridge, formerly United States Senator, urged the present as the best time to feach American Independent Solidarity. Mr. Beveridge has recently returned from the war zone and said that it is no reflection on any group of our people that their political action should be influenced by the racial blood flowing in their veins.

"Imagine how we would feel if we were born of generations of American ancestors and having become British subjects this country should get into a war," he said. "Then we would be American-Englishmen. It will take a long time to achieve American independent solidarity. But above all other periods in our history now is the time to begin it. We must teach it in our schools, preach it from our pulpits, talk it in our daily life. Over the teacher's desk in every schoolroom I would have these words 'We are Americans.'"

Mr. Beveridge told of Japan's rapid advance to power and of China's awakening.

HEAVY LOSSES IN INSURANCE POLICIES

New York, May 28.—The fire insurance business of the United States in 1914 resulted in an underwriting loss to the companies of 4.21 per cent. according to a statement made by W. N. Kremer, president of the National Board of Fire Underwriters, at the forty-ninth annual meeting of that organization, held at the Waldorf-Astoria. Only theh profits from the investment of capital and surplus and the earnings of capital and surplus and the earnings of funds previously collected enabled the companies to pay dividends, he added.

George W. Hoyt, of the Committee on Fire Prevention, reported that the total loss from fire in this country last year amounted to $221,000,000, which has been exceeded only twice previously, in 1904 and 1906. E. G. Richards, manager of the North British and Mercantile Company, was elected president of the Board for the coming year.

STREW BLOOMS WHERE THE LUSITANIA SANK

ITAL[illegible]NS LANDED ON RHODES TO MOVE AGAINST TURK[illegible]

The [illegible] which has [illegible] the Turkish [illegible] the entrance to the Aegean [illegible]

A [illegible] on the Gulf of Kos on the [illegible] of Asiatic Turkey, [illegible] from Rhodes. This [illegible] first step in [illegible] on the Asia Minor coast, [illegible] that the Turks [illegible] German officers will [illegible]

The attacks of the Allies on the Dardanelles are [illegible]. Following the sinking of the British battleships Triumph and Majestic by German submarines a threat [illegible] to carry the underwater warfare to the Suez Canal and cripple the trade of the marine thoroughfare was reported yesterday.

The Italian armies invading Austria madef urther advance yesterday and are reported to have captured fourteen villages along the Carinthian front and to have taken possession of three mountain passes.

Official reports from the front show that Lieutenant General Cadorna, the Italian Chief of Stag, is attempting to carry out plans for the occupation of important points in the Alps, along the Giudil carie chain of the Lessini Mountains, the Sugana Valley and the Carnic Alps. This maneuver, if accomplished, would place the Italians in an advantageous position to meet the Austrians if they should attempt to invade Italy. It also would permit the Italians to choose their own time and place for making an attempt to force the mountain passes and penetrate further into Austria.

The occupation of Altissimo Mountain, 6,790 feet high, is regarded as the most important achievement in carrying out this plan. From the high plateau north of Schio, Italian artillery has bombarded Austrian positions from five to seven miles distant, inflicting severe losses on the Austrians.

In the Carna district the Italians dominate the Dogna Valley.

A successful raid on the Trieste-Nabresina railroad by a squadron of Italian hydro-aeroplanes is reported by Rome. Further advances in the Trentino and Istria also are announced.

German submarines continue their activity. Two British steamers, the Sadsby and Spennymoor and the Swedish bark M. Ropsbald were sunk by them. The big liner Argyllshire was chased and fired on, but succeeded in escaping and made her way to Havre.

The sinking of an Austrian submarine by Italian torpedo boats in a battle on Thursday last is officially announced.

The Danish steamship Ely struck a mine near Stockholm and went down.

The great battle in Galicia is still undecided and the official reports indicate that it increases inintensity. Petrograd admits that the Austrians and Germans by superiority of their artillery fire gained ground yesterday on both banks of the San south and east of Radymno.

East of Gousskow, near Klotkowice, after terrific fighting lasting several days, the Russians were compelled to abandon two trenches.

Berlin concedes in an official report that the Germans have met a reverse in the region of Sieniawa, on the left bank of San River and that they lost six cannon when they were forced back.

Sieniawa is about fifty miles north of Przemysl and is on the Russian center in the southeastern war zone.

Vienna says the double flanking movement to encircle Przemysl from the north and southeast is making steady progress.

RUSSIANS REPEL FURIOUS ATTACKS IN GALICIA

London, May 29.—The Daily Telegraph's correspondent at Petrograd telegraphs:—

"Authoritative military men here describe the situation in Galicia as one of permanent criis at one point or another of the battle line. Fighting continues practically without cessation day or night. The Russians hold their ground on the left bank of the San at Peremyshl and to the north of that town.

"Apparently the tactics of the Germans are to concentrate rapidly, first on one and then on another sector of the front and by their usual reckless expenditure of blood and ammunition try to effect a breach in the Russian position.

"Their immediate objective seems to be the highroad and railway connecting Permysl with Lemberg, and the mass of their troops are assembled on the San to the south of Jaroslav with the idea of reaching these by frontal attack. For some days their efforts met with no material success and their casualties have been tremendous. After one of their assaults in the district of Gussakoff, to the southeast of Permysl, the Russians counted more than two thousand of the enemy's dead on the field.

"Army opinion here now is that the Russians' position in Galicia is as impenetrable as that which the constructed to the west of Warsaw."

[illegible] $10,[illegible]

[illegible]

New York, May 29.—Ten thousand dollars a year is nothing to Miss [illegible] M. West compared with keeping the affection of her sisters of the Maccabees.

Yesterday, Miss West, who for twenty-three years has been the head of the fraternal [illegible] of the Ladies of the Maccabees, refused the entreaties of her board to accept an increase of salary from [illegible] to $10,000 a year. They really meant it, those Maccabees, for they love their queen bee. There were tears in many eyes when she repeatedly refused to take their money. They had saved it for the last thing on the program of their week's convention at the Waldorf-Astoria, on the principle of keeping the pleasantest thing for the last.

"I didn't want so much money," she laughingly explained yesterday afternoon in the midst of the farewell tea drinking in the hotel roof garden. "I was afraid it would stand between men and my members. The world, especially woman's world, isn't quite ready yet to forgive a woman a large salary. I know there are members of my order today who let my salary come between us. They don't quite understand why I need even what I have been getting. That is $6,000. I have had that since 1904. Since then our order has grown from 100,000 to 187,000 members.

"I feel that I am entitled to some increase in salary for the increased responsibility. I permitted the board to give me an increase of $1,500, making my salary now $7,500. That is large for a woman, I suppose, but it is not large at all compared to the salaries drawn by men in positions of financial responsibility. Bank presidents who handle less money than I draw larger salaries.

"No, I don't mind the responsibility. I have grown used to it gradually. When I began twenty-three years ago I had one room and a desk, and was $150 in debt. My vrst investment was very modest. Now I handle about $2,000,000 a year. I have learned the secret of financial success. It is conservatism. I invest chiefly in municipal bonds. Last night we voted to erect a $150,000 headquarters, to be paid for from the increased valuation of our property holdings. Our land in Detroit is valued at $1,000 a foot.

"'Frenzied finance,' as you call it here in New York, is much easier for me than speechmaking. I worry more over a dinner toast than over $1,000. That is because I have learned that I cannot do both, and I have given up the society game. A woman cannot make a success of business if she dissipates her energy. I seldom accept invitations to public functions. I never allow anything to come between me and my work.

"Neither can a business woman waste her energy on unimportant things. The reason so many women fail to make good in their careers is that they try to darn their own stockings and take care of their little nieces and nephews after hours. A man is not expected to do anything but his own work. Home is simply his place to rest.

"Yes, our order last night passed the suffrage resolution. That does not mean that we are to be active in the movement. We have our own work to do, which we consider just as important as the vote. We did vote, however, to recommend woman suffrage to our 187,000 members all over the country. This is the first time we have ever taken any action at all upon it. Personally, I have never been vitally interested in the movement. I admit the principle is right, but I have my doubts about its practical application. I should dislike a woman politician.

"The home should be woman's first interest. It is all nonsense about a woman's choosing a salary instead of a husband."

PERSONALLY CONDUCTED.

—Kirby in New York World.

MOVIE PICTURES STILL UNMOVED

The Fulton Board of Moving Picture Censors reviewed the pictures at the local theatres yesterday, and if anything objectionable was seen in the pictures, did not take any action in cutting such offensive scenes from the reel. No preliminary performance was given at either The Quirk or the Happy Hour for the benefit of the board. Mr. Galusha and Mr. Bradt, members of the censorship committee, having viewed the regular matinee performance at the Happy Hour theatre and the regular evening performance at The Quirk.

The committee previously had served notice on the theatre managers that until they had passed upon the pictures, no public performance could be given. Yesterday morning they called at the Happy Hour and asked one of the employes to run off the picture. It was stated that Mr. Prowda, manager of the theatre, had refused to comply with their request. Mr. Prowda, when seen this morning denied refusal of the committee's request and mentioned that the consignment of reels for the day's performance is not received until after noon. The members of the board were told to return in the afternoon, and the picture, Mary Pickford in "Hearts Adrift," was viewed at that time.

Mr. Prowda, in remarking today on the censorship said: "I obtain my reels from a reliable agency, which controls the output of films for the most reliable manufacturers in the business. Insofar as my regular daily program is concerned, I have no control whatever, the agency making the selection. Feature pictures, however, such as Hearts Adrift and other high class productions, I order according to my own judgment.

Up until time for their regular matinee performance today no notice had been received by the theatre manager to hold up the show until the pictures had been passed upon.

VON AUFFENBURG HELD AS POLITICAL CRIMINAL

London, May 29.—Regarded as a "serious political criminal," the Austrian General Moritz von Auffenburg, "hero of Kamarow," has been deprived of his command and placed under arrest. News of the downfall of a man once Austrian Minister of War and one of the most highly regarded military authorities in the dual monarchy is disclosed in the Frankfurter Zeitung. The Amsterdam correspondent of the Reuter Telegram Company, quoting this newspaper, says:—

"Von Auffenburg has shown by his career that he is not a person of little importance. He has been Minister of Uar, Chief of the General Staff and at the beginning of the war he was given command of an army and until recently was feted with official approval as 'the victor of Kamarow.'

"Soon after this bottle, however, he was deprived of his command, owing, it is said, to the failure of an enveloping operation, but nevertheless on April 22 an imperial decree was issued conferring on him the title of baron and granting to him in addition the title of Von Kamarow. Four days later he was arrested, and since then he has been treated as a serious political criminal."

Events which happened during his tenure in office are given by the Frankfurter Zeitung as grounds for the investigation.

ROSS ROWLER HAD ACCIDENT

Young Man Had Narrow Escape From Death Beneath Auto Wheels

Ross Rowlee of Mt. Pleasant late yesterday afternoon narrowly escaped with his life when he was run down by an automobile in North 11st and Hubbard sts.

The young man was riding his bicycle which skidded and threw him directly in the path of a large automobile driven by Thomas Martin of Buffalo. He luckily fell in such a position that he escaped the wheels as the machine passed over him. Aside from a thorough scraping, a few cuts and bruises the young man was unhurt.

Dr. E. A. Gladman was called to the scene of the accident and advised the young man to be taken to the hospital. His wounds were dressed and he recovered the shock sustained. He will return to his home tomorrow.

The young man is the son of Mr. and Mrs. Ernest Rowlee of Mt. Pleasant and is 17 years old.

Mr. Martin, the driver of the auto, reported to the police department, but he was not detained. It was evident he was driving slowly when the accident occurred. The fortunate outcome was appreciated, to say the least by all the persons concerned.

ERNEST SIMONS HAD RUNAWAY ACCIDENT

This noon Ernest Simons of Volney Center was thrown from his wagon in 1st st near Rochester st. when the team which he was driving became frightned at an Empire United Railway car approaching from the rear.

Mr. Simons had brought a load of calves to the city and after unloading was driving down South 1st st., and when near the trolley station the horses started at a lively clip, evidently frightened at the approaching car. When near the Kennedy barns the horses swerved from their path, the wagon lurched and Mr. Simons was thrown to the ground. He escaped with with a few bruises. The horses later were quietly eating hay.

NO PAPER MONDAY

That everybody conected with the publication and distribution of The Evening Times may have an opportunity of observing Monday as a holiday, this newspaper will not be issued on that date.

WEATHER FORECAST

Showers tonight and probably tomorrow, with [illegible] northeast winds.

D/34

An Evening Frock With Many Points In Its Fashionable Favor.

BEAUTIFUL DANCE GOWN.

An iridescent overdress over a satin underdress of peachblow colored satin is an expression of an evening frock which when seen would not soon be forgotten. The poising of a butterfly bow of faintest pink illusion at the back gives the creation an ethereal quality which it could not well otherwise have obtained. This frock flouts in no unmistakable manner the passing fad for the extremely wide skirt and gains added beauty and grace from its moderation.

A Famous London Church.

St. Martin's-in-the-Fields is probably the only London church that can boast of having had a king for church warden. George I. held that office for a number of years and marked his tenure of it by presenting the church with an organ. The greater part of Buckingham palace is situated within the parish of St. Martin's, and in consequence the births of all royal children born there are entered in the church register. Among celebrities who were buried at St. Martin's are Nell Gwynn, Robert Boyle, Sir John Farquhar, Roubiliac, the sculptor, and Hunter, the surgeon. Hunter's remains were afterward transferred to Westminster abbey.—London Globe.

FLOWER FANCIES.

The most economical housewives in the world—the French—do not dream it an extravagance to keep always on their dinner tables a few cut flowers. Even the wife of the poorly paid artisan will stop to market and will not be content to go home with her purchases till she has bought a few cents' worth of flowers for her table.

And a good many American housewives feel the same way about flowers for the table. They have found that for a quarter or less flowers may be bought which with a few sprays of green thrown in by the florist will make the table attractive for a week. Yes, for a week, for with proper care cut flowers can be made to last a week—that is, except in the warmest weather, and in the warm weather we are most of us located so that we can get some sort of fresh flowers every day or so, if it is only a bunch of daisies or buttercups.

One of the best ways to keep cut flowers from fading is to see that the moment they are cut from their stems they be placed in water. But of course we cannot be sure that this is done in the case of florists' flowers. The thing to make sure of is that the sap in the stems does not dry out and one way to accomplish this—a way used by many florists—is to put a piece of wax over the stem of the flowers as soon as they are cut.

Automobile tires at special prices. VanWagenen, Inc. adv

Hungarian Countess Takes Upon Herself Strenuous Duties.

The Countess Magdeleine Hunyady von Kethely, the wife of a great landed proprietor of Hungary, is taking under her motherly wing all the posthumous babies born in the county of Estergon, where her husband's principal estates are situated, whose fathers gave up their lives upon the battlefield in this war. Already she has become fairy godmother to nearly forty children. A handsome young matron of thirty-six, with a daughter of her own fifteen years old and a son of twelve, the countess is accepting duties which will extend over many years, involving the dedication of her time and fortune. That she is a Belgian by birth, belonging to the princely family of Caraman-Chimay, which has suffered almost as much at the hands of the Germans as the royal house of Belgium, does not seem to have blinded her to the misfortunes of her husband's country.

Countess Magdeleine Hunyady's sister-in-law, Countess Marie Henrietta Hunyady, has been for some years the wife of Count Emil Szechenyi, and the women of the two famous Hungarian houses will probably divide among themselves the care of the little children for whom Countess Magdeleine will stand sponsor before the end of the war.

A Polishing Glove.

To the woman who cleans and polishes her own shoes nothing is more useful than the "polishing glove." It is made in the form of a mitt. The palm side is sheepskin with the woolly side out to form a polishing surface. The back of the mitt is a piece of leather. After you have carefully anointed your shoes with the paste or polish and let it dry thoroughly slip on the mitt and polish with a will. In a moment your shoes will be shining nicely.

To Remove Stains.

Blood Stains.—Use a tepid solution of a tablespoonful of kerosene to a gallon of water. Let stand a few minutes, then wash in cold water.

Egg Stains.—Table salt and a wet cloth will remove egg stains from silver.

Fruit Stains.—Put one heaping tablespoonful of gum camphor in a two ounce bottle of good whisky. Shake well before using and apply freely to stains when counting soiled clothes.

Grass Stains.—Wash the spot in alcohol, then in clear water.

Ink Stains.—Cover the spot with salt, squeeze lemon juice over it and expose to the sun.

Iron Rust.—Cover thickly with powdered alum and steam ten minutes over a teakettle of boiling water.

GOLD AND BLUE.

A Garment Which Has Reached the Top Notch of Sweaterdom.

We used to think the sweater rather a plebeian garment, made uncompromisingly for use and comfort. But, lo and behold, we get them made very

HANDSOME SILK SWEATER.

swaggerly nowadays of silk, very expensive and very aristocratic.

The one shown in the illustration is of gold color and blue in corded effect; long tight sleeves and patch pockets. The buttons are blue with silk loops.

FRANCIS X. BUSHMAN AND BE VERLY BAYNE, AT THE QUIRK TODAY

PHILADELPHIA RECALLS FROHMAN AS NEWSBOY.

Noted Theater Man Sold Papers at Centennial Exposition in 1876.

Charles Frohman, the eminent play producer, who went to his death on the Lusitania, was a newsboy in Philadelphia forty years ago.

With that same energy and inventive ability that placed him at the head of American producers and a discoverer of stars, Frohman made the New York Graphic, a five cent illustrated daily newspaper, "go" among the crowds at the Centennial exposition in 1876.

Frohman was sent to Philadelphia from the New York office of this publication, which at that time was devoting a supplement to descriptive stories and pictures about the exposition. He took charge of the newsboys at the Philadelphia office.

Frank H. Taylor, who knew Frohman then, says the future discoverer of Maude Adams and Billie Burke "hustled the bundles from the trains, got them to the newsstands about the city, retailed them at the door and over the counter and was everybody's willing errand boy."

Not content with selling the paper to crowds on the streets, Frohman opened a branch office in the Centennial grounds and devised so many ways to get his paper before the crowds that he frequently had to go to New York to get extra editions. He spent the summer doing this work.

DIES AS HER MOTHER DID.

Woman's Body Taken to Same Police Station Twenty Years Later.

Twenty years after she had identified the body of her mother in a police station in New York city the body of Mrs. Mary T. Cassidy was identified by her two daughters, Anna and Mary, in the same station house after she had fallen dead in a Sixth avenue elevated train.

The two cases were strikingly similar. Mrs. Cassidy, who was a widow, sixty-two years old, was seized with heart disease on the train. Twenty years ago Mrs. Cassidy's mother, who was Mrs. Mary Commisky, was stricken in the same manner on the street.

INSANE, FACES ENDLESS TRIP.

Negro, Taken Aboard Ship, Now Not Permitted to Land Anywhere.

William Raney, an insane negro, deported by immigration officers when he arrived on the steamer Guiana on its last trip, has been brought back to New York on the same vessel. Authorities at Antigua, whence he first sailed, refused to let him land.

Raney faces the possibility of many future trips aboard the steamer until officials somewhere arrange to care for him.

To Take Impressions of Plants.

Burn a common cork till reduced to a powder, add a teaspoonful of olive oil, mix into a thick paste. Now paint the veiny side of the leaf with camel's hair or black sable brush, lay the leaf carefully on a piece of clean paper, painted side down, subject it to a strong and even pressure by placing it in a book under a weight for about a quarter of an hour, then remove the leaf carefully from the paper. Very veiny leaves are the best.

Heard In the Nursery.

"I thought you were very much attached to the book," said the stuffed dog to the picture that had once ornamented the cover of the book.

"I was," said the picture, "but Dora cut me out."

She Knew the Other Things.

Church—You know there are things that money won't buy.

Gotham—There are?

"Certainly."

"Well, I'll bet my wife don't know what they are."—Yonkers Statesman.

Gasoline, Oils and Greases. Van Wagenen, Inc. adv

ROUGH AND READY.

A Garment For the Mountains, For Motoring or For the Seashore.

PLAIDED SPORTS COAT.

Anywhere in this country of changeable climate milady will find that a woolly "comfy" topcoat is one of her most valued possessions. For a swift ride in a motorcar, a motorboat trip on the lake or a moonlight walk beside the sea, the coat shown in the illustration will be invaluable.

It is developed here in black and white plaid, with a raglan set-in sleeve, satin rolled collar and large bone buttons.

Cold Proposition.

"My bank is mean, I think."

"How so, girlie?"

"I have taken hundreds of checks to that bank, and they always count me out the exact amount, just so much and no more. All the other business men with whom I deal throw in a little occasionally for good will."—Pittsburgh Post.

SOME NEW WRINKLES.

Before removing ribbon from lingerie, etc., sew tape—the same length—to one end of the ribbon. In drawing the ribbon out the tape takes its place. When the ribbon goes back again sew it to the end of the tape and the tedious task of drawing the ribbon through in the old way is removed.

After washing the hair, a good way to thoroughly rinse it is to fill a common tin flower sprinkling can with water and suspend on a nail or hook above the head over the bathtub. The water comes with just force enough to rinse, and the sprinkler can be filled as often as necessary.

After washing woolen blankets, dry them on curtain stretchers, which will prevent them from shrinking.

A handy little dish washer for the milk bottle, etc., too narrow for the hand and cloth, is made from the wire handle of a grape basket, which is straightened out, with the hook left on one end.

Instead of the ordinary method that is used for removing rust stains try the lemon juice and salt, as usual, but place over a steaming bottle. The rust spots will be removed in a few moments.

Despite the Damage He Does He Is a Good Scavenger.

In spite of the crow's instinct to feed on the eggs and young of other species (which he shares in common with several other birds), who would really wish to see him quite exterminated, even if it were possible to exterminate so resourceful a fellow?

His destruction to crops is certainly far less than that of the bobolink in the southern rice fields. He is an efficient scavenger, and his destruction of white grubs, cutworms, wireworms and grasshoppers is of great value. Above all, however, his place in our landscape is such that his passing would leave a dreary void.

Winter or summer we are conscious of him against the sky, against the fields or sentinel on a patriarch pine. In the misty mornings of summer when the sun has not yet rolled up the curtains of cloud from the mountains we hear his voice far off in the woods, rousing us from slumber, and when autumn has come and our sugar groves are a glory of crimson he is still there, his distant call floating down sweetly from the upland woods and testifying in some strange way the height of the peaks beyond.—Harper's Magazine.

LAY OF THE NIGHTINGALE.

Why It Stops When the Little Birds Come Out of the Shell.

It is generally assumed that a bird sings because he is happy, but science goes deeper for an explanation of the why and wherefore of the bird's song. Nature's optimistic joy in constructive progress is expressed in the singing of the male birds who charm their mates to further their wooing and continue after eggs are laid to encourage the fulfillment of hatching.

The song stops when the little birds come out of the shell. The nightingale for weeks during the period of nest building and hatching charms his mate and human ears near him with the beautiful music of his love song. But as soon as the little nightingales come from the eggs the song changes to a sort of guttural croak, implying anxiety and sense of responsibility.

If the nest and contents were destroyed the nightingale would at once resume his beautiful song to inspire his mate to help him build another nest and start all over again the loving work of being fruitful and multiplying.—Cincinnati Commercial-Tribune.

Economizing Labor.

Two laborers were engaged to deepen a well which had become dry. One of them sent his mate down into the well while he sat at the top and directed the work. He first ordered the other man to "dig a bit on this side," then "dig a little more on that side," until the latter, tired of both the work and the orders, exclaimed, "You sit up there and use your tongue, while I have to do all the work!" "One man here giving directions," said the man at the top, "can do as much as ten men down there." Thereupon his mate threw down his pick and climbed up beside the other man. "What are you doing here?" inquired the latter. "Two men up here," answered his mate, "can do as much as twenty men down there!"—London Strand.

Skiing on the Water.

The ski is recommended as both a life saving device and a pleasure craft, combining safety with novelty. It cannot sink, makes better speed than a swimmer and does not tire the rider as swimming does. It is more practicable for long distances and can go through water where there is a heavy undertow, as it sits so high in the water that it is not caught in the grip of the undercurrent as the legs of the swimmer are. It doesn't take a long time to master, as the surf board does; requires no skill in balancing and sticking on and has the great advantage of being equipped with a motive power, whereas the ordinary surf board must be pushed and paddled out to sea before it can be ridden in.—Outing.

Where Art Ceases.

All art is a matter of nature or life acted upon by man; a part taken out of its accidental surroundings and given artistic form. At either side of the field of true art is a waste place where art ceases to have beauty. And the waste on the one side is reached when the artist becomes so enamored of life that he forgets to interpret, to give artistic form, and only brings forth a photographic image, while the waste on the other side is reached when the artist perfects his form but forgets to put life into it.—Sheldon Cheney.

The Outdoor Life.

"The doctor says I don't take enough interest in outdoor pastimes."

"Are you going to profit by his suggestion?"

"Yes. I'm going to sit down and read every word on the sporting page."—Washington Star.

Cause of the Pessimism.

Orator—On the surface things are often right, but it is when we explore the depths of things that we see the deceptions of our fellow creatures. One of the Crowd—Guvinor, you've been buying a barrel of apples, haven't you?—London Tit-Bits.

The Real Need.

Book Agent—This book will teach you how to economise. The Victim—That's no good to me. What I need is a book to teach me how to live without economising.—Philadelphia Ledger.

The song that nerves a nation's heart is in itself a deed.—Tennyson.

BIG ITALIAN BAND TO PLAY HERE

Joseph Quintano Bringing to Chautauqua His Famous Aggregation of Italian Artists.

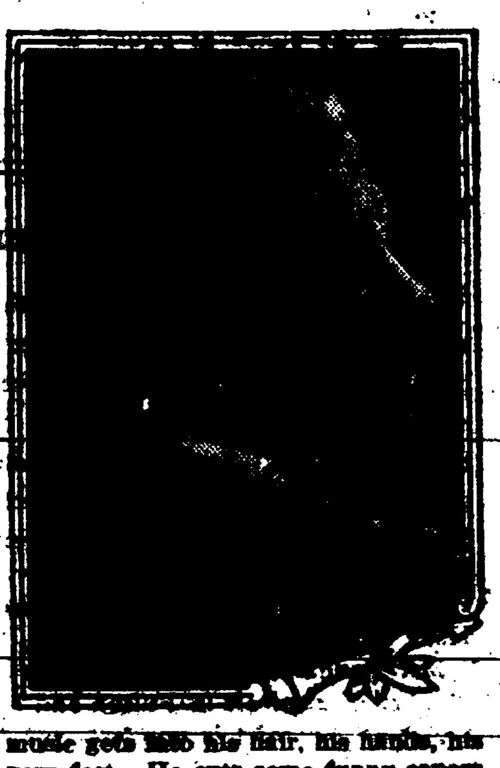
TWO MAGNIFICENT CONCERTS

A Band Not Only of Numerous Players, but Famous For Entertainment Powers—Presents the Big Music and Plenty of Popular Fancies—Has Long Record of Big Successes.

Joseph Quintano is bringing his great Italian band to Chautauqua to furnish music for one day, both afternoon and evening.

Quintano is himself an Italian. His players also have the instincts of the land of music, and every selection they render is rich with the flavor of sunny Italy. The organization has played together for many years and under Quintano's leadership has taken high rank in the musical world.

Quintano is all music. He is temperamentally equipped for leadership. His



music gets into his hair, his hands, his very feet. He cuts some funny capers at times. He is a master at coaxing the best effects out of his men.

They play the big music and lots of popular musical fancies. He knows how to entertain the people and gets a lot of fun out of the operation.

A NOTED SINGER WITH THE BAND.

Mr. Harry Barnhart, a Great Song Leader and Organizer, to Be Here.

A man can go into a strange city, see a need, make an indifferent city administration see the same need and indorse the plan proposed to meet that need. Such a man has some personality.

That is what Harry Barnhart did. He reached Rochester, N. Y., on an entertainment tour, thought that it would be a good place to try out his particular hobby, if you please, made the mayor see that it would be a good thing for the city and then presented the proposition to the great crowd at one of the municipal band concerts. It met with success.

What was it? The idea of a great community chorus, a chorus made up of those who have had little or no

training other than that received at the regular rehearsals. In a short time 1,200 people were in the most democratic organization in the city. They went to work, and under his able direction they presented a series of entertainments, at which the best things were sung in masterful style. At the great Exposition park 10,000 people heard the chorus with an orchestra of over 100 pieces, both directed by Mr. Barnhart, present Handel's "Messiah." Over 3,000 people were unable to gain admission.

This is the man who will appear with the Quintano International Band in solo and in an effort to arouse interest in another community feature, that of a community in song. Mr. Barnhart believes that the desire for expression on the part of the people best finds its outlet in song. "All the people singing" is his motto. With the splendid band of thirty pieces for an accompaniment the great Chautauqua chorus ought to ring out on band day.

Opinions

Striking a Balance

That Italy comes in [illegible] strength into the fray, that [illegible] had months of preparation, that there are no hospitals overflowing with Italian wounded, no camps in Germany and Austria filled with Italian prisoners, that Italy's reserves are not depleted but remain to draw from—these are appreciably offset by the fact that Italy's armies are not veteran in the sense that those of Germany and Austria-Hungary are veteran.

While the Italian soldiers are not worn down by slaughter and service they have not had the inestimably valuable experience of nearly a year of confrontation with the actual emergencies of war.

So against the odds in Italy's favor of jumping into the ring a newcomer in the full flush of vigor—may be fairly pitted the handicap of the inevitably experimental in a war which to Italy's adversaries is no longer an experiment—whose lessons they have learned, not from non-participant observation but from the stern schoolmaster, Practice.—Buffalo Times.

The Length of the War

Colonel Harvey in the current number of the North American Review takes rather a gloomy view of the war situation in an article headed "Can Germany Be Beaten?"

"It is still," he remarks, "as we said ten months ago, inconceivable that Germany shall triumph, but it is no less certain from the standpoint of the Allies that the prospect is laden with gloom and foreboding and that the end is far off."

Only a few weeks ago there was a strong feeling in America that July would see the end of the struggle. This was prompted by the moral certainty that Italy would enter the great arena on the side of the Allies and that the preparations for a supreme effort on the part of England and France for driving the invaders out of France and Belgium were likely to bear fruit in May and June.

Italy is in, but the effort in the western theater of war has thus far had no decisive results, while on the eastern front Russia has suffered a considerable reverse which time will be consumed in offsetting. On the Dardanelles the situation is a desperate one for the attackers as well as the attacked, and another British battle ship was destroyed on Wednesday.

Germany fights doggedly on and on, while it is undeniable that the Allies will steadily gain in strength. Yet the impressions gained from each day's events lead to the conclusion that no living man can make a reasonable guess as to the duration of the war either in months or years.—New York Herald.

WHY A MEMORY DAY

The memory day set aside in honor of the men, brave and true, who sacrificed their lives for our country is again upon us. It is a day of all days that should be met reverently, for not alone to our dead heroes should our hearts reach out, but also to the wives and mothers of these men. These women, though they [illegible] battle at the front, fought and won many hard [illegible] walls of home. Heart-ache and sorrow [illegible] to their lot. Many are these true [illegible] who [illegible] shouldered the care and responsib[illegible] a group of little ones alone, all waiting through the long [illegible] for father, who in many cases, ne'er [illegible] home again. These true stories of the sorrows, intermingled with the bravery of those home soldiers, the women, [illegible] written between the lines of our history. Faces and lips have told us, too, these same tales.

Now then, we have a Memorial Day, but somehow in our zest to commemorate the day we seem to have lost our balance, as we Americans are quite wont to do. In our celebration of a day set apart we seem to lose sight of the real significance. Memorial Day is not the only day we commit ourselves. For instance, on Christmas it means to many nothing more than gift-getting; Easter, as individed with chicks and eggs, and our glorious Fourth o' July, a long list of dead and injured. However, in the last few years a new thought movement has rapidly spread, and which bids fair to bring the right spirit into these days. Let us hope Memorial Day will claim them, too, our best attention. Let us look forward to the time when Memorial Day will be a memorial day in deed. Let us find a fitting way for voicing our appreciation than by dancing on the graves of our heroes and rudely pulling at the heart strings of the living. This would mean the forgoing of all ball games, dancing parties, feasts and the like, for this one day. Are we strong enough, and unselfish enough, as real Americans, to do this?

ASK THE VETERAN

It is not unusual and, perhaps, it is not unnatural, for young people to ask why Memorial Day should still be kept up. For a reply we may turn to the veteran, whose eyes will kindle, voice get stronger, shoulders go back and chest come forward, as he tells you that the day is observed in memory of the comrades who lost all that their cause should win, or in memory of those who survived the terrors of war and have since joined the ranks of the majority.

Perhaps another veteran may tell you that the soldiers of the war need no explanations. Another man may tell you that the remnants of the regiments can now join in commemorating a soldier's death with feelings not different in kind, whether he fell toward them or by their side.

Memorial Day has other meanings. They are solemn meanings. It is a day of reaffirmation from year to year of a national act of enthusiasm and faith—of going somewhere as fast as ever the men in the sixties could go.

The day has so much real worth in addition to bringing back the dead to live with us for an hour or two, for are not the funeral marches and the decorated graves worth more to the youth of America by way of inspiration than the monuments of a half century of peaceful life could be?

A One-Sided Picture

Mr. Taft's arraignment of labor union leaders and their political policies is true—in its general tenor, at least. They have failed to suppress a certain lawlessness in the name of labor unionism which has resulted in violations of the criminal statutes. Defence funds for the men implicated have been raised. Union leaders have sought to obtain special privileges fortified by statutory declarations, and have worked vigorously, politically and in every other way, to bring this about.

All these things being so, wherein do the labor union leaders differ essentially from the capitalist leaders with whom they are in economic conflict? Has capital never violated statutes? Has capital never spent huge sums for the defence of members of the employer class when under prosecution? Has capital never sought special privileges from state and national legislatures, declarations of policy embodying special privileges from party conventions? Has capital never maintained lobbies and worked for its own pocket?

Mr. Taft presented a one-sided picture. It happens that the labor class, so-called, puts forward union leaders with certain duties and certain responsibilities, who by reason of that fact may seem to stand more directly and specifically responsible for union conduct than do the undesignated and irresponsible big men who sway opinion and action of the capitalist class. Therefore it may be easy to denounce the labor leaders for labor's shortcomings, but it is none the less a partial proceeding, so far as the public is concerned. It is elementary to say that the public welfare requires the suppression of "tyrants" in either class. It is plain, practical fact to say that the public still deems itself in less danger from labor unionism, even when its leaders make mistakes or fail to realize their highest ideals, than from the special privilege seeking of the great moneyed interests of the country.—New York Tribune.

HEALTH HINTS FOR SUMMER

State Department of Health Issues Injunction Against Flies

Almost everyone knows that under unsanitary conditions the fly may play a great part in the spread of typhoid fever. In the Spanish War, for instance, [illegible] of our volunteer [illegible] had typhoid, and it was shown by the [illegible] investigation that [illegible] mainly due to the improper disposal of human wastes and the consequent spread of disease germs to food by flies.

Many people do not, however, realize that even in the city other diseases such as summer complaint, which kills so many babies, are spread in the same way. The fly is a special menace in every home where there is a young baby.

Last summer the Association for Improving the Condition of the Poor made a study of this problem in New York City which gave striking results. Three tenement districts noted for their high infant mortality were chosen, and in each district a careful study was made by trained nurses of 400 families, in each of which there was an infant under one year of age. General hygienic instruction was given by the nurses in all the homes, but in one-half of them special emphasis was laid on protection against flies. The mother was taught to keep netting over the baby, on the bed, in the cradle and in the go-cart. Over a thousand yards of netting was distributed for this purpose. The covering of food, the removal of food scraps, the washing or covering of soiled diapers were all urged, and large quantities of fly paper and anti-fly leaflets were distributed.

On each visit of the nurse the general condition of the home as to cleanliness was noted and also the degree to which the instructions as to fly protection were being carried out.

When the summer was over and the results were worked up and all incomplete and unreliable data excluded, it was found that—

Infants in dirty homes had nearly twice (1.8 times) as many attacks of diarrhoea as infants in clean homes.

Infants not protected against flies had nearly twice (1.9 times) as many attacks of diarrhoea as infants who were protected against flies by netting and in other ways.

Infants fed on the bottle had more than twice (2.4 times) as many attacks of diarrhoea as breast-fed infants.

If the babies of New York State are to be protected against the dangers of infant diarrhoea this summer, they must be breast-fed; brought up in clean surroundings; protected against the filthy fly.

Communication

The Evening Times.

Gentlemen: If such photo-films as Marie Corelli's masterpiece, "The Vendetta," and "Hearts Adrift," which we understand was taken from a book written by a clergyman, are to be barred and not shown in our local theatres are too suggestive, why not bar the styles of dress worn on our streets—dresses that street corner bums make lewd remarks about?

Is it a case of the Bible proverb, "Strain at a gnat and swallow a camel." A Citizen.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

How often should graphite be used as a lubricant for springs? Would the paste or stick stove polish do if mixed with gasoline?

No rule can be given for this. Apply the graphite whenever it is found to be required. This may be only once a year, and then again it may be oftener. The object in using a lubricant between the spring leaves is to prevent squeaking, rusting and to cut down the friction. No great harm will be done if the car is used until the lubricant is exhausted. In fact, we would advise operating the car until it is noticed that a new application of graphite is required. Stove polish will not do. You should use flake or powder graphite. Your suggestion as to using gasoline brings up an interesting point. It is slightly preferable to mix the graphite with gasoline because after the paste is applied to the spring surfaces the fuel evaporates and leaves the dry graphite, which acts as a lubricant, yet there is no grease or oil to ooze out between the leaves to catch the dust and give the springs a dirty appearance.

In painting my radiator, head lights and other brass parts of my car black what can I use that will stand the heat of the lamps and radiator?

The simplest method of preparing a black varnish for brass is to fuse three pounds of asphaltum, and after it has been melted add one-half pound of shellac and one gallon of oil of turpentine.

In running less than a mile the water in my car becomes steaming hot and boils if I go very far. The cylinders are clean and timing correct. There is no stoppage. Can you suggest a remedy?

If the timing is correct and the water passages free there is no reason why the water should boil unless the mixture is too rich or the cylinders are carbonized. Examine the timing and the carburetor adjustment once more, then inspect the cylinders to see whether they are carbonized and look at the passageways to see that they are not clogged. Even if the radiator is free from obstructions and the hose connections are clear there may be dirt or sand in the water jackets. Lastly, make sure that water is not being lost either by leakage or by flowing out through the radiator vent pipe. Sometimes the vent opening is placed low with the result that the water splashes out until enough has been lost to prevent proper cooling. To keep the water from boiling the radiator must be full or nearly so at all times. A shortage of water reduces the amount of cooling, and when the level of water drops below the top of the return connection to the radiator circulation stops entirely.

What is the best means of doing away with the vibration caused by my engine when making more than twenty miles per hour? It has always done this. The car and engine are in good condition except for the vibration. The car has been equipped with airless tires.

The vibration can be minimized by balancing the reciprocating parts carefully. Remove the pistons and connecting rods. Weigh the four pistons and remove the metal from the heavier three until they weigh exactly the same as the lightest one. Do the same with the connecting rods.

In addition, if the pistons are of exceptionally heavy construction it may be possible to remove some excess material from all of them, thereby reducing the weight and vibration. The same may be said of the connecting rods.

What is the best way to strengthen the engine bed? I find that the motor rocks violently when pulling hard. The bolts holding it to the bed are tight and the bed vibrates with it.

It is next to impossible to strengthen the engine bed without putting in a new crank case. Possibly your trouble is due to allowing the motor to pull too hard. When it begins to labor on a hill shift to low gear. Do not strain the motor by allowing it to work under these conditions.

The center bolt in my rear spring breaks frequently. How can I prevent this?

The only possible explanation seems to be that you allow this bolt to come loose, or when you put in a new one you do not tighten it sufficiently. Use a lock washer to hold the nut from turning and, in addition, see that the spring clips are kept tight, because if these work loose an additional strain is placed on the center bolt.

The front cylinder in my car gets too much oil. It works well when it has a clean plug, but after running about one hundred miles it misses. What is the cause of the oily cylinder?

The trouble is undoubtedly due to a worn cylinder piston or rings or to the openings in the three rings being in alignment. An inspection of this cylinder should show where the trouble is, and if the piston or rings are worn they should be replaced. The missing, of course, is due to the plug becoming fouled with oil.

The spark lever on my car is very hard to turn, especially when the motor is hot. Where do you think the trouble is, and how can I remedy it?

While this stiffness may be in any of the joints of the linkage operated by the spark lever, it is most likely that the breaker box is too tight a fit, so that when the motor becomes heated the expansion of the part on which it fits causes it to stick. Disconnect the breaker box from the linkage and note whether it moves freely. If it does not, remove it and rub the interior surface with emery paper until enough material has been removed to allow it to work freely.

Is the compressed oxygen method satisfactory for cleaning carbon out of cylinders so that the pistons and valves will be thoroughly cleaned, or is disassembling engine and scraping the different parts necessary?

Removing carbon from the cylinder by the use of compressed oxygen is entirely satisfactory and highly to be recommended. However, it is something that is best done by a garage, as it would hardly pay you to buy an outfit just for yourself. The carbon is removed by burning, and the reason oxygen is used is that carbon, or any substance for that matter, will burn about five times as readily in oxygen as in ordinary air. Thus carbon will burn with the rapidity of celluloid in an atmosphere of oxygen, yet the incrusted carbon cannot be ignited when exposed to the ordinary atmosphere.

The operation is simple. One of the valve caps and also the spark plug is removed from each cylinder and the piston is brought to top dead center. Then the cylinder is filled with oxygen gas and a piece of cotton waste is dropped into the cylinder and lighted. As long as there is any carbon to be burned oxygen is supplied to the cylinder. The reason that compressed oxygen is used is so that a great quantity of gas can be stored in a container of a given size. The oxygen gas is never used under pressure in the cylinder.

How can I make tire chains last longer?

Upon examination of an old chain it will be found that all the wear and strain are on the link upon which the cross chain is fastened.

When a cross chain wears through and breaks it will be found a good plan to fasten it to the link ahead of the one it was previously fastened to and to continue said operation until all the cross chains have been changed.

Is leakage from cylinder rings into crank case caused from the rings not being worn to fit cylinders or is it faulty rings? Also, when is fuel consumption the greatest, in climbing hills, in high or low gear?

Leakage is most likely due to worn rings, or it may be caused by the split ends of the rings being in line and in this way affording a direct passage for the gases. Before the rings are worn enough to perfectly fit the cylinders there may be a slight amount of leakage—that is to say, the rings will not hold the gas in the combustion chamber quite as well as they will when the rings have become worn to perfectly conform with the shape of the cylinder, but the extra amount of gas is so small that it is hardly worth while to consider it as a leakage.

The fuel consumption is greater when running on low gear for two reasons—the motor efficiency is lower and there is a power loss due to the four extra gears in the gear set that the driving torque must be transmitted through. The motor efficiency is reduced for the reason that when climbing a certain hill on intermediate or low gear that might be climbed on high the throttle opening required for a given speed is less. This means that the actual compression in the cylinders is correspondingly reduced and reduced compression lowers the efficiency. Needless to add, the lower the efficiency the greater the consumption of fuel.

Can gas such as generated from carbide be used in an automobile engine?

Yes. Occasionally we hear of a motorist driving home on acetylene gas when his supply of gasoline is exhausted. The objection to the use of this gas is that it is much more expensive than gasoline.

I notice that in the racing events the cars use castor oil as a motor lubricant. What advantages other than less smoke has this oil?

Castor oil has a greater viscosity than any other oil used for motor lubrication at the high temperatures experienced in racing motors; therefore it helps to prevent the passage of the gases past the piston and the flow of the oil up into the combustion chamber, where it would burn and cause smoke. Since very little of the castor oil makes its way up to the combustion chamber there is very little that is burned, but most of it is used for lubrication, with the secondary advantage that much less oil is necessary. It is not advisable to use this oil in everyday work, however, because it causes a heavy carbon deposit.

CALLS TO ARMS STIR PEACE MEN

Lake Mohonk Arbitrationists Hear of Defense Needs.

TOLD TO FACE BARE FACTS

Dr. Grier Hibben, Secretary Garrison and General Wood Plead Before Conference [illegible] Preparation of United States, Not For War, but Against Sudden Aggression.

Never in the twenty-one years of its existence had the Lake Mohonk conference on international arbitration heard such calls to arms as [illegible] this year. The 200 delegates from all parts of the country were practically all peace men. They were told to "face facts," and the appeal stirred them.

Dr. John Grier Hibben, President Wilson's successor as president of Princeton university, fired the first shell. He advocated "a wise preparedness, not for, but against war."

"This is not a question of mere academic interest which we are discussing," said President Hibben. "We as a nation are looking into a future that is dark and mysterious. In the high tension of international hate and international suspicion the most insignificant accident may chance to precipitate for us a national catastrophe. And in the great emergency, if it should come, what will we say? Peace! Peace at any price?

Don't Trade Honor For Peace.

"But let us not forget that there are some things which cannot buy peace. If we sacrifice them in order to secure peace the peace thus sought comes before us the veriest torment of a living hell. We dare not trade honor for peace; we dare not betray duty in order that we may bargain for peace; we dare not indulge ourselves in the enjoyment of the blessings of peace while we turn deaf ears to the cry of distress or to the summons of a righteous cause."

Later came Lindley M. Garrison, secretary for war, who saw no immediate prospect of war giving place to either peaceful or forceful arbitration, and called on his hearers to "look facts fearlessly in the face and act accordingly."

"We will be despised among the nations of the earth," he said, "and our righteousness will not save us from the aggressions of the unrighteous if we remain weak and flabby. We must be ready to make war in order to keep the blessings of peace.

"Self preservation is the first law of a nation. A nation to deserve preservation must be sane, just, righteous, self respecting and courageous.

"Since it only obtained those virtues by conflict of one sort or another, it can only retain them and thus insure its own preservation by being prepared in every proper way to defend them from the inevitable assaults which will be made against them.

"Peace—yes; peace based upon righteousness.

Militarism Not Bogy Here.

"Militarism is used as a term of reproach to divert proper consideration of what must be considered. Militarism in the sense of having the military force interfere in the slightest with the conduct of our government by our civil authorities is not conceivable in this country.

"We are surely not so deluded as to believe that we can reach by intuition what others can only acquire by training and experience.

"We, as a nation, are exceptionally set apart only in one respect—namely, the freedom of our people under our institutions to develop and expand and make the most of themselves without fetters or restrictions. The institutions are the very Ark of the Covenant, and if we are worthy to possess them we must show that we cherish them and will protect and defend them.

"Our lack of aggressive intention and our righteous intentions minimize the sources and causes of war, but we ourselves have frequently been at war. Our isolation has not, as a fact, assured our freedom from conflict, and other nations relatively as isolated have been involved in war, and no sound reason can be adduced which would justify a sane man in concluding that isolation alone spells safety. Furthermore, our isolation is geographical only."

"We soldiers and sailors are merely your trained servants," said General Wood. "You create wars; we try to eliminate them. Nine out of ten wars are based on trade. The trouble with most conferences of this kind is that they do not look conditions in the face. We must not delude ourselves that our geographical remoteness has made us safe.

"This is one of the great causes of [illegible]—this and the greater efficiency of the implements of war. When we have ceased to fight for our honest convictions we shall cease to be worthy to exist as a nation.

"It is murder for you to send your boys to war untrained when it is possible to train them. All we soldiers and sailors want is that you give us a reasonable degree of preparation, so that when your boys come to us to fight the sacrifice may be as light as possible."

ADMIRAL'S PEARLS STOLEN.

Thief Busy During Review of Fleet in Hudson River.

A necklace composed of pearls gathered from all parts of the world by Rear Admiral Nathaniel R. Usher was stolen by a robber who invaded Mrs. Usher's rooms in the home of the commandant in the New York navy yard, Brooklyn, during the review of the fleet in the Hudson. The thief took two diamond solitaire rings, a diamond brooch and a diamond pendant.

Rear Admiral Usher said he had been collecting pearls for the necklace for many years during his cruises on board warships throughout the world.

VIENNA RESTRICTS DIET.

No Beef, Veal or Pork Can Be Sold on Tuesdays and Fridays.

Vienna now, according to the new government regulations, under which beef, pork and veal cannot be offered for sale on those days, is to have two meatless days each week—Tuesday and Friday.

On the first day affected the restaurants and hotels provided unsatisfactory menus of mutton and lamb and various sorts of game. Households made their purchases the previous day or invested in sausage, liver and eggs, which are not affected by the regulation.

EDISON WINS HONOR MEDAL.

Forum Decorates Him as American Who Has Done Most For Mankind.

New York.—Thomas A. Edison has been voted the American who has done most to benefit mankind and has received the Civic Forum medal of honor for distinguished public service.

This medal, established to give recognition on the part of the rank and file of the American people to that one of their countrymen who in ways of peace performs some signal public service, was awarded last year for the first time to Colonel George W. Goethals for his work at Panama.

Dr. Nicholas Murray Butler, president of Columbia university, presided at the reception, and the speakers included Guglielmo Marconi, inventor of the wireless telegraph; Dr. Charles P. Steinmetz, consulting engineer of the General Electric company; Dr. Richard C. Maclaurin, president of the Massachusetts Institute of Technology, and Charles A. Coffin, chairman of the board of directors of the General Electric company. Percy Mackaye read a poem written for the occasion.

OREGON MEN NOT "FRESH."

Women "Hiked" It Alone, Unarmed and Unmolested.

Eugene, Ore.—Five Eugene young women have just finished a "hike" of sixty miles along the Oregon coast unarmed and unafraid of stories of bears told them at virtually every place they stopped. They carried packs weighing almost twenty pounds and took their chances at finding shelter each night.

They proudly boast that not one man "got fresh" and that it would be quite possible for a woman to walk all over Oregon alone without being molested.

The "hikers" were Miss Frieda Goldsmith, Miss Harriett Thompson, Dr. Bertha Stewart, Miss Mary Perkins and Miss Myrrha Hepburn. Four are members of the University of Oregon faculty.

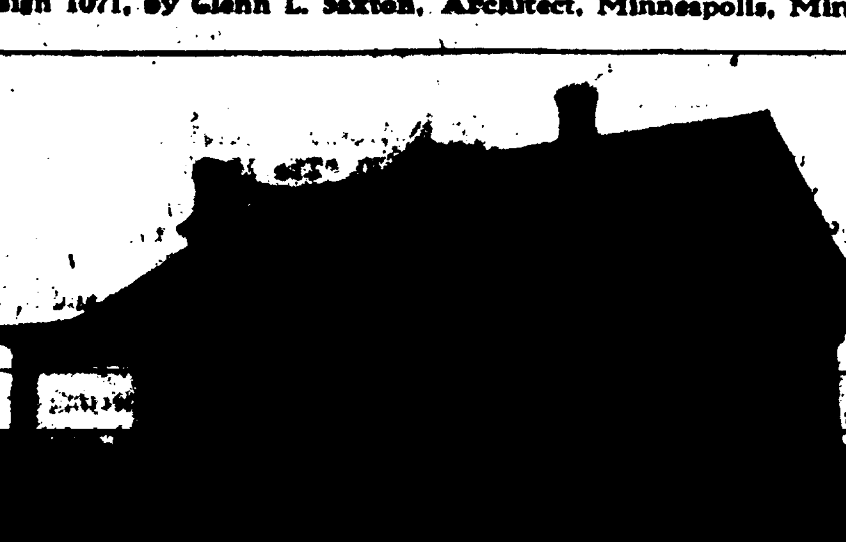
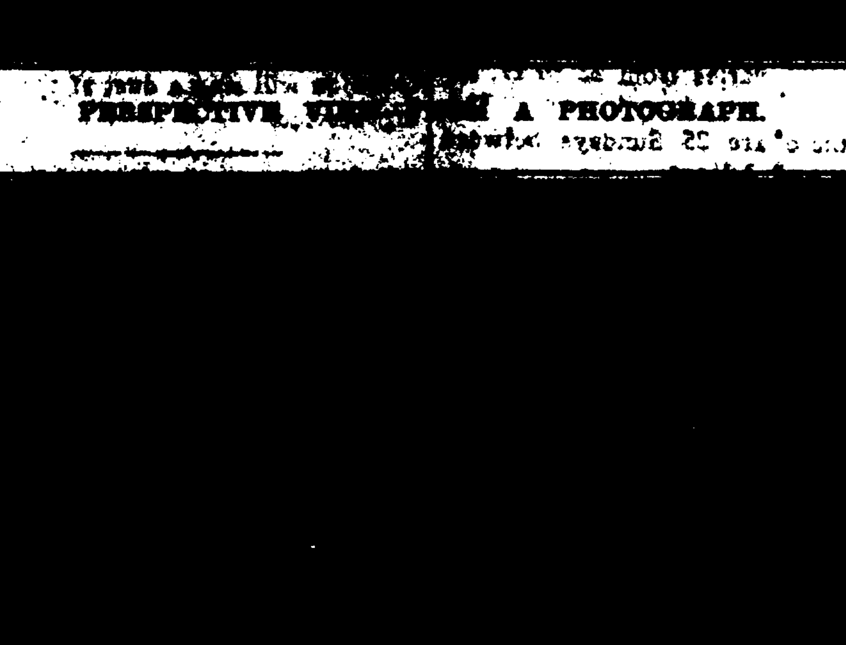
[...] VIEW OF LIVING ROOM AND DINING ROOM EXTENSION

Design 1071, by Glenn L. Saxton, Architect, Minneapolis, Minn.



PERSPECTIVE VIEW [illegible] A PHOTOGRAPH.



INTERIOR VIEW—LIVING AND DINING ROOM.

This house is artistic both as to the exterior and interior. Dark brown siding with white trim and the main roof sweeping over the front piazza give a very graceful effect. The living room and dining room are finished in dark oak, with beamed ceiling. Ionic columns extending to the ceiling give a classic and substantial effect to the division between the living and dining room. Both rooms are well provided with windows, those of the entrance being leaded. Size, 40 feet wide by 32 feet deep. First story 9 feet in the clear, second story 8 feet, basement 7 feet. Cost to build, exclusive of heating and plumbing, $4,000.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains 310 designs costing from $1,000 to $6,000; also a book of interiors, $1 per copy.

GERMANS CONTINUE TO BUY AMERICAN HORSES

How They Send Them Home Is a Deep Mystery to Dealers.

Lincoln, Neb.—Representatives of all of the principal nations at war in Europe are combing the west for horses for the armies. Several of the horse buyers bear titles; the majority of them are men who have been at the head of great establishments in Belgium and France, which formerly supplied America with draft horse stallions. One who was recently in Lincoln was paid $2 a day and expenses for his work. Before the war he drew $10,000 a year as manager of a great breeding stable in Normandy.

How the few German buyers get their purchases through is a mystery, and they refuse to elucidate. They make it plain that that is their own business, and they keep on buying. Some of the largest dealers in this section have been asked to bid on a 25,000 head shipment for the German government payable by drafts on New York.

In the beginning speculators and business men jumped into the game, taking large contracts or subcontracts. The ruling prices for the grades desired were $150 and $175, subject to inspection, which was very rigid, and a large portion of each shipment was rejected. Rather than carry these back to the west the dealers sold them at the points of shipment for what they could get.

That there are horse traders in Europe and dealers with sharp eyeteeth was proved by the fact that a number of these rejected animals were shipped to Europe, the purchasers being government agents, who took this means of showing American dealers some tricks in horse buying, purchasing in the guise of contractors who desired the animals for the northwest.

The fact that the greater part of the supply in the west has already been purchased or is in the hands of speculators, holding for the raise they feel certain will come with a continuance of the war, has led to a letting down of the inspection bars. Hundreds of animals that formerly would have not received a second look are now going through. The stable boys say that the fat ones are given the preference.

White and gray horses are taboo because they are shining marks on the battlefield. The one thing the buyers are particular about is the wind. They require swift galloping for a block or two before the inspector decides.

LIKED GIRL'S KISS, BUT—

British Soldier Could Not Stand Embrace From Her Father.

H. C. Keith of Wakonda, S. D., is in receipt of a letter from a friend, R. S. Johnston, a Briton, who is a gunner in the British army in France and Belgium.

"The French and Belgians," the Briton writes, "are good to us. When we marched into one place an extremely pretty girl rushed up and threw her arms around my neck and kissed me. I felt like fighting six Germans and ten or fifteen Turks.

"But when her father came up and pulled off the same stunt, kissing me on both cheeks, I got real mad and told him I'd punch him in the jaw."

KAISER IN SHELL PERIL.

His Automobile Is Smashed and Chauffeur Killed In Galicia.

The German emperor and his staff had a narrow escape while watching the operations in a village near the river San, in Galicia, according to a dispatch from Budapest.

A heavy shell burst 500 yards away from the kaiser. It fell among some automobiles, destroying several machines, including the emperor's car, and killing his chauffeur. The emperor left his car only fifteen minutes before.

TO KEEP MAGNA CHARTA DAY

New York State to Honor Seven Hundredth Anniversary of Signing Act.

To commemorate Magna Charta, which is 700 years old this year, the New York state constitutional convention has decided to hold exercises in the assembly chamber on June 15, the anniversary day.

Elihu Root is to make the principal address.

Get Rid of Him.

"I understand your wife is doing her own cooking."

"You are mistaken."

"But Jinx told me she was."

"Oh, that was just for a little while! Jinx was making us a visit, and I guess she thought he had stayed long enough."—Houston Post.

Eliminating Soup.

Children Cry FOR FLETCHER'S CASTORIA

NOT FLEETS AT WAR.

Scientists Explain Cause of Frequent Reports of Battle in North Sea.

The frequent reports, which subsequently were not confirmed, that heavy cannonading had been heard in the North sea have led to an investigation by scientists. It was disclosed that the reports of detonations were authentic, although no firing took place.

Abbe Moreux of the observatory at Bourges came to the conclusion that these loud reports were simply what the Belgians call "mistpoeffers," or explosions of fog. They are called "hiccoughs of the sea" in Holland and sometimes are referred to as marine bombs. The same phenomenon has been observed on the banks of the great lakes and on the great plains of the delta of the Ganges.

Finally Abbe Moreux noticed that the appearance of this phenomenon was generally simultaneous with reports of explosions of firedamp in mines.

The electrical action of the sun upon the surface of the earth, the abbe says, provokes movements favorable to the expansion of imprisoned gases wherever there are fissures in the crust. These gases, liberated from their prisons, explode and cause at the same time explosions of firedamp and earthquakes.

The abbe pointed out that earthquakes are always preceded by noises resembling distant detonations of artillery. Vibrating shocks originating in the interior of the crust of the earth may produce sonorous waves which are quite perceptible if the atmosphere is in repose.

Abbe Moreux says that meteorological conditions do not, as has been supposed, cause the phenomenon. They only favor its production.

FOG BOMBS HIDE ZEPPELINS.

New German Invention Prepared For Coming Attack on London.

"Nebelbomben"—fog bombs—are to be used by Zeppelins when the big attack on London takes place, according to a dispatch from Berlin. Workers in the German airship factories, who usually are so secretive, are as enthusiastic as schoolboys over successful experiments made with the new contrivance.

A witness of the experiments at Friedrichshafen says that in perfectly clear weather when the bomb is dropped from an airship it explodes at a calculated distance from the ground and with incredible rapidity sends out a fog which absolutely shuts out the Zeppelin from view. The fog spreads for many kilometers nearly instantaneously.

A Big Difference.

"I notice a great change in your little boy."

"As to how?"

"He used to dawdle and lag when you sent him in the morning to the store. Now he's off like the wind."

"He's a boy scout now, with a message to Rain-in-the-Face, the grocer."—Louisville Courier-Journal.

Going to Extremes.

A New York woman used an ax, an icepick and a butcher knife on her husband. Some women go to extremes when they set out to make an impression.—Detroit Free Press.

The Point of View.

The progress of the respective warring nations still depends on the point of view of the special correspondent or war office in the case.—Baltimore American.

Two Great Joys.

With strawberries and baseball both on the market, it must be a melancholy soul indeed that does not rejoice in the seasonal blessings.—Chicago News.

They Do Indeed.

Perhaps it would have been just as well if Senor Huerta hadn't admitted that he knew who killed Madero. People do gossip so!—Indianapolis News.

Mexican Strategy.

The most strategic thing a Mexican general can do is to capture a telegraph line that has an end in the United States.—St. Louis Globe Democrat.

Far Apart.

Mother—I hear that Harry Smith is the worst boy in school, and I want you to keep as far from him as possible. Tommy—I do, ma. He is always at the head of our class.—Boston Transcript.

Plaint of a Tommy

I'm lyin' 'ere in the 'orspital
  In a swanky great 'otel,
With painted ceilin's and gilded walls,
  And everythin' awful swell.
There's velvet curtains an' droopin' palms,
  But I'd give the bloomin' load
For 'alf an 'our in "The Golden Pig,"
  What's down in the Mile End road.

We're nourished like lords and fightin' cocks
  On chicken and soup and such,
And made up dishes with fancy names
  As I don't fancy much.
An' some of 'em brings us real champagne
  To moisten our fevered lips;
But I'd give the lot—and welcome too—
  For a plate of fish and chips.

I've got a duchess to wash me face
  And flutter around me bed,
To see as I gets me beauty sleep,
  And bandage me wounded 'ead.
But I'd change 'er any day to 'ear
  The girl as I used to court,
Sing out, as she slapped me on the back:
  "Why, 'Arry! Buck up, old sport!"
—London Opinion.

FOUR YEAR WAR FEAR OF BRITISH

Soldiers In Trenches Say Contest Will Be Long One.

NO HOPE OF QUICK FINISH.

While Not Disheartened by Slow Progress, They Declare That England Will Need Every Man In Country if Germany Is to Be Beaten, Correspondent Says.

It should be borne in mind, writes a correspondent at the front who has seen Kitchener's army, that the British did not begin building their war machine until about nine months ago. The German organization is the result of upward of half a century of unceasing thought, experiment and endeavor. What the British have accomplished in nine months is one of the marvels of military history.

The machine that they have knocked together, though still a trifle wabbly and somewhat creaky in its joints, is, I am convinced, eventually going to do the business. It struck me as having all, or nearly all, of the merits of the German organization, with the human element added.

You can't really appreciate what this British war machine is like or what it is accomplishing by reading about it. You have to see it for yourself.

For miles and miles roads are lined with huge English lorries, in their war coat of elephant gray, with converted London buses and with ambulances. So crowded are the highways behind the British front that at the street corners in the towns and at the crossroads in the country are posted military police, with scarlet flags, who control the traffic, just as do the policemen in Fifth avenue and Broadway.

No Devil-may-care Tommy.

The British soldier of this new army has none of the rollicking, devil-may-care recklessness of the traditional Tommy Atkins. He has not joined the army from any spirit of adventure or because he wanted to see the world. He is not an adventurer; he is a crusader.

In ninety-nine cases out of a hundred he has left a family, a comfortable home and a good job behind him. And, unlike the stay at homes in England, he doesn't make the mistake of underrating his enemy.

He knows that there is no truth in the reports that the enemy is weakening. He knows it, because hasn't he vainly thrown himself in successive waves against that unyielding wall of steel?

He knows that it is going to be a long war. Every British officer or soldier with whom I have talked—and I have talked with a great many of them—has said that he expects that the spring of 1916 will find them in virtually the same position that they hold now. They will gain ground in some places, of course, and lose ground in others. But a year or so, the men in the trenches believe, will see no radical alteration in the present western battle line.

Show Bulldog Tenacity.

Such is the opinion of the men who are doing the fighting. They are not talking much, they are not singing much, they are not boasting at all, but they have settled down to the herculean task that lies before them, with that same bulldog tenacity of purpose, that same grim determination which characterized the men who wore the blue and the gray in the darkest days of the civil war.

From what I have learned and the conversations I have had with generals and staff officers, and particularly with the fighting men themselves, I have come to the opinion—and it is not a hastily formed opinion either—that their belief is the war will unquestionably last two years; that it will not improbably last three, and it may last four.

If Germany is to be beaten the men now in the trenches think that every man in England between the ages of eighteen and forty-eight who is able to carry a rifle will have to take the field.

FINDS NEW TETANUS CURE.

Italian Surgeon's Discovery Expected to Be Useful In War.

Professor Negro of the University of Turin, Italy, has discovered a new method of curing tetanus by the use of electric currents, which in experiments on animals has given better results than have been obtained by the use of anti-tetanic serum.

In view of the ravages already caused by tetanus during this war Professor Negro's discovery is greatly interesting military surgeons and experts all over Europe.

PLEADS FOR GERMAN PETS.

A great wave of hero worship is surging over England. Picture dealers are selling war portraits by the thousand, and photographs of actresses are now a drug on the market.

At the same time so bitter is the feeling in England against everything German that a special appeal has been made against possible ill treatment of dachshunds, once popular [illegible].

SERMON THEMES

Tomorrow Ends the Easter Season in Catholic and Episcopal Churches

Tomorrow, eighth Sunday after Easter, will be Trinity Sunday in the historic churches.

The special features of the liturgical services in those churches will lay emphasis on the doctrine of God in Three Persons, and the sermons will dwell on that fact. The doctrine of the Holy Trinity is accepted by all the Christian sects except the Unitarian.

The number of Sundays between Trinity Sunday and the first Sunday in Advent, which is always the Sunday nearest St. Andrew's Day, November 30, varies from 22 to 27, according as Easter is early or late. This year there are 25 Sundays between Trinity and Advent.

In the Roman Catholic Church these Sundays are designated numerically, reckoning from Pentecost. June 6 will be the second Sunday after Pentecost; in the Episcopal Church, it will be the first Sunday after Trinity. Thus, for example, the 15th Sunday after Pentecost in the first named denomination will be called the 14th after Trinity in the latter.

Trinity Sunday in the Roman Catholic Church also marks the end of the Easter time, so-called, which begins the first Sunday in Lent, a period of fifteen weeks. During this time it is required of all professing members of that church who have reached the age of reason to receive the sacraments of Penance and Holy Communion. This is called the Easter duty. Failure to conform to this requirement without sufficient reason cuts the delinquent off from the suffrages of the church.

Pulpit and Pew

Zion Episcopal Church

Rev. Minor J. Peters, Rector

Sunday, May 30th, is Trinity Sunday in the church calendar. It is the last of the five great high feasts of the church year. Upon this festival the church especially commemorates the consummation of God's saving work, and sets forward with particular prominence the doctrine of the Holy Trinity.

All the services in Zion church will be appropriate to the occasion. The sermons at all the services will emphasize the thought for the day, and an especially elaborate musical programme has been arranged by the choir director. The choral eucharist as arranged by Tours will be intoned and sung at the high celebration of the Holy Communion at 10:45 a.m., and all the music will be appropriate to the day. Choral evensong will be sung at 7.30 p.m.

The services will be as follows:
Holy Communion........ 7:30 a.m.
Sunday School........... 9:30 a.m.
Holy Communion (choral)
and sermon ....10:45 a.m.
Choral Evensong and
Sermon .... 7:30 a.m.

Attention is especialy called to the change in the hour of the evensong service. Through the summer months and until further notice this service will be held at 7:30 p.m. instead of 5 o'clock as heretofore.

State St. M. E. Church

Rev. H. D. Holmes, Pastor

At the morning service the pastor will preach upon a theme pertinent to the present situation, "Our Country's Greatest Need." In the evening Mr. Holmes' subject will be "Strength a Necessity."

Bible school at noon and Epworth League at 6.30 p.m.

There will be no Junior League meeting in the afternoon on account of the Memorial Day parade.

First Baptist Church

Milton George Buck, Minister

Sunday services are as follows: Morning worship, 10:30; subject of sermon, "The Spirit Filled Life." Bible school 12 m. Christian Endeavor, 6:30 p.m.; subject, "Missions."

Evening worship 7:30, subject of sermon, "The Thing was Done Suddenly."

The ordinance of Baptism will be administered at the evening service and an after meeting will be held in the chapel.

You are invited to the "Church of Cordial Welcome" to worship, to comed, so if you are a stranger come with us and we will do you good.

The pastor is expecting to say something about the high school proposition as a prelude to the evening sermon.

First Methodist Episcopal Church

Sunday services as follows:

Morning worship with sermon at 10.30, "The Message of Jesus to the Individual."

Object sermon to juniors at 11 o'clock.

Sunday school at noon and Brotherhood at the same hour.

Junior League service at 3.30.

Class and prayer meeting at 6.30; Epworth League at the same hour.

Evening sermon, "Jacob's Ladder, or the Message of Celestial Messengers to people cut off from the Familiar and Dear, and Plunged into Strangeness.

Mrs. L. P. Smith and Mr. F. E. Goodjon will sing a duet at the morning service.

Congregational Church

Charles Olmstead, Pastor

Circle No. 2 held a reception Thursday afternoon at the home of Mrs. Melville Hargrave. A large number were in attendance.

On Thursday evening the pastor and his wife gave an account of their recent visit at the State Conference in Brooklyn and the Sunday tabernacle at Paterson, N. J.

The theme for the Sunday morning service tomorrow, will be "Empty Excuses." In the evening the subject will be a "A Glimpse Through the Gospel Glass."

The C. E. meeting at 6:30 promises to be of much interest.

Christian Science

35 E. First Street

Christian Science services held on Sunday at 10:45 a.m. and at 8 p.m. Wednesday, in the Van Wagenen block. Mrs. H. A. Allen, first reader; Mrs. Noah Merriam, second reader. You will be welcome and interested to attend one or both services.

The subject for next Sunday is: "Ancient and Modern Necromancy, Alias Mesmerism and Hypnotism, Denounced." Golden Text: Psalms 118: 6. Responsive Reading: Luke 13: 24-27, 29-35.

Presbyterian Church

Charles S. Robertson, Pastor

Morning prayer at 10 o'clock, led by Mr. A. Bristol.

Worship by families at 10:30, with sermon, theme, "What Principle Underlies the Present World-Wide Unrest."

Bible school at noon.

No vesper service on account of the Memorial day exercises.

The Free Methodist Church

C. C. Watson, Pastor

Sunday services as follows: Preaching by the pastor at 10:30, morning subject, "Self Preservation." Sunday school at 11:45. Young People's Meeting at 6:30. Evening subject, "The Pilgrim's Delight in God's Law." Prayer meeting Thursday evening.

... EXERCISES ... STREET SCHOOL

... was fittingly celebrated ... street school, yesterday ... the Third and Fourth Grades.

Before ... audience composed of the pupils of other grades, parents and friends, the following program was given in the assembly room:

Song ....The Violet
Welcome...............Nellie Barnard
The Red, White and Blue—Mary Morrison, Harriet Waugh, Frances Barkley.
Play—The Lost Purse,....4th Grade
Song......................The Shadow
Recitation..........Place for Boys
Barnett Levi
Recitation.....The Whispering Birch
Harriet Mitchell
Play................The Endless Tale
Fourth Grade
Songs—May Singing.
Exercise—Memorial Day...3d Grade
Recitation—Violet, Sweet Violet
Roberta Kellam
Tableau—Blue Beard.......4th Grade
Recitation.........The Flag Goes By
James Brannan
Play.........Jack and the Beanstalk
Third Grade
Song..................The Blacksmith
Recitation........The American Flag
Clara Owens

Fourth Grade
Song .... America
Salute to the Flag.

After the exercises were over, parents and friends were invited to the Third and Fourth Grade rooms to inspect an exhibit of the work of the pupils, in drawing, writing, English, arithmetic and spelling. Many words of praise were given for the excellent work done by the pupils this term.

PARCEL POST TO ITALY IS DISCONTINUED

Postmaster Conley is in receipt of a department bulletin announcing that no parcel post shipments can be made to Italy. The bulletin states that the postal department of Italy, having informed the department that parcel post service between Italy and the United States is temporarily suspended, "postmasters must decline to receive parcel post packages for mailing to Italy until further advised."

Such packages as may have been mailed inadvertently will be returned and postage refunded, provided application is made under section 641 of the postal laws and regulations.

THE PHOTOPLAYS

The Quirk today offers a six-reel story of unexpressible interest, "The Red Club." It contains many thrhilling scenes that hold the spectator spellbound. An interesting story is interwoven that adds sentimentality to its action and all ends well. There is also a two-reel Essanay showing that funniest of all odd comedians, Charles Chaplin, in the one big scream, "The Tramp," a big eight reel show. Matinee 5, night, balcony 5c and main floor, 10c.

MRS. SHAVER'S PUPILS TO GIVE A RECITAL

The vocal students of Mrs. Georgetta Foster Shaver will give a recital in the State Street M. E. church, Friday evening, June 18. They will be sisted by John Shaver, basso. An excellent program is being prepared.

This concert is under the auspices of the Royal Guards of State Street church.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

WANTS TO ORGANIZE ONION GROWERS HERE

C. E. Wharton of Kenton, O., general organizer for the Onion Growers' Information Bureau, is in the city to organize a branch club at this point. The object of the organization is to maintain reasonable prices and orderly shipments. A similar organization is conducted successfully in the Texas field. Another feature will be the selling of onions under the brand of the united farmers.

ONION GROWERS' CLUB FORMED IN FULTON

Oscar Day has been selected as temporary secretary of the Fulton Onion Growers' Club and he, together with E. Dryer, will attend a district convention of the growers next Monday evening, May 31st, in Canastota.

This organization will publish Common Sense, their official organ. This will be the first onion paper in the United States.

THE ODD FELLOWS REQUESTED TO MEET

Members of the local lodge I. O. O. F. are requested to meet at the temple Sunday at 2 p.m. to join in the union Memorial parade, and that each wear badge and white gloves.

Edited by Women of Fulton Union

Monday, July 5th, will be celebrated in Fultonw ith a great temperance parade, participated in by delegates to the convention of the Young People's branch of the Woman's Christian Temperance Union, members of the union, members of churches and Sunday schools of the city, and others. An announcement to this effect was issued yesterday from the pulpits of the city, and a great interest is being taken in the preparations. The event will be but one in connection with the great convention of the Youg People's branch, which is to be held here from July 2d to July 6th.

It is intended to have 1,000 people in line and it is believed the procession will be the greatest temperance demonstration ever held in Oswego county. Several bands will be secured to furnish music. Banners and signs will be carried by the marchers. A Mrs. Blaine of Washington, D. C., a woman, who has conducted some mammoth temperance demonstrations over the country, will come here soon to prepare for the one in Fulton.

Committees appointed by the Fulton branch of the Woman's Christian Temperance Union are working hard on plans for the big convention. The peanut sale which is being conducted to pay expenses of the entertainment of the young people during their stay here is a success. It will continue this week. Friday afternoon plans for the convention will be discussed at a meeting the organization will hold at the residence of Mrs. Howard Morin in Oneida st.

Many famous speakers will appear on the convention program. Mrs. Ella Boole of New York, State president of the Woman's Christian Temperance Union, and national vice-president of the organization, is one of the speakers. Daniel Poling, the noted prohibition orator of Ohio, will also speak. Mason Stratton of Cortland, president of the young people's society, will preside at sessions of the conventions.

During the convention two big contests are to be held, a diamond medal speaking contest and a gold medal vocal contest. Only those who have won a gold medal at previous contests will be iligible to speak at the diamond medal contest. Those who have won a silver medal will be eligible to compete in the vocal contest.

It is planned to hold a big picnic for the delegates on the last day of the convention. The event will probably take place at Pathfinder island. During their stay here the delegates will be given au automobile ride over the city. On Sunday afternoon of the convention a big mass meeting will be held in the Quirk theater.

The First Methodist Episcopal church has been selected as the convention church. Lunch and dinner will be served in the various churches.

PATRONS OF INDUSTRY TO MEET IN PULASKI

The semi-annual county convention of the Patrons of Industry will be held in Pulaski Thursday, June 10, at 10.30 a.m.

Orrin J. Russell, president, and Florence N. Potts, secretary, are desirous of having Patrons from all over this and neighboring counties attend the sessions which will be concluded at the end of the day.

STATE ST. COURIERS GIVE A MUSICAL

The Couriers of the State Street church gave an exceptional literary and musical entertainment last night at the church parlors. Harp, 'cello and vocal selections on the program were well received. The program follows:

Orchestra; Parting and In a Rose Garden, Marietta Flint Dolbear; reading, Skiddo Auto, Fred L. Dolbear; solo, The Pink Rose, Thelma Bogardus, accompanied by Osia Rumsey; farce, Potato Pudding, Cook Mudlaw, Mrs. Crowell; Colonel Philemon, Mr. Crowell; Mrs. Philemon, Mrs. G. Greene; Mrs. Darling, Mrs. George Flint; orchestra; reading, The Lost Word, Fred L. Dolbear; solo Blossom Time, Miss Ruth Wells; solo, Bright Star of Love, Marietta Flint Dolbear; 'cello obligato, L. A. Richardson; reading, Uncle Daniel's Appartion, Fred L. Dolbear; orchestra.

AUTOMOBILE PARTY HAD SCARE LAST NIGHT

An automobile containing a party from Oswego and a street car bound east, collided last night at the corner of Broadway and West 1st sts. Aside from a shaking up, the occupants of the auto escaped uninjured.

The street car was crossing West 1st st., when the automobile struck the rear end at right angles, disabling the steering gear, and damaging the mud guard. Several people who saw the accident were of the opinion that the driver was a novice and that the collision could have been avoided.

The auto was taken to the garage and after repairs were completed proceeded towards Oswego.

7 FIRST STREET

WAS $75,000

This Sum Included Mileage and Entertainment--Evangelistic Fervor Aroused

Rochester, May 29.—Routine business occupied the commissioners to the 127th General Assembly of the Presbyterian Church in the United States of America during its closing hours yesterday afternoon in Central church. Dr. . Ross Stevenson, the moderator, officially dissolved the assembly at 4:20 o'clock after saying that t he commissioners constituted one of the most earnest, faithful and determined bodies ever convened for the transaction of the business of the Presbyterian Church.

The assembly just closed was bequeathed a vast amount of uncompleted work from previous assemblies, and this, except for some minor matters, was finished. In dissolving the assembly, Dr. Stevenson said that the great questions considered could not but have left a deep impression on those commissioners whose hearts were not closed to the message of evangelism.

The afternoon was opened with prayer by Dr. William B. Noble, the permanent clerk of the assembly. The Mileage Committee reported that 858 commissioners were enrolled, and that only three presbyteries were without representation: The cost of the assembly in the matter of mileage and entertainment was $74,680. A resolution that was adopted instructed the Executive Commission to make a study of means whereby all assembly expenses might be refused.

Dr. Mark A. Matthews, of Seattle, Wash., proposed a resolution for the creation of a committee to codify the laws of the church. Dr. Roberts said that such a committee would conflict with the Committee on Digest, and Dr. Matthews, after asking what was the use of a Committee on Digest if it did nothing, consented to amend his resolution so that the work would be done by that committee.

The following were elected members of the Board of Church Erection, for three-year terms: Rev. William Russell Bennett, Dr. John F. Carson, Dr. George W. King, Dr. Robert B. A. McBride, Dr. E. Van Dyke Wight, Charles Glatz, Albert S. Ritchie and William H. Parsons.

Synodical records were reported in good order by the committee having the matter in charge. The synods of Baltimore, St. Louis and Utah noted minor exceptions in the reports submitted by them.

Suspended Minister's Case

There was a long discussion at the morning session over the report of the Judicial Commission on the case of Rev. Percival H. Barker against the Presbyterian of Neosha, Kan. Mr Barker was suspended from the ministry in January, 1913, and his case has been before the church authorities since that time. It was the decision of the assembly that it be sent back to Neosha Presbytery, for the completion of the trial of Mr. Barker. Representatives of Neosha Presbytery stated on Thursday night that Mr. Barker and his counsel, former Congressman William S. Bennet, of New York, "walked out" of the former trial when it was half completed.

ASSOCIATION

It Is 83d Anniversary of Organization, to be Held at Colosse

The Rev. M. G. Buck of this city is mentioned as one of the speakers who will address the Oswego Baptist Association, to be held Tuesday and Wednesday, June 1 and 2, at Colosse. Hhis subject will be "The Purpose of a Young People's Society," and he will besides act as director of music.

The Aassociation attracts more than usual interest from the fact that the organization of Baptists at Colosse is 100 years old. The society was organized in 1815. The Rev. J. P. Greene is the present pastor of the church. In celebration of the historical event the people of Colosse will serve a "centenial banquet" Tuesday afternoon at 5 o'clock.

Rev. L. L. McClain will be Moderator of the Association and the program will be as follows.

Tuesday morning, 11:15—Opening Song Service; Devotional; Concerning the Program, President of the Sunday School Association; Appointment of Nominating Committee; Reports from Schools; Report of Nominating Committee and Election of Officers; Offering.

12:15-12:30—Rev. W. B. Matteson, D.D., In Behalf of Baptist Ministers Home Society.

1:45—Hymn; Prayer.

2:00-2:30—Address, "The Sunday School and the Home," Rev. Henry Clay Poland, Fayetteville, N. Y.

2.30-2:00—Devotional Hour, Dr. C. S. Savage.

3:00-4:00—"Our Associated Efficiency;" The Report of the Associational Directors; Discussion.

4:00-4.30—Address, Ministerial Education, Rev. J. R. Henderson, Rochester, N. Y.

4.30—Pastor's Conference, Rev. N. E. Miller, Central Square, N. Y., Leader.

4:30—Women's Baptist Home Mission Union, Miss Foote, President.

Call to Order

Report of Secretary-Treasurer

Business

Adjournment.

Tuesday Evening—Women's Session. 7:15—Song Service, Conducted by Rev. M. G. Buck; Scripture Reading and Prayer; Address, "City Mission Work Among the Italians, Miss Mabel Hall, Buffalo.

8:30—Oswego County Young People's Association. Mr. Ezra G. Williams, Vice-President, in charge; Appointment of Nominating Committee; Report of Secretary and Treasurer, Mrs. H. E. Bosworth, Sandy Creek; Address, "The Purpose of a Young People's Society," Rev. M. G. Buck, Fulton; Report of Nominating Committee.

Wednesday Morning—

9:00—Women's Baptist Foreign Mission Union.

10.15—Oswego Baptist Association; Reading of Rules of Order; Appointment of Committees; Welcome to New Pastors; Historical Sketch and Message to the Association of Colosse Baptist Church.

LA PORTE'S GROCERY

Oneida St. Hello 75

The "Hello" Microbes.

Many a woman housed by a cold amuses herself and attends to necessary business over the telephone. But when all the rest of the family come down with like colds she wonders how they caught it, because she has "not kissed anybody."

Nobody thinks of the mouthpiece of the telephone, and yet where is there a more convenient harbor than that for germs breathed into it from throat and nose?

The average household does not even think of dusting out the transmitter, and it is cleaned only upon the occasional visits of the repair man from the telephone company. As a matter of fact, it should be washed out frequently with a disinfectant. Even the ear piece is benefited by an occasional "wipe," as it rests against the hair and ear of everybody in the house, to say nothing of visiting workmen who want to call up headquarters.

When You Clean Up.

[illegible] that are too worn for further use and lay them in the bottom of the drawers, with lavender between the folds.

While the clothes on the line are airing, pack flannels, furs, feathers, etc., in mothproof paper bags or boxes to be stored away in the attic, and before the dew falls at night return cotton and other fabrics required for summer use to the drawers and wardrobes that have been cleansed and aired.

Destroy with a hard heart every useless thing and burn everything that you see no probability of needing in the near future. With the best of care odds and ends will accumulate, and the labor of handling and preserving them in the hope of finding use for them by and by is often more than they are worth.

Zinc Ointment For Red Nose.

A red nose is often constitutional, or the sign of indigestion, but more often than not it is caused by a too thin skin. When the latter is the cause zinc ointment is a splendid remedy. You should apply it to the nose every night. You will find it does wonders in hardening the skin, and in this way the tendency to redness will gradually disappear.

TOOTHBRUSH DAY TO-DAY

School Children Celebrated First Week's Battle Against Germs

New York, May 29.—Today was Toothbrush Field Day. The elementary school children of the five boroughs will be represented by champion wielders of the brush who have distingushed themselves in the week's advance into the territory of the deadly germ. Armed with their brushes, these knights gathered in Central Park, in Prospect and in Van Cortland Park and, to the accompaniment of martial music, charged on the enemy enthusiastically.

Many dental supply companies sent free samples of tooth paste and powder to the schools for distribution to the children. One company donated more than a hundreds charts for schoolroom use, showing in diagram the location of all the teeth and how best to reach them with a brush.

Dr. C. Ward Crampton, director of educational hygiene of the Board of Education, and Dr. I. H. Goldberger, his assistant, both expressed themselves as much pleased with the results of the week's campaign.

"It was brought home to me," yesterday said Dr. Crampton, "when my own small son marched off to school with his brush sticking out of his pocket, dripping with water from his morning's work with it. I have learned during the week that many parents have bought brushes for their children who had never taken that much trouble with themselves.

"I also think the Board of Health is to be congratulated on its splendid work along this line, not only in cooperation with us in this campaign, but with its regular work in the free dental clinics."

Dr. Goldberger said the children who have been selected for participation in today's activities are as eager about it as if it were the usual athletic meet.

"It seems as if we actually have accomplished our purpose, which has been to make the child himself see the importance of taking care of his health."

PATROLMAN SWEET MAY STRADDLE THE CYCLE

There is something in the popularity of a man, especially one of this city's "finest," that reacts in favor of speed fiends. Ever since Patrolman Brown was given the job of running down violators of traffic rules he has endeavored to make an arrest, but the wiley fiends manage to see him first, hence the officer's ill luck in corralling a speeder.

Officer Fred Sweet has a hankering after the job, as he believes that comparatively few auto rushers know him, and he wants to do something to aid the city's somewhat depleted treasury.

FIVE MEXICANS RESPITED

Florence, Ariz., May 29.—Five Mexicans, two of whom slew American peace officers, and all of whom had been sentenced to be hanged for murder between 11 a.m. and 4 p.m. today, were given a respite at almost the last minute by the Board of Pardons.

With every legal obstacles to their hanging set aside, the board granted a nine weeks' respite in order that the men might be hanged singly instead of together, and so recommended to Governor Hunt, who had opposed inflicting the death penalty.

MARRIAGE LICENSE ISSUED

Last Saturday night Miss Evlyn Morley, niece of F. W. George of 31 S. 2d st., resigned from her employment at O'Briens, telling her fellow employes that she—well, she didn't have definite plans for the future, etc. Today, Ralph Wilcox, another employe at O'Brien's had duties outside, necessitating leave of absence. The result—Mr. Wilcox and Miss Morley visited the City Hall this morning and are now in possession of a license to wed.

Mrs. George, aunt of the coming bride, says the marriage will not occur immediately, that the couple will leave for Kingston, Canada, the home of Miss Morley, where the ceremony will occur. Mr. Wilcox will engage in business at Jordan, N. Y.

BOY SCOUTS TOOK HIKE YESTERDAY

Troop 2 of the local Boy Scouts accompanied by Scoutmaster Rice took an overnight hike to Reynolds woods on the West River road. Fourteen boys left the city yesterday at 4:30 p.m. and returned about 9 a.m.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

SPECIAL CARS FOR HOLIDAY EXCURSIONS

The Elks have requested all members of the order to be present at the home, tomorrow, May 30th, at 1.30 p.m., to participate in the Memorial day serices of Post Schenck, G.A.R., when the lodge members will march to the cemeteries with the Odd Fellows, Woodmen and other orders of the city. Before starting the Elk members will be photographed on the new porch.

The Empire United Railway will have a special service, attaching trailers to all cars, to accommodate those who will spend the day at Long Branch and Oswego Beach.

STORES TO CLOSE

The Retail Trade Division of the Chamber of Commerce announces that on Monday the stores will close at noon.

Old Sol today beamed forth his approval upon the Memorial day preparations and indications point to an ideal holiday.

MONTCALM PARK GETS $250 FROM STATE

Governor Whitman before leaving Albany on his western trip, signed the bill appropriating $250 toward the maintenance of Montcalm Park during the present year. It is the intention of Fort Oswego Chapter, D.A.R., to have the park plowed up very shortly and sowed to buckwheat, after which it will be sowed to lawn grass.

Fulton Keynotes

The VanWagenen, Inc., has sold to F. W. Richardson a new Overland touring car.

* * *

Rev. and Mrs. C. C. Watson have been entertaining at the Free Methodist church parsonage, the Rev. W. H. Clarke of Rome.

* * *

The Elks are happy over the fine American flag which was presented to the lodge Thursday by James E. Burt of Hannibal.

* * *

Don't forget that all city banks will remain closed the entire day, Monday.

* * *

The engagement has been announced in Hannibal of Miss Hazel Wilson, daughter of Mr. and Mrs. James Wilso, to Howard Newman Farnham.

* * *

Winifred Perry of Syracuse is the guest of his parents, Mr. and Mrs. W. E. Perry, Worth st.

* * *

Mrs. W. Bennett of Oswego has been visiting Fulton relatives for a few days.

* * *

Miss Hayes of Syracuse has been spending a short time at the home of Miss Kittie Collins.

* * *

Lee Sheldon and family have been recent guests of ouft-of-town friends.

* * *

Mrs. J. Murphy of Hannibal st. has been called to Oswego by the illness of her mother.

* * *

Mr. and Mrs. H. A. Zuck of Buffalo st. are visiting in Batavia.

* * *

Mrs. Gordon of Hannibal st. has returned from a trip to New York city.

* * *

Mrs. Anna Harvie of Fay st. has been a guest of Syracuse friends.

* * *

Mrs. Robert Ottman entertained at her home in S. 5th st., Thursday night in honor of the Misses Merrell Wells and Eva Morley, who are to be June brides.

* * *

Samnel Wright and family have taken up their residence in East Broadway.

* * *

Mr. and Mrs. Ernest Raymond are guests of Rochester friends.

* * *

G. Harrison of Syracuse, accompanied by his family, motored to Fulton during the past week and visited a number of his friends here.

* * *

Mrs. M. Katz is the guest of her sister, Mrs. D. L. Lipsky.

* * *

E. A. LaPorte is spending a short vacation at Plainfield, New Jersey.

* * *

The Boy Scouts will join the Memorial parade tomorrow afternoon.

* * *

Miss Lena Kaplan left yesterday to spend a few days with Syracuse friends.

"A HERALD OF PROGRESS"

A SOLDIER'S DOUBLE

By M. QUAD

Copyright, 1915, by the McClure Newspaper Syndicate.

About thirty days before Grant broke through Lee's lines at Petersburg and the beginning of the end came a portion of my regiment captured seven Confederates and brought them into camp. My own company was a part of the Federal force, but as I was on detached duty that week I was not with them. The first I knew of the capture was when I heard the story that I had deserted to the Confederates, had been recaptured and would be shot. I visited company headquarters to ascertain what the talk meant and there met with a strange reception. I was there, wearing a blue uniform, and yet I was in the guardhouse half a mile away wearing the butternut. I had been on duty at division headquarters, and yet I had been captured on the advance lines. I was at once placed under arrest, and it was an hour or more before the mystery was solved. Then it was found that one of the Confederate prisoners was my double and that his name was Wakefield.

I had not yet recovered from my surprise when the suggestion was made that I go into the Confederate camp as a spy on the strength of the wonderful resemblance. I was given three days in which to pump Wakefield. He was a ready talker and had a good memory. When I was quite ready I took his suit of clothes complete and he was given another. Then I was taken down to the front and made a bolt for it. In other words, one of the Confederate prisoners escaped and dashed across the space which separated the opposing lines. Not half a dozen men were let into the secret, and as I ran I was fired upon by half a regiment.

I ran at full speed straight for the Confederate lines, and on dashing over a breastwork I found myself in the midst of a Louisiana brigade of infantry. A colonel questioned me as to my name, regiment, when captured, etc., and I answered so promptly that I supposed everything all right. It wasn't, however. Federal spies had played the game before, and Confederate wit had become sharpened. I was sent to the headquarters of General Mahone, who was subsequently celebrated in Virginia and national politics. He asked me the same questions which the colonel had put to me and many others in addition. I saw that he was suspicious, and, braving all at one stroke, I requested that my captain be sent for. The Alabama regiment to which I was supposed to belong was stationed two miles away, and it was about 9 o'clock before the captain arrived. Previous to his appearance I had been asked his name, which I gave correctly, and had also described his person. When he reached headquarters I was sent for, and as I stood before him and two or three headquarters officers General Mahone asked:

"Captain Thorn, this man claims to belong to your company. Is he a member or not?"

"Yes, sir," was the prompt reply.

"What's his name?"

"John Wakefield, sir."

"When was he captured?"

"Four days ago along with several other men."

That settled it. There were about forty men in Company D. They all gathered around me as I appeared and gave me a welcome. My orders were to ascertain Lee's strength on a line about four miles long. How I was to accomplish this after entering the Confederate lines was left for me to decide. Wakefield told me that he had a cousin in the Seventh Virginia, a young soldier named John Winslow. I got permission of my captain to visit him, and in hunting up the Seventh Virginia I took care to miss it and cover the whole front and have a look at guns and fortifications. I found Winslow at last, but his greeting was far from cordial. The two had evidently quarreled about something on which I was not posted. He was so sulky and unfriendly that I was about to cut my visit short when he gave me a searching look and exclaimed:

"Why, you are not John Wakefield at all!"

I laughed at him in a good natured way, hoped I would find him in better humor when I called again and started for my regiment, but I had not gone a quarter of a mile when I was overtaken and put under arrest and an hour later was once more in the presence of General Mahone. I was followed to his tent by Winslow, who boldly proclaimed that I was not John Wakefield. Then all the officers and half a dozen men of the company, including my tentmate, were sent for, and the general heartily entered upon the work of trapping me.

I had pumped John Wakefield so thoroughly, and so plainly remembered everything, that I believe I passed the examination fully as well as or better than he could.

My two arraignments before General Mahone made me an object of curiosity and gossip in my company, and when I returned it was to find all the men anxious to quiz me and two or three of them seemingly suspicious. The captain called me into his tent and questioned and cross questioned me until he declared that nobody but a fool could have taken me for any one else. I put the men off by pretending to be angry, and three nights later, as we held a breastwork at the front, I slipped away in the darkness and re-entered the Federal lines.

Scrap Book

Stage Humor.

There is a form of stage humor which has always been popular in America and perhaps is an expression of a national trait. It consists of the joke which is made by the actor on the stage, half as a part of the play, half out of the play, as a sort of side remark to the audience, as it were, burlesquing the play. It is a favorite form of humor with certain vaudeville comedians, who usually abuse it. It was a favorite form with the old Weber & Fields company, who could use it to perfection. Once the late Peter Dailey in a Weber & Fields play came out on the stage from the wings, pursued by the applause supposedly of a group of [illegible] to whom he had been making a speech. He jerked his thumb toward the invisible applauders, smiled at the audience and remarked, "Jolly dogs, these stage hands!"

Again, De Wolf Hopper started to make a certain speech after the first performance of [illegible] and hesitated [illegible].

"What's [illegible]

"You did it all right this afternoon."

An audience which had howled with laughter all the evening broke out anew at this personal sally.—American Magazine.

Change the Subject.

When the troubles of life assail you
And the morrow looks bitter and drear;
When no prayers and no hope avail you,
A path that is better and clear—
Change the subject and take up another.
You'll find this was the best.
Count your fellow man as a brother
And lay the old trouble to rest.

No trials of life were e'er mended
By worry and fret and care.
New thoughts and new hopes have befriended
A man in the depths of despair.
Change the subject and barter your sorrow
For a task that is newer and bright,
And the dawn of the sun on the morrow
Will clear the dark shadows of night.

No life was e'er free from despairing;
There are worries assailing us all,
But the pains that are smarting and tearing
The heart will grow lesser and small.
When the subject is changed for another
You'll find this way is the best.
Count your fellow man as a brother
And lay the old trouble to rest.
—Horace Seymour Keller.

A Real Difficulty.

They met on the highroad and shook hands.

"Shure, Pat," said Murphy, "bettin's a shockin' bad habit."

"Shure, Murphy," said Pat. "But why?"

"Ye know Costigan?"

"Troth I do!"

"Well," said Murphy, "he bet me a sixpence to a shilling that I couldn't swallow an egg without breakin' the shell ov it."

"And did ye lose the bet?" asked Pat.

"No, Pat, I won it," replied Murphy.

"Then phwat's ailin' ye?"

"Shure, it's the egg that's ailin' me," groaned Murphy. "If I jump about I'll break it and cut me stomach wid the shell, an' if I kape quiet it'll hatch an' I'll have a Shanghai rooster scratchin' me inside!"—Pearson's.

Accumulated Something.

General William Marshall, retired, of the United States army, is one of the social lions of Washington. The general weighs something over 300 pounds net. One day he was dining with President Roosevelt.

"General," said the president, "I am glad to see you looking well. You can never get any sympathy on account of your health. You seem to have accumulated flesh very rapidly these last few years."

"Mr. President," said the stout old soldier, "for mercy's sake don't begrudge me this flesh. I have been in the army for thirty-two years, and this is the only thing that I have ever accumulated since my enlistment."—New York American.

The Basis of a S[illegible]king.

"Wully," said Mrs. [illegible]igh to her little son as they e[illegible] from the station at Saltham-[illegible]-Sea; "noo that we are at the [illegible] mind and ca' yer faither 'papa' when he comes doon for the week end. Ye'll no forget, wull ye?"

Wully, nearing the big sea, felt graciously inclined to promise anything and told his mother he wouldn't forget.

On the Saturday morning Mrs. MacHigh was sitting on the sands beside some "swell" seaside acquaintances watching the children playing. Thinking to impress her neighbor, she called out in her best society voice, "Weelie, your papa is coming doon the day."

"Oh, is he?" answered Weelie, busily engaged at a sand castle and quite forgetful of Monday's promise. "An' wull my faither be wi' 'im?"—Dundee Advertiser.

A Ruler of Rulers.

For several years, as readers of the sporting pages know, the domestic affairs of the Philadelphia National league club have been subject to frequent changes of administration.

During the December meeting of the big league magnates in New York, Sherwood Magee, the star outfielder for the Phillies and one of the wags of baseball, dropped in to look things over.

Somebody spoke of the possibility of a new alignment of the directorate in Philadelphia.

"I shouldn't be a bit surprised," said Magee; "in the years I've played on that team I've had no less than nine presidents under me!"—Saturday Evening Post.

MYSTERY SOLVED BY WOMAN'S WIT

How an Innocent Man Was Saved From Gallows.

Many years ago Edward Bixby left a loving wife and their little ones to seek his fortune in the west. Bixby became a prospector in Colorado and bought a claim which he worked with a man of the name of Clark. One day Clark took Bixby to a little pocket of rocks near the mine, and showed him where he had placed some articles he did not care to keep on his person. There were some money, a revolver, a gold pencil case, a bunch of keys and a picture of a woman.

"I want you to know where these things are in case anything happens to me," Clark said, and, having covered the pocket with a brush, the rocks were no sign of the concealed articles.

Some time after this Clark was taken ill and, having no relative to leave any property to, made a will leaving his interest in their claim to Bixby, though there was then no great apparent value in the hole they were sinking. Clark recovered, but the will was not destroyed.

One day Bixby left the claim for a day to buy provisions, and when he came back he found that Clark had been murdered during his absence. There was no trace of the murderer, and Bixby was much puzzled as to who had done the deed. Bixby went on digging and finally struck very valuable ore. Then he filed Clark's will.

He had been suspected of Clark's murder, and now that it appeared he had a motive he was arrested. He could not prove that the murder was committed during his absence, and no one else was known to have an interest in Clark's death. Persons who had sold him and Clark the claim they had worked when it was thought to be of little value, hoping that if Bixby was hanged they might get it back, manufactured evidence against him, and he was convicted. The usual efforts were made by his lawyers to save his life, but they were all failures, and finally they told him he must prepare for death.

It was only a few days before the execution was to take place that a young man, an effeminate, apparently half witted fellow, entered a saloon at the county seat where Bixby had been tried and was to be executed. Going to the bar, he called for a drink and in payment offered a revolver. The barkeeper while examining it noticed scratched upon the handle "Jarvis Clark," the name of the man who had been murdered. The barkeeper took the revolver in payment for the drink and immediately sent it to the authorities. The young man who had offered it was arrested, and on his person was found two of the other articles Clark had buried, the gold pencil case and the picture of a woman.

The man could give no account of himself, and since Clark had shown the picture to several persons they were enabled to identify it as his property. Bixby was released and the young man was put on trial for the murder of Clark.

Bixby's lawyers advised him to spare no pains to convict the accused, thus vindicating himself; but Bixby declared that his misfortune had shattered his nerves and he would go east to be nursed back to health by his wife. The prosecuting attorney had objected to his being permitted to depart. Bixby, however, got away before any legal move could be made to detain him.

He had had plenty of time to reach a safe distance when the young man who was about to be tried sent for the prosecuting attorney. When that official appeared the prisoner said to him:

"I'm not a man. I'm a woman and the wife of the man you hoped to hang. My husband wrote me where Clark had concealed certain articles. I came here, found them and produced the revolver for the purpose which has been achieved. I had arranged it all with my husband."

The astonished official ordered the prisoner to be examined by a woman, who found her claim to be true.

"And now," said Mrs. Bixby, "I believe the picture of the woman Clark hid with the other articles to have something to do with the murder. Release me, and I will endeavor to find out."

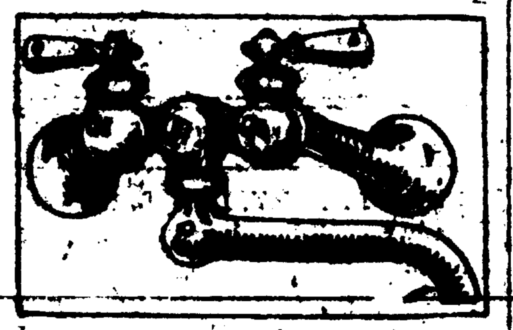
Mrs. Bixby was released and set about the task she had assigned herself. It was not long before she discovered the picture to be that of a woman who had left her husband for Clark. The erring woman's husband was arrested for the murder, but he was not brought to trial. The sympathy of the people was in favor of one who had simply avenged a wrong in a way that they considered legitimate. The prisoner confessed that he had long looked for Clark and when he found him gave him a fair chance for his life. But, fearing arrest on charge of murder, he had fled as far as possible from the scene of his revenge.

There was a great deal of sympathy for Bixby, who had come so near being hanged for a murder he had not committed and a great deal of admiration for the woman who had saved him. He remained in hiding till his wife had uncovered the real facts of the tragedy; then, on an invitation from the people of the region, he returned, took up the work on his mine where he had left it and became rich.

The outcome of the case had a salutary effect on judicial procedure in the community, the accused being given opportunity to prove innocence.

HELPFUL HINTS FOR HOUSEWIVES

Combination Water Faucet With Swinging Spout.



Intended to be used over a kitchen sink, a combination water faucet has been designed with a long, swinging spout which may readily be moved from one side to another as desired. In addition to this feature, it has the convenient property characteristic of all similar fixtures of joining the hot and cold water pipes so that the water may be mixed to any specific temperature as it is drawn. The combined functions make the appliance a very convenient one for kitchen use.

Chocolate Rice Pudding.

One quart of milk, half a teaspoonful of salt, a fourth of a cupful of rice, one tablespoonful of butter, a third of a cupful of sugar, one tablespoonful and a half of cocoa, half a teaspoonful of vanilla, and two egg whites and two tablespoonfuls of powdered sugar for the meringue.

Mix the rice, salt, sugar, milk and butter in a wide pudding dish. Add the vanilla and cocoa dissolved in a little hot water and bake in a slow oven till the rice is soft, stirring occasionally. Make a meringue of the egg whites and powdered sugar and bake twelve minutes longer in a slow oven. Serve warm with cream. — Country Gentleman.

Lemon Cream Pie.

Mix one cupful of sugar with three tablespoonfuls of flour; then add three tablespoonfuls of lemon juice, the yolks of two eggs, slightly beaten, one cupful of sweet milk, one tablespoonful of melted butter, a little salt and the stiffly beaten whites of two eggs. Bake in one crust in a moderate oven. The white of the egg rises to the top, making a little "self frosting" which adds to the dainty appearance of the pie.

Apple Cream Pie.

Stew good tart apples, rub through a sieve or press through a fruit press. While warm add one large tablespoonful of butter. Beat together the yolks of two eggs, one-half cupful of sugar and the juice of one lemon. Then add the stiffly beaten whites of the eggs and mix all with the apples. Line a pie tin with a good pastry, pour into it the mixture and bake until done. When cold cover with whipped cream.

Fairy Gingercakes.

One cupful of molasses, one-half cupful of sugar, one heaping tablespoonful lard, one egg, one cupful sour milk with one teaspoonful soda stirred in until it begins to foam over top of cup, one teaspoonful ginger. About a pint of sifted flour, making a rather thin light dough. It will be light like a sponge if not mixed too stiff. Can omit ginger and use spices and raisins if desired.

Pineapple Salad.

Make a dressing of one-half cupful of pineapple juice, juice of one-half a lemon, yolks of two eggs and one-half teaspoonful cornstarch. Cook to a thick custard, and add a little cream before serving. Put two slices of pineapple on lettuce leaves and cover with dressing, then put a little grated cheese and chopped walnuts on top.

Removing Grease Spots.

A grease spot on the carpet may be removed easily if one will act quickly. First scrape off all that can be removed with a knife, then give the spot a thorough coating of cornmeal, rub in well and as this is brushed out it will carry the grease with it. If any of the grease remains, lay a blotting paper over the spot and press with a warm iron.

Paraffining Jelly.

In using paraffin to cover jelly, if one will put a lump of the wax in the glass before pouring in the juice, it melts and rises to the top, doing away with the trouble of melting wax and putting on after jelly is cool. A piece the size of a filbert is enough for an ordinary jelly glass.

Varnish Stains on White Goods.

Varnish stains will be easily removed from white goods by moistening the stain with ammonia. Then put on a few drops of turpentine and roll it up. Leave it rolled for about fifteen minutes, then wash out with soapy water, rinse thoroughly and dry in the sun.

To Clean Suede Shoes.

Put the shoes on shoetrees, but if you do not possess these, stuff the shoes with soft paper. Then rub well with a rag moistened with spirits of turpentine. When this is finished place the shoes in the air to dry and no smell of turpentine will remain.

Ham Balls.

One cupful of boiled potato, one onion and one cupful of ham, chopped. Season with salt and pepper, add a well beaten egg and a little milk. Form into small balls, roll in meal and fry in hot, deep fat. Serve on buttered toast.

Worcester (Mass.) Scientist Declares Unhappy Marriages Need Not Exist.

Boston.—Incompatibility in marriage is soon to be a thing of the past, according to Dr. Max Baff, the Worcester scientist and former fellow in psychology at Clark university, who announces that he has discovered how to measure temperament.

With nothing more than a tape measure, he says, it is possible to find one's affinity and be positively sure that one is marrying the right man or woman.

Dr. Baff has had under observation Massachusetts' best known bachelor, Governor David I. Walsh. He recently announced the kind of a wife the governor should find in order to be assured of perfect happiness. Here are the specifications, the result of scientific observance:

She must be from five feet three inches to five feet six inches tall.

She must weigh from 141 to 146 pounds.

She must be tactful.

She must be cheerful at all times, especially before breakfast.

She must be sympathetic.

She must be ambitious.

She must be able to sing.

It is essential that she have a mezzo-soprano voice.

An Artist's Impromptu Solo.

Pierre Garat, the singer and exquisite of Napoleonic France, was not merely a glass of fashion and a wonderful, self instructed singer, but an artist devoted to his art. "But is the following," asks Bernard Miall in his biography, "an example of sincerity in art or of love of attracting attention?"

Coupigny had supplied him with a "romance" to be set to music. Whenever the two met Garat replied, "I have not hit upon an idea as yet." One day Coupigny was walking down the Rue Neuve des Petits Champs. Hearing a sound of some one running up behind him, he turned. It was Garat, who seized him by the arm, dragged him up the stairs of a neighboring house and, halting on the first landing, exclaimed: "I've got it!" At once he began to sing the romance through at the top of his voice. The inhabitants of the house began to open their doors, heads were projected over the bannisters, finally they began to approach. But Garat, having finished, tore down the stairs like a monkey, dragging the bewildered poet with him.—Youth's Companion.

Thrive Without Sunshine.

The doctrine that sunshine is necessarily helpful and beneficial to the health is not always true. The Turkish men and women upset this theory completely. Across every window in a Turkish home are lattices to keep out curiosity and sunlight. The Turkish women get as little sunlight outside of their homes as they do inside.

At the age of twelve the Moslem woman takes the veil and she is never seen without it. The only chance she gets to let the wind blow on her face is when she is seated in the courtyard and within the walls of her own home.

In spite of the fact that the men and women get so little exercise and fresh air they are strapping big and hardy people. Few Americans can match them in physique or powers of endurance.—St. Louis Republic.

Horses on the Simplon Pass.

The horses of the Simplon post diligence—the coach which carries mail and passengers to the villages on the Simplon pass between Italy and Switzerland—are particularly well cared for. The road to the top is a steady pull of fifteen miles over a macadamized track. The horses are driven at a fast walk. Five miles up they are watered. At the ten mile station they are fed about a peck of black bread (rye or barley) cut into mouthfuls; this makes a light lunch, sustaining but not as difficult of digestion as oats. At the top of the pass, at noon, the horses are given an hour and a half to rest and are well fed and watered. The return trip of fifteen miles is made with a brake on the wheels most of the way, so that the horses trot freely and without the strain of holding back.—Our Dumb Animals.

He Got the Apples.

"Once upon a time," began the teacher, "two little brothers started to Sunday school one Sunday morning. Their way led past a fine orchard, where the trees were bending down with ripe, luscious apples. One of the brothers proposed going into the orchard and getting some fruit, but the other refused and sped away, leaving his companion greedily devouring the apples.

"Now, it happened that the owner of the orchard saw them, and the next day rewarded the good boy who refused to steal his apples by giving him a shilling. He got a prize for his honesty, and what do you suppose the other boy got for his dishonesty?"

"He got the apples!" yelled every member of the class.—Exchange.

Spiteful.

Patience—This paper says it is estimated that the annual catch of lobsters in the world is 125,000,000.

Patrice—You haven't caught one yet, have you, dear?—Yonkers Statesman.

Echoes.

The time which elapses between the utterance of a sound and its return must be more than one-twelfth of a second to form an echo.

How many people live on the reputation of the reputation they might have made!—Holmes.

Taffeta Gown of Delft Blue

Designed by Hickson & Co., New York.

UPON the clever details of the costume depends to a great extent its style appeal to the feminine mind. In the costume pictured here the full skirt has as a finish at the bottom multitudinous slashes, which are bound by narrow black velvet ribbon. The color of the gown is a delft blue, with tiny Martine figures of a deeper blue. The material is a soft pussy, willow taffeta, which is extremely popular this season.

Blue, for many reasons, is the most popular color that women wear because it is becoming to almost every age and almost every complexion. But, to return to the description of the gown, the full skirt is attached to a wide girdle of the material, and the tiny bodice is worn over a blouse of wide georgette crape. The front of the blouse is embroidered, and the neck is finished by a wide sailor collar with a frill of plaited net. The long sleeves of the blouse end in a ruffle which comes well down over the hands. It is tied about the wrist with black velvet bows.

The hat worn with this costume is of the broad sailor type.

Its only trimmings are a strip of figured silk, of which the gown is made, around the crown and long black velvet ties coquettishly tied under the chin. White silk stockings and black patent leather pumps complete a costume which has nearly all of the salient style features of the present season, and which, beyond question, is decidedly attractive.

ANNA MAY.

Milady's Mirror

Remedy For Loss of Facial Contour.

We all know it in other people—the loss of the clear line of the jaw, the droop of the cheeks and mouth, the lumpy appearance under the chin. And it has nothing to do with superfluous flesh, although it is commonly considered to be the result of fat. Indeed, in many cases an increase in plumpness hides rather than emphasizes the condition. The mischief goes back to the underlying muscles and so disproves the old adage that beauty is only skin deep. And nothing has a more disastrous effect upon these muscles, which, like little cushions, support the superstructure of the face, than anxiety and worry added to the strain of unaccustomed work, lack of accustomed exercise, and so on.

And the remedy?

Well, this is, in the early stages anyway, easily found in massage with a cream of slightly astringent character. Which make is used is a matter for individual choice, but it should be not merely an emollient or a cleansing cream, but one which incorporates ingredients to strengthen the muscles and rejuvenate the tissues.

Once possessed of this, it should be put in little lumps on the jawbone and above it to the temple if there is any tendency to falling in the upper part of the cheek, as will probably be the case after the first quarter century is passed; then with the tips of the fingers gently work the cream into the skin, beginning at the chin and stroking upward and outward along the line of the jaw, continuing the process in parallel lines, as it were, above this first and most important one. You will understand that the strokes—which is the most expressive word to use—should in each case begin at the chin or base of the nose and end more or less about the ear. There must be no rubbing to and fro, no hint of pressure downward or a return journey of the massaging hands.

Some six or eight strokes, each given slowly with firm, though gentle, pressure, should be given to the jawbone itself, when the best position will be to place the middle finger of the hand on the actual bone, with the first and third above and below it respectively. This is the most important part, and the amount of repetition which is devoted to the part above depends more or less on the time which can be given to the treatment and the state of slackness in which the face has fallen.

Control Thoughts For Lip Beauty.

The mouth is often said to be the greatest index to character, and the beauty of the mouth, more than any other feature, depends upon the woman herself. Thought and action are the sculptors of the mouth, and these are under the individual's control. As the lips are a nucleus of nerves surrounded by very many muscles, their contour is changed with every passing thought, and of all features they are the most susceptible of action and the most direct indices of the feelings.

Thin lips are formed by a constant thought and battle against minor difficulties. Persons of weak will have habitually compressed lips.

A woman can spoil a beautiful face by an unlovely expression of the mouth. It is therefore of vast importance that you should give serious attention to the fact that the mouth is in such intimate sympathy with your every thought and feeling.

If you will cultivate a critical faculty you will find many curious and absurd tricks and mannerisms by which otherwise attractive women are made ugly.

Habitual pouting enlarges and coarsens the lower lip.

Do not twist your mouth, either in scorn or thrust the mouth and chin forward, as is often done under a fancied sense of injury. These unfortunate contortions are often acquired by imitating others or from just witnessing others' actions. It therefore behooves the woman to be careful how she uses her mouth, for there is no period in life when these subtle and silent agents—the muscles and their controlling nerves—are not at work making or marring the beauty of the face.

Lip Salve Recipes.

No one need have dry or cracked lips. The application of carbolated vaseline, glycerin and rosewater, camphor ice made of refined lamb tallow, two ounces, and a piece of gum camphor the size of a butternut contain splendid healing properties. Before going out in the cold weather apply the vaseline softly and then wipe off. Do not chew and wet the lips.

A good healing compound for chapped lips is: Cocoa butter, twenty-four grams; white wax, four grams; essence of bergamot, one gram. Melt and beat together.

A good salve for the lips is: Spermaceti ointment, one ounce; balsam of peru, fifteen grains; alkanet root, fifteen grains; oil of cloves, five drops.

Digest the alkanet in the ointment at gentle heat till the latter is a deep rose color; then pass through a coarse strainer. When slightly cooled stir in the balsam; give a few moments to settle; then pour off the clear portion and add the oil of cloves.

Three Sewing Hints.

In sewing in hot weather use an emery "strawberry" frequently. Passing the needle in and out through it removes moisture, all danger of rust and insures much easier manipulation. Never allow a needle to squeak.

Wax the thread thoroughly before attempting to string beads or to sew them on any material. This makes the work easier as well as stronger, and the thread or sewing silk will never knot.

Instead of binding or felling seams on lingerie, use narrow lace insertion, one piece on each side of the raw edges. Stitch on both sides with the sewing machine. Lace braids, also the bought ready made lawn folds, are admirable for the purpose and are easy of manipulation.

1915 Overland Demonstrator, Electric Starter and Lights, $750.00. Van Wagenen, Inc. adv

HIS NAME NOT NEWLYWED.

However, He Wouldn't Fire at Burglar Lest Baby Be Waked.

Scottdale, Pa.—Rather than waken the baby by firing his revolver, Frank Weiss, a tailor, sat on a stairway in his home and watched a burglar ransack the dining room. The intruder's movements were plainly visible through a transom.

When the burglar found a pocketbook in a drawer and transferred its contents to his pockets Weiss' grip on the revolver tightened, but his wife tugged at his sleeve and whispered to him not to shoot.

Mrs. Weiss, after four hours' ordeal with a fretful baby, had succeeded in getting it to sleep when the burglar came.

Immortal Animals.

Some of the lower animals are immortal, having neither birth nor death. The condition was never more clearly or scientifically expressed than by S. T. Coleridge in his "Biographia Literaria" in a footnote to chapter iv on Wordsworth's "Lyrical Ballads" where he says:

"There is a sort of minim immortal among the animalcula infusoria which has not naturally either birth or death, absolute beginning or absolute end, for at a certain period a small point appears on its back, which deepens and lengthens till the creature divides into two, and the same process recommences in each of the halves now become integral."

Finger Nail Spots.

It is now thought that the white spots which frequently appear on finger nails are due to the presence of gas in the substance of the nail. They occur much more frequently during youth and in women and are usually found in persons of a nervous type. There is no remedy for them and no means of prevention except the avoidance of injury to the nails.

How He Guessed It

"The thing I like about your crowd," observed the imprudent rushee, "is they're optimistic."

"Yes, we are, but how did you guess it?"

"At meals every one says, 'Pass the cream, please.'"—Columbia Jester.

Better Than Nothing.

"I'll be pretty busy on this trip," he began.

"I know," interrupted his wife. "Here are forty or fifty love letters you wrote me when we were engaged. Take them along and mail me one every day."—Louisville Courier-Journal.

Ought to Love It.

Lover (passionately)—Sir, I love the very ground your daughter walks on. Father (grimly)—No doubt you do—it's worth $200 a front foot.—Town Topics.

Slow.

"Mamma, I'm afraid papa was pretty slow when he was a young man."

"Perhaps he was. He always paid his debts and used good English and knew nothing about cigarettes and never saw a taxicab and hadn't any clubs, and was able to support a wife before he married. I guess he was pretty slow."—Cleveland Plain Dealer.

Spots in the Sun.

With nine brand new sun spots reported, Old Sol seems to have arranged a place for each of the aspiring belligerents.—Washington Post.

Woman's World

A Woman Who Wants the Right to Wear Voter's Button.

DR. ANNA HOWARD SHAW.

The National American Woman Suffrage association has flooded the Panama-Pacific exposition with a silent argument for woman suffrage. This argument is nothing less than a modest little button which is appearing, almost overnight, as it were, upon the arm of thousands of women in attendance upon the exposition. The button reads merely, "I'm a Voter."

The idea is, of course, to make the visitors from the conservative eastern states realize, through visual aid, that there are thousands and thousands of well groomed, happy, sensible looking women who actually vote, and the National association has seized upon the Panama-Pacific exposition as the best possible place in which to demonstrate the truth of their contention. These buttons are being sent to women through the state suffrage organizations with which most of them are still affiliated. Several million have been turned out, it is said, for this novel demonstration.

The idea was conceived by Miss Jeannette Rankin of Montana, now a member of the congressional committee of the N. A. W. S. A., and was promptly seized upon by Dr. Anna Howard Shaw, president of the association.

"Miss Rankin can wear the button," said Dr. Shaw at the national headquarters in New York, "thanks to the men of Montana, but I can't wear it until the men of Pennsylvania give me the right next November. But I have saved a button in the hope that the men of Pennsylvania will be as just and as sensible as the western men, who have enfranchised 10,000,000 women and seem to be glad of it."

On the Safe Side.

Traveler—Waiter, get me a lamb chop, quick. My train goes in eighteen minutes. Waiter—Yes, sir. Fifty cents. Traveler—What! Do you expect me to pay in advance! Waiter—If you please, sir. You may be gone before it's ready.—Boston Transcript.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. ad138

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

[illegible] SCHOOL [illegible] TO OSWEGO

[illegible] McCulla Whose Decisions Made Every-body Feel Happy

[illegible] High school baseball team lost to Oswego High [illegible] although the home lads won by a comfortable margin the Fulton boys fought all the way.

The Oswego heavy artillery got busy on [illegible] curves early in the game [illegible] singles represented [illegible] blows registered off the [illegible] accounted for three [illegible] Grady and Walker [illegible] each.

[illegible] inning Oswego nicked O'Brien for three hits but airtight fielding on the part of the local team [illegible]ved off any tallies for the time be[illegible]. In the third the Oswego lads [illegible]ld not be denied and three more [illegible] netted two runs. Four hits in [illegible] fourth garnered one more tally [illegible] the home team scored again in [illegible] fifth. Two runs in the eighth [illegible]nd up the Oswego scores.

[illegible] got two in the fourth on a [illegible] another by Bray and [illegible] filed out, H. O'Brien [illegible] home with a hot single, Bray [illegible]ing. In the sixth some errors [illegible] hit accounted for another [illegible] tally and as usual, the boys [illegible] spirit by staging a [illegible] that had the Oswego team [illegible] while it lasted. Bray was safe on an error but Pullen forced him at second. Marky stole, went [illegible] third [illegible] O'Brien's roller and scored when Don was safe on Jack's miscue.

McCulla, the umpire, was one of the best that has worked in any game this year. His decisions were fair and above board at all times and his keen eyesight robbed Linderman of a two-bagger in the fifth when that individual failed to touch first base. McCulla called him out.

The score—

CLARK'S TEAM TO COMPRISE ALL POPULAR IDOLS

For the game in the Stadium at Syracuse on June 3, Elks Field Day, between the Pittsburgh Pirates, the team which just now is going fast in the National league, and the Detroit Americans, Manager Fred C. Clarke will present the following lineup to battle for the Pirates:

Carey, lf.; Johnston, 1b.; Baird, cf.; Hinchman, rf.; Honus Wagner, ss.; Viox, 2db.; Gerber, ss.; Gibson, Schang or Murphy, c.; Adams, Cooper, McQuillan or Harmon, pitcher.

In addition to the above lineup the Pirates will have with them Alex McCarthy, Joe Conzelman, Dan Costello, Albert Mamaux, Kantlehner and Eddie Collins, the entire Pirate roster. While the lineup of the Detroit team has not been received it is known Jennings is counting upon usig his best men as he wants to capture the game if possible. Both teams will arrive on the morning of June 3, and leave immediately after to resume their contests for the championship of their respective leagues.

ROSS LASTED FOUR ROUNDS

Meany Gave Him a Hard Gruelling, But Ross Was Game

"Young" Meany mastered "Young" Ross last night at the Arena, Syracuse, in the fourth round. Meaney thumped Ross hard and often in the first two rounds. Ross "came back" and took the third round, but the fourth went to the Fulton lad by a good margin. Meaney and Ross each weighed 119 pounds.

Bobbie Shannon, king of the by weights, scored a distinct triumph in the semi-final when he administered a sound trouncing to "Young" Rafferty of Rochester in four rounds of furious boxing.

"Spike" Kelly, 127 pounds, stopped Tommy Rooney, 121 pounds in the second round of the curtain raiser, and "Lefty" Helms, 137 pounds, had a slight shade on Jack Kearney, 139 pounds, in the second battle, a three-round acair. "Young" Walsh, 135 pounds scored a marginal decision over Billy Gorman, 135 pounds, in the third tilt of three rounds, and "Young" Leach Cross, 147 pounds, shaded Billy Kennedy, 152 pounds, in the final three-round tussle.

Eddie Vieau, 119 pounds, made a show of Eddie Beason, 114 pounds, in four uninteresting rounds. Beason was wiling boxer, but Vieau appeared able to hit him at any time and almost anywhere he chose. "Battling" Day, 138 pounds, gave "Kid" Green, 138 pounds, a sound trouncing in a four-round bout preceding the Shannon-Rafferty mill.

It took Sam Nolan of Rochester just a little more than two rounds to shatter the pugilistic ambition of Jack White in the main event. After two furious rounds the Pastime A. C. heavyweight collided with a shower of left swings and right hooks in the third and was saved from a knockout when Referee Lewis stopped the bout.

WELSH FIT TO MEET DUFFY MONDAY NIGHT

Buffalo, May 29.—Everything points toward a real championship battel attended by a metropolitan crowd when Jimmy Duffy meets Freddy Welsh at the Broadway Auditorium on Monday night. The last obstruction in the way of prearrangements was cleared away yesterday. The referee question was decided after a firm stand by the representatives of the Queensberry club, despite the unfair demands of Harry Pollok, manager of the champion.

With the referee problem a thing of the past, interest in the bout began to crystalize yesterday afternoon when mail orders from nearby towns were received and promptly filled. With a few exceptions everyone wants to see Welsh whipped by the Lockport boy; beaten to a frazzle. Lockport fans will turn out in larger number than ever before.

JITNEY OWNERS MUST HAVE STATE PERMITS

Albany, May 29.—In response to requests from all parts of the state, an interpretation of the new jitney law was made today by the Public Service Commission of the Second District, in the following statement:

"It appears that the 'auto bus law,' which has been in effect for the last two years, has been repealed by the enactment or the jitney bus law, and that it is no longer necessary for persons ad corporations desiring to operate auto bus lines on state highways to come to the commission for certificates of approval.

"It will be necessary, however, for all persons and corporations owning or operating vehicles carrying passengers for a fare of 1g cents or less on any street, avenue or public place in any city of the state, except the city of New York, to procure, first, the consent of the local authorities and, next, a certificate of convenience from the Public Service Commission.

LOAN BILL UPHELD

Albany, May 29.—The right of Controller Travis to borrow $6,000,000 for State expenses is unanimously upheld by the Appellate Division, Third Department.

Representatives of the United Real Estate Owners' Association of New York, who questioned the Controller's authority to negotiate the loan, have not announced whether they will carry the case to the Court of Appeals.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, May 29.—While there is yet time to present amendments to the State Constitution important proposals aimed at the State Conservation Commission will be offered by Delegate Ferris J. Meigs representing the thirty-fourth district. Earlier in the session of the convention amendments upon the same subject were presented by Delegates H. Leroy Austin and James W. Whipple. Both of these gentlemen were at one time at the head of the State forest, fish and game commission. Delegate Austin touched upon the present law in relation to the cutting of dead timber, while Delegate Whipple also offered a proposition upon the same and kindred subjects.

When the convention resumes its session next week it is expected that the proposals of Delegate Meigs will be introduced, probably on Thursday. His ideas are understood to be entirely different from any of those already proposed by deelgates interested in the subject. Mr. Meigs is a pactical forester with an expert knowledge of the Adirondacks and the sole object of his amendment will be to protect the forests, while at the same time making them a source of revenue to the State.

The principle idea to be expressed by Mr. Meigs in his forthcoming amendment is an elective board representing the interested sections of the State, which board will have full control of conservation subjects, including the naming of a conservation commissioner.

The fact that there have been many attempts to change the laws under which the State administers the business pertaining to the forests, water storage propositions and game, is likely to result in opposition to the proposals to be advocated by Delegate Meigs. For the past six years the department which has had these matters under its jurisdiction has been twice reorganized and further attempts to do so are not expected to be greeted with enthusiasm, many of the delegates to the Constitutional Convention declare.

It is said that State Conservation Commssioner J. D. Pratt does not take kindly to the ideas which are to be exploited by Delegate Meigs, yet no public sentiment to this effect has been made by him. When he assumed charge of the conservation department it was known that he had ideas of his own to work out and that his position upon conservation matters met with the entire approval of Governor Whitman and many prominent sportsmen and advocates of practical and efficient methods of dealing with the large problem connected with the conservation department.

It is pointed out that Conservation Commissioner Pratt has been in office but scarce a month and that any proposed amendments to the Constitution tending to reduce his tenure is quite unlikely to gain support from either him or the Republican members of the Convention, since the passage of the act which ousted the three Democratic conservation commissioners was regarded as the final step in conservation legislation of a quasi-ripper nature. There are those, however, who argue that the proposals of Delegate Meigs should be given ample consideration by all who are interested in matters connected with conservation; such consideration will at least be forthcoming from the delegates.

LOW WOULD HAVE NON-PARTISAN ELECTIONS

Albany, May 28.—Seth Low, former Mayor of New York, today introduced in the Constitutional Convention a proposal designed to make all municipal elections non-partisan.

Both State and National political parties would be prohibited from nominating, indorsing or promoting the candidacy of any nominee. Nominatios could be made by professional bodies, non-partisan primaries, or by independent certificates. The Citizens' Union drew the proposal.

The convention adjourned today until Wednesday next at noon.

HOTEL BILL KILLED

Boston, May 29.—A bill imposing a heavy penalty on hotel guests failing to register their true names and addresses has been killed in the Senate.

HUGH DUFFY TO JOIN FEDERALS, SAYS RUMOR

Buffalo, May 29.—Hugh Duffy may manage the Buvalo Federals. It is known that the Federal League has been making overtures to Duby, and it is said that if he signs up he will take charge of the Buffalo team.

It is known that several stockholders of the local club are not satisfied with the way Larry Schlafly is running the club, and that they are insisting that another man be secured.

While the local club has a bunch of good ball players some of the stockholders are of the opinion that Schlaby is not getting enough out of them as a whole.

Washington Circles Predict Flat Rejection of Germany's Plea for Delay—Count Bernsdorff Will See the President Tomorrow.

Washington, June 1.—America's rejection of the German invitation to involve the submarine issue in a discussion of facts will not be long delayed.

It is held here, and it is felt that public opinion over-whelmingly supports this view, that the United States cannot possibly engage in an investigation of facts to determine Germany's guilt subsequent to the torpedoing of merchant vessels when the laws of maritime warfare and the dictates of humanity make it the bounden duty of Germany to determine those facts by the visti and search of merchant vessels before destroying them.

The fact that Germany not only asks a subsequent investigation of past attacks, but purposes in the future to sink vessels first and then investigate to determine her guilt afterward, makes it absolutely impossible, it is said, for the United States to accept the German reply.

With so entirely unacceptable a reply from Germany and with overwhelming support from public opinion, President Wilson has not found it difficult this time, it is said, to see his way clear to the point of FLATLY REJECTING the German proposals. A note to this effected is expected to be dispatched to Berlin before the end of this week.

Count von Bernstorff, the German Ambassador, has requested an interview with the President for Wednesday, and so the American note will be postponed until after that day. But it will, in all probability, leave Washington immediately after that.

Public opinion which the President accepts as his proper master in shaping the destiny of the nation in this great issue has been so emphatically and unanimously expressed on the German reply that there need be no further doubt regarding the action which the nation demands for the moment. Not only in editorial comment from all over the country, but also in a deluge of telegrams, the White House has been informed of the state of public opinion.

It is estimated that about seven per cent of the expressions of public opinion which hhave thus fare reached here counsel delay and appear to place the consideration of providing against war above that of protecting American rights on the high seas. When it is considered how widespread was the insidious peace at any price doctrine in these United States a year ago, it is evident from this how profound an impression the German offences have made upon the American public mind.

The situation shows, therefore, that the President is free to state finally the position of the United States regarding the submarine atrocities, reject and end any further discussion of the matter,

(Continued on Eighth Page)

Lawyers Say German Note Is Not an Answer to President Wilson—Flag Must be Respected, They Say

New York, June 1.—Frederick R. Coudert, international lawyer and authority on matters of diplomacy, placed himself squarely behind the President as in favor of a strict enforcement of every demand Germany now seeks to delay answering.

"It does not in any wise meet the situation," said Mr. Coudert. "The German 'answer," as published, would appear to show nothing more than that Germany is sparring for time and making an attempt at temporizing; that they are attempting to inject into the case questions which shoulld not properly be there. It seems that they would merely belittle the great question of principle involved by making it appear a mere lawyers' quibble over fact.

"The situation is perfectly clear. The German note of February 15 was an infraction of the cardinal principle of the law of nations. Against that we protested. Germany then not only destroyed our vessels on the high seas, but, in defiance of all laws of humanity, she killed our citizens. We tell them we hold them to a strict accountability. Then some of our ships are attacked in answer and finally comes the Lusitania as the crowning horrible crime. That terrible outrage alone might well have justified us in severing diplomatic relations with Germany and calling her the outlaw of nations.

"Either Germany must recede from its war zone policy or the United States must retract the position it has taken in defence of humanity, and, as the only great neutral nation remaining, for the United States to do this, is quite unthinkable. It would earn for her the contempt of mankind and she would lose her position as the sole remaining champion of international morality and right."

Maurice Leon, recognized authority on international law, echoed the statements of Mr. Coudert and declared that now Germany must

TILLMAN'S WORDS WERE PROPHETIC

He Realized Ahead of Time His Party's Blunders—Opposed Tarriff Changes

Washington, D. C., June 1.—"As compared with the Republicans we are an untrained mob, with very little effective knowledge of the rules."

Senator Tillman, Democratic senator from South Carolina, spoke these words in an address to the United States Senate. In the light of subsequent events they have become a warning and a prophecy.

The laws enacted during the last two years are crude and faulty to the last degree. As illustrative of this fact, a few notable examples of the many blunders contained in the tariff bill alone have been hitherto published.

"Lest we forget," a brief summary of these examples follows, merely to emphasize the general principle of inaccuracy prevailing in the Democratic laws:

1. The tariff bill as a whole was a blunder, because it was a revenue measure that produced many millions of dollars less than were needed, a depleted treasury being the result.

2. The provision for a five per cent. discount in duties on merchandise imported in American vessels, involving millions of dollars, was declared inoperative by the Attorney General over a year ago, and went to the Court of Customs Appeals.

3. Another provision affecting hundreds of business concerns is before the same court because of the insertion of an obscure phrase that neither customs officials, lawyers nor business men affected could understand.

4. A vital provision in the income tax law, a part of the tariff bill, relating to deductions allowed in computing gross income, must go to the courts like hundreds of others.

5. The entire income tax provision has been pronounced by the Taxation Committee of the American Bar Association, a non-partisan body, "as open to the gravest objections both in structure and specific defects," twenty-five imperfections being pointed out.

6. Necessity for amending this law has forced administration officials to the work of formulating a report of its crudities, as a basis for amendment by Congress.

On innumerable occasions during the debate on the tariff and other bills, Republican floor leader James R. Mann of Illinois cautioned the majority to use greater care, and gave one reason for the dividing line between two sides of the House as "a lack of information" on the part of the Democrats.

Like Senator Tillman's utterance, these words have assumed prophetic meaning. Literally hundreds of other blunders in the tariff bill might be cited. Typical examples have been referred to because they show the logical results that followed the employment of slovenly, inaccurate methods of legislation.

Practically every important statute passed by the present administration is likewise honeycombed with needless imperfections, that must be corrected by expensive legal procedure or legislative action. They are facts with which everyone should become familiar, and with that object in view the subject will be dealt with in future articles.

'A SPRING ATTACK IN AMERICA.

—Hodge in Spokane Spokesman-Review.

MRS. LEE'S WILL MADE PUBLIC

Dr. Lee is Made Sole Executor and Mrs. Willard a Beneficiary

Attorney Giles S. Piper is ready to offer for probate the will of the late Eva Case Lee, or as soon as the health of her husband, Dr. Charles R. Lee, becomes somewhat near normal. Mrs. Lee died a month ago and since that time Dr. Lee has been very ill.

Mrs. Lee's will is dated June 9, 1913. It directs that after all just debts, funeral expenses, etc., shall be paid, the life use of all property, personal and real estate, shall belong to her husband, Dr. Charles R. Lee. Upon the death of Dr. Lee the house at 181 E. 1st st., with the contents, are to go to Mrs. Lee's cousin, Mrs. May F. Willard. All other property both real and personal shall at that time be converted into money as soon as practicable, the money to be distributed in the following manner:

Sallie and Grace Potter, Syracuse, $10,000 each; Allie Cook, Wichita, Kans., $20,000; Bessie Kellogg, Chittenango, N. Y., $15,000; William Moody, New Castle, Pa., $5,000; Samuel Case, New York., $2,000; Agnes McCaffrey, Fulton, $1,000; Fulton Public Library, $1,000; Fulton Presbyterian church, $2,000.

Another provision of the will says: "After paying the above-named bequests, I give and bequeath to May F. Willard all the remainder and residue of my estate to be hers absolutely. If I die before my husband, Charles R. Lee, I would like to have the sum of $5,000 paid to May F. Willard."

Dr. Charles R. Lee is appointed sole executor.

SMALL BLAZE AT THE STOUGTENGER HOME

The fire department answered a call from box 34 in N. 1st st. yesterday about 4 p.m.

The property is owned by the Ontario Western Railroad Company and occupied since Saturday by Herbert Stoutenger. It is believed the blaze started when some children were playing in the rear of the house with matches near a pile of rubbish.

All of the furniture was removed with slght loss and it is not known whether the property is covered by insurance or not.

The blaze had quite a headway and only by quick work by the chief and his men was the entire neighborhood saved.

WEATHER FORECAST

Fair tonight and Wednesday; moderate southeast to east winds.

SECOND MEMBER OF MOVIE CENSOR BOARD RESIGNS

Irving Galusha, whom Mayor Fox appointed chairman of his new board of movie censors, tendered his resignation to the Mayor today. In his letter Mr. Galusha stated that his actions while chairman of the board had been misconstrued and that he had been subjected to severe criticism which was wholly undeserved.

The commission began its work last week by suddenly taking action against a picture which was to be shown at the Happy Hour theatre. The film was from a story written by a retired minister, but Mr. Galusha objected to it, and told Manager Prowda of the theatre that the film would have to be submitted to the commission before it could be shown publicly. Mr. Prowda refused point blank. The commission viewed the film at the afternoon performance, however, and while Mr. Galusha's opinion was not learned, A. P. Bradt, another member of the board said he saw nothing objectionable in the picture.

Mr. Galusha has publicly stated that he objected to scenes in the moving pictures which depicted men smoking and also those scenes wherein toasts were drunk or where wine glasses were in evidence. As almost every large feature film contains many scenes of this character which have been passed by reliable censors, the motion picture houses here were having visions of bare strips of celluoloid with no photographs after the commission had finished purging the pictures of perfidious passages.

Mayor Fox has not announced his choice as the new chairman of the board. This is the second resignation to be handed the Mayor in a week by one of his appointees. William E. McCormick recently refused to serve as a member of the City Planning Committee.

THOUSANDS OF GERMANS TAKEN, SAY RUSSIANS

Petrograde.—General Irmanoff's Caucasian corps continues to force a wedge into the German position north of Przemysl. They advanced from Sieniawa and took all the villages on that side of the river, with a thousand or more prisoners and a large supply of field kitchens intended for the Germany army on the right bank of thhe San. This army, headed by the Prussian Guards, under General von Emmich, was subjected to incessant bayonet fighting.

General von Machensen's main purpose now in Galicia is to effect a junction with General Marwitz, who has been fighting from the Dniester in an attempt to reach the railway between Lemberg and Przemysl, and cut off the Russian supplies. But here the Russians have been completely successful and are threatening the rear flank of Marwitz's army on the Stryj road.

The German forces are everywhere disorganized. Groups which have been separated make no effort to reform their positions. There are signs that the Russians may shortly inflict upon the Germans the greatest disaster of the present campaign.

The Austro-Germans, however, are pressing an attack against the Russian salient, which projects southward to upper Gai, a village on the railway between Drogovitch and Stryj. In this region Captain Bar, leading a battalion against the Germans, was surrounded by a force two or three times larger than his own, but captured six hundred prisoners.

On all the sections of the Galicia front the German artillery fire of late has weakened. This is the result of party of theh extension of their lines of communication, which makes it difficult to supply ammunition in the enormous quantities which it is expended, and partly because of erosion in the rifling of the guns due to the incessant work under high pressure. Many of the German heavy guns already are worn out.

Opinions

In Trenches of Peace

When the sturdy sons of Italy lay down the pick and shovel in American mines and ditches, and sail away to give their native land the benefit of their eperience in trench-making, their places must be taken by other workers or the country suffer a set-back. Well, there are enough unemployed to fill the gaps just at present. The unemployed of New York city—400,000—is large enough to match the possible exodus of Italians.

How many Italians answer the call of patriotism and turn their back upon good American dollars is in consequence more important to Italy than the United States. The Italians are a complex people, enthusiastic, ardent and volatile. Here in America they have an underserved reputation in some sections for militnacy because of the criminal conduct of a comparatively few, and it is only fair to say that the great majority of Italians compare well with other immigrant strains. On the other hand, economic well-being and "safety-first" principles will be an inducement to remain. Too much influence can easily be attributed to these motives, however, since men of all nations prove daily the willingness of humanity to die for a cause. When all is said and done probably the number of Italians who return to the old country will be determined by the attitude taken by the leaders of thought among them.

The opinion is often expressed that Americans will not perform menial labor which immigrants accept and prosecute with such undeniable vigor. That remains to be seen. They did it in the earlier days and certainly the withdrawal of aliens makes it easier for American labor to command the market. In every enterprise Americans have proved their ability to stand hard work, the low wages which some of the immigrants will accept for gruelling labor being the chief cause of their preeminence in such activities rather than the laziness or weakness of Americans. Of the eight miners killed recently in the Cambria mines all were Americans, operating upon their own responsibility while the mine was closed in order to provide their families with the necessities of life. If the European war relaxes competition in the labor field and gives such energetic native laborers who have the requisite ambition a better chance to improve thheir conditions, the gain may be of as great economic worth as the billion dollar trade balance which Secretary Redfield prophesies for the current year.—Little Falls Times.

BIG LAUGHS

At a station in northern Pennsylvania a number of young ministers on their way to a religious conference in Philadelphia, boarded a coach wherein was a dilipidated young woman smelling of beer. For some time the young men in black garb conversed gravely on conference affairs, while the beery young woman nodded in her corner.

The train approached a long tunnel. The young woman roused herself. She pinned back lazily a long strand of hair that had fallen on her shoulder, and fixed her gaze upon the ministers. Then she produced from her basket a huge bread-knife. Making a few unsteady lunges in the air with this implement, she addressed the reverend gentlemen thus:

"Don't none of you boys try no tricks on me in the tunnel, or, mark my words, I'll open ye!"—Everybody's.

You can get Black's baked products at the right hour for meals. They are at your grocer's, fresh every afternoon. adv.

INDUSTRIAL KNOWLEDGE

While the problem of training the coming generation to be efficient—capable of caring for themselves through a correct interpretation of the craft of one or more trades, many interesting and suggestive ideas are being expressed. The useful citizen, the one who is capable of efficiency in a trade for which he is by nature fitted, is today the subject of discussion among thosew ho look far ahead—to the efficiency of the nation.

This is an industrial age. We must prepare ourselves as a nation to meet its demands. Preparation in classics cannot meet the demands of our industrial wants. The masses flount their needs in the great army of unemployed.

At the National Conference of Charities held recently at Baltimore F. C. Lounsbusch, president of the Lower Rents Commission, made the following statements:

"Many thousands of dollars are spent in educating the children. After receiving this education, they are turned out of the schools at any time from the fourteenth to the twentieth year, and allowed to hunt their vocation in life with very little well defined or intelligent direction.

"The child may turn to its parent, who has very limited knowledge as to the industries of his community or the country at large. If the child turns to its teacher, it finds but little more help here, and so in a haphazard fashion it secures a 'job.'"

"There should be in every community a central point to which the child should turn to learn all about industries, all about opportunities in staple trades and new lines of business, to know where were best fitted to its education and temperament. To thus save the child from misdirection would cut off one source of supply to the great stream of casual workers and unemployables.

"Public employment offices should also be able, in connection with trade unions, to give accurate information to vocational and trade schools as to what should be taught in them to meet the coming needs of the various industries.

"Another way in which the public employment offices could help to lessen the number of casuals and unemployables would be to help to shift workers in seasonable industries from one work to another. Many trades and industries can be, or are carried on for part of the year only, and when the workers leave one trade they have no central point whre information can be had concerning some other trade in which they could be employed for the rest of the year. Lacking this, they drift about and soon become members of the great body of under-employed."

A SUFFRAGE PILGRIMAGE

Suffragists of Maryland will start next week on a pilgrimage to St. Mary's City, the home of Mistress Margaret Brent, the first woman in America to ask the right to vote. She was attorney for Lord Baltimore, and executrix of the colonial estate of Governor Calvert. In virtue of this fact, she demanded "place and voyce" in the Assembly, away back in 1647. Her request was hotly debated, but was refused.

The pilgrimage will be a picturesque affair. The women will start from Baltimore in a "prairie schooner," an old-fashioned canvas-topped wagon, such as carried the early settlers and their families in their migrations. Incidentally, the excursion will furnish an object lesson that the suffrage movement does not mean "sex antagonism," for the husband of one of the women will go with the party, and be ready to give a man's help when needed. They will sow suffrage literature and suffrage speeches all along the route.

WITH THE STATE EDITORS

One would think b ythe tone of the New York press that Governor Whitman gloried in signing a direct tax bill. It was the last thing on earth he would have done if be could have possibly avoided it. He has simply assumed a burden that was forced uon him by four years of preceding Tammany administration.—Watertown Times.

* * *

The people of New York State, the thinking people, are standing staunchly by Governor Whitman, and the State government in the administration of affairs. Surely never before have the affairs of State been given such thorough business-like attention, and while results may not be directly apparent, the course being pursued by the Governor means the placing of the State on a firm foundation and business-like basis.—Mohawk Valley Register.

* * *

Governor Whitman answers in dignified and positive terms those critics who have sought to make the people believe no direct tax was necessary this year and that the Legislature and the Governor were bent on throwing the public moneys to the winds.—Auburn Advertiser.

* * *

Governor Whitman has put his foot down with emphasis on the playing of politics with the finances of the State. The practices of the last several years are discontinued. Obligations are to be met as they mature and the robbing of Peter to pay Paul with postponement of the day of settlement by evasion and subterfuge is done away with. This much is made apparent in his statement accompanying the approval of the tax, supply and appropriation bills. The governor was importuned to do or to consent to the doing of many things to avoid the necessity for a direct tax. He investigated all the proposals, the craziest of which came from influential men of New York city supposedly versed in finance, and found that they were, all either illegal, highly improper or actually wasteful.—Rochester Post-Express.

HARRY LAUDER COMING

There are many star entertainers before the public but none have the vogue of Harry Lauder, the great Scotch singer and comedian, who will be seen and heard at the Quirk Wednesday in singing and talking pictures, telling his extremely funny stories and singing the songs he has made popular all over the world. There is only one Harry Lauder, and as there is a universal demand to see him, his manager, Mr. William Morris has taken advantage of a new electrical invention that reproduces the voice in harmonious unison with the action of the figure on the screen. It is said that the reproduction of Mr. Lauder's voice is realistically life-like, and as the art of motion pictures gives the artist a wider scope to display his comic proclivities, the comedian appears funnier through the medium of his singing and talking pictures that he did on his recent our. Mr. Lauders' humor is simple and appeals to everyone. It is always true to life, and represents real characteristics of the types he portrays. His songs are extremely catchy; all of them have sweet melodies and the tunes are so simple that even one with an untrained ear for music leaves the theatre whistling and humming the melodies. That is why Harry Lauder is the most popular entertainer of the present era. 6 other reels will be shown.

Scrubby M'Ginnis' Dues

How a Delinquent Club Member Paid a Debt.

By JOHN BARTON OXFORD
Copyright by Frank A. Munsey Co.

Seven simultaneous and rather noisy games of pitch, a four cornered altercation over one ball on the pool table, the tinkle of an ancient square piano, sadly out of tune, to say nothing of a heated and ten voiced discussion of contemporary ward politics, is not conducive to that calm and placid frame of mind with which an executive committee should go about its business.

But since the regular monthly session of the executive committee of the Three Points club was always held in the midst of such an uproar, its four members had long since learned to make the best of things, and at their little table in the corner with its imposing array of ink stands and pads of paper, blotters and record books, to pass upon matters revelant to the club's welfare with a judicial mien, on which the clatter and noise all about them made seemingly no impression.

Mr. Horrigan, the committee's chairman, cleared his throat several times.

In the manner of a man who is about to broach an unpleasant subject, he nervously opened the black book, wherein were kept the treasurer's records, and haltingly asked of his colleagues, not without certain uneasy and apprehensive glances at the big frame lounging at that moment on the piano stool:

"Well, wot cher goin' to do about Scrubby—huh?"

It was red headed Mr. Dorgan, at the end of the table, who finally plucked up courage to inquire:

"Then he ain't come across wit' nothin'?"

The chairman slowly and reluctantly shook his head.

"His dues is now over three months unpaid," he announced. "The rules says that any member wot don't come across wit' his dues for that length of time shall be cut off from all the privileges of the club till he makes good."

Mr. Horrigan took another uneasy look at the man at the piano and then leaned confidentially across the table toward his fellow members.

"I've got a hunch he don't never intend to come across wit' nothin'," he declared meaningly. "I'm willin' to bet that Scrubby McGinnis intends to keep right on comin' here and usin' this club and bangin' away at the pianny wit'out never payin' a cent for it.

"He's bankin' on the rep he's got in the ring, and outside, too, for that matter, for bein' a bad one wit' his dukes, to throw a bluff inter us here.

"He thinks he's got us scared tame and that we won't dare do nothin' to him, that's plain."

"He ain't goin' to get by wit' nothin' like that," said Mr. Mullen darkly, yet

"WELL, WOT OF IT?" SCRUBBY SHOT OUT AGGRESSIVELY.

with very apparent mental reservation, as he took a swift glance pianoward.

"Dead sure he aint!" acquiesced Sinker Devlin, the fourth member of the committee.

"Well, wot cher goin' to do about it?" Horrigan demanded again.

"Tell him if he don't come across wit' them back dues it's nix for his here," said Mullen.

"Sure, that's wot!" chimed in Devlin. "Yer gotter live up to the rules. Let him get away wit' anything like that and half the other ginks in the club wouldn't be payin' no dues, neither."

"Anybody told him what the rules is?" queried Mr. Dorgan.

"They don't have to," said Horrigan. "He knows' em as well as you or me."

"Well," said Dorgan. "I'd like to suggest that yer tell him that he can't come here no more till his back dues is paid, Horrigan, and then if he don't pay no attention to it"—

He paused.

"Wot then?" Horrigan demanded.

"T'run him out!" said Dorgan with a grin. "He's gotter be made a example of!"

"Yah, t'run him out for sure!" mocked the chairman. "Yer can have the job for the askin', Dorgan. No one's goin' to try to butt in on yer on that!"

"Oh, I ain't lookin' to hog no such job as that," said Dorgan cheerfully. "We gotter let this gink know that even if he is Scrubby McGinnis he ain't goin' to put nothin' over on us like he's thinkin' to.

"Yer tell him how things stands. Maybe he'll go peaceable, more likely he won't. If he wants to get nasty about it, well and good. We'll reenforce the fightin' ability of this executive committee a bit to meet the occasion.

"Wot's the matter, Horrigan," Mr. Dorgan leaned across the table to continue in a lower voice, "wit' ringin' in that big Swede that lives down the street from you—that Eric Nilssen that's been makin' good at all the pug shows lately?

"He could put it all over Scrubby wit'out half tryin'. Make him a member here; put him on the executive committee for the time bein'. Then see'f Scrubby won't go!"

"Yer'll have to come up wit' somethin' to Nilssen—maybe ten or twenty; but it 'ud be well worth it for the sake of example and keepin' the runnin' of things here in our own hands."

Immediately a lively discussion was under way, sotto voce, at the executive committee's table in the corner, and even as Scrubby McGinnis rattled out throaty baritone songs before the decrepit piano the four at the table plotted his undoing.

"All right," said Mr. Dorgan at length when the matter had been thoroughly thrashed out. "Yer go tell him, Horrigan, that it's either pay up or get out, and if he don't see it that way, why, the Swede for his, that's all."

Whereupon Mr. Horrigan, not without a certain show of hesitancy, left his seat at the committee table and advanced toward the piano.

Picking his way between the tables of pitch players, Horrigan made his way to the side of the trouble making Scrubby, who at that moment was bawling out a joyful and suggestive song to three highly appreciative satellites grouped about him.

"Excuse me," said Horrigan, realizing with disgust how servile were his tones, "but yer owe six dollars for three months' back dues, Scrubby."

"Well, wot of it?" Scrubby shot out aggressively, at the same time swinging around on the piano stool and pushing out his lower jaw unpleasantly.

"Yer see, Scrubby," said Horrigan meekly, "this club is supported be the dues the members pays in. We can't let no member get more'n three months behind wit' 'em.

"It's the rules that any member that gets three months behind wit' his dues can't come here nor have none of the privilege of the club till he pays up."

"Is that so?" said Scrubby with a smile, and Horrigan reflected with a sinking heart that Scrubby's smile was more menacing in its suggestion than had been his protruded lower jaw.

"So ye'll either have to come up or"—began Horrigan, but before he could get farther McGinnis cut him short.

"Yer don't tell me," said he, and swung back to the keyboard, up and down which he ran his nimble fingers.

"Now, the third verse goes something like this— I may not get 'em just right. I've pretty near forgot 'em. But tomorrow night I'll bring the music over and sing it right to yer," he ended, glancing across the shoulder of a grinning satellite to Horrigan.

The latter retreated to the committee table in the corner.

"Yer see how it is," he quavered wrathfully, as he sank into his chair. "Just like I told yer."

"The Swede for ours," said Dorgan between tight set teeth. "Let's appropriate twenty dollars for the job. That oughter be enough and more."

There was an extra chair at the executive committee's little corner table at the Three Point club the following evening when that august body was called to order by the grinning Mr. Horrigan.

In the extra chair sat a huge, sleepy-looking individual, very pink of cheek and very blond as to hair.

"Twenty dollars, it cost," Horrigan whispered to Mullen, who sat beside him. "Had to pay him in advance too. But I guess the word of this committee means somethin', from now on—wot? D'yer ever see such a whale?"

At that moment the door opened and Scrubby McGinnis, a roll of music under his arm, entered the smoke filled room.

Horrigan grinned more broadly, and then nudged Nilssen, who seemed in imminent anger of dropping into a doze.

"That's him," he whispered. "Yer to go up to him—see? Tell him you're the new member of the executive committee, and ask him for his back dues. If he don't come up wit' 'em—$6 it is—t'run him down the stairs—see?"

Mr. McGinnis had already opened his music and put it on the rack before him.

Nilssen stirred sleepily, blinked a couple of times and glanced in Scrubby's direction.

"That's him," Horrigan was repeating in the big cauliflower ear. "Go on, now. Earn yer money. Git to it!"

"Why haf you not told me it iss Scrubby McGinnis dot I t'row outs?" he demanded heavily. "Ay bane tank somebody else!"

"Wot difference does that make?" Horrigan demanded.

"All der difference in der world," growled Nilssen, looking accusingly at the chairman, as if he had just purchased a very choice gold brick of that grinning and expectant gentleman.

"Der job is worth der $10 more," Nilssen went on after another period of thoughtful staring. "You have not told me der man was Scrubby McGinnis. Ay bane der big fool to do it for him."

"Say, yer agreed to take twenty," Horrigan reminded him sharply.

"You haf not told me it iss Scrubby McGinnis," the other reiterated monotonously. "Der $10 more and Ay gets busy."

"Ten nothin', yer blamed grafter!" hissed Horrigan. "Yet got yer money, and in advance too. Now go do what yer agreed to."

"Ay guess I don't do it at all," he observed. "Ay guess Ay bane go home."

Horrigan grunted his disgust.

"Scared?" he sneered. "Aw, all right. Go on home, then. We can find some one else easy enough. But wait a minute," he went on as Nilssen reached for his hat and got cumbrously to his feet, all but upsetting the table in the process. "Just hand over that twenty before yer go."

"Ay guess I yoost go home," Nilssen chuckled, kicking a chair out of his way and starting for the door.

But Horrigan clutched at his coattails and held fast.

"Yer come up wit' that twenty, yer

THROUGH THE OPENING REELED THE PAIR.

big, graftin' stiff!" he muttered. "Yer come up wit' it—darned quick too!"

Mr. Nilssen put on an expression of pained and weary surprise.

His right hand was passed slowly behind him, and Mr. Horrigan landed in an awkward heap in a far corner.

But instantly the latter was up again and with a rapidly growing discoloration beneath his left eye sped toward the door, the knob of which Nilssen was just clutching in his big paw.

"Gimme back that money!" Horrigan fairly wailed.

The commotion rose above even McGinnis' bellowed song.

He stopped, swung about on the piano stool and then slipped over to the door.

"Wot's wrong here?" he demanded belligerently.

"Ay yoost go home," said the bored Mr. Nilssen.

"He's got $20 of my money he won't give up," said Horrigan.

"Aw, whyn't yer give it to him?" sneered McGinnis. "And, say, whyn't yer scrap wit' a fellow yer size and not a little runt like him?"

"Gimme it!" yelled Horrigan.

"Yer ain't goin' to give him his money?" demanded Scrubby.

"Make me," Nilssen invited.

"All right, you're on!" howled Scrubby delightedly as he drove out straight with his right.

The members of the Three Points club are not fully agreed as to what immediately took place.

And since most of them were scurrying madly about the room in their endeavors to get out of the way of the two whirling, clutching, smashing bodies, perhaps they are not in a position to give an adequate account of the affair.

Somehow, panting, grunting, uttering weird oaths, interspersed with short arm, but telling blows, the two swayed up against the door to the hallway without.

Crash! It split off its hinges, and through the opening reeled the pair. Followed the sound of rending banister supports and a prodigious bumping as they rolled down the stairs!

It was some few minutes later and the first of the members were beginning to crawl from their places of safety and take sad eyed account of the damage wrought when Scrubby McGinnis, battered and very ragged as to his usually immaculate garments, came panting into the room.

Calmly he picked up the overturned piano stool, straightened its badly bent supports, coolly adjusted it and sat down before the keyboard.

Then he reached into his torn vest pocket and flicked a small roll of bills across the room.

"Say, there's yer twenty plunks yer wanted, Horrigan," said he.

But Horrigan did not hear him.

Having rescued from the debris which littered the floor the remains of the treasurer's book, he was now busily engaged on the tattered and heel marked pages which had been the record of membership dues.

Rapidly he turned the pages, not only those containing the accounts of the last few months, but also the virgin lists of the months to come.

And as he turned the pages he paused opposite Scrubby McGinnis' name to industriously ply a rubber stamp.

The stamp bore the single word, "Paid."

LOCAL HARPIST HEARD IN SYRACUSE CONCERRT

Herman H. Randall was one of the soloists at Miss Bertha E. Becker's harp orchestra concert held last evening in Syracuse in the auditorium of the Y. M. C. A. Among others who played solos were Miss Violette Ferris, Miss Mary Louise Hogan, Miss Florence Hubbs, Miss Clover Haist of Syracuse and Misss Marion Hane of Herkimer.

Mr. Randall has been heard in a number of musicals in Fulton and his talent as a harpist is unquestioned.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, June 1.—Comment to the effect that the people of the State do not appear to take more than passive interest in the transpirings of the Constitutional Convention, is being heard and in some instances has caused delegates to give their version as to the cause of the attitude of the public complained of.

As a matter of fact, up to the present time, nothing has developed in connection with the Convention which has aroused more than casual comment upon the floor, for the reason that the rules governing the proceedings preclude debate. The delegates who have met each day, save Mondays and Saturdays, have never been in session more than two hours and usually but an hour suffices for the introduction of proposed amendments and the other light business of the day. The committee hearings have furnished the major portion of the material which has been furnished to the reading public.

Since the first day of the Convention when there was a large number of people in the Assembly Chamber to watch and listen to the proceedings, it cannot be said that there has been more than a handfull of visitors. Groups of strangers, ushered to the Assembly Chamber by the Capitol guides, have furnished the main audiences during the deliberations of the delegates.

"The remodeling of the State Constitution is a task at once of the highest importance and great magnitude," said a delegate in touching upon the indifference of the public as to what is going on to alter the document under which they live. "I attribute the lack of interest to the fact that at the present time unusual affairs are claiming the attention of the reading public. What the American people appear to like best is action, either The reason is that the way is being quietly prepared for the real issues which will come when the several committees favorably report out propositions.

"The debates which will arise this month no doubt will be masterly and when argument begins relative to the advisability or inadvisability of amending this or that article of the Constitution, the public will no longer maintain the indifferent attitude that it has fostered thus far."

June 11, the date set for the cessation of the presentation of proposed amendments, is less than two weeks away, therefore but a fortnight of passive attendance on the part of both delegates and citizens remains.

It is predicted that when the arguments upon the diverse propositions begin that the delegate will take as little heed of time as the legislators have been wont to do and that long sessions will be the order of the day. It is practically decided that no adjournment will be taken to Saratoga in August. This step has been advocated but found opposition both because of the added cost to the State and the fact that the Capitol is amply provided with facilities to transact the work of the delegates.

DINGMAN CAME BACK; LODGED IN JAIL

Ray Dingman may spend one year in the Oswego county jail as a result of not taking advantage of the clemency of Judge Wilson. Last week Dingman was found guilty of stealing a coat and a pair of shoes from the locker room at the Dilts Machine Works and, when arraigned before Judge Wilson, he promised to do better and asked for another chance.

The judge told him that he would be allowed to leave the county at once with the proviso that he should not return for one year. The judge told him he would be severely dealt with if he did return within the year.

Yesterday afternoon Dingman was seen on the West Side and the fact reported to the police. Officer Fox arrested the man and he is confined at present in the city jail. He will be given a hearing tomorrow morning.

NEW ERUPTION

G. J. Emeny Received Account of Volcano's Recent Disturbance

That a volcanic eruption on May 22 at Redding, Cal., was the cause of anxiety along the western coast is shown in a newspaper clipping sent by Mrs. H. C. Howe, of Eugene, Oregon, to her parents, Mr. and Mrs. G. J. Emeny of South 4th st. The article states the following:

Lassen peak burst into a new eruption late today, the greatest and most violent since the mountain awoke one year ago. Another flood of mud, triple the size of yesterday's swept down the mountainside with three steaming streams of lava in its wake. It covered the countryside like a tidal wave. Thirty-six families, nearly the whole population of Hat creek valley, were reported tonight to be fleeing for their lives before the avalanche of mud and boiling lava.

Fifteen rescue parties in automobiles were rushed from here to Cassel and Round Mountain to pick up the refugee women and children. Men mounted on horseback frantically rounded up cattle and livestock and endeavored to drive them to the highlands to escape theb road torrent of mud that submerged everything in its path.

Rivers of Mud and Lava

The eruption occurred at 4:30 p.m. Three almost simultaneous and titanic bursts of smoke and steam were followed by two lesser ones. A tremendous funnel-shaped cloud shot skyward to an estimated height of five miles and spread out in a heavy pall almost as wide. The big mountian, 10,000 feet high, was dwarfed to insignificant size.

When the immense volume of smoke and ashes had lifted above the mountain's crest four blackened paths each half a mile wide, were revealed on the western slope. The visible rivers of mud and lava were lost at the timber line.

By 5 o'clock the people of Hat Creek valley realized that the onswooping tides of Lassen's overflow was rushing upon them and they began a swift exodus. Word was received that a spray of volcanic ash had fallen at Imlay, Nev., 200 miles from the peak, and that the huge burst of smoke was seen at Sacramento from the cupola of the state capitol, 175 miles away. Automobile parties left from cities 100 miles away to witness the spectacle.

Redding was pitched into a frenzy of excitement. Fire bells tolled, people rushed from homes and buildings, streets were deserted in the business section, roofs were crowded and business was suspended until the activity of the peak subsided at 6 p.m.

Definite details of the destruction wrought were lacking, only meager news coming over telephone wires to Redding, which is 47 miles from the mountain. Reports came over the telephone from Montgomery Creek of the flight of families from Hat Creek valley and the enormous size of the mud flow.

Many Homes Laid Waste

Dozens of homes and the best farming and stock land of the valley lay directly in the channel of flow. By 6 o'clock the flood of mud and lava had reached and submerged the ranch of Wilbur Wilcox. Its people had escaped, driving their livestock before them.

Four distinct streams which poured over the crest of the peak united and converted Lassen's side, covered with a fresh blanket of snow this morning, into a blackened, desolate waste. The united streams poured on into Hat Creek valley, still choked and littered with the refuse of destructions wrought by the earlier eruptions.

Charles Opdyke and rFed Larkin, who set out early today, to investigate in the danger zone, were driven back by the gas-charged atmosphere. They were reported to have narrowly escaped being overcome.

All horses, wagons and automobiles in Montgomery Creek, Carbon and Cassel were impressed into service for relief of the refugees. All thought of property destruction was forgotten in the desire to save human life.

Lassen's crater is reported to have been entirely levelled. Formerly it had three distinct undulations, but these have been worn away and the crevises and dips filled by the continuous cataract of erupted substances

A report from a power station at Cow Creek said that one side of the volcano had been blown off and toppled into the lake near the base of the crater, the water displaced adding to the flood.

So far the volcanic bow has been confined to Hat Creek valley, and adjacent valleys are considered immune from danger unless the subterranean forces hurl rocks and lava over the natural barriers.

BAND CONCERT AT ELKS' HOME TONIGHT

The twice postponed band concert which will dedicate the new veranda of the Elks' home will positively be held tonight, according to announcements made this morning. Twice cold and rainy weather has made the postponement of the affair necessary, but with the warm sun of today promsing good weather, the Elks believe the affair will be held, at least they hope it will.

A strawberry and ice cream festival will be held in conjunction with the concert. Tables will be set upon the spacious lawns of the Elks' home and twenty pretty girls of the city have been asked to act as waitresses. 'Bud' Fisher, the chairman of the refreshment committee, had planned to serve about 150 people but if this weather continues there will be reservations for 200 or more.

The band will play twelve numbers under the direction of L. W. Richardson. Classical airs, snatches of operas and popular tunes that will set the crowd whistling will comprise the program.

It is rumored that "The Dansante" will be held in the Elks' ballroom after concert. The dance will be an invitation affair.

ENTERTAINED IN HONOR OF MISS MARION LOUCKS

On Saturday evening, May 29, Mrs. Wm. Sylvester entertained the Delta Alpha class of the First M. E. church and a few of their friends at a six o'clock dinner and miscellaneous shower given in honor of Miss Marion Loucks.

The home was beautifully decorated with blue and gold, the class colors. The color scheme was also carried out in the diningroom. Ribbons of blue and gold, falling from a large bell over the table, were attached to small yellow baskets, containing peanuts and rice. This gave a clue of what the bell "tolled." Dainty cards bearing the names of Marion Loucks and Arthur Sylvester showered from the bell.

A delicious repast was served, after which a ball of twine was handed to Miss Loucks with instructions to wind until the numerous useful and dainty gifts scattered about the house came to view.

Late in the evening the guests departed, returning a vote of thanks to their hostess for the pleasant evening spent by all.

I. O. O. F. MOCK TRIAL IS POSTPONED

The Mock Trial scheduled to be held at Odd Fellows hall tonight is postponed indefinitely, due to the death of a member, Francis W. George.

The date for the entertainment will be announced later.

EXAM. PAPERS ARE MADE SAFE

Little Possibility of Leaks Occurring From Careless Handling of Regents' Papers

The department at Albany is about ready to send out the thousands of small metal boxes, each one locked and sealed, containing the Regents' examination papers. Beginning with June 14 the examination papers will be submitted to more than 200,000 public school pupils in the state.

There are few persons, perhaps, who realize that from the time the questions are prepared by a committee appointed by the commissioner of education, until the question paper is distributed by the teacher to the pupil, scarcely more than ten people will have seen the thousands of papers. Every precaution possible is taken by the Education Department to safeguard the papers.

After the questions have been prepared by the assigned committee, one of its members is instructed personally to take them to the printing room in the basement of the education building. Once the papers enter the printing room, but two men see them until they are printed. No one is allowed in the printing room, and should someone unexpectedly open the printing room door and walk in he will find himself in a wire cage which is always locked from the inside. The windows in the printing room are also covered with iron bars.

This is only a small part of the way in which the State guards its examination papers. Each night all the type, proof and question papers are locked in a strong steel cell. After the questions have all been printed, they are then placed in small bundles.

When the education building was built, every thought was taken into consideration to safeguard the papers, one being a private elevator connecting the printing room in the basement with the Education Department on the third floor. The papers, after being printed, are placed on the private elevator by the printer in charge, and taken immediately to the third floor.

These and similar precautions are taken to insure secrecy and prevent leakage. Since the new regulations became effective there have been practically no leaks of questions. Prior to that time it is believed hundreds of students had previous information as to questions.

You can get Black's baked products at the right hour for meals. They are at your grocer's, fresh every afternoon. adv.

GIVEN KERN

Redfield Had To Suffer Because of the Sins of the Terra Haute Gang

Indianapolis, May 30.—Indiana, always a pivotal state, is an especial prize in the campaign of next year because a successor must be chosen to Senator Kern. The Senator, naturally, wants to succeed himself because the senatorship is the first job he has managed to attain in many years' trying. He twice ran for the governorship and tried twice to be senator before he landed, and the manner in which he claims Shively "jockeyed" him out of the senatorship in 1909, rankles in Kern's mind. Shively was re-elected—by the people, who have never shwon such confidence in Kern—and Kern is especially anxious that sh shall not "die a yearling" as a senator.

There is real occasion for Kern's solicitude. The Republicans of Indiana areu nited and aggressive as they have not been since 1904, and all over the state this spring there have been a series of Republican mass meetings which have stirred the party enthusiasm to a high degree.

To offset this, Kern conceived the notion of a whirlwind succession of Democratic "jollifications"—perhaps to celebrate the fact that their prospective candidate for governor has just been sent to jail for a term of years because of the Terre Haute election scandals—and to begin with a great meeting here, at which Secretary Redfield, the commercial wizard of the Cabinet, should be the principal speaker.

This meetin gwas pulled off as per schedule. It was planned for on a scale commensurate with a state convention. The hall was elaborately decorated and the stage was built out so that the speaker would be almost in the middle of the great crowd that was confidently expected to turn out to hear Redfield. Invitations had been sent to every commercial club or business men's organization in Indiana, asking them to send representatives to this meeting; the Democratic Chairman had sent out letters to all the Democratic congressmen pleading with them to send in their constituents to this gathering; and there were ample evidences that orders had been issued to postmasters and other office holders to be on the job. In spite of all these efforts to drum up a crowd, when Redfield arose to speak one-third of the lower floor was vacant, two or three dozen people were in the galleries, and the stage, on which there were seats for hundreds, was blank enough to chill the enthusiasm of the Democratic politicians who had decided to do something to offset the effect of the series of meetings that have been held throughout the state by the Republicans, the attendance at which has been little short of remarkable.

The Democratic leaders who advised against responding to the pleas of Kern's followers to hold a state wide "rally" are now assuming a "I-told-you-so" attitude. Those who wondered why John Holtzman, anti-Taggart leader, was permitted to act as chairman of this meeting can now see why it was that the Taggart crowd sidestepped carrying the burden. It is said that the Taggart crowd realized that the temper of the people was such that it would be foolish to undertake to hold a big Democratic demonstration at this time.

Republican leaders have known for months that the lethargy in the rank and file of the Democratic party in Indiana was so pronounced that it would be impossible to secure any great response to appeals from Democratic politicians to hold banquets, love feasts or demonstrations of any kind. The Redfield meeting would probably never have been held if the advice of the shrewdest Democratic leaders had been followed, but the close personal support of Kern became so thoroughly panic stricken over the unusual and remarkable activity of Republicans in every section of the state, that they decided they would have to do something heroic. The Redfield meeting was the result.

PETER RABY GETS POWER-HOUSE CONTRACT

ePter Roby, of Oswego, who built the parochial schoolhouse in this city, has secured a contract for building the big power-house of the Diamond Match Company in Oswego. Work is to start at once and it is hoped to have the plant in operation late this summer. While no announcement has been made it is reported that the complete installation will cost well over $200,000 and the plant will be of sufficient capacity to provide for the future growth of the factory, which is considered a certainty.

The building will be 80x88 feet and will be constructed of brick, concrete and steel. The chimney will rise to a height of 235 feet. There will be two 1000 K. W. turbo-generators installed and one or two boilers. There will be modern coal handling apparatus and automatic stokers, which will do away with all of the smoke. The pumps will be furnished by the Kingsford Foundry and Machine Shop, of Oswego.

Under the new plan there will be individual motors for either each machine or groups of machines. About 200 motors will be used altogether.

Used International Truck, $175.00, for quick sale. VanWagenen, Inc. adv

PAVING IN FIRST ST. WILL SOON BEGIN

Thhe contract for the paving of First st. between Rochester st. and Broadway will be awarded about the middle of this month, according to an announcement by Superintendent Rumsey of the Boardr of Public Works. The Public Works department is anxious to see the work begin as the vehicles which pass over the section now carry mud and dirt into the bsuiness district and make it hard to keep the down-town streets clean.

Superintendent Ramsey expressed some concern about the canal bridge and the traffic conditions at that point. He said that the contractor is maintaining traffic there as he agreed to, but that the narrow section of the bridge still remaining is not large enough for the usual traffic and some fast automobile driver may forget to turn sharply as the cars are obliged to do at present when rounding into Oneida st. from the bridge. There has been a great deal of congestion at the corner and some consider a traffic officer necessary at that point.

Contractor Alderman is now waiting for S. Rosoff, in charge of the filling of the canal, to complete the fill on the north end of the bridge. When that work is finished the tracks will be moved over to the north end and the south end of the bridge will be removed.

MEMORIAL DAY WAS PERFECT DAY HERE

Under smiling skies the boys in blue led in Memorial services for their departed comrades.

Fully two thousand persons gathered in the park and vicinity to observe the services at the soldiers' monument.

The line of parade formed at City Hall at 2:30 o'clock and about 2.000 men and boys wer in line. William Ellis acted as grand marshal. The organizations represented were the Schenck Post, G. A. R.; Sons of Veterans; the B. P. O. Elks; the Red Men; the Odd Fellows; the United Americans Mechanics; the Modern Woodmen of America; the Maccabees and Boy Scouts.

The local bank with its splendid service lent inspiration to the ceremonies, and the generous contribution of flowers for decking the graves of soldiers was suggestive of the revering memory held for the boys who fought for our country.

FRANCIS W. GEORGE DIED THIS NOON

Francis W. George, 57, died this noon at his home in South 2d st.

Mr. George had been ill for a short time with pneumonia. He came to this city at the age of 16 years from Kingston, Canada, and shortly after engaged in tailoring which trade he had continued to follow.

Mr. George was active in lodge work. He was past grand of the Kingston I.O.O.F. lodge, and a prominent member of the local lodge F. and A. M.

Surviving is the widow, Mrs. Harriett George. Funeral services will be held Friday afternoon at 3 o'clock in accordance with the Masonic ritual.

AN ENGAGEMENT

Mr. and Mrs. John Wesley Nary, of New York city, announce the engagement of their daughter, Stella Francesca, to Allan Stephens Foster, also of New York. Mr. Foster is a son of Mr. and Mrs. L. C. Foster of this city. The wedding will take place some time during the summer.

POLICE VACATIONS

The vacation time of the police foce wil be decided upon at the next meeting of the Fire and Police Board. The men are anxiously awaiting the time when they will spend ten days out of the harness and several members of the force have already planned for their furloughs.

LAST MISSIONARY TEA OF THE SEASON

The Woman's Home Missionary Society of the Presbyterian church will serve tea in the parlors of the church Wednesday evening at 6:15 o'clock. Miss Miller's committee will have charge of the supper. This is the last tea of the season and all are most cordially invited to be present.

ELEVEN NATIONS IN WAR; THREE MORE LIKELY.

Eleven nations are now involved in the great European conflict. The lineup is as follows;

Russia, France, Great Britain, Belgium, Servia, Montenegro, Japan, Italy.	Germany, Austria, Hungary, Turkey.

Three others are expected to go in almost immediately. These are Roumania, Bulgaria and Greece.

Before the entrance of Italy the cost of the war in actual expenditure was estimated by Captain Edmond Thery, a widely known French economist, at $2,000,000 an hour every hour of the day and night.

MORE THAN $1,965 EACH IS WEALTH OF AMERICA

Every Man, Woman and Child Accredited With That Sum In 1912.

Every man, woman and child in the United States in 1912 is accredited with $1,965 and the entire nation with a grand total of $187,739,000,000 in a bulletin by the census bureau on the national wealth in that year. Today the total is more.

The report shows that the country is getting richer and that since 1850 each person is six times richer than be was in 1850, or, rather, six times richer than his parents or grandparents. For in 1850 the total wealth of the nation was $7,136,000,000, or $308 per capita. The wealth of the nation in 1912 was twenty-five times greater than in 1850.

While New York heads the list with the greatest wealth, Nevada stands at the top in the per capita allotment of wealth.

New York's wealth in 1912 is given as $25,011,000,000, with Illinois and Pennsylvania running neck and neck for second place with $15,484,000,000 and $15,458,000,000 respectively. Nevada has a per capita wealth of $4,865, with Iowa second and North Dakota third.

The latest published estimates of the wealth of foreign countries show $108,280,000,000 for the British empire in 1903, of which amount $72,997,000,000 was credited to the United Kingdom. The estimate for the United States in 1904 was $107,104,000,000. The wealth of Germany in 1908 was estimated at $77,864,000,000. Comparable estimates are not available for other nations.

PRESIDENT PRAISES FLEET.

In Message to Admiral Fletcher, He Urges Increase of Navy.

On his return to the White House after the review of the navy President Wilson sent the following message to Admiral Frank F. Fletcher, commander of the fleet.

"I was greatly struck by the appearance of the fleet and the quiet efficiency shown by the officers and men, as I am sure every one must have been who had the pleasure of seeing it assembled at New York.

"There could have been no more interesting verification of Admiral Dewey's statement that the navy was never in a better or more efficient condition and that the country has every reason not only to be proud of it, but every reason to wish to go forward in its policy of steadily adding to its strength and equipment."

FOUR HURT AS BRIDGE AT AUBURN FALLS

Albany, N. Y.—Four persons were injured last night when the Island Park bridge over the Owasco river collapsed while the crowds of holiday visitors were returning to Auburn.

A dozen persons were thrown into the river, but all were rescued by men from a boat livery nearby.

"A HERALD OF PROGRESS"

IN THE WORLD OF SPORT

Captain T. L. Huston, Part Owner of the Yanks.

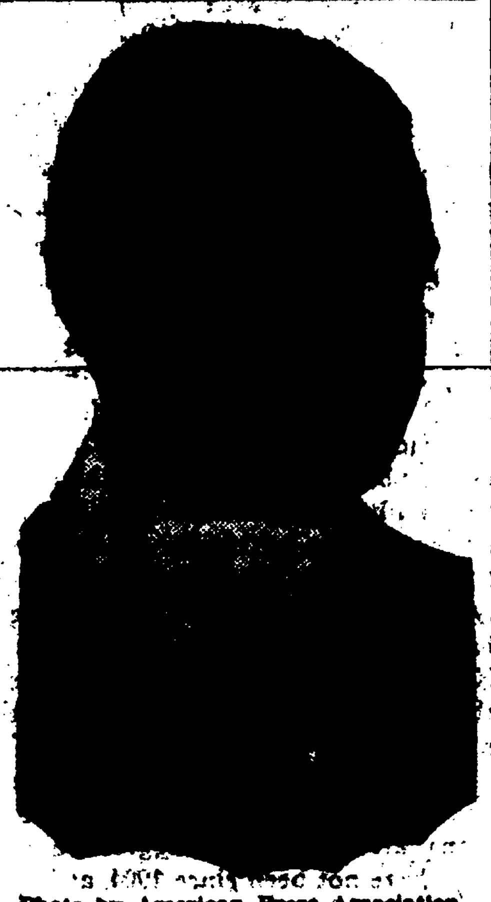

Photo by American Press Association.

Captain Thomas L. Huston, who, with Colonel Jacob Ruppert, owns the New York American Baseball club, is forty-seven years old and is an engineer and contractor by profession. He got his military title in the Spanish-American war and since that time has won fame and fortune dredging the more important harbors of Cuba. Captain Huston has always been an enthusiastic baseball fan and since acquiring wealth has desired to become owner of a big league team. It was he who made the mysterious bid for the Chicago Cubs last summer and for awhile had an option on them. He would not take the club, however, unless he could get John McGraw to manage it, and, finding that could not be arranged, he gave up the project. Last winter he and Colonel Ruppert bought the New York Yanks outright.

Mile a Minute Hydroplane.

Commodore James A. Pugh, the millionaire Chicago sportsman, has started construction of a twenty foot hydroplane into which he will crowd 2,000 horse power.

The new boat, to be christened Disturber V., will be, by all odds, the most heavily powered twenty foot hydroplane in the world, and Commodore Pugh's experiments are watched by speedboat men with immense interest. The new boat is designed by Ned Simmons of Chicago, who planned the Disturber IV., which went to England last year and was deprived of the opportunity of lifting the Harmsworth international trophy by the outbreak of the war, which caused the cancellation of the race. He expects the new Disturber to turn sixty miles per hour. The twenty footer has twenty-four cylinders.

Kling's Foresight.

Johnny Kling when he was a major league baseball catcher believed that idleness did not pay. Consequently the ex-Cub today is earning more money than he did when he was a member of the world's championship Chicago club. He is a billiard expert and in addition owns a handsome billiard room in Kansas City. And all this came about because he refused to be idle.

"I found that I liked billiards when I was a young man and devoted my spare time to that game. I did not do it merely as recreation, but with the idea that I would learn the game and the business and devote my time to it in the off season and when I quit baseball. Billiards is a scientific pastime, requiring a good eye and steady nerve. That is ideal recreation for a ball player."

A New Golf Marvel.

Harry K. B. Davis of San Francisco, who surprised the golfing world by beating a field including such prominent players as "Chick" Evans, Heinrich Schmidt, H. Chandler Egan and others, was never heard of in golf circles until late last summer, when his first real stunt was the defeat of Jack Neville. Davis is originally of Colorado Springs, having gone to Portland, Ore., from his home town and from there to San Francisco last fall. He gained national prominence by his performances in the tournament held under the auspices of the Panama-Pacific exposition, April 19-25.

The Nearest He Ever Came to It.

"Colonel," she asked, "have you ever been up in a balloon?"

"No," he answered, "but I got to talking art to a Boston lady once, and she had me away up in the air inside of two minutes."—Exchange.

YOUR FAULTS.

You will find it less easy to uproot faults than to choke them by gaining virtues. Do not think of your faults, still less of others' faults. In every person who comes near you look for what is good and strong. Honor that, rejoice in it and, as you can, try to imitate it and your faults will drop off, like dead leaves, when their time comes.—Ruskin.

A GREAT SHOWING

Those New York Yankees continue to do the unexpected and are playing great ball. Let that team continue to show its present pace, and the chances are that the new owners will get back the first year a great part of the money they paid for the club.

That New York club will draw splendidly at home and on the road, but in New York is where it will get the best returns, for with the Giants away to a bad start the fans of the big city are sure to turn to the Yankees because they are playing on the Polo grounds.

Bill Donovan already has made a success of his regime if he does not do anything more. He has his players hustling and got them away to a flying start. He has been responsible for the existence of more interest in the American league team in New York than ever before.

PHONOGRAPH FOR ATHLETES.

Indiana University Coach Adds Novel Features to Training.

In addition to moving pictures Coach C. C. Childs of the football and track squads of Indiana university has adopted the phonograph as an aid in developing athletes. The coach has had a phonograph installed in the track oval and the football and track men are to be put through their paces to the accompaniment of the latest dance music. The music, it is said, is of great aid to the hurdlers in regulating their stride.

Coach Childs says he has a number of other innovations which he will introduce later as the season advances. He has been using moving pictures of football games of last season to illustrate the methods of attack and defense as the first course in spring training.

HERZOG VOWS TO BE GOOD.

Cincinnati's Leader Intends to Let Umpires Rule From Now On.

Manager Charley Herzog of the Cincinnati Nationals says he is through umpire baiting. The Reds' pilot recently had a fist fight with Umpire Rigler in St. Louis and was set down for five days by President Tener. In talking about the affair recently Herzog said:

"I had made up my mind when the season started out not to be put out of

Photo by American Press Association.

MANAGER CHARLEY HERZOG OF CINCINNATI.

a game this year. The recent incident was quite out of the ordinary and was due to Umpire Hart not seeing the play, which should have been decided by him. I was justified in questioning Rigler's decision, under the circumstances, but all I get is the worst of it. I will have no more trouble with the umpires and will be in every game from now on unless kept out by injury."

KRAMER VETERAN CHAMPION.

World's Greatest Cyclist Has Held Honors For Fifteen Years.

Since the passing of Jack Johnson, Frank Kramer, the world's champion cyclist, is the only one of the old champions now remaining in any line of sport. Kramer is now upon his fifteenth year in the bike game, and if his present condition is any criterion he will retain his title another year.

Kramer is without doubt the cleanest living athlete in the world, and it will be a long time before old Father Times grabs the East Orange, N. J., boy.

Kramer is thirty-five years of age and has been riding a bicycle for seventeen years. Dissipation of any kind is a thing not in Kramer's repertoire.

Numerous foreign champions have been imported to this country to take Kramer's measure, but all have failed. This year Francisco Verri and Caesar Moretti of Italy, along with Therwald Ellegard, the Danish champion, will attempt to wrest the honors of the cycling championship from the American rider.

Monster Pumps.

The great pumps made to pump out Lake Haarlem, in Holland, pumped 100,000 tons daily for eleven years.

1915 Overland Demonstrator, Electrict Starter and lights, $750.00. Van Wagenen, Inc. adv

Paint Not Impermeable.

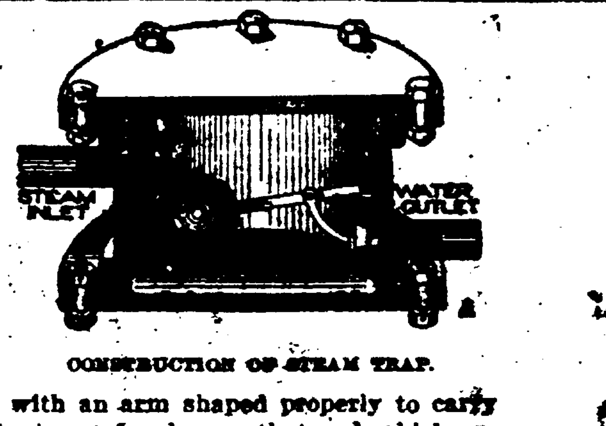
A study of paint films has shown that some are much better excluders or water shedders than others. It has been shown that linseed oil films are markedly porous, with the result that water soon penetrates to the surface below and, if it is of iron, sets up corrosion. Most dried paint films are porous, although this porosity may be lessened or prevented by the use of varnish, thus producing a film which is a good excluder. By the use of finely ground pigments the size and number of pores in a film may be very materially reduced, but even then the film is not necessarily a water shedder. Certain pigments seem to convey a peculiar property to a film in that it becomes wet with difficulty or not at all. Water rapidly evaporates or runs off from it and apparently none is retained upon the surface or in the pores.—Engineering Magazine.

Forcing Oil Into a Bearing.

Sometimes when a bearing becomes heated and requires oil it will be found that the oil will not flow down in the oil hole. Either the hole is clogged with dirt or the heat may cause the air to rise and prevent the oil from entering. Where a wire cannot be used effectively, the following remedy, although it is not infallible, is almost sure to make the oil reach the bearing: Fill the hole with oil and quickly place the thumb over it to prevent the air from escaping, and if the oil cup does not leak, the heated air inside will rise above the oil, and in two or three minutes it will be forced into the bearing, even if it has to pass considerable dirt. When a bearing cannot be reached in this way, and when light oils, such as kerosene, are ineffective, try placing a little mercury in the hole and allow it to remain a few minutes, then use oil.—Popular Mechanics.

Easily Made Steam Trap.

An inexpensive steam trap can be constructed from a piece of eight inch pipe six or eight inches long, two flanged heads and a float, says Popular Mechanics. The pipe is threaded for the flanges, which are to hold the heads after they are prepared. One side of the pipe is drilled near one edge to receive a pipe from the lowest part of the steam system. The other side is fitted with a ball float and lever hinged near its center. The float lever is fitted



CONSTRUCTION OF STEAM TRAP.

with an arm shaped properly to carry a tapered valve on that end which enters the outlet pipe.

The action of the trap is as follows: The water from the condensation in the steam system falls to the lowest part and enters the trap. When the level has risen sufficiently to lift the ball float the valve is opened and the steam pressure forces the water out. The lowering of the water in the trap allows the ball float to close the opening.

Clock Repairing.

When the ordinary clock has served its usefulness and is apparently worn out, the jeweler's price to overhaul it frequently amounts to almost as much as the original purchase price, says Popular Mechanics. One weak place in the clock is the escapement wheel. The points soon wear down, thereby producing a greater escapement and pendulum movement, resulting in an increased strain and wear of the clock. If the tips of the teeth on the wheel are bent up slightly with a pair of pliers, the swing of the pendulum will be reduced, thereby increasing the life of the clock. Many of the grandfather's clocks can be put in order in this manner so as to serve as a timepiece as well as a cherished ornament.

Electric Air Brake.

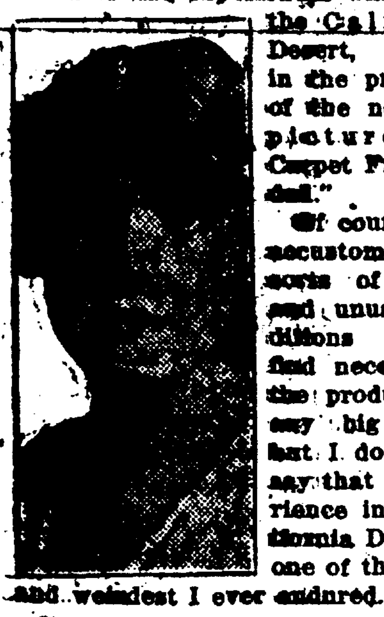
Elecrtic pneumatic brakes are soon to displace the air brakes used on the passenger trains of the Pennsylvania railroad, says the Scientific American. This form of brake has been found necessary because of the weight of trains made up of all steel cars. In long trains the shock and surging accompanying the application of the brakes has proved very objectionable indeed. In a twelve car train it takes eight seconds for the full braking force to be felt at the last car. With the electro pneumatic brake the braking power will be exerted at the same instant on all the cars, and within two seconds after the application of the brakes the whole braking force will be exerted throughout the train.

Dripless Skylight Glass.

The problem of eliminating the drip that forms on skylights from the condensation of the moisture in the air has apparently been solved in a new type of glass that has just been placed on the market. In this glass the under surface is formed in webs or channels running with the pitch of the roof and so shaped as to give the greatest degree of capillary attraction. The result is that all condensation is held and is gradually conducted to a gutter at the lower edge of the glass sheet. This glass is said to be effective in preventing drip on a pitch as low as 10 degrees.

Kathlyn Williams' Experiences In a Desert Sand Storm and How She Learned to Ride a Camel

By KATHLYN WILLIAMS.



I am very glad to write about my adventures and experiences while out in the California Desert, working in the production of the new Selig picture — "The Carpet From Bagdad."

Of course, I am accustomed to all sorts of strange and unusual conditions which I find necessary in the production of any big picture, but I do want to say that my experience in the California Desert was one of the wildest and weirdest I ever endured.

You, who have read the novel of Harold MacGrath, will recall that the principal scenes in "The Carpet From Bagdad" are laid in the great Arabian Desert, and some of the principal characters are Arabs; so Mr. Colin Campbell, in making his arrangements for appropriate properties, bought a lot of real and most interesting Arabian trappings, including those wonderfully striped tents, bales and bales of beautiful rugs, camel harness, those peculiar Arab guns so beautifully inlaid with mother-of-pearl and studded with jewels, great water jars, etc. The garments made in Arabia especially for those who were to participate in "The Carpet From Bagdad" were supplied in ample quantities, so that we could look the part and be presented to the world as the genuine article.

From the big Selig Jungle-Zoo out at Eastlake, in Los Angeles, Mr. Campbell made a requisition for about twenty camels. You can just imagine a man writing a requisition on a slip of paper just as though it were for twenty papers of pins, or twenty ar-

ticles of any kind. These camels, which by the way are the homeliest brutes I ever hope to see, were outfitted in exactly the same manner as though they were to make a journey across the real Arabian Desert.

I guess that there is really very little difference in the Arabian Desert and our own American Desert. At any rate the Arabian Desert cannot be any worse. There are miles and miles of soft sand into which the feet sink and when there is even the slightest wind, the clouds of sand circulate about moving figures and almost suffocate one.

We moved out into the desert with our caravan completely equipped as though we were going to cross a real big desert in earnest. There were the strings of camels with their long, scrawny necks bedizened with tinkling bells and made gay by strips and streamers of gay colored cloths. We had real Arabs to handle the camels and those who rode on horseback had genuine Arab [illegible] of the very finest [illegible].

This was really a business trip and instructions were given that no trunks or clothing, except that suitable for the pictures, were to be taken along. No one was permitted to carry any excess baggage. In fact, all members of the company except those of us who took the part of Europeans, were instructed to take along nothing except the Arabian garments in order that they might learn to wear them in a natural way and more effectively portray the part. Of course, I kept my part throughout, as a European girl, while Miss Eugenie Besserer, who played the part of my mother, also took the part throughout of a European.

Arabian Nights Tale.

It looked like a tale out of the Arabian Nights when our caravan started across the desert. The piercing rays of the sun fell upon us without mercy as the day was hot, but we all enveloped our heads and faces in the voluminous folds of Arab cloths, so that the sifting sand dust did not bother us as much as we expected.

Following behind the strictly oriental caravan came the up-to-date American parade, consisting of huge wagons, many of which bore enormous tanks containing thousands of gallons of water. This was a special provision made at the instructions of Mr. Selig, and for which we were all grateful before another day had passed. These enormous wagons were hauled by a number of pairs of horses—sixteen or twenty—I do not remember which. They were equipped with broad tires so that the wheels did not sink deeply into the sand. They were especially constructed for use on the desert. Behind the big tank wagons came other wagons loaded with tents, provisions, cooking utensils and the entire camp outfit.

Through the thoughtfulness of Mr. Selig our provisions were not limited to necessities. There were countless additions to the ordinary larder, and there was one huge wagon loaded with ice. When we camped for the night, our tents were pitched on a small oasis where there was a spring of brackish water.

Some pictures were taken at our first camp to be used in the production, but everybody was glad to keep inside the tents and bask in the cooling breeze created by electric fans which were run by small motors attached to storage batteries. I suppose if some old Arab sheik could have stumbled in on us with the expectation of finding a real desert camp, he would have been shocked and horrified to find how comfortable and pleasant a desert camp can be made with the use of modern appliances and conveniences.

The next morning I was invited to ride one of the camels. I proceeded to do this, and it was not my first experience, but a short session was amply sufficient. I was very glad to get back into our big, roomy automobile and give somebody else the privilege of riding the ungainly brute that plunged and shook, so that it was no sinecure to remain on his back.

Life in the desert does not amount to much. Occasionally one of the men would dash off to one side of a road and shoot the head off a rattle-snake. At various points along the silent trail were the bleaching bones of oxen, horses, burros and other animals. They explained to me that the bones of human beings who had died on the trail had been given burial. That was the reason we did not see any human skeletons; but we were told that many persons had met their death along the gruesome desert path.

It was in the afternoon of the second day that the guides leading the caravan dashed back along the line of camels, automobiles and wagons and announced that a sand-storm was approaching, and that we should get everything in readiness for it. Then there was a great hustling and bustling about. The camels were ordered to kneel and Arab riders and drivers buried themselves underneath the folds of their spacious burnouses, so that the sand could cover them completely without injury.

Storm Approaches.

Those of us in the automobiles huddled in our seats and were covered with large cloths which completely enveloped machine and occupant. They did not cover us up until the last minute, so that we could see the storm approaching. We could see pillars of whirling and twisting sand, each surrounded by a nimbus of dust through which the sun shot its rays making various tints all of which were sad and lifeless. It is really a difficult thing, I suppose, to get much beauty out of a dust cloud. The storm swept nearer and nearer. The camels grumbled but laid their long necks straight on the ground ready to meet the storm.

As soon as the dust began to swirl about us, we were enveloped in the huge cloths covering the automobile, and we remained under cover until the storm had swept past. Luckily, it was not a severe storm. It lasted only about ten minutes, and we could see it swirling and twisting in the distance as it passed on over the desert.

The men of the party rode here and there always keeping within sight of the caravan and they brought back for our inspection those ugly little horned toads, an amazing collection of lizards, while they reported the conquest of several rattle-snakes.

We passed an old miner—a typical '49er, dressed in a gray woolen shirt, corduroy trousers and long heavy boots. He was camped by the wayside, his only companion being a tiny burro, dressed in an enormous pack saddle. The old man had his pick and shovel and gold-pan strapped to the pack saddle and evidently had hopes of finding some place to use them. Our party greeted him jovially and wished him good luck, but he sat by his little camp fire unmoved and with no more expression on his features than his companion, the burro.

In the desert, one day is just about the same as another day, while the nights offer no change from the monotony. Of course, we had a big tent which we used as a drawing-room and there in the evening, we sat about—with music sometimes, giving a bridge party, and enjoying ourselves in various ways. Several in the party had good voices, so we had some singing of excellent quality.

One thing we were always careful about, was to make a thorough examination of our bedding before retiring for the night. More than one member of the party gave vent to ejaculations of horror upon the discovery of a scorpion or centipede, which evidently thought the bed had been especially prepared for his comfort.

Day by day the picture making went on. There was mad riding on horseback and camelback. There was shooting, and I will never forget the day of the fierce combat which was so realistic that we all shuddered, and felt that we had witnessed a tragedy, indeed. Of course, during the action of the piece, other fights were pictured, but the big fight in the desert, is surely one that will fascinate everyone who sees the picture.

One particular thing about our desert journey, at least the fact was peculiar to us, occidentals, was the close application of the Arabs and other Mohammedans in our train, to their religious duties. They had a muezzin, who was also a whirling dervish, and he called the devotees of Mohammed to prayers as strictly as though they were in their own home country.

Enjoyable Feature.

An exceptionally enjoyable feature in connection with our trip, was the privilege of taking a bath—something never before done in the desert. Mr. Selig had an eye to the comfort of the members of his troupe, and instructed that arrangements should be made for a plentiful supply of water to be used for bathing purposes. I don't suppose that ever before in the history of a desert caravan, were daily baths indulged in by members of a party. I don't mean to intimate that everybody took baths, but some of us did, and it made life less difficult under the dreadful and mournful surroundings.

It took us a long time in the desert, and the work was hard, but we knew that it must be accomplished and we all did our best. So that when you see "The Carpet From Bagdad" produced in a great Selig photoplay, those of you who read this article, will recall the substance of my writing. We did not move about much and we were fairly comfortable during the weeks spent in the desert.

I can realize how a man, alone amid the trackless waste of sands, can become hopeless and helpless especially when without water. I will never forget one day when we had ridden several miles from camp, that we discovered that the canteens had been left behind. There was no water to drink. Of course, we were without water for only a few hours, but the very fact that we could not have it when we wanted it, made us desire it all the more.

I have experienced more pleasant occasions than our trip through the California Desert, and I also have experienced occasions that were more unpleasant. The desert traveler equipped with primitive conveniences, and with limited supplies of food and water, naturally finds such a trip a hardship, but we, equipped with every modern convenience and supplied with all sorts of luxuries, really felt no great inconvenience. But it is really a wonderfully weird experience to live even for a short time in the desert.

THE STEAM ENGINE

Its History a Romance of Philosophy and Mechanics.

UNCLE SAM'S FINE EXHIBIT.

The National Museum at Washington Shows the First Crude Machines Made as Well as Originals and Models of the First Locomotives.

Probably no museum collection in the world better illustrates the development of the steam engine, particularly the locomotive, than the exhibit of the United States National museum at Washington, which includes two of the earliest original locomotives and numerous models and accessories.

The history of the steam engine is a materialistic romance without parallel in the record of human achievements. It covers the stupendous and persistent efforts of many early philosophers and mechanics who found steam a mysterious uncontrollable force and left it a comprehensible controllable factor of public service.

No one knows how long after it was observed that by holding down the lid of a kettle of boiling liquid a certain force was created, due to the compression of the steam, before any use was attempted with this newly discovered force. It is certain, however, that a sort of steam engine was exhibited in Alexandria, Egypt, about 200 years before our era began, and it was described in a work on pneumatics by Hero of Alexandria, written between 150 and 130 B. C. This machine was a rotary affair, more theoretical than practical, as were many of the results of philosophy in those days. A reconstruction of this engine in model form is in the museum exhibits.

Nothing more is to be found concerning the steam engine for centuries, a fact which is no doubt due to the lack of interest in anything which did not have to do with war or warlike implements. A book published in Rome in 1629 gives a description of Giovanni Branca's crude steam engine, showing it to have been an elementary steam turbine, with the sole defect that it lacked any appliances for making the steam follow the vanes, or buckets, of the revolving wheel, so that more of its energy might have been converted into useful work. One author in a treatise on locomotives claims that had some genius improved upon this early device the reciprocating engine would probably never have been invented, but that we would have had the advantage of our modern turbines much sooner.

The museum possesses a model of a very early machine designed by Sir Isaac Newton in [illegible] which was propelled by a jet of steam projected backward against the air and a model of Denis Papin's invention of about the same time. The investigations of Savery and Papin and the successful experimental engines of Thomas Newcomen in 1705 with his piston and cylinder soon followed. Newcomen's ideas were improved by James Watt in 1769, who also introduced the high pressure engines, the condenser and later the double acting engine. The development of the engine was advanced by Cugnot, Evans, Hornblower and Murdoch. A model of the latter's engine is on display in the museum.

As the result of a wager made by a resident of Merthyr Tydfil, an important iron town of South Wales, that he could convey a load of iron nine miles by the power of steam alone Richard Trevithick made the first engine to run on rails in 1803 and won the wager for his employer the next year. Trevithick, it has been claimed, copied the stationary engine built in 1800 by Oliver Evans, an American, who was later ingenious enough to attach wheels to a scow and propel it by steam through the streets of Philadelphia in 1804. This curious creation, called the Oruktor Amphibolis, was the first motorcar to run on American soil.

A model of Trevithick's engine is to be seen in the National museum, as is also the model of the engine employed by John Stevens in 1825 and his original tubular boiler. Other models illustrate nearly all the types which began to put in their appearance soon after 1826, when the Stourbridge Lion was built in England and shipped to America, where it was the first engine to run on full sized rails. The museum possesses not only the model of this historic engine, but the original engine itself. The other original full sized locomotive to be seen in the museum is the John Bull, built by George Stephenson & Sons of England and shipped to America for use in 1831 on the Camden and Amboy railroad. It is interesting to recall that this old relic of early railroading in America made a round trip under its own steam in 1893 from New York to Chicago, where it was exhibited at the World's Columbian exposition.

Among the models of early and historic locomotives are George Stephenson's Rocket, which was built in 1829; the B. and O. engine Tom Thumb, built by Peter Cooper in 1829; the grasshopper type engine Arabian of 1831; the Best Friend, used in 1830-1; Baldwin's Old Ironsides, constructed in 1832; the Sandusky, built in 1837, and models of engines made by Asa Whitney in 1840 and G. A. Nicholls in 1848. Besides the two locomotives and the numerous engine models, there are in the exhibit coach and car models, sections of rails, spikes, wheels and models and parts of valves, pistons and other early accessories pertaining to locomotives and railroads.

"Put Her There, Bill!"

"WE are mighty glad to have you country folks get interested in our Chautauqua. Bring the whole family and have a good time with us."

The business men of this town are boosting for the Chautauqua. The talent to appear on the programs is Redpath quality and bound to please you immensely.

There will be seven great days. Each day will be provided with special music and no two days alike. Big speakers and big entertainers are coming.

The boosters of this town have contracted for a limited number of season tickets which they will sell, while they last, for 50 cents less than they will be priced at the gate.

Here is a big chance for a royal good time that will leave you wiser, richer and happier when it is all over.

Now let town and country pull together for a first class success. It is the best opportunity ever offered you for a genuine joy festival.

FAVORS STUDENT CAMPS.

Secretary Garrison Will Ask Congress For Appropriations.

Washington.—Secretary of War Garrison has not abandoned plans for the establishment of camps for the military instruction of college and university students.

Comptroller of the Treasury Downey has ruled that there was no warrant for the expenditure of government funds for regular officers and troops at such camps. A reconsideration has been asked by Secretary Garrison, and if this is unfavorable the secretary will urge legislation by congress authorizing appropriations.

Gallipoli.

Gallipoli is the door through which in 1356 the Turks first entered into their European possessions. And the entrance came about in a surprising manner. In that year an earthquake shattered all the cities of Thrace and overthrew the walls of Gallipoli. The inhabitants fled, while the Turks, for whom earthquakes had no terror, crossed the Hellespont and marched upon the deserted city. Emperor Cantacuzenus protested, but Sultan Orkhan calmly replied that "Providence had opened a way to his troops, and he could not disregard so clear an indication of divine interposition." Thus was taken the first plunge that kept the near east bathed in blood for centuries. —London Standard.

Cornmeal For the Feet.

Men as well as women are finding cornmeal very beneficial to aching and sore feet. Simply soak the feet in warm water into which a handful of meal has been thrown, and the meal when rubbed over the feet opens up the pores in such a manner as to stop the very disagreeable annoyance of painful feet. It is far superior to salt baths for the feet.—Philadelphia North American.

Not Caused by the Hat.

"How do you like my hat?" she asked.

"Why, to tell the truth," replied her dearest friend frankly, "I don't like the effect very well. It seems to me it gives you a rather cross look."

"Oh, that isn't the hat," she responded cheerfully.

"No?"

"Oh, not at all. That comes entirely from the fact that I have just seen my husband and he had just seen the bill."—Chicago Post.

Roumanian.

"Roumanian" really means "Romanian," the country having been founded by descendants of the ancient Romans.

Do not let another day pass without trying some of the good things at Roberts and Woods' Fountain. adl38

EATS FIRST REAL MEAL AFTER SURGICAL PROBE

Drank Lye When a Baby—Unable to Eat For Sixteen Years.

St. Louis.—Miss Katherine Besse, eighteen years old, ate the first breakfast, luncheon and dinner she ever ate in her life a few days ago. For sixteen years she had not tasted completely food of any description. The channel of her throat, the esophagus, was in position, but was entirely useless until Dr. Francis W. Kirsch performed an operation known as gastrotomy and brought her back to normal.

When she was two years old Miss Besse, who is the daughter of the widow of a grocer, drank a solution of lye while her mother was busy at her housework.

The lye burned away the membranes of the child's mouth and the lining of her esophagus and caused this channel from her mouth to her stomach to become strictured and to close tightly.

A physician who was called to attend her said she would die unless her esophagus was cut loose from her stomach and a new one made from parts of the stomach fashioned into a tube and sewed to the surface of her breast.

Her parents refused to permit the physician to cut away the deadened esophagus but granted him permission to bring the lining of the stomach to the surface of her body and make an opening near the solar plexus, through which liquid food might be given her.

Dr. Kirsch became interested in the case. He began a gentle probing with a slender pliable steel rod, which he forced down her esophagus. One after another the closed places in the old tissue were forced open and broken apart. As they were broken they were left attached to the inside of the new tissue that gradually had grown around the unused tube.

Nature then began its process of absorption until the new throat was clear of any stricture. Then the surgeon placed the patient under an anaesthetic and swiftly cut away the stitches that held the lining of the stomach to the old opening in the breast, sewed this together and dropped it in place, sewed together the muscles that had been severed sixteen years ago, cut away the abnormal tissues that had grown around the wound, stitched the severed skin together and when Miss Besse awoke from the ether told her she had become normal again.

Lawn Mower Hospital at Roy's Quick Shoe Repair, 110 Cayuga st. adv

[illegible]S STREAK [illegible] AT LAST

With Barnes Pitching Great Ball Fulton Wins From Skaneateles

The Fulton High school baseball team took its jinx by the neck Saturday afternoon and shook it hard, and [illegible] was a victory for the locals for the first time in many moons. The Skaneateles High school team was the victim, and the locals celebrated their new era by winning all the way by a score of 8-2. Honey Barnes did the twirling to the Queen's taste and although his support was a trifle scaly at times, Honey did not need any, for he let the visitors down with two lone bingles, struck out ten men and walked only one—the most remarkable pitching performance of the season on Athletic Park field. Aided by some vigorous lambasting at the proper time on the part of his teammates, Honey pitched gilt edge ball and the issue was never in doubt after the first three inings.

In the second stanza with two down Voorhees of the "Skinnies" walked into one of Barnes' fast ones and ambled. He stole second, took third on an error and scored when a heave to the plate went skyward.

Hits by Martin, Wilcox and Bray netted two runs for Fulton in the third frame.

Four runs fell to the lot of the Fultonians in the fourth. Barnes hit safely and Don O'Brien was safe when thes hortstop booted his roller. Barker was out and Kraus made it two down by flying out to Stearns. Lewis came through with a pretty single and Barnes and O'Brien scored. Martin singled and Wilcox followed suit, Lewis and Martin scoring.

Fulton added one in the fifth and one in the eighth. Skaneateles tallied in the fifth on a galaxy of errors by the local team, but Barnes steadied after that and the visitors did not see third base for the remainder of the game.

Wilcox and Bray were the star performers for the locals, "Socks" leading the team with the willow and M. Angelo holding up Barnes in great shape behind the bat. Martin showed up well as lead-off in the batting order, getting on three times out of five as well as making two timely hits.

For the losers, Dougherty, the first sacker, played a clean fielding game, although he was very weak with the stick. Henry and Stearns were the lucky stiffs who robbed Barnes of a no-hit game.

Tidings of great joy: The score—

SPORTING COMMENT

The local high school lads have finally crossed that terrible desert of Six Defeats—or was it Five? It was too many, no matter which. The omnipresent errors were in evidence again Saturday, but with Barnes pitching a two-hit game a team would have to play very poorly to boot the game away.

* * *

Harold O'Brien, manager of the school ball club was not in the lineup Saturday. While his comrades were toiling 'neath the hot summer sun Harold was masticating light refreshments at a pink tea in Morristown, N. J. Yesterday he viewed some near baseball at New Haven and hisp resence in the local camp is expected momentarily.

Really, Clarice, this travel becomes so monotonous!

* * *

Many Fultonians expect to go up to Syracuse Thursday afternoon when the Elks will hold a Field Day featuring the Detroit Tigers and the Pittsburgh Pirates in an exhibition game. "Ty" Cobb and all the rest of the stars are advertised to appear. The game will be played in the Stadium.

* * *

Yale, 22; Cornell, 5. The result of good coaching, by paid coaches, strict training and plenty of spirit. It was the worst and mosth umilliating defeat that Cornell has sustained in years.

* * *

Eddie Beasaw failed to show his usual class at the Arena Saturday night, but Ward claims his lack of speed was due to his long lay-off from the ring. Meany added another laurel to his crown by taking a four-round go from Eddie Veau.

WASHINGTON CIRCLES PREDICT FLAT REJECTIONS

(Continued from Page One)

and then to deal with the situation in the future as the developments in it demand. This final statement of the position of the United States very probably may be accompanied by a rupture of diplomatic relations with Germany. The statement will have to be emphatic and spirited to satisfy American public opinion, and emphasis, it may be thought, may best be added to it by recalling Mr. Gerard, Ambassador at Berlin, and handing his passports to Count von Bernstorff.

However, such action will not dispose of the issuef or the United States. Having finally declared its positions, and, perhaps, having refused to continue diplomatic relations with Germany while she persists in her inhuman submarine warfare against merchant vessels as it is now conducted, there would still remain the necessity for action to meet such developments in the situation as resulted from the German attacks.

In taking such steps the President is not only warranted in waiting for the dictum of public opinion, but he must make sure that he has the nation at his back in taking each step. For those will be steps toward war. They will be steps to protect American ships by convoy, or to end Germany's power to continue her submarine attacks.

LAWYERS SAY NOTE IS NOT AN ANSWER

(Continued from Page One)

be taught that the American flag and American lives on the high seas "be respected, no matter what the cost."

"Germany has been waging war upon this country for some time past, sinking our merchant ships and massacreing our citizens on the high seas," said Mr. Leon. "In answer to a demand that she desist, her government sends a reply which shows a determination to continue the same acts against us. This reply indicates that the German government is convinced that no matter how many American ships are sunk, no matter how many American citizens are killed on the high seas, we will not fight;; that we will go on protesting, and also go on doing nothing to back our protest. Germany cares nothing for words; neither those she employs in fabricating pretexts for killing non-combatants, nor those employed by others in protesting against such deeds. Acts alone count with Germany. Her diplomatists continue to make the same mistakes. They thought England would not fight, notwithstanding the invasion of France, via Belgium. They thought Italy would fight on the side of those whose aim seems to be to blot out civilization from Europe. They now think that the American people love peace at any price. Events will show whether they are right."

NOW MAKING SHRAPNEL AT WATERTOWN PLANT

Watertown, June 1.—The dies to be used by the New York Engine Co. in pressing out the big brass cartridge cases for shrapnelfi and the non-arrival of which has been delaying manufacture of the cases for two weeks, are on their way here now and will arrive within a day or two. It is now expected they will be installed by Wednesday, so the plant can be put in operation Wednesday or Thursday.

It will be a matter of about ten days after the plant has started on the manufacture of cartridge cases before its capacity of 5,000 cases a day will be reached. When the maximum output is attained, there will be in the neighborhood of 1,000 men employed.

At the island plant of the New York Air Brake Company, where shrapnel cases and fuses are to be made for the cartridge cases, the installing of machinery is still going on, but a large amount of the machinery has not yet arrived, and it will be a month or six weeks more before this plant is ready to start.

Had the dies been received two weeks ago for the big 50-ton presses the engine plant would today have been in full operation.

Black's White Bread is sold by all grocers, because it is in demand by everybody. adv.

Worms Cause Many Children's Ills

Worms, by thousands, rob the child of nourishment, stunt its growth, cause Constipation, Indigestion, Nervousness, Irregular Appetite, Fever and sometimes Spasms. Kickapoo Worm Killer gives relief from all these. One-fourth to one of these pleasant candy lozenges, taken as directed, kill and remove the Worms, regulate your child's bowels and restore its health and vitality. Get an original 25c. box from your Druggist. Don't endanger your child's health and future when so sure and simple a remedy can be had.

TWO GREAT FEATURES AT THE QUIRK TODAY

The most striking part of today's picture is the capturing of a large Manatee or Sea Cow. This huge and almost extinct mammal is practically harmless, but owing to its huge proportions the Paramount cameramen found it impossible to get it out of the water.

The turtles are very interesting. The film shows the methods of capturing and "close-ups" of both the Green and Hawksbill turtles. The former furnishes the far-famed banquet soup of civic functions and the latter my lady with her combs.

The common fallacy regarding the sponge is shown in the last part of the film. Contrary to the prevalent notion that the sponge is much the same when taken from the water as it is when placed on the counter in our stores, the sponge is a slimy black lump which must be rotted, beaten and cleaned before it is fit for sale. Instead of the fluffy light ball we know, a heavy fleshy lump cutting like raw meat is drawn up from the bottom with the aid of divers or long grappling hook and dumped in a craul in shallow water. It is left there for days before it can be beaten out and cleaned. The resulting dried skeleton is the "sponge" we know.

The reel ends with an animated cartoon in which the caricature of the cameraman is seen to try out a new hair tonic with surprising result.

What the critics say of Essanay's great six-act production, "Graustark," which is shown at The Quirk today:

"Grautstark grips one with its dramatic interest. The theme is woven carefully about the thrilling situations, and the exceptionally clever acting of Essanay players brings out the intensity of the story."—Chicago Evening Post.

"Graustark is a magnificent production and bristles with exciting situations. Splendid acting surcharges the production throughout." — Chicago Daily News.

"All will revel in Graustark. The production of the picture is elaborate, being made with an eye to effective and artistic values."—Chicago Herald.

"In thrilling action, dramatic situations, scenic beauty and careful interpretation of the story by Essanay players, Graustark is one of the best photoplays yet produced.—Moving Picture World.

"Graustark is one of the most pretentious pictures yet produced. Careful production and clever acting mark it is unexcelled in the picture world.—Motion Picture News.

"Graustark is a photoplay with a real punch. It is full of thrilling action and its great love story grips the hearts of all."—New York Dramatic Mirror.

ROWANS BOW TO RED MEN

Local Warriors Win Hard Fought Game. Both Pitchers Hit Hard

For the first time in many years, the Red Men of this city took the big end of the score in a baseball game with the Rowan Stars of Oswego, when the Fulton team won yesterday 7-6. The game was close and fast throughout, as the final tally shows and was featured by some classy playing by both teams.

The day was an ideal baseball day, the grst real base ball weather of the season and the game drew an extraordinary crowd. Feeley mounted the firing line for Oswego while Johnnie Painterr handled the globule for Fulton. Johnnie evidently remembered the trimming he received from the Rowans a week ago when the Red Men lost in the thirteenth inning after a hard battle. At that time John had the best alibi in the world—lack of condition, and nop reparation. Yesterday he was no enigma to the visitors but he managed to split the hits up except in the sixth and eighth innings when the Rowans hit him hard and consecutively. Feeley was also touched up very freely but the hits did not come in bunches except in the fifth, when Fulton garnered four runs on four hits and a pass.

Painter also distinguished himself by leading his team at the bat with three singles. McCullum played a good game at short, accepting five chances without an error and connecting twice with the pill for a safe hit. Dingel also managed to get two bingles.

For Oswego, O'Neil and Foster comprised the heavy artillery, each getting three hits. W. Cotta was good for two singles and Steinholtz got two. Heisler's work on first was a feature.

President Will Insist That American Lives Be Protected and Laws of Humanity Kept.

VON BERNSDORF MADE PROPOSALS TO WILSON TODAY

Sought to Get President's Views Upon Future Conduct of Submarine Warfare

Washington, June 2.—Count von Bernstorff, the German Ambassalor, called on President Wilson today. The Ambassador requested the intervick which was his first visit to the White House since he returned from Germany after the European war began.

In well-informed quarters the belief is expressed that while the Ambassador's visit might not affect the forthcoming note, the statements which the President might make informally to the Ambassador would be transmitted to the German Government and be taken into consideration when the American communication is received in Berlin.

Mr. Wilson sought to impress upon the Ambassador the earnest intention and unwavering determination of the United States to obtain an accounting for past violations of its rights by the German navy and a guarantee against their repetition.

In some diplomatic quarters close to the German Embassy it was said today that the Ambassador sought to obtain from President Wilson his views on how Germany could conduct her submarine warfare without interfering with neutrals, and suggesting the separation of passenger and contraband traffic, or the giving of assurances that the British Government would not arm its merchantmen carrying passengers.

None of these reported proposals, officials who were conversant with the position of the Government indicated, would be considered until a definite acquiescence by Germany in thhe fundamental principles of international law was obtained.

President Wilson's next move in the German-American crisis has been determined. It will take the form of pointed inquiries to the German Government.

Germany will be asked whether she itnends to comply with the well-fixed requirements of international law that visitation and search shall be exercised before an unarmed merchant vessel is sent to the bottom.

She will be asked, also, what steps she will take to protect American citizens and other noncombatants on merchant ships which offer no resistance when hailed by German submarines or other vessels of war.

All other phases of the differences between Germany and the United States, which came to a head in the sinking of the Lusitania, will be put aside for the time being. They may be mentioned, but not as matters for present discussion.

The technical points raised by Germany in her response to the American representations will be overlooked in the note which this Government will transmit. These can be discussed later, if Germany's course is such as to permit a continuance of friendly relations between the two countries.

WEATHER FORECAST

Rain tonight and Thursday; cooler Thursday.

GERMANS ADVANCE IN EAST, CAPTURING THREE BIG FORTS

Recover Le Pretre Trenches and Part of One Ring of Peremysl Defences

Berlin (via London), June 2.—The War Office announces highly important gains in the east. Three of the outer forts that protect Peremysl have been stormed and captured, thus weakening to a great extent the defences of the city, and 1,400 prisoners have been made. These forts are about 16 miles from the center of the city.

Furthermore, the bombardment of Stryj has begun. The fighting here has been extremely severe but, despite a strong resistance, the Austro-German forces already have broken through the Russian line northwest of the town. In this fighting nearly 10,000 prisoners have been made, and a considerable amount of booty has been captured.

The Russians themselves have attempted an attack on the German positions east of Jaroslav but have been stopped short by the German guns, which caught the advancing troops in massed formation and killed them in great numbers.

From today's announcement it would appear that the Russian armies in Galicia have now been definitely driven back to a front that extends from Jaroslav on the San in a southeasterly direction through Peremysl to Stryj. Should the fortifications, permanent or improvised, at these three places be forced, the Russians would have practically no strongholds, excepting Lemberg, on which to attach their grip of Galicia.

Unconfirmed reports even say that Stryj already has falen before the Austrian bombardment and has been occupied by the allied Teuton troops. Another unofficial report says that Radom in Poland has been evacuated by the Russians. This town lies south of Warsaw.

The French yesterday attempted to break through further north. An attack on a front of two and one-half kilometers (about one and one-half miles), directed against our positions between the Souchez-Bethune road and the brook at Carency broke down under our fire with heavy losses to the enemy. The only point at which hand to hand fighting developed was west of Souchez.

In the Forest of Le Pretre we succeeded in recapturing the greater part of our lost trenches. Here the enemy suffered considerable losses.

A munitions depot of the enemy, situated at a point north of Sainte Menehould and northeast of Verdun, was blown up.

As a reprisal for the bombardment of the open town of Ludwigshafen we threw numerous bombs last night on wharves and docks of London.

Enemy airmen last night bombarded Ostend, damaging some houses without causing any other injury.

In the eastern theatre of war near Amboten, thirty-one miles aest of Libau (Courland), German cavalry defeated the Russian 4th Regiment of dragoons. Near Shavil hostile attacks were unsuccessful.

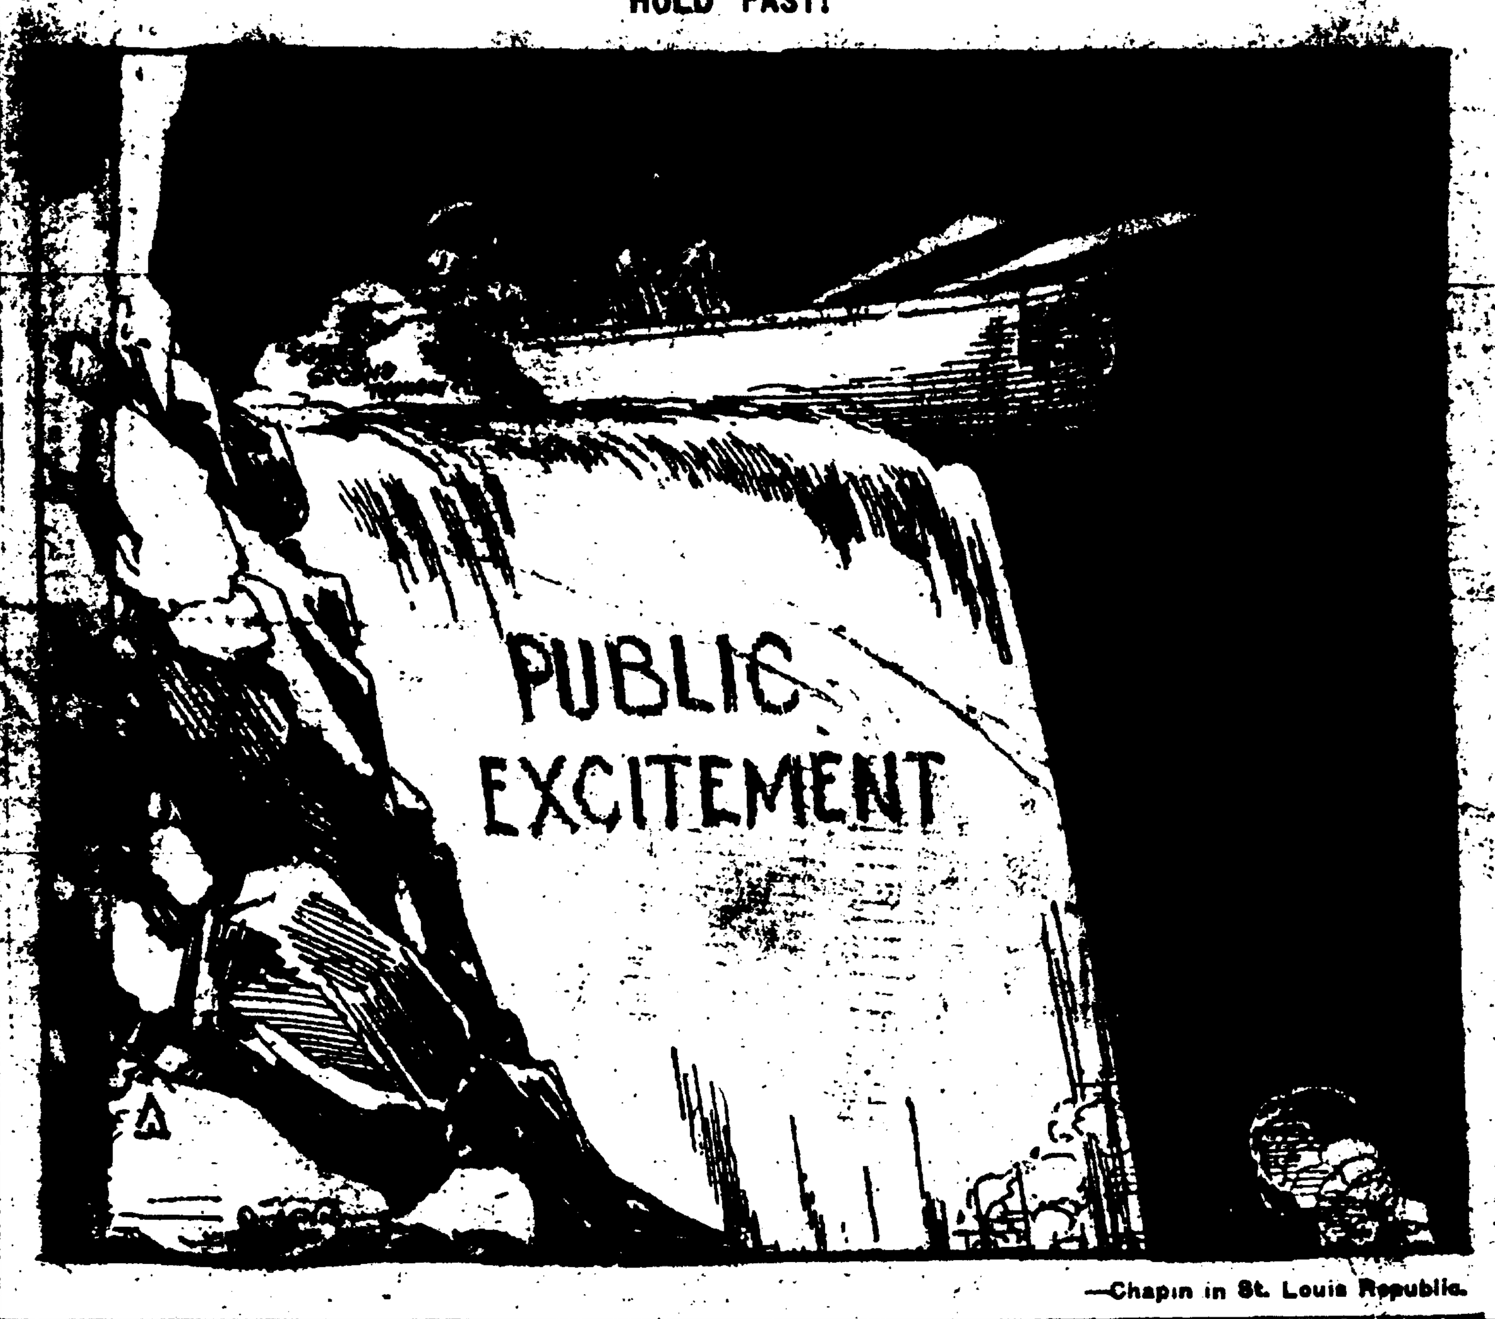
Our booty in the month of May north of the Niemen river amounts to 24,700 prisoners, seventeen cannon, forty-seven machine guns and one aeroplane.

In the southeastern theater of war, on the Peremysl front, forts 10A, 11A and 12, near and west of Denkowiczki, were stormed and taken by Bavarian troops. We made 1,400 prisoners, all that were left of the garrison, and captured two armored, eighteen heavy and five light guns.

East of Jaroslav the Russians by means of massed formation attempted to take our positions, but failed. Masses of dead were left lying in the battlefield before our trenches.

The Zurnin guards from east Prussia and Pomerania belonging to the army of General von Linzingen stormed the Russian front at Stryj, which is strongly fortified. Northwest of the town we succeeded in breaking through the Russian line. Up to the present we have taken fifty-three officers, 9,182 men and have captured eight cannon and fifteen machine guns.

HOLD FAST!



—Chapin in St. Louis Republic.

FRENCH HOLD TO ALL GAINS MADE IN NORTH

Paris, June 2.—After two days of heavy fighting north of Arras, in which the German losses are said to have been very high, the French remain masters of the district north of Souchez and the neighboring woods. The fighting in this region was especially fierce around a sugar factory west of Souchez, which was alternately held by the French and the Germans. It is now definitely in the hands of the French.

There has been heavy fighting also in the regions known as the "labyrinth," a series of strongly fortified trenches held by the Germans.

Very lively actions have taken place in the sector north of Arras and we have made further progress. In spite of several counter attacks the enemy has not been able to drive us from the trenches taken by us in the woods near the road from Aix-Noulette to Seuchez. We have maintained our gains also northeast of the chapel of Notre Dame de Lorette.

The violent engagements centering around the sugar factory of Souchez which continued for two days have ended to our advantage. We captured the factory. The enemy took it back during the night, but we drove him out again at dawn and we are masters of the position despite several counter attacks.

In the "labyrinth" southeast of Neuville-Saint-Vaast we are continuing to carry one by one the German works and we have made important progress in the northern part of this fortified region. We took 150 prisoners. All the ground gained is held.

On the borders of Le Pretre wood the enemy, after a violent bombardment, took from us some of the trenches conquered the day before yesterday. We hold the rest of the captured terrain.

The capture of a German field work east of Notre Dame de Lorette was reported in the afternoon communique which said:

Violent fighting took place last night in the region to the north of Arras.

To the east of the road from Aix-Noulette to Souchez we made our way into a grove, and here there developed a hand to hand fight, in which we had the advantage.

On the plateau to the east of Notre Dame de Lorette we took possession of a German work.

A very violent fight developed around the sugar mill at Souchez, in the course of which we took about sixty prisoners.

In the Vosges, near Fontenelle, north of St. Die, during the night of May 30-31, a German attack in which two companies participated was repulsed by us, with heavy losses for the enemy.

Board of Works Did Not Meet

The Board of Public Works did not meet last night nor Monday night and the Common Council meeting for last night andso failed to materilize. Mayor Fox and G. M. Fanning, attorney for the city, are in Troy at the Mayors' Conference, which may account for the fact that the council did not meet, but several taxpayers who have registerd complaints with the Board of Public Works are beginning to wonder if the Board is a reality or a fleeting vision. The bridge in North 1st st. which was condemned by Superintendent Rumsey has not yet been the occasion for any action on the part of the Board and the paving of 1st st. has been ordered but no signs of the work have appeared yet, although the street is getting worse every day.

Green in Fine Trim for Thursday Night

"Kid" Green, a slashing little 110-pounder, one of John Ward's crew of pugilists, will meet "Shadow" Martin of Homer, in one of the main bouts at the Syracuse Arena Thursday night The big boxing show will be pulled off in connection with the Elks' field day Thursday, which is expected to draw Elks from all sections of the state.

Green is one clever little boy, if Ward's dope is correct, and is due to bring home the bacon in this fight. Martin is an experienced fighter of the hard hitting boring type and he will out-weigh Green by some few pounds. "Kid" is confident that he will pin the crepe on Martin by the K.O. route.

COUNTY LEAGUE MEETS FRIDAY

Four Teams Will Be Represented, League Will Start June 12

The Double-O league, comprising teams from this city, Baldwinsville, Phoenix and Oswego will be formally launched at a meeting which will be held in this city Friday night, probably at City Hall, if arrangements can be made. At that time two delegates from each town will be on hand and the schedule will be decided upon as well as all the other details.

Tom McCullom, one of the two men who will represent this city, was in Phoenix Sunday afternoon conferring with the manager of the team there ,and the Phoenix team, as a result of the conference, tendered its entry this morning. Baldwinsville was one of the first to announce its intention of joining the league, and Oswego will be represented by the strong Rowan Stars. Manager Cody of the Rowans stated last week that he was ready to join at any time.

The representation at the meeting will be limited to two members of each club and one other other from each town so that the league commission will consist of twelve men.

Applications for league umpires will be received at the meeting Friday night or will be given full consideration if addressed to this office. The league plans to engage four responsible men, two to officiate at every league game. The umpires will be paid, but the teams are to be run on a strictly amateur basis as far as the engaging of players is concerned although the players will share in the profits.

If everything goes smoothly at the meeting Friday night, the league should make its initial bow a week later, on Saturday, June 12. The schedule will cover almost three months so that the season should close on or about Labor day.

There is a great deal of interest manifest here in the new organization and it is a safe bet that Fulton will ber epresented by a fast team, and the people of the city will show their appreciation of this fact by turning out and supporting the team in good style.

IMPORTANT DIVISION MEETING HELD TONIGHT

The Division of Membership and Entertainment of the Chamber of Commerce will meet tonight at the headquarters at 7.30 o'clock. Several subjects of general interest will be discussed and the committee will take up the matter of a Chautauqua this year. A full attendance of members is earnestly desired. This will be one of the first meetings of the entire division.

Opinions

Accomplished Its Purpose

Partisan critics who seek to impugn the efficiency of the American navy because the attacking fleet won against the defending fleet in the maneuvers off the Atlantic coast, are having hard sledding.

The defensive force was beaten because the submarines which were depended on to baffle the assailing division at the decisive moment, were unable to put to sea on account of rough weather, and so uncovered the strip of seaboard on which the hypothetical landing of a hostile army was effected.

The lesson is that we need more submarines of a type equal to difficult ocean conditions and to find out wherein we are strong and wherein we are deficient, was precisely the object of the naval war-game.

So the game has fulfilled its purpose and in having strong points and points amenabel to improvements our navy is no different from any other navy on the globe.

President Wilson has, both in official communiication to Congress and in unofficial utterances, emphatically asserted the necessity of a powerful navy. Secretary Daniels has never claimed that the navy was perfection, but has declared and demonstrated, that it is a good navy and he has rightly insisted that it be given the credit for being as good a navy as it is.—Buffalo Times.

Dr. Washington's Advice

Dr. Booker T. Washington, the head of the Tuskegee institute in Alabama, gave an address in New York the other day before his fellow negroes, in which he set forth a line of action for them as follows:

"Settle down and get identified with some one place. Then build up there reputations for sobriety and industry. If you can't find the right place in the city, then go to a small town nearby, or get back to the soil. At any rate, settle down and get hold of some property and start a bank account. You will soon find that your savings are growing and that you are growing faster and bigger than the bank account."

This advice is equally as good for white as for black. In fact, it is applicable to all peoples. The Christian Science Monitor of Boston, in searching through its exchanges, has found a newspaper article that tells how the advice of Dr. Washington has worked out when put into actual practice. The clipping tells of Hannibal eBatty, a veteran negro of Yorkville, S. C., to whom were accorded remarkable tributes from the community in which he had earned a reputation for faithfulness and loyalty. Every class in town paid respect to him. "Humble though he was," says the Constitution, "his life preached a lesson of character building to his race, a lesson of true worth which is recognized and honored everywhere. It is one that the thoughtful, earnest educators of the negro race are trying to impress on their people—honest service for the good of themselves and the communities in which they live."

Hannibal Beatty had earned a place in the community of Yorkville; he could not be deprived of it because of the color of his skin; it was recognized as his rightful place by white and blacks alike. He had settled down. He had gone to work on the building of a reputation for sobriety and honesty. He won the confidence and respect of his neighbors. Business and professional men, prominent citizens of all callings, took pleasure in testifying to his worth.

Dr. Washington has done much for the colored race and his usefulness is far from ended. He is at his best when he is giving practical advice to the negroes, and the soundness of that advice is apparent in thousands of southern communities, where his influence is felt.—Watertown Standard.

COMMENDATION VS. CENSURE

Nickledom, the home of the movie fan, has in the last few weeks in this city, been running the gauntlet. First the agitation regarding the lawfulness and the harmfulness of Sunday pictures and then the question of the kind of pictures has been shaking the movie tree.

However, after all that is said of the kind of movies, the time and place of exhibit, the one fact remains that the movies' place cannot be ignored as a factor of good in the main toward any community.

Nickledom's grasp on the public is a fact to be reckoned with. It has become the nightly amusement ground for the masses and its influence is indeed widespread. So vast a field of knowlege, of art, of science, of natural history, is embraced by motography that it has become today almost a liberal education in itself. In five years' time the movie place has in truth become both an academy and a clubhouse for the working man. The saloon has lost its hypocritical and pious cloak as the workingman's club. The movies now beckon the saloon's former patron with arguments too strong to be withstood.

Local picture houses have not been sufficiently aided in their desire to give high class pictures. All too many times reproductions from the highest grade of playlife have found an audience of most discouraging proportion.

A live, active interest in the masterpieces shown in local theatres will stimulate the managers to plan for better films. Every individual can help to raise the standard of pictures locally by commending personally the manager who plans for something worth while.

It is to be remembered that to a selling agency commendation is the liveliest incentive to carry a definite brand of goods.

THE WRONG BUSINESS

Most of us have a faint recollection of the fellow who made a success minding his own business, and others of us can recall the man who would come to the office with a cigar in his mouth, and sit down and put his feet on the desk, and smoke, and leave his leisure-loving impression with the rest of the individuals in the organization. And he went the way of ancient Rome. Then there was another fellow in our county who would constantly talk about bad business, and gossip about his competitors until he really believed his own lies. And finally he woke up in the other business world.

Success comes to any man who deserves it. If you are not having success, find fault with yourself, and not with business. It is barely possible that you are in the wrong business, but this is not the fault of the business, nor does it compel me to take back what I have just said.—Silent Partner.

Governor Whitman's Record

Governor Whitman's record of achievement at Albany is not to be blurred by the attacks of his enemies. The Governor has proved himself in the few months he has been in office, a courageous public servant, a high-minded official and an executive of dignity and courtesy. He has rescued the State credit from the degradation into which it had been dragged in previous administrations; purified and energized a corrupt and inefficient public service; consolidated duplicating bureaus and abolished unnecessary ones; breathed the soul of effectiveness into civil service administration by appointing as the chief administrator the most conspicious reformer in the State, and laid the plan wide and deep for the creation of an ideal administration of government in this commonwealth.

Mr. Whitman has done all this without consciously or wantonly offending even his bitterest opponents, and the pride of achievement is not dulled by the sense of courtesy forgotten or the ethios of politics ignored.—Brooklyn Times.

17-YEAR LOCUSTS COME THIS YEAR

Sixth Brood to Appear in Eastern States---Little Damage Expected

Washington, D.C., June 2,—Brood VI of the cicada, commonly known as the seventeen-year locust, is expected to appear in May and June this year in scattered localities covering much of the northern and central States lying between the Hudson and Mississippi rivers, extending along the Appalachian elevated plateau into northern Georgia and South Carolina. This particular brood made its last appearance in this territory in 1898.

The seventeen-year locust covers in its range nearly all of the United States from the Mississippi Valley eastward. The curious feature of its regular periodic appearances and its long subterraenan life give it perhaps the greatest popular interest which attaches to any insect on this continent, and lead to many inquiries with every reappearance of any important brood. There are two races of this insect: (1) the seventeen-year race, which occurs in 17 different broods over the northern and central United States, and (2) the thirteen-year race, which occurs in different broods throughout the southern states from Texas eastward. When any of these broods are characterized by great swarms they naturally cause fears for the safety of trees. The actual damage, however, is slight and is accomplished by the female cicada when she cuts the bark of the tree in the deposition of her eggs.

A careful canvass of the whole cicada area was made by the Bureau of Entomology with the assistance of the State entomologists in 1898. These reports, if they may be relied upon, extend the range of the periodical cicada in Wisconsin and Michigan much farther north than any of the old records. The localities assigned to this brood in North Carolina, South Carolina and Georgia, and in eastern Kentucky and Tennessee, are, in the main, in counties in the elevated mountainous district, and the correctness of the reference to this brood is established by earlier records as well as indicated by the elevation.

The only counties of this state to be visited by the brood are: Greene, New York, Richmond, Schenectady, Westchester.

Partial Remedies

Ordinary repellant substances, such as kerosene emulsion or carboric-acid solutions, seem to have very little effect in preventing the oviposition of these insects. Some recent experience, however, indicates that trees thoroughly sprayed with Bordeaux mixture or a lime wash are apt to be avoided by the cicada, especially if there are other trees or woods in the neighborhood on which they can oviposit. The most reliable means of protecting nurseries and young orchards is by collecting the insects in bags or umbrellas from the trees in early morning or late evening, when they are somewhat torpid. Such collections should be undertaken at the first appearance of the cicada and repeated each day.

Vigorous young trees often recover in three or four years from the effects of a loss of, or injury to, a considerable percentage of their branches. However, it is difficult to overcome the unsymmetrical appearance which will commonly result from the indiscriminate pruning often necessary as a result of the female insects' work.

The worst affected branches should be removed. The less injured limbs may be coated on the wounded parts with grafting wax or moderately hard soap. These protective coverings should be renewed at least once a year, preferably in the spring, until the wounds are entirely healed over. It may be expedient, in the case of a badly wounded recently budded or grafted tree, to cut it back nearly to the bud or graft, so that an entirely new top may be made.

In the case of older trees, the main object of treatment is to secure the rapid healing of the wounds and prevent their being used as points of secondary infection by other insects. The worst injured limbs in such trees should also be cut out, so that all the vigor of the plant may be directed to the remaining wood. The healing process may be accelerated by thorough cultivation and the use of fertilizers on the land about the trees attacked.

A small brood of the thirteen-year race of the periodical cicada was reported in May, 1902, by Mr. George H. Kent of Suffolk, Franklin county, Miss. This brood is again reported by Mr. Kent as having reappeared this year. This isolated record is the only one we have of the thirteen-year brood of this year.

GIRL SPANKS HER YOUNG ASSAILANT

Phila., June 2,—Don't waste your hat pins on a highwayman, particularly if the Dick Turpin who attacks you is of youthful mien. Spank him, instead. Miss Lydia Lyster, a Lansdowne lassie, has tried the new method and found it effective.

The lady with the alliterative name was walking along yesterday as peaceably as one could walk, when she was seized from the rear in a crunching hug. Being a person of feminine persuasion her first thought of self-protection was by way of hat pins, but one look at her assailant made her decide on more primitive methods. She turned him over her knee and administered a well-known, old-fashioned remedy.

"I was astonished of course," she explained to Magistrate Malin, at Lansdowne, when the matter was brought before him, "when a tall person came up behind me and grabbed me around the waist. I dropped several bundles and quickly drew my hat pins intending to use them on him. Then I saw that he was only a man-sized boy and so I put him over my knee and spanked him.

The man-sized boy, who is Frank McNeal, blushed and grinned sheepishly and did not deny that he was the highwayman who had been given the humiliating treatment. He was bought to the hearing by his father, who lives on Cantrell street, near 16th. Miss Lyster had such faith in thec urative properties of her own methods that she refused to prosecute. The boy, who is but 15 years old, said he did not know why he attacked her, but promised to be good in the future.

MAN CHASES WIFE; CAUGHT ON ROOF

Phila., June 2.—All the elements of a movie melodrama entered into the troubles of John MsGonigle, and the climax came when he was captured early today on the roof of his home, at 127 Wilt street, by Policeman Shotroff.

The excitment began when he quarreled at meal time. When his wife asked for peace he grabbed a butcher knife and chased her through the house. When other household ammunition gave out he threw a Bible at her.

Her screams attracted the cop and McGonigle beat a retreat for the roof. There was a chase in which hurdling over alleys and chimneys was the principal feature. The man finally was caught as he was about to slide down a water spout. He was held in $400 bail by Magistrate Glenn.

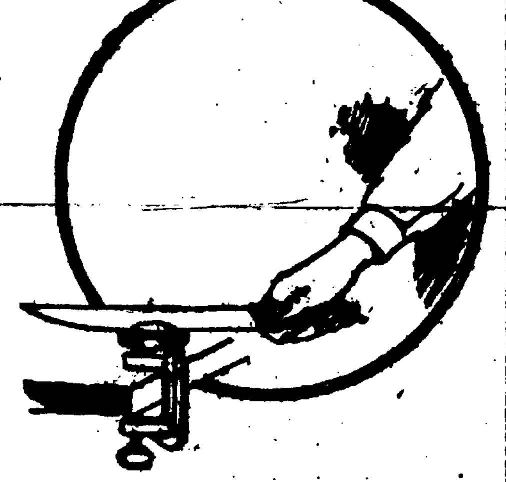
HELPS FOR THE BUSY HOUSEWIFE

Simple Device For Sharpening Kitchen Knives.



If you have the necessary "know how" it is a very simple matter to sharpen a knife by grinding. It all rests in the manner of holding the edge of the knife on the surface of the sharpener. But now we are aided by a new device which has been recently patented, consisting of a wheel of abrasive material and a guide mounted on a metal carrier, by means of which the device may be secured to a table or other convenient place for use. When the carver is placed in the space between the wheel and guide the knife is held just at the right angle with respect to the wheel, so the most effective edge is put on it, and the knife is then reversed and the other side treated in a similar manner. A half dozen passes on each side of the knife put it in good condition. It is impossible to go wrong in the matter of putting an edge on a knife with the aid of this device.

Lobster Chowder.

Lay in the bottom of the chowder saucepan on the rack three medium slices of pickled pork, then a one inch slice of fresh cod, then a layer of sliced potato and a grated onion, pepper, salt and little lumps of butter, a layer of pilot crackers, then one of cold boiled lobster cut into small pieces, another of pilot crackers, then a layer of the cod, and proceed in this way, making the lobster the last layer, with plenty of butter and a dusting of pepper and salt over the top. Pour over a pint of milk, adding just enough water to cover all, and boil for forty minutes slowly, but steadily. Just before serving add a half pint of hot cream. Have ready a tablespoonful of chopped parsley and a finely chopped red pepper. Sprinkle a teaspoonful over each portion as it is served.—New York Times.

Kitchen Wisdom.

To clean white leather bags and belts use oxide of zinc.

To give silk that is being washed the sheen of new silk add just a little methylated spirit to the rinsing water.

The short ends of candles melted and mixed with equal parts of turpentine make a fine polish for hardwood floors.

When pressing the pleated tunics that are so much in vogue dampen with water in which a small piece of gum arabic has been dissolved and then iron in the usual way.

Add a few crumbs of bread to scrambled eggs. This will improve the dish and make the eggs go further.

A cupful of vinegar added to the water in which colored clothes are washed will often prevent the color from running.

Escaloped Potatoes.

Pare and slice a dozen medium sized white potatoes, fill pudding dish with alternate layers of potatoes and finely rolled toasted breadcrumbs. Season each layer as it is inserted with raw sliced onion, salt, pepper (with mace and sage if liked) and butter size of an egg for each layer. Cover the whole with thin sweet cream or very rich milk. If cheese is liked sprinkle the top with cheese crumbs, and cheese may be added to each layer. Bake in slow oven in dripping pan, removing lid to allow the top to brown well toward the end of the baking.

Chicken, Italian Style.

Cold roast or boiled chicken is the foundation for this dish. Cut the meat into dice and to every pint allow one tablespoonful of butter, one of flour, a little onion juice, three hard boiled eggs, half a cupful of cream and a cupful of rich stock, with seasoning of salt and pepper to taste. Melt the butter in the frying pan, blend the flour, then unite with the cream and stock and season. Let the chicken dice become thoroughly heated in the sauce. Dress on a dish with the grated yokes sprinkled over and the whites cut into ornamental sections for garnish.

Carrots and Peas.

Cut carrots into dice and boil in salted water. Mix with an equal quantity of cooked green peas. Sprinkle with two tablespoonfuls of flour, salt, pepper and half a teaspoonful of sugar and two tablespoonfuls of butter. Add a cupful of water in which the carrots were cooked, and simmer until thick. Sprinkle with chopped parsley and serve hot.

Fried Carrots.

Clean and boil carrots until tender. Cut into lengthwise slices. Roll in beaten egg and breadcrumbs and fry in deep fat until a golden brown. Drain and serve hot.

GOSSIP AND ADVICE.

Scrap Books Excellent Way of Conserving Much Valuable Information.

Many times you have seen in a magazine or newspaper an article or suggestion that you determined to save—and then either lost the magazine or clipping or threw it away during some cleaning up period. Why not reform?

One woman of methodical habits keeps a series of scrap books for just such articles and finds this a very neat and effective way of preserving ideas for future use.

One book is marked "Garden." In this book she has pasted every illustration or item of information on the subject that has intrested her. There are pictures of trellises, arbors, pergolas, water gardens, benches or bordered paths, which she hopes to be able some time to add to her own garden; suggestions about flower or vegetable culture; advertisements she wishes to keep for reference; garden plans from various garden magazines, etc.

The other half of this book is devoted to notes on her own garden—dates on which she has planted, her success with various plants and seeds, the garden expense account, and any point that she may wish to recall at any time.

Another book is marked "House." In this she keeps articles and suggestions on household decoration. Samples of chintzes, denims and upholstery materials; illustrations of fireplaces, window seats, cupboards, stair railings, etc., that have appealed to her. Here, too, are written down the dimensions of each room, the number of windows and amount of material needed for curtains, the dates on which the last papers, rugs and curtains were bought, and the price of these. This system saves much time and trouble when a room is to be redecorated, for all the necessary information is at hand.

A large part of the book is devoted to the kitchen. In these pages are all the suggestions that have interested her. There is a list of various brands of tinned goods, cereals and other foodstuffs. This is labeled "Pure Food Products," and only tasted and approved brands are listed.

In the kitchen pages also are pasted notes on or advertisements of improved utensils and labor saving devices—washing machines, mayonnaise mixers, butter churns, silver cleaning pans, in fact, any approved labor saving device that she may wish to purchase.

In this way every item of household information that has interested her is preserved in accessible form with very little trouble. Recipes are not put in the scrap book, as they occupy little space and are more conveniently kept in a card index box on a shelf.

Zinc Ointment For Red Nose.

A red nose is often constitutional, or the sign of indigestion, but more often than not it is caused by a too thin skin. When the latter is the cause zinc ointment is a splendid remedy. You should apply it to the nose every night. You will find it does wonders in hardening the skin, and in this way the tendency to redness will gradually disappear.

Neuralgia Pains Stopped

You don't need to suffer those agonizing nerve pains in the face, head, arm, shoulders, chest and back. Just apply a few drops of soothing Sloan's Liniment; lie quietly a few minutes. You will get such relief and comfort! Life and the world will look brighter. Get a bottle today. 3 ounces for 25c., at all Druggists. Penetrates without rubbing.

Gown Faintly Reminiscent of the Spanish Dancing Girl

Designed by Maison Maurice, New York.

In the making of fashions we have found it necessary to call upon almost every country of the world.

In the gown shown here Spain has furnished us with the motif. The tiny bolero is reminiscent of the Spanish dancing girl, and you might fancy that Carmen had come out of the opera to pose for it.

The gown is developed of black sequins and jet, made over accordian plaited chiffon and a slip of black satin. To give the color note which every gown should possess two scarlet geraniums are used—one at the hem of the tunic, and the other is posed at the back of the bodice. It is only moderately decollete, and the sleeves are wisps of chiffon, daintily showing the bare arm of the wearer.

⁂

Many skirts, especially those of chiffon or silk, are bound with bias bands, usually self material, with the exception of marquisette, chiffon, tulle and lace, which are bound with silk.

Box plaits are held in place by narrow folds of silk.

Scalloped edged skirts, and there are many, are bound with narrow folds of the same material.

Full, double plaited ruffles have their edges pinked and add a quaint old fashioned air to taffeta and tulle gowns.

⁂

For a woman who always chooses a black parasol there is a model called "chapeau," for the reason that it resembles a sombrero. It is fashioned of black taffeta, but around the outer edge is a band of black velvet about three inches in width. The ribs turn up in a manner that gives the whole thing a very unique effect.

A very smart afternoon gown has a practical note that should appeal to women who have several remnants on hand which can be combined to form a comfortable gown for warm days. The skirt is of striped crepe de chine. The bodice is in coat effect and made of taffeta. It flares open in front and falls down the back in two long tabs. Long chiffon sleeves finished with deep cuffs of taffeta lend a transparent note.

Coin dots appear on many of the new sunshades, and, of course, to be conspicuous, they are always of a very different color from the parasol. Red parasols with black or with white dots are very prominent. A shade of such color proves useful when a costume needs one bright spot to make it snappy.

ANNA MAY.

THE CANOE GIRL.

A Costume to Wear When One Is Bathing or Paddling.

A USEFUL GARMENT.

Blue serge, that ever useful material, was used in the building of the pretty garment shown in this illustration. For bathing it will be ideal, and for paddling in the treacherous canoe no garment could be better. The frock is cut blouse and skirt, but the two garments are attached at the waist line.

WAR CAUSES PROXY WEDDING

French Lawyer at Front, Friend Takes Weeping Bride to Altar.

The first marriage by proxy ever permitted in Paris has just been celebrated in the city hall, in the Latin quarter. Alfred Lorin, the bridegroom, a Paris attorney who is now a soldier in the Seventy-first infantry at the front, was represented by his friend, Firmin Souq. The bride was Mlle. Marie Martigny.

The ceremony was performed in strict privacy, and the bride wept as she made the responses.

SUMMER SLIP COVERS.

Making Them at Home Saves Much Financial Outlay.

This is an excellent time to get the summer slip covers made, for dressmaking will probably be at its height just at the time they will be needed. Making slip covers at home is a most economical procedure, for well made slip covers are usually rather high priced when ordered from a good upholsterer. No special skill is required for the making of such covers, but a great deal of patience and care will be essential. No sketchy fitting or sewing may be tolerated and the finished effect must be distinctly tailored. Choosing slip covers is like choosing rugs or pictures—one makes selection for a lifetime, so good material of substantial weave and attractive color should be sought, and it will be wise to purchase several yards more than the estimated need, so that new chairs added to one's collection later may be covered.

Linen in tan or striped green and tan is delightfully cool for summer slip covers and all edges should be bound with green cotton braid which comes for the purpose. Plain tan linen is liked best by some housekeepers. In some rooms cretonne slip covers will be charming. English drawing rooms are almost invariably slip covered in flower chintz during the summer months, and the effect with light muslin curtains and plenty of fresh flowers about is delightful. A winter bedroom done in pink may be changed to blue or green in summer by fresh slip covers, curtains and bed cover of cretonne.

Cut a pattern for every slip cover first. For this pattern an old sheet or strong wrapping paper may be used—and the tape measure should not be spared, for guesswork is not to be commended in making well tailored slip covers for a formal room. Pin the paper pattern over chair or lounge just as the slip cover is to go, then cut out your material. Snap fasteners are better than buttons and buttonholes, for they prevent gaping and sagging of the fabric. Make long bags also for the portieres and snap fasten them together at the top, between the hooks of the portieres.

FLYER MOREAU DIES IN FALL.

Was Inventor of Self Righting Device to Make Aeroplanes Safe.

Albert Moreau, French aviator who invented a safety device to prevent aeroplanes from capsizing, has been killed by a fall of 1,400 feet in his plane at Melun, near Paris.

In 1913 Moreau won the Bonnet prize with a self righting air craft, which he drove without touching the levers.

WHEN CROWS MOBILIZE.

They Usually Mass Themselves For Attack Upon an Enemy.

The crows are masters of mobilization. Such mobilizations have frequently been investigated. Usually they prove to be for the attack on some enemy.

Thoreau speaks of the crows "bursting up above the woods where they were perching like the black fragments of a powder mill just exploded." When they are gathered for war purposes their cries will lead you to the spot where they are fighting, and these same bursts of black fragments above the trees, usually following an especial uproar of cawing, will direct you to the center of the battle.

Walter King Stone, the illustrator, and Charles Livingston Bull have told me of a mobilization they once witnessed, when the crows gathered for hours and the two observers were able to penetrate the woods to the exact spot beneath the feathered explosions. There they found a great horned owl flying low in the trees with a dead crow in his talons. Whether this was the original cause of the battle or whether he had grabbed the crow in one of the descents of the birds about his head they, of course, could not say. He was evidently struggling to find a dead tree where he could take refuge. He was saved probably by the coming of night.

Crows have even been known to attack foxes, as Winslow Homer's painting is the most famous witness.

A farmer near my home who has observed crows for many years and has the reputation of knowing more about them than any one else in the neighborhood tells me that almost invariably in his experience the cause of a large mobilization is either a big owl or a hawk. The little screech owls are also attacked, but by lesser numbers. He has also personally seen the crows attack a fox while it was crossing an open field, and once he watched a flock of nearly 100 crows worrying a Skye terrier dog, which was so thoroughly frightened that it was running in circles. I have seen crows attack a cat also, but the cat always is wise enough to make for cover. — Walter Prichard Eaton in Harper's Magazine.

CHARM OF ICELAND.

A Land of Wild Grandeur and Mighty and Beautiful Waterfalls.

In spite of its poverty Iceland is one of the most beautiful countries of the world. The scenery combines a wild grandeur, with ingratiating charm in an infinite variety of characteristic landscapes.

The mountain formations are majestic and powerful in outline, showing traces of the volcanic forces which are still active in some places. The large cupola shaped mountains, which rise like oriental temples from the ocean or the level plains, their tops covered with perpetual snow, are very impressive.

To this must be added a wealth of mighty and beautiful waterfalls, great lakes, steaming springs and craters still warm. The view is usually wide and open and the play of colors fascinating, especially in the fair, mild summer nights. The air is clear, healthy and invigorating, streaming alternately from the wide sea and from the snow covered mountains.

This natural beauty attracts many tourists to the country, and large ocean steamers, filled with travelers, visit it several times each summer. Owing to the lack of transportation facilities most of them must be content with seeing the coasts. When it gets railroads, modern hotels and other conveniences Iceland will no doubt become a popular tourist country.

Iceland has many possibilities for a fair future. — American Scandinavian Review.

Thackeray and the Eggs.

"Americans," says a writer in the London Chronicle, "have a way of serving boiled eggs which is apt to disconcert the English visitor. It is told of Thackeray that at his first American breakfast in Boston he ordered this dish. Among the array of things placed before him was a goblet filled with something that he failed to recognize, and he also missed the eggs. In answer to his inquiry the waiter said, 'That's them in the glass.' 'Well, but where are the shells?' asked Thackeray. 'You didn't ask for the shells,' was the prompt reply."

Tit For Tat.

He—These biscuits are not like those mother used to make. She—Of course they are not. I want you to understand that these biscuits are constructed in strict accord with the latest scientific formula and can be consumed without injury to the digestive system.—Richmond Times-Dispatch.

Tommy's Excuse.

"Why did you stay away from school, Tommy?"

"Me mudder broke her arm."

"But why did you stay away two days?"

"She broke it in two places."—Boston Transcript.

Truly So.

"Something shocking happened in school this morning."

"What was it?"

"The galvanic battery got overcharged."—Baltimore American.

Capital Punishment.

The term "capital punishment" refers to the punishment of beheading, which affected the head, or caput, of a person.

If you wish any blessing look for it yourself.—Arrian.

PICTURESQUE FROCK.

Lingerie Gown That Makes Wearer Look Like Frameless Picture.

PRETTY EVENING DRESS.

"Ah! Isn't she a picture?" is heard once in perhaps a very long while, and immediately every one within hearing covertly or frankly turns to look at what promises to be a pleasant vision. And these "pictures" have not been any too plentiful recently, particularly in the not long gone period of tube skirts. But fashion now holds out the pretty promise that it is the thing to be picturesquely dressed, and the woman who comes nearest to looking like a canvas belle that's lost her frame will elicit the biggest buzz of admiration.

This gown is picturesque in the extreme, being a combination of wonderful old lace and hemstitched taffeta. The underskirt is of accordion plaited pink chiffon. The bodice is decollete and sleeveless. The sleeveless bodice is very becoming to a young girl.

WANTS FOURTEENTH IDEAL.

Indiana Woman Says She Was Careless In Choosing Thirteenth.

Mrs. Polly Anne Weld Strodes of Evansville, Ind., who is seventy years old and has been married thirteen times, announced the other day that she will divorce her present husband as quickly as she ever disposed of one in her life and will marry a man who is her ideal. She and Strodes had just had a tiff, and she shut him out.

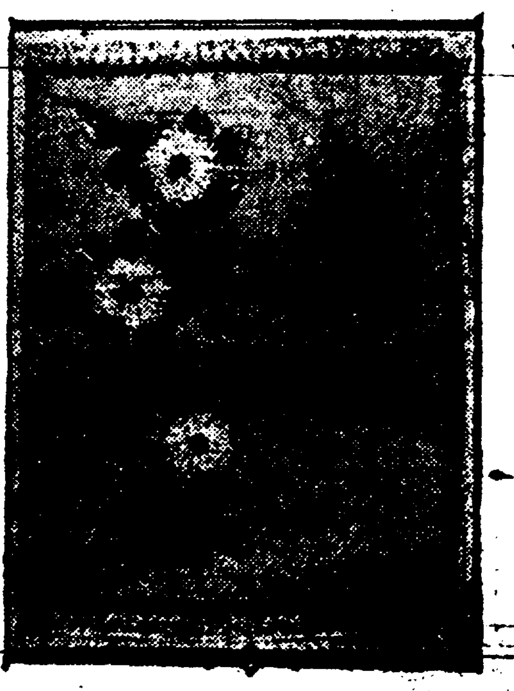
"I have an ideal," said Mrs. Strodes, "and I will bless the day when I can rest my head upon his shoulder and say, 'At peace, darling.'

"I have had some of the most desirable husbands in Indiana and I am competent to judge a good one when I see him. All except Harrison Strodes; I was very careless in selecting him."

FOR THE SUMMER PIAZZA.

Yellow and White Daisies Embroidered Upon Brown Holland.

For the piazza tea table colors are liked better than the glaring white



TEA TABLE SQUARE.

spreads. The one pictured here will wash as well as white and gives a rich note of color to the table and does not have to be removed after tea has been finished. The design is done in mercerized cottons.

FLEET OF BOATS AT THE ISLAND

Thus Is Restored to Club's Activities a Feature Missed for Years

With the announcement of Friday's field day of this week at the Pathfinder Island, comes the news that members of the club and their freinds will this year have a feature of amusement that has not been for several years enjoyed at the prettiest of pretty spots in this vicinity.

The Island committeeman under the chairmanship of G. W. Morton have in mind a number of attractive features that will be sprung during the season, but the one that is just now uppermost in the thoughts of everybody is the fleet of boats and canoes tied up at the wharf for the use of boat club members and guests. Each and every Friday during the season this fleet of water craft will be at the wharf, to add to the diversity of a day's outing by the waters of old Oswego river.

Different ones of this city's many organizations have engaged the use of the Island clubhouse and grounds for a day's outing in the month of June. One of these, last year's high school graduating class, will spend Saturady, June 19, there, and a few days later Post Commander J. W. Distin, will lead the surviving members of Schenck Post, G.A.R., down the East River road and into the shade afforded by the trees of Pathfinder Island.

During the last two or three years few of the Pathfinder Boat Club members have availed themselves of the facilities afforded by the pretty cottage for remaining one or more nights at the Island, but already there are indications that many members may accupy the sleeping quarters provided there, and partake of the meals served by Mr. and Mrs. Alonzo Holmes, whose administration of Island affairs is proving so satisfactory.

MACCABEES ACTIVE; NEW OFFICERS ELECTED

Fulton Tent 373, Knights of the Maccabees, held its semi-annual election Tuesday evening. The following officers were chosen:

Past Commander, Sir Knight Wm. Joice; Commander, Sir Knight LeRoy Lewis; Lieut. Commander, Sir Knight D. E. Spencer; Record Keeper, Sir Knight A. Z. Wolever; Finance Keeper, Sir Knight William Van Sanford; Chaplain, Sir Knight John Shipman; Physicians, Dr. E. J. Cusack, Dr. S. D. Keller; Sergeant, Sir Knight Willey; Master-at-Arms, Sir Knight Will Carl; 1st Master of Guards, Sir Knight George Dickerson; 2d Master of Guards, Sir Knight Harry Pilch; Sentinel, Sir Knight Tracy Wallace; Picket, Sir Knight Frank Parks; Trustee, Sir Knight W. Van Sanford; Degree Master, Sir Knight D. B. Read.

At the Tuesday night's review it was voted that a ball team shall be organized. Leroy Lewis was elected manager and he issued a call for all Maccabees who can and will play ball to meet at the club room at 7:30 Friday night. The club has a lot of good material, and for the good of the order it is proposed to get together.

ROSOFF GOES TO WALDEN TO WORK

Contractor Rosoff, who is in charge of the filling of the old canal bed, left yesterday for Walden, where he has been awarded a contract for 11 miles of state road in Delaware county. Mr. Rosoff expects to start work on the one of the biggest pieces of work contracted for by the State in the past five years.

In order that his inspectors and construction foremen may supervise the entire stretch of road, Mr. Rosoff has ordered two motorcycles from a local dealer and the machines will be sent to Walden at once.

FISHERMEN MUST HAVE SET-LINE LICENSES

M. C. Worts, Superintendent of Inland Fisheries, Conservation Commission announces that licenses for using set-lines can be obtained on application to the Conservation Commission at Albany. A circular just issued says:

"The Conservation Commission on March 15th, 1915, passed a resolution permitting set lines to be licensed at $1 a line, and only one to a person. They will be 100 feet in length, with 300 hooks set no less than fifteen inches apart. Nothing but dead bait shall be used and no minnows, either dead or alive, shall be used for bait. No bond will be required.

"From April 1st to September 20th, both inclusive, under the license when granted, whitefish less than fifteen inches in length must not be taken or possessed. Section 254 of the Conservation law permits the taking of white fish, bullheads, catfish, eels, perch, sunfish, carp, mullet and dogfish with set lines.

"You must state the exact waters where you wish to use a set line and give the town and county in which located. In this way we shall be in a position to ascertain whether or not they are brook trout waters."

EDGELEY DISCHARGED FROM HOSPITAL, CURED

Clinton Edgeley, the young cafe owner, who was seriously injured two weeks ago when a motorcycle and side-car in which he was riding crashed into a tree at Bundyville, was discharged from the Lee Memorial hospital yesterday. Edgely's case was puzzling for a time, as he lapsed into a coma when the crash occurred and remained unconscious for nearly a week.

Edward LaVeck, the owner of the motorcycle who was seated upon the machine at the time the accident was not injured and sustained only minor bruises. Edgeley's recovery was doubtful for some time as it was feared that his skull had been fractured and his many friends will be glad to learn that he is able to be about again.

MANUAL TRAINING AND COOKING IN OSWEGO

Oswego's Department of Education decided yesterday to institute at the opening of the next term of school a course in manual training and domestice science in the seventh and eighth grades of all city schools.

The east side childlren in the 7th and 8th grades will be taught in rooms fitted up at the Oak Hill school and the pupils on the west side will go to the Normal school, on invitation of the Normal authorities. A domestic science teacher will be employed and the manual training work on the east side will be in charge of a practice teacher from the Normal.

ERIES LOST GAME

News has leaked from Minetto of a game of baseball played there Monday between the Erie St. lads of this city and the Minetto team, in which the local boys were trimmed properly. Minetto won 32-2. The Minetto correspondent says:

"The visitors were unable to land on Baker, who twirled for the locals, for anything except infield rollers. Minetto pounded the Erie pitchers unmercifully. During the last two innings Baker loosened up a notch and gave them a run in each inning, as they did not wish to take nine goose eggs home. Fourth street of Fulton meets the local team Friday afternoon at the park."

Cheap Paint

The cheapest paint is the one that goes farthest and wears best; there is most in a gallon of it.

What is a quart of milk worth? Depends on the milk.

So of paint; depends on the paint.

Devoe is worth the top price, whatever it is. Poor paint is worth nothing at all; you've got to pay your painter $3 or $4 a gallon for putting it on; and it isn't worth it.

Devoe goes twice as far and wears twice or three times or four times as long.

The cheap paint is Devoe at the top of the market.

DEVOE

L. P. SMITH CO. sell it.

FIRST CONCERT DREW BIG CROWD

Band in Fine Trim, it Caught the Crowd and Everybody Was Pleased

The Elks' Citizens' band ushered in the 1915 band concert season last night at the Elks' home with a blare of trumpets and the rattle of drums, and incidentally rendered one of the most complete and pleasing programs ever hehard here. No estimate of the number of people who attended the concert can be correct, as the crowds were moving up and down First st. all evening, but "everyone in town was there" and there were hosts of visitors. Automobiles were lined up on both sides of the street from Rochester st. almost to Broadway, and if a demonstration is needed to show some skeptics that First st. should be widened, last night was the opportunity for it.

Tables for 200 were set along the south side of the club on the old section of lawn. The graded section of the lawn was guarded by wire. In addition to the ice cream served from the club house, two "Bills" held forth at a cone stand on the front lawn, and exhorted people to part with their superfluous lucre in true Coney Island style. Everyone did a big business, the Elks doling out one hundred gallons of ice cream andseveral pop corn stands in the vicinity also had record sales.

The crowds started to gather early and when the band made its appearance the sidewalks were jammed and there were many in the road. The program was a long one, but every number was keenly enjoyed, particularly some of the waltz selections with the unusual chime effects. The band showed the result of earnest practice and responded promptly to every demand of director Richardson.

The program follows:

March, "The Whip"......Holzmann
Waltz, "Geraldine"............Lodge
Selection from "The Little Cafe" Caryll
One-step, "A la Carte"...Holzmann
Overture, "Poet and Peasant," Suppe
March, "Operatic Rag"....Lenzberg
Medley overture, "Bits of Remick's Hits," Lampe; introducing "At the Mississippi Cabaret," "Wrap Me in a Bundle," "Come Over to Dover," "Over the Hills to Mary," "On the 5:15," "When I Was a Dreamer," "I Want to Linger," "Everybody Rag With Me," "O, What a Beautiful Baby," "Chinatown."
Valse Boston, "First Love," Holzmann.
One-step, "When It's Night-time in Dixie Land," from "Watch Your Step", Berlin.
One-step, "On the 5:15," Gumble.
March, "Spirit of Independence" Holzmann.

Music Charmed; Lawns Suffered

Residents in First st. in the vicinity of the Elks' Home were incensed this morning at the behavior of the crowd which attended the band concert last night. At the Elks the lawn was protected by wire and some of the properties have high fences at the sidewalk, but those which had neither wire nor fence are in a much trampled condition this morning. At times the crowd encroached fifteen feet upon the premises and flower beds and new lawns were ruined. One resident said this morning, "When they said they would hold those band concerts up here, they emphasized the fact that the people could go over across the street and sit in the park. I understood that chairs were to be provided. Well, how many people were over on that side of the street last night? Not fifty! And a thousand walked over my lawn."

The traffic conditions at the concert point came in for some criticism also, especially from people who were not interested in the concert but were going through the city. The street was lined on both sides with cars and at some points cars could not pass each other in the space that remained. When the trolleys were passing cars could travel only one way, and several narrow escapes from accident were reported. There was a great deal of confusion among the cars when the concert was over, and it is very probable that some other arrangement for the automobiles will be made. One auto owner said this morning, "If the people aren't going to use the park, why not let the automobiles use it. It would take all the cars off First st. and regulations could be made which would govern the parking of the cars."

COULD NOT SUPPORT HUSBAND; LOSES HIM

Denver, June 2.—That Mrs. Jennie Shachet's failure to keep an agreement by which she bound herself to support her husband while he was attending the State University of Colorado constituted cruelty was the finding of a jury in Judge Wright's court today. As a result of the jury's verdict Shachet will be granted a divorce as soon as a motion for a new trial has been disposed of.

Mrs. Shachet sued for separate maintenance, charging that her husband had not contributed toward her support and had renounced her, while Shachet, in a cross complaint, asked for a divorce.

The evidence showed that Mrs. Shachet, in compliance with the agreement, had given her husband all her savings and kept him in college until all her resources had been exhausted. The couple then had a row, and the courtp roceedings were the result.

HARRY LAUDER TONIGHT

Harry Lauder, the smiling genial Scot, who has selected Fulton as one of the milestones of his present and first tour of the globe—not the English-speaking globe because Lauder's personality and charm are universal—but the entire globe, with his current and seventh American engagement becomes a star under the management of William Morris, now his manager for the entire world.

A great deal of comment for years was engendered by the fact that Lauder, while the highest-priced and most lucrative star in America, was compelled to play in music halls in England and Scotland, owing to a long-time contract which he had made with English managers. That contract has now expired. Henceforth William Morris will present him annually in England with the same blare of trumpets and the same theatrical magnificence which has marked his extraordinary gold mine tours over this country. Morris proposes to show England a bit of American showmanship; rent the biggest theatre in London, surround Lauder with a galaxy of world's stars, and, in other words, demonstrate to London what America thinks of Lauder. He did this with amazing success two years ago with Anette Kellerman who the season before had been a vaudeville headliner in England under British management, and who, under the Morris banner, became the rage of Great Britain and was feted and glorified to an extent that her profits in one brief season far exceeded the residue of Sarah Bernhardt at the peak of her ability and following.

ANTI-FRATERNITY LAW UPHELD IN SUPREME COURT

Washington, June 2.—Constitutionality of the Mississippi anti-fraterity law was upheld today by the supreme court without dissent.

The first case to come before the supreme court involving the constitutionality of a state anti-fraternity law was that of J. P. Waugh, who sought admission to the University of Mississippi.

Waugh was a member of Kappa Sigma fraternity at Millsaps college, Miss. In 1912, he applied for admission to the law school of the Uuniversity of Mississippi, but was denied admittance because he refused to sign an "Anti-fraternity pledge" not to aid the organization or perpetuation of any fraternity while a member of the university. He filed a suit to compel the university authorities to admit him, contending that the anti-fraternity law enacted by the state of Mississippi in 1912 was unconstitutional.

DEAF TO FATHER'S PHONE PLEA; WEDS

New York.—Parental objection over the telephone did not stop the wedding of Miss Dorothy Johrens to Robert Stratton on Saturday. Miss Johrens is the daughter of a wealthy retired hotel man of Mineola. He phoned the minister not to marry them, [illegible]

WOULD COMPEL MEN TO VOTE

Watertown Man Proposes Amendments to the Constitution

Watertown, June 2.—Arthur L. Chapman today directed to E. N. Smith and L. H. Ford, constitutional convention delegates from Jefferson county, the following letter:

Watertown, N. Y.,
May 31, 1915

Messrs. Smith and Ford,
Constitutional Delegates from Jefferson County.

"I hereby respectfully offer the enclosed amendments to the state constitution, and request their introduction and adoption, upon the following grounds, among others.

1. Compulsory voting at the primaries as a permanent cure for corrupt bossism can hardly be over estimated.

2. The folderol of one juror hanging 12 has just been illustrated in the Barnes-Roosevelt trial at Syracuse.

3. Perjury is a serious offence, that might be a good deal mitigated by prohibiting witnesses from listening to the evidence of other witnesses.

Most respectfully yours,
Arthur L. Chapman.

Proposed Amendments

1. That the state constitution should be so amended that all qualified voters shall be required to vote at all primary and general elections, upon all questions submitted to the electors of their respective election districts, including the election of officers; and that such requirements should be subject to such reasonable exceptions, regulations, and penalties as the legislature shall prescribe.

2. That the state constitution should be so amended as to allow 75 per cent. of the jurors sitting to render a verdict in a civil case; and five-sixths of the jurors sitting to render a verdict in a criminal case, except that when the penalty is death or life imprisonment, the agreement of 11 jurors shall be necessary for a verdict.

3. That the state constitution should be so amended as to prohibit any witness from listening to the evidence of any other witness in the same case, either civil or criminal, in a court of record; and that any violation of such prohibition shall disqualify such person as a witness, except that where the court or referee is satisfied that there has been no intentional violation of such prohibition such court or referee shall, if requested, permit such offending witness to testify.

PAPER MILLS TO BE RUN BY STRIKE BREAKERS

Deferiet, June 2.—Between 100 and 200 strike breakers are now at work at the St. Regis Paper Company's plant, the employes of which have been on a strike for several weeks. Conditions are fast becoming normal. The saw mill in connection with the plant opened Monday, and the ground pulp mill was opened today for work. It is generally believed now that the whole plant will be in operation the last of this week.

Men are canvassing throughout the surrounding towns to obtain men to go to work in the mill.

Agents have been active in Harrisville, and this morning a party of 18 Americans started out from there for Deferiet. They say that the agents who employed them told them that only the Italian and Polak employes were on a strike. When they arrived in Carthage they met Jacob Stebbins, a national union organizer, who is here looking after the union interests in the strike, and he told them that not only were the Italians and Polaks striking, but that there were many Americans also in the strike. Upon hearin gthis statement the men refused to go to Deferiet, returning to Harrisville.

BARRY FINALLY WINS HIS DAMAGE CASE

A notice of remittiture has been sent to the Oswego courts from the Appellate division of the Supreme court, sitting in Rochester in the case of Charles Q. Barry vs. George Mason, of the Diamond Excelsior Works of this city.

Barry sued for $875 and costs for damages received in an accident at the excelsior works last fall. Robert Pendergast represented Barry.

Before Justice DeAngelis and a jury in Oswego, the plaintiff won a verdict of the full amount and costs. Mr. Mason appealed the case, but the judges of the Appellate division upheld the decision of Justice DeAngelis unanimously.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, June 2.—Night sessions in connection with the Constitutional Convention are likely to begin shortly. For over four weeks the delegates have been assembled here with but little to do other than to introduce proposed amendments to the State Constitution and attend committee hearings.

The preliminary steps or organization have been perfected, from now on the wheels of activity will move rapidly and it is predicted, to a far greater extent each day than heretofore. The delegates appear anxious to complete their duties, and realizing that such duties are arduous and attended by much detail, have determined to get down to business-like methods at once.

In order to give the public opportunity to be heard upon the various proposals which have been presented, hearings will be held at night in many instances. This plan will permit debates during the day.

It is said tht during the hot weather regular sessions of the Conventions may be held at night, commencing at 8:30, as was the custom each Monday night when the legislature was in session. The proposition, however, has not yet been determined. It is quite possible that the committee hearings will be held at night only.

Delegates are interested in the rumor that Hon. Jacob Gould Schurman, president of Cornell University and a delegate-at-large to the Constitutional Convention, is a candidate for the nomination of governor next fall. It is stated in many sources that Mr. Schurman became a delegate to the Convention so that he might become in close touch with the needs of the State and because it was his intention to seek higher recognition from the Republican party, of which he is a member, at a later day.

It is known that Mr. Schurman has in the past taken an active interest in politics and that he is regarded as a strong factor in the councils of that party. His efforts have been rewarded, for during the years of 1912 and 1913, he was United States Minister to Greece and Montenegro.

Although Mr. Schurman does not appear disposed to discuss the rumor concerning his political aspirations, his friends do not take this course and are at present exchanging views regarding the story that he desires to be nominated for governor in the fall of 1916.

Delegates who should be politically well informed, hint that the rumor that Mr. Schurman is a candidate has its significance. They point out that the rumor may be more significant when viewed in the light that Governor Whitman is out of the State attending the Panama-Pacific Exposition. They say in addition, that the story may have been sprung to sound public sentiment and that Mr. Schurman may not have any knowledge of its source.

GOOD THINGS EXPECTED OF B'VILLE TODAY

The Fulton High school baseball team will meet the Baldwinsville team at Baldwinsville this afternoon. The locals succeeded in winning the first game of the series from the B'ville aggregation, but the Onondaga county lads have been going along at a great rate since that time and will try hard to retrieve themselves today.

The team will make the trip by trolley, leaving here at 1.30. Coach Stauring will accompany the team. O'Brien will probably do the pitching.

Friday the boys will take on the Solvay aggregation at Solvay. This should be another cracking good game as the first game played here was hard fought and resulted in a victory for Fulton only after a stiff rally by the locals.

MRS. PRATT GIVEN BIRTHDAY SURPRISE

Mrs. W. M. Pratt of State st. was pleasantly surprised Tuesday afternoon by a goodly number of her relatives who came in honor of her birthday. The afternoon and evening was one of thorough enjoyment. After hearty birthday greetings a six o'clock dinner was served.

The hostess received many beautiful gifts as mementoes of the happy occasion.

Alderman's Burner Continues to Interest

A roadway about fifteen feet wide isn ow accommodating the heavy traffic which crossed the Oneida st. canal bridge. The northern half of the bridge has been removed and I. Alderman, in charge of the demolishing of the structure is piling up the old iron which will be shipped to Pittsburgh. The southern end of the structure is still intact but most of the paving on both sides has been torn up leaving only a narrow road over which the electric cars and vehicles pass. Extreme caution on the part of the drivers of vehicles is necessary at this point as a false move on the north side means a twenty-foot drop to the canal bed and on the south side the bricks have been removed from most of the road way.

Contractor Rosoff has completed the fill of the canal bed below Oneida st. and the top of the fill is already up to the level of Wall st. A slight grade will be necessary from this point on, as the level of Oneida st. is higher.

The oxygen burner used by Mr. Alderman to cut away heavy iron girders is still doing effective work and large crowds of people gather daily to see the flame eat through the great iron beams.

JAMES M. MEAD

James M. Mead, one of the oldest and best-known residents of this city, died at his home on Cayuga st. early this morning. Mr. Mead was 73 years old and had lived in this section most of his life. He was at one time engaged in the hotel business.

He was married and is survived by his widow and one son, Charles H. Mead. He was the son of Harvey Mead and Sarah Chubb and was born April 25, 1842.

The funeral will be held Saturday morning from his late home and Rev. J. W. Barrett will officiate. The services will be private and the burial will be made in Mt. Adnah cemetery.

HEALTH OFFICER CAUGHT IN JURY DOPE NET

Buffalo, June 2.—Under indictments charging them with furnishing individuals with habit-forming drugs, four physicaisn were arraigned today before Justice Emery in criminal term of Supreme Court. All filed pleas of not guilty and were admitted to bail of $500 each.

The men arraigned as a result of the crusade against the "dope" traffic were: David Cohn, an inspector in the health department and a physician; Dr. John W. Kales, Dr. William Preiss. There are two indictments againss all but Dr. Preiss.

SCOUTS TAKE A CONTRACT

Franklinville, June 2.—The Boy Scouts of this village have contracted with business men to keep the back alleys cleaned up, charging each merchant ten cents per week. The revenue will amount to over $100 per year.

"A HERALD OF PROGRESS"

TORPEDOES MOVE AT A RAPID RATE

Forty Knot Missile Probably Hit and Sunk the Lusitania.

DESCRIPTION OF THE DEVICE

Extreme Range of a Torpedo is 4,000 Yards, but at 1,000 Yards It is Much More Effective—Varies in Length From Fourteen to Nineteen Feet and Has Machinery For Guidance.

New York.—The German torpedo or torpedoes that destroyed the Lusitania were fired at a range of not more than 1,000 yards, and the torpedoes themselves probably traveled at a speed in excess of forty knots. The submarine or submarines from which the weapons were discharged were submerged not more than fifteen feet, and they had plenty of time to get the exact range before the torpedoes were discharged. Furthermore, the torpedoes were of the most modern and powerful type and of the highest possible speed.

That is the opinion of many of the American officers, all of whom have closely followed the German submarine activities since the underwater war was started by the Germans several months ago.

The extreme range of a torpedo, it was explained by these officers, is about 4,000 yards, but the evidence to be had indicates that all the German submarine work is being done at short range, perhaps less than 1,000 yards. At the lesser range the speed of the torpedo is greater and the aim correspondingly more accurate. At the 4,000 yard range the speed of a modern torpedo should be between twenty-seven and thirty knots, at 3,000 yards about thirty-two knots and at 2,000 yards between thirty-three and thirty-six knots. At lesser ranges the speed may vary from thirty-five to forty knots.

One of the American officers stated that in Charles W. Domville-Fife's book, entitled "Submarine Engineering of Today," there is a chapter on "The Life of a Torpedo," which describes in understandable language and in a correct way these terrible missiles of war.

"A first class battleship takes the best part of three years to build and may cost anything from $5,000,000 upward," the author writes. "This ponderous ship of war can be sent to the bottom of the sea in but a few minutes if struck by a torpedo.

"The modern torpedo varies in length from fourteen to nineteen feet and weighs up to half a ton. It has an extreme range of 4,000 yards. The blunt nose or 'war head,' as it is called, is the business end of the torpedo and contains the dry and wet guncotton and the fulminate of mercury necessary for the explosion. Behind the explosive head is the air chamber to hold the compressed air by which motive power is furnished. Then we come to the search chamber or 'brain' of the weapon, which contains most marvelous mechanism for directing and controlling the machine. Next comes the engine room and, at the tail of the torpedo, the buoyancy chamber.

"Every one of these little peculiarities indulged in by the torpedo is noted in the history sheet and referred to before the weapon is again fired. By this means all the slight defects can be allowed for and a much more accurate aim obtained. It is the duty of the torpedo lieutenant to make up all the 'history sheets' on a vessel, and he may be almost looked upon as a schoolmaster with a lot of small children to understand and manage. Sometimes, but not often during trials, a torpedo is lost. Perhaps days afterward the truant turns up, either washed ashore or towed in by some fishermen after having torn their nets to pieces.

"A small chamber in the torpedo carries compressed air. This helps to sink it to the required depth after it has entered the water. This air, escaping from the chamber by means of a regulating valve, drives the engine at a high rate of speed, which is almost uniform throughout the trip from the tube to the target. The engines turn two screw propellers at the tail of the torpedo. These revolve on the same axis, but in opposite direction, the object being to give stability to the weapon.

"The steering is effected by vertical rudders, which keep the torpedo in the required direction, while the proper depth in the water—usually from ten to fourteen feet—is maintained by horizontal rudders. The torpedo is kept submerged by means of the balance chamber and is controlled in its steering by the wonderful instrument known as the gyroscope.

"So marvelous is its mechanism that in favorable circumstances a torpedo well aimed may be depended upon to strike within a yard or two of the spot aimed at. Briefly described, the gyroscope is a rotating wheel which automatically controls the torpedo's course.

"The method of firing a torpedo is very much like that of discharging a gun. It is expelled from a torpedo tube by compressed air. Upon reaching the water the torpedo is driven by its screws in the required direction. The missile is guided by a very ingenious invention called a 'torpedo director.' This is a little brass instrument fitted with 'sights' like a gun. When the sights are aligned on the enemy the officer in charge presses a key, and electricity causes the discharge."

WOULD CURB LABOR EQUALLY AS CAPITAL.

Taft Declares Trade Unions Seek to Be Privileged Class.

"Labor and labor unions should be restrained in no less a degree than capital already has been restrained," declared Professor Taft in his speech at the Union League club, Philadelphia.

"The principle of labor unions I entirely support," said the ex-president. "The good they have done for the laboring men of this country I am able to point out and would be glad to elaborate if I had time. Putting the men on an equality with their employers was necessary in order that they should share the prosperity of a rising market and not lose too quickly on a falling market.

"They have brought about legislation of the most useful character that but for their information would not have been written on the statute books. They have exercised an authority not because they are a majority of labor, which they are not, but because they are well organized.

"But they must be restrained that they may not go on to do serious damage to our industrial community. They are seeking to be a privileged class. They are seeking to take themselves out of the operation of general statutes that ought to apply to them.

"We have got to learn, and our politicians have got to learn to be courageous and not be frightened by the threat that when they do not do a thing the labor unions will withdraw their support."

2,065,000 MEN IN THE ITALIAN ARMY

Statistics Show That Naval Fighting Force Is Also Strong.

Rome.—In view of the situation now existing statistics showing the naval and land strength of Italy are interesting. They follow:

Army.

Infantry—Two regiments of grenadiers, 94 of infantry of the line, 12 of bersaglieri or light infantry and 8

© by Pach.

DUKE OF ABRUZZI, COMMANDER IN CHIEF OF ITALIAN NAVY.

of Alpine chasseurs, 61 regiments of mobile militia (corresponding to the German landwehr) and about 400,000 infantry of the territorials (corresponding to the landsturm). Each regiment of the first line has its reserve unit. Total infantry about 1,320,000 men, all mobilized.

Cavalry—Twenty-nine regiments, each with its reserve unit; 31 squadrons of militia, 30,000 territorials; total, about 150,000 men.

Artillery—Twenty-four regiments of field artillery, 1 of horse artillery, 2 regiments of mountain guns, 3 regiments of coast artillery, 3 of garrison artillery, 78 batteries of militia and 100 batteries of territorials; total, about 450,000 men.

Signal corps, engineers, medical corps, commissary, etc., about 145,000 men.

Total forces which may be put in the field, 2,065,000 men.

Navy.

First Squadron—Six Dreadnoughts, 5 mounting 13 12-inch guns apiece and 1 mounting 12 12-inch guns; squadron speed, 22.5 knots.

Ten first class battleships (pre-Dreadnought), 4 mounting 4 10-inch and 8 7.5-inch guns; speed; 22.5 knots; 4 mounting 2 12-inch and 12 8-inch guns; speed 20 knots; 2 mounting 4 12-inch, 4 8-inch and 12 6-inch guns; speed, 20 knots.

Five old battleships of small fighting value, 3 light scout cruisers, about 50 efficient torpedo boat destroyers.

For joint service with both army and navy 14 squadrons of 7 aeroplanes each and 10 dirigibles.

An Effective Cough Treatment

One-fourth to one teaspoonful of Dr. King's New Discovery, taken as needed, will soothe and check Coughs, colds and the more dangerous bronchial and Lung Ailments. You can't afford to take the risk of serious illness, when so cheap and simple a remedy as Dr. King's New Discovery is obtainable. Go to your Druggist today, get a bottle of Dr. King's New Discovery, start the treatment at once. You will be gratified for the relief and cure obtained.

POLAND A DESERT; FUTURE IS DARK

Every Second Man In the Country Is Now a Refugee.

PEOPLE IN WANT OF FOOD.

Robert Crozier Long Makes Extended Tour of Country and Finds Great Devastation and Much Suffering. Tells Exactly What He Has Seen and What People Face.

London.—Robert Crozier Long, author and special correspondent, has written an account of his extended tour of the war devastated districts of Poland. In it he says:

"'Finis Poloniae,' Kosciusko's epitaph on his country, has been realised.

"A tour of central and south Poland and the Polish parts of Galicia convinces me of that. I visited all the chief towns and many villages, or ruins of villages, in 10,000 square miles of country lying between the Austro-German lines and the Vistula in a semicircle from the Bzura to the Nida. I visited also the basin of the Dunajec and Willoka, the theater of the sanguinary May day outbreak. The country is a desert, the home of nomads. I got my first glimpse of it on the Bzura, west of Warsaw, where during a four months' artillery duel every habitation has disappeared.

"I reached this battle front first after dusk and from an observation tower saw the remnants were gaunt, erect pillars. This is typical of burnt out Poland. A street of frame cottages, often straw thatched, catches fire from the first shell and only ugly rows of brick chimneys are left.

"Isolated factories all have been destroyed, mostly by airmen's bombs on the suspicion that they were staff headquarters. Thirty villages either were burned or blown up.

"The governor of Radom assured me that in his province 500 villages had been burned. Refugees assure me that in a circle extending thirty miles around Lodz only five villages were spared.

"Poland's population is suffering as no Europeans have suffered since the Thirty Years' war. Every second man is a refuge. Warsaw has 60,000 refugees, a third of them Jews. In Radom I found 15,000 refugees, in Kielce 20,000.

"A Warsaw rabbi assured me that 100,000 Jews from the towns of Lodz, Piotrkow and Lowicz are without homes. Many refugees still tramp the roads, begging despairingly from people themselves beggars. Many thousands are huddled in the tottering fragments of cottages, while 10,000 are shivering in the abandoned trenches and terraced Russian dugouts at Skaryszom.

"I met many refugees without food or money and mostly ill clad. Near Ostrowiec was a dreary procession of men in thick sheepskin coats without other clothing, women in men's trousers and children in dresses improvised from shawls.

"Such is Poland's present. The future will be even worse. The country, ravaged and irreclaimable, begins to resemble the primeval Sarmatian waste. Roads, forests and even fields have vanished.

"The roads which have been repaired cannot bring food to civilians, for all are crowded by parallel transport columns. The fields were destroyed by transport and artillery trains, which, finding the roads too narrow, spread right and left, obliterating farms.

"Winter grain was not sown, and there is no seed grain for spring.

"The worst, because it is irremediable, is the forest destruction. Some woods have been hewn wholesale to make causeways through morasses, some to pave roads, some to make a clear field for artillery, some shelled to bits because they afforded shelter for troops, some drenched with petroleum and burned. This forest devastation means for Poland generations of beggary."

The Point of View.

The progress of the respective warring nations still depends on the point of view of the special correspondent or war office in the case.—Baltimore American.

Two Great Joys.

With strawberries and baseball both on the market, it must be a melancholy soul indeed that does not rejoice in the seasonal blessings.—Chicago News.

They Do Indeed.

Children Cry FOR FLETCHER'S CASTORIA

HANNIBAL NEWS

Miss Lelia Butts of Phoenix is the guest of Mr. and Mrs. John Brackett.

Mr. and Mrs. E. W. Adamy returned to their home in Syracuse Monday after spending the past six weeks with Mr. Adamy's parents, Mr. and Mrs. O. J. Adamy.

Mr. and Mrs. Jay Brackett and family of Mohawk are guests at the Brackett homestead, Hannibal Center.

Mr. and Mrs. V. J. Adamy and family of Syracuse will spend the week-end at the home of Mr. and Mrs. O. J. Adamy.

Miss Susie Spafford was a Sunday guest of Miss Mabel Cooper.

Mrs. William Kelly and son of Syracuse and Mrs. Joseph Pritchard of Montezuma were in town Saturday. Mrs. Pritchard will visit friends at Southwest Oswego before returning home.

Mr. and Mrs. William White of Fulton were guests of Mr. and Mrs. Joseph Albing Saturday.

Elton Farnham has purchased the moving picture plant in this place and will give exhibitions Wednesday and Saturday nights.

Mrs. William Fimeran and children and Mrs. Nellie Lund and daughter Marian of Tampa, Florida, will spend the summer with friends in town.

Miss Mabel Brewster, daughter of Mr. and Mrs. W. J. Brewster, of Detroit, Mich., was married Thursday, May 27, to Samuel H. Chase, of Seattle, Wash., where Miss Brewster has made her home for a number of years. Mrs. Chase's girlhood was spent in this place where she has many friends, who wish her happiness.

Mrs. Frazier Ecker, Mrs. Thomas Willing, Mrs. Arthur Parker, Miss Georgia Thomson and Rev. Jacob Hann attended the Baptist Association at Colosse Tuesday and Wednesday.

Mrs. M. Cooper and daughter, Mrs. Ransom Fletcher of Auburn, were week-end guests of Mr. and Mrs. Will Cooper.

Mrs. Alice Eldredge of Chicago and Mr. Burr Curtis of Auburn are guests of Mrs. Charlotte Eldredge. Mrs. Eldredge will spend sometime with friends in town.

Mr. and Mrs. E. W. Adamy of Syracuse were Sunday guests of Mr. and Mrs. Milton Clark.

Miss Mary Adamy, who has been spending some time in Skaneateles will spend the last of the week with her parents here.

Mrs. Howard Cole and daughter are guests of her parents, Mr. and Mrs. Will Ames of Hannibal Center.

Hannibal Center Grange will attend the M. E. church of that place in a body by invitation of the pastor, Rev. Frank Dunning next Sunday afternoon. It will be observed as memorial day for deceased members of the Grange.

A memorial service for deceased members will be given at Golden Sheaf Grange Saturday evening. All members are requested to be present and bring plenty of flowers

Children's Day will be observed at the Presbyterian church Sunday, June 6th. A beautiful cantata, "The Carnival of the Flowers," is being prepared for the occasion.

Memorial Day was observed in this place Saturday. A large audience greeted Dr. Tillapaugh at the M. E. church and enjoyed the splendid address given by him. A short but interesting program was also given by pupils of the High school, a large number of whom accompanied the veterans to the cemetery carrying flags. Hannibal Center band furnished music which was very much appreciated.

Amasa G. Keeney, a prominent and highly respected resident of North Hannibal, died Tuesday, May 25, after a short illness. Mr. Keeney was born in Phoenix in 1837, but had lived in Hannibal for 55 years. He leaves besides his widow, two daughters, Mrs. S. D. Pettigive of Oswege and Miss Maude Keeney of Brooklyn. Mr. Keeney as a member of Hannibal Lodge I. O. O. F. and also of Golden Sheaf Grange. Services were held Thursday afternoon at the home of Rev. Jabez Stallwood officiating. Interment at Fairdale.

Mrs. John McFarland, who was seriously injured by falling through a trap door at the barn recently, is more comfortable and a rapid recovery is hoped for.

R. F. Brower and family of Syracuse were in town Saturday.

Work on this end of the State road is progressing rapidly, and when finished, will be greatly appreciated by the people of this vicinity. At present the large number of autos traversing the roundabout road to Fulton keep Auburn st. in a cloud of dust.

Prof. Roman gave an interesting address at the Baptist church Sunday evening.

Roy Hall of Sterling was the guest of Hubert Rogers last week.

Miss Eleanor Garrison gave an address on woman suffrage at Hannibal Center Grange last Friday night. Miss Garrison is a forciful and ready speaker and held the attention of her audience.

Fred Dexter now occupies the Brace Stevens tenement house.

Mr. and Mrs. Jeroloman of Ira were geusts of friends in Fulton.

Mrs. Anna Skutt has returned from Weedsport where she has spent the winter.

Mr. and Mrs. Frank Wellington entertained friends from Syracuse Sunday.

Miss Estella Hyart has purchased a fine grand piano.

William Clark, who suffered a broken hip by falling on the pavement last fall, is able to get about a little.

Alexander Morrell is reported ill.

Mrs. Ezia Tucker sustained painful injuries by a fall at her home last week.

Mrs. Ernest Rifenburg and son of Binghamton are guests of her parents, Mr. and Mrs. Frank Grant.

Mrs. Azalia LaFountain of Fulton was a recent guest at George La Fountain's.

Mr. and Mrs. George Barlow spent Memorial day with friends at Lysander.

Edward Fairley is improving his house with a coat of paint. Will Byrne is doing the work.

Miss Eva Brackett, who has been ill for the past two weeks, improves slowly.

SOUTH GRANBY

George White and Charles Cook and family were guests at Will Quade's Sunday.

Mrs. H. Austin spent last week visiting friends in Mt. Pleaant. Mrs. Austin arrived home Saturday.

Mrs. Bessie Garrett and children are spending a few days with her parents.

Mrs. Ernest Luke and children were guests of Alonzo Luke the last of the week.

Mr. and Mrs. Milo Austin visited their sister, Mrs. Minnie Andrews, Sunday.

A dear baby girl came to the home of Mr. and Mrs. Floyd Dickenson Thursday, May 20th. May she stay long to gladden their home.

Mrs. Clara Goodrich is caring for her sister, Mrs. Dickenson.

Miss Flora Fisher has gone to visit her niece, Mrs. Maud Pierce, of Olean.

Miss Norton, of Fulton was a week end guest at Herman Moody's.

Miss Emma Grochan and a friend are guests at Augustus Grochan's.

David Haney has gone to Syracuse to visit his sons, Fred and John Haney.

Sidney Hammond has moved his family into the Sickler house owned by Mr. Barry.

Fern and Lyle DeGraff have been spending some time at their grandfather's, Morgan Butler's.

Mrs. Jennie Snyder of Syracuse is the guest of her brother, William Butler.

Mrs. Clara Shattuck and children visited her brother, Fred Paine, Sunday.

Ralph Brown delivers mail in a new auto.

Quite a number from this place attended the ball game at Lysander Saturday.

Mr. and Mrs. Ralph Brown are on an auto trip to Vernon to visit his mother.

Mr. and Mrs. Pingree and Mr. and Mrs. Fisher went to Hannibal last night to hear Mr. Rowin of Syracuse University speak on Woman Suffrage.

The prayer meeting will be held at Mr. Austii's Tuesday night.

If your horse suffers from mosquito bites, a bee sting or ivy poisoning, apply Hanford's Balsam to take the poison out and cool the inflamed skin. NO 21

State of Ohio, City of Toledo, ss.
Lucas County,

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and thats aid firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CHENEY.

Sworn to before me the subscribed in my presence, this 6th day of December, A. D. 1886.

(Seal) A. W. GLEASON.
Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and muscous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.
Sold by all Druggists. 75c.
Take Hall's Family Pills for constipation.

MT. PLEASANT

Rev. Williams is attending the Laymen convention and Mrs. Williams and daughter are visiting relatives at Westerville.

Rev. Wilbur Clemens of Syracuse will preach here June 6th.

Mr. and Mrs. Howard Ives are receiving congratulations on the birth of a son.

Mr. and Mrs. George N. Rowlee with friends of Niles, Michigan, are visiting relatives here. They came by auto.

The friends of Ross Rowlee are pleased at his rapid recovery from his accident. He hopes to be able to take Regents with his class.

Mrs. Charles Osborne and daughter spent the week-end with her parents in Syracuse.

Mrs. Earl Rowlee and Mrs. Jane Pearson were guests at Sidney Austin's on Friday of last week.

Rev. and Mrs. Holmes and children, Mrs. George Grant, and Miss Lester were guests at the Baldwin school recently and also at the home of the teacher, Miss Mable Grant.

Mrs. Ernest Rowlee entertained Mrs. Hannah Austin of South Granby, Mrs. Pearson of Fulton and Mrs. Earl Rowlee on Thursday of last week in honor of her mother, Mrs. Lydia Osborne.

Harrison Rockwood is treating his neighbors and friends to auto rides.

The closing exercises at Rowlee school are held Wednesday evening; at Weed, Thursday, and Baldwin Friday evening. Supt. Gardner will attend them.

Waite Gorham is the new blacksmith at John L. Ives'.

George Ives, Henry Howard, Willis Clark and John Howard spent the week-end in Harrisburg on a fishing trip.

Harold Distin of Fulton was the recent guest of his parents.

George Jasper and Virgil Rowlee visited Charles Tompkins in Minetto last Saturday.

BUNDYS CROSSING

The funeral of Mrs. Jane Brylie of Fulton was held here at the church on Tuesday. The bearers were Fred Dodge, Ransom Dumont, David June, Edward Steward, Alonzo Burchin, G. Rickert, all of this place. Burial was made at the Bundy's cemetery.

Mr. and Mrs. Bert Thornsburg have moved to Wayland where they will remain for the summer.

Mrs. Lewis Burchin is recovering from her injuries received a few days ago.

Miss Goldia Graham spent a few days the past week with Mrs. Bryon Wells.

Mr. and Mrs. Fred Loughrey have moved to Oswego Center.

Mrs. Fannie Dodge of Syracuse was in this place a few days the past week.

Mrs. Alice Adams was in Oswego on Saturday.

The cemetery was beautifully decorated with flowers and flags for Memorial day.

Our school closes on Thursday. There will be singing and speaking on Thursday evening by the pupils.

Miss Marjorie Congdon of the Kingdom is spending some time with her brother, Benjamin Congdon and family.

Mr. and Mrs. James Stevens spent the week-end with Mr. Stevens' parents in Madison county.

Mrs. Byron Wells has been entertaining her sister, Mrs. J. E. Peachin and family of Bernhards Bay for a few days.

Many from here spent Memorial day at Oswego and Fulton.

Clarence Steward called on Mrs. Lathrop on Friday.

BERNHARD'S BAY

William Slayter purchased a full blooded Holstein heifer named Vandecamp Sergant Pearl of Mr. Soul of Vandercamp.

Mrs. William Slayter and Mrs. E. Curtiss fere in Cleveland Monday evening.

Several from this place went to Cleveland to attend a banquet of Eastern Stars and Masons on Saturday evening.

Mrs. J. Bailey was a recent guest of Mrs. Jane Halls.

Mrs. J. E. Peachin and children spent several days recently with her sister, Mrs. Byron Wells, of Fulton.

A movement has been started to organize a suffrage club at Bernhards Bay and Mrs. Hira Short has inivted members of Cleveland club to bep resent Wednesday.

Mrs. John Coady called on Mrs Jane Hall on Friday.

Miss Flossie True is guest of her sister, Mrs. D. Peas.

Mr. and Mrs. Harry Myers were in Syracuse last Saturday.

Mrs. Vera Spencer and daughter, Doris, were in Oneida recently.

APPLE CANKERS; THEIR CONTROL

A constant source of danger to apple trees lies in cankers of various kinds, which, persisting from year to year, if left uncared for, may in time cause the death of a large limb or a tree. Through its experiment station, the New York State college of agriculture has just issued a circular dealing with this problem.

In New York State, injury by frost is the main predisposing cause of canker, says the circular, and in severe winters such varieties as Tompkins King, Twenty Ounce, and Hubbardston, as well as some others that are normally less susceptible to the disease, may be seriously affected. Other forms of cankers, known respectively as New York apple-tree canker, fire-blight canker, European apple-tree canker, and Illinois blister canker, are fungous diseases affecting bark or wood on the trunks or the branches of trees.

The only effective means of controlling these cankers, say the authorities, is by removing the diseased bark or cutting the affected limb from the tree. The cutting should be done very carefully and the resulting wound should be covered with a dressing, not so much for the purpose of hastening the healing, but to protect the heartwood from decay while the new tissue is being formed.

The circular on apple cankers, No. 28, will be sent without charge to any resident of the State who applies to theh New York State College of Agriculture, at Ithaca.

FREE FALLING.

Just Collapse, Drop Limply and You May Escape Serious Injury.

It was stated in a description of a recent aeroplane mishap that the aviator had time to clamber to the upper struts of his machine and that when the crash came he was practically unhurt, the landing wheels and lower part of the machine receiving and absorbing the shock.

Flying men, too, in the early days of aviation frequently leaped from falling machines and escaped with minor injuries. There is a knack in leaping and an art in falling, and athletes and aviators know both. It is to "fall free" and to offer no resistance or as little as possible.

It is not Providence that specially guards drunken men and little children when they topple. They collapse, and as the muscles and sinews are not drawn taut and no resistance offered, but little damage and frequently none results. The bone of a limp arm would need some force to be applied before it broke. A "resisting" arm would snap almost at once. In a fall all attempts to recover one's balance, if unsuccessful, mean greater damage. Let yourself collapse—fall limply—and you may escape serious injuries. It is the strain and wrench on muscles and sinews which make the bones snap.

Fall anyhow. Don't try to save yourself—and you will.—London Answers.

Never Had 'Em.

Old Dick was an old plantation darkey. He was rarely if ever sick, and he always claimed that it was the way he had lived. One day as he was walking down the street a local merchant, taking advantage of his ignorance, accosted him thus:

"Dick, one of your best friends has just told me that you have ancestors of the worst sort."

"Now, look heah, Cap'n Gawg, I doan want to hurt nobody, but I jes' want to know who dat man was wot tol' you, and I sho will go atter him, 'cause he done gone and 'sult me. Me got ancestors? Why, cap'n, that's as big a lie as was eber told. I neber had nothin' in my life but the mumps and colic."—National Monthly.

The Telephone Pole.

The employer of a Polish girl who has learned quickly to speak English tells of her attempted mastery of the telephone. After its use was explained to her she was eager to answer every call. A ring came and she jumped to the phone.

"Hello," came from the receiver.

"Hello," answered the girl, flushed with pride at being able to give the proper answer.

"Who is this?" continued the voice.

"I don't know," exclaimed the maid. "I can't see you."—Philadelphia Ledger.

Two Methods.

"I buy my wife everything she wants. How about you?"

"I keep mine wanting a few things, just to be sure that her interest in me is maintained."—Kansas City Journal.

Most Children Have Worms

And neither Parent or child know it yet it explains why your child is nervous, pale, feverish, backward. Often children have thousands of Worms. Think of how dangerous this is to your child. Don't take any risk. Get an original 25c. box of Kickapoo Worm Killer, a candy lozenge. Kickapoo Worm Killer will positively kill and remove worms. Relieves Constipation, regulates Stomach and Bowels. Your child will grow and learn so much better. Get a box today.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhœa. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

Home Study Course in Vegetable Gardening

An advanced reading course in vegetable gardening has just been started by the extension department at Cornell, in order to meet a growing demand for home study courses. This advanced reading course in vegetable gardening is the second of such course offered; one in fruit growing was started last fall. Both courses are said to appeal to farmers who desire to "read up" on the subjects, as well as to those who are not fully familiar with the subjects treated.

These advanced reading courses are conducted by means of a textbook, by questions, and by correspondence, and a special effort is made to assist in making a local application to the principles and practices discussed. The work of those taking the course is graded and the only expense of either course is in connection with a standard textbook, not published by the college.

Those who desire to receive information on practical farming problems without even this expense may register for the general reading course lessons. Residents of New York State may obtain further information about the reading courses, general or advanced, by addressing the college of agricultural at Ithaca.

DEAR FRIEND WAS MOTHER.

Girl, Given Away Because of Poverty, Now Knows Parents.

Lacrosse, Wis.—Hazel "West," fifteen-year-old girl, who was taken away from Fred West, her foster father, by Judge Brindley because he had neglected her, has found her mother in a woman she has known all her life as a dear friend. Mrs. Fred Green, the mother, appeared before Judge Brindley and told the remarkable story of how she had given Hazel to the Wests when she was a baby because of her inability to care for the baby.

A mysterious telephone call to the Home of the Friendless, where Judge Brindley placed Hazel, effected the reunion of mother and daughter. The message said that if Hazel would come to one of the downtown stores she would be given a heavy coat. Hazel went downtown alone and did not come back. Investigation revealed her at the home of Mrs. Green, who had met her in the store and told her the story of her parentage.

In explaining the case to the judge Mrs. Green said: "I was the mother of another child when Hazel was born, and we were too poor to care for both of them, and at Mrs. West's urgent plea I let them take her.

"Not a week has passed since that I have not seen her. The Wests were better able to care for her than I, and I have been happy in the thought that she was being brought up in the right way. But since Mrs. West's death I have been worried, and now that she has been taken away from West I intend to keep her."

Mrs. Green is the wife of a railroad engineer. Hazel's father is dead.

A good pair of auto gloves or a good duster, $1.00. VanWagenen, Inc. adv.

1873 DIME SELLS FOR $170.

Quarter Dollar of 1866, Only One Known, Brings $210 at Auction.

In the sale of a coin collection in New York city $170 was paid for an uncirculated dime of 1873, Carson City mint, without arrows.

An uncirculated quarter dollar of 1894, only one other in this country being known, sold for $47. An uncirculated quarter dollar of 1897 brought $40. A quarter dollar of 1842, small date, went for $75. A quarter dollar of 1866, without motto, the only known specimen, brought $210. An uncirculated quarter dollar of 1858, San Francisco mint, went for $42.

Use Hanford's Balsam to prevent gangrene by keeping the sore clean and healing it.

LEGAL NOTICES

Notice to Contractors

STATE OF NEW YORK, Office of the State Commission of Highways, Albany, N. Y.—Pursuant to the provisions of Chapter 30, Laws of 1909, as amended by Chapter 646, Laws of 1911, and Chapter 80, Laws of 1913, sealed proposals will be received by the undersigned at their office No. 55 Lancaster Street, Albany, N. Y., at 1 o'clock P.M., on Friday, the 4th day of June, 1915, for the improvement of the following highways:

Oswego County, Road No. 1287; Name, Pulaski-Williamstown, Part 3; Mileage, 7.75. Road No. 1288; Name, Pulaski-Williamstown, Part 1; Mileage, 5.12. Also, Rep. Con. No. 701; Class of Work, W. B. Mac. 2½ ins.; Resurfacing; Road No. 653; Name, Granby Roads; Town, Granby.

Maps, plans, specifications and estimates may be seen and proposal forms obtained at the office of the Commission in Albany, N. Y., and also at the office of Division Engineer, Chas. J. McDonough, 433 South Salina Street, Syracuse, N. Y.

The especial attention of bidders is called to "Information for Bidders" in the itemized proposal, specifications and contract agreement.

Proposals for each road or contract must be presented in a separate sealed envelope endorsed on the outside with the name and number of the road or contract for which the proposal is made. Each proposal must be accompanied by a New York draft or certified check payable to the order of the State Commission of Highways for an amount equal to at least five per cent. of the amount of the proposal which such draft or check accompanies.

This draft or check will be held by the Commission until the contract and bond are duly executed.

The successful bidder will be required to give a bond for fifty per cent. of the amount of the contract, such bond to be executed by a surety company to be approved by the Commission, or a bond secured by the deposit of collateral securities to be approved by the Commission.

The right is reserved to reject any or all bids.

EDWIN DUFFEY,
Commissioner.

J. J. MORRIS,
Secretary.

ROBBERS TOOK CASH AND WATCH

One Victim of Fruit Valley Tragedy Lies in Oswego Hospital, Wounded.

Oswego, June 1.—For the second time withhin two years the home of Morris D. Pierce at Rural cemetery, Fruit Valley, was visited by robbers last nighht and, after beating Miss Ella Mead, aged fifty-five years, the housekeeper, into unconsciousness with a piece of lead pipe and leaving her lying in the yard, got away with about $71 in currency, $31 of which belonged to Miss Meade and the balance to Mr. Pierce. A gold filled watch, Elgin make and Raymond movement, worth about $50, was snatched from Mr. Pierce's pocket and also taken, the chain to which it was attached being broken.

Mr. Pierce, who is very deaf, and the housekeeper were sitting in the dining-room about nine o'clock when a knock came to the sitting-room door and without waiting for an answer the door opened and three men crowded into the room. One of them had a revolver, which he pointed at Mr. Pierce and told him that they wanted his money. From an inside vest pocket they took a large old-fashioned bill holder with several divisions. This they tore in two, lengthwise and from one side took about $40, leaving nearly $60 more in bills of larger denomination in the back part of the bill fold, which they did not see and which they threw upon the floor.

Woman Fought Hard

They then told Miss Meade that they wanted "the mon" and she started upstairs to get them her pocketbook, believing that then they would go away. Two of them, however, followed her up stairs and one of them attacked her while the other went through the dresser. Miss Meade, who is a slight wiry woman, fought hard for her honor and her life. The man who assaulted her threatened to kill her and drawing a stilletto struck at her heart. She interposed her left arm and the blade of the stilletto passed through the fleshly part of the muscles, leaving an ugly wound. The fellow aimed another blow at her which struck her over the left eye and slipped around, leaving a gash there that bled profusely. In the struggle she managed to get the stilletto, which she threw under the bed, and the fellow pulled out the lead pipe and began to belabor her about the head, shoulders and chest. She fought desperately, however, clawing and biting and using her fists as best she could until she got the lead pipe, which she sent flying after the stilletto. Her strength gave out and she fainted. The men had gone down stairs, she says, when she regained consciousness and, making through the door she ran across the lawn to go to the home of Mr. Ralph Pierce to tell him of the assault, when she was again attacked and left unconscious on the lawn. When she recovered she went to Ralph Pierce's house and told him robbers were murdering his father.

Patrially dressing, Mr. Pierce slipped a couple of shells into a shotgun and started on a run for his father's, about 300 yards distance South. As he approached he saw his father coming out and he was informed that the men had gone down the road North in the direction of the Beach.

Used Stilletto

Mrs. Ralph Pierce notified by telephone Ira Pease, Asa ePase and other neighbors and they in turn called Chief of Police Richardson, and the latter with Patrolman Miller and Ray Armstrong, the chauffeur, drove the patrol to the scene of the robbery. Ralph Pierce and neighbors in the meantime had made a search of the house and found the stilletto and lead pipe under the bed, where Miss Meade had thrown them. The stilletto, he says, was covered with blood.

Upon investigating Chief Richardson found that the telephone had been put out of commission. Following the wires back for a distance of about 150 feet from the house the Chief came to a pole which one of the men had climbed and cut the wires, presumably before they entered the house.

Sheriff Buck was soon after called. He was soon on the scene with Under-Sheriff Schultz and Deputy John Dennis. Under-Sheriff Schultz drove to Furniss station to see that no one boarded a passenger train that was due to arrive there in four minutes, while the others searched the neighborhood for evinence that might lead to the identification or give a clue to the perpetrators of the crime.

Both Mr. Pierce and Miss Meade say that the men are foreigners. Two were shorter than the other, the latter being about five feet seven inches tall, slim and dark.

It is the belief of the authorities that the crime was committed by those acquainted with conditions. Yesterday being Memorial Day many owners of lots in Rural cemtery paid to Mr. Pierce, who is the caretaker, sums of money for maintaining lots and seeing that the grass is cut and so forth. He had a considerable sum of money collected, about $200 in cash and checks. In a drawer in his sitting-room into which the thieves did not look there was a considerable sum of money in cash, silver and small bills besides $50 in checks. This was not disturbed. However, the robbers evidently knew that there had been money paid to Mr. Pierce and they went for it, knowing that Mr. Pierce, who is well advanced in years, or his housekeeper, could make little resistance.

Dr. Marsh, of South West Oswego, was called about midnight and prescribed for Miss Meade, who had become hysterical. The latter's home is in Brier Hill, St. Lawrence county. Today she is confined to her bed. She is afraid that some bones have been broken, but Dr. Marsh doesn't think so.

Today Mr. Pierce said that the men were Italians from their appearance. None of them wore masks. When the first fellow entered he said he wanted to buy a grave in which to bury his sister. While he was talking the two others surrounded Miss Meade and the taller pointing a revolver at Mr. Pierce's head ordered him to sit down and keep quiet. He stayed on guard with the revolver in a threatening position. That they might not be seen from the highway the men turned out the lights in the house and because of that fact Mr. Pierce did not see the two men who had been upstairs leaving the house. After the man with the revolver left he started for his son's and met him in the road hastening to his assistance.

Miss Meade said that there were four men in the party, one of them having been left standing in front of the barn with a rig and evidently watching to give an alarm of anyone approaching.

The whole countryside is aroused over the assault on Miss Meade and the robbery. Miss Meade's condition is critical. Today her body was sore and she could hardly breathe from the pounding she received from the bludgeon carried by the robbers. On the advice of Dr. Marsh she is to be removed to the hospital this afternoon. After her recovery she will go to her home in Brier Hill, six miles from Ogdensburg. She says she will be able to identify the robbers if she ever again sees them.

No clue of the criminals has as yet been discovered.

MRS. STEVENS STRICKEN AT O. & W. STATION

While passing the O. & W. station at 2:30 this afternoon, Mrs. Will Stevens, residing in the quarter of the city known as "Stony Arabia" was stricken with an epileptic fit, but was prevented from falling to the ground by several men who were nearby, who rushed to Mrs. Stevens' assistance upon hearing the screams of her daughter. The policeman stationed in the vicinity had the woman carried into Snyder's grocery where temporary assistance was rendered. Dr. Cusick was called immediately, and, after administering to her, pronounced Mrs. Stevens out of danger.

Mrs. Stevens is the widow of Will Stevens who was killed on the Empire United Railway tracks several years ago.

For galls use Hanford's Balsam without stopping work.

JUNE WEEK ON AT ANNAPOLIS

Annapolis, Md., June 2.—June week, with its usual gaities and its series of formal functions woven about the coming of the members of the naval committees of Congress to inspect the institution, opened at the naval academy Monday. The ceremonies will continue until Friday when graduation exercises will be held and the graduates will receive their diplomas from Secretary of the Navy Daniels.

The standing of the first ten men in the graduating class was learned unofficially tonight. Third in this list appears the name of Ralph Mck. Nelson, Jr., Peekskill, N. Y. As he is among the first line he is listed as one of the "star" members.

ROCHESTER CHAMBER'S APPRENTICE PACT

Rochester, June 2.—The Commercial and Industrial Education Committee of the Chamber of Commerce, of which Frank W. Lovejoy is chairman, has drafted a tentative apprentices' agreement to be brought to the attention of the woodworking plants of the city and the Board of Education, with the idea of establishing a course in woodworking in the city shop schools.

Steamer Rugs for cool evenings in the auto. VanWagenen, Inc. adv

The "Hello" Microbes.

Many a woman housed by a cold amuses herself and attends to necessary business over the telephone. But when all the rest of the family come down with like colds she wonders how they caught it, because she has "not kissed anybody."

Nobody thinks of the mouthpiece of the telephone, and yet where is there a more convenient harbor than that for germs breathed into it from throat and nose?

The average household does not even think of dusting out the transmitter, and it is cleaned only upon the occasional visits of the repair man from the telephone company. As a matter of fact, it should be washed out frequently with a disinfectant. Even the ear piece is benefited by an occasional "wipe," as it rests against the hair and ear of everybody in the house, to say nothing of visiting workmen who want to call up headquarters.

When You Clean Up.

Save fine towels that are too worn for further use and lay them in the bottom of the drawers, with lavender between the folds.

While the clothes on the line are airing, pack flannels, furs, feathers, etc., in mothproof paper bags or boxes to be stored away in the attic, and before the dew falls at night return cotton and other fabrics required for summer use to the drawers and wardrobes that have been cleansed and aired.

Destroy with a hard heart every useless thing and burn everything that you see no probability of needing in the near future. With the best of care odds and ends will accumulate, and the labor of handling and preserving them in the hope of finding use for them by and by is often more than they are worth.

Going to Extremes.

A New York woman used an ax, an icepick and a butcher knife on her husband. Some women go to extremes when they set out to make an impression.—Detroit Free Press.

BUILT TOWN FOR WHEAT.

Kansan Wanted a Market and Breton Became It.

Colby, Kan.—Because he raised 150,000 bushels of wheat in 1914 and needed a place to market it without a long haul Ben Foster, a large landowner, built a town of his own. He erected an elevator, lumber yard, coal yard and store; also residences for his employees.

He named the town Breton, and now it is getting away from his first idea.

Other people are moving there, and Foster is in a good way to become the proprietor of a thriving country town. He refuses to sell the lots, but rents them on long leases.

WATCHING THE SITUATION.

Chairmen of Committees on Foreign Relations Hold Important Posts.

Washington.—In the event of a controversy between this country and any foreign power Senator Stone and Congressman Flood will be two of the most important members of congress. They are chairmen of the committees on foreign relations, in the senate and house of representatives, respectively.

All international matters of any great importance are handled through these

Photos by American Press Association.

SENATOR STONE (TOP) CONGRESSMAN FLOOD (BELOW).

committees when congress is in session and of course congress will be called to meet if developments make this necessary.

Both Senator Stone and Congressman Flood have been in Washington a great part of the time since President Wilson addressed his drastic note to Germany and are in close touch with all developments.

HONEYMOONERS WALK ACROSS THE COUNTRY

Took Pair Two Years to Make the Long Trips.

Harrisburg, Pa.—Journeys across the continent twice on foot within a period of two years marked the unique honeymoon trip taken by Mr. and Mrs. John Broxman, who live near here. In the twenty-four months that they have been away the young married couple have traversed the parched sands of the semitropical countries of the south, the fertile valleys of the middle west and the rugged mountain paths of the far western states. They are happy and have returned to their home without reporting a mishap.

In making their long journey on foot Mr. and Mrs. Broxman have won both fame and fortune, for not only were they cordially [illegible] in all the towns and cities through which they passed, but as the result of their long hike they have been presented with a large sum of money by a brother-in-law of Mrs. Broxman in California, and henceforth they will make their home on a farm which has been purchased by the bridegroom near Harrisburg.

Mr. and Mrs. Broxman were married two years ago and had planned to spend their honeymoon quietly in the east. But Mrs. Broxman's brother-in-law in Santa Anna, Cal., told them that he would present them with a substantial sum of money if they would take as their honeymoon trip a "stroll" from Harrisburg to California and back again. They decided to try to win the prize held out to them, so immediately after the wedding ceremony was performed they started on their long hike.

Pet Collie a Hero.

Wallace, Ida.—Were dogs entitled to receive medals a six-month-old Scotch collie owned by Horace Langdon would be entitled to recommendation for such honor. The cabin occupied by Langdon and Charles Bare was destroyed by fire. Langdon was roused by the dog frantically clawing and scratching his neck and shoulders. He hastily broke a window and, grasping the dog, jumped outside and awakened [illegible]

AID BELGIANS ON A BUSINESS BASIS

Elaborate Financial System Gets the Best Results.

ORGANIZED BY AMERICANS.

Commission Will Have Provided Foodstuffs to the Value of $65,000,000 by Middle of August—Profit Made in Cheap Bread—Belgians Have Done a Lot of Work Themselves.

London.—The American commission for relief in Belgium will have provided foodstuffs to the value of about $65,000,000 for the Belgian people by the middle of August. Charitable contributions from America will have amounted to about $5,000,000 and from other quarters of the world approximately the same total. The great bulk of the food supplies, representing the remaining $55,000,000, is being provided indirectly by the Belgian people themselves.

This is made possible by the elaborate financial machinery set up by the commission, enabling the Belgians to utilize their own energies and resources. Fully 75 per cent of the Belgian people are being supplied with food by the commission without recourse to charity. One result of the commission's operations is that bread is now cheaper in Belgium than in London.

When the commission was formed last October, under the chairmanship of Herbert Clark Hoover, it was estimated that the total imports required to keep the population of Belgium alive would amount in value to about $50,000,000 before the next harvest. The rise in the price of foodstuffs increased the necessary amount to $65,000,000.

The greatest problem in this connection was involved in the fact that foodstuffs sold in Belgium to those who still had resources were paid for in paper. The entire metallic currency disappeared early in the war, and national bank notes were so scarce that many communes were printing paper issues of their own.

This paper money had no value outside of Belgium, and in any event to have exported it would have denuded the country of currency. But unless this money were turned into gold it would be necessary for the commission to find in the outside world an amount of money which was out of the question. At the outset, therefore, the commission began to devise a method for effecting the exchange of these local currency obligations into gold.

Negotiations were opened with the belligerent governments for permission to set up a form of exchange whereby persons or institutions abroad owing money in Belgium should turn over to the commission the amount due in sterling or dollars. The commission undertook to pay their debts for them in Belgium out of paper money which it received from the sale of foodstuffs. The belligerent nations agreed to this after long negotiations, and there was thus set up a form of exchange. The commission is today the only institution which is doing a systematic banking business across enemy lines.

By degrees the commission has extended this exchange department of its organization, which has come to be the lifeblood of the structure. It has induced many well to do Belgians to pledge their credit for moneys handed over to the commission in gold, which in turn is paid to them in Belgium in paper. The commission also has advanced money to the communal governments, taking their obligations therefor, and by pledging these obligations abroad has obtained further resources. The communes have been enabled in this manner to procure money to pay communal officers, to maintain the schools and keep up municipal works, thus enabling the Belgians to carry on the details of civil government and saving the country from the danger of anarchic conditions.

One phase of these operations arose in connection with a number of Belgian concerns, which, while they had resources abroad, had exhausted their local resources in payment of workmen or in disbursements to depositors. A form of hardship had grown up through the inability of such concerns to make good their obligations to the public, and persons who had believed themselves well to do were being forced to the bread lines through inability to draw money due them.

Through the operations of the commission these concerns were enabled to hand over in London and New York funds they possessed abroad, and the commission in turn delivered paper money received from the sale of food. Thus the cycle of credit was reestablished, and many thousands of persons were saved from the bread line.

Before this machinery was set up practically the whole population was dependent on the world's charity, paper money being of no avail. The initial appeals of the commission, therefore, were made on behalf of the 7,000,000 of people. With the success of these financial efforts, however, all of the people still able to pay for their food were made self dependent, and the appeals of the commission for charitable [illegible]

Bryan Finally Admits Lusitania Affidavits, Accepting All Proofs

President Wilson Kept In Ignorance of Affidavits for Twelve Hours. Was Ready With New Ultimatum

Washington, June 3.—Official circles were stirred today by the revelation that Secretary Bryan had received four affidavits declaring the Lusitania was armed.

Secretar y Bryan admitted the existence of the affidavits twelve hours after the news had been given to President Wilson and the Washington public.

Early in the day Secretary Bryan had denied that the affidavits had been received. This denial was sent broadcast to all parts of the country by the correspondents of newspapers. His later admission that the affidavits were in the Department was made to thirty-five correspondents. It followed the visit of the German Ambassador, Count von Bernstorff, to the White House and his half hour's conference with President Wilson. The Ambassador referred to the affidavits as justification for the German request that there be an investigation into the facts concerning the Lusitania before a decision was made on the demands of this Government.

The President was surprised by the Ambassador's statement that such affidavits were before the State Department. It was learned later that three of the affidavits have been in the State Department since last Friday.

Great activity in the department following Secretary Bryan's admission that the affidavits were actually in the State Department was caused apparently by the necessity for haste in preparing them for the President's consideration, and in endeavoring to place the responsibility for the fault.

Law officers of the government regard the filing of the affidavits as giving a new and very important interpretation and aspect to the German reply. These officials maintain that they were undoubtedly in the mind of Foreign Minister von Jagow when he said this government knew without doubt that the Lusitania was armed. For that reason, it is stated, the affidavits must be considered by the President and in fact may oblige him to recast some degree his proposed reply.

It is stated that the President would provoke question of his reasonableness if he were to send a message to Germany which would be practically an ultimatum, after he had been put in possession of statements sworn to, affirming a justification for the attack on the Lusitania.

"The President," said one of the highest outhorities, "may not discuss these affidavits in his message to Germany, but he will be bound to take them into consideration in framing that message as he knows that Germany, at least, believes them to be true. It is extremely likely also that the affidavits will appear in the supplementary statement which has been promised by Germany upon the receipt of the President's reply."

It is asserted that Germany has a perfect right to be allowed to explain to the President that she is acting on the principle of retaliation forced on her by Great Britain, and that it would be competent for Germany to ask the President his views on the principle and justification of retaliation.

NEW YORK MAN TO PLAN CHURCH

Episcopalians to Have Benefit of Experience of Man Who Specializes

Clarence Wilson Brazer of New York city, an architect whose specialty seems to be the designing of churches of gothic architecture, has been engaged by the building committee of Zion Episcopal church to prepare plans and specifications for the new church which is to replace the old frame building in E. 1st st.

This decision was reached at a committee meeting last night, attended by the Rev. Minor J. Peters, Messrs. Giles S. Piper, Wm. H. Hornibrook, George W. Hackett and A. W. Ad[illegible] who have for some time past [illegible] a great deal of thought and at[illegible] to the matter of engaging an [illegible]hitect and they feel sure that the [illegible] when completed will be an [illegible] to the city.

[illegible] Rev. Mr. Peters announced this [illegible] that Architect Brazer is a [illegible] in Gothic church architect[illegible] having made a study of the sub[illegible]. There are a number of specimens of his skill and rare good taste in this state and in other sections of the country, the new Trinity church in Syracuse being one of his latest productions in Gothic architecture.

Mr. Peters announces that the new Zion church will be a Cruciform struture, to be built of granite and will embody every feature of a modern church building.

Construction work on the new church will begin in a very short time, and in conjunction with the church proper there will be built a parish house which will take care of the Sunday school and all institutional work, and will in fact be a building such as any church ought to have.

HUNTER CLAIMS ALLOWED

Judge Ray has confirmed the report of special master Stone in the matter of the Hunter Arms Company, bankrupt, and allows the following claims: Hunter Fan and Motor Company, Fulton, $41,375.83; William Hunter, Fulton, $18,508.73; Mary E. Hunter, Sterling, N. Y., $1,867.57; Leona H. Hunter, $4,966.37. Several minor claims fere also allowed, the amount in each case falling below $1,000.

WEATHER FORECAST

Cloudy tonight and Friday, with moderate variable winds.

SUNDAY SCHOOL WORKERS MEET

"Community Betterment" One of Themes to be Discussed at Auburn

The principal theme of the State Sunday School Convention, which will be held in Auburn June 8, 9 and 10, will be "Community Betterment Through Sunday School Efficiency," according to the program given out by G. W. Irwin, publicity manager.

The first session starts at 9:30 o'clock Tuesday morning in the First Presbyterian church with a praise service led by Prof. I. H. Meredith of New York city. After prayer by Rev. C. G. Richards, pastor of the First Church, addresses will be delivered by Rev. Lewis M. Lounsbury, pastor of Trinity M. E. Church, Albany; Marion Lawrence of Chicago, international general secretary; Prof. L. A. Weigh of the Yale Divinity School, and Miss Margaret Slattery of Boston. Beginning at 12:45 an "Ask Marion Lawrence" hour will be held at the First Church, where Mr. Lawrence will answer any question pertaining to Sunday school work and its management. Schools of methods will be held during the afternoon in First and Central Presbyterian, First and Second Baptist and First M. E. churches. Three simultaneous sessions will be held in the evening at the First Presbyterian, First M. E. and First Baptist.

Delegates will meet at 8.45 Wednesday morning at various churches and at 9.25 the main session will be held in the First Presbyterian church for the rports of committees, election of officers and the transaction of routine business. Three sessions will be held in the First Presbyterian, First M. E. and First Baptist churches during the afternoon, when addresses by prominent speakers will be delivered, and in the evening a monster mass meeting will be held in the Burtis Auditorium, where the speakers will be Frank L. Brown of New York, W. A. Brown of Chicago and Margaret Slattery of Boston.

Thursday morning will be devoted to the schools of methods, sessions being held in the First Presbyterian and First M. E. churches. The concluding meeting will be held at the First Presbyterian Church in the evening.

"THESE ARE THE TIMES WHICH TRY MEN'S SOULS."

—Carter in New York Evening Sun.

28 TONS OF EXPLOSIVES USED TO DESTROY TRENCHES

Paris, June 3.—A graphic illustration of the part underground warfare plays in the struggle on the western front is found in narrative from the official French observer who writes of the fighting north of Arras. In this region during the long effort to break the German hold on Lens, more than twenty-eight tons of explosives have been used in mining and the subterranean workings, put end to end, would reach more than one and one-half miles.

"In the vicinity of Carency the battle has been conducted by the use of mines since January," the observer writes. "The calm courage shown by our men in the face of great dangers is especially worthy of mention. In this region the galleries and usbterranean connecting trenches arer more than a mile and a half in length, and the quantity of explosives used from March 16 until May 1 is more than twenty-eight tons.

"On May 9 an attack was begun on Carency. Early in the morning the attack was prepared by artillery and simultaneously by the explosion of seventeen mine fields, which destroyed a majority of the enemy's barbed wire fortifications and breatworks and demolished the enemy's subterranean passages. German sappers and miners were killed outright, only seventy-eight being captured.

BOTH SIDES AT PERMYSL GET REINFORCEMENTS

Germans Get Into Four of the Important Forts, While Russians Say They Did Not

London, June 3.—The battle of Permysl, which is proving one of the most stubborn and sanguinary of the war, continues with unabated fury. Both sides hhave poured reinforcements into the field, and with attacks and counter attacks the losses in men and materials are piling up to an unprecedented extent.

The German and Austrian reports say that some of the forts on the northern front have already falllen, and that on southeastern front their troops are progressing toward the railway that joins the fortress with Lemberg. But the latest Petrograd communication says that the Germans who got into one fort were driven out, and makes no mention of the capture of Stry or of other successes alleged by the Teutonic allies.

To the southeast, simultaneously with this battle, the Germans are making another effort to break through the Bzura lines toward Warsaw, but whether this is a serious attempt to capture the Polish capital or only a diversion to prevent the Russians from sending more reinforcements into Galicia is not disclosed.

The Germans say they have captured upward of 300,000 Russians and an immense amount of material during the month of May. Despite this, the Russians do not appear to have slackened their resistance.

ITALIAN GUNS SEND BIG SHELLS INTO TRIESTE

Paris, June 3.—The first Italian shells have fallen in Trieste, and the capital of Istria tonight is under an intermittent bombardment from a point near the mouth of the Isonzo, less than twelve miles away across the Gulf of Trieste.

The seizure by the Italians of Grado and the small peninsula on which this port is situated gave to General Cadorna his opportunity to begin direct fire against Trieste. While the terrain is difficult for the transportation of big guns, a battery has been sent from Terzo to the slight eminence overlooking the gulf, and with these it is expected an effort will be made to cut theh railway line from Monfalcone to Trieste and at the same time keep the latter town under fire. Every precaution, it is learned, will be taken to guard against damage to the city of Trieste itself, the guns being trained for the most part on the arsenal, the supply depots along the water front and the shipping in the harbor.

The ridge of Monte Nero, on the west bank of the Ilsonzo and about six miles northwest of Talmino, was captured by the Italians yesterday. The Austrians sought to recapture it by several counter attacks, but last night the Italians were safely organized on the summit.

Fort Tolnusio, just to the rear of Gradisca, and Italian batteries across the Isonzo engaged in a twelve hour duel today. The Austrian fire had little effect on the Italian position.

Further to the north, in the Carnic Alps, the Italians are bombarding the Austrians at Malborghet, at thhe junction of the railroads from Caporetto and Kllagenfurt to Villach.

Details of the fighting in Monte Croce Pass over the North Venetian Alps show it to have been one of the most dramatic episodes in the newly opened war. Five times the tried troops of Austria attacked the advancing Italians afresh over their rows of dead. Five times they were hurled back, broken and disordered, by the telling fire of the Italian infantry before they had had enough. Theis energy and ordor were spent, and they advanced no more. Then the Italians, who hitherto had been fighting a stubborn defensive fight, dashed forward and, falling upon the bewildered and disorganized Austrians, they put them to fl.ight.

GOOD TEMPLARS MEET THIS WEEK

Will Elect Officers and Prepare for Grand Lodge Session in August

There will be held a business session of the Oswego district lodges of the Good Templars, at Sterling Valley Saturday, June 5. This will be the 178th quarterly session of the district lodges, to be held for the purpose of electing officers for the ensuing year.

Delegates from each lodge in the district, including ten from the Fulton lodge, will be present.

Besides the election of officers and other business of importance the Good Templars will at Saturday's meeting have to thresh out their program for the entertainment of the Grand Lodge which is to be held in this city August 23-26.

Fulton is not greatly favored by conventions, hence the coming session of the Grand Lodge, Good Templars of America, is exciting more than the usual amount of interest, as it will bring together in the city delegates from many sections of the country. Realizing that this city is not equipped in many ways as other cities bidding for the Grand Lodge session the local committeemen did not ask the city or Chamber of Commerce for anything more than to provide rooms for the various business and social sessions. The rooms are forthcoming and the Fulton Lodge will meet all demands made upon it by the Grand Lodge session, provided it has a reasonable amount of co-operation by the people of the city.

45—PHONE NEWS ITEMS—45

Waterloo has stood for a hundred years as the synonym of an ideal battle result. It was clean cut and decisive. From that time up to a very recent date the hope of a general has been to draw his foe into an open fight to a finish. Maneuvering at Waterloo placed the French army under Napoleon into a situation where it must fight without delay. Delay would enable the British and Prussian commanders to unite their isolated commands and crush the French. Pursuit of the Waterloo ideal, however, has often led to a campaign coming to naught because the opposing commanders both waited to get their foe "on the hip." The place of Waterloo was nothing; the climax to the clash of armed men there was what made it great. Recent wars have taught armies to depend upon field defenses and artillery in naturally strong positions, so that the decisive battle in the open has become almost a thing of the past.

After the war China will have to deal with a divided Europe and the ambitions of powers at variance with one another. The European concert in the east in the matter of loans and railroad construction has ceased to exist, with small prospects of early revival. Perhaps China seizes her opportunity to cut loose from European pressure and deliver a blow to western influence, taking a chance on outwitting or outfighting her little neighbor some day.

A year ago a six ounce can of opium cost $6 to $10 and now sells for $35 to $55. The price of cocaine has increased tenfold, and the war has sent heroin up 500 per cent or more. If there is any virtue in taxing evils to drive them out of use the advance in these much abused drugs ought to reduce the number of the victims.

One of the effects of war's upsetting in London is the disappearance of the time honored "topper," or "stovepipe" hat, from the financial section. Formerly bankers and their clerks and following wore high silk hats as a badge of their allegiance to the ancient order of things.

Were the people of south China to rise up against President Yuan's dicker with Japan as they rose against the late Manchu dynasty the Japs might have their hands full saving Yuan's "face" and their fat concessions.

The mixup of tongues in the war zone has started some one to move for a universal language. Well, English has a good start already and with a little simplification would run all its rivals from the field.

ALLEYS AND ASH CANS

In our great cities—and in smaller towns as well—we find a form of sickly anti-naturalism which seems to overtake at least 80 per cent. of the race, and which is manifested everywhere in arrested development. While arrested development is most conspicuous in the country and in small country towns—the glamor of life—the artificial side—is pursued in greater degree in larger towns and cities, because of the conditions which make this glamor and artificiality possible.

After we permit ourselves to drift into an unhealthy physical and mental state, we find that it is easier to follow sickly imitations and follies than it is to adhere to the higher laws and principles that govern our nobler instincts. The physical and mental change that makes this attitude possible, is similar in every sense to the organic change that takes place after the formation of a drug habit. It requires, perhaps, a period of two years to trade our healthy instincts for the deadly drug of pretense and glamor—for the poison of the superficial and artificial.

In cheap theatres, cafes and dance halls, our natural appreciation of the beautiful is appeased by gaudy colors and tawdry decorations, and these sickly imitations are accepted for the reality which they imitate. The Path of Folly, which leaves its trail of dried and faded cheeks, blurred and milky eyes, coarse and guttural speech, leads from us in all directions toward these gilded and painted nothings. We are quickly impressed by the surface of things—by the effete, and unless we are alert and active, our healthy instincts become diseased and die, one by one. It is then that we become the charred stump of the magnificent tree that we might have been.

The reason that any perverted desire, that any injurious or pernicious habit continues at all is, that perverted desires are founded upon a natural instinct, which instinct is a natural desire for recreation and change. Every man, woman and child possesses a natural desire for recreation, for change of environment, for new surroundings, and this natural desire in the majority of people is satisfied with this bizarre, the gaudy and the gilded.

Many of us live out our entire existence without ever having seen anything but the alleys and ash-cans of life, without ever travelling high enough to discover the relationship between ourselves and nature. Most of us never explore the sky and clouds at day-time—never look up to enjoy the stars at night; yet there is a Sea of Beauty that bathes the entire universe, and which is always there for all of us to set sail upon as we will. But we are too busy chanting and singing and rehearsing the little insignificant things of our everyday life.

Once we forget the out-of-doors, once we forget the value of fresh air, once we fail to remember the necessity of exercise, we are on the down grade. Our perspective of life and of people is becoming narrow and one-sided, and we are degenerating just as surely as the healthy, natural dance of the mountaineer of the time of Robin Hood has degenerated into the stupid dance of our modern ball-rooms and cafes—where the air and the atmosphere are pervaded with cigarette smoke and the fumes of stupid drinks and poorly prepared food.

Unless each day we possess a desire to ascend to heights to which we have not climbed, and descend to depths of understanding which we have not yet explored, we cease to grow, and finish the Race of Life with our mentality developed just a little more than that of a child, yet stripped of the child's activity and imagination.

GOOD OLD DAYS

In the good old days when we were boys, dad would do our sums and write our compositions. Today, father must go out and catch a toad or model a bust of clay. Education is higher.

In the good old days we would keep a medicine chest on the pantry shelf, and dad would always let mother have the cough sirup, but he would insist on drinking the rock and rye. It's great for colds.

The extremes like deviled ham and angel cake never met on our table. We had just plain home cooking.

Folks worked very hard then. I remember that Hank Hitchings was so tired nights that he didn't feel like patting himself on the back. Some called this modesty, but it was nothing but overwork.

Those were the happy days.—Silent Partner.

If we snatch away that world trade Europe is fighting about we'll need a big army and navy to keep it after the war is over, so will only be keeping step with the greedy militarism we now condemn.

There is at least one democrat, with a small "d," not far from the White House, for the president's secretary and his chauffeur were recently fined for speeding, just like common folks.

Opinions

Mr. Daniels Changes his Mind

At least we must give Josephus Daniels, secretary of the navy, credit for changing his mind. Last March he was praising our submarines. He held that they were efficient in every way. Now he admits that the United States' submarines are useless in war and he confesses that the recent maneuvers proved that the under-sea craft are unable to fight. He is becoming convinced of the fact that submersibles are absolutely necessary in our present day navy and he has changed from an opponent of these craft to an advocate. The secretary cannot be charged with having a set mind; he changes and he changes quickly. This time he has changed in the right direction. The only fear is that with his will-o'-the-wisp make-up he may not remain convinced sufficiently long to make his conviction of real value. Here is what he said regarding the recent tryouts in New York:

"Of the twelve submarines which came to New York for the maneuvers, one was unabel to proceed, and various others suffered from breakdowns necessitating repairs of greater or less importance, which took them out of the game for varying lengths of time. The full reports are not in, and it is impossbie to name which boats were out of commission from various causes and which had merely the usual trivial defects which must be expected at any time and which can be remedied without any serious delay or impairment of their efficiency. Reports, unofficial, give a number varying from five to seven as the total submarines effective during a certain period of the maneuvers.

"The machinery of a submarine is very delicate. Tere is, first of all, the propelling machinery for surface work, which is subject to all the faults of an automobile engine and can have all of its various diseases. There are, in addition, the storage batteries, which do not anywhere near approach perfection as yet and which are continually giving trouble in their use. Then there are the motors used to drive the boat when under water, which, like all electrical machinery, are delicate, and subject to sudden breakdowns.

The European war has shown the absolute necessity of these craft. German submarines have an effective radius of not less than a thousand miles. The submersibles have altered all sea fighting. Battleships and cruisers are still necessary, but the submarines are indispensable. They are economical and it is readily seen at what cost a submarine can be maintained with a small crew compared with the maintenance of a big battleship.

It is safe to predict that the navy department has had its eyes opened and now realizes that the men who were advocating the taking on of new inventions were not theorists. Last March Secretary Daniels was most optimistic about the adequate equipment of the submarine, but now the actual tests have demonstrated that experts knew more about them than he did. It is to be hoped that his changed heart will be felt throughout the navy construction department.—Utica Dispatch.

All Blamed

It is gratifying to learn that there are more and more people waking up to the fact that England is not a saint, but only in for the almighty dollar and using the United States as a door-mat. We have Tories in this country country who are more than willing to sell out the United States to England at any price, and it is to be greatly lamented that it looks to many people as if the present administration belongs to that class.

Am glad to see that you are fair-minded and giving space to letters from sane, clear thinking people who are not willing to swallow all the poisonous medicine that some of the New York newspapers have been trying to dope the public with.

It seems to be typical of the Italian "temperament" to rush off at a tangent, as Alfredo Distefano shows in gushin gabout German Kultur and in trying to frighten "William the Butcher" about the ghosts of the women and children that were lost on the Lusitania, forgetting, of course, that they took a very foolish risk.

How about Nero burning Rome? Is Mr. Distefano sure that Nero took the precaution to intern all the women and children before Rome was burned, and has he forgotten Nero's earnest wish that all the Romans might have but one head and neck so that he could sever it with one blow?

How about the monument erected in Africa to the memory of 26,600 women and children that were interned by the British, who starved and died of neglect during the "glorious" English victory over the handful of Boers?

How about the Congo negroes that Leopold of Belgium, even in times of peace, saw fit to cut off a hand or foot or both limbs if the poor fellows did not bring in sufficient quantities of rubber?

How about the starvation plan that Germany used in Metz and Strasbourg?

How about our forefathers killing off the Indians?

You can keep on adding to the list of "glorious" Christian warfares, but can any of these wars be considered humane by Mr. Distefano? What's the good of gushing about "the last horrible moments of "William the Butcher," for if Italy had found it to her financial and territorial interest to remain with her original allies and not go off like a sneak thief to the other side all the Italians would be gushing about the brutalities of the English bull, Russian bear andFrench chanticleer; so it all points to the fact that man is a very variable and hypocritical quantity. And, as a very brilliant friend of mine said some years ago: "Taken all in all, humanity is a damned sorry lot."—J. Bennett in New York Tribune.

Communication

One of Fulton's oldest citizens in reply to an invitation issued by this publication recently to join in reminiscences regarding this city, sends the following letter:

Editor Evening Times:

I have lived in Fulton and vicinity 77 years. I know some thing of Fulton. I will commence at the river bridge. It was built on the banks of the river about a foot from the water and was a toll bridge. A man by the name of Richardson took the toll and later Mr. Stanton, a man with one leg, took the toll. There were two blacksmith shops, one on either side of the bridge. As you crossed the bridge, on the top of the hill, lived a Mr. Wright. He made butter, tubs and pork barrels. Mr. Walrod, a farmer, lived north of Mr. Wright on the river road. There was no house between the bridge and railroad track, and a rail fence was on each side of the street. This is now known as Hannibal street. Peter Schenck lived about where Palmer's feed store now stands. On the west side across from Peter, his brother William lived. The old house still stands there. There was only one more house on the street until one came to Phillipsville. This was occupied by Square Croumby. Two brothers by the name of Williard had a store on the corner of what is now Broadway and First st. Where the church now stands was a large hotel kept by Philo Burch. Where the worsted mill stands was a saw mill owned and run by the Willard Bros., also a grist mill owned by Mr. Phillips.

In 1846-47 there was a company formed to build a plank road from Fulton to Hannibalville. My father, Almon Mason, had stock in the company and took the contract to build four miles of the road which he built. He employed about 30 men and it took most of the summer to complete it. The toll was one shilling to pass through the gate. This same man, Stanton, took the toll.

In 1847-48 the argricultural society held a fair at the West end of the lower bridge on the north side of the street. There was no fence around the grounds. It was free to all to go. Mr. Mann was president and Mr. O. Henderson vice-president of the society. At this fair they had a plowing contest. First prize was $10, the second $5 and $3. The one that could plow a quarter of an acre the best and first received first prize.

S. P. MASON.

VOCATIONAL TRAINING CONFERENCE IN NEW YORK

The Educational Conference and Exposition Committee has taken headquarters at the Hotel Biltmore, where preparations will be made for the educational conference and exposition which is to be held in this city from June 25 to July 6. Vocational training will receive particular attention.

Among those who will attend the conference are Mayors Preston of Baltimore; Riddle, of Atlantic City; Fiske, of Mount Vernon; Marshall of St. Joseph, Mo., and Raymond of Newark, N. J.

The plan and scope committee of the conference consists of Arthur D. Dean, chief division of schools, New York State Department of Education; Albert Shields, director of reference and research, New York city Board of Education; Magnus Gross, president Teachers Council, New York city Department of Education; Miss Florence Pickett, principal Vocational School for Boys; George J. Loewy, principal Murray Hill Vocational School, and Edgar S. Barney, principal Hebrew Technical Institute.

An exposition committee has been appointed consisting of chairman, Mrs. Clarence Burns, president of the Little Mothers' Aid Association;

NEW YORK TEACHERS TO TEACH SUFFRAGE

New York teachers, many of them at least, will spend their smmer vacation working for suffrage. More than a score of them rallied at the call to arms given by Miss Grace Strachan, president of the Interborough Teachers' Association, before the newly organized Teachers' Corps which held its first meeting in the Stuyvesant High school last night.

"You must each bring in at least six recruits for suffrage during the summer," said Miss Strachan, "This is the first real teachers' organization for suffrage chiefly because we have been so earnest in trying for equal pay that we didn't want to confuse the issue."

"We want you to give up teaching children and substitute teaching men through the summer," said Mrs. James Lees Laidlaw. "We beg of you not to go outside of New York State—anywhere in the State will do; and if you must take your vacations elsewhere let it be in one of the other campaign States—New Jersey, Pennsylvania or Massachusetts.

The response was not immediate, but a few teachers out of the two hundred present stood up and timidly volunteered to do all in their power to further "summer suffrage." The appeals for teachers have been sent out to all the schools and the Woman Suffrage party expect to have larger returns by the end of the week.

"It is insulting to think that the average twenty-one-year-old-boy earning ten dollars a week is more capable of voting than New York teachers," said Edward B. Mandel, president of the Association of Men Teachers and Principals.

Other speakers were Mrs. Norman DeR. Whitehouse and Miss Katherine D. Blake. The teachersñ who undertake the summer work will be supplied with horses, automobiles and in many cases free board has been offered by residents of the Catskills for "suffrage teachers."

NEW RULING IN BANKRUPTCY CASES

Washington, June 3.—Prosecution for conspiracy to conceal goods of a bankrupt may be brought within three years after the offense. The Supreme Court so decided today in the case of William Rabinowich of New York. The New York District Court's holding that prosecution was barred after one year was reversed.

For the Children

Willie Chiels, Holder of an Enviable Position.

Photo by American Press Association.

When can you find a boy who does not envy Willie Chiels of New York city? Perhaps there are a few, but they are very few, and they hold places similar to that occupied by Willie. "Babe" Chiels, as he is familiarly known, is mascot of the New York American baseball club. Imagine a boy being a member of a professional baseball club! Think of the pleasure of being dressed in a regulation uniform and empowered to have charge of the bats; then the joy of knowing the heroes of the diamond personally and being received as and considered one of themselves. All this grandeur and good luck have come to "Babe" Chiels, the official mascot of the Yankees. It is fine to be a stage driver, a railroad brakeman or deckhand on a steamboat, but none of these positions compare in honor with the mascot of a big league baseball club. The man beside Willie is Manager Donovan of the New York Americans.

The First Gem.

The pearl is the one gem that comes to man perfect from the hand of nature, and to this its great antiquity as a gem is largely due. Precious stones whose beauty and brilliancy depend on polishing and cutting would naturally be discovered and utilized later.

The discovery of the diamond, for instance, probably dates within historic times. Though known earlier, it was not generally included among the gem treasures of royalty even as late as the seventh century.

It is quite probable that the pearl was the first gem known and treasured by prehistoric man since the search for food must have been the first occupation of the earliest of the race, and the shining pearl would thus have been discovered in river mussels if not in marine oysters. Certain it is that the Old Testament and the ancient written histories allude to pearls and that remoter evidence is found in the tombs and excavated cities of still earlier eras. The Egyptians, Babylonians and Assyrians held the pearl in an esteem verging on reverence.

The Witty Father.

A family, including a young man just home from college, was seated at the dinner table, on which were two nice roasted chickens, one at each end. The father, a practical man of the world, asked his son if he was learning at college.

"Yes, indeed," the son replied. "Why, I can make two count three."

"Nonsense, my boy. It can't be done."

"But, father, I can prove it. For instance, the chickens. This is one chicken at your end of the table."

"Yes," said the father.

"And that is two at mother's end."

"Well?" said the father.

"Well, two and one are three."

The father was puzzled for a moment, but only a moment, for he quickly recovered and said:

"Well, I will take this chicken; wife, you take that one, and, son, you can have the third."

Of Course.

"Daughter sends you 1,000 kisses and wants 100 in return."

"A hundred kisses?"

"Don't be absurd, John—a hundred dollars, of course."—Louisville Courier-Journal.

LIKED GIRL'S KISS, BUT—

British Soldier Could Not Stand Embrace From Her Father.

H. C. Keith of Wakonda, S. D., is in receipt of a letter from a friend, R. S. Johnston, a Briton, who is a gunner in the British army in France and Belgium.

"The French and Belgians," the Briton writes, "are good to us. When we marched into one place an extremely pretty girl rushed up and threw her arms around my neck and kissed me. I felt like fighting six Germans and ten or fifteen Turks.

"But when her father came up and pulled off the same stunt, kissing me on both cheeks, I got real mad and told him I'd punch him in the jaw."

KAISER IN SHELL PERIL.

His Automobile Is Smashed and Chauffeur Killed In Galicia.

The German emperor and his staff had a narrow escape while watching the operations in a village near the river San, in Galicia, according to a dispatch from Budapest.

A heavy shell burst 500 yards away from the kaiser. It fell among some automobiles, destroying several machines, including the emperor's car, and killing his chauffeur. The emperor left his car only fifteen minutes before.

TO KEEP MAGNA CHARTA DAY

New York State to Honor Seven Hundredth Anniversary of Signing Act.

To commemorate Magna Charta, which is 700 years old this year, the New York state constitutional convention has decided to hold exercises in the assembly chamber on June 15, the anniversary day.

Elihu Root is to make the principal address.

EDISON WINS HONOR MEDAL.

Forum Decorates Him as American Who Has Done Most For Mankind.

New York.—Thomas A. Edison has been voted the American who has done most to benefit mankind and has received the Civic Forum medal of honor for distinguished public service.

This medal, established to give recognition on the part of the rank and file of the American people to that one of their countrymen who in ways of peace performs some signal public service, was awarded last year for the first time to Colonel George W. Goethals for his work at Panama.

Dr. Nicholas Murray Butler, president of Columbia university, presided at the reception, and the speakers included Guglielmo Marconi, inventor of the wireless telegraph; Dr. Charles P. Steinmetz, consulting engineer of the General Electric company; Dr. Richard C. Maclaurin, president of the Massachusetts Institute of Technology, and Charles A. Coffin, chairman of the board of directors of the General Electric company. Percy Mackaye read a poem written for the occasion.

OREGON MEN NOT "FRESH."

Women "Hiked" It Alone, Unarmed and Unmolested.

Eugene, Ore.—Five Eugene young women have just finished a "hike" of sixty miles along the Oregon coast unarmed and unafraid of stories of bears told them at virtually every place they stopped. They carried packs weighing almost twenty pounds and took their chances at finding shelter each night.

They proudly boast that not one man "got fresh" and that it would be quite possible for a woman to walk all over Oregon alone without being molested.

The "hikers" were Miss Frieda Goldsmith, Miss Harriett Thompson, Dr. Bertha Stewart, Miss Mary Perkins and Miss Myrrha Hepburn. Four are members of the University of Oregon faculty.

Fast Colors.

If the American chemists can make dyes soon enough to keep our mills from shutting down they will furnish fast colors.—Boston Herald.

Neutrals.

It is generally acknowledged that neutrals have rights. After the war is over these will be respected.—Indianapolis Journal.

Baffles Burbank.

Even Luther Burbank seems unable to invent a seed that your neighbor's chickens can't scratch up.—Washington Times.

A Future Terror.

Even after peace is declared the reading public will have a long course of war fiction to go through.—Washington Star.

THE CLEVELAND & BUFFALO TRANSIT CO., Cleveland, Ohio

Swagger Gown Built of Two Fabrics With Picturesque Details

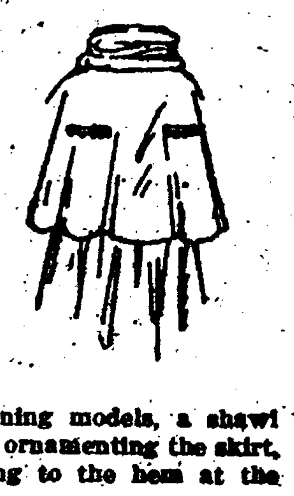
Designed by Hickson & Co., New York.

DESIGNERS this season are vying with one another in the revival of sweet simplicity and innocence in dress. A striking example of how much style can be included in one frock by the clever manipulation of two fabrics is shown in the gown illustrated. Any of the smart summer stuffs can be used in combination, and perhaps black gabardine might be used for the full bolero coat.

The skirt might be of black and white check, and then as a swagger touch the check silk waistcoat and muffler could be of pink and white check silk. To make this extremely chic the skirt must be very short and full, and the same lines must be followed in the Eton jacket. To wear with this are high boots of black and white, with white silk hose, because in the swish and swirl of the skirt a dainty bit of hosiery may be exposed, and to be strictly in the picture the hose must match at least the shoe tops. The dashing sailor would have as its only garniture a flat band of pink and white silk, of which the waistcoat and muffler are made. Under the coat will be worn a soft blouse either of dimity or some of the wash silks.

* * *

For those who are fond of the checked suitings that are so smart for morning and general utility street wear there is a new variety of this design. Woolen suitings, checked, are showing shawl-like borders of the darker color in the check, these borders sometimes being five inches wide. The new checked material is cleverly made



into really stunning models, a shawl tunic frequently ornamenting the skirt, the point dipping to the hem at the center front.

* * *

Colored gloves are "in" again, in accordance with their annual spurt into fashion. While brilliant colors in gloves are not new, it seems very probable that they will be more generally accepted this year because of the extravagance in footwear. One usually associates gloves and shoes together. There are several compromises for the less daring woman who dislikes to clothe her dainty hands in bright blue, green and red kid. White gloves are very heavily stitched with these same shades, both at seams and on the back, giving a most attractive, smart appearance without being at all bizarre. Perhaps the prettiest turn of the new fashion is the repetition in fine kids of the lovely new shades of grays, tans and putty colors. They are unusually attractive in themselves in the soft, pliable leathers from which the new gloves are made.

ANNA MAY.

Cookery Points

Chocolate Schnutten.

There is a duty of 25 per cent ad valorem on this imported cake.

Cream together half a pound of butter and half a pound of sugar. Add the yolks of sixteen eggs, two and a half ounces of grated almonds, two and a half ounces of browned breadcrumbs, two and a half ounces of sifted flour, the soft center of half a vanilla bean, a fourth cake of sweet chocolate grated, and lastly the whites of the sixteen eggs stiffly beaten. Bake in shallow, lightly buttered pans in a moderate oven for from twenty to twenty-five minutes, and when done invert over plates to cool. When cold cut into two and a half inch squares. Split the squares with a sharp knife into two layers, spread the under layer with the filling and the upper layer with the glazing.

For the filling use half a pound of butter and half a cake of grated sweet chocolate melted and beaten together till smooth and creamy.

For the glazing, to a fourth cake of sweet chocolate grated add half a cupful of sugar and a fourth cupful of water. Let this boil up well, then beat until cool and creamy and spread lightly over the cake.

The quantity given in this recipe will make three ordinary eight inch square cakes.

For the Invalid Tray.

Bavarian creams of all sorts make delicious and nourishing desserts for invalids. For chocolate Bavarian cream, soak half a box of gelatin in cold water for at least half an hour. In a double boiler heat one pint of milk; add the gelatin and stir until dissolved. Next add half a cupful of sugar and remove from the stove. Turn into a deep bowl and add one teaspoonful of vanilla; set this bowl into a pan of ice water and stir until it thickens like a sauce; then add a pint of cream whipped stiff. Stir lightly, pour into a mold, wet with cold water, set it on ice and serve with whipped cream. This must be made very early in the morning if it is to be used for lunch or tea. If a fruit cream is desired substitute fruit juice, stewed and strained, or the juice from canned fruit, for the milk, omitting the grated chocolate. Both raspberry and peach Bavarian cream are delicious.

Cream Toast.

Make thin slices of golden brown toast, crisp and dry. After placing the slices in a wire sieve you steam them until soft over hot water. Then butter and put in a soup plate—about three slices, cut in half. Over them pour white sauce. Make this by heating a cupful of milk in a double boiler and then adding two tablespoonfuls of flour rubbed into two tablespoonfuls of butter. Cook gently over a low heat until the flour has lost its starchy taste. Season with salt and pepper and serve very hot. Such a dish loses its appetizing qualities if it is not hot when served, so it should be carefully covered in transit from the kitchen to the room where it is to be served.

Brown Potato Soup.

Cook two cupfuls of sliced potatoes and a little chopped onion and celery in a quart of salted water until quite tender. Place in an iron skillet a teaspoonful of butter and one of lard and when very hot rub into it sufficient flour to thoroughly absorb the butter and lard and keep stirring it about until dry and quite well browned and granular. When the soup is boiling rapidly sift in the browned flour while stirring and continue to add browned flour until the mixture is as thick as you wish.

Old Fashioned Bread Pudding.

Soak a pint of fine breadcrumbs in a quart of milk for two hours. Stir in four well beaten egg yolks, two tablespoonfuls melted butter, a scant half teaspoonful of soda dissolved in a little boiling water and a pinch of nutmeg. Last of all, fold in lightly the stiffened whites of the eggs. Bake in a well greased pudding dish, cover for half an hour, then uncover and brown. Send to the table as soon as done and eat with hot wine sauce.

Scalloped Fish In Ramekins.

Use boiled fish and cut in one-half inch cubes. Butter a cupful of breadcrumbs and put in individual ramekins that are well buttered. Put in a layer of shredded fish, sprinkle with another layer of chopped almonds and then a layer of fish. Cover with a tomato sauce and sprinkle with breadcrumbs. Place ramekins in a pan of hot water and bake for fifteen minutes. Serve hot and decorate with parsley.

Vanilla Ice Cream.

Boil a quart of cream, add a cupful of sugar and a teaspoonful of vanilla. Cool and freeze. Hot chocolate sauce: Boil one cupful of water and one-half cupful of sugar five minutes. Add one-half cupful of milk, two squares of melted chocolate and a tablespoonful of dissolved cornstarch. Boil one minute.

Minced Chicken Sandwiches.

Take minced chicken and add two tablespoonfuls of mayonnaise. Stir well. Cover bread with this dressing. Garnish with minced lettuce and strips of pimentoes.

That's the Official Title of England's North American Daughter.

The official title of Canada is the Dominion of Canada. It embraces eleven provinces—viz, Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan, Northwest Territories and Yukon Territory.

The government is federal, centered at Ottawa, the capital of the Dominion, while each of the provinces, like our states, has its local legislature and capital. The head of the federal government is a governor general, appointed by the king of Great Britain and holding office for five years. Each province has a lieutenant governor, appointed by the federal government for a term of five years.

The federal or Dominion parliament consists of a senate, with eighty-seven members, nominated by the governor general and appointed for life by the king, and a house of commons of 221 members, elected by the people of the several provinces for a term of five years, the right of suffrage being subject to a property qualification.

The provincial legislatures are elected by the people of each province. Each province has its own courts of local jurisdiction, and there is a federal supreme court consisting of a chief justice and five associate judges.—Philadelphia Press.

BEE CULTURE.

It Doesn't Cost Very Much to Start It In a Small Way.

It is simple, and not very expensive, to start bee keeping in a small way. About $25 to $30 will do it. The amateur bee keeper needs but one colony of bees, a good queen and a couple of hives. Of course he should have two or three books on bee culture, a veil, gloves and a smoker.

The smoker is for the purpose of slightly confusing the bees when it is desired to open the hive. The extra hive is necessary because, as bee keeping is usually started in the spring, there must be some place for the swarm which may soon leave the parent colony. It is by swarming that increase comes about, and this may be so regulated by the bee man that his profit will be entirely through increase. Or, if he chooses, he can retard increase and work for honey only.

With an outfit such as that mentioned above the amateur can in most seasons produce enough honey for a family of five persons, and he can do this by giving no more than a few moments daily, or perhaps half an hour during the course of the week, to the care of his bees. Starting with two colonies of bees, he ought to be able to provide for his own family and have a surplus of honey to sell.—Philetus Barnard in the Countryside Magazine.

Grim Scot Wit.

A Scottish minister had among his parishioners a man who dealt in old horses, alternating his spells of labor with heavy sprees. During the period of depression which followed each overindulgence John habitually took to bed and there diligently studied the family Bible. During one of these fits of attempted reformation his condition prompted his wife to call in the Rev. Mr. Wallace, the parish minister, who at the time happened to be passing.

"Oh, Maister Wallace, come in and see our John; he's rale bad!"

"What's wrang wi' him?"

"He's feart to meet his Makker," said Mrs. John.

Quick as fire came the crushing reply:

"Humph! Theil'm he need na be feart for that; he'll never see'm."

ADMIRAL'S PEARLS STOLEN.

Thief Busy During Review of Fleet In Hudson River.

A necklace composed of pearls gathered from all parts of the world by Rear Admiral Nathaniel R. Usher was stolen by a robber who invaded Mrs. Usher's rooms in the home of the commandant in the New York navy yard, Brooklyn, during the review of the fleet in the Hudson. The thief took two diamond solitaire rings, a diamond brooch and a diamond pendant.

Rear Admiral Usher said he had been collecting pearls for the necklace for many years during his cruises on board warships throughout the world.

VIENNA RESTRICTS DIET.

No Beef, Veal or Pork Can Be Sold on Tuesdays and Fridays.

Vienna now, according to the new government regulations, under which beef, pork and veal cannot be offered for sale on those days, is to have two meatless days each week—Tuesday and Friday.

On the first day affected the restaurants and hotels provided unsatisfactory menus of mutton and lamb and various sorts of game. Households made their purchases the previous day or invested in sausage, liver and eggs, which are not affected by the regulation.

Household Hint.

To mark table linen—leave the baby and some jam alone at the table for five minutes.—Judge.

Foul Blow.

Alice—Trust her! You surely don't think she could keep a secret? Marie—Well, I've trusted her with other things, and she kept them.—Boston Transcript.

Hope is the principle of activity. Without holding out hope, to desire one to advance is absurd and senseless.—Edmund Burke.

For Young Folks

Crown Prince of Belgium, Who Became a Soldier.

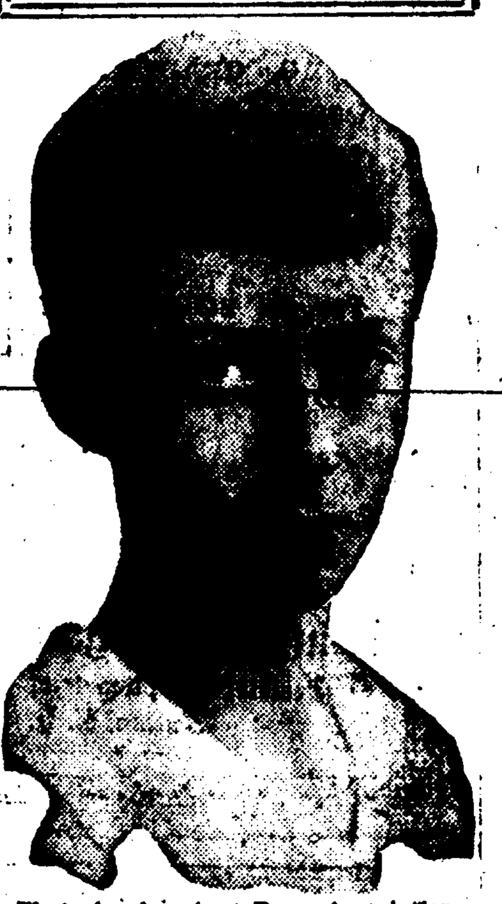


Photo by American Press Association.

Of course all well informed children have read about the dreadful war that has been raging in Europe since last summer. They know the pitiful plight of the people of Belgium, and doubtless many young readers have contributed in various ways to the relief of the sorely stricken people. Recently news was received that the little Duke of Brabant, crown prince of Belgium, had shouldered a rifle and is now fighting in the trenches in northern France. He will be fourteen years old next November, so he is very young for the perils of warfare. Still such incidents have been noted in the history of all wars. In the great civil war of our own country, that ended fifty years ago, many boys younger than the Belgian prince went to the front as drummer boys. Sad to relate some of them were killed and perhaps that may be the fate of Prince Leopold.

A Paddle Trick.

Take a piece of wood four inches long, one inch wide and one-half inch thick and form a handle on one end. Drill three holes about the size of a match in the wood, beginning one-half inch from the top with the first and spacing them one-half inch apart. The first hole is drilled only halfway through the wood, the second and third run through. This completes one side. Turn the paddle over, and the first hole will be one inch and the second one and one-half inches from the end. Space off another half inch and drill a hole halfway through the wood. This completes the paddle for the trick.

Break off a piece of a match three-quarters of an inch long and run it through the center hole of the first side. Turn the paddle over, and the peg will be found in the first hole of the second side. If the peg is put in the center hole of the second side then when the paddle is turned over it will show in the lower hole of the first side. Show the audience that the peg is inserted in the center hole of one side and tell them to watch it change. Swing the paddle and at the same time turn it, and the peg will appear to have changed.

Historical Saying.

Each of the following sentences contains a word of a famous historical saying:

There are millions of people in the world.

The man asked for food.

The lawyer for the defense spoke briefly.

There was but one thing to do.

I did not know the girl.

Only one person survived.

Not a cent was found.

He was rewarded for good behavior.

The monument was erected as a tribute to his memory.

Answer.—Millions for defense but not one cent for tribute.

"The Skin of My Teeth."

It may be interesting to note that this expression, which by many is regarded as vulgar slang, has really the high classical authority of the Bible. It is Job (19:20), who exclaims in his anguish, "I am escaped with the skin of my teeth!"

Some common sayings, such as "God tempereth the wind to the shorn lamb," "Pouring oil on the troubled waters," "The war horse scents the battle from afar," are supposed to be in the Bible, though not so. But there are not many who, in using the expression of hanging on or being saved by the "skin of their teeth," know the high authority for its use.

Overheard In the Hall.

"I wonder what's on foot today?" asked the hall light.

"I guess I am," said the rubber boot; "it is wet out."

"Where is the silk umbrella?" asked the mackintosh.

"Oh, he's in the hospital," answered the cotton umbrella. "He was attacked by a strong wind yesterday and three of his ribs were broken."

Riddles.

What key is the hardest to turn? A donkey.

Why is O the only vowel sounded? Because all the rest are inaudible.

Why is a gun like a jury? Because it goes off when discharged.

MAY HOLDS RECORD AS COLD MONTH

With an average temperature of 51.1 degrees for the month of May, this section experienced the coldest May since 1907 and the month was one of little rainfall according to data collected by the federal observer, C. B. Parsons. The temperature for the month was 4.7 degrees colder than the nine year average of 55.8 degrees. The temperature for the same month last year was 57.5 degrees; for 1913 it was 54.3 degrees and for 1912 it was 63.0 degrees. The month was only 1.1 degrees warmer than the month of April.

The rainfall for the month was only 1.90 inches, against 2.13 inches for the same month last year; 1.83 inches in 1913; 8.85 inches in 1912 and a nine year average of 4.30 inches. The rainfall for the mont of March, April and May this year was only 4.15 inches, compared with 10.16 inches for the same period last year.

The greatest precipitation was .57 inches on the 8th and there were 11 days with .01 inch or more.

There were 13 fair days, 7 partly cloudy and 11 cloudy.

Light frosts occurred on the 4th, 10th, 29th and 30th. Heavy frosts on the 14th, 15th, 16th and 28th and a killing frost on the 27th.

WATERTOWN SUBSIDIZES ITS BAND CONCERTS

Watertown, June 3.—Band concerts at least once a week, are to be held in the city this summer and for the first time will be subsidized by the city, the common council having adopted a resolution at its regular meeting Tuesday night appropriating $500 for that purpose.

Finish the evening meal by eating Cookies made amidst sanitary surroundings. The Black bakings are as "good as mother's."—adv.

POLICE CHIEFS

State Chiefs Will Gather at Watertown Three Days in July

Watertown, June 3.—The annual state convention of chiefs of police will be held in this city on July 27, 28 and 29, the dates being announced today by Chief of Police E. J. Singleton upon whom much of the program of arrangements devolves.

The official headquarters of the association has not been decided on nor the details of the program of entertainment been worked out to a point where it can be announced with any certainty. About 100 delegates and their wives are expected to attend the coming gathering. On one of the days of the convention the visitors will probably be taken to the Thousand Islands which will be at their height at that time.

George S. Doughterty, ex-deputy police commissioner in New York city, and one of the most prominent men along that line in the United States, will be present at the Watertown convention. His brother will also attend. Chief of Police Singleton received assurance from both last week while attending the national convention of police chiefs in Cincinnati. There were about 30 members of the State Association there, including Chief of Police Michael J. Reagan of Buffalo, president of the state association, and who was last week honored by being chosen to head the national organization.

It is considered likely that Chief Sylvester of Washington, D.C., the head of the Bertilion and the finger print system and one of the best versed men in the world along lines of establishing the identification of crooks, will attend the convention here. In years past he has been present at practically all the state meetings and while no word has yet been received from him relative to the meeting here in July, it is thought that he will attend. As a general thing his papers relate to the efficiency of police departments and are instructive to delegates from the advice which Chief Sylvester is able to give through the years during which he has successfully coped with the brains and ambitions of some of the leading crooks of the country.

Preliminary arrangements which Chief of Police Singleton is making these days are forwarded to President Reagan and Chief of Police James L. Hyatt of Albany, secretary of the state body, for their sanction.

CONGREGATIONAL PASTOR RECEIVES EXONERATION

Carthage, June 3.—A meeting of an ecclesiastic council of the Congregational church to investigate the insinuations and rumors which have been made against the Rev. Mr. Herman of Carthage was held last evening at Carthage. Rev. Mr. Herman was exonerated from all the charges and rumors which had been circulated, there being not a question of dissenting voice raised to question the good character or possibility of such rumors being true.

A Gentle Request.

Jessie—Please, auntie, the new lady next door says, her compliments, and will you play very low, because her husband is extremely musical.—Sydney Bulletin.

Cynical.

Payton—A bachelor is a man who has been crossed in love. Parker—Yes, and a married man has been double crossed.—Life.

FISHING FINE

Couple Who on Honeymoon Were Fishing in Woods Caught Undersized Trout

Watertown, June 3.—Caught with a couple of trout beneath the legal length, a bridegroom of but a short time enjoying an outing and camping out in the forests back of Kalurah with his wife, was yesterday fined $50, and the day's enjoyment planned by the couple vanished in an instant. Circumstances surrounding the young man's violation of the game laws are such that it is possible that many of his friends will join in a petition for leniency. The couple reside in Carthage. Their names are not being made public by Game Protector Harris of Harrisville who apprehended the young man.

Along with other game protectors of this district Harris was early on the job Memorial day, spending the night somewhere near Kalurah, where Jenney creek and other streams and lakes, attracted a crowd of trout fishermen soon after the break of dawn.

The Carthage couple decided to spend a day or two on a camping and fishing trip. They reached Kalurah on Sunday. It was the first time the bridegroom has ever gone fishing. In fact he was so green that he inquired of some of the natives if it was necessary for him to have a license. As for the size that a trout must attain before it can be legally taken, he knew nothing.

The bridegroom was among the first on Jenney Creek. He hooked and landed a couple of trout and slipped them into his basket, happy that he was having such good luck.

As he walked along he came upon a man sitting on the edge of the stream. The stranger inquired as to the fishing. Mr. Newlywed replied that it was "fair" and that he had "a couple but they were small ones." The stranger then asked to see them. He proved to be none other than Harris, the game protector, who with a flash of the badge, informed the fellow that he had violated the law and the two fish would cost him $50. He measured the trout and jotted down the fellow's name and address. There is a penalty of $25 and $10 additional for each fish under the legal length taken.

MISS GARRISON WINS 300 ROCHESTER MEN

Rochester, June 3.—Several large suffrage meetings were held in various parts of Rochester yesterday by Miss Eleanor Garrison, the newly arrived organizer of the Empire State Campaign Committee, and Mrs. Elsie Benedict, of Denver. In the afternoon Mrs. Benedict spoke to the mothers who had attended the Parent-Teachers' convention. At 5 o'clock Miss Garrison held a meeting and was heard by several hundred people.

In the evening Mrs. Benedict and Miss Garrison joined forces and held a street meeting. About three hundred people listened for more than an hour at this corner, applauded the speakers many times, signed the suffrage enrollments and gave a generous collection to aid the suffragists.

Miss Garrison said in part:

"I do not take seriously the objection made by our friends, the antis, that the treatment women will receive at the polls will be degrading. I have mor faith in men than that, and I know, from an experience I once had as a watcher at the polls, that men are gentlemen at the polls as well as in other places when women are present."

KING TOMMY OF YPRES.

One British Private Played Monarch In City For a Week.

Here is a story which is well vouched for. When Ypres was first bombarded, early in November, the British withdrew their troops from the town, but did not remove the civil population. There was one British private who did not leave with the rest, for he was asleep in a cellar.

Next morning he awoke to find Ypres without any authority, and, misliking that, he set about governing it himself. He kept the eleven citizens under iron discipline, gave orders that looters should be shot at sight and, though himself inclined to the bottle, prevented drunkenness in others. They called him "Le Roid' Ypres."

But his kingship lasted only a week. A callous court martial tried him, found his efforts in the cause of order had been good and forgave him his other delinquencies.

DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, June 3.—Snap committee hearings, such as have been held by legislative committees, are foreign in connection with the Constitutional Convention. It is apparently a matter of satisfaction to all who come to Albany and the Capitol to argue either in favor or against proposed amendments to the Constitution, that ample time and opportunity are given to speakers and no attempt is made to either cut short either the argument or hearing.

As was promised when the delegates first assembled in Albany, deliberation has been the watchword. No idea which may aid in perfecting the Constitution has been overlooked and a ready ear has been lent to the public by each member of the important body which is charged with its responsible duty.

News features, although they may lie beneath the surface, are not as ready exploited during committee hearings now as when the legislature was in session. The discussions of the subject matter are devoid of sensational material, being in the majority of instances halted by questions and counter-questions from the committeemen.

The spectacle of indifferent members of a committee, eager to be relieved from further attendance, is not in evidence. Each delegate seems absorbed in listening to objections or explanations of the speakers. Many have said that there is a marked improvement, so far as the granting of time and attention, over the all too frequent meaningless legislative hearings when each speaker is given five or ten minutes to outline his ideas and ideals.

So far as activity is concerned, it is indeed doubtful if at any stage of legislation the law-makers have been busier than the delegates to the Constitutional Convention. Upon every day that there is a session, there are a dozen or more hearings, some of which immediately follow adjournment. The foregoing of luncheon on the part of a delegate is quite the order of things. Frequently the committee hearings endure for many hours.

While there are a liberal sprinkling of young men among the Constitutional Convention delegates, the presence of many elderly and distinguished men strikes one at once as indicative of dignified and determined effort to dispose of intricate matters.

It is estimated that September will have come and vanished before the work of the Convention is over. This conviction is being accepted by many of the delegates who each week end take brief vacations, evidently realizing that this year a continuous vacation of weeks or months will not be possible until middle fall.

It is an interesting fact that there are among the delegates practically as many attorneys-at-law as there have been lawyer members of any legislative session. Several of the most prominent lega lights in the Nation are sitting in Albany where the amended Constitution is being outlined. Haste, therefore, finds little opportunity of being fostered, since history is being made.

Pretty Thin.

"My dear," said a thin little Brighton man to his wife, "this paper says that there is a woman down in Devonshire who goes out and chops wood with her husband."

"Well, what of it? I think she could easily do it if he is as thin as you are. I have often thought of using you to peel potatoes with."

The thin man laid down his paper with a sigh that sounded like the squeak of a penny whistle.—London Answers.

Theatrical Sarcasm.

The actor was pleased with himself. "I feel," said he, "as if the mantle of Booth had fallen upon me."

His rival in the profession smiled a sardonic smile.

"I should think you would," said he, "for if it didn't break your back falling from that height, it would be a wonder."—Browning Magazine.

Broken Noses Seem a Fashion.

Broken noses are all the go in the major leagues this season. Birdie Crée, Polly Perritt and Charlie Herzog are on the hospital list. They all came in a different way.

BLACK ROT IS AFFECTING TOMATOES

Many carloads of Florida tomatoes have been injured or destroyed during the last few months by a "black rot" or "black speck" disease which has been more prevalent this season than heretofore, although known to have occurred in that State to some extent for three or four years. It is reported from some sections that the losses in the fields amounted to 50 per cent and that some large fields were so completely infected as to be almost worthless. In addition to the field losses, tomatoes packed and shipped in an apparently sound condition develop the rot in transit and reach their destination in such condition that they can not be sold as first-class stock. A Denver commission house writes that practically every car thath as arrived in Denver this year has shown this disease to quite an extnet.. A Canadian Government inspector reports cars arriving quite ruined.

The department has completed and published a technical study of this trouble, extending over three years. It finds that the disease, which will be called the Phoma rot, is new and not to be confused with other tomato rots. The fungus causing it is a parasite belonging to a genus which includes several serious fruit and tuber rots and stem blights of other crops, but this particular species appears to occur mainly on tomatoes, though under certain conditions it may attack potatoes. It occurs in the fields causing black specks on the leaves, stems, and fruit. The fruit spots enlarge and become very black, with pin-point-like pustules filled with spores. Both green and ripe tomatoes are affected, most of the spots usually appearing at the stem end. An important point brought out by this study is that the fungus seems to be unable to attack unmutilated fruit. Some injury, either by insects, bruises or natural cracks, must be present to permit infection. It is probable that in many instances where there is little or no field infection the tomatoes become injured during harvesting or packing and are infecting in the packing houses. It is likely that by more careful handling and the prompt destruction of all infected material the loss during shipment can be reduced. The disease will not develop at a temperature of 44 degrees F. or lower.

$2,500,000 IN GOLD COMING FROM CANADA

New York, June 3.—Within the next two days $2,500,000 gold will be shipped from Ottawa for Morgan & Co., making a total of about $17,600,000 received by this firm in the last two weeks.

Yesterday's engagement is part of the $10,000,000 sold by the Bank of England yesterday for foreign account.

Foreign exchange was quiet but easier yesterday. Because of large exports to France, Paris exchange declined to the new low record of 5.44½ for checks.

Neutrals.

It is generally acknowledged that neutrals have rights. After the war is over these will be respected.—Indianapolis Journal.

JOHN W. ALEXANDER, ARTIST, DEAD

New York, June3.—John W. Alexander, one of America's most eminent artists and portrait painters, is dead at his home, 116 East 65th street. He died on Monday after an illness of two weeks at the age of 58.

Mr. Alexander had a remarkable career. His work is known in every art center in the world. He exhibited his paintings in scores of cities in Europe and won the highest awards. He was born in Allegheny City, Pa., in October, 1856, and came to this city when 17 years old. Later he worked for three years in the art department of Harper & Bros. as an illustrator. He then went abroad, studying in the Munich Royal Academy and later in Bavaria, Venice and Florence.

One of Mr. Alexander's first paintings was a portrait of Thurlow Weed. At an early age he won recognition as a portrait painter and many eminent men sat for him.

BIDS ON SYRACUSE VOCATIONAL SCHOOL

Bids for the Syracuse Vocational High school were opened yesterday. For the building the low bid was $426,000; and for the gymnasium $68,000, making a total of $494,000. As furnishings will cost $65,000 and but $500,000 is available the building of the gymnasium will probably be deferred for a year.

THE QUIRK TODAY

Presents the sterling drama, "Captain Swift," in five splendid parts; also the fourth of the "Who Pays" series, entitled "The Love Liar," forming an eight-reel show of deep interest and real merit. Tomorrow the favorite actor, Carlyle Blackwell, appears in a five-reel virile drama, "The Last Chapter," and Charles Chaplin in one of his roaring comedies in two parts, "The Knockout."

FAREWELL PARTY

Handsome Suitcase Given Them by Friends as Token of Esteem

Last evening Mr. and Mrs. H. C. McRae, of East Broadway, entertained in honor of Mr. and Mrs. William Harder and family who leave soon for Laurel, Miss. Mr. Harder, whose work is in connection with government building will assume an important position in the erection of a new post office at Laurel. Contractor F. R. Pratt of this city has the contract for the construction of the Laurel post office.

The friends and neighbors of Mr. and Mrs. Harder gathered at the home of Mr. and Mrs. E. W. Smith and later journeyed to the home of Mr. and Mrs. McRae where the Harder family had been invited to spend the evening. The arrival of the company was a happy surprise.

As a token of the warm place the Harders have made during their stay in the city a handsome suitcase was presented them, Mr. F. R. Pratt making the presentation speech. He spoke most highly of Mr. Harder, both as a man and as an employe, and stated that Mr. Harder always accompanies him wherever they are called in their work.

Later the guests were delightfully entertained with music. Lawrence Ranger, Mr. and Mrs. Clare Brown and others took part in the program. The following guests were present:

Mr. and Mrs. H. C. McRae, Margaret and Robert; Mr. and Mrs. F. R. Pratt; Mr. and Mrs. William Harder and family; Mr. and Mrs. Harvie Duboie and daughter; Mr. and Mrs. E. Wells and son; Mr. and Mrs. Clare Brown and son; Mrs. Graves; Mrs. William Ottman and daughter Ruby; Mr. and Mrs. J. Mehlerwein and daughter Florence; Mrs. Elizabeth Guilfoyle and daughters Helen and Mildred; Mr. and Mrs. F. Kellogg and daughter Dorothy; Mr. and Mrs. E. W. Smith and daughters May, Ruth and Eunice; Mr. and Mrs. C. E. Brown and daughter Nina; Miss Florence Schunre; Mr. and Mrs. Hanifur and children, Kathryn, Harold and James, Miss Rachel Loubey, Lawrence Ranger; Mrs. D. Vogelsang; Mr. and E. O. Baker and sons Harold and Royce; Mr. and Mrs. William H. Brown and daughter Genieve; Mr. and Mrs. Barkley.

100 YEARS OLD

Fulton Baptists Helped to Celebrate Event at the County Town

A delegation from the First Baptist church of this city attended the celebration of the 100th anniversary of the Colosse Baptist church at Colosse yesterday. In conjunction with the anniversary the regular annual meeting of the Oswego County Baptist Association was held and the officers for the coming year were elected.

The anniversary sermon was preached by Rev. B. C. Barrett of Sandy Creek. The sermon was an inspiring one in which Mr. Barrett outlined the growth of the church in thhe county since its beginning here, when a Baptist church was first established in Colosse in the year 1815.

An interesting paper on the growth of the Colosse church and its early history was read by Louis Gibbs, one of the rising young men of the church

Delegates were present at the meeting from all over the county, representing seventeen Baptist churches. Rev. L. L. McClien of Phoenix acted as moderator during the session and Rev. B. C. Barrett was clerk and treasurer. The delegates were entertained at a dinner which was arranged by the Colosse church, assisted by the community at large which aided materially and without whose help the convention would not have been possible.

Miss Ethel Rear of this city presided at the organd uring the services and Rev. M. G. Buck of this city was in charge of the musical program. Mr. Buck was elected moderator of the association for the coming year, and Mr. Barrett was re-elected clerk and treasurer.

It was announced that an "Every Member" campaign had been conducted with great success in almost every church in the county with the result that all the churches were in better condition, both financially, and insofar as the benevolent work is concerned, than ever before.

The meeting place next year will be Hannibal.

Those who attended from this city were: Mr. and Mrs. C. W. Streeter, Mr. and Mrs. Glenn J. Streeter, Rev. M. G. Buck, Miss Ethel Rear and Mrs. Nina Loveless. The party made the trip by automobile.

GRANGE EXAMINATIONS FOR SCHOLARSHIPS

The annual examination for the State Grange scholarships at Cornell University will be held at the supervisors' chamber in the county clerk's building, Saturday, June 19. It is expected that there will be a large number of candidates from this county.

These scholarships are $50 each and the State Grange has appropriated $600 to pay for the same. The money will be paid the successful applicant as soon as work is begun at the college and a certification to that effect has been filed with the secretary of the State Grange.

The scholarshhips will be awarded by competitive examination based on a general knowledge of arithmetic, geography, history and English composition. Anyone 17 years or older and a member in good standing of any subborinate grange, desiring to enter the competition, shall apply to the master of Pomona Grange in his or her county. The questions for the examination shall come to the applicant sealed, to be opened by the applicant in the presence of the local committee to examine, composed of Henry Mace, master of Pomona Grange; Anna E. Burgess of Phoenix and Herman W. Kandt. The answered questions will be placed in envelopes, sealed and sent to the secretary of the State Grange. The papers will be examined by W. H. Vary, W. N. Giles and G. A. Works and scholarships will be awarded in the order of grade.

BIG HERD OF ELKS TRAILED TO SYRACUSE

More than fifty Elks from the local lodge attended the Elks' Field Day and baseball game at the Stadium in Syracuse this afternoon. A delegation of twelve, head by John W. Stevenson, the Exalted Ruler of the local lodge, left at 11 o'clock for the Flower City, and autombiles filled with Elks and their friends were headed in that direction all morning.

The game attracted a great deal of attention here, inview of the fact that it brought together the Detroit Americans and the Pittsburgh Nationals, both teams considered pennant contenders in their respective circuits at the present time. Ty Cobb was present and Hans Wagner, another famous star, played his regular position Pittsburg.

Fulton Keynotes

The Philathea class of the Baptist church will hold a food sale at the Palmer-Hope store Saturday morning.

* * *

Mr. and Mrs. John W. Distin of Hannibal st. have been guests of Mr. and Mrs. Eugene Bartlett at Mt. Pleasant.

* * *

Mrs. Charlotte Morin and Mrs. Mary Suydam entertained their circle of the First M. E. church yesterday.

"Lafe" Norton Now Night Captain

Lafayette Norton, who has acted in the capacity for some time, was formally appointed night captain of police at a meeting of the Fire and Police Board last night at City Hall. The new captain has been night desk man at the station for some time, but a provision of the Brown bill recently passed empowers the Board to appoint him captain with that title.

It is very likely that the new position will entitle Captain Norton to a raise in salary, as he has been a member of the force for many years and has always shown a model record. His duties as captain will mean added responsibility.

Aside from the appointment and the monthly bills the Board transacted little business. The report of the work of the new motorcycle was received and read, and the department announced itself as very well pleased with the machine and its work. Almost every officer is now familiar with the machine, although Officer Brown has been assigned to the post for a period of two weeks.

The usual special policemen for the next thirty days were appointed. The meeting was attended by all the commissioners, Chief Dyer and City Clerk Ccudder.

TWO RODS; ONE BOAT; LESS FISH; IT IS LAW

Honestly, now, how many fish poles have you been wont to project from the side of your boat as you sought to while away a day, a half day, or to catch just enough fishh for one meal?

You may have in the past pointed from the side of your craft as many rods as there are guns in the batteries of a dreadnought, but of course, you did it innocently, but now that The Evening Times is telling you to be careful to not point more than two fishing rods from one boat, you will of course obey the law, even if by doing so you fail to catch a full "mess" of fish.

VACATIONS MAY COME IN THE FALL MONTHS

Nothing was done at the meeting of the Fire and Police Board last night in regard to vacations for the police this year, and when asked if the vacations had been decided upon yet, one patrolman said today, "No, I guess we won't get any this year—at least, not this summer. They may give us vacations in the fall."

The summer months are busy times for the local police and the remark this morning is taken to mean that the Board considers it wiser to allow the vacations in September. Each man gets ten days' vacation with pay.

HAD MEDICAL ATTENTION

Don O'Brien, who sprained his ankle yesterday in the Fulton-Baldwinsville High school game was compelled to undergo a medical examination last night after he reached this city, as the injured member, in addition to being badly sprained, was bruised when his foot came in contact with the home plate while he was stealing home in the fifth inning. In spite of warnings to the contrary, the player returned to the game in the next inning and played his position until the eighth frame, when he was unable to walk.

ADVERTISED LETTERS

The following letters remain uncaled for at the opst office June 2, 1915. Inquirers will please say advertised:

Men — Barlow, Bert; Desforges, Frank; Deforge, Mr. and Mrs. Frank; Diehl, Harold; Jarvis, Alex.; Lamson, Fred; Mart, James; Morrison, Fred; Morton, Joseph; Scudder, Mr. and Mrs. W. S.; Warren, G.; Whorl, Eddie.

Women—Collins, Evely May; Nash, Josie; Farman, Mrs. Stella; Gardner, Mrs. Millie.

WHEN BILLY SUNDAY COMES TO TOWN(?)

Rev. M. G. Buck, pastor of the First Baptist church, stated this morning that it is almost certain that Fulton will have a chance to hear "Billy" Sunday within the limits of this city next fall, during Sunday's campaign in Syracuse. The evangelist will be approached by a delegation from the churches of this city and asked to favor Fulton with one meeting which will be held either in the open air or in one of the churches or theatres here. As the evangelist has shown his willingness to comply with similar requests he is expected to consent to come here.

If Sunday comes to this city an open air meeting would be the only certain means of accommodating the vast crowds which would be sure to attend the meeting. Sunday has just finished a campaign in Paterson, N.J., and the pastors of almost every church in that city, regardless of denomination have acknowledged the greatest religious revival in the history of the city, and are loud in their praises of Sunday. Sunday is at present in the Northwest recuperating for his fall campaign.

Community Notes

A. G. Gilbert has purchased a Franklin touring car.

* * *

Rev. and Mrs. H. D. Holmes of S. 4th st. were recently entertained by Mr. and Mrs. Truman Grant, at Mt. Pleasant.

* * *

Mr. George Drake of Geneva has been the guest of his daughter, Mrs. M. E. Reynolds, of Utica st. Mrs. Reynolds also entertained for Mr. and Mrs. Will Arnold of Syracuse.

* * *

Attorney Torrey A. Ball of Oswego has been appointed attorney for the state in this county in cases of violations of the Agricultural law. Mr Ball succeeds Robert A. Pendergast of this city, who has handled all the state cases for the past two years.

* * *

Frank Massaro of this city motored to Syracuse this afternoon to attend the Field Day of the Syracuse Elks at the Stadium.

* * *

S. Rosoff returned last night from Walden, where he spent two days looking over the ground on a large contract which has just been awarded him by the state.

* * *

M. F. Cornell is spending the day in Syracuse at the Elks' Field day.

* * *

Rev. Dr. C. S. Savage, pastor of the West Baptist church, Oswego, and Rev. M. G. Buck, pastor of the First Baptist church of this city, will represent the Oswego County Baptist Association at the State Convention of Baptist Associations which will be held in Brooklyn, N. Y., in October.

SALVATION ARMY —FILES A REPORT

Albany, June 3.—The Salvation Army of the United States has filed its report as of September 30 last with the Secretary of State. It shows real property in forty-four States of the value of $6,612,838, on which there are mortgages of $2,858,511. In New York State the realty owned is valued at $2,016,808, on which are mortgages of $1,033,466.

The income from the shelters of the army was $273,040, and the expenditures were $288,902. The income in this State from this source was $56,137, and expenditures $64,661. From the children's homes the sum of $135,156 was received, and $136,079 expended; from rescue homes the receipts were $129,413 and the expenditures $129,690. The industrial homes had an income of $1,165,197 and the expenditures were $1,586,286. The capitalization of the army is $300,000.

CREDITORS ACCEPT SIEGEL'S LATEST OFFER

New York.—The depositors of the defunct Henry Siegel Bank have practically accepted unanimously the offer made by the convicted merchant, as embodied in an agreement drawn up and signed by him and the depositors' committee.

This was learned yesterday when the latter gave Stanchfield & Levy, Henry Siegel's attorneys, a letter announcing that the depositors would accept his offer. The agreement calls for the immediate payment of $150,000 in cash, and that "all future earnings, profits and income whatsoever" will be given to his depositors, with an additional proviso that his personal expenses shall not exceed $10,000 a year.

The cash offer of $150,000 represents about five per cent. of thhe $2,500,000 lost by the depositors in Siegel's bank. The latter have already received a payment of 15 per cent.

FRANCIS GEORGE'S FUNERAL

The funeral of Francis W. George of S. 2d st. will be held tomorrow afternoon at 3 o'clock from the Presbyterian church.

Hiram Lodge, F. and A. M. will have charge of the funeral services. Rev. Charles Robertson will officiate.

PULPWOOD CARGO ARRIVES

Between eighty and ninety carloads of pulpwood are expected to arrive in Oswego today in a shipload sent from Anticosti Island. This is the first pulpwood cargo to arrive in the Oswego port this season.

Suppertime comes, you're not ready for it? Then order from the grocer Black's fresh-every-afternoon rolls and buns.—adv.

"A HERALD OF PROGRESS"

SNAPSHOTS AT NOTABLE PERSONS

Rear Admiral W. S. Benson, New Naval Chief.

Photo by American Press Association.

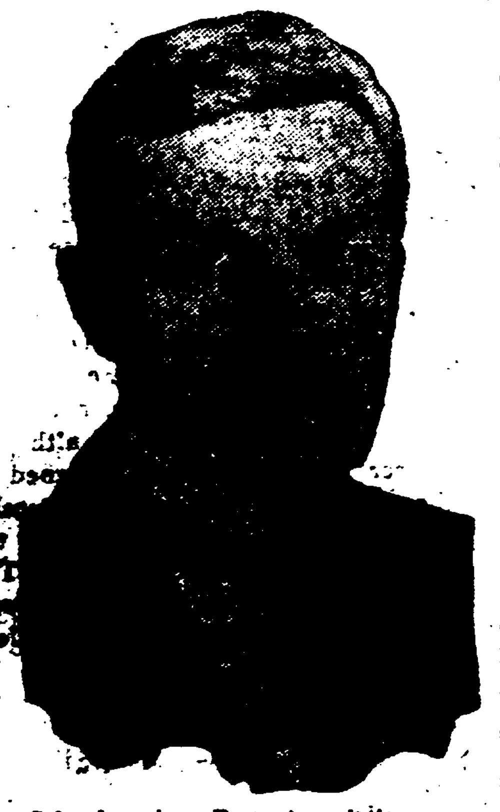
Rear Admiral William Shepherd Benson, recently appointed chief of naval operations, is generally conceded to be one of the ablest officers in Uncle Sam's navy. The new office, which was created by the last congress, gives the rear admiral control of and makes him responsible for the preparation and maintenance of plans for the use and efficiency of the fleet in and for war, and in effect also makes him the active head of the navy.

The creation of the office of chief of naval operations does not disturb the general board of the navy, of which Admiral Dewey is chairman.

Before his appointment Rear Admiral Benson was one of the senior captains and in the ordinary course of events would have been promoted to the rank he now holds by virtue of his office next November. Born in Georgia on Sept. 25, 1855, the new chief of operations is young enough to hold his present post for the full term of four years. He entered the Naval academy in 1872 and was graduated four years later, and during a sea service of twenty-two years since that time has cruised practically all over the world. Since 1908 Admiral Benson's sea duty included the command of several important ships and also service as chief of staff of the Pacific fleet. His most recent sea service was as captain of the super-Dreadnought Utah and temporarily as commander of the first division of the Atlantic fleet. In July, 1913, he was detached from the Utah to become commandant of the Philadelphia navy yard, where he has demonstrated exceptional executive ability.

Railroad Wage Arbitrator.

Charles Nagel of St. Louis, neutral member of the board of arbitration which settled the wage dispute of engineers, firemen and hostlers on ninety-eight western railroads, was formerly secretary of commerce and labor. Since the award the railroad brotherhoods have by resolution demanded a congressional investigation of the appointment of Mr. Nagel as arbitrator. The railroad workers claim that Mr. Nagel was not neutral, "inasmuch as it was clearly established that he is a co-



© by American Press Association.

CHARLES NAGEL.

executor and co-trustee of the estate of Adolphus Busch, which estate has large holdings in railroad securities."

A native of Texas, his parents moved to St. Louis during the civil war. Young Nagel was educated at St. Louis, where he took a course in law and subsequently studied law and political economy at the University of Berlin. Returning to St. Louis in 1873, he was admitted to the bar and soon took an active part in municipal affairs. He served four years as president of the city council and also served as a member of the Missouri legislature. He was a member of the Republican national committee from 1908 to 1912 and was secretary of commerce and labor during President Taft's administration.

FRIENDLY ADVICE.

A Parting Shot by Josh Billings to a Cheeky Drummer.

About Christmas time once the some time famous Josh Billings, humorist, was on his way to his old home at Lanesboro, Mass. On the train were three traveling men who wanted a game of whist. One of them pointed to the unpretentious and unprepossessing Josh and said:

"Let's ask Rube into the game and comb some of the hayseed out of his hair."

"My venerable friend," he said as he laid his hand on the shoulder of the old man, "will you join us in a game of whist?"

"Ya-as; we will get there in abaout three hours," replied Josh, putting his hand to his ear.

"You don't seem to understand," said the young fellow in a louder tone. "We want you to take a hand"—

"Ya-as; the stand o' corn has been unusual good this year."

"My friend," the young fellow then yelled, "will you take a hand in a game?"

"Ya-as; I was tellin' Mandy this mornin' how plenty an' how fat the game is this year."

"Oh, you go to the devil!" shouted the young fellow as he took his seat, while the other drummers unmercifully pestered him.

When Lanesboro was reached the old fellow got up, handed one of his Josh Billings cards to each one of the trio and then said to his interlocutor:

"Young man, while you are traveling on your cheek don't get any hayseed on your clothes or the other drummers will take you for a Rube and get you into some game and skin you."

Bright and Dark Days.

There are bright days and dark days, and we must take advantage of the former and be as little discouraged as possible by the latter. They are all in a lifetime.

A Tramp of Resource.

Much experience of thirsty tramps had caused the author of "An English Holiday," J. J. Hissey, to foreknow almost exactly what they would say to

"I BE MORTAL THIRSTY."

him. One day, when sending his motorcar slowly along a shady English road, he met one of this guild, who accosted him with the preliminary touch of his cap. Mr. Hissey anticipated him by exclaiming:

"I be mortal thirsty! Have you, good sir, the price of a glass of ale about you? I've driven nearly fifty miles today, and since the morning not a bite of food has passed my lips."

The look of astonishment that tramp gave me was a delight to observe. But this tramp was a man of ready resource, and, seeing I was a hopeless case, he rose to the occasion and promptly exclaimed, with what dignity he could command and with a comically serious expression:

"If there were a policeman in sight I would give you in charge for begging, that I would!"

Suite or Suit.

Pat had seen the word "suit" used in connection with furniture. Being in need of bedroom comforts, he entered a store with the purpose of buying some.

Pat—Hev yez a cheap bedroom suit?

Clerk (producing a pair of pajamas)—How would this do?

And the fight was on.—Minnesota Minnehaha.

A Hot Story.

A contributor to the Chino Herald, telling of experiences during a summer trip into the desert, narrates that while he watched a lizard run across a sunbaked open strip of sand it disappeared in a puff of vapor. The intense heat of the sand had turned the moisture of its body into steam, the pressure of which rose so high that the little creature was blown into bits so minute that no trace of it was afterward to be found. In backing up his statement he quotes an old prospector's allegation that in Death valley during the heat of the day water poured from a canteen will not reach the ground, being turned into steam as fast as it leaves the mouth of the canteen. Can you beat it?

EDISON INVENTS PHONE RECORDER

New Device Permanently Fixes Words of Both Speakers.

IS ATTACHED TO TELEPHONE

Will Hold Message For Absent Person, and Inventor, Who Has Devoted Thirty-seven Years to It, Says Instrument Will Save Writing Millions of Business Letters.

Thomas A. Edison says his new invention, the telescribe, as he has named it, cost him thirty-seven years' work. It is a device which combines the telephone and phonograph, a long distance dictating machine that doubles back.

Two persons, even though 3,000 miles apart, may hold a telephonic conversation, and the instrument will give each a record of what both said. It will also take down a message for an absent person and tell it him when he returns.

A small box connected with his telephone on a business man's desk will be his guarantee against misunderstanding language used by him to others as well as an insurance that he got messages to himself accurately. Keen as the human ear and highly sensitized, the recorder does not miss the slightest vibration.

Saves Millions of Letters.

Mr. Edison regards its commercial possibilities as almost unlimited, for he believes it will do away with millions of letters a year in the making of business agreements. The phonograph makes voices easily recognizable and Mr. Edison is confident that telescribe records will be as eloquent arguments for good faith on the part of business men as signed letters.

"Science provided the telephone for rapid transmission of intelligence," said Mr. Edison discussing his latest work, "and with the telescribe we can now project our spoken words into wax records that will be permanent. The world will soon recognise it as a commercial asset, and it will not only make the telephone more useful and the phonograph more valuable; it will make both more necessary."

Mr. Edison began work on his idea in June, 1878, and patiently for hours, despite pessimistic statements of associates, he has labored with the secrets of telephony and phonography in his task of combining the two. Now he has added it to his patents, the total of which have passed the 1,500 mark. This is the largest number of brain products of any one individual, yet Mr. Edison is by no means "through," for he is only in his sixty-eighth year yet.

"They Can't Come Back at You!"

The inventor humorously remarked that the telescribe can end for all time the mooted question involved when an interviewed person denies, following their publication, remarks attributed to him in a newspaper.

"They can't 'come back' at you when you have their statements in cold wax," he told the reporters, with a smile.

Mr. Edison's telescribe is not the first invention for its purpose. In 1900 Valdemar Poulsen, a Danish inventor, contrived the telegraphone for the reproduction of conversations at a distance. Its principle was the retention of maknetic impressions by a copper wire. The length of wire for an ordinary conversation was about three and a half miles. Each impression on a fraction of the wire represented a sound, and when the machine was reversed the talk was reproduced. William J. Burns, the detective, gave it prominence in 1912, when he reproduced a conversation by the president of the common council of Detroit in which the official was alleged to have offered to sell his vote. It was used to record the debates of the medical congress in Boston in 1912. Speeches by former President Roosevelt were several times reproduced by the telegraphone.

Food For Punsters.

"I don't see how Fussleigh gets any enjoyment out of his food. He's dieting, you know."

"Yes."

"He uses this new 'mathematical masticatory' system."

"Good gracious, what's that? So many chews to the mouthful?"

"No. He eats beans by the dozen, rice by the grain, fish by the perch and spaghetti by the yard."

"Does he seem better?"

"Measurably so." — Cleveland Plain Dealer.

John Cabot.

John Cabot, an Englishman, was the first European to sight the mainland of North America.

PUBLIC HEALTH CAMPAIGN.

We all want better health for our families and our townspeople. We all believe that a well planned, sanitary city is a more healthful place in which to live than a haphazard, squalid one. Why not use this point of agreement as the starting place for the kind of public health campaign in which every one can unite and whose impetus will be irresistible?—American City.

On the Hill of Golden Sands

The Good Luck That Came to Grandfather Chang.

By HELEN ROOT

Copyright by Frank A. Munsey Co.

Just outside the Chinese village near the common well all the men stood listening to faint reverberations from the west.

"Ho!" Grandfather Chang stood with short legs firmly planted, puffing out his fat, old yellow cheeks oracularly. "You hear only thunder. There will be no war. The young men nowadays have neither the wit nor courage for it. Now, in my young day when I went to Manchuria"—

The villagers had heard the tale before.

"Ay, yah!" The blacksmith and the carpenter jeered together. "When you went to Manchuria, grandsire, the women hid the ducks. But show us how you fight on an empty belly before spring."

The indignant patriarch waddled off.

In China war and famine threatened. From the cities came mutterings of a threatened uprising against the hated Manchu rule; while throughout the provinces floods had spoiled the early crops, and now, in autumn, heavy rains were falling and the late ripening millet lay rotting on the ground.

But cunning Chang had found a way to save himself and family from need.

"In Shanghai," he had said to his only son, Li the Lateborn, a gaunt, slow witted, kindly giant, "are secret companies that send men to America. There taels are more plenty than copper cash in China. Ah, if my old legs were young as when I went to Manchuria!"

At the hundredth repetition Li's slow imagination kindled.

"Enough, father," he said, "I will go instead."

Even now Li was returning from Shanghai. His seven days importuning of the wealthy Top-Side tongsman had prevailed, and he would start within a fortnight for America, the forbidden Golden Hill of coolie hopes.

Patiently he trudged the sixty miles toward home, thinking of the approaching parting from his parents, his wife, and five little sons, till on the morning of the fourth day he rounded a jutting chain of hills and came in sight of the village and his own unharvested millet patch.

Strange guests were there before him. The revolution had begun.

A puff of smoke awakened him to danger; a leaden spat against the brick walled praying place sent him leaping forward at a scuttling run, and as he dashed foolishly through the deserted village to the poor shelter of his mud walled home a spray of bullets caught and flung him limp across its threshold.

There old Chang found him when the battle was over, and the villagers came creeping back from the holes and ditches that had sheltered them. His hand still clutched the tongsman's sign, a pledge of secret passage to Tai Fow, the great city which other races call Chicago. He had been dead for hours.

Other villagers had suffered loss, but the Changs faced utter ruin. The

IN HIS BONES HE FELT THE WEIGHT OF EACH CONDEMNING YEAR.

house was gone; the crop—poor enough at best—was gone; the breadwinner was gone.

"Now only I, a fat, old, useless hulk," thought Chang, chastened to unwonted humility by his son's dead face, "am left to save the women and the little ones from death by cold and hunger."

"Come," he said to Nai Nai, his wrinkled wife, and to Li's widow as they wailed beside the dead, "salt water mends no broken vessels, and for all other things I can find a way. Let us first take up him who has gone on high and lay him under cover of this shed."

That done they dug amid the wreckage until they found the jar of millet laid away for next year's planting [illegible]

[illegible] tain the elders and the children for eight weeks at most—then in the corner of the roof and walls still standing they reared a flimsy shelter against the wind and rain.

"And now," said Chang, "I will take this tongsman's sign and go in my son's place to the Golden Hill."

But, for all his brave talk, Chang was heavy hearted. He had no shrewd plans for American success. He even feared he might be refused access to the ship at Shanghai. He filled the wrinkles of his face with powder, eked out his scant gray cue with bits of silk and cotton rags and tried to step with youthful jauntiness, yet in his bones he felt the weight of each condemning year, and he trembled when the eye of Yan Yin, the smuggler, fell upon him.

"Ancient," called Yan Yin, "thou of the jelly paunch and gasping breath, why come you here? America is not for such as you."

Chang played his only trump. He laid the tongsman's order in his questioner's hand:

Whereas, Yan Yin shall convey a valuable thing to America at the cost of $1,000, paid thus: In Shanghai, $200; on arrival in Chicago, $200, and the rest when Yan Yin returns to Shanghai. But if the thing in trust be not landed, but conveyed back to China, the balance shall not be paid and this undertaking shall be as waste paper.

This is a written proof.

MADE BY TAM HIN.

The signature was good, and Tam Hin was a man of money who knew his mind. If he saw fit to stand guarantor for this wheezing patriarch doubtless he had good reasons, neither would he be tolerant of inquiry.

The smuggler waved the old man toward the gangway, and Chang's Odyssey began, an Odyssey that promised no return, for he knew well that it would take all his few remaining days to repay the smuggled passage and send bit by bit the thousand American dollars needed to bring his grandson to maturity.

He found the voyage to the shores of Mexico passable enough.

It was not till the smuggling party—twelve Chinese and three white steerers—began to draw northward overland to the American boundary that Chang's Falstaffian courage failed, and fear seized upon him.

At last the smuggling party reached the border. They hid among the rocks and bushes on the steep side of the Sierra Cucaros while mounted Chinese inspectors, with jingling bridles, cantered past. They toiled across the Arizona desert till a railroad town was reached. There they were stowed away at night in secret places over the vestibules of through express trains—places so little known that the expressmen working underneath had never heard of their existence. Chang and a much younger man were the last to be concealed.

Side by side they lay, with legs bent slightly to fit the short space, and with only room enough above to let them rise on elbow when they fed from the cracker box and water jar thrust in before the outer opening was resealed. Thus, for 2,000 miles, they lay on a procrustean bed that swirled and swayed over half a continent.

Through tiny cracks that gave them air they saw daylight come and go, and come and go and come and go again till far in the third night they came quietly to rest.

In the dark hour that comes before the east begins to glow Chang heard a cautious tapping on the roof above their heads. He answered it as cautiously from within.

The plate that sealed their hiding place was slowly moved aside, and he and his companion, groaning from the pain of their racked limbs, crept through and stood upright on Chicago soil.

And here Chang offered up his final sacrifice to the grandchildren and the ancestral shade. He laid his treasured but telltale cue across his releaser's hand and motioned him to cut.

For a moment the smuggler held the old, rag roughened braid as if pondering, then with a little satisfied grunt he severed it from the white old head, fumbled behind his coat, and then thrust it deep in an inner pocket.

"Come," he said.

Out of the dark a strong hand clutched the waiting Chinmen, driving their heads together. A yellow flame flashed past them. The smuggler with a yell of pain threw both his hands above him and pitched headlong to earth.

"Got you, McElliot," said a voice. "Suspected you this long time, now I've got you with the goods."

"It's you, you sneaking spy." The smuggler loosed a swarm of nasty epithets. "You've cracked my right shoulder. I thought first you were Slim Kelly; but for the few dirty dollars the government pays you'd kill a man as quick as Kelly. Are you alone?"

"What if I am?" asked the Chinese inspector.

"Here's your chance to earn more in a minute than the government pays in a month. I cashed in ten chinks today at a hundred apiece; that's why Kelly is laying to roll me. Let me out of here and half the money's yours. Eight hundred then! The whole thousand!"

"Don't be a fool," said the inspector grimly. "You know I'm going to bring you in. Get up!"

The figure on the ground made an apparently painful effort to rise and fell back.

"Give me a hand," he said; "my shoulder's done for."

The officer bent toward the prostrate figure.

A leaden pellet ripped through his cap. His own revolver ready for suspected treachery cracked an answer. With a bullet through his breast, the smuggler laid his sullen face against the ground and died.

Then Chang, freed from the iron grip on his collar, [illegible] and ran.

He ran as one escaping from the clutch of captor fiend might run in hell; hopeless, despairing, from one horrible unknown to another still more horrible, knowing always that flight must prove in vain, but driven on by the inexorable obsession of great fear.

And while he ran a sinister gray figure lurking in the shadows turned and fled the other way.

The railroad yards sprang alive with men and lights the shots had called, and Chang was caught at last in the farthest corner of a high surrounding fence.

"You'll have to give me absence leave," said the Chinese inspector next day. "I'm sick, I tell you; sick. And taking that old Chinaman was nearly as bad as killing McElliot. He was hanging to the fence with his teeth and his toes and his fingers, and when I put my hand on him he—he squealed like a caught rat. I'll have to get away for awhile."

The inspector got his leave of absence, but events went on without him. The Chinaman who traveled north with Chang stood in no fear of immediate deportation. The Chicago representative of the smuggling syndicate furnished him money for bail and legal help.

He was young and strong and, bound by the peon system of Chinese importation, would soon work out the cost

SO CHANG STOOD BEFORE THE JUDGE ALONE.

of his admittance. But the professional bailer looked at aged Chang with a derisive grin.

"Old buffaloes give no milk," he said. "You can send this one back to China."

So Chang, a sad and yet a ludicrous old figure, stood before the judge alone. His hands were clasped upon his rotund stomach.

The old gray cue that once had joined it had been found in the smuggler's pocket and now dangled against the mahogany of the judge's bench, mute witness to its owner's duplicity.

The trial was soon ended.

"Deportation to the place from which you came," the interpreter rendered. Some one picked up the disheveled cue, tossed it to Chang and motioned him to move aside.

"Wo, wo!" he wailed to himself as he retreated to a corner. "This is the end of an old fool's errand. Now go I home with lost face to starve before the mockers of the village. Never! I will jump into the sea!"

And yet Chang knew that when the time came he would not jump into the sea. To the very last the bit of boastful boyhood, green in his old breast, would lure him on with hopes that somehow—somehow—he would "find a way."

His nervous fingers plucked at the recovered queue, twitching the bits of rag and string that swelled its bulk. An unfamiliar glint of yellow caught his eye.

He bent a little lower with busy hands and furtive glance to right and left.

Then he threw back his head, thrust out his paunch in the old braggart way and waddled toward the judge and spoke in his native tongue.

"Eh? What's the matter? What does he say?" asked the astonished judge.

"He says," puzzled the interpreter, "'The golden hill has served. Now, great one, send me home that I may crow aloud before the scoffing blacksmith.'"

"Crazy from worry," said the judge. "Take the poor old man away."

But Chang was not crazy—the golden hill had served. Hidden in his own discarded queue he had found the treasure he had come 8,000 miles to seek.

McElliot, the dead smuggler, knew that Slim Kelly, lying in wait among the shadows, would not look for money in an old Chinese braid.

He had rolled his illicit gains, two $500 bills, into small cylinders and twisted them in and out with the strings of the queue. There they lay through all the after events until Chang's nervous plucking fingers lifted them to sight.

So before wrinkled Nai Nai saw the bottom of the millet jar Chang went back with triumph, after all, to raise the house and plant the fields in spring and bring the grandsons up in reverence of their grandsires; also to tell great tales of his achievements in America.

YOUNG FOLKS' CORNER

Game of Bird Sellers.

The players stand in a row, and two are left outside. These are the bird buyers. Each child is given the name of some bird. One is a blackbird, one a thrush, one a robin, one a humming bird, etc., until every child has been named.

Then one bird dealer says to the other:

"I want to buy a bird."

"What kind of a bird?" asks the other dealer.

"A bird that's strong on the wing," replies the first dealer.

"You can make your own selection," says the second dealer.

"Very well," says the first dealer. "I'll take a crow."

Of course, as soon as he says "crow" the child who bears that name must leave the row and run about and try to dodge back and forth before the dealer can catch him.

If the dealer succeeds in tagging and making the bird prisoner the bird is "out" until all the other birds have been selected and caught.

Names For Campfire Girls.

Here is a brief list of Indian names suitable for use by campfire girls: Neoskaleta, maid of the mist; Allaquippa, the queen; Wenonah, firstborn girl; Uncas, faithful; Itah, the bowl; Alletah, an Indian maiden of beautiful form; Tonguwa, autumn; Minnewaukaru, the maid of the water Winola, an underground spirit; Adota, the stars; Minnehaha, laughing water; Iscoda, Ojibway word, referring to camp fire or the light emanating from council brand; Andoka, a worker; Kodo, a friend; Swatara, sweet water, referring to the sweet taste of water of a creek; Opessah, trustworthy; Ioka, beautiful place; Leola, Iroquois for the willow tree and Leni Lenape for bright eyes; Ioska, Indian word for the reflection of the moon in the water; Opitsah, sweetheart; Mitanka, youngest daughter; Sapana, the lily; Lakota, united; Keneshaw, a young eagle; Lotavyana, daughter of the star; Leotowana, the weeping willow.—Chicago News.

Boy Scouts in Japan.

The worldwide boy scout idea is growing in Japan, although slowly at the start. Organized in Tokyo in 1913, it is now spreading in the provinces. The Tokyo boy scouts, who are under Major General Isaki, are being brought up in the ideas of patriotism and loyalty, in fulfilling their promises and in tempering body and mind. The troop comprises some 500 boys. The city of Shidzuoka had its boy scout corps formed in April last year; Fujine, Iwate and Kodaira, Akita, in August and Osaka city in October. These local troops, besides attending to the regular boy scout program, are making themselves useful in the war on injurious insects and are also learning simple engineering work. These exertions bring them remuneration, which they devote to the upkeep of their organization. The age of the scout ranges between eleven and seventeen.—East and West News Bureau.

Work Up or Scrub Ball.

In this game of baseball in its most complete form all of the positions are filled and there are three or more batters. When a batter is put out by any of the prescribed baseball plays he goes to the left field, the catcher becomes a batter and the whole field of players moves up one notch in positions. The order of succession is from left field to center, to right, to third base, to second, to first, to shortstop, to pitcher, to catcher, to batter. This is a particularly valuable game for boys for the reason that it puts every player into every position and gives in the course of an afternoon's play all of the players more exercise and action than they possibly could have had in regular club play with specialized positions.

Pictures on Railway Cars.

The Western Railway of France runs an express train in the morning between Paris and St. Malo, the carriages of which have pictures upon them. One has an elephant, another a harp, another a snake, and so forth. There are anchors, balloons, flags, bunches of grapes, birds, a pair of scales, a star and an angler with his fishing rod. The explanation given is that passengers can remember pictures better than numbers, and if they leave the carriage temporarily they can regain it more readily. It is certainly a very Frenchy idea.

Vanishing Spoons.

Vanishing spoons are a source of amusement and are made from this alloy: Bismuth, eight ounces; lead, five ounces; tin, three ounces. As soon as boiling tea is poured into the cup in which they are placed the spoons disappear from view. The drawback about this experiment is that the spoons do not reappear. Of course the tea must not be drunk.

The Fairy's Watch.

One night when I lay very still
And could not get to sleep
I felt that on my window sill
A fairy watch did keep.

For shadows that I used to fear
Upon the dim lit wall,
Seemed not to creep that night so near
Or waver in the hall.

The neighboring frogs croaked soft and low,
And e'en the whippoorwill
By his faint whistling seemed to show
Who stood upon my sill.

The insects in the evening dew,
The cricket's voice less shrill
[illegible]
[illegible]
—Philadelphia Record.

BOTH WERE STRONG.

But the Price Had a Shade the Better of the Flavoring.

"I don't kick at having to pay good prices," an irate patron of high priced restaurants was saying yesterday, "but, I ask you, isn't $1.50 for garlic rather strong? As for me, the recollection almost makes me weep.

"I was giving a dinner for six last night, and as a part of the dinner I ordered two racks of lamb. The price on the carte du jour was $8 a rack. That's pretty high, but these are high times. I have a great opinion as to the merits of a dash of garlic in cookery, so to the waiter who took my order I suggested that the dish on which the lamb was to be served should be rubbed with garlic, as one frequently does in making a salad.

"When the bill came the item for the racks of lamb was not $16, but $17.50. The waiter could not explain the increase. I called for the head waiter. He went to the checker and came back.

"'The rack of lamb plain would have been $16,' he explained. 'The extra $1.50 was for the garlic.'

"One cent would have covered the cost of the garlic, and another cent would have covered labor and all overhead charges. I figure that the profit to the house on that garlic was 7500 per cent."—New York Times.

MAN AND BREAD AND DONKEY

A Daily Spectacle in Spain Between Alcala and Seville.

Bread made in Alcala, Spain, is of such exceptional goodness that the village is famous throughout the country as "Alcala of the breadmakers." Each loaf is carefully stamped with the trademark of the town before baking.

An early train leaves Alcala daily for Seville, and before daylight long lines of pannier laden mules begin to arrive from all directions. At the station the panniers are removed and placed in freight cars, the donkeys being driven into similar cars, and mules, drivers and bread are all transported by train to Seville.

Here amid scrambling, hallooing and shrill cries the animals are unloaded, panniers adjusted, and the bread sellers go forth into the streets of Seville, calling their wares and boasting of the fineness of the Alcala bread. They return at midday, pack their empty panniers into the cars, drive in the mules, light their cigarettes and enter the third class carriages to be taken back to their home town, ready for the following day's trade.

A charge of 18 cents is made by the railway company for the round trip of donkey, man and bread.—Argonaut.

Scotch Dogberrys.

The simplicity and ignorance of the rural Scotch magistrate often quite equaled that of the English, immortalized by Shakespeare in Dogberry, and here are two examples, quite in the true Dogberry vein.

"That is a most tragical event which has just happened," said a friend to Baillie Blank. "Your neighbor, Mr. B., has committed suicide."

"Wha on?" inquired the baillie eagerly.

Perhaps it was he—it was certainly another Glasgow baillie—who, his health being proposed at a banquet in honor of his recent dignity, responded nobly to the toast:

"I canna but say, ma friends, that I'm proud of the honor of being made a baillie of this great city, and I'm even, I think, entitled to the honor, for I've gone through all the various stages of degradation that a baillie has tae dae tae reach it."—Youth's Companion.

His Quaint Suggestion.

A Frenchman who appears to have been of a thrifty turn of mind conceived the idea in 1878 that too much valuable time was being wasted in cleaning sardines when preparing them for the market. He found a way of preparing them without cleaning them, and on this he took out letters patent. Apparently he had some slight misgiving as to whether the public would be perfectly suited with his invention and so in his claim he makes this parenthetical entry:

Fish put up by this process may be slightly unpleasant to the customer at first, but he soon gets used to it.

First Moving Pictures.

The first moving picture machine was patented in 1867. In 1893 the cinematograph was produced by Lumier. This was the first machine to project on a screen pictures from a film. Edison improved upon this machine in 1896, when he produced the vitascope. These machines provided the models for the improved types in use today.—Philadelphia Press.

Women.

"Women are dreams," murmured the sentimentalist, gazing on a group of them in silk attire.

"You bet they are," the practicalist snapped back at the murmurous one, "and dreams go by contraries, all right."—Judge.

Not Enough.

Betty Goldust—Did you have a satisfactory interview with papa? Jack Brokeleigh—Not very. He said all he could give us was his consent.—Philadelphia Record.

Entente Cordiale.

The phrase "entente cordiale" was first used to express the friendly relations existing between France and England in 1862.

The greatest mistake is to become discouraged because you have made a mistake.

CHEMISTRY ABOLISHES WORK WITH THE HOE

Weeds Killed by Arsenic and Much Labor Is Saved.

Washington.—Officials of the department of agriculture are greatly interested in reports received from Hawaii, to the effect that one of the big sugar companies has adopted as a regular field practice the system of destroying weeds by use of an arsenic poison spray instead of by hoeing.

Experts who have conducted experiments on Hawaii sugar lands estimate that by the spraying method a saving can be made in labor of $15 to $30 per acre per annum.

The latest developments along this line in Hawaii are discussed in a letter received from Professor H. P. Agee, director of the experiment station staff of the Hawaiian Sugar Planters' association. Before going to Hawaii Professor Agee co-operated with the department in experiments on Louisiana sugar land.

The value of this method in Hawaii is very great, because of the fact that, like most tropical regions, the islands are subject to torrential rains. The less the surface of sugar and other lands is disturbed by cultivation the less chance there is that heavy rains will wash off the top soil or immediately beat it into compact form.

A few years ago the department of agriculture issued a bulletin dealing with the weed factor in the cultivation of corn, following a series of experiments extending over several years, which apparently established the principle that it is the removal of the weeds rather than the cultivation proper that contributes most to the production of the corn crop. A series of 125 experiments were conducted, covering many states. On some plots the most approved methods of cultivation were employed, while on other plots there was no cultivation whatever, the weeds being eliminated by surface scraping with a hoe.

A general average of all these experiments showed that the plots that were simply weeded produced 95.1 per cent as much fodder and 99.105 per cent as much grain as those that were subjected to the most approved methods of cultivation.

The arsenic spray method will be given a trial on corn land in Louisiana this year by experts of the office of farm management in co-operation with local authorities, with a view to determining whether it is not available for use in that region, where climatic conditions to some extent approach those in Hawaii.

SKINS WAY TO DEGREE.

Student Pays Expenses by Trapping Muskrats.

Beloit, Wis.—A student at Beloit is literally skinning his way through college. He is Edwin M. Dahlberg of Cherry Valley, Ill., a senior, and he has earned a large portion of his college expenses by trapping muskrats on the Rock river, near this city.

Dahlberg began to emulate Daniel Boone last fall. He set a string of traps along the river above the city. Every morning he would visit them, starting out in his canoe at 5 o'clock.

Drifting downstream, he would skin his catches on the way back to Beloit. He cured the pelts on some rafters in the men's dormitory, which sometimes were upholstered by several hundred skins at a time.

One Thing He Couldn't Do.

Milking a cow is not an easy task for an unpracticed hand. Leslie Stephen, the famous English literary light, was once on a long tramp in Switzerland, accompanied by his friend, Dr. Morgan. They missed their way and found themselves, parched and hungry, far from any dwelling place. At length they came across a cow, from whom they determined to extract some nourishment, but after trying their best for an hour, each holding on to her horns in turn, they had to abandon all hopes of milk. This, remarks Dr. Morgan, is "one of the very few occasions on which I ever saw Stephen fairly thwarted."—London Spectator.

Columbia Leads.

Columbia leads.
In freedom's cause she takes the foremost place;
"Excelsior" is the motto in the race.
She shouts it far and wide.
The world awakes.
Downtrodden millions follow at her call,
And tyrants see the writing on the wall;
They must take heed or great will be their fall;
They cannot stem the tide.

Columbia leads.
In gentleness of reign she has no peer,
And those inclined to right need have no fear
Of her chastising hand;
But woe to those
To whom she bids the oppressing hand to stay
And heed her not; she'll surely find a way
To chasten those at no far distant day
Who heed not her command.

Columbia leads.
Guide her, O Lord, in this her leading role
With right and might to strive to reach the goal.
To thee our nation pleads—
Lead thou us on
Through weal or woe, where'er our path may be;
Let freedom's banner wave o'er land and sea,
[illegible]
To sing, "Columbia leads!"
—F. W. C. Meyers.

D/34

MANY ERRORS IN B'VILLE GAME

Pitchers in Fine Fettle; Bad Fielding Was Present at All Times

For the second time this season, the Fulton High school baseball team triumphed over the Baldwinsville high school lads in a game at Baldwinsville yesterday which closed with the locals on the big end of a 7-3 count. The game was featured by little hitting and loose fielding on the part of both teams, fourteen errors being the grand total [illegible] during the game. MacIntyre, the Baldwinsville pitcher, who had all the locals buffaloed in the first game played here, showed yesterday that he has something beyond the ken of the locals for he fanned fourteen men, passed only two and allowed but five hits. Some of the credited hits can be chalked up to poor fielding on the part of his teammates, who supported him in a haphazard style, making six errors.

But if MacIntyre lost the game in spite of his pitching, Barnes won it in spite of the fielding of his team, for "Honey" pitched one of the best games of his career. Only seven batsmen fanned the air, but three hits were sufficient for the B'ville squad, and in the last six innings only twenty-one men faced Barnes, who was working like a leaguer, with fine control and lots of steam at all times.

The batting order was shaken up a little without any perceptible results, D. O'Brien leading off and Bray batting in the clean up in place of Pullen who, seems to be in as deep batting slump.

O'Brien sprained his ankle while stealing home in the fifth, but he continued the game until the eighth, when he was replaced by Lewis, Barker replacing Lewis. The ankle began to swell badly last night and O'Brien was put under a doctor's care. It is not likely that he will be able to play again for a week, at least.

In the eighth, while Barker was playing second, Bray threw to catch a B'ville stealer, but the throw was a little high. Barker went up for it and while he was off the ground, the runner slid beneath him and hit his foot, which caused Barker to do a circus flip, which closed abruptly when the Fulton lad landed on his bean. Although badly shaken up, Barker continued the game.

Fulton's first run came in the second inning and Captain Mike Bray was the runner. After reaching first on an error by Lynch, Mike stole second, also pilfered third and came in on Barker's slow roller to second.

In the fourth the locals negotiated two more runs. Keeler was safe on an error, Wilcox pounded out a double that scored Keeler and later Bray and Wilcox successfully engineered a double steal upon which Wilcox scored.

O'Brien stole second, third and home in the fifth inning after he had nicked MacIntyre for a safety. Fulton got two in the seventh on two errors, a hit batsman and a sacrifice hit.

Hits by Wilcox and Pullen netted one more in the last inning.

B'ville scored twice in the third, when with two down, the Fulton team made four consecutive errors. Barnes was finally obliged to fan Hoolihan with the bases full. A hit by Root in the fifth coupled with an error by O'Brien, who was playing center in spite of his sprained ankle, allowed another tally.

The Fultonians ran the bases like fiends, and Adsit, the B'ville catcher, was as ineffective as a wooden man when it came to cutting the runners down. Only two stolen bases were registered off Bray who threw hard and fast to the corners.

The game winds up the season with Baldwinsville for the locals, Fulton having won both games by good margins.

The score:

FULTON

	AB	R	H	PO	A	E
D. O'Brien, 8,	4	1	1	1	1	1
Keeler, 5,	4	2	0	2	0	1

Stolen bases—Bray, 6; Wilcox, 4; O'Brien, 3; Keeler, 2; Pullen, 2; Lewis Kraus, Thompson, Chapman, Gigelow Sacrifice hits—Bray, Barker. Double play—Lewis-Kraus. Struck outs, by Barnes, 7; MacIntyre, 14. Two-base hits, Wilcox, Root, Keeler.

THIRTEEN CIVIL ACTIONS LISTED FOR COURT TERM

The calendar for the June term of County Court which will be convened by Judge Henry D. Coville at the Court House at Pulaski next Monday morning, was issued yesterday. Only thirteen civil actions are noted for trial. The criminal calendar consists of twenty-eight cases which is one of the largest in the history of the county. The civil cases follow:

Mary A. Pare against Fred M. Elmer, as executor of Melissa Service, action on contract; James Signorile against Brosemer Brewing Company, appeal from Justices Court; Carmelo Ferarо against Robert M. Barnett, alleged negligence; Samuel Rocco against Henry B. Burgard, alleged negligence; Walter Gannon against Robert McIver, action on contract; Henry Motott against Henry P. Burgard, alleged negligence; Vincent Roberts against Frank White and James Doney, alleged fraud; Avid Bloom against the City of Oswego, alleged negligence; Maysel G. Moody against peoples Hardware Company, action on contract; Nicoli Bati against Robert M. Barnett, alleged negligence Marshall Terminell against the Peoples Gas and Electric Company, alleged negligence; Floyd E. Serles against Fred A. Laraway, action on contract, and Daniel O'Brien against John Smith, appeal from Justices Court.

Why a Chautauqua?

BECAUSE:

It acts on the brain and increases the totals of knowledge.

It brings us high grade music in abundance.

It furnishes a lot of wholesome amusement.

It brings able men with messages worth while.

It inspires young men and women to do their best.

The Redpath management keeps the cost within reach of all.

It gets the people to working together for the good of the community.

It is built for everybody, and everybody likes it.

It's a good thing. PUSH IT ALONG.

POLICE AND SHERIFF FAIL TO GET ROBBERS

District Attorney Culkin, Sheriff Buck and the Oswego police force continue to search for the trail of the men who robbed Caretaker Pierce and the latter's housekeeper at the Riverside cemetery Monday night.

Mr. Pierce, although unable to give a very accurate description of the men, says he has them photographed in his mind and if he ever sees them will be able to recognize them. During the trouble he displayed remarkable coolness and in the face of a revolver stopped to light a cigar and continued to smoke and tell the men to be careful, while they ransacked his house. When they removed his old-fashioned wallet from his pocket he told them not to take the checks, that they might get in trouble. In throwing the checks to the floor the crooks threw about $100 in $20 bills with them.

PRENDERGAST TALKS FINANCES TO MAYORS

Troy, June 3.—Willliam A. Prendergast, Comptroller of the city of New York, discussed "municipal finances," before the Mayors' Conference today. He declared the demands for economies are not based upon an intelligent understanding of governmental needs.

Dr. Herman M. Briggs, State Commissioner of Health, said through the efforts of an efficient and comprehensive healith department, combined with the activities of many volunteer organizations and a good milk supply, the death rate of babies in New York city has been reduced more than fifty per cent and is now less than 100 per 1,000 births.

NO AMERICANS IN ZEPPELIN RAIDS

London, June 3.—Americans having relatives or friends in London should not be alarmed at lack of news about the Zeppelin raid. No Americans were on the list of killed or injured.

Strict censorship henceforth will be enforced concerning news of future air raids, however trivial, in England.

The Zeppelin air raid on London was made on the night of May 31. The airships dropped ninety bombs on the capital, killing four persons and injuring several others. A number of private houses were set on fire by the incendiary missiles.

YALE TO GET $511,000 C. H. FARNAM ESTATE

New Haven, June 3.—Through the will of Charles H. Farnam, jr., who died in Paris, Yale eventually will receive the $511,000 Farnam estate. It is left in trust for his mother and upon her death will go to Sheffield Scientific School.

NINETY-MILE DIRIGIBLE

Madrid, June 3.—The trial will shortly take place of a new Spanish dirigible, which cost $160,000. It is the invention of Francisco Salas and carries fifteen motors of the aeroplane type, g iving it a speed of ninety miles an hour.

That baseball peace is desirable this year for the good of the game has been shown by the diminished gate receipts. Small crowds have been the rule in many cases, more especially in the large cities. On opening days for the leagues the games were well patronized, showing that interest in the sport survives, but later patronage at times dwindled to a point which could but discourage the promoters. One solution is that the league war weakens clubs, that there can be no strong "winning" clubs to hold patronage and that empty seats will be the rule instead of the exception.

Japan's disinterestedness in China has not impressed the organs of public opinion in this country nor in England, where the Japs might at least hope for the benefit of a doubt. First and foremost, the time for pressing her demands when concert of the powers which were parties to the old order of things is impossible is a most suspicious circumstance. Just claims will be just a year hence, and Japan impugns the good faith of other powers when she intimates that in order to have a square deal she must seize it herself.

Keepers of city restaurants who have been providing vaudeville entertainments for their night patrons have recently found the extra expense a burden. It has led to competition in giving the best show, and there has been too much singing, dancing and "risque" dialogue. Return to quieter meals will be welcome to the majority of restaurant patrons, and the minority can easily find all the noise they desire next door or around the corner.

HOUSTON AIDING FARMERS' WIVES

Extension Work Is Now Conducted on Broad Scale.

WOMEN TAUGHT EFFICIENCY

Value of Home Conveniences Demonstrated by Agents of Department of Agriculture — Data Show Amount Spent and Outline the Visible Results—Work Is Just Started.

Washington.—Secretary of Agriculture Houston is going to try to solve the problem of unrest among country women by improving their condition.

"The chief objections of women to country life," according to a statement issued by the department, "are usually the generally small returns from farming, the drudgery of farm work and the social isolation.

"Data taken from the records of the department and relating exclusively to work of this kind in the thirty-three northern and western states show the following distribution of funds: For meetings and movable schools, at which demonstrations are given in cooking, sewing, household conveniences and for the organization of women's clubs to study home economics, $81,555; for canning clubs to teach girls and women how to prevent many of the wastes of the farm by canning and preserving fruits, vegetables and meats by cheap and rapid commercial processes, $56,197; for county agents who help farmers and their wives to

SECRETARY HOUSTON.

increase the net income of the farm and thus make possible the introduction of labor saving conveniences and other improvements $1,027,312.

"Extension work designed to be fundamentally helpful to farm women seems to include within its scope certain matters, as follows:

"First.—Plans to increase the net income of the farm. Farm women need more money for home purposes. The purchase of home conveniences, the installation of water, sewerage, lighting and heating systems, kitchen and other conveniences and the bringing of literature and music into the home are, in the majority of country homes, dependent upon greater net profits in farming. Knowledge of these conveniences and other desirable things is good, but money to buy these desirable things is a vital necessity if country life is to be made as acceptable to women as town life.

"Second.—Plans to teach and demonstrate efficiency in farm home management. These include such matters as wholesome food properly prepared and served in adequate supply and variety throughout the year, the care of the home and the family linen and wardrobe, the care and management of children and sometimes the handling of certain farm enterprises like poultry and eggs, milk and butter, the garden, small fruits, etc. Efficiency in farm home management contemplates the maximum of accomplishment with the minimum of effort to the end that the farm family may find satisfaction and contentment in the home and that the time of the farm woman may be conserved.

"Third.—Plant for leisure and development. The farm woman needs time for reading, self development, child teaching, social life and recreation.

"In the development of home economics demonstration work there needs to be kept in mind the point of view that the problems of country women must chiefly be solved by country women. The county agent movement in some sections of the north and west started out primarily as a city man's movement, but it has succeeded in exact proportion as the farmers of the county have taken hold of the work and made it their own."

Monument Set Up For Ape.

Summit, N. J.—The grave of a pet monkey which was owned by Mr. and Mrs. Frederick Humphreys of New York and was buried here a short time ago on the estate of Mr. Humphreys' mother, Mrs. T. St. John Gaffney, is now marked with a handsome [illegible]

PAID IN HIS OWN COIN.

Knox Gave Unto Root What Root Had Passed Out to Depew.

Some years ago Senator Depew told a little story on himself and Senator Root in a speech at a dinner in Washington to Mr. Root by the New York Republican congressional delegation.

"When Root was secretary of state," said Senator Depew, "I went over to see him and asked him if he couldn't do something for me in the line of consular appointments. He said: 'Senator, I'm sorry. I would like to do something for New York, but'—and Mr. Root picked up a paper from his desk—'I see that New York's quota is now exceeded by 14 per cent.'

"Well," continued Senator Depew, "I kept going to see Senator Root for a year. Every time I went to see him he would remind me that New York's quota was exceeded by 14 per cent. Finally I said, 'Mr. Secretary, I think you're a great statesman, but your mathematics are inclined to be automatic.'

"However," said Mr. Depew, "all things change, and after a while Mr. Knox became secretary of state and Mr. Root became senator. And then one day Senator Root went up to see Secretary Knox about some consular appointments. 'I'm sorry,' said Mr. Knox, 'but'—and he turned to a document file—'I find that New York's quota is now exceeded by 14 per cent.'"—New York Sun.

Punctuality.

Unfaithfulness in keeping an appointment is an act of dishonesty. You may as well borrow a person's money as his time.—Horace Mann.

Well, He Deserved It.

According to an éminent botanist, plants are so sensitive that they resent neglect and are susceptible to kind treatment, showing their gratitude in charming ways. We are therefore the more ready to believe a story told us not long ago by a lover of nature. He was watering a fern on a cold morning. He forgot to temper the water. The fern, incensed by the shock, leaped from the pot and bit him savagely in the leg.—Philip Hale in Boston Herald.

Spoiling a Hat.

At the obsequies of a Quaker in Brooklyn a grave looking gentleman with an unusually tall hat entered and, seeing no rack in the hall, placed his hat on the floor just behind the door. Presently another grave Quaker entered with a large, dripping umbrella and, peering anxiously for the usual receptacle, saw in the gloom the hat resting on the floor. His eyesight was probably poor, for he mistook the hat for an umbrella holder, and in it he deposited his dripping parachute. This was an example for those who followed, and in a short time the tall hat was holding a dozen umbrellas. At the end of the services the grave gentleman found an inch of water in his hat and looked graver than ever.

SETTING AN EXAMPLE.

Said at Last.

On one occasion a highland minister called upon Dr. Alexander Whyte of Edinburgh for some financial assistance for the work in the north. Dr. Whyte regretted that he could not afford to assist the highlander, but advised him to visit a wealthy layman in the city.

Going to the house of the wealthy layman, the highlander found him disinclined to give and ungracious in manner. Nettled at his reception, the highlander answered brusquely. Resenting the tone, the rich man asked, "And whom do you take me for?"

"A fire deserving sinner, like myself," came the quick retort.

Returning to Dr. Whyte, he explained the circumstances.

"You did not say that?" eagerly asked the doctor.

"Aye, I did," replied the other.

"Well, well! I've been wanting to say that to him for the last fifteen years. Here's a five pound note for your fund."—Dundee Advertiser.

The Way Out.

Uncle Zeke had confined in a pen two pigs of the "razorback" variety. One, morning when he went out to feed them they were not there.

"What's the matter, Uncle Zeke?" asked a neighbor, noticing the deep dejection with which the old darky was looking down into the empty pen.

"My hawgs is done gone."

"Stolen?"

"No suh! I don' see no signs dat anybody stole 'em."

"Did they climb out over the top?"

"No, suh! Dey couldn't do dat."

"How do you think they got away?"

"Well, suh, my 'pinion is dat dem hawgs kind o' raised theirselves up on sidge an' crept through a crack."—New York Sun.

MONEY MIXUP IF AMERICA FIGHTS

Two Billions Owned by Aliens Here and In Germany.

SITUATION IS COMPLICATED

Forty-eight German Ships In American Waters Would Have to Flee or Be Seized—This Country Would Probably Give Them a Chance to Get Away and Land Where They Could.

Washington.—The precise legal status of many hundreds of millions, perhaps of billions, of property in this country and others would be brought into question if the United States were to become involved in the war in Europe.

Vast properties in the United States of European ownership would be liable to confiscation.

Great properties, though much less in aggregate value, owned by Americans in Europe would be in the same position.

American corporations would not be permitted, it is assumed, to pay dividends on securities held by citizens of the countries with which the United States was at war.

The German ships now interned in this country would be under the necessity of leaving American waters at the risk of being captured on the high seas or else being confiscated in the ports where they are now held.

In all the history of warfare there has probably never been so complicated a financial situation in international relationship as that which would ensue between the United States and Germany if the two countries by any chance should engage in hostilities.

Germans have long been large investors in the United States, particularly in securities of railroad and industrial corporations. It is now pretty well known that these investments were to a considerable degree liquidated in the last year before the war began. During that period Germany was systematically turning its investments into forms most available for quick use, and the conversion was made so skillfully and quietly that the world of business did not fully realize what was afoot until the war had actually broken out.

Consequently it is impossible at all accurately to appraise German holdings in this country today. It is believed, however, that they are largest in railroad securities, then in industrials and finally in real estate and miscellaneous forms of property.

On the other hand, American property interests in Germany are larger than is generally understood, because in recent years a number of American industrials have been forced to establish plants in Germany.

It was estimated that $2,000,000,000 worth of various alien owned investments in both countries would be involved if the two countries should go to war. What would be their standing?

This question is decidedly important to people on both sides who have such holdings. But it is easier answered than the next one.

With the two countries at war unnaturalized Germans in this country would become, before the law, "alien enemies." No matter how loyal to this country or how determined that their conduct toward and in their adopted country should be exemplary, that would be their legal position.

This class of people own great aggregates of property in this country, and to involve them in any general conflagration measures would be so farreaching in their effects that it is recognized as quite impossible that any such would be undertaken.

The declaration of war between two countries has the effect, under long established international practice, of suspending, but not wiping out, debts of a state or its citizens to the citizens of another state.

The reasons are manifest. In the first place, to pay debts to a foreign state during war would be to furnish the sinews of war to the enemy. In the second place, if the debtor declined to pay, there would be no chance to enforce collection, because the debtor, an enemy alien, would have no access to the country's courts to enforce payment.

The forty-eight German vessels interned in this country, appraised as worth nearly $200,000,000, are in a peculiar status. Interned here because the United States is a mutual friend, they would suddenly be found to be in the complete power of a new enemy.

It is explained that the peculiar obligation which the United States has assumed toward them raises questions not before broached—whether it would be violating a very special and unusual faith to appropriate the ships now if this country and Germany were at war.

The procedure which the authorities believe correct would be to notify the vessels that they must leave American territorial waters and to give them a fair chance to do so. After that they would be liable to seizure by American war vessels or by the vessels of America's allies.

Or, if the Germans preferred, they could decline to leave, the United States government could, take possession of [illegible]

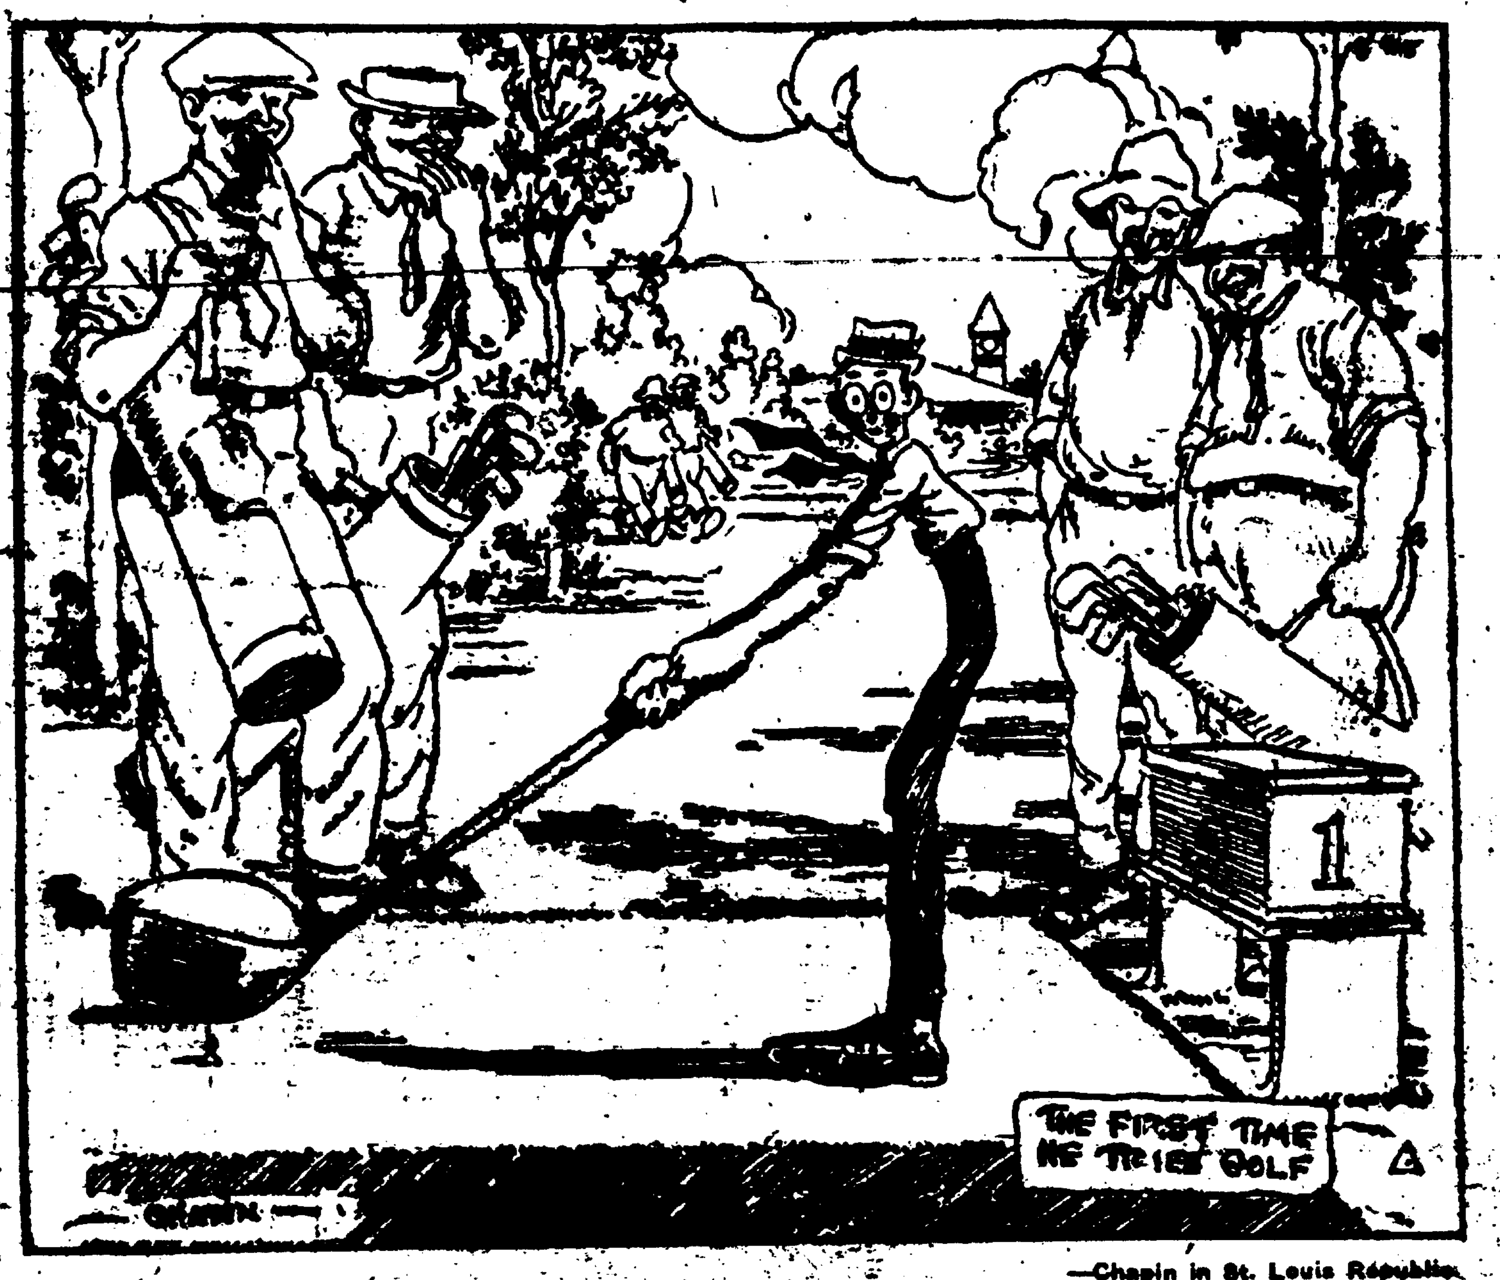
Lloyd-George Would Have Conscription for British Workman; He Says Lack of Munitions Means Defeat

BREAKING INTO THE BIG LEAGUE.



—Chapin in St. Louis Republic.

BRITAIN'S WAR SHOP TO GO UNDER MARTIAL LAW

David Lloyd-George, Minister of Munitions, the newly created office in the new coalition Cabinet, in a speech in Manchester, brought the most urgent message ever told a British audience.

He declared that it depended more upon the masters and men of the workshops of Britain than almost upon any other section of the community whether Britain emerged from the colossal struggle beaten, humiliated and stripped of her power, honor and influence and the mere bondslave of a cruel military tyranny, or whether she should come out triumphant, free and more powerful than ever for good in the affairs of men.

Referring to the fall of Przemysl, he said:

"The Germans achieved a success—a great success—not because of the superior valor of their soldiers, but because of the shower of shot they poured upon the Russians. Two hundred thousand shells were concentrated in the course of a single hour on the Russians.

"Had we been in a position to apply the same process to the Germans on our front they would have been turned out of France and we should actually have penetrated into Germany and have seen before us the end of the war.'

Lloyd-George's, Manchester speech was delivered before employers in the engineering trades and trade unionists. He received a remarkable ovation from the people of Manchester, which was in striking contrast to the manner in which he was received when he appeared as an opponent of the Boer war.

After conveying this "most urgent message," which was that "it depends more upon the masters and men occupied in running workshops than upon any other part of the community, whether Great Britain will emerge from this colossal struggle the mere bondslave of cruel military tyranny," Mr. George said:

"I come here to tell you the truth. Unless you know it, you cannot be expected to make sacrifices. Our Russian allies have suffered a setback.

"The German battle as won by the use they made of their skilled industries, and especially by the superior organization of German workshops.

"For the moment we have more than plenty of men for the equipment available. More men will come to the call, but we want the workshops tto equip them with weapons. The State now needs the help of all, and I am perfectly certain that British engineers can do what the French engineers have already done."

ITALY CALLS TO COLORS RESERVISTS IN AMERICA

New York, June 4.—Italy issued her formal call for reservists here yesterday in a notice addressed to all of her subjects living in the United States. It notifies all males of Italian birth between the ages of twenty and thirty-nine years to return at once and join their regiments.

From early in the morning until late last night thousands of eager, cheering Italians thronged the narrow hallways leading to the Italian Consulate-General, Spring and Lafayette streets, and they overflowed into the streets, impeding traffic and requiring a corps of police reserves from the Mulberry street station to keep them in order.

When the Consulate closed, at four o'clock, it was estimated that more than five thousand men had registered for transportation to Italy. From the Consulate agencies in Rhode Island, Connecticut and New Jersey, which are under the jurisdiction of Signor G. Fara Forni, Consulate General on New York, came messages saying the entire office forces were at work tabulating the names, ages and addresses of eager volunteers, who were answering the call.

Italians conversant with the stuation declared at least 200,000 of the 400,00 reservists resident in this country would return. Of this number, it is believed, between 15,000 and 20,000 would leave New York within the next six weeks.

Transportation when necessary will be furnished by the Italian government, and reservists will be carried only aboard vessels of the five Italian lines. These vessels have a capacity for carrying many thousands of reservists, and as they are subsidized and subject to the call of the Italian government, no time will be lost in arranging for transportation of reservists. The first to go, probably about 2,000, will be carried on board the Duca degli Abruzzi, of the Navigazione Generale Italiana, which steams for Naples and Genoa tomorrow.

The call for reservists contains a special appeal for non-commissioned officers, electricians, signal corps men and sailors of the classes of from 1880 to 1888, and also for officers of the classes of 1889, 1890 and 1891. They are asked to communicate at once with the Consul General here.

SHIP CARRIED NO ARMS

Collector Malone Repudiates Stahle's Assertion That He Saw Guns

New York, June 4—Before the Lusitania, of the Cunard line, left New York on May 1 to be blown up by a German submarine off the Irish coast on May 7, the Collector of the Port, Mr. Dudley Field Malone, was on board. For two hours prior to the hour of steaming Mr. Malone searched the vessel for arms. He had been persuaded to make a personal inspection after reading the advertisements which had been inserted in New Yorw newspapers by the German Embassy.

The Collector inspected all hatches and open decks and made a careful survey of the forecastle head and the bow, parts of the vessel which, under a ruling ffrom Washington, are barred for the placement of armament of merchant vessels to be used for defence.

No trace of a gun, a gun mounting or any munitions serviceable for large calibre rifles were discovered by the Collector. Of course the Collector know, as do most of those persons with a knowledge of shipping, that when the Lusitania was laid down the plans of the British Admiralty provided for steel gun mountings reinforced in the ship's structure forward. These gun mountings, as were those in the stern of the vessel, were covered with deck planking on May 1 when she left this port.

Mr. Malone's inspection was supplementary to the thorough inspection of the vessel by the neutrality squad of the Custom House when she took on supplies, cargo, crew and passengers.

The neutrality squad numbers seventy-five of the keenest, most alert and watchful of the customs inspectors and outside men of the office. This squad was organized when hostilities began. They are experienced men, all of them familiar with every neek of a ship, and it was their report as a squad and as individuals and his own observation that caused Mr. Malone to make the unequivocal statemtn to Washington after the sinking of the Lusitania that she was unarmed and carried no guns, mounted or unmounted.

WEST SIDE RESIDENTS WHO DESERVE A PARK

Citizens in the vicinity of Hannibal and Worth sts., have finally taken action in regard to the small plot of ground which graces the junction of those streets. The Board of Public Works was asked to do something to put the park in first class condition, and was also asked to supply flowers and plants for the spot, but the citizens saw no action forthcoming, and started work themselves by voluntary contributions.

The list in on file at the Dolbear Grocery and no contributions have been solicited, but any one who wishes to help beautify the spot can do so by subscribing any sum, no matter how small, to the fun.

CARDINAL FARLEY, BY "MIRACLE," STARTS AUTO

New York.—Cardinal Farley today performed a great miracle. He started a refractory automobile.

After waiting an hour following commencement execises at the Marymount School, Tarrytown, for his chauffeur to get the engine starrted, Cardinal Farley poked his cane about the interior of his car, touched a spark plug and the machine resumed operations.

RECKLESSNESS IS DESCRIBED

New York Official Points Dangers at the Mayors' Conference

Troy, June 4.—"If our cities do not learn to be more conservative in the methods adopted for financing their street improvements it will be necessary to subject them to some such supervisory powers as are exercised by the local Government Board over financial affairrs of British cities," said Nelson P. Lewis, chief engineer of the New York Board of Estimate, in his part of the city planning survey report made at session of the conference of Mayors of New York State.

He warned the officials against reckless financing as practiced in some American cities in the past and cited several instances to prove his assertion that the issuance of long term bonds for short lived improvements is detrimental to a sound financial policy. In one instance, he said, the New York Legislature authorized two towns now within the limits of New York cty to incur a debt aggregating $10,000, which was to be entirely paid off in not more than 13 years. Three years later the act was amended so that an annual debt of $390,500 was incurred and saddled upon the city in such a fashion that it could not be entirrely paid off for 278 years after the first bond issued.

"In all our cities the burden of creating and caring for public streets is assumed by the city at large," said Mr. Lewis, "and a question worthy of serious consideration is that of the manner in which the funds for this purpose are to be raised. The cities must either pay cash and include the expense in the annual tax budget, or must use their credit by issuing bonds for short or long periods. Most communities prefer borrowing to paying cash and there has been some very reckless borrowing in the past, but it is gratifying to note that the terms of theb onds issued by the cities of this State to meet the cost of street improvements while varying from 10 to 35 years rarely exceed 20 years."

City Planning Experts

The Advisory Committee of City Planning Experts made its final repotr on the city planning survey of the cities of the State today.

The 29 cities examined have a combined area of about 335,000 acres, or 524 square miles, and include a population of some 6,915,000 persons, or over 70 per cent. of the population of the State. The per capita tax varies from $5 in Norwich to $35.86 in New York. The combined debt of these cities is now $11,464,000,000, of which all but about $100,000,000 is included in the debt of New York city, while many of the cities of the State have closely approached, if they have not reached, the constitutional limit of their debt incurring power.

Summarizing the State-wide situation he said: "So generally the haphazard—go as you please—method is still in vogue, but this system cannot long endure. A building requires a plan and we must plan a group of buildings or several groups of buildings or combinations of groups with their connecting streets and arteries or the result will be confusion. The larger the city the more acute the problem, and the longer we wait the worse it gets, so we urge a serious study of this subject in all our cities. The city plan is the program for action and it is as necessary as a chart for the pilot or a road map for the motorist."

Parks and Playgrounds

New York State cities appreciate the present need of parks and playgrounds, was the opinion expressed by Charles Downing Lay in his part of the city planning survey report.

"People everywhere seem conscious of our deficiency in providing parks and playgrounds," said Mr. Lay, "but everywhere they are groping to find the means for providing not only for the present, but also for the future when, as I think they realize, the equipment of parks and playgrounds must be more perfect."

Mr. Lay advised the city officials "to keep well ahead of your needs in the purchase of property and way behind in its development."

WAITING FOR THAT PAVING TO BEGIN

Bassersby in the vicinity of the Quirk theatre building were nearly blinded by a cloud of dust which arose when the agent on an adjoining premises started to clean house last night about 10 o'clock, and during the course of the operation began to sweep the street with a broom. The dust arose in a great cloud and on one narrow stretch of pavement a heap of dirt large enough to fill a wheelbarrow was collected.

The street evidently needed some cleaning, but the Department of Public Works has announced that it is almost impossible to keep the paving clean because of the bad condition of 1st st. above it. The macadam street is now full of mud holes and every vehicle which passes over it carries its quota of dirt into the business section.

GAME DREW MANY OF FULTON PEOPLE

A large number of Fultonians witnessed the Detroit-Pittsburgh ball game at the Syracuse Stadium yesterday afternoon. Most of the local delegation were Elks.

Among those who made the trip by trolley and automobile were Dr. and Mrs. E. A. Gladman, Mr. and Mrs. A. T. Jennings, A. E. Roberts, George Walker, Frank Massaro, Theo Foster, J. W. Stevenson, W. L. Woodbury, John Cavanagh, George Fuller, John Painter, E. O. Baker, Fred Rader and many others.

INJURED KNEE, LOST BOUT

Green Delivers the Goods in First Round, Winning Admiration of Crowd

"Kid" Green, the young 110-pound boy who stacked up against Jimmy Cy Curran of Syracuse in a three-round battle at the Arena last night, lost what might have been a decisive victory through a streak of hard luck. Gheen entered the ring in the pink of condition and confident of his ability, and in the first round walloped Curran at will. In a furious rally toward the end of the round, Green slipped btu recovered himself and proceeded to smother Curran with an avalanche of blows.

When the local boy returned to his corner he complained of a severe pain in his knee, occasioned by the fall, butg amely resumed the battle in the second session. Curran did not have a look-in and the fight was all Green's when some more fast foot-work, coupled with the bad knee caused the local lad to do another Brodie to the mat. When he arose the second time he carried the fight to Curran until a few second before the gong and then keeled over and was unable to rise without assistance. A doctor was called who examined the knee informed Green and the referee that it was badly sprained.

The lad's gameneas was vigorously applauded by the crowd as he had Curran well whipped when he was abliged to quit. Green felt his enforced retirement keenly as he had expected to open his ring carreer with a victory.

A large crowd of admirers accompanied the Fulton lad to the Arena and many of the Elks and other Fultonians who attended the Field Day at the Stadium were present at the bouts. All of the Fultonians were sorry to see Green leave the ring but inasmuch as he had the fight won at every stage the local contingent was satisfied and gave the lad a rousing hand when he left for his dressing room. John Ward, Green's manager, expects to match the little fellow again in two weeks.

HEYDECKER HAS BOOKS FOR FREE DISTRIBUTION

Secretarry Heydecker of the Chamber of Commerce, has received a booklet, "God's Country," published by the Colorado-Utah Log Book Co., and circulated by the company among the chambers of commerce in the east. The book should be invaluable to any tourist who contemplates a trip to the Exposition by automobile or motorcycle, as it gives a clear- concise and truthful description of all the roads and transcontinental routes through the two states. Copies of the book may be obtained from Secretary Heydecker free of charge.

On the Rialto

Governor Whitman has done the popular thing by insisting on a direct tax, but he has done the honorable and manly thing. He has insisted that New York State shall pay up and at once; in an endeavor to make the paymetn of back debts as easy as possible he has vetoed items amounting to over two and a half million dollars, many of them almost necessities, but like every honest man who has lived beyond his income, he realizes that retrenchment and economy are necessary. The Governor's statement clears the air and will win for him the confidence of the men who want this state's affairs placed on and conducted on a business basis.—Hudson Republican.

* * *

Republican platforms for 1914, in all states, declared in favor of "a protective tariff." There were fourteen states last year where the Progressive party had a platform. Seven of them pronounced, in terms for "a protective tariff," and the other seven reaffirmed the platform of 1912, which was a "a protective tariff" platform. Progressive votes, in 1914, were for a protective tariff and for Republican candidates—as they will be in 1916.—Newburgh News.

* * *

Those who are most familiar with the needs of the state hospitals for the insane compliment Governor Whitman warmly for refusing to yield to pressuer of New Yorkers and veto certain items in the appropriation bills providing for the enlargement of some of those institutions.—Rochester Democrat and Chronicle.

* * *

The constitution builders at Albany are receiving a mass of suggestions for the new fundamental law of the State. Nearly everybody has a fad and fancy to incorporate into the new charter of State government. The constitution of the United States is, of course, the best type of a written constitution. Brevity, simplicity and clearness mark the great American charter. The convention at Albany will not go far astray if it regards this ancient landmark.—Newburgh Journal.

OUR BAND CONCERTS

The inspiring sight of the hundreds of persons grouped in the park recently while the stirring strains of the local band united the whole into a community unit, has again brought to the surface the Sunday concert "bee."

The music produced by the local band is an undoubted source of pleasure. Hundreds of Fultonians would avail themselves of the opportunity to attend open air concerts on Sunday afternoons. The effect upon the community as a whole could not be other than happy and wholesome. Picture the big family group that would assemble in the park at 4 o'clock on Sunday afternoons and give themselves over in happy mood to a half hour's music. Then, perhaps, the last number might figure as a national air in which the voices of all might join. Would this not add as a builder of patriotism, especially among the young people? At least, this would serve to unify the people of this city as no other medium within our grasp could do.

Following is a splendid article on Municipal Concerts as given in the American City:

There's a little thousand-dollar park, comprising but a block, in the center of a rather exclusive residential district of Austin, Texas. It is a sort of auditorium, playground and social center all combined; at one time a political forum, at another a stage for some church festival, at another a playground for throngs of children; or a meeting place for thousands of music lovers to hear free municipal concerts.

For seventy-one years this plot of ground was an unsightly plague-spot in the heart of a beautiful residence district. It was a dumping-ground for tin cans and other rubbish, and two springs in wet seasons converted the floor of the ravine traversing it into a mosquito-breeding marsh. An intelligent administration, by the investment of $1,000 in 1910 and later, metamorphosed this ragged piece of landscape into a thing of beauty; and a keeper at $60 per month and the expenditure of $250 per year for incidentals, keep it a joy forever.

Mayor Wooldridge went about this work gradually, building up the soil with street sweepings and the rich dirt of excavations, weeding out a tree here, and trimming one up there, accommodating the serpentine walk to the natural lay of the land; in short, he let this park grow along the line of least resistance. A bandstand of classic design, serving also as a sort of arch over the small stream now confined to a concrete runway, adorns the center of the park, carrying out the amphitheatre scheme. The acoustics are so nearly perfect that a very ordinary speaker can be heard by 8,000 people—indeed, the slopes as nature left them could not be better adapted to banking auditors comfortably and compactly.

Of course, the $1,000 mentioned above does not include the expense of laying sidewalks, curbing and parking around the block, but that expense is chargeable to street improvement, anyway. And besides this, the residents of that district began to take so much pride in the park as they witnessed the gradual metamorphosis, that they raised by private subscription enough money to construct the bandstand, install an ornamental light or two, and stick in a few other minor adornments.

By far the most important use of this park is for free municipal musical entertainments. No great sum is appropriated to bring world-renowned artists to the city, or to keep high-class musical organizations constantly on the payroll. It is rather a home affair. Two men, whose musical taste is beyond reproach, and who are themselves accomplished musicians, are given the authority to assemble a municipal band out of the best musical talent in the city. Each entertainment costs only about $60. Two concerts per week will be given throughout the present summer.

There was considerable opposition to these concerts in 1911; the council gave grudgingly, and by only a bare majority, $500 for this purpose. There was appropriated $600 with a little freer hand the next year; no opposition was made to appropriating $1,000 in 1913, and last year a rather enthusiastic council set apart $1,500 for the purpose. No small thing would cause such a large howl as the abandonment of free municipal concerts in Austin. Mayor Wooldridge feels justly some pride in this institution-pet of his, as it has been from the start. Since about 5.000 people hear these concerts every week, the expense per individual per concert is only about 3½ cents; and this, with the fresh air and pleasant, unrestricted, democratic sociability of the affair, makes it come cheap even in hard times.

AUBURN INVENTOR DIES IN THE WEST

Rochester, Minn.—Samuel V. Kennedy, inventor, and for several years manager of all of the manufacturing plants of the International Harvester Company east of Chicago, died here today in the Mayo Hospital, following an operation on him there about one week ago.

For many years he held positions with the Winchester Arms Company, the Whitney Arms Company and finally the Colts Arms Company, in all of which he revolutionized the character of small arms and rifles. Subsequently, however, he turned his attention to the development of the manufacture of harvesting machinery and became associated in that business with D. M. Osborne & Co., at Auburn, N. Y.

Ultimately hebecame manager of the Auburn concern and was acting in that capacity when the International Harvester Company acquired the Osborne Company. Soon after the business had been merged Mr. Kennedy's sphere of activity was broadened, and he was promoted again and again, until within a short time he was placed in charge of all of the harvester company's plants east of Chicago.

PRESENT CONSTITUTION FITS NEEDS OF DEPT.

Albany, June 4.—It is the belief of Dr. John H. Finley, State Commissioner of Education, that the educational system of New York is removed from politics. He requested the constitutional convention to leave the constitution as it is with reference to the administration of his department. Dr. Finley appeared before the Committee on Governor and State Officers.

In this connection Dr. Finley opposed a recommendation of the New York Department of Municipal Research that, if the short ballot were adopted, the Commissioner of Education be one of the Governor's cabinet. Such a change would tend to make politics a consideration in selecting a head of the Education Department, Dr. Finley said, and this was inadvisable.

Opinions

Silly Season Here

The silly season must be close at hand when staid and reliable New York and Boston papers devote columns of their valuable editorial space to the discussion of the question: "At what age does a woman cease to be young?" The New York Globe insists that a woman grows younger as she grows older. It says: "The high school girl may have some lingering notion in mind that it isn't chivalrous for a man to smoke in her presence, but grandma smokes herself. The college girl may have an interest in philosophy, metaphysics, and like abstruse subjects, but her aged maiden aunt is interested only in the latest step in the fox trot." If that is true, then it is apparent that reforms should be institutde in New York cabarets in the interest of the elder generation rather than of young and headstrong girls. Grandma may appear frivolous, but the fact probably is that this appearance of frivoity is due mostly to the contrast which she presents with her own grandmother. In other words, people are not entirely accustomed to the idea of having their grandparents display an interest in the new and interesting things of life.—Rochester Democrat.

Going to the Circus

Of course it is rather undignified for grown people to take a very deep interest in the circus. Long, long ago the possibilities of the human form for contortion, and of human muscles for hurling the human form about, were exhausted.

All the jokes are old.

As for the animals, we've seen them all. The explorers haven't opened up a new wild animal region since P. T. Barnum's time.

But they are not old to the children—none of these things. They still have a catch in the breath at sight of the big tent. To them there is still something wonderful, epic in that long finger which searches the crowd for peanuts on the tip of the elephant's trunk, in the hoarse grunting roar of the lions, in the red perspiration wiped from the blood-sweating rhinoceros—or is it the hippo?

And are you quite sure it wouldn't pay you personally to go to the circus? Have you ever tried it with your own children? These latter are a circus in themselves. To the fond parents who will make a day of it with the youngsters there's nothing like a good circus. The children are able to make the whole show new to the oldsters.

The man who gives the children as his excuse for going to the circus should not be laughed at. It's the best excuse in the world. Incidentally, there's a lot to be learned there. A stockman who can go through the horse tents and the animal show and not get paid for his trip must live a long, long way out.—Farm and Fireside.

A Man of Courage

Francis M. Hugo, Secretary of State, is a man of courage. He says that there are too many State jobs. To have said this during a campaign would have been expected as a matter of course. Everyone is saying it at that time, and all of the candidates are asserting that, "If you'll just send me down to Albany, I'll clean 'em all out." That is the end of it.

But here is the Secretary of State telling the constitutional convention, or, at least, its committee on State offices, that thereare too many State jobs. Possibly Mr. Hugo has good reasons for complaint, but if that be true, it must be because he is a glutton for work. He wants more to do. His office for years back has been the soil upon which two blades of grass have been made to grow where only one grew before. This development has been carried out in geometrical progression.

Whenever the Legislature desired to create a new job, or an outfit of jobs, the Secretary's office has been one of the department's which has furnished the soil for the crop. A few years ago a whole State department was created in this way, and hundreds of employes and hundreds of thousands of dollars were added to the expense of the State. This new department is the bureau of elections, which has a superintendent, a lot of deputies, a bureau in every county, and a retinue of employes who get out the ballots in the fall.

Mr. Hugo told the committee how other bureaus and separate boards have been established, each headed by an official and each having a force of clerks. The secretary said that many [illegible] a lot of consolidation made.

The Secretary is right. The constitutional convention committee, backed up by the convention, has power for real economies in this respect. But it is a job chiefly for the Legislature, and a Legislature to measure up to the task has never appeared and none is in sight.—Utica Observer.

WITH THE SUFFRAGISTS

In Argentine Republic, according to Rocardo Aldao, delegate to the Pan-American Financial Congress, a man can't get married or make any kind of a contract unless he has a certificate showing that he voted at the last election. Before this law only about twenty per cent of the men voted but since it was passed about ninety per cent vote.

Yet the distinguished visitor did not argue that men in his country ought not to be allowed to vote because they had proved so plainly that they did not want to.

* * *

According to the New York Times, Mrs. Cranmer, a member of the Colorado Board of Pardons, said of the recent Denver election, "I was never more disgusted in my life. Suffrage is a failure. I shall never vote again.

According to a statement made by Mary C. Bradford, State Superintendent of Public Instruction, "The proportion of woman vote cast in residence section yesterday was very large, in spite of violent storm. Personally I see no diminution of interest among women voters. They are keenly alive to matters of civic righteousness and active in all political and civic organizations."

A telegram from Judge Lindsey to Anna Howard Shaw reads: "Mrs. Cranmer positively denies interview."

* * *

Women in New Brunswick, Canada, can now vote for city officials, though married. Widows and single women have had this right for over twenty years.

A letter from the president of the St. John Suffrage Association published in the Woman's Journal, tells the story of the struggle for this extension of the franchise beginning with a referendum last year and ending when the legislature of this year passed the necessary bill.

* * *

In New York city, according to A. M. Crocker, civil service examiner, men get $1500 a year for doing what women do, perhaps better, for $1200.

* * *

In Chicago Louise Osborne Rowe has been appointed commissioner of public welfare, salary $5,000.

* * *

In Warren, Ill., where the members of the common council have been refusing to confirm the appointments of the mayor, Mrs. Canfield, they have finally yielded and she is thus allowed to proceed with her program for city house cleaning.

* * *

The Kentucky Federation of Women's Clubs in session at Lexington unanimously asked for the submission of a woman suffrage amendment to the state constitution.

LEGACIES OF $12,640 FOR THIRTEEN EMPLOYES

New York, June 4.—Henry B. Anderson, one of the executors, yesterday filed a petition for the probate of the will left by Alfred Gwynne Vanderbilt, in which he disposed of a $35,000,000 estate. Annexed to the petition are copies of cablegrams stating that Vanderbilt was last seen as the Lusitania was sinking. He had given his life-belt to a woman and had said to Dr. Keenan, standing nearby, "I guess they have got us at last."

The petition shows that thirteen employes, who have been working for Vanderbilt for over five years, will share in the estate. The total of their legacies is $12.640. The largest legacy—$2,500—will be paid to C. H. Wilson, manager of Vanderbilt's stables. The executors, who filed their oaths, are Reginald C. Vanderbilt, Frederick L. Merriam, Frederick W. Vanderbilt and Henry B. Anderson.

STORE THIEF USES ASPHYXIATING GAS

Paterson, June 4.—An asphyxiating gas, said to resemble that being used on European battlefields, is being used by a thief, is the belief of the Paterson police.

Yesterday a man entered the grocery of Mrs. E. Boeglins, of Totawa, with an oil can to be filled. When the woman opened the can, fumes almost overcame her. She ran from the store and the man escaped.

The can is being examined by chemists.

DAILY PROGRAM AT CHAUTAUQUA

Strong Array of High Grade Talent of Wide Range and Appeal.

SIX DAYS OF GENUINE JOY.

Celebrated Orators—Men Who Are Doing Things—Women Debaters—Comedians and a World of Music Inspiration—Rest, Recreation, Educa- and Fun Galore.

FIRST DAY.

AFTERNOON. — Opening Addresses. Popular Vocal and Instrumental Concert.
WEATHERWAX BROTHERS QUARTET.
All brothers—All artistic entertainers.
4 P. M.—Organization of Junior Chautauqua for all children under fourteen years of age. Free.
EVENING.—Musical Prelude, High Grade Concert.
WEATHERWAX BROTHERS QUARTET.
Address, "Sour Grapes,"
DR. EDWARD AMHERST OTT
of Chicago,
A witty and purposeful speaker.

SECOND DAY.

AFTERNOON.—Grand Concert by a Great Company.
AIDA QUARTET and C. POL PLANCON
In a program of high order.
3:30 P. M.—Opening Series Lecture.
EVENING.—Musical Prelude, Choice and Snappy.
AIDA QUARTET and C. POL PLANCON.
Address, "The Mormon Kingdom of Today,"
HON. FRANK J. CANNON,
Ex-U. S. Senator from Utah.
A thrilling patriotic message.

THIRD DAY.

MORNING.—Lecture, 10:30 a. m.
AFTERNOON.—Musical Prelude, In Variety Program,
ROBERT and HELEN BARNARD.
Cornet, Stories, Xylophone.
Debate—For Woman Suffrage,
MISS HELEN TODD of California;
Against Woman's Suffrage,
MISS LUCY PRICE of Ohio.
EVENING.—Musical Prelude. More of the Same Quality.
ROBERT and HELEN BARNARD.
Comedy—Shakespeare's "Much Ado About Nothing,"
THE BEN GREET PLAYERS.

FOURTH DAY.

MORNING.—Lecture, 10:30 a. m.
AFTERNOON.—Grand Popular Concert,
QUINTANO AND HIS BAND,
And HARRY BARNHART, Singer.
EVENING.—Musical Festival by a Real Master,
QUINTANO AND HIS BAND,
And HARRY BARNHART, Singer.
An entire change of program from afternoon.

FIFTH DAY.

MORNING.—Lecture, 10:30 a. m.
AFTERNOON.—Musical Prelude of Rich Variety.
R. H. and F. T. M'GRATH, Banjoists;
MISS GLADYS COOPER, Pianist.
Address, "The Misfortunes of Mickey,"
JUDGE BEN B. LINDSEY
of Denver,
The famous Juvenile Court Judge.
EVENING.—An Evening of Popular Selections.
R. H. and F. T. M'GRATH, Banjoists;
MISS GLADYS COOPER, Pianist.
Choice Entertainment by One Who Knows How,
MISS KATHARINE RIDGEWAY
of Boston.

SIXTH DAY.

MORNING.—Lecture, 10:30 a. m.
AFTERNOON.—Musical Prelude With Ginger In It.
CHRISTINE GILES-BINGHAM CONCERT COMPANY.
Address, "Community Building,"
J. S. KNOX.
EVENING.—Devoted to a Very High Grade of Fun.
CHRISTINE GILES-BINGHAM CONCERT COMPANY.
Entertainment,
RALPH BINGHAM
of Philadelphia,
One of the greatest humorists.
A joy night festival.

At the annual organization meeting of the Clifton Springs (N. Y.) Redpath Chautauqua Association, Mr. H. J. Van Dyne, secretary of the association, reported receipts and disbursements of $1. In explaining where he got the dollar Mr. Van Dyne stated that a lady insisted upon leaving it with him because her conscience troubled her for having paid only $2 (the regular price) for her Chautauqua season ticket. [illegible] by the people.

Points for Mothers

A Christening Party.

Christening parties usually are not very large ones, since even the fondest young parents can scarcely expect that there are many persons outside of their immediate families who will be deeply concerned in the new baby.

There may be a few friends living at some distance who should be invited rather formally by written invitations, but the grandparents and near relatives need be bidden only over the telephone or verbally.

If you wish to send formal invitations the following would be a correct wording:

Mr. and Mrs. John Brown
Request the Pleasure of Your
Company at the
Christening of Their Daughter
On Thursday, April 16,
At 4 o'Clock.
37 Bank Street.

The traditional color for a boy baby is blue and for a girl pink. Many mothers, however, prefer to have no touch of color in the little christening outfit for the baby, feeling that white better typifies the purity and innocence of babyhood.

The decorations for the house and for the christening feast, if you are to have one, may be either delicate blue or pink or in white. The choice of most mothers would be delicately tinted flowers rather than all pure white.

The christening should take place in daylight, preferably. If for any reason it is done in any room that is slightly dark and candles are lighted, these should have white shades. If the ceremony is sufficiently elaborate to include music, the most proper music would be cradle songs.

The christening feast should be in no way elaborate. Cake and wine are frequently the only refreshments served.

Story Telling.

All small children prefer to be told a story rather than trouble to read for themselves, and nothing is more delightful when time is at one's disposal than to weave a fairy romance or unfold a tale of heroism to a group of attentive and interested young people. In this way their interest is aroused, and soon when it is impossible for mother or father to sit down and spin these fancies for the children the little hands will open a nearby book, and the boy or girl will search for romance or adventure in the printed pages.

This is a precarious time in the mental development of a child. In this early age it will be determined whether a love of good literature or an interest in "trash" is to accompany the boy or girl through life, for if when young only good books are brought before the children's eyes you can be sure only good books will be read by the youngsters, and once having made the acquaintance of literature of a high order and enjoyed the adventures and romances written by some of the best word painters there will be no incentive to take to cheap, trashy books, for these latter will seem tame and uncouth after a taste for good books is developed.

Give a growing lad all he wants of Robert Louis Stevenson's adventures, of Scott's romances and some of Poe's mystery tales and you will find he will never be tempted to look into the pages of a cheap dime novel or to seek the lure of a love story of the trashy order.

Some children seem to be born with a love of books, and these youngsters instinctively take good care of their treasures.

Respect a Child's Mind.

It is very often an agonizing experience to a child to be discussed in his presence, as if he were not there at all and not to be considered—at any rate, as a person to be considered about what is said in his presence. Then there is the stranger who will ask questions and make comments to a child about his appearance that a grownup would resent with indignation. Not all children like openly expressed admiration; rather do they resent it.

Another type of child is made pert, forward and unattractive by the same treatment. The pity of it is that it is always the child who suffers and not the older people, who cause it all. Does it not seem to you as if we might treat all children with the courtesy and consideration that we show to equals? There have been many examples of children to prove that the secret of good training and decent upbringing lies in being decent to the child.

About Regular Habits.

Wise folks know that all rules are meant to be broken, but it is not safe to let the children find it out too soon. It happens that some grow up without ever finding out, and a hard time of it they have ever after.

With very young children it is essential to have a fixed regularity in the daily routine, if it can possibly be carried out. This is necessary, because it is the only way of getting children into the habit of disposing of the daily necessities in a routine way. In the matter of eating, sleeping and dressing, in putting away toys and clothes, in table manners and in the details of courteous conduct, the routine must be observed, with never an exception. It is apparently the only way of making sure of the habits.

SPRINGS WE KNOW.

They Flourish In Many Brands From Bed to Mountain.

There are many different kinds of springs. Among others may be mentioned bed and mountain springs, athletic springs and the spring that comes, as a rule, once a year, which is advertised by poets. There is also the grasshopper's spring.

The poet's spring is almost invariably vernal and has crocuses and pussy willows; also winter flannels. It is sometimes accompanied by snow and hail. Hence hailing the spring is quite a common practice.

Mountain springs are used generally in summer. Every mountain spring which tastes bad enough has a hotel attached to it and spends its time in curing people of imaginary ailments and bank accounts.

Bed springs usually come in rows and are gracefully concealed from the view by slabs of breakfast food arranged in the form of hair mattresses. The row around the edge always towers above its neighbors in the center, which modestly sink to permit your tired body to tie itself up into a graceful knot, while you dream of crossing the desert of Sahara on a nervous dromedary.—Life.

Easy Gym Work.

I possess a social roommate,
Who is rather long and tall;
He acquired gym credit last week,
Without any work at all,
Swinging all the dumb belles
At the deaf mutes' ball.
—Cornell Widow.

Certainly.

Bill—We don't have any miracles today.

Jim—But I saw a single boy doubled up by green apples.—Buffalo News.

Roamin' In the Gloamin'.

"My nose is Grecian," said she.
Said he, "Its shape is one of grace
And it's better to have one of that type
Than one Roman all over your face."
—Pennsylvania Punch Bowl.

A Secret.

Willie—Paw, what is a secret?

Paw—A secret is something a woman can't keep by herself and must have forty other women to help her do it, my son.

Maw—Willie, you go to school.—Milwaukee Sentinel.

Highly Blessed.

The ancients had a bully time,
Of that there is no doubt;
They never had to rise 'fore dawn
To catch the one train out.
—Richmond Times-Dispatch.

And Ingenious.

Bing—I understand that Shmeltz is lazy.

Biff—Lazy! You bet! Why, when he spanks his child he lays a carpet over the kid so that he can do two jobs at once!—Michigan Gargoyle.

The Modern View.

Twinkle, twinkle, little jewel,
Shining brightly as a star,
In these days of imitation,
How we wonder what you are!
—Florida Times-Union

The Psychology of Color and a Blue Gown For a Happy Girl

Designed by Hickson & Co., New York.

It can be easily understood, if you are up in the psychology of color, why some colors irritate you and why others have a soothing effect. Physically strong persons with high vitality can wear the so called "loud" tones. The happy, light hearted people invariably choose the light shades, while the older, the fragile and subdued individuals choose darker or black lines.

As a case in point, the gown in the illustration is in a vivid shade of blue, suitable in material, style and color to the very young and temperamentally happy girl. Though simple in its general effect, it has some rather subtle touches, as witness the bits of gathering here and there in the skirt and the rows of buttons, which may serve to close the skirt or may not.

The blouse loses something of this subtlety in its general appearance, but it reappears again in the lacings down the front. The high collar finishes the neck, quite in keeping with the general ensemble, and the long sleeves carry out the suggestions made by the skirt.

* * *

Collars both high and low are to be found on the imported models. Some fasten directly to the chin; others are of the comfortable open variety, with dainty new touches so hard to describe and harder still to copy. One gown had added to the back of its bodice an oblong piece of black satin, faced with white, folded over at a third of its width and added to the bodice on the fold. It was unusual in effect, but very simple. Many are the new stocks offered, some of net, fastening to within three buttons of the chin, the top of which has small shaped pieces of taffeta, that are very smart. Jabots of various widths and construction are quite the latest touch.

* * *

For those who possess lace scarfs, no matter what the shape or length, quality or type, the season's latest adventure reveals a liking for these frivolous neck or shoulder fixings for wear with the new gowns for dance and evening wear.

Even the fluffs of tulle or malines which have been used all season in clouds of frothy white or in sunset tints of gorgeous colorings have their ends weighted by single metallic threaded tassels or with silk made roses in bouquet forms, each one concealing a silk covered weight to keep it in position.

Chiffon scarfs from two to four yards in length are worn in colors to match one's gown. These are a yard wide and have their ends trimmed with knotted fringes to match from three to six inches in depth or with embroideries of silver or gold done in leaf forms or in conventional patterns.

The laurel leaf is a favorite pattern. Besides this, it is an empire motif or a classical revivification and in either case is a new note of perfect fashion security.

You wear the four and five yard length chiffon or tulle scarfs carried across the shoulders and then wound around your arms; thence the long ends are supposed to trail along the floor, accompanying the wispy sweeping draperies of the evening gown with which the scarf is worn.

ANNA MAY.

LOCKS OR SEA LEVEL.

The Wisdom That Was Shown In Building the Panama Waterway.

The slides in the Panama canal have led some persons to say that it was a mistake not to build a sea level canal. In discussing that criticism Mr. Charles Whiting Baker, editor of the Engineering News, recently said that the few engineers who urged a sea level canal now dislike to be reminded of the fact.

"Bad as the slides are and costly as the work of cleaning them away is proving to be," said Mr. Baker, "they would be vastly greater if the canal at Culebra cut were made eighty-five feet deeper, as it would have to be in order to lower the canal to sea level. But even that is not the worst. In a sea level canal there would be slides to contend with not only in the nine mile long Culebra cut, but all the way across the isthmus—in the deep morasses along the lower Chagres river, for example, where in some places the soft mud is a hundred feet deep. When at Panama I myself saw a slide move into the cut that was being made for the Gatun locks foundation, in which half an acre or so of soft ground flowed down the slope like stiff molasses.

"We owe a great debt of gratitude for our correct choice to President Taft, President Roosevelt, Colonel Goethals and the late Alfred Noble and other great engineers, who threw all the weight of their influence in favor of a lock canal. There is no dissent in the engineering profession from this assertion, and the public ought also to understand it."

New Found Asphalt Bed.

An asphalt bed which seems practically inexhaustible is now being developed commercially in Leyte province, in the Philippine Islands. The bed lies near the shore line at Tacloban, at which port ships can anchor and take on cargo of the asphalt from lighters loaded at the mines, with practically no overland transportation. The deposits also contain oil of a high grade. The asphalt is almost pure near the surface and is exceptionally pure at greater depths. The oil deposits—evidenced by oil flowing with water from a spring—contain oil pure enough to be used by the natives for illuminating purposes.

How to See the Sun Spot.

To observe the giant sun spot that is now being watched by astronomers the officials of the naval observatory in Washington direct that the sun be looked at through a piece of smoked glass held over one of the object glasses of an ordinary opera glass, with the smoked side toward the opera glass and using only one eye. The sides of the glasses not in use should be turned away from, instead of toward, the eye, in order to prevent this from being injured by the rays of the sun striking the eye through the glass.

There's a Reason For Everything.

"Wouldn't you try to get a divorce from a woman who abused you and neglected your home and thought more of her club than she did of you?" thundered the big man.

"I don't think I would," replied Henry Peck. "I am afraid Henrietta would not let me."—Philadelphia Ledger.

Coral Builders.

Coral reefs and islands are formed by the coral building polyp. These animals only live in clear water, the depth of which is not greater than twenty-five fathoms, and the temperature of which does not sink below 68 degrees F.

The Extreme Limit.

"How did your cake turn out, my dear?"

"Pretty badly, I fear. Even the children wouldn't have a second piece."—Louisville Courier-Journal.

The Secret.

"This is very confidential, Marian."

"Yes, dear. I shall be most careful to whom I repeat it."—Philadelphia Ledger.

Mother Wit.

Mother (to son who has overslept)—You need a self starter to get you up in the morning.

Son (sotto voce)—Not when I have a crank like you to get me going.—Judge.

Kitchen League.

Our cook has dodged the onus;
Our faith in her has slumped.
We handed her a bonus
And yet she went and jumped.
—Kansas City Journal.

Its Originator.

"Who was it invented the hot air engine?"

"I think it was a theatrical press agent saw it first."—Baltimore American.

PRACTICAL HEALTH HINT.

Boric Acid Treatment.

In the treatment of small wounds, cuts, scratches, pin jags, boils and styes there is no safer and more effective remedy than a boric acid solution. All skin diseases are soothed by being bathed with it. Runarounds and various discharging diseases are disinfected and healed by being freely washed with it. Four heaping teaspoonfuls of boric acid powder dissolved in a pint of boiling water is the correct strength to use. If kept tightly corked it will "keep" indefinitely. As it is so inexpensive and so easily prepared, it is rarely necessary to use anything but a freshly made solution. It may be used three or four times a day.

HE DID INDEED MISS HER.

The Professor Admitted It, but He Was on the Wrong Track.

When the intrusive nurse in Bulwer's once famous novel, "The Caxtons," interrupted the professor's studies to announce the arrival of his first born son with an explosive, "It's a boy!" the absent minded parent merely regarded her with puzzled annoyance, and inquired vaguely, "What's a boy?"

But it was a professor in real life who, some time after the marriage of his only daughter, and her departure from the parental roof, was visited by a cousin, who ventured to condole with him upon his loneliness. "How you must miss her!" she exclaimed.

"Miss who?" said the professor, with an air of amiable bewilderment, which presently changed to one of pleased comprehension. "Indeed I do, Margaret! Indeed I do!" he declared gratefully. "But I scarcely supposed my complete absorption would be so sympathetically realized. Indeed, you are right; I feel quite lost without her. A most interesting personality. And as to the poisonings, I am sure she has been maligned."

"Poisonings!" echoed his cousin.

"I am quite sure of it!" repeated the professor firmly. "There has certainly been unpardonable exaggeration in their number, and I very much doubt if she ever poisoned anyone at all."

"I am talking," said Margaret, "of your daughter, Mary."

"Oh!" said the professor. "Dear me! I thought, of course, you meant Lucrezia Borgia. She's the subject of a monograph that I began the day after Mary went away and finished a week ago. I felt I needed a little something outside my usual routine to occupy my thoughts, and Lucrezia has proved eminently satisfactory."

The brilliant and dangerous Borgia was a startling substitute, certainly, for a gentle mannered daughter of modern civilization, but one less deadly than that chosen in like circumstances by the great French scientist, Pasteur.

"After all," he was heard pensively murmuring to himself when a beloved daughter had departed with her husband to a distant home, "I shall be able to devote myself to typhoid fever."—Youth's Companion.

Courage and Decision.

Timid wavering of nerveless thought, effeminate irresolution, anxious lamentation, turn no misfortune from thee, cannot liberate thee, but to hold oneself erect, defying all forces, showing original strength, brings down the arms of the gods in aid.—Goethe.

A Minority Report.

A small, meek country negro, who had always lived on one place near Frankfort, Ky., married a big domineering woman and very soon afterward moved into town, where the keeper of the local bar met him on the street.

"Hello, Gabe!" he said. "What made you move to town? I thought you liked country life."

"Well, Mistah Franklin," explained Gabe, "I uster lak de country. But mah wife she didn't lak it—and I've done got so now dat when she don't lak a thing I jest natchelly hates it."—Saturday Evening Post.

Did Just as He Was Told.

An impecunious constituent of a Chicago alderman called upon the latter at his office one day and requested the loan of a dollar. A two dollar bill was the smallest the alderman had. This he handed to the caller, saying:

Go to the cigar stand downstairs,

PUFFING CONTENTEDLY AT A CIGAR.

get a fifteen cent cigar, keep a dollar and bring me the change."

In a few minutes the visitor reappeared puffing contentedly at a cigar and handed the alderman 85 cents. Noticing a peculiar expression on the alderman's face, he withdrew the cigar from his lips long enough to inquire:

"Did you mean that the cigar was for you or me?"

"Get out of here!" was all the disgusted politician could say.

Lots of Big Ones.

A New York man was crossing the Atlantic with an army officer who suffered greatly from seasickness.

On entering the stateroom one particularly rough day he found the officer tossing in his berth, muttering in what at first appeared to be a sort of delirium.

Stooping over to catch his words, the friend heard him say, "Sergeant—major—sergeant—major—brigadier general—ugh, lieutenant general—a-a-ah!"

"What are you saying?" asked the friend in some alarm as the sufferer looked piteously up at him after his last gasping "a-a-ah!"

"Assigning the waves their rank," said the military man, rolling toward the wall again. "There have been eight lieutenant generals within the last twenty minutes."—Everybody's.

For the Children

Jess Willard, Jr., Son of a Famous Athlete.

Photo by American Press Association.

The handsome and wholesome little boy shown in the picture is Jess Willard, Jr., son of the famous athlete, champion prizefighter of the world. Prizefighting is a sport that is abhorred by many thinking persons, because it is regarded as brutal and has a tendency to lower those who engage in it. Boxing, however, is considered an excellent exercise and is practiced in gymnasiums and at the various colleges. Boxing is said to teach self reliance, quickness of eye and brain and when indulged in with soft gloves for points of skill only is healthful and beneficial. To become a champion requires steady nerves and great stamina as well as mighty strength. Only those succeed who live clean lives—that is, avoid the use of alcohol, tobacco and excesses of any sort. This is true of almost any undertaking. The boy who wishes to reach the top might follow the example of Jess Willard in his mode of life. He neither drinks nor smokes. Little Jess is only a baby yet. He is but two years of age.

Catching Monkeys.

In the Philippine Islands the natives catch monkeys in such a funny way!

The monkeys are very fond of the meat of cocoanuts, which grow as plentifully there as apples do in our country. They are very lazy, though, about gnawing through the outer bark and will only do so when very hungry. The natives take advantage of their greed and indolence by cutting a small opening through the shell, just large enough for Mr. Monkey's long, thin hand to penetrate.

When he once gets inside he gets his hands full of delicious, dainty meat, and his hand is naturally wider in this act than when it entered. Finding his hand will not come out, the monkey chatters and scolds, plainly showing his indignation at the way he has been trapped, but never thinks of loosening his hold on the cocoanut and withdrawing his hand as easily as he put it in. There he stands, an angry monkey, until the man who set the cocoanut trap comes and takes him captive.

Pure Drinking Water.

There is a common belief that clear water is pure water. Boy scouts who are going out camping during the present summer should be very careful over their drinking supply.

While water which looks dirty is sometimes harmless (peat colors water considerably, but does not harm it to any great extent), danger may exist although the water is sparkling and clear.

As it is often impossible to carry a filter, scouts should always bear in mind that a very simple and effective safeguard is to boil the liquid for from 5 to 10 minutes before using it for drinking purposes.

Conundrums.

What is the difference between a funny fellow and a butcher? One deals out wit, the other wit-tles (victuals).

Why have turkeys no fear of a future state? Because they have their next world (neck twisted) in this.

Why is a deceased poor doctor like a dead duck? Because they both have done quacking.

Why was Shakespeare a good broker? Because he furnished many stock quotations.

What instrument of war does an angry lover resemble? A cross-bow (beau).

Charade.

The answer to this is one of the United States.

The first, in a great flood, saved many,
While two, just try—is part of any.
The next leads always in stripes and in stars,
While the last two letters are half of Mars.
Placed correctly together, find a state
Whose people are, beyond all doubt, first rate.

Answer.—Ark, an, sas—Arkansas.

BE TO MEXICO POINT

While the exact date has not yet been decided upon on account of the illness of R. L. McCully, president of the club, the Fulton Auto club's first run of the season will go to Mexico Point. It was expected that the run would take place tonight, but Mr. McCully's presence is desired and he has been unable to be about this week.

The club expects to be accompanied by almost every auto owner in the city on its first run. T he hotel at the Point has been remodeled and is under new management. Dancing will be enjoyed before and after dinner and the cuisine of the establishment has already become famous.

It is very probable that the run will be held about the middle of next week, probably Wednesday night, although Secretary Morin, who is a member of the committee on the run-stated this morning that no definite date had been set.

ALL SUMMER CAMP AT THE BIG ISLAND

Francis Baker, Russell Murphy, Robert Waterhouse, Leland Carner and Leonard Somers will leave today for their summer "Hotel de Gink" which will be located this year in Cook's Woods near Big Island, south of the city.

According to young Baker, the party will be plentifully supplied with ammunition, rifles, Meccas, and various edibles. During the long hours of the afternoon the company will prepare for war with Germany by drilling vigorously. Baker will act as chef, and in the evenings Carner will entertain with bits of elocution.

All the campers attend school and will commute via the L. and N. railroad. Boats have been engaged and the tent is already erected. The party is the first of the many camping parties which dot the landscape in the vicinity of Big Island during the summer months.

H. C. DANN TAKES LEAD BY CLOSING STORE

Without waiting for any concerted action or the petition which may be drawn up by the Chamber of Commerce, H. C. Dann, the owner of the progressive City Market closed his doors promptly at noon Wednesday and started the ball rolling on the Wednesday afternoon closing movement. Mr. Dann has decided to close every Wednesday during the months of June, July and August in order that his clerks, delivery men and himself can enjoy a half holiday.

The Wednesday closing has been talked of and was to have started this month but as yet nothing definite has been done. The half holiday idea has been started for the summer in Oswego and in many towns the stores are closing all day once each week.

WILLIAM R. REED

William R. Reed, who has been a resident of this city for about two years, and who was arrested Monday for public intoxication, died last night at the Lee Memorial hospital where he was taken yesterday afternoon. Shortly after his arrest the man was seized with an attack of acute alcoholism and grew violent. Yesterday his condition became so grave that his removal to the hospital was necessitated and last night after a brief rally he died.

According to information given the police, the man has one sister in Pittsburgh, Pa., a brother in Cleveland, O., and an uncle in Yonkers, N.Y. Undertaker Cole, who is in charge of the funeral arrangements is making an effort to communicate with the man's relatives today in order that they may have an opportunity to claim the body. If the relatives can not be located the man will probably be buried here and the expenses will be paid by his friends.

THE QUIRK TODAY

Patrons have a fine program awaiting them in "The Last Chapter," a five-reel subject featuring the popular favorite Carlyle Blackwell and an all-star cast; also Charles Chaplin in a new Keystone comedy, "The Knockout." Tomorrow the romantic melodrama, "The Three Musketeers," in six parts and 160 scenes with other high class subjects will make up the bill.

ELKS HAD FEAST HERE LAST NIGHT

Three hundred Elks last night sat down to a big feast at their club house and after partaking of blue fish and other choice morsels, a band concert was enjoyed.

The regular business session was held. This was the last meeting of ter how small, to the fund.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By FREDERIC T. CARDOZE

Albany, June 4.--The signature fiend has made his appearance at the Capitol and in the halls of the Constitutional Convention; moreover he has set the wheels in motion which has caused many of the delegates to follow in his train and start out to secure the names of all of the members of the Constitution amending body.

The State in its generosity has issued a handsome leather bound book containing the pictures of all the delegates together with a brief sketch beneath it. Each delegate has been given a page and there is just enough margin between the photograph likeness and the sketch for the signature of the delegate.

Before and after the daily sessions are over the signaturec ollectors ply their endeavors and it is frequently necessary for a delegates to sign a dozen or more of the books at a time.

There are one hundred and sixty delegates to the Constitutional Convention, yet a large number of books in addition to those supplied to the delegates have been issued, so that the task of signing is one which is beginning to jar the nerves of those who are affixing them, as though they were bank cashiers endorsing bank notes.

One book has been completed and presents an interesting array of names It is true that it is difficult in some instances to translate the written letters, but there is always the printed cognomen above for identification.

That the delegate's manuel, when graced with the signatures of the delegates, is a valuable souvenir is apparent. Some of the most distinguished men in the State are members as is known.

The galaxy of distinguished names typifies the well known fact that frequently the best informed men are the poorest penman. Many of the delegates are fine writers, so far as the presentation of thought is concerned, but unless set forth through the medium of the typewriter by dictation, this would not be known.

Of the signatures presented by a glance at one of the books which have been all signed up many are characteristically interesting. That of Judge Alphonso T. Clearwater of Kingston, a delegate-at-large and recognized as a jurist of the highest type, may be said to be a trifle difficult to decipher at first glance. It is true that after a bit of study one appreciates that perhaps the eyesight might have been at fault. This may be said to be true of the series of intricate lines which spell Jacob Brenner.

Hon. William Berri of Brooklyn, another delegate-at-large, is a fine penman, while the name of William Barnes is regularly discernible. Hon. Louis Marshall, celebrated as a student of the Constitution has an easy name to write and sets it forth quite as easily, this fact applies to others among the delegates, but not to George W. Wickersham, formerly United States attorney general.

Of course no comment is made relative to the way a delegate signs his name by those who seek the signatures. They smile and thank the members of the Convention and go their way rejoicing and sometimes mirthful.

STORES EMPLOYING WOMEN TO CLOSE AT 10

In spite of the fact that the local merchants decided the 10 o'clock closing was not satisfactory inasmuch as there were many shoppers who wished to buy after that hour, and the time was therefore advanced to 11 o'clock, it was definitely learned today that the dry goods stores of the city will be closed at 10 o'clock as usual on Saturday night. The State Labor law prohibits the employment of women before 7 a.m. and after 10 p.m. regardless of the time the women start work. As all the department stores of the city employ women clerks they will come directly under this ruling. Stores which employ men only are allowed under the law to stay open as long as they wish.

Miss Dora Munger of this city was a visitor this week at the home of Mrs. Emma Sheldon, Phoenix.

BENEFACTORS REFUSE TO LONGER BEAR BURDEN

A woman who refused to give her name appealed to Commissioner of Charities Woodbury this morning for aid in the taking care of Mrs. J. Davis and her four children. The unknown woman said that she had eight children of her own, coupled with Mrs. Davis and her four children and there were too many mouths for her husband to feed out of his weekly pay, which amounts to $13.

Mrs. Davis' husband left for parts unkonwn some time ago, and since that time she has been supported at the home of this friend. Davis is reported to be in California but no steps have been taken to locate him.

Commissioner Woodbury told Mrs. Davis to locate her husband, as he is compelled to support her, but this statement did not satisfy the other woman who feels it her duty to take care of Mrs. Davis and her children. Mrs. Davis has a son, 17 years old, who, it was alleged, is working, but does not contribute anything to the support of his mother. Last night, according to his mother, he took his week's pay and spent it in poolrooms.

After she had been informed by the Commissioner that the city would do nothing, the unknown house-wife asserted that she would not be responsible for the support of the Davis family any longer. Mrs. Davis has lived here for some time and claims that she is entitled to support from the city if she needs it, or at least, help to support her children.

THIS IS FIELD DAY AT PATHFINDER ISLAND

The second of a series of field days will be held at Pathfinder Island this afternoon under the auspices of the Pathfinder Boat Club. The afternoon will be spent in ball games, tennis, canoeing, and motor boating and when the shades of evening begin to lower, Steward Holmes will serve a real diner, which, no doubt, will be keenly enjoyed by those who have spent the afternoon in athletic sports in the bracing air.

Last week the baseball game was one of the big features, and more than one hundred spectators enjoyed the fun. The tennis courts were busy all day long and some of the golf enthusiasts of the club were busily engaged in practicing short approaches and putts. The canoe landing was alive with boats, and many fast motor boats were also in evidence. The dinner was an elaborate one and was heartily commended by the club members and their guests.

MRS. WELCH APPOINTED LOCAL POLICEWOMAN

At the last regular meeting of the Fire and Police Commission Mrs. Florence Welch was elected to the office of policewoman.

Mrs. Welch will not for the present receive pay. Her services will be of value to Chief Dyer and his staff.

HUNTER ARMS PLANT TO OPEN IN A WEEK

The Hunter Arms plant closed down yesterday afternoon at 4 o'clock for the period of one week. Officials of the company stated this morning that lack of business was the only reason for closing, as the plant has been able to fill all orders promptly, and a shortage of business at the present time, which is not expected to continue, made the closing of the plant necessary.

The closing notice was wholly unexpected and was taken by some to argue against the receipt of the large contract for which the company has been negotiating. It was authoratively stated this morning, however, that nothing has been done in the contract matter and any reports to the effect that the contract has been closed or refused to the local firm are erroneous.

While the plant is closed down this week several alterations will be made on the premises.

HOLSTEIN COWS BRING $40,000

One Hundred and One Sold in a Few Hours; Top Price Paid $2,825

Cazenovia, June 4.—Yesterday was a great day here. Millionaires and farmers came in autos to the number of 200 machines which were parked at the hotel.

The sale of pureb red "black and whites" at Cazenovia resulted in the disposal of 101 animals at a total consideration of a little more than $40,000.

The average price paid a head was $400. There were a number of sensational sales at figures above $2000.

Up to 3 o'clock in the afternoon T. E. Getzelman of Humpshire, Ill., paid the highest price of the day. In the morning he gave $1,000 for Canary Barmon Perfection, consigned by the Indiana Breeders Company of Nappanee, Ind., and after lunch he paid the same price for Golden Queen de Kol, offered by E. C. Brill of Stewardsville, N. J. The former made 117.28 pounds of butter in thirty days. Golden Queen de Kol belongs to the Korndyke family and is bred to King Segis Champion.

King Alcartra Butter Boy of the King Segis Pontiac Alcartra stock, aged 5 months, sold for $1,180.

John Arfmann of Middletown consigned the calf and E. H. Lake, Smith Brothers and H. O. Chatfield of Connecticut were the purchasers.

A big, handsome bull owned by James Gibson of White Plains was struck down to G. H. Ferguson of New York city for $1,900. The animal bears the name of Spring Farm King Pontiac V., and is a show animal with a good record.

James Gibson of White Plains got $2,825 for Woodcrest Dora de Kol, with a high milk and butter record.

E. Leroy Pelletier of Pontiac, Mich., was the high bidder, and he was roundly applauded when Woodcrest Dora was struck down to him.

He bought Oakland Dora de Kol for $960 from Mr. Gibson. Oakland Dora is a daughter of Woodcrest Dora, for which Mr. Pelletier paid $2,825.

Dora Woodcrest Rag Apple, another daughter of Woodcrest Dora, went to H. Van Vlen of White Plains for $990. Still another daughter of Woodcrest Dora went to Mr. Pelletier for $2,550. This was Woodcrest Dora de Kol II, and Francis Jones of Clinton offered $2,000 for her first calf, which was accepted.

The Lawson Holding Company of Lagrangeville paid $1,500 for Alpha Mead Dora Fayne Burke, also offered by Mr. Gibson of White Plains.

Late in the day T. E. Getzelman made his third purchase of the day for $1,000. This time he got Aggie Wayne Calamity Jane, consigned by the Indiana Breeders Company. One of the long-distance purchasers was C. H. Buechler of Atlanta, Ga.

AT COURT OF CLAIMS

Syracuse, June 4.—The photographic reproduction of a certificate of stock of the Oswego River Starch Co. issued in 1854, was among the exhibits yesterday at the trial of the $1,800,000 claim of the trustees in bankruptcy of the Battle Island Paper Company, before the Court of Claims.

The certificate is ornamented with a steel engraving depicting the factory of the starch company as it existed on Starch island, in the Oswego river, more than sixty years ago, the site being near that later occupied by the Battle Island Sulphite Plant.

Vokart Van Buren, 69, who has lived in that section, three miles from Fulton, all his life, said the picture was, in a general way, a good illustration of Starch island as it looked when he was a boy. His grandfather, whose name was also Vokart Van Buren, operated a saw mill on the north side of the river.

With Mr. Van Buren and Otto Schultz, another old resident on the stand, Charles E. Spencer of Gannon, Spencer & Michell, attorneys for the claimants, yesterday continued to present to the court a record of conditions as they existed before the state appropriated water power rights on account of the construction of the barge canal.

Asked by Deputy Attorney-General Edward J. Mone, on cross-examination, if he had ever had a claim against the state, Mr. Van Buren unwittingly caused laughter in which even the judges on the bench joined.

"Yes, I got a judgment for $50 more than a year ago and I haven't been paid yet," replied the witness with emphasis.

PAPER CO. HAS CLAIM AGAINST ARMS CO.

As a result of the hearing in this city several weeks ago, referee in bankruptcy Wright has handed down a decisiion, in the matter of the Hunter Brothers Paper Company against the Hunter Arms Company, in which he states that the stockholders of the paper company have a valid claim of $59,000 against the Hunter Arms Company.

The bondholders of the paper company alleged that Thomas Hunter had collected $84,500 for the sale of bonds in the paper company and without any authorization on the part of the bondholders had deposited this amount to the credit of the Hunter Arms Co. Some of these bonds were later redeemed but it was claimed that $59,000 was still outstanding.

Judge Wright held that the claim of $59,000 against the Arms company was valid, as if any loan had been made it had never been authorized.

VILLAGE TO HAVE MUNICIPAL GYMNASIUM

Carthage, June 4.—The Municipal Improvement Society has some big propositions under consideration for the improvement of the two villages.

One of the biggest things now under consideration is the building of a municipal gymnasium. One of the members of the executive committee of the society said last evening that it might take a long time for this proposition to materialize, but that nevertheless it was sure to come.

You can get Black's baked products at the right hour for meals. They are at your grocer's, fresh every afternoon. adv.

MAYOR FOX RECEIVES COMMITTEE APPOINTMENT

Mayor Fox has been appointed one of the committeemen by the Mayors' Conference which closed yesterday in Troy, that of Health.

Mayor Hennessey of Oswego is appointed a member of the committee on codification of municipal laws.

The meeting of the State Conference of Mayors will be held in Syracuse next year.

The conference, which was organized eight years ago, is composed of the officers of about forty cities of the state. The 1914 session was held at Auburn. At that time Mayor Will extended an invitation to the officials to come to Syracuse this year, but Troy was selected. Some weeks ago Mayor Will renewed his efforts and sent letters to the different mayors. When he went to Troy Monday he was determined to win the 1916 meeting for Syracuse. About 200 officials usually attend the gatherings.

Fulton Keynotes

Mr. and Mrs. J. W. Barrett of Oneida st. have as their guest Mrs. T. A. Porter of Utica.

* * *

Mrs. Fred Haskins and Mrs. C. E. Wilson entertained at a miscellaneous shower in honor of Miss Merell Wells.

* * *

Mr. and Mrs. W. Baker of Cayuga st. entertained friends from Minetto, last week.

* * *

Mrs. Sarah Brown of West 3d st. has been entertaining Mr. and Mrs. Frank Brown of Syracuse.

* * *

Mrs. S. Sanford of West 1st st. was hostess Thursday afternoon to the West Side P. T. Embroidery Club. An afternoon of social enjoyment and delicious refreshments made the time complete. Plans were made for the annual picnic, which will be held at Long Branch Saturday, June 12th.

MEHEGAN-GILLARD BANNS PUBLISHED

Yesterday morning at the Church of the Immaculate Conception, the banns of marriage for George Frederick Gillard and Ellen Lucile Mehegan were published by the Rev. John L. Lindsman. The engagement of the young couple was announced recently. They are well known and popular young people of the city, being graduates of Fulton High school. Mr. Gillard is one of the successful business men of Fulton while Miss Mehegan has been one of the popular teachers in the city schools.

The wedding is to take place later in the month.

THE POST IS GRATEFUL

At last night's meeting of D. F. Schenck Post, G. A. R., a resolution passed which extends the Post's gratitude to everybody who in any way contributed toward making Memorial Day, 1915, in Fulton a success. This applies to the donors of flowers and decorations and to those who extended the use of autos. (Authorized by W. R. Hamilton, adjutant.)

"A HERALD OF PROGRESS"

WRECKING CREWS IN BIG LEAGUES

Famous Combinations of Heavy Hitters Are Recalled.

DETROIT TIGERS LEAD NOW

In Cobb, Crawford and Veach Jennings Has the Greatest Trio of Pill Pickers In Game Today—Are Now Setting the League Afire.

Crawford, Cobb and "Peekaboo" Veach, the famous fence busting crew of the Detroit Tigers, are just tearing things loose this season. If they can maintain the pace all past records will be dimmed or totally eclipsed. Perhaps the greatest slugging trio the game ever had were Ed Delahanty, Sam Thompson and Larry Lajoie. These three were on the lineup of the Philadelphia Nationals from August of 1896 until midsummer of the following season and generally followed each other on the batting list.

Since 1907 Crawford and Cobb have formed the nucleus of the fence busting brigade, using in different seasons

Photos by American Press Association.

DETROIT'S GREAT OUTFIELD TRIO.

[Upper picture shows Crawford; on lower right, Veach; on left, Cobb.]

such swatsmen as Rossman, McIntyre, Veach, and they even used little Donie Bush as the third party one season. During the season of 1909 Cobb, Crawford and Bush made 546 of the 1,355 hits credited to the whole Detroit team. The best efforts of Crawford, Cobb & Co. were made during 1911 with J. Delehanty as filler in. This great trio made 649 base hits. The total number made by the team stood 1,546. There are just four records in the history of the game which excel the above mentioned record, and they were all made during the season of 1887, under the four strike rule.

One of the slugging combinations to make a record was "Tip" O'Neal, Robinson and Charlie Comiskey of the St. Louis Browns. In the season of 1887 these three made 700 hits. The best record ever made in this respect was created by Pet Browning, "Red" Mack and Hub Collins of the old Louisville club in 1887. They raised the St. Louis combination's mark by twenty points, making 720 hits, which is the record for all time. The old Baltimore team of 1895-6-7 had a great slugging combination in Keeler, Jennings and Kelly. The great trio of the Philadelphia Nationals from 1891 until 1895 were Delehanty, Thompson and Hamilton, and later Lajoie was added. They were wreckers of ball games, also of the hopes of many hurlers.

New York had three batsmen who made the welkin ring with their terrific batting from 1886 until 1890. The names of Roger Connor, Jim O'Rourke and Mike Tiernan were feared by all hurlers. Less than a dozen seasons ago Mike Donlin, Mertes and Browne were the slugging triplets.

Honus Wagner, Clarke and Leach were the cleanup crew for Pittsburgh for several seasons, with Beaumont helping out.

SPEAKER IS HARDEST, SAYS TWIRLER STEEN

"Tris Speaker, the Boston Americans' star outfielder, is the hardest player in the American league for me to pitch to," confesses Bill Steen of Cleveland.

"He can hit anything I throw up to him. I simply can't fool him. I've tried everything in my pitching repertoire with Speaker up, but it has availed me nothing.

"He refuses to hit at balls inside, and when he gets one outside he slams it down the foul line at a mile a minute clip.

"It's easier for me to pitch to Baker and Collins than any of the other famous swatters.

"Crawford and Cobb are hard to fool. Both show their greatest weakness in going after slow balls."

He who did well in war just earns the right to begin doing well in peace —Browning.

REFUSE $100,000 FOR BABY.

Parents of Little Girl Reject Offer of Schwab's Brother-in-law.

Mr. and Mrs. Howard Gray of Roaring Branch, Williamsport, Pa., have just refused an offer of $100,000 for their two-year-old daughter Vivian. The bid was made by John Mock, a brother-in-law of Charles Schwab.

Mock met Vivian out toddling with her parents, and it was a pure case of love at first sight. He suggested to the Grays that the little girl be allowed to visit him and that he adopt the child.

Mr. and Mrs. Gray ridiculed the idea, but Mock insisted he was serious, offering to pay as much as $100,000 for the girl.

"Not for ten times that much," said the mother.

"Not for twenty times," said the father.

Sadly Mock turned away and left Roaring Branch for the Panama-Pacific exposition with Mr. Schwab and some friends in a special train.

WAR SETS NEW FASHION.

Frenchwomen Will Look Only at Men With Beards.

Almost every French officer and private who returns to Paris from the front wears a beard. Too much occupied in fighting to bestow a thought on their facial appearance, they allow their beards to grow. They get accustomed to hirsute pendants and do not consider it worth while to remove them when they come to Paris.

Unknowingly they have set a fashion. Frenchwomen no longer will look at a smooth shaven face. So from Furnes to the Vosges every man wears a beard. For woman the beard means that a man has fought for his country, and it is prophesied that the new fashion will last for two seasons at least after peace has been concluded, and it will be for men a mode as glorious as was the necktie a la Steinthal after the brilliant victory won over the Statthalter by the Duc de Vendome.

Hit by Sermon, Wed on Spot.

In the midst of a sermon entitled "Take Unto Thyself a Wife" the Rev. George W. Whiteside of Frederick, Md., was interrupted by a man who whispered something. A moment later Hilleary C. Rockwell and Miss Nellie B. Barger stood in front of the pulpit and were married.

Fly Rod For Trout Fishermen.

Rods of split bamboo are produced by cementing together a number of triangular strips split from the whole cane to form each joint; the rod of six strips is the choice of most anglers. Weight for weight—and, of course, within reason, the lighter the rod the better—split bamboo rods are stronger and have more casting power and better action than rods of any other material. Very properly conceding that the choice of a fly rod is practically limited to the rod of split bamboo, you cannot go far wrong in selecting one nine feet in length. Such a rod for the light work of our average trout streams should not weigh over five and a quarter ounces.

Any rod seriously worth consideration has snake guides, german silver reel seat and ferrules and a solid cork hand grasp.

It is very well when making your selection to try out several rods answering to the above specifications, in order to avoid, if possible, getting a rod that is either too stiff or too flexible.—Outing.

A SETBACK FOR WALSH.

Chicago Pitcher Contracts Grip, Which May Put Him Out of Running.

It now looks as if Ed Walsh's days as a major league pitcher are about over. For the past two months in Los Angeles, Cal., the Chicago White Sox hurler has been preparing to get back into shape to take his turn on the slab. In practice he showed some of the

Photo by American Press Association.

ED WALSH, CHICAGO AMERICAN VETERAN PITCHER.

form that made him famous, but recently a severe case of grip put him out of the running. And it appears as if his "comeback" stunt has been put into the indefinite future.

Walsh's physician predicts it will be several weeks, if not months, before he will again be in condition. A year ago Walsh's arm went back on him. In his day he was considered one of the greatest pitchers that ever hurled a ball.

CALLS TO ARMS STIR PEACE MEN

Lake Mohonk Arbitrationists Hear of Defense Needs.

TOLD TO FACE BARE FACTS

Dr. Grier Hibben, Secretary Garrison, and General Wood Plead Before Conference Cause of Adequate Preparation of United States, Not For War, but Against Sudden Aggression.

Never in the twenty-one years of its existence has the Lake Mohonk conference on international arbitration heard such calls to arms as signalized its gathering this year. The 200 delegates from all parts of the country were practically all peace men. They were told to "face facts," and the appeal stirred them.

Dr. John Grier Hibben, President Wilson's successor as president of Princeton university, fired the first shell. He advocated "a wise preparedness, not for, but against war."

"This is not a question of mere academic interest which we are discussing," said President Hibben. "We as a nation are looking into a future that is dark and mysterious. In the high tension of international hate and international suspicion the most insignificant accident may chance to precipitate for us a national catastrophe. And in the great emergency, if it should come, what will we say? Peace! Peace at any price?

Don't Trade Honor For Peace.

"But let us not forget that there are some things which cannot buy peace. If we sacrifice them in order to secure peace the peace thus sought comes before us the veriest torment of a living hell. We dare not trade honor for peace; we dare not betray duty in order that we may bargain for peace; we dare not indulge ourselves in the enjoyment of the blessings of peace while we turn deaf ears to the cry of distress or to the summons of a righteous cause."

Later came Lindley M. Garrison, secretary for war, who saw no immediate prospect of war giving place to either peaceful or forceful arbitration, and called on his hearers to "look facts fearlessly in the face and act accordingly."

"We will be despised among the nations of the earth," he said, "and our righteousness will not save us from the aggressions of the unrighteous if we remain weak and flabby. We must be ready to make war in order to keep the blessings of peace.

"Self preservation is the first law of a nation. A nation to deserve preservation must be sane, just, righteous, self respecting and courageous.

"Since it only obtained those virtues by conflict of one sort or another, it can only retain them and thus insure its own preservation by being prepared in every proper way to defend them from the inevitable assaults which will be made against them.

"Peace—yes; peace based upon righteousness.

Militarism Not Bogy Here.

"Militarism is used as a term of reproach to divert proper consideration of what must be considered. Militarism in the sense of having the military force interfere in the slightest with the conduct of our government by our civil authorities is not conceivable in this country.

"We are surely not so deluded as to believe that we can reach by intuition what others can only acquire by training and experience.

"We, as a nation, are exceptionally set apart only in one respect—namely, the freedom of our people under our institutions to develop and expand and make the most of themselves without fetters or restrictions. The institutions are the very Ark of the Covenant, and if we are worthy to possess them we must show that we cherish them and will protect and defend them.

"Our lack of aggressive intention and our righteous intentions minimize the sources and causes of war, but we ourselves have frequently been at war. Our isolation has not, as a fact, assured our freedom from conflict, and other nations relatively as isolated have been involved in war, and no sound reason can be adduced which would justify a sane man in concluding that isolation alone spells safety. Furthermore, our isolation is geographical only."

Then spoke Major General Leonard Wood, pressing home the same point.

"We soldiers and sailors are merely your trained servants," said General Wood. "You create wars; we try to eliminate them. Nine out of ten wars are based on trade. The trouble with most conferences of this kind is that they do not look conditions in the face. We must not delude ourselves that our geographical remoteness has made us safe.

"This is one of the great causes of armament—this and the greater efficiency of the implements of war. When we have ceased to fight for our honest convictions we shall cease to be worthy to exist as a nation.

"It is murder for you to send your boys to war untrained when it is possible to train them. All we soldiers and sailors want is that you give us a reasonable degree of preparation, so that when your boys come to us to fight the sacrifice may be as light as possible."

AMERICAN LEGION GETS BIG RUSH AS RESULT OF PATRIOTIC FERVOR

Enrollment of Members In "Ready For National Defense" Body Trebles Within a Week.

Aim of Great Organization Is to Register All Able to Aid Country In Hour of Its Need.

RECENT events have made matters hum in the offices of the American legion. Since May 7 the number of citizens seeking membership has more than trebled. Hundreds of applications pour in by every mail, Secretary John E. Hausmann says.

"The objects of the American legion are now becoming more generally understood and appreciated," said Dr. Hausmann in an interview. "We are not seeking to keep men who are able to do so from joining the United States army or navy or the militia of their state. We are not a substitute for those forces.

"Those forces form the nation's first line of defense. We shall not prevent one solitary man from joining the national guard if he can. Our purpose is to make possible the nation's second line and maybe also the third line of defense and by the simplest form of organization to make it immediately available should the country have need to call upon it.

Is Not Militarism.

"We do not believe in militarism, but we do believe in being able to defend ourselves if attacked.

"The aim of the American legion is the accumulation of such data as to the available civilian material in the country as would be of value should the country have to face a serious emergency—such data as is not collected under any law, such data as in a nation like ours is perhaps best collected voluntarily and such as, in the event of a national crisis involving the necessity of a call to arms, would furnish the means of swift and efficient organization. This is very different from militarism and really prevents militarism in all its objectionable forms.

Photo by American Press Association.

DR. JOHN E. HAUSMANN, SECRETARY OF THE AMERICAN LEGION.

"When the birth of the legion was announced two months ago an impetuous public jumped to the conclusion that it was to be a mighty fighting organization of armed, uniformed and regularly drilled men. Such is not the case. The members of the legion are not armed, have no uniform except a small button and no military exercises are provided for their training.

"All the legion seeks to be is a well organized, well managed, thoroughly reliable bureau of information, ready to supply at a moment's notice just such information as the government of the United States would need if suddenly called upon to back up its authority with force of arms. To enable the immediate location of the men who will be needed, such men as expert merchant navigators, chauffeurs, railroad engineers and firemen, telegraph operators, aviators, civil, electrical and mechanical engineers, experts in explosives, cooks, bakers, horsemen, blacksmiths, mule packers and men in other vocations whose services will be needed and needed quick; it is in that the American legion expects to prove its value in a possible time of trouble.

May Form Rifle Clubs.

"Locally the members may form rifle clubs and that sort of thing. That will be in their own discretion. There can be no doubt that the fact of membership in the legion will inspire Americans to have regard to their direct usefulness to the state and their ideals in the event of danger.

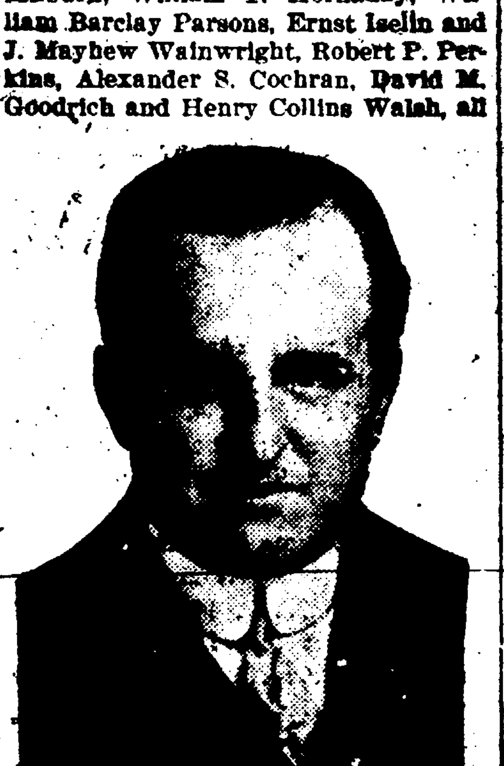
"Many dangers are possible. It must not be forgotten that when the war in Europe is over the European nations, particularly the victors, will be much stronger than before. We know that the United States was never so strong as at the close of the civil war. Then we had a great army of men who had had actual experience of war. So it will be with the powers in Europe. This circumstance ought not to be lost sight of.

"The amazing growth of the American legion shows that the idea and its efficiency have at once struck the fancy of the nation. In the two months of our existence we have been enrolling members at the rate of something like a thousand a day, and we have some of the leading men of the country at our head.

"Two ex-presidents of the United States, Colonel Roosevelt and William Taft; three ex-secretaries of war, Jacob M. Dickinson, Henry L. Stimson and Luke E. Wright; three ex-secretaries of the navy, Charles J. Bonaparte, George von L. Meyer and Truman H. Newberry; one ex-secretary of state, Elihu Root; one ex-attorney general, George W. Wickersham, and many other statesmen of note are on the council of the legion. Among them are Joseph H. Choate and Senator Henry Cabot Lodge.

Other Prominent Members.

"Other prominent men on the council of three hundred are Morgan J. O'Brien, Frederic R. Coudert, John G. Milburn, William T. Hornaday, William Barclay Parsons, Ernst Iselin and J. Mayhew Wainwright, Robert P. Perkins, Alexander S. Cochran, David M. Goodrich and Henry Collins Walsh, all



E. ORMONDE POWER, PRESIDENT OF THE COUNCIL OF THE AMERICAN LEGION.

of New York; Howard Elliott of Massachusetts, Nicholas Longworth of Cincinnati, William Allen White of Kansas, Harry P. Judson and Medill McCormick of Chicago, Frederick M. Alger of Michigan, Colonel Alexander R. Lawton of Georgia, and Crittenden Marriott of Washington.

"California is represented by Milton Esberg and R. M. Tobin of San Francisco, George B. Harrison of Sacramento, J. B. Miller of Los Angeles and Chester H. Rowell of Fresno; Connecticut by Carl M. Chapin of Waterbury, Indiana by William Dudley Foulke of Richmond, Minnesota by W. J. Dean of St. Paul, Nebraska by John G. Maher of Lincoln, New Jersey by Robert C. Maxwell of Trenton, and Tennessee by Hapsburg Liebe of Johnson City.

"The directors and officers are E. Ormonde Power, president; Julien T. Davies, Jr., vice president; Henry Rogers Winthrop, treasurer; Alexander M. White, Theodore Roosevelt, Jr., and Arthur S. Hoffman.

Men Sorted by Talents.

"No man already serving in the United States army, navy or marine corps or in the national guard of any of the states is eligible for membership until his resignation or honorable discharge. What we want are the men who have had military experience or who are qualified by some technical training that would be of service to the country in wartime. We have classified the eligible under seventy-two distinct heads.

"We are sorting out our men according to their various talents and will classify them so that they can be assigned to the jobs they can best perform. It is a waste of time to train a man to fix insulators on a telephone pole after war breaks out when in the infantry, struggling with a spade or rifle, is a man who in civilian life was a lineman, skilled and experienced by years of service. It would be a misfit to put a bank president to scouting, when he can serve better in the quartermaster's department, and to put an inexperienced boy to keeping accounts when his very blood tingles to get on a motorcycle and scout about the enemy's lines. 'Every man in the job for which he is best fitted' is the idea of the American legion.

"By means of membership in the American legion men give exact information which shows precisely what job they can best fill in wartime, all this being recorded in a great card index system.

"Advice of experts was obtained as to the best method of compiling and indexing this information, and the card cross index system established is such that if at any time the legion should receive from the government a call as to the availability of a given number of chauffeurs, aviators or men of any other special vocation it could immediately respond to that call, giving names, addresses and exact qualifications of the number of men required.

OFFICERS AND DIRECTORS OF THE AMERICAN LEGION.

E. ORMONDE POWER,
President.
JULIEN T. DAVIES, JR.,
Vice President.
ALEXANDER M. WHITE.
THEODORE ROOSEVELT, JR.
ARTHUR S. HOFFMAN.

HENRY ROGERS WINTHROP,
Treasurer.
DR. JOHN E. HAUSMANN,
Secretary.

"The idea of the American legion arose from a suggestion made early last summer by E. D. Cook, a young American adventurer, who was in Costa Rica and wrote to Arthur S. Hoffman saying:

"'My belief is that some time within the next ten years the United States may find herself in a man sized fight. I vote that all of us who are drifting around and who would volunteer to fight for our country when the need came should begin right now to form some sort of organisation so that when something turns up we should be ready to volunteer in a body.'

"Mr. Hoffman published the letter in his magazine. So many men responded that General Leonard Wood was consulted quite unofficially as to the value of the notion, and then on March 6 the American legion was incorporated under the laws of New York state. The first meeting was held March 11.

"Curiously enough, since the receipt of his letter we have never heard from E. D. Cook, and we fancy he probably has been killed fighting in Mexico or maybe in Europe.

No Politics In Legion.

"There is no politics in our legion and no menace to peace. Although many branches may be formed, all applications for membership have to come to national headquarters in the Maritime building, 10 Bridge street, New York city.

"On acceptance members sign an agreement pledging them to the following obligations:

"'To report to the secretary of the legion, by letter or postcard, four times

ALEXANDER M. WHITE, ONE OF THE DIRECTORS OF THE AMERICAN LEGION.

a year on the first days of January, April, July and October, giving my serial number in the legion and my permanent address in full at that time.

"'To notify the secretary promptly of change of permanent address between these dates.

"'To pay the annual dues of 25 cents on the 1st of January of each year.

"'To wear the insignia of the American legion, to hold it in respect and to do my best to persuade others who can be of service to our country to enrol in the legion.' The insignia consists of an enameled button, a blue star on a white field, on the outer edge of which is a red circle.

"There may be a difference of opinion as to the extent of preparation necessary for our national defense. There should be but one opinion as to the wisdom of lessening our present unpreparedness. No more conservative step in the direction of advance preparation than that advocated by the legion has yet been devised.

No Government Records.

"President Wilson has said that the United States in case of war must depend chiefly upon a 'citizenry trained and accustomed to arms.' But the government has no record of the present addresses and qualifications of its honorably discharged soldiers, sailors and marines, nor has it information of available men trained in the various occupations essential to the conduct of modern war.

"The work of the legion should therefore appeal to all American citizens, and it is earnestly hoped it will receive their active support and assistance in the attainment of the objects for which it was formed."

The National Security league in a statement just issued says:

"All those who have seen service in the regular army, as volunteers or in the national guard maneuvers, might well join the American legion. The American legion, which the National Security league has heartily indorsed, is recruited from past enlisted men in the army, navy or militia, as well as other special classes of citizens, such as telegraph operators, engineers, and the like, whose services would be useful to an army actually in the field."

SUBMERGED SUBMARINES.

Signs by Which They May Be Located From an Aeroplane.

In answer to a correspondent who asks to what extent a man in an aeroplane can watch the movements of a submerged submarine boat the Scientific American replies:

"We have consulted a naval aeronautic expert on the visibility of submarines from an aeroplane. He states that if the surface of the water is smooth and the water is fairly clear a submarine can ordinarily be observed visually from an aeroplane at any depth the submarine is likely to travel, which is usually not over 100 feet. Experiments have been made at Guantanamo, Cuba, and Annapolis, Md., and in the latter case the submarines were able to avoid observation at first by sinking to a muddy bottom. But the aviators soon learned to pick them out by some sign, such, for example, as escape of air bubbles."

In another article on the subject the Scientific American says that when the sea is rough it is much more difficult to discern a submarine. The captain of a warship can watch the course of a submarine by the bubbles it sends to the surface when the sea is smooth, but these bubbles are scarcely discernible when the sea is choppy. The disturbed surface inevitably makes it more difficult for an observer in an aeroplane to see what is going on below.

AN INCIDENT OF WAR.

General Hugo and His Meeting With a Wounded Moor.

General Hugo, father of that literary genius, Victor Hugo, was a daring soldier and officer. He served brilliantly in both Italy and Spain and especially distinguished himself in putting down bandits and guerrillas. That he was a man as magnanimous as he was brave is attested by a little incident of his career that his son narrated. General Hugo, accompanied by a single trusted hussar orderly, had occasion, at the close of a day of fighting, to ride across a portion of the battlefield as dusk was beginning to fall.

"He heard a feeble sound in the shadows," wrote Victor Hugo. "It was a soldier of the Spanish army, who dragged himself along the roadway, pale, bleeding, gasping and who cried, 'A drink, a drink, in the name of pity!'

"My father, touched, handed his canteen to his faithful hussar, and said, 'Here, give a drink to that poor, wounded fellow.' Suddenly, as the hussar, stooping, leaned over him, the man, a Moor of some sort, snatched the pistol he carried and fired it at my father's head, crying, 'Caramba!' The bullet passed so close that the hat fell, and the charger reared wildly backward.

"'Give him the drink all the same,' said my father."—Youth's Companion.

Punch and Judy.

Turkey is far from being the only oriental land in which a performance very like the English Punch and Judy can be found. Travelers have described entertainments of the kind in Persia, Japan, Kamchatka, India, Egypt, Syria, Nubia, Siam, Pegu, Ava, Cochin-China, China and Tartary. Mr. Villiers Stuart observed the Egyptian Punch flooring the mamour (chief magistrate) and his cavasses quite in the style of the British Punch's conduct toward beadles and policemen, though in the Egyptian version the play ended morally with the hanging of Punch. The hero belongs to all ages as well as to most lands. Some have traced him to the Atellan farces of early Italy, and he has even been recognized in ancient Egyptian hieroglyphics.—London Standard.

Chanak-Kalesi.

Chanak-Kalesi, the straggling town near the "narrows" of the Dardanelles, means "earthenware castle" in Turkish and is so called from a celebrated pottery on the Asiatic side of the strait. An agent from this pottery used to be always on the lookout for a wandering European and booked on to every passing ship. His boatload of gaudy crockery was generally more remarkable for gilding and tawdry color than for taste. But the forms of the vessels were often graceful, even classical, and specimens of the tall water jugs he sells, or once sold, can be seen throughout the Levant, though seldom in London.—London Chronicle.

A Swiss Philanthropy.

The custom still obtains in Switzerland, though not so generally as formerly, of newly married couples making a small gift of money immediately after the wedding ceremony to the school funds as a sort of thanksgiving for their education. These funds are used to provide shoes and clothing for poor pupils who would otherwise be unable to attend school.

On Her Brow.

"Before we married you promised me rings and brooches and beads to wear."

"Well, what of it?"

"I was just thinking that the only beads I've ever worn since are beads of perspiration."—Detroit Free Press.

What For?

"Pop, what kind of crops can they plant in the sea water?"

"No crops, you foolish child."

"Then why are vessels always plowing the ocean?"—Exchange.

A Considerate Girl.

Madge—He said you were very punctual. Marjorie—Why shouldn't he? I never kept him waiting more than half an hour in my life.—Lippincott's.

If you cannot get [illegible], says a [illegible] proverb, try an apple.

FOUR YEAR WAR FEAR OF BRITISH

Soldiers In Trenches Say Contest Will Be Long One.

NO HOPE OF QUICK FINISH.

While Not Disheartened by Slow Progress, They Declare That England Will Need Every Man In Country if Germany Is to Be Beaten, Correspondent Says.

It should be borne in mind, writes a correspondent at the front who has seen Kitchener's army, that the British did not begin building their war machine until about nine months ago. The German organization is the result of upward of half a century of unceasing thought, experiment and endeavor. What the British have accomplished in nine months is one of the marvels of military history.

The machine that they have knocked together, though still a trifle wabbly and somewhat creaky in its joints, is, I am convinced, eventually going to do the business. It struck me as having all, or nearly all, of the merits of the German organization, with the human element added.

You can't really appreciate what this British war machine is like or what it is accomplishing by reading about it. You have to see it for yourself.

For miles and miles roads are lined with huge English lorries, in their war coat of elephant gray, with converted London buses and with ambulances. So crowded are the highways behind the British front that at the street corners in the towns and at the crossroads in the country are posted military police, with scarlet flags, who control the traffic, just as do the policemen in Fifth avenue and Broadway.

No Devil-may-care Tommy.

The British soldier of this new army has none of the rollicking, devil-may-care recklessness of the traditional Tommy Atkins. He has not joined the army from any spirit of adventure or because he wanted to see the world. He is not an adventurer; he is a crusader.

In ninety-nine cases out of a hundred he has left a family, a comfortable home and a good job behind him. And, unlike the stay at homes in England, he doesn't make the mistake of underrating his enemy.

He knows that there is no truth in the reports that the enemy is weakening. He knows it, because hasn't he vainly thrown himself in successive waves against that unyielding wall of steel?

He knows that it is going to be a long war. Every British officer or soldier with whom I have talked—and I have talked with a great many of them—has said that he expects that the spring of 1916 will find them in virtually the same position that they hold now. They will gain ground in some places, of course, and lose ground in others. But a year or so, the men in the trenches believe, will see no radical alteration in the present western battle line.

Show Bulldog Tenacity.

Such is the opinion of the men who are doing the fighting. They are not talking much, they are not singing much, they are not boasting at all, but they have settled down to the herculean task that lies before them, with that same bulldog tenacity of purpose, that same grim determination which characterized the men who wore the blue and the gray in the darkest days of the civil war.

From what I have learned and the conversations I have had with generals and staff officers, and particularly with the fighting men themselves, I have come to the opinion—and it is not a hastily formed opinion either—that their belief is the war will unquestionably last two years; that it will not improbably last three, and it may last four.

If Germany is to be beaten the men now in the trenches think that every man in England between the ages of eighteen and forty-eight who is able to carry a rifle will have to take the field.

FINDS NEW TETANUS CURE.

Italian Surgeon's Discovery Expected to Be Useful In War.

Professor Negro of the University of Turin, Italy, has discovered a new method of curing tetanus by the use of electric currents, which in experiments on animals has given better results than have been obtained by the use of anti-tetanic serum.

In view of the ravages already caused by tetanus during this war Professor Negro's discovery is greatly interesting military surgeons and experts all over Europe.

PLEADS FOR GERMAN PETS.

Fear Expressed Dachshunds In England May Now Be Ill Treated.

A great wave of hero worship is surging over England. Picture dealers are selling war portraits by the thousand, and photographs of actresses are now a drug on the market.

At the same time so bitter is the feeling in England against everything German that a special appeal has been made against possible ill treatment of [illegible] dog pets.

"HICCOUGHS OF THE SEA," NOT FLEETS AT WAR.

Scientists Explain Cause of Frequent Reports of Battle In North Sea.

The frequent reports, which subsequently were not confirmed, that heavy cannonading had been heard in the North sea have led to an investigation by scientists. It was disclosed that the reports of detonations were authentic, although no firing took place.

Abbe Moreux of the observatory at Bourges came to the conclusion that these loud reports were simply what the Belgians call "mistpoeffers," or explosions of fog. They are called "hiccoughs of the sea" in Holland and sometimes are referred to as marine bombs. The same phenomenon has been observed on the banks of the great lakes and on the great plains of the delta of the Ganges.

Finally Abbe Moreux noticed that the appearance of this phenomenon was generally simultaneous with reports of explosions of firedamp in mines.

The electrical action of the sun upon the surface of the earth, the abbe says, provokes movements favorable to the expansion of imprisoned gases wherever there are fissures in the crust. These gases, liberated from their prisons, explode and cause at the same time explosions of firedamp and earthquakes.

The abbe pointed out that earthquakes are always preceded by noises resembling distant detonations of artillery. Vibrating shocks originating in the interior of the crust of the earth may produce sonorous waves which are quite perceptible if the atmosphere is in repose.

Abbe Moreux says that meteorological conditions do not, as has been supposed, cause the phenomenon. They only favor its production.

FOG BOMBS HIDE ZEPPELINS.

New German Invention Prepared For Coming Attack on London.

"Nebelbomben"—fog bombs—are to be used by Zeppelins when the big attack on London takes place, according to a dispatch from Berlin. Workers in the German airship factories, who usually are so secretive, are as enthusiastic as schoolboys over successful experiments made with the new contrivance.

A witness of the experiments at Friedrichshafen says that in perfectly clean weather when the bomb is dropped from an airship it explodes at a calculated distance from the ground and with incredible rapidity sends out a fog which absolutely shuts out the Zeppelin from view. The fog spreads for many kilometers nearly instantaneously.

GERMANS CONTINUE TO BUY AMERICAN HORSES

How They Send Them Home Is a Deep Mystery to Dealers.

Lincoln, Neb.—Representatives of all of the principal nations at war in Europe are combing the west for horses for the armies. Several of the horse buyers bear titles; the majority of them are men who have been at the head of great establishments in Belgium and France, which formerly supplied America with draft horse stallions. One who was recently in Lincoln was paid $2 a day and expenses for his work. Before the war he drew $10,000 a year as manager of a great breeding stable in Normandy.

How the few German buyers get their purchases through is a mystery, and they refuse to elucidate. They make it plain that that is their own business, and they keep on buying. Some of the largest dealers in this section have been asked to bid on a 25,000 head shipment for the German government payable by drafts on New York.

In the beginning speculators and business men jumped into the game, taking large contracts or subcontracts. The ruling prices for the grades desired were $150 and $175, subject to inspection, which was very rigid, and a large portion of each shipment was rejected. Rather than carry these back to the west the dealers sold them at the points of shipment for what they could get.

That there are horse traders in Europe and dealers with sharp eyeteeth was proved by the fact that a number of these rejected animals were shipped to Europe, the purchasers being government agents, who took this means of showing American dealers some tricks in horse buying, purchasing in the guise of contractors who desired the animals for the northwest.

The fact that the greater part of the supply in the west has already been purchased or is in the hands of speculators, holding for the raise they feel certain will come with a continuance of the war, has led to a letting down of the inspection bars. Hundreds of animals that formerly would have not received a second look are now going through. The stable boys say that the fat ones are given the preference.

White and gray horses are taboo because they are shining marks on the battlefield. The one thing the buyers are particular about is the wind. They require swift galloping for a block or two before the inspector decides.

MANY R. F. D. ROUTES CREATED

In Extending Delivery Service Department Relies on More Business to Pay Cost

Washington, June 4.—Since he has approved every petition on file in the department, for the establishment of rural delivery routes, Postmaster General Burleson has gone his own record one better by ordering additional routes placed where needed, in all parts of the country, regardless of whether petitions for such new routes are on file.

This last order has been issued to the fourth assistant postmaster general, who is directly in charge of rural delivery service. It means that the department proposes to furnish serivce to all rural patrons reasonably entitled to it, everywhere in the country, and to rely upon the increased business to justify the more costly service which will result.

"Postmasters in localities where it appears that present service is not adequate," says the official announcement, "will be instructed to make detailed reports to the postmaster general as to whether the establishment of new rural routes in their vicinity would not be desirable. In fine, these postmasters will be expected to furnish the department with information as to how the existing service can be enlarged to meet the requirements of all prospective patrons."

The postmaster general declares that durin gthe period from April 1 to May 5 his economies, affected by the re-adjustment of the rural service, reduced operating expenses, $292,052. This amount has been used to establish 439 new routes, serving about 254,435 additional persons. The saving from reduced operating expenses, made by readjustments in the period of May 1 to May 5, amounted to $120,408. Approximately 99,230 additional persons on 176 new routes are served by the expenditure of this fund.

Of course, this remarkable saving was not taken from the air; it came from getting more work done by men already in the service. As the rural carriers are under general regulations as to salary, the administration was forced to extend the length of their routes in order to get more service from each man. This was accomplished by re-routing each county. The number of routes in a given territory was reduced, while the number of miles and of patrons per route was correspondingly increased.

Arkansas gets 21 additional routes, from the latest 176 routes established. Other States favored noticeably are Louisiana, Texas, Missouri, Oklahoma, Florida, Idaho, Kansas, Montana and Nebraska.

VOWINKEL REMEDY CO. HAS A FULTON DIRECTOR

Is it the intention of the Vowinkel Remedy Co. to manufacture and place on sale the Dr. Mease remedies, and for this purpose the directors met yesterday in Oswego.

The following officers were elected: President, John J. Clancy; vice-president, Mayor T. F. Hennessey; treasurer, M. R. Burt; secretary and manager, C. J. Vowinkel. These officers, together with E. M. Leighton of Oswego; F. A. Lawyer, of Syracuse; H. A. Dygert, of Phoenix; Wade Gayer, of Fulton, and W. R. Richards of Mexico, constitute the board of directors for the first year.

"CASEY" POEM 27 YEARS OLD

Hopper's Claim Discredited; It Was First Printed in Frisco

Buffalo, June 4.—If all the verse inspired by baseball in the last half-century was made into a "string," it would stretch from Kalamazoo, Mich., to Bangkok, in Siam. And, doubtless, then some. At the top of this string, holding precedence as the supreme classic of baseball literature, is "Casey at the Bat." Ever since De Wolf Hopper popularized that famous poem of the diamond a store of controversy has raged over the question of its authorship. Multitudinous are the claims that have been made as to the priority in penning those immortal lines, but majority opinion, which is supported by evidence, gives the credit to Ernest L. Thayer.

So far as known, "Casey" was first published in the San Francisco Examiner 27 years ago yesterday, June 3, 1888, and, unless further evidence is forthcoming, this is Casey's birthday. The verses were signed "E. L. T." and this may be accepted as all but conclusive of Thayer's authorship. Thayer lived in Worcester, Mass., and was a graduate of Harvard. It is said that the "Mudville" of the poem was a part of Tanneville, near Cambridge, where there was a ball field which was prone to become very muddy on the slightest provocation. Thayer was a classmate of William Randolph Hearst at Harvard, and the two were firm friends. When Mr. Thayer wrote "Casey" it was natural that he should send it to Mr. Hearst's paper. Thayer was at one time employed on the staff of the Examiner, but later returned to Worcester and embarked in a manufacturing business.

"Casey" has been credited to many other authors, however, including George Whitefield D'Vys, Joseph Quinlin Murphy and Will Valentine. D'Vys, a Cambridge, Mass., man, asserted that he wrote the last eight verses of "Casey" in 1887, but that the manuscript was lost in a Boston newspaper office. Will Valentine, who was a member of the New York World staff, died in 1897. He was formerly employed on the Kansas City Star and the Sioux City Tribune, and it is said to have written "Casey" while in the Iowa city.

Looks Like Thayer

The original publication of "Casey" in the San Francisco paper now seems conclusive, however, and Ernest L. Thayer seems as certainly its author. The poem was reprinted in papers all over America, and it was further popularized by the famous comedian, De Wolf Hopper. It was first recited by Mr. Hopper at a performance of "Castles in the Air," and made such a hit that the comedian included it in his repertoire.

"Casey at the Bat" will doubtless continue to be the great epic of the diamond pastime as long as baseball is played. It has survived for 27 years with no diminution in its popularity. Parodies without number help to keep the interest in "Casey" alive. The poetic story of how "mighty Casey struck out" contains humor, pathos and tragedy. Reading it, one can almost imagine himself seated on "the benches, black with people," and joining in the "muffled roar" which went up when the umpire called a strike on Casey. And when a second strike has been called by the robber, and "the sneer is gone from Casey's lip, his teeth are clenched in hate," we await with breathless eagerness the crack of bat on ball. Alas, it never comes! And

Oh! somewhere in this favored land
the sun is shining bright,
The band is playing somewhere and
somewhere hearts are light,
And somewhere men are laughing and
somewhere children shout;
But there is no joy in Mudville—
mighty Casey has struck out!

HOSPITAL MANAGERS APPROVE BUILDING PLANS

At yesterday's meeting of the Board of Managers of the County Tuberculosis hospital plans for the new paviliion were accepted, subject to the approval of the State Board of Health. The plans are expected back within a few days and the bids will then be solicited. The supervisors appropriated $8,000 for the new building.

At the present time there are twenty-one patients in the hospital, all but one of whom are able to be up and about. Some of the patients help in the housework, but for the most part they rest on the verandas or on the lawns. Several children are included among the patients and they are all showing improvement.

An effort is being made to establish a hennery at the hospital. This would enable the furnishing of fresh eggs in plentitude during the entire year. More than 1,100 dozen of eggs were raised last year at the Monroe County Hospital.

Miss Ida Broks of Oswego, a graduate of the Oswego Hospital, has been appointed head nurse to succeed Miss Kavanaugh, who resigned. Miss Brooks has been acting head nurse for some time.

LEGAL NOTICES

SUPREME COURT, COUNTY OF OSWEGO.—Edna I. Sharp, Plaintiff, against Lewlla Newton, J. Clifton Larkin, Bridget Gibbons, Henderson & Thompson Company, Defendants.

Pursuant to a judgment of foreclosure and sale made in the above entitled action, at a Special Term of the Supreme Court, held at the Court House, in the City of Syracuse, New York, on the 22d day of May, 1915, and duly entered in the Oswego County Clerk's Office, on the 24th day of May, 1915, I, the undersigned, the referee, duly appointed in and by said judgment for that purpose, will sell at public auction, to the highest bidder, on Saturday, the 10th day of July, 1915, at 10 o'clock in the forenoon, at the front door of the City Hall, No. 67 East First Street, South, in the City of Fulton, County of Oswego, New York, the real estate directel by said judgment to be sold, and therein described as follows: ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Fulton, New York, known and describel as three rods off from the East end of Lot No. 1 of Block No. 512 of the original Village of Fulton.

Von Mackensen's Army in Hot Pursuit of Volka-Fed Russians; Germans Rushing Forward to Drive Allies from Arras-Ypres Line.

Russ. Campaign Broken Beyond All Doubt

Flushed with their victory in Galicia, along the entire eastern front, the Germans are rushing heavy battalions from that theatre to the western battle lines, where a terrific offensive apparently has begun against the allies.

The fall of Przemysl, officially admitted in London last night, was followed by news of the arrival of German reinforcements in Flanders and the province of Artois, France, where vigorous attacks already have begun on positions recently captured by the British and French.

The Germans already have succeeded in recovering some trenches taken by the British northeast of Givenchy and have stormed the chateau in the village of Hooge, part of which the British still hold.

Arrival of masses of new troops on the Arras-Ypres front means that the German General Staff is determined to check the allies' effort to "punch a hole in the German line" and in doing this there are many signs that they already have taken the initiative.

North of the sugar refinerry at Souchez the French captured a trench, three machine guns and fifty prisoners. Attempt of the Germans to make a counter attack at Neuville-St. Vaast was stopped by means of grenades, the French making a gain of 300 feet in the "labyrinth" south of the town.

Germans threw a few shells at Verdun and St. Die with their long-range guns, but caused no casualties or material damage. The French bombarded the south front of the intrenched camp of Metz. Along the rest of the front in the western theatre there have been desultory artillery exchanges.

East of Givenchy British troops succeeded in advancing to the German positions. A counter-attack by the Germans drove them out with heavy casualties and the loss of three machine guns.

The battle in the forest of Le Pretre came to an end, the Germans succeeding in recapturing most of the lost trenches. Hand-to-hand fighting has been in progress since Thursday night south of Neuville.

German cavalry have driven Russian divisions out of the villages of Lenen and Schrunden, east of Libau. Attacks by the Russians in the district of Rawoliany, on the Dubysa, have failed.

Fifteen miles east of Przemysl, German troops under General von Marwitz are fighting on the heights on both sides of Myslatyeze, and the army of General von Linsingen is about to cross the Stry northeast of the town of the same name.

Protesting against the sinking of two Portuguese ships by German submarines, the press of Portugal demands that the Government at Lisbon immediately sever diplomatic relations with Berlin.

Agents of the Thompson Steamship Line at Montreal received word yesterday of the torpedoeing and sinking of the British steamship Iona off the north coast of England. The Iona, a freighter, carried nop assengers. Captain and crew were landed at Kirkwall, Scotland.

The Danish steamship Cyrus, coal laden, from Burntisland, Scotland, for Copenhagen, was torpedoed and sunk, the crew being rescued and landed yesterday at Stavanger, Norway.

GERMANS WITH FRESH TROOPS HIT WEST LINE

London, June 5.—The Germans have again turned their attention to the western front, an dsimultaneously with the news of the arrival of German reinforcements in Flanders and the Province of Artois, France, come official reports of their attacks on positions recently captured by the British and French.

They have recovered some trenches taken by the British northeast of Givenchy and have stormed the chateau in the village of Hooge, part of which the British still hold.

The Germans also claim to be in possession of the sugar refinery at Souchez, the loss of which they haev not previously acnowledged. These actions are believed to indicate a resumption of fighting on a large scale.

For some time it has been reported that the French were slowly driving out the Germans from strong positions north of Arras and were, in the words of an officer just returned from the front, "punching a hole in the German line," To stop this movement and a similar one by the British, the Germans have dispatched many new troops to the Arras-Ypres line, and apparently are making an effort to take the initiative.

It is not believed here that any of these new detachments have been brought from the eastern front, as all accounts indicate that the Austrians and Germans are still vigorously attacking the Russians, who are falling back to positions between Przmysl and Lemberg.

$48,000,000 Divided by Ford Auto Co.

Detroit, June5.—The Ford Motor Company today sent another thrill through the commercial world when it announced that it had increased its authorized capital stock from $2,000,000 to $100,000,000, and had declared a stock dividend of $48,000,000, payable July 1. The $8,000,000 balance of capital stock not disturbed will be held in the treasury.

Henry Ford, owning 11,700 shares of the $2,000,000 in capital stock, will receivedd $27,840,000 of the newly authorized $48,000,000. James Couzens, vice-president, will receive approximately $5,000,000.

Mr. Couzens explained that the purpose of the enormous increase is to have the outstanding stock more nearly represent the value of the company.

A cash dividend on the original authorized stock of $2,000,000 was also declared today. The amount was not made public, but it is known to be large.

The Ford Motor Company, whose remarkable history reads like a romance, reported a profit and loss surplus on September 30 last, of $48,827,032. No item of good will appears in the Ford balance sheets; patterns are carried at $105,992, and patents at $59,767.

In 1914, an extra dividend of 100 per cent in cash was paid in addition to the regular quarterly dividend of 15 perr cent. This made a dividend of 160 per cent for the year. In 1913, dividends of 500 per cent were declared, which represented $10,000,000 in cash.

Mr. Ford recently announced that the rebate plan to purchasers of Ford cars in the twelve months ending August 1 was effective. By the plan, contingent upon the sale of 300,000 cars, a rebate of $50 a car is given. The plan involves a distribution of over $15,000,000 to owners of Ford cars.

German Submarines Built in Belgian Yards

Paris, June 5.—According to reliable information received here the Germans are utilizing the big Cockeril works at Antwerp and Liege and the Cavel works at Ghent for the building of submarines, and it is estimated that the output now has reached one submarine a week.

The hull work is carried on in the Antwerp yards of Cockerills, while the shaping of plates, frames and angles is handled by the Liege plant. The material from Liege is forwarded to Antwerp both by rail and river. The Carel plant, which is reported to be one of the best equipped engine building works on the Continent, has been taken possession of by the Germans, and the Carel equipment, which only recently was installed for building Diesel engines, is put to this very purpose, only that the Diesel engines go into the New German submarines.

The direction of the work at the Antwerp yards has been intrusted to German engineers drawn from the Howalt plant at Kiel and from the Germania works at the same place. The latter establishment forms one of the Krupp group.

The Liege shops are in charge of engineers from the Essen and Magedborg plants of the Krupp general system, while the shops at Ghent are being directed by engineers drawn from the Augsberg-Nuremberg shops at Nuremberg.

The Charlleroi electric works of Charleroi have been put to work by the Germans on electric gear for the new submarines, and the Antwerp automobile works known as Minerva also have been turned to account in producing pumps and other special work.

The number of men being utilized by the Germans in Belgium in turning out these new submarines is said to be nearly 15,000, disposed as follows:—Corkerill works at Liege, 8,000; Corkerill works at Antwerp, 4,000; Corel works at Ghent, 1,000; Charleroi electric works, 1,000; Minerva works, 1,000.

The Sevany plant of Cockerill's is said to be finishing up all the hull material that enters into the submarines, leaving the Antwerp yard only the final shaping and tuning up.

The Germans are using Belgian workmen in large numbers in the submarine work. Many of these men are prisoners, but others were taken when the works fell into German hands. The position of these Belgian workmen is tantamount to that of prisoners. Mixed in with the Belgian contingent are large numbers of expert German artisans, many of them detailed from other service, who act in the capacity of foremen and guards.

The new German submarines are said to exceed in size anything heretofore turned out at Kiel or Wilhelmshaven. The cruising radius of the larger of the new undersea boats is said to be nearly four thousand miles. This will account for the appearance of a German submarine at the Dardanelles, since the steaming distance from Antwerp to the Dardanelles straits is approximiately 3,000 miles.

The German submarines constructed at Antwerp are reaching the high sea both by canal and the Scheldt. The Holland part of the Scheldt, it is said, has been navigated under water. The canal by Ghent, however, makes it possible to reach the sea without leaving Belgium. To date the Germans are supposed to have lost seventeen submarines, but the total number of undersea boats which the Germans now possess exceeds greatly the number on hand when war was declared. German naval power, in the opinion of experts, is gaining strength in destroyers, submarines and scout craft as the war progresses.

Hunger in Mexico City Kills 500 Daily

International News Service.

The following graphic uncensored statement of actual conditions in Mexico City was received by mail from an American resident. The censorship on telegraph matter is prohibitive:

Mexico City, May 23.—The terrors in revolution-ridden Mexico City have reached a climax in the unprecedented famine. The scarcity of food here is at a stage unequalled in the world, except, possibly in ravaged Poland.

The average daily deaths from starvation have jumped from scores to hundreds since the first week in May. It is estimated by the Ayuntamiento—the Town Council—that 500 persons are dying every day from hunger or from causes immediately superinduced by lack of food. It is predicted by the Ayuntamiento that within two weeks, unless communication is established with the producing states, the daily deaths due to lack of food will rerach 1,000.

(This estimate was made twelve days ago. Communication has not been established).

The population of Mexico City is approximately 500,000. If all the corn, frijol, rice, cereals and other foodstuffs secreted in the cellars by Spanish merchants were commandeered tomorrow for the starving women and children of the peon and middle classes, it is doubtful if each family would receive enough rations to last them seventy-two hours.

Supplies in the city are exhausted because the so-called armies which possess all lines of communication to the tsate of Michoacan, Queretaro and Vera Cruz confiscate all incoming foodstuffs.

The indifference of some higher officials is exemplified by an appropriation just made of 500,000 pesos to send a commission to Washington on a junket while only 50,000 pesos was appropriated to relieve the starving thousands.

Since the food situation became acute the number of beggars underfoot has increased a hundred fold. Every doorway is littered with them. They cluster like flies in front of clubs and the scanty restaurants, swarming around the lucky with their pitiful appeals for just a bite of bread.

The majority of the beggars are little mothers, so shrivelled with hunger that their skins look like cracked leather. Their clothes are rags; they show their breasts unashamed. They clutch for money food—anything—as ravenously as street dogs grab a thrown bone. Here they have literally taken the place of the street dogs, for they have long since eaten the dogs.

Then there are the cripples which the revolution has produced so numerously in every city, town and pueblo. They crawl about in shreds of clothing, and when you step around or over them, thrust at you stumps of arms or legs and whine to you by the love you bear the Virgin of Guadalupe to give them food or centavos.

And in every street in the central part of Mexico City roam packs of starving, half naked, incredibly filthy children who are forever darting in and out of throngs, crying to the skies for something to eat.

When the starving peons are not longer able to shuffle about the streets plucking you by the sleeve, entreating alms, they crawl into doorways—half a dozen huddled together like dogs—and in morning the city refuse carts come along, pick up their bodies and take them away.

Captain Peterson of the Swedish steamship Lappland and his crew of 19 men, together with four women, were landed at Peterhead, Scotland, yesterday following the sinking of his vessel fifty-five miles off the coast of eastern Scotland. No submarine was sighted.

The British steamship Inkum, New York to London, was torpedoed forty-three miles southwest of Lizard Head by a German submarine. The crew was landed at Falmouth by the Norwegian steamship Wendla.

Opinions

The New Baggage Rule

The new regulations for the valuation of a passenger's baggage furnish a striking illustration of the really supernatural skill which American railroad managers manifest in their effort to impose the maximum annoyance on their patrons to secure the minimum advantage for themselves.

For years there has been uncertainty as to the extentof a railroad's liability for loss of baggage. The roads strove to limit it artifically to $100, but the courts quite generally held that a passenger could recover the amount of his actual loss. With the aid of Senator Cummins, of Iowa—who ought to have known better—the roads secured a law authorizing them to tax a passenger 10 cents on every $100 of valuation above the first $100 he puts upon his baggage.

Enforcement of this law began this week. Every passenger was forced to put a value upon his trunks and register in writing that value, with his name and address. What will happen at the checking counters on rush days is easy to foresee.

The railroads may find a small profit in the additonal sums paid by travellers for baggage insurance and by escaping responsibility for the loss of valuable baggage not insured. They will, however, have to hire much additional help, and will encounter the opposition of an irritated public which will feel itself imposed upon. The latter consideration, however, appeals to but few railroad managers.

The public in turn will find a new tax added to the cost of railroad service. In many cases the trunk alone, without its contents, is worth the $100 for which liability is admitted. On a short trip, to a suburban town for instance, the charge for safeguarding baggage may easily exceed the actual fare.

Yet railroad managers complain of public hostility to the roads, and express amazement that anybody could hope for better results from Government ownership and operation than from the present system!—N. Y. American.

The Steel Corporation's Victory

The complete victory of the United Steel Corporation in the dissolution suit decided yesterday at Trenton will be received by the country with unmixed satisfaction. It will be taken to prove that the era of what might be called experimental prosecutions under the Serman anti-trust law has come to an end.

Court decisions have now given that law a complete and rational construction and marked out the limits within which big combinations in industry must confine themselves in expanding their trade and in conducting competition with weaker rivals. Most big concerns are anxious nowadays to observe the law's provisions against restraint of trade and against attempts at monopolization unfair to competitors and injurious to the public. The United State Steel Corporation's present policy and record are unimpeachable. It was brought into court for actions done in the past, when the scope of the law was not entirely clear, and the court holds that those actions were not illegal and cannot subject the corporation to dissolution.

The country now has its eyes fixed on the future. It is looking forward to a revival of industry and prosperity which is to be accompanied in "big business" by a far larger measures of fair dealing and respect for the rights of competitors than was the rule in a less enlightened past. The decision in this last prosecution of primary importance practically closes past accounts, and the country is satisfied to see them closed.

What the public wants most is some assurance that industry and transportation can be resumed at full speed and without repressive interference. The anti-trust law has fully proved its worth as a corrective measure. It is now time to [illegible] the security which it gives to [illegible] which have no quarrel with its regulative provisions and have willingly abandoned the mistaken monopolistic or near-monopolistic methods of the past.—N. Y. Tribune.

THE FOURTH AT HOME

The Fourth is not far away and a great Fulton family picnic on the grounds near the standpipe or the fair grounds, could be made a safe and sane Fourth as well as an especially jolly affair. With field sports, speeches, music and a parade of pageant semblance, the day could well be made happy and significant.

In the American Magazine Sydney Gulick says, "Great progress has been made in making Independence Day "safe and sane." Why not make it really significant in our national life? Let us make it, not only a day of commemoration of a glorious past, but also a day constructively productive of a better present and a greater future. To make the day truly significant my proposal is as follows:

"Make the Fourth of July our great national birthday, the one day in the year when new individuals are admitted to citizenship in this Republic. Let the ceremony of administering the oath of allegiance be restricted to a single day, and let the service be dignified and patriotic. And why administer the oath of allegiance only to aliens who become Americans? Is it not important and highly desirable that every young man, though born in the United States, and of American parents, shall also in a formal way acknowledge his citizenship and swear his allegiance to the Stars and Stripes?

"How impressive and significant would the Fourth of July become if on this national birthday all young men who have attained their manhood, together with all aliens who desire citizenship in this land, should join in a formal service of admission to the rights and duties of citizenship?"

The keynote of Mr. Gulick's suggestion is the unity of citizenship demonstrating itself in its picturesque setting—amid the waving Stars and Stripes.

This, the spirit of unity is one which Fulton has need to develop. At no time do the people of this community meet and join their voices in one issue of common interest. The time is ripe for this stimulus, without which no community, or nation, can live and grow and prosper.

Fulton needs sadly the development of a community interest.

GOVERNMENT LOSES SUIT TO DISSOLVE TRUST

The United States District Court for New Jersey, in session at Trenton yesterday, decided the Government's suit to dissolve the United States Steel Corporation against the Government and in favor of the corporation.

The Court was composed of Judges Buffington, Hunt, Woolley and McPherson.

Judge Buffington wrote the principal opinion, and Judge Woolley wrote a concurring opinion, in which Judge Hunt concurred. The Court stated that "all the members of the court are in agreement as to the decree that will be entered, although they are not in complete accord concerning every step by which that result is reached."

The Unanimous Decision:

1. Refuses to dissolve the corporation. Declares the corporation's activities do not violate the Sherman law.
2. Calls the "Gary dinners" for fixing prices unlawful, but points out that they were stopped before the suit was begun.
3. Refuses all injunctions sought by the Government.
4. Points out that the corporation's trade practices will now come under the new Federal Trade Commission.

Former Attorney-General Wickersham, who handled the United States Government case for the dissolution of the Steel Trust, made this comment tonight on the United States Circuit Court decision:

"I am not surprised at the decision because recent decisions in the same court have prepared me for this result.

"I presume, of course, that the case will be appealed by the Government to the United States Supreme Court, and that a final decision will be made there."

REJECTED IMMIGRANTS TO REMAIN DURING WAR

New York, June 4.—Deportation of Russian immigrants pronounced "undesirable" has been prohibited by Secretary Wilson until the end of the European war, that they may not be exposed to risk from belligerent vessel.

The order is understood as applying to immigrants of all other warring nations.

Word to this effect was received here by the Hebrew Sheltering and Aid Society.

BUSINESS BOON IN TRADE COMMISSION

Atlantic City, June 4.—William Hamlin Childs, president of the American Coal Products Co., addressed the National Association of Clothiers here last night. He said that the only way by which the atmosphere of uncertainty surrounding the undertaking of big business enterprises can be removed is by the establishment of the Federal Trade Commission.

"The reason why corporation officials have been timid in going forward with many entirely legitimate enterprises has been because they desired fully to obey the laws, but could not find out what such laws meant, and when one official statement or court decision seemed to clear the way, the week following a contrary statement or decision made the confusion worse.

"Now, however, in the Trade Commission there is a distinct note of hope for this situation. The government has given us the commission as the means by which it believes—and beyond a doubt in all sincerity—that the troubles and discouraged business situation can be met. It is the duty of business men to accept this offer in the spirit in which it has been made, and to adopt the suggestion of the government officials that they cooperate in working out the great problems involved. They should not resist everything new that is proposed on the ground that because they are unfamiliar with it therefore it is visionary and impracticable."

W. J. PENTLOW WRITES REGARDING CALIFORNIA

W. J. Pentlow of California, who it at the Exposition, writes friends that the attendance of eastern people at the exposition is daily increasing.

Today the new high school stadium which cost San Diego $250,000 was dedicated. The school and stadium together represent an expenditure of a half million dollars.

Evidently San Diego has a populace interested in its educational facilities.

Do you know the real clean kind of Boston Brown Bread? Get Black's baking and you shall have the answer. adv

Scrap Book

Wanted His Reward.

A clergyman, whose name is not necessary to the chronicle, had invoked Mr. Choate's services in the settlement of a much involved and heavy estate. He received his bill in due time. Mr. Choate, it may be remarked by way of parenthesis, did not become a millionaire and thus enable himself to accept an office whose annual expenses are $50,000 more than its emoluments by omitting to send bills to clients. The clergyman accordingly was not overlooked.

The client appeared in a few days with a smile of deprecation.

"I always understood, Mr. Choate," he objected, "that you gentlemen of the bar were not in the habit of charging clergymen for your services."

"You are much in error," returned Mr. Choate firmly, "much in error. You look for your reward in the next world, but we lawyers have to get ours in this."—Denver Post.

Worthy.

I may not reach the heights I seek;
My untried strength may fail me,
Or halfway up the mountain peak
Fierce tempests may assail me;
But, though my goal I never see,
This thought shall always dwell with me:
I will be worthy of it.

I may not triumph in success
Despite my earnest labor;
I may not grasp results that bless
The efforts of my neighbor;
But, though life's dearest joy I miss,
There lies a nameless strength in this:
I will be worthy of it.

—Ella Wheeler Wilcox.

Reckless Generosity.

The late Rev. W. W. Freeman related a story illustrative of the way that a man's heart can swell and prompt him to great liberality under some extraordinary conditions. A big, raw boned, red headed young farmer entered his parlor one day, accompanied by a shy but comely girl, and desired him to perform the marriage ceremony. He did so, and when the fateful words were spoken that made the couple man and wife, the young husband drew from his pocket four bright silver quarter dollar pieces and, extending them toward the minister in his open palm, exclaimed, "There, Brother Freeman, just help yourself until you are satisfied." The minister took one.—Argonaut.

Twisted Sibilants.

A very pretty girl from a western town was the latest arrival at a select boarding school in Massachusetts. Being pretty and well dressed, she became very popular.

She was elected to be an usher for the monthly musicale, and, being painfully shy, she was much wrought up over it. She never could do it—no, never! But the election was positive; there was no drawing out. The evening found her a perfect flutter of pink frills, awaiting to receive the early comers. Each of the other young women who were acting in this capacity bore forward an imposing auditor, and Elsie found herself inquiring of a very old and elegant gentleman in a voice scarcely audible:

"Sir, shall I show you to a seat?"

"What? What? What?" demanded the austere old fellow, holding his hand to his ear.

"Sir," she screamed in a flustered voice, "shall I sew you to a sheet?"—Harper's Magazine.

The "Spell" of Mrs. Langtry.

The Jersey Lily once neatly scored at the expense of George Bernard Shaw, who was then much talked about in London and who was regarded by most folk as the incarnation of audacious egotism.

He was commenting on the limitations put upon him in his newspaper articles, among which were characteristic criticisms in the lines of music and drama. He declared that such was the censorship over him by his editors that he really had no freedom to express his opinions in the English press, and it was to Mrs. Langtry that he said:

"I shall publish a magazine some of these days, in which I shall print my opinions on all the topics of the day. I have enough of them to spare. On art, literature, philosophy, music, the drama, socialism, religion and every other subject this magazine shall reflect Shaw. I shall write every line of it too. The experiment may be futile, but the first step shall surely be taken."

"What shall you call your magazine?" Mrs. Langtry inquired.

"I'll give it a concise and appropriate title by naming it after myself."

"Ah!" sweetly spoke the Lily. "And how shall you spell it?"—Detroit Free Press.

A High Calling.

Tommy was eighteen, and only the recording angel knew what was the age of Aunt Katy, but the little old colored woman and the college fisherman were each getting their first taste of New York life that winter. One effect on Tommy was to make him want a silk hat.

"Now, what do you think of Tommy's wanting a silk hat, Aunt Katy?" exclaimed Tommy's mother, who was having a hard time adjusting herself to having for a son a young man instead of just a boy.

"What he want wid a silk hat? He ain't no preacher."

"But, Aunt Katy, other people besides preachers wear silk hats. Haven't you noticed the men in silk hats on the streets? Every other man you meet has one on on Sunday."

"Yassum, an' I jes' been tryin' to figger out where all them preachers [illegible]"—New York Post.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

Please tell me how to prevent water leaking out of the grease cups at either side of the water pump?

You are using too light a grease in these grease cups, with the result that when the motor gets warm the grease becomes very fluid and allows the water to leak. In hot weather you should use a heavy grease. Probably the hardest that you can buy will be the most satisfactory. However, as soon as cold weather sets in substitute a lighter grease.

On my car a universal joint is used between engine and transmission, this universal consisting of a cross floating in the yokes of clutch and shaft. The assembly, unless kept carefully adjusted, is noisy and does not retain oil for any length of time. Could I substitute a leather universal?

The joint between the engine and gear box is designed to take up any misalignment between the clutch and the gear shift, but it often happens that the gear box drops, throwing the shaft out of alignment to such an extent that the drive becomes noisy, and this is probably the cause of your trouble.

It is doubtful if the fitting of a leather universal would be wise, because, although it would silence the drive, it would take care of the misalignment, the noise which shows that there is a faulty alignment would be gone, and there would be no warning to enable you to know when to correct this. It occasionally happens that a sudden jolt will cause a drop in the level of the gear box due to a looseness in the bolts which hold it in position. This can be remedied by restoring the gear box to its proper alignment.

It is also very probable that the rear axle gears are badly out of adjustment and that the vibration produced as a result of this is transmitted to the joint between the engine and gear box and given off at that point. You should not only have the engine and gear set aligned, but also have the rear axle inspected and the gears readjusted, should it be necessary.

I change the oil in my crank case about every 500 or 600 miles. Would the oil I take out be all right to use in the transmission or would it wear the gears?

It is a good idea to use the oil from the crank case in the gear box. After use for considerable time in the motor the oil takes on a gummy consistency, which renders it unfit for good motor lubrication, but good for use in lubricating the gears in the gear box on account of its tendency to adhere to the gear teeth. It is better to strain it for use in the gear box.

My motor heats too much and the thermo-siphon system does not do its work properly or the heating is caused by another source. I believe my carburetor is adjusted properly, there is no slipping fan belt or loss of compression, but still the engine overheats. As the car has not been run over 3,000 miles the carbon cannot be the cause. Can you explain this?

It is most likely that your trouble is due to driving with the spark retarded too far, although it is impossible to say with certainty that this is so. Try driving your car with the spark advanced as far as possible at all times without the motor knocking.

There are many other things that might cause your motor to overheat, however—carbonised cylinders, poor water circulation, incorrect timing of motor, dragging brakes or possibly excessive friction. Just as you state, it is not likely that the trouble is caused by carbon, but in looking for the cause it is not wise to neglect this possibility, for the reason that motor troubles are often caused by the most unexpected circumstances. Note whether the water is circulating freely, and if not try to find where the trouble is, whether it is due to dirt, loose pieces of rubber obstructing the passages or what not. Remember that with a thermo-siphon system the water will not circulate at all as soon as the level drops below the discharge header in the top of the radiator. Circulation of water in the thermo-siphon system is dependent on the fact that the column of water, considered as such for simplicity, in the pipes and water jackets is lighter than the column in the radiator because it is warmer, and water expands and grows lighter as it is warmed. Therefore if the level of water drops below the outlet pipe circulation must stop. It is well to note whether you have not been running with the water below this point. Or it is possible that you have a slow leak and that in the course of an afternoon enough water leaks out to lower the level enough to stop the circulation, as described.

If there is dirt in the radiator flush it out thoroughly, and if there is any grease in the water wash it with a hot solution of sodium carbonate in water, one handful of carbonate to a pail of water. See that the rubber hose connections are in good condition.

As a last resort check up the valve timing by the marks on the flywheel, and if there are no marks you had better write to the maker for information on this point.

My car used to make about eighteen miles per gallon of gasoline. This year it is not making over eight. It misses until speed gets up to ten or twelve miles per hour. When the engine becomes heated the spark lever works very badly. What is the cause of this?

Since your car misses only at speeds below twelve miles per hour and then only when warmed up, it seems likely that the heat causes a slight leakage either by warping a valve or by expanding a valve stem. Test the compression when the motor is warm, and if any cylinder is weak see whether it is not due to lack of clearance between valves and push rods or to a warped valve. These defects would cause enough leakage to make the motor miss fire when the throttle is nearly closed, but yet not enough to make it miss at wider throttle openings.

Faulty carburetion may also be the cause of the misfiring. Reduce the richness of the mixture when running slowly and see if this makes any difference. It is possible that the reduction in charge weight caused by the heating of the air is sufficient to decrease the ratio of air to gasoline enough to prevent combustion, although when the motor is cold enough air is taken in so that the motor will run all right.

Another possibility is that there is a leak in the intake manifold due to its warping out of shape when heated. Tighten up bolts holding the manifold, and if necessary put in new gaskets. See that the brakes are not dragging and that the spark advance has not slipped so that you are running with it retarded.

Why are so many manufacturers doing away with radius rods?

The principal reason for discarding the radius rods is simplicity. It is obvious that when the drive is taken directly by the springs the manufacturer has saved on the cost of production and also reduced the number of wearing parts. Many manufacturers believe that the drive can be just as successfully transmitted through the springs as through radius rods, but as both constructions are widely used it is difficult to say which is better.

Is it easier to pump up a tire with the wheel jacked up when the weight of the car is resting on the wheel?

Theoretically it is slightly easier to pump up a tire when the weight is removed, but the difference is so small that it is doubtful whether any ordinary gauge would measure it. The extra work required represents the amount of work to lift the weight on that wheel through the distance that the inflated tire lifts the rim off the ground, this distance being approximately three inches. But this is divided up among so many pump strokes that the extra work is not felt, and it is probably just as economical of energy to do it this way as to jack the wheel up.

What are the specific advantages of six cylinder over four cylinder motors?

The advantage of greatest importance is that the six has a more even torque, or turning effort, than the four, because there are three explosions to each revolution against two per revolution in the four. The average six will throttle lower than a four of the same size.

Kindly inform me how to determine when the front wheels are out of alignment, and how can I straighten them?

The alignment of the front wheels can easily be determined by measurement. With the wheels pointing approximately straight, measure the distance between the two wheels, at the front and rear. They should be one-quarter inch nearer at the front, but not any more. The adjustment is made by shortening or lengthening the tie rod.

Please tell me how to place old shoes over new, and is it a practical thing to do?

To use the old tires do not cut the bead off. You have to take the casing off the wheel and force it into the old casing and then apply both to the wheel at once. Many claim this gives a practically puncture proof tire and one that lasts longer than the single shoe. It is desirable to have good inner tubes on account of its being too much trouble in changing in case an old tube gives way. So far as heat and sand are concerned, many claim they do not seem to amount to anything, though others declare they render the idea impractical. The old casing is supposed to fit so tightly over the good one that there is no slippage, and it protects the good tire from road heat. Some drivers, however, cut slits in old casings around the whole tread from bead to bead. They say it makes them easier to apply as well as to allow ventilation. These slits are cut about every four inches and about one-half inch of the material taken out. Authorities disagree on the practicability of the scheme of using old shoes in this way, but individual cases seem to have been satisfactory or the reverse according to the conditions and the [illegible] used in applying the old shoes.

ELABORATE CREATION.

Frills and Bows Make Taffeta Frock Very Smart.

AFTERNOON GOWN.

Some frocks this season are plain, but we would by no means include in the category the frock pictured in the illustration.

The gown is developed in pale gray taffeta, and the skirt is covered with wide circular flounces held beneath a straight panel at the back. The bodice is of taffeta, with sleeves and collar of white net, finished with stiff frills. The wide girdle ends in a huge bow placed sidewise over the hip.

Domestic Hints.

Never use linen to clean mirrors or windows, as it sheds lint and often causes streaks.

Wash linoleum and oilcloth with lukewarm water, then polish it with a soft woolen cloth which has been dipped in milk.

Use no soap on window glass. Use old muslin and clean, soft water. A cotton cloth dipped in a little alcohol will add brilliancy to the final rub.

If white of egg is applied with a small cameishair paint brush to fly specks on gilt frames, then rubbed gently with a soft cloth the specks will disappear.

When your house plants look a trifle dejected and water does not revive them try putting coffee grounds on the roots three times a week; then once a week give them a tablespoonful of olive oil. Do not allow the earth to become hard and dry.

The Useful Sailor.

Every one is glad that the sailor shape is in evidence in spring millinery. Many hats there are of picture type, poke shapes, too, that are vastly becoming. But for general wear nothing is so smart as the sailor. It will probably be worn a good deal when warmer weather comes.

Ether Removes Grease Stains.

Ether is a very good thing to remove grease stains from wearing apparel. Another method is to dip the garment in tepid water, then place it in cold water to which a little borax has been added. The article should be soaked for several hours and then dried quickly.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

COTTONS ARE POPULAR.

And Can Be Found In Prices to Suit All Incomes.

Never have there been prettier small patterns in cotton than are found this year, nor are they expensive, since they are found in every material from 25 cent dimities to $2 and $3 embroidered chiffons.

Canton crapes in tiny flower designs, voiles of various prices and even our old favorite, dotted swiss and polka-dotted mousselines, may all be used for dainty little frocks, of which every one needs two or three, whether one remains at home or goes away for the hot season. The sensible woman who must consider the laundry selects one that will not soil easily, a well covered design or else plain white. She relies on what will always give her a fresh looking frock, not too elaborate, one that does not need to be laundered more than once.

Some women always send their wash dresses to a cleaner for the first laundering in order to set the colors and keep the shape of the skirt, but any of the materials should stand the home tubbing if the dress is first dipped in salted water and not hung in the sun to dry or sprinkled and folded up until ready to iron.

These sheer cottons and light silks stand much more fullness and flouncing than is possible in heavier fabrics, and milady can revel in billowy ruffles and gathers and puffings to her heart's content when hot days come.

Military Boot.

The severe shoe is the exception except for outing wear, and the military finish has the feminine cast that reminds one of the "fille du regiment" or some other light opera heroine, with its dainty patent leather finishing and high heel and tassel which are found even on the ties of the tennis shoe.

Night Terrors Are Serious.

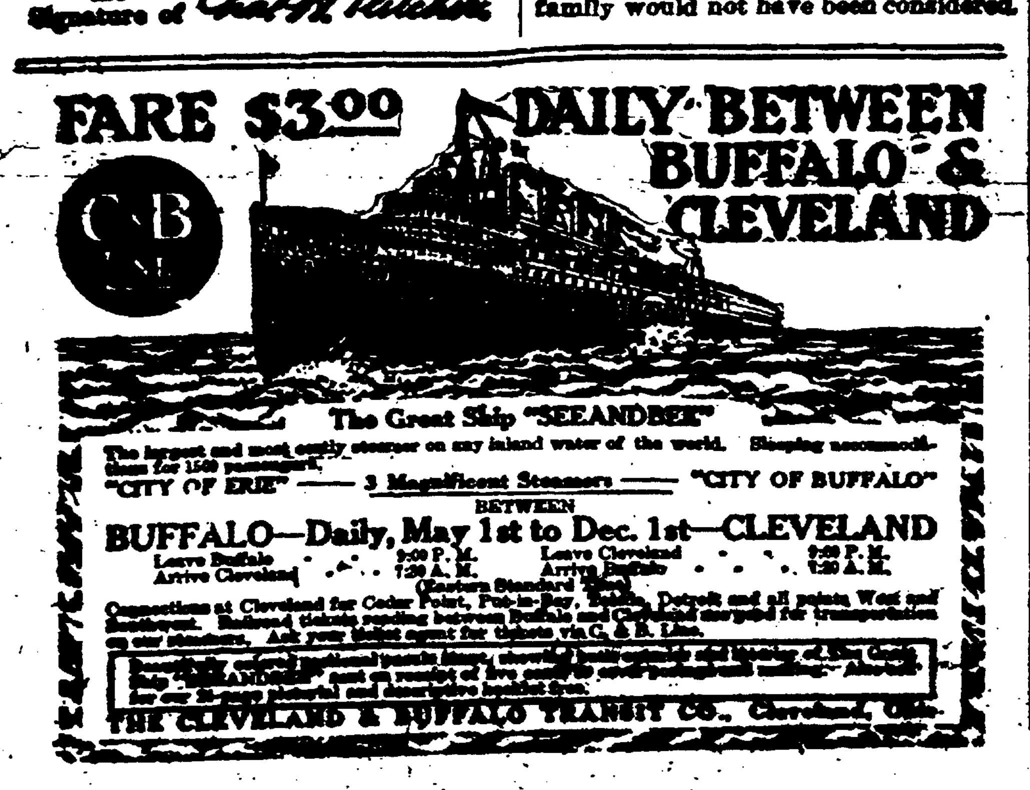
Night terrors are due to fault in the nervous system which makes it easily excited by any slight irritation, even though that irritation be in some remote part of the body. The child awakens suddenly with violent screaming and gives abundant evidence of great fear. This may be repeated night after night or at less frequent intervals. Night terrors usually attack children between the ages of three and eight years, and in nearly every instance the attack comes on within two or three hours after the child has retired.

The face of the child shows the extreme terror which he is in. His eyes are widely opened and generally fixed upon one object. Sometimes a clew is given to what frightened the child by his crying out the name of the thing or person. During the attack the child will cling to others for protection. This period of extreme terror lasts usually only a few minutes, but it may be prolonged to nearly half an hour. Following this is a period during which the child recognizes persons and his surroundings, but for a considerable time he remains in a state of mild fear and dreads to be left alone.

Night terrors should never be allowed to continue untreated. They are indications that there is a serious fault in the nervous system, and this should receive the most careful and thorough consideration.

ABOUT A MILLINERY SHOP.

Mrs. So-and-so started a millinery store with some money she possessed of her own. She built up a thriving little business and put up a sign over the door of her shop reading, "Mrs. So-and-so's Millinery." Later on her husband entered into the business with her, and they changed that sign to read "So-and-so's Millinery." Then one day Mr. So-and-so died. His family promptly claimed that the business was his. And so the surrogate—that is, the judge having jurisdiction over the probate of wills and the administration of estates—also decided that the business had belonged to her husband and so was his estate. Then very generously he permitted the widow, who had founded the business and built it up, to deduct from the $1,000 in cash which constituted the profits on hand at the time of Mr. So-and-so's death the $100 with which she had started the business! The reason why the husband's family claimed the business as his was that, it being personal property, they could obtain one-half of it and the wife one-half. If, however, the wife had died, leaving any amount of personal property, the husband would have received the entire amount. Her family would not have been considered.



Dancing Gown of Orchid Silk

Quaint Trousers Effect, Girdle of Opalescent Bandings and Bodice of White Chiffon

Designed by Joseph, New York.

ORIENTALISM, with all its glow and sparkle and color, is suggested by the gown in this illustration. Dreams of the harem and the lazy life indulged in by its inmates dance before our mental vision. The skirt only suggests, however, the trousers of the harem since it is developed upon an underskirt and simply turned up at the bottom and sewed fast to the underskirt.

The long waisted bodice is attached to the skirt by a girdle of opalescent bandings, the same trimming outlining the top of the bodice. The gown is developed in orchid silk. The bodice is of white chiffon. The trimming around the top of the bodice and the girdle is linked together by strands of iridescent beads. Chiffon is used for the tiny sleeves; also to build up the top of the bodice. Both sleeves and neck are outlined with iridescent beads.

There is a marked difference in the belts and girdles of today. In the first place, they are much narrower, and, in the second place, nearly every one of them has a military touch.

Gilt tassels are being worked very hard to do their part toward giving the military note, and brass buttons are employed to add to the soldierly appearance. Very convenient for small change are the two small pockets which frequently appear on each side of a belt. The coin is quite safe, for each receptacle is provided with a button and buttonhole to fasten the pocket flap to the belt proper.

The somberness of a black moire girdle is relieved by three rows of gilt braid, arranged down the front, and two gilt tassels, which suspend from the points of a turnover effect placed at the top of the girdle.

Biscuit and blue is a substantial old fashioned combination, and its revival is cordially welcomed. For the street it is admirable in cloth or linen, and we shall see much of both of these before the summer is advanced. In the evening there is a strong inclination to drop dark blue over mastic colored satin, but the effect is not so good as when the colors are contrasted in a less violent way. A biscuit colored satin girdle on a blue chiffon gown goes very well, and blue collar and cuffs in the cavalier fashion on an afternoon frock of mastic colored satin are well worth adopting.

ANNA MAY.

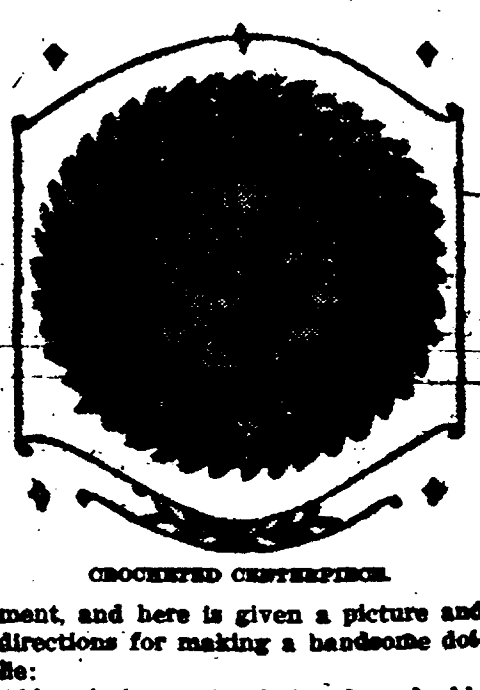
ABERDEEN DOILY.

Crochet Is the Very Newest Fad In Fancy Work.

ADORNS THE HOUSEHOLD.

Handsome Linens Trimmed With Lace Made by Crochet Hook—Many Articles of Wearing Apparel Also Developed by This Means.

Crochet hooks as well as knitting needles are active these days in the greatest revival in the art and craft of these handiworks which has been known in twenty-five years. Of course knitting for the soldiers in the European war zone began the craze, and now women are never happy without a pair of knitting needles or a crochet hook in their fingers. Many wonderfully attractive articles are thus fashioned for feminine or household adornment, and here is given a picture and directions for making a handsome doilie:



CROCHETED CENTERPIECE.

Abbreviations: ch, chain; d c, double crochet; tr, treble.

Materials: Crochet cotton No. 26 and a No. 4½ steel crochet hook, also a circular piece of damask, 6¾ inches in diameter. The doily measures 9¼ inches across.
